Broadcast Advertising

RETAIL PROMOTION COMMITTEE PLAN

If you have not already pledged the financial support of your station to the Retail Promotion Committee Plan, be sure to read the letter you received last week from Chairman Paul W. Morency of WTIC. It will bring you up to date on this project—the success of which is now assured.

You will find a list of the stations that have already pledged their support; you will learn more about the purpose of the plan—what it is, who will prepare it and what it is designed to do; you will read, too, in their own words, what outstanding leaders in the broadcasting industry think of the project.

While participation in the Retail Promotion Committee Plan is open to every radio station, the enthusiastic and unanimous endorsement given it by the NAB Board suggests the great desirability of every NAB member station putting the full weight of its support behind the plan.

After you have read this material, fill out your pledge blank and send it to the Retail Promotion Committee at 535 Fifth Avenue, New York, N. Y.

Additional Member of Retail Promotion Committee

John Nell, Retail Specialist of WOR, has accepted appointment to the Retail Promotion Committee, according to an announcement by Chairman Morency in New York.

Promote Esquire Maybe Make Money

Many member stations have forwarded letters from the sales manager of "Esquire" Magazine, offering radio stations the magnanimous opportunity of selling 1943 Varga Girl Desk Calendars on a per-inquiry basis. Imagine "Esquire" accepting advertising on the same basis! That ought to be enough to dissuade any broadcasting station from promoting this item in partly paid-for time.

Liberty Mutual and the "7th Column"

Undoubtedly the current "Smash the 7th Column" campaign for the Liberty Mutual Insurance Company is one of the cleverest and most timely activities of its type that has been launched since the outbreak of the war. About two months ago, Editorial Services of the Institute of Public Relations sent many member stations five-minute transcriptions, dealing with the "7th Column" and containing an integral reference to the Liberty Mutual Insurance Company.

After a careful investigation of the situation and a study of the transcription, we are convinced that this does not differ in any essential respect from numerous other free-time requests.

The theme of the campaign is the copyrighted property of the advertiser. It is being promoted in full-page space in a large list of magazines and has appeared as a paid advertisement in at least 17 daily newspapers.

While the campaign is obviously designed to reduce accidents in industrial plants and the home, it has a very definite and distinctive tie-up with the business of an advertiser.

Let's work together to try to get this campaign on the air on a commercial basis. The theme certainly deserves wider exploitation and what medium is better suited for the purpose than broadcasting.

OWI MEETING

A three-day session was held in Washington, Monday, Tuesday and Wednesday, December 28-30, under the auspices of the Office of War Information. William B. Lewis, Chief of the Radio Bureau of OWI, summoned all regional radio consultants and the various district OWI directors and a full attendance turned out.

Mr. Lewis stated that as a result of the meetings they had gained a much better understanding of the program, as well as the manpower, problems of the radio stations and felt that they are now in a better position to gear their own effort in light of the stations' situation, as well as to be of assistance in the manpower problem.

It was officially stated that the station announcement plan will go into effect on January 18. The plan has been thoroughly tested throughout the month of December in Philadelphia and some of the "kinks" have been ironed out. The station transcription plan is due to become effective on February 1. The delay of the effective date of these plans in no way indicates any lack of interest or enthusiasm on the part of the OWI officials, but is entirely due to a feeling on their part that the later date will enable them to start the plan off more effectively.

NAB joined with CBS and NBC in entertaining the delegates at a cocktail party Monday afternoon at the Washington Hotel. In addition to those attending the meeting, members of the FCC were invited and many, including Chairman James Lawrence Fly, were present.

CIVIL SERVICE COMMISSION THANKS RADIO INDUSTRY

Neville Miller has received the following letter from Harry R. Mitchell, chairman of the Civil Service Commission, thanking radio for its manpower announcements:

"As you know, commencing the first of the year the Office of War Information will issue all Government spot radio notices. This week will see the last of the Manpower Announcements which for nearly two and one-half years we have issued through the generous cooperation of the National Association of Broadcasters.

(Continued on page 2)

NAB Reports
THE NATIONAL ASSOCIATION OF BROADCASTERS

CIVIL SERVICE COMMISSION THANKS RADIO INDUSTRY

(Continued from page 1)

"Perhaps it may seem superfluous for me to again express our gratification and thanks for the unprecedented cooperation which your Association has given us during these critical times, but I could not close the record without again expressing to you my own personal appreciation to yourself, to Mr. Stringer, and to your staff. Mr. Stringer has not only been most helpful but has continued throughout the almost two and one-half years of our association to make our contacts most pleasant at all times.

"The problems of these war times necessarily make changes, as will the problems that follow the end of the war. It is highly possible that NAB and the Commission can again cooperate in meeting some of the problems. It is most gratifying to feel that we would again have your friendly help if it becomes necessary. I hope that you will convey to every member of your organization, and to the nonmember stations, through your bulletins, the sincere thanks and appreciation of this Government agency charged with the problem of recruiting and placing Federal personnel where it will be most effective in the war program."

200 MARINES GO HOME VIA RADIO

Credit for an outstanding Christmas broadcast, especially tailored for a station's service area, goes to WROK, Rockford.

Appearing on the 1:30-3:30 p. m. Christmas day broadcast, via transcription, were 200 northern Illinois and southern Wisconsin youths stationed at the U. S. Marine Corps base at San Diego.

Knowing that Christmas furloughs would be out of the question for the detachment, WROK decided, early in December, that the staff should arrange to reunite the young Marines with folks back home.

With the OK from General Manager Walter M. Koessler, Bill Traum, promotion director, went to San Diego. With enthusiastic Marine Corps cooperation all along the line he arranged the Christmas show.

Partners in the undertaking were 326 Rockford business firms. Credits to these firms were given during the two weeks before Christmas in (1) advance announcements (2) listing in double truck ad and (3) individual Christmas greetings. The Christmas program, itself, was entirely void of commercials.

The San Diego Marine Corps Base Band furnished the music. Betty Rhodes, Paramount star, and former Rockford girl, was guest.

According to the Marine Corps the 200 young Leathernecks comprised the largest contingent ever enlisted in one group from a sub-station.

The Rockford *Morning Star*, December 26, commented: "The broadcast offered an equal share of humor and pathos. Every greeting was a drama in itself—a personal message from the Marine to his loved ones—and for a few seconds, it brought 'John,' 'Bill' and 'Charles' across 2,500 miles into the home of relatives and friends."

"FIGHTING DOLLARS" ON PITTSBURGH STATIONS

All Pittsburgh stations combined facilities for the "Victory Fund" broadcast, 7 p. m., December 26. Script, dramatizing how "fighting dollars" saved America in past conflicts, was written by Victoria Corey, KDKA coordinator of war programs, and was produced by Claude Morris.

Walter Sickles, program director, WWSW, and Paul Shannon, KDKA announcer, did narration. Musical portion of the program was provided by Bernie Armstrong's orchestra and singers, Mary Martha Briney and Bob Carter.

ROCKFORD GRADUATES TECHNICIANS

Four ESMWT-NAB classes in the Fundamentals of Radio graduated in Rockford, Ill., during Christmas week.

During the first week of 1943, WROK will assist the University of Illinois Extension Division in recruiting new classes.

Men and women trained in the fundamentals of radio are wanted in large numbers.

TAKE IT TO YOUR SERVICEMAN

To change habits of long standing is a job. One way to do it without resentment is by "infiltration," the process broadcasters are following with their one-a-day announcements telling listeners to bring radio sets needing repairs to the serviceman.

More stations reporting the scheduling of such announcements include:

WELL—Battle Creek; WCHS—Charleston, W. Va.; WHK—Cleveland; WCLE—Cleveland; WCED—Dubois; WDNC—Durham; WBHP—Huntsville; WMOB—Mobile; WROK—Rockford; WMAS—Springfield, Mass.

RECEIVER TUBES

A rule requiring owners of radio sets to turn in their old tubes when they buy new ones is being worked out by the War Production Board and will probably go into effect early in 1943.

Announcement of plans for the new year affecting civilian radio was made by the Radio Division to enable those who might object to voice objections before new rules become effective.

WAGE AND HOUR ACT

The U. S. Circuit Court of Appeals (Eighth Circuit) in *White, etc., v. Witwer Grocer Co.*, decided December 11, considerably broadened the Supreme Court's *Belo* decision. The court upheld an employer's right to reduce an hourly rate to take care of overtime payments, with or without any agreement other than the employee's tacit acceptance by continuing to work. Section 18 of the Wage and Hour Act, the court said, apparently was just a warning to employers that the Act was not designed to reduce hourly rates.

Listener Activities

1. San Francisco Radio Council

   The Planning Committee for the new Radio Council in San Francisco is as follows:

   Joseph Henry Jackson, San Francisco Chronicle
   Marie Weller, Instructor in Radio, San Francisco Jr. College
   Margaret V. Girdner, San Francisco Public Schools
   Mrs. L. P. Boyce, Representing patriotic groups
   Geneve A. Shaffer, Radio Chairman, California Federation of Women's Clubs
   Rabbi Irving Reichert, Temple Emanu-El
   Mrs. George Beanston, Jr., President, San Francisco Parent-Teachers Association

   The Committee met on December 8 to set up a skeleton organization and to select one project for immediate activity. Rabbi Irving Reichert will act as temporary chairman.

2. Wichita Radio Council

   Dr. Forrest Whan of Wichita University is acting chairman of the new Council in Wichita. The proposed constitution and by-laws for the Council have just been received by the Listener Activity Division of NAB.

   The Council has as its purpose the interpretation of the wishes of the listeners to the broadcasters; the interpretation of the problems of the industry to the public; the establishment of a meeting ground for the industry, lay participants in radio, and the listening public in the promotion of good-will and understanding; and the furthering of those local benefits that the radio medium offers.

   One of their first activities will probably be an evaluation project and the issuance of a guide to good listening.

FEDERAL COMMUNICATIONS COMMISSION

FCC RULE AMENDED

The FCC has amended Section 1.366 of its Rules of Practice and Procedure in order to make it apply to special service authorizations for radio stations generally, instead of applying only to standard broadcast stations. The amended Section reads:

"Sec. 1.366 *Special service authorizations.* Special service authority may be issued to the licensee of a radio station for a service other or beyond that authorized in its existing license for a period not exceeding that of its existing license upon proper application therefor,[2] and satisfactory showing in regard to the following, among others:

(a) That the requested operation may not be granted on a regular basis under the existing rules governing the operation of the class of stations to which the applicant station belongs;

(b) That in the event the application is on behalf of a standard broadcast station, that experimental operation is not involved as provided for by Section 3.32 of the Rules and Regulations;

(c) That public interest, convenience, and necessity will be served by granting the authorization requested."

At the same time the Commission adopted an Order designed to extend the normal license period of an international broadcast station. The Order states:

"1. The license term for every international broadcast station, either licensed at this date or licensed hereafter, shall end at the earlier of the following dates:

(a) November 1, 1945, or

(b) The first day after October 31, 1943, on which its operations are not controlled, by agreement or otherwise, by the Office of War Information or the Coordinator of Inter-American Affairs;

"2. The portion of Section 4.3 of the Rules and Regulations, which established for international broadcast stations a normal license term of one year, is hereby suspended until further order of the Commission."

FCC OPERATOR EXAMINATIONS

Examinations for operators' licenses are held regularly at FCC district offices throughout the country. In addition, examination points have been established at convenient cities to expedite the granting of new licenses. The cities and the tentative dates on which examinations will be given for commercial operator licenses of all grades are as follows:

Albuquerque, N. M.—March 26, September 24.
Bangor, Maine—March 20, September 18.
Billings, Mont.—May 13 & 14, November 11 & 12.
Birmingham, Ala.—January 15, April 16, July 16, October 15.
Bismarck, N. D.—April 1 (date to be announced), October (date to be announced).
Boise, Idaho—April 24, October 23.
Butte, Mont.—May 10 & 11, November 8 & 9.
Charleston, W. Va.—3rd week-March, 3rd week-June, 3rd week-September, 3rd week-December.
Cincinnati, Ohio—1st week-February, 1st week-May, 1st week-August, 1st week-November.
Columbus, Ohio—3rd week-January, 3rd week-April, 3rd week-July, 3rd week-October.
Corpus Christi, Texas—June (date to be announced), December (date to be announced).
Cumberland, Md.—April 14, October 14.
Davenport, Iowa—January, April, July, October (dates to be announced).
Des Moines, Iowa—January 8, April 9, July 9, October 8.
Fort Wayne, Ind.—February, May, August, November (dates to be announced).
Fresno, Calif.—March 11, June 15, September 15, December 14.
Grand Rapids, Mich.—1st week-January, 1st week-April, 1st week-July, 1st week-October.
Hartford, Conn.—April 15, October 14.
Hilo, T. H.—January 25, August 17.
Huron, S. D.—March, June, September, December (dates to be announced).
Indianapolis, Ind.—February, May, August, November (dates to be announced).
Jacksonville, Fla.—May 8, November 6.
Kaunakakai, T. H.—August 3.
Lanai City, T. H.—August 4.
Lihue, T. H.—February 8, August 24.
Little Rock, Ark.—January 12, April 13, July 13, October 5.
Memphis, Tenn.—February 23, August 24.
Milwaukee, Wis.—January, April, July, October (dates to be announced).
Mobile, Ala.—May 25, November 18.
Nashville, Tenn.—February 19, May 21, August 20, November 19.
Oklahoma City, Okla.—January 22, April 23, July 23, October 22.
Omaha, Nebr.—April 2, October 1.
Phoenix, Ariz.—April 29, May 1, October 28 & 29.
Pittsburgh, Pa.—February, May, August, November (dates to be announced).
Portland, Me.—March 24, September 22.

"[2] Applications for authorizations to use frequencies assigned to the international broadcast service may be made on an informal basis: formal application must be made for other authorizations."

Reno, Nev.—April 13, October 14.
Roanoke, Va.—April 3, October 2.
Salt Lake City, Utah—March 27 & 28, September 25 & 26.
San Antonio, Texas—February 19, May 21, August 20, November 19.
Schenectady, N. Y.—March 15, June 15, September 15, December 15.
Spokane, Washington—May 6 & 7, November 4 & 5.
St. Louis, Missouri—February 12, May 7, August 13, November 12.
Syracuse, N. Y.—January, April, July, October (dates to be announced).
Wailuku, T. H.—August 5.
Wichita, Kan.—March 19, September 17.
Williamsport, Pa.—May, November (dates to be announced).
Winston-Salem, N. C.—February 6, May 1, August 7, November 6.

Applicants desiring further information regarding examinations should correspond with the nearest FCC district office listed below.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, January 4. They are subject to change.

Tuesday, January 5

Further Consolidated Hearing

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WCAM and WCAP.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Modification of license, **1310 kc.**, 500 watts, unlimited, request facilities of WCAM and WCAP.

WCAM—City of Camden, Camden, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WTNJ and WCAP.

WCAM—City of Camden, Camden, N. J.—Modification of license, **1310 kc.**, 500 watts, SH-WCAP; request facilities of WTNJ.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WTNJ and WCAM.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Modification of license, **1310 kc.**, 500 watts, SH-WCAM; request facilities of WTNJ.

Wednesday, January 6

KVOE—The Voice of The Orange Empire, Inc., Ltd., Santa Ana, Calif.—C. P., **1480 kc.**, 1 KW, unlimited.

Thursday, January 7

WQBC—Delta Broadcasting Company, Inc., Vicksburg, Miss.—Modification of license, **1470 kc.**, 500 watts night, 1 KW day, unlimited.

Friday, January 8

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of license, **700 kc.**, 50 KW night, 500 KW day, unlimited, using W8XO transmitter.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WBAL—The WBAL Broadcasting Co. (assignor), Hearst Radio, Inc. (assignee), Baltimore, Md.—Granted consent to voluntary assignment of license of Station WBAL from The WBAL Broadcasting Co., to Hearst Radio, Inc., the sole stockholder of The WBAL Broadcasting Co. The assignment of license was requested as a step toward simplification of the Hearst Corporate set-up (B1-AL-360).

WATR—The WATR Company, Inc. (assignor), Harold Thomas (assignee), Waterbury, Conn.—Granted consent to voluntary assignment of license of Station WATR from the corporate licensee, The WATR Co., Inc., to Harold Thomas (B1-AL-356).

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted modification (B4-MP-1680) of construction permit (B4-P-2477 as modified) for change in daytime directional antenna pattern and extension of completion date.

DESIGNATED FOR HEARING

KARM—The George Harm Station, Fresno, Calif.—Designated for hearing application (B5-ML-1122) for modification of license to change operating assignment from **1430 kc.** with 5 KW power, unlimited time, using a directional antenna, to **1030 kc.**; and denied application for Special Service Authorization (B5-SSA-43) to operate on **1030 kc.**, using a directional antenna as proposed in above modification of license application.

MISCELLANEOUS

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Granted modification of construction permit as modified, which authorized increase in power, installation of new equipment and directional antenna for day and night use, for extension of completion date from December 11, 1942, to June 11, 1943 (B1-MP-1681).

W9XMB—The Moody Bible Institute of Chicago, Ill.—Granted modification of construction permit as modified, which authorized new ST broadcast station, for extension of completion date from November 16, 1942, to February 16, 1943 (B4-MPST-10).

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Granted modification of construction permit as modified, which authorized installation of new equipment and directional antenna for day and night use, change of frequency, increase in power and move of transmitter, for extension of completion date from December 22, 1942, to March 22, 1943 (B3-MP-1683).

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Further extended temporary license (B2-R-378 and B2-L-1542) from midnight December 31, 1942, to midnight March 31, 1943.

W8XO—The Crosley Corp., Cincinnati, Ohio.—Denied petition for rehearing directed against the Commission's decision and Order of November 30, 1942, denying the application (B2-PEX-38) for construction permit; and dismissed application of corporation for renewal of station license (B2-REX-3).

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted petition for leave to intervene in the hearing on application of WBNY, Buffalo, N. Y., for modification of license.

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Granted petition for leave to intervene in the hearing on application of WQBC for modification of license.

WMBD—Peoria Broadcasting Co., Peoria, Ill.—Granted petition for leave to intervene in the hearing on application of WQBC for modification of license.

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Granted motion for continuance of hearing on modification of license, from January 7 to February 15.

KYA—Palo Alto Radio Station, Inc., San Francisco, Cal.—Granted motion to dismiss without prejudice application (B5-ML-1127) for modification of license to move studio from San Francisco to Palo Alto, Calif.

APPLICATIONS FILED AT FCC

610 Kilocycles

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Special Service Authorization to make changes in equipment, change frequency from **610 kc.** to **660 kc.**, increase power from 5 KW to 10 KW, for period ending 6-1-44.

640 Kilocycles

WHKC—United Broadcasting Co., Columbus, Ohio.—Construction permit to change frequency from **640 kc.** to **610 kc.**, increase power and hours from 500 watts limited to 1 KW, unlimited, directional antenna night and move. Amended: to make changes in directional antenna system.

930 Kilocycles

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Modification of construction permit (B3-P-3113 as modified for directional antenna night, move and increase power) for extension of completion date from 1-20-43 to 7-20-43.

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—License to cover construction permit (B3-P-3043 as modified for change of frequency, increase in power, directional antenna for day and night and move transmitter.

1240 Kilocycles

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Modification of construction permit (B2-P-3328 as modified for new station) for extension of commencement and completion dates from 12-14-42 and 6-14-43 to 2-14-43 and 8-14-43 respectively.

1400 Kilocycles

WCBI—Birney Imes, Columbus, Miss.—Modification of license to change frequency from **1400 kc.** to **1340 kc.**

1440 Kilocycles

KGNC—Plains Radio Broadcasting Co., Amarillo, Teaxs.—Modification of license to change frequency from **1440 kc.** to **860 kc.** and decrease power from 1 KW night, 5 KW day to 500 watts night, 5 KW day.

1450 Kilocycles

KFMB—Worcester Broadcasting Corp., San Diego, Calif.—Construction permit to make changes in transmitting equipment.

1490 Kilocycles

WOSH—Howard H. Wilson, Oshkosh, Wis.—Authority to determine operating power by direct measurement of antenna power.

TELEVISION APPLICATION

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Modification of construction permit (B1-PVB-40 as modified which authorized new television station) for extension of completion date from 1-1-43 to 3-31-43 and for reduction of power of visual and aural transmitters from 250 watts to 50 watts, and for changes in visual and aural equipment.

MISCELLANEOUS APPLICATION

WENL—The Liberty Life Insurance Company, Area Columbia, S. C.—Modification of license to change name of licensee from The Liberty Life Insurance Company to Surety Life Insurance Company.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission this week issued no complaints.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Bonat & Bonat, Inc., 395 Fourth Avenue, New York, selling and distributing supplies for use in giving permanent waves consisting of various solutions and pads sold under the names "Padol Machineless Permanent Wave" and "Lifeoil Machine Permanent Wave" and a shampoo designated "Dio Dane No. 100," has stipulated to cease and desist from representing that the Padol Machineless Permanent Wave nourishes the hair or gives the hair a deeper wave; that Lifeoil Machine Permanent Wave pads contain lanoline; or that Dio Dane No. 100 nourishes the hair or is not a soap. (03083)

Lipscomb Grain & Seed Co., Inc., Springfield, Mo., selling and distributing livestock and poultry feeds designated "Lipscomb's 21% Protein Breeder Egg Mash," "Lipscomb's Sungold 36% Protein Hog Supplement," "Lipscomb's Sungold Special Wormer Mash," "Lipscomb's Sungold Egg Mash," and "Lipscomb's Sungold Chick Starter with Worm-X," has stipulated to cease and desist from representing that there has been discovered on the Lipscomb research farm, or added to any of its products, a new or secret ingredient; that Lipscomb's Sungold Special Wormer Mash permits the raising of worm-free chickens; combats tape worms in the lumen of the intestines, or the larvae of worms (except where specifically limited to round worms); is an eggicide; attacks worm eggs in the intestines of fowls or in the walls or lumen of the intestines, or prevents worms; that it is a complete wormer or a complete feed, or that eggs from hens fed on Lipscomb's Sungold Egg Mash contain an increased amount of iodine or that the consumption of such eggs will prevent goiter in man. (03082)

Valligny Products, Inc., 254 West 31st St., New York, selling and distributing a coal tar hair dye product designated "Shampo-Kolor," has stipulated to cease and desist from disseminating any advertisements which fail conspicuously to reveal therein the following: "Caution: This product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness." The stipulation provides, however, that such advertisement need contain only the statement: "Caution: Use only as directed on the label," if such label bears the first described caution conspicuously and the accompanying labeling bears adequate directions for such preliminary testing before each application. (03084)

CEASE AND DESIST ORDERS

No cease and desist orders were issued this week by the Commission.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 2, January 8, 1943

PETRILLO PROBE STARTS

James C. Petrillo, president of the American Federation of Musicians, will be the first witness next Tuesday (January 12) when a Senate Interstate Commerce subcommittee starts hearing on Mr. Petrillo's recording ban.

Mr. Clark, chairman of the subcommittee, said that he would seek approval of his bill to bring the musicians' union within the scope of the anti-trust laws to subject it to possible injunctions preventing the enforcement of the prohibition against musicians playing for recorded music.

"If we can't get anywhere with this bill, which I plan to re-offer in the new Congress, then I'll appeal directly to the President," Senator Clark added.

"He has authority to take over plants where production has been halted by strikes. I am sure he has wartime power to curb the power of Petrillo to deny popular music to millions of Americans, including troops at home and abroad.

"So far as I know, Petrillo has not offered any concrete proposal as a compromise to either the broadcasting stations, the record and transcription manufacturers or others involved.

"This matter goes far beyond any labor dispute. Elmer Davis, director of the Office of War Information, told our committee recently that a continuance of the ban would force the closing of many small radio stations essential to our wartime communications.

"He also said, and he spoke for the War and Navy Departments, that the withdrawal of popular music from the radio stations and 'juke boxes' would seriously endanger wartime morale on the home front as well as that of our troops on the battlefront.

"Quite a few stations have already closed or sold out for nominal sums."

COX ASKS FCC INVESTIGATION

Representative Cox (D-Ga.) on Wednesday, opening day of the new session of Congress, introduced a resolution calling for an investigation of FCC. During former Congresses, Mr. Cox has introduced similar resolutions, and while hearings have been held, no further action has been taken on them. The Cox resolution was introduced as follows:

"Resolved, That there is hereby created a select committee to be composed of five Members of the House to be appointed by the Speaker, one of whom he shall designate as chairman. Any vacancy occurring in the membership of the committee shall be filled in the same manner in which the original appointment was made.

"The committee is authorized and directed to conduct a study and investigation of the organization, personnel, and activities of the Federal Communications Commission with a view to determining whether or not such Commission in its organization, in the selection of personnel, and in the conduct of its activities, has been, and is, acting in accordance with law and the public interest.

"The committee shall report to the House (or to the Clerk of the House if the House is not in session) at the earliest practicable date during the present Congress the results of its investigations, together with such recommendations as it deems desirable.

"For the purposes of this resolution the committee is authorized to sit and act during the present Congress at such times and places within the United States, whether or not the House is sitting, has recessed, or has adjourned, to hold such hearings, to require the attendance of such witnesses and the production of such books, papers, and documents, and to take such testimony, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member designated by him, and may be served by any person designated by such chairman or member."

Discussing his resolution, Mr. Cox said, "I have reintroduced Resolution for House Investigation of the Federal Communications Commission, which, I am confident, will be adopted by the House at some early date.

"The story of the operations of the Commission under the Chairmanship of Mr. Fly will prove shocking. It has almost completely established terroristic control of all media of communications. It maintains a gestappo, the equal of which has never been seen in free government, and has developed the smear business into a fine art. Of all abuse of power by bureaucrats, nothing approaches the record of this Commission."

GAS REGULATIONS AMENDED

An amendment, effective January 2, 1943, to the Mileage Rationing: Gasoline Regulations (Ration Order 5C, Amendment 8) affects broadcasters. Under the amendment, the only employees of radio stations eligible for "preferred mileage" (Class C coupon books) are engineers and technicians for necessary transportation between home or lodgings and a radio broadcasting transmission station or between such station and other permanent facilities for radio broadcasting, for purposes necessary to the operation of such station, but only if such station, because of its power, is located in a rural or suburban area.

The amended Regulation appears as Section 1394.7706 (n).

Section 1394.7706 (o) (2), previously covering "preferred mileage" for broadcasting (See NAB Reports, November 13, 1942, p. 647), has been amended to exclude radio broadcasting.

NAB is seeking relaxation of the regulation to include "preferred mileage" for temporary remotes.

The "rationale" accompanying the amendment, issued by OPA, follows:

"Present Regulations

"Eligibility for Preferred Mileage is provided for a "worker", including an executive, technician or office worker * * * for necessary travel to, from, within or between * * * telephone, telegraph, radio, or communication systems.

"Newspaper facilities are not included in the present provisions, and no ration is allowable for driving to, from,

GAS REGULATIONS AMENDED

(Continued from page 7)

within, or between such facilities in excess of 470 miles of occupational driving per month.

Proposed Change

"A distinction is to be made between radio-telephone or radio-telegraph facilities, which are actually communication systems in the same sense as telephone and telegraph systems, and radio broadcasting facilities.

"The present provisions insofar as they allow Preferred Mileage for necessary travel to, from, within or between radio-telephone or radio-telegraph facilities shall be retained.

"Preferred Mileage shall not be allowed with respect to radio broadcasting facilities except for travel between home or lodgings and radio broadcasting transmission station, or between such stations and other permanent facilities for radio broadcasting, by engineers or technicians whose work is essential to the physical operation of the station, and only where the station because of its power, is located in a rural or suburban area. No Preferred Mileage shall be allowed for any travel between a radio broadcasting transmission station and temporary radio broadcasting facilities.

"This change shall be effective upon the issuance of new rations or upon renewal of rations.

Reasons for Change

"It has been claimed by representatives of various newspapers that the present Regulations give an advantage to employees of radio broadcasting facilities as against employees of newspapers. The same considerations governing the exclusion from Preferred Mileage of travel with respect to newspaper establishments should govern the exclusion of travel with respect to radio broadcasting facilities since both perform similar functions.

"A distinction can be made with respect to the necessary travel of engineers and technicians to and from radio broadcasting transmission stations, because of the physical requirements of broadcasting. The Federal Communications Commission has recommended that high-powered transmitters be erected at some distance from cities in order to obtain more effective range of transmission. Approximately one third of all stations are located at distances of between 10 and 15 miles from the center of municipalities. Unless Preferred Mileage is allowed for travel to such transmission stations by engineers and technicians essential to their operation, they will be forced to close.

"Newspaper establishments, on the other hand, are located in municipalities, and their operations can be continued with the mileage allowed in "B" books, without the necessity of granting eligibility for Preferred Mileage."

DEFERMENT MATERIAL COMING

The NAB yesterday sent to all stations by fourth class mail material to help them in securing occupational deferment of radio repairmen. Be on the lookout for it.

Engineering

WPB BATTERY LIMITATIONS

Recent WPB limitations on the manufacture of dry cell "B" batteries, in smaller sizes, brings another wartime problem to many broadcasters. Batteries of this type have been used extensively for the power supply of field amplifiers used for broadcasts originating outside the studios.

Throughout the industry there are many different types of field amplifiers in general use. Some are 100% A.C. operated and others employ 100% dry batteries. Six volt storage batteries are again coming into use as the stocks of dry batteries disappear. Of the recommendations noted here probably no one selection will be applicable for all cases; however, it should be possible to select a supply which will fulfill the requirements of any particular type of portable amplifiers.

The conversion of 100% dry battery portable equipment to 100% A.C. operation is not recommended as this seriously limits the scope of operation. Such conversions also generally require extensive modification of the amplifier circuits and the substitution of heater type tubes.

The following types of power supplies have been recommended for consideration by NBC engineer George McElrath.

1. *100% Dry Battery Operation*—This recommendation presupposes that the number of types of batteries heretofore available may be reduced in number to three, namely: 4FH, #6 cell, and heavy duty "B." Fibre or plywood carrying cases to accommodate the #6 cells and 10308 "B" batteries can be constructed. They should be divided into three separate units to distribute the weight. They can be carried from pickup to pickup or left on the job where recurring programs originate. The two "B" battery cases may be plugged into the "A" case and the "A" and "B" voltages carried by a cord to the amplifier. Standard 3-way straight or twist lock plugs can be used.
2. *Combination Dry Battery and A.C. Operation*—Employ dry batteries for filaments but limit the quantity used by equipping all amplifiers with an A.C. operated plate supply. In this manner, the total number of batteries used will be greatly reduced. This method will not reduce the number of filament batteries; however, the supply of 1½ volt batteries (#6 cell and 4FH) does not appear to be critical at this time, and information received from the manufacturers indicate that there will be an ample supply of single cell batteries available.
3. *Combination Dry Battery (Filament) and Storage Battery Operation (Plate)*—Employ dry batteries for the filament supply and vibrator packs for the B supply. This method has the advantage over the previous recommendation in that it makes possible operation under any and all conditions. The Mallory Type VP551 vibropack, or similar type, with synchronous rectifier external filter and a small 6-volt motorcycle storage battery can be made into a reasonably light weight supply of this type. If difficulty is encountered in securing new parts for this purpose it may be possible to modify the "B" power supply of an automobile receiver for this purpose.
4. *100% Storage Battery Operation with Vibrator*—This type of power supply is applicable only to those amplifiers employing heater tubes. The storage battery used to operate the vibrator for plate supply would also serve as the heater power source for the filaments. If the vibrator interference is objectionable it may be possible to overcome this difficulty through the use of filter circuits or, in extreme cases, the use of separate storage batteries for A and B supply.

NAB Engineering Department invites correspondence from station engineers who have other helpful suggestions or may be experiencing difficulty in solving problems in connection with the modification of field amplifiers.

1000 CYCLE AUTOMATIC ALARM

A simple, yet effective automatic alarm receiver, which sounds an alarm and raises the receiver gain upon receiving a constant 1000 cycle modulated tone is described in the December 1942 issue of *Communications.*

The design and construction is fully outlined by C. H. Topmiller, Chief Engineer of WCKY. Most of the materials required to build the device will be found around the average station.

The use of this alarm should greatly increase the reliability of contact with key stations and eliminate the necessity of monitoring two programs simultaneously.

Communications is published by the Bryan Davis Publishing Company, Inc., 19 East 47th Street, New York City.

RADIO FIXED CAPACITORS

WPB has announced that the exemption from price control of radio fixed capacitors for military use was extended from January 1 to April 1, 1943.

Capacitors, known also as condensers, are essential parts of radio apparatus. Production for military uses has expanded at a rapid rate but the program has not reached the desired point of stability for the purposes of price regulation, OPA announced.

During the additional exemption period it is believed the industry will complete its expansion program and in the meanwhile responsibility over prices of fixed radio capacitors remains with the Army and Navy.

The extension of the exemption from price control was affected through the issuance of Amendment No. 64 to Maximum Price Regulation No. 136 (Machines and Parts and Machinery Services) effective January 1.

PEABODY AWARD MEETING

To make a preliminary digest of this year's entries for the George Foster Peabody Radio Awards, a special University of Georgia faculty committee has been appointed, according to Dean John E. Drewry of the Henry W. Grady School of Journalism, which, in conjunction with the National Association of Broadcasters, administers these awards.

Members of this committee are Tyus Butler, journalism, chairman; Hugh Hodgson, music; Carolyn Vance, radio and speech; L. M. Ballew, drama; B. O. Williams, sociology; and Warren Jones, journalism, clerk.

This committee's report will be considered by the advisory board which makes final selections, and which will meet in New York January 15. The board report is not expected to be ready before March. Members of this board are: Bruce Barton, Advertising, New York; John H. Benson, Advertising, New York; Dr. Ralph Casey, University of Minnesota; Jonathan Daniels, Raleigh *News and Observer;* Mark Ethridge, Louisville *Courier-Journal* and *Times;* Joseph Henry Jackson, San Francisco *Chronicle;* Waldemar Kaempffert, New York *Times;* Alfred A. Knopf, Publisher, New York; Mrs. Beatrice Sawyer Rossell, Chicago; Dr. I. Keith Tyler, Ohio State University; Mrs. Marjorie Peabody Waite, daughter of George Foster Peabody; Edward Weeks, *Atlantic Monthly,* Boston; S. V. Sanford, Chancellor, University System of Georgia; and Earl J. Glade, Chairman, NAB Code Compliance Committee.

FTC ON RADIO ADVERTISING

The Federal Trade Commission in its annual report made public this week, discussing radio advertising, said that in its systematic review of radio advertising, it issues calls to individual stations, generally at the rate of four times yearly for each station. Discussing this further the Commission says:

"National and regional networks respond on a continuous weekly basis, submitting copies of commercial continuities for all programs wherein linked hook-ups are used involving two or more stations. Producers of electrical transcription recordings each month submit typed copies of the commercial portions of all recordings produced by them for radio broadcast. This material is supplemented by periodic reports from individual stations listing the programs of recorded commercial transcriptions and other data.

"During the fiscal year the Commission received copies of 1,053,875 commercial radio broadcast continuities and examined 1,001,450 such continuities. The continuities received amounted to 2,032,417 pages of typewritten script and those examined totaled 1,912,725 pages, consisting of 483,000 pages of network script, 1,416,606 pages of individual station script, and 13,119 pages of script representing the built-in commercial portions of transcription recording productions destined for radio broadcast through distribution of multiple pressings of such recordings to individual stations. An average of 6,230 pages of radio script was read each working day. From this material, 17,925 commercial broadcasts were marked for further study as containing representations that might be false or misleading.

"In general, the Commission has received the cooperation of the three nation-wide network chains, 20 regional network groups, and transcription producers engaged in preparing commercial radio recordings, in addition to that of 841 commercial radio stations, 491 newspaper publishers, and 535 publishers of magazines, farm journals, and trade publications, and has observed a desire on the part of these broadcasters and publishers to aid in the elimination of false and misleading advertising.

"During the fiscal year, 86.5 per cent of the radio and periodical cases resulted from the routine survey of advertising material as described above and 13.5 per cent result from complaints by or information received from other Government agencies, competitors, and other members of the public.

"An analysis of the questioned advertisements. which were assembled by cases and given legal review, discloses that they pertained to 2,638 commodities in the proportions indicated below:

CLASSIFICATION OF PRODUCTS

Commodity	*Per cent*	
Food, drugs, devices, and cosmetics:		
Food (human)	10.6	
Food (animal)	2.9	
Drugs	44.3	
Cosmetics	15.4	
Devices	2.4	
		75.6
Other products:		
Specialty and novelty goods	5.4	
Automobile, radio, refrigerator, and other equipment	1.3	
Home study courses	1.6	
Tobacco products	1.0	
Gasoline and lubricants	.9	
Poultry and livestock supplies and equipment	.2	
Miscellaneous, including apparel, fuels, house furnishings, and building materials	14.0	
		24.4
Total		100.0

"The Commission during the fiscal year sent questionnaires to advertisers in 432 cases and to advertising agencies in 36 cases, and accepted 219 stipulations involving radio and periodical advertising, of which 27 were amended, substitute or supplemental stipulations.

"A total of 451 cases was disposed of by the various methods of procedure. Of this number, 207 cases were considered settled upon receipt of reports showing compliance with previously negotiated stipulations. In 17 cases the Commission waived compliance reports. Of the remaining 227 cases, 208 were closed without prejudice to the right of the Commission to reopen if warranted by the facts: 99 of them for lack of jurisdiction or lack of evidence sufficient to establish a violation of law, 94 because of discontinued business and practices or insufficient public interest, 15 because corrective action by the Post Office Department made further action by the Commission unnecessary, and 19 supplemental investigations were filed without action for various reasons.

"In addition, the Commission in 42 cases directed issuance of complaints, 31 because advertisers failed to stipulate and 11 because of violations of previous stipulations. Field investigations were ordered in 28 cases.

"Seven hundred seventy-nine radio and periodical cases were pending on July 1, 1941, as against 726 on June 30, 1942.

"If it appears to the Commission that a published or broadcast advertisement may be misleading, a questionnaire is sent to the advertiser and request is made for a sample of the product advertised, if this is practicable, and the quantitative formula, if the product is a compound. Copies of all advertisements published or commercial continuities broadcast during a specific period are also requested, together with copies of all booklets, folders, circulars, form letters, and other advertising literature used.

"Upon receipt of these data, the sample and formula are referred to the Medical Advisory Division of the Commission or to an appropriate technical agency of the Government for a scientific opinion. Upon receipt of the opinion, a list of such claims as then appear to be false or misleading is sent to the advertiser, along with pertinent portions of the opinion. The advertiser is extended the privilege of submitting evidence in support of his claims. He may answer by letter or, upon request, may confer with the Radio and Periodical Division in person or through counsel.

"If, after a consideration of all available evidence at hand, including that furnished by the advertiser, the questioned claims appear to be justified, the division reports the matter to the Commission with the recommendation that the case be closed. If it appears from the weight of the evidence that the advertising is false or misleading, the matter is referred to the Commission with recommendation either that complaint issue or that the case be stipulated, provided it is one appropriate for stipulation procedure and the advertiser desires to dispose of it by such voluntary agreement to cease and desist from the use of the acts and practices involved.

"If the Commission so authorizes, a stipulation is prepared and forwarded to the advertiser for execution. Should he object to any of its provisions, he may discuss them by mail or in person. If and when he agrees to the terms of the stipulation and signs and returns it, the matter is again reported to the Commission with recommendation that the stipulation be accepted and the case closed without prejudice to the right of the Commission to reopen the matter at any time the facts so warrant. If the Commission accepts and approves the stipulation, the advertiser is required to submit within 60 days from the date of acceptance a report in writing showing the manner and form in which he is complying with the provisions of his agreement."

MANPOWER PROGRAM

(This resume of the manpower program is presented to you for background. It is a summing up of developments that have been announced previously.)

The overall program for meeting the nation's labor supply program—both on a local and a national level—is now taking definite form after two and a half years of war production.

A many-angled program of supplying the necessary manpower to run the war plants throughout the nation has been undergoing evolutionary change since June 1940, when President Roosevelt set up the National Defense Advisory Council.

Today the various programs of the War Manpower Commission form a pattern which make it possible to see how the problem will be met.

All over the country today, workers and their employers are listening to a new term—job control, or job stabilization—and are wondering how it will affect them. Some have heard it described as "job freezing" and are apprehensive.

Job control, or stabilization, is a new term and a new problem in a nation used to having plenty of workers.

It is a device to enable each war plant and community to make the fullest use of its labor—potential as well as present working force.

It is based upon policies the National Management-Labor Policy Committee of the War Manpower Commission has recommended. It is implemented locally only after thorough consultation with management and labor in area war manpower committees.

In recent months, the United States has streamlined its manpower program to such an extent that now, after a year at war, it has the plans for seeing that every man and every woman is enabled to do the most personally to help win this war. The demands of our war production, added to the demands of our armed forces, have made it necessary to harness the abilities of the American men and women in the most efficient way.

Intensive review of the operation of these plans is now under way by the Management-Labor Committee and the War Manpower Commission. Labor, management and government will confer early in January to study the operations of the first plan which has applied to the lumber and non-ferrous metal mining industries. Detailed plans which will then be announced will be based on solid experience.

Within three months, it is estimated, some plan of manpower control will be in effect in every major industrial community in the United States. There are 270 such areas. War labor shortages have developed in 102 of these and are anticipated soon in 77 more. Only 91 have enough labor to meet current war production schedules, and future war contracts will be channeled to these "labor surplus areas" in larger numbers now under new War Production Board policies.

The purposes of manpower control are:

1. To protect war production from the disruption caused by employers pirating skilled workers from each other or by workers leaving one job to seek the higher wages offered by another, while at the same time providing means by which workers can change jobs if the change will help the war effort.
2. To enable each war plant to make the best use of the workers available and to enable workers to use their highest skills.
3. To stop needless influxes of workers to areas where transportation, housing and health facilities are already taxed to the breaking point.
4. To provide adequate recruiting, training and upgrading programs for workers in every area.

Here is how it works:

The first step in each community would be the appointment of an area director to represent the commission. This director would then organize a committee of recognized leaders of labor and industry in the community. This Area War Manpower Committee would meet and draw up a program for stabilizing employment according to the peculiar local needs.

Such a program will control the transfer of workers from one job to another in the 35 industries or activities which the War Manpower Commission has already designated as essential. There may be exceptions to this. In Louisville, for example, only certain highly skilled workers are stabilized. In some communities, such as Baltimore, the first such area established, the job control covers all occupations in the area. In general, however, the list of 35 industries will be used as the basis for determining the extent of job control.

No worker, under such job control, may transfer from one job to another without the approval of his employer or of the United States Employment Service. This is not, however, a job freeze. Actually, the program encourages workers to change jobs when the change will aid the war effort. Each program provides circumstances under which an employe may transfer. Although each program will be adapted to the local situation, almost all will permit a man to transfer if:

1. The worker is competent to perform higher skilled work than his employer can provide.
2. When the worker is employed for a substantial period for at less than full time.
3. When the distance between the worker's home and his job is unreasonably great and when the prospective new job is much closer or more accessible.
4. When the worker has compelling personal reasons for making the change. Some plans prevent the hiring of workers from outside the areas.

Also, in some plants, as in Detroit, a worker who leaves a plant where he can perform a greater service to the war effort will retain his seniority at his first and regular job.

In most communities where manpower control is now in effect, the employe may get a signed okay from his employer which will be accepted by the new employer to whom he applied for a job, thereby eliminating his going to the USES. Should the employer refuse to grant such a release, a worker may then appeal to the USES if he feels that the employer's action was unfair.

Any disputes as to the application of the program may be appealed to the area manpower committee.

Where agreements stabilizing employment in a community or area have already been worked out by employers without WMC participation or supervision, such agreements will not be recognized by the War Manpower Commission and participants will be told that continuance of such agreements is contrary to war manpower policy.

The WMC employment stabilization, or job control plan, is designed to enable local citizens to work out the manpower controls for each area, in much the same way as local citizens, sitting on Selective Service boards, now direct inductions of all local men into the armed forces.

The WMC area committee—on which both the employe and employer has his representatives—works out a solution to the problems facing the community and provides a place where disagreements can be worked out.

But this job control program is only a phase of an overall program with which the War Manpower Commission intends to get the working force to turn out the munitions which will enable our men at the fronts to crush the enemy.

The commission will make a survey of the number of workers in non-essential industries who possess skills needed by war plants. These workers will be urged to transfer to war work. President Roosevelt has urged employers to keep the seniority right of such employes intact so that after victory has been achieved they may wherever possible return to their former jobs with their former rights, as will those who left to go into the armed forces.

In addition, training courses are available for everyone from the housewife who wants to become a welder to the technician who wants to become a plant manager.

Preemployment training outside of war plants is now being provided free to 160,000 persons throughout the country and 320,000 to 500,000 more should be taking these courses today to meet the labor needs of the war plants. Employers prefer workers with such training, and thousands of those who have completed the courses now are making a greater contribution to the war effort and receiving higher wages. Then, too, more than 6 million workers in 6500 plants are receiving in plant training "on the job."

These training programs will be expanded.

Manning tables have been developed which enable the Government to take inventory of the number and types of workers as well as the number and types of jobs in each plant. This helps to make it possible for each employer to use every worker in such a way that the employe is using his highest skills. It also provides a way of determining what training must be provided to fit workers for jobs that will be available in the future.

These manning tables, and the supplementary replacement schedules, enable the employer and the Selective Service Bureau of the Commission to plan inductions of employes in such a way and at such a rate that production is not disrupted and so that replacements can be adequately trained. They also provide a fair basis for deferring workers.

Once the manning tables are in full effect, industrial specialists—similar to the labor utilization inspectors of England—will make analyses of war plants and report to the WMC area directors whether they are putting the workers to the most efficient use. The WMC plans to hire one or more such specialists in each war industry area.

The Office of Defense Health and Welfare is assisting the states in the promotion of child care and other programs in these areas.

The War Manpower Commission now has authority over the induction of men into the armed forces. This civilian commission has the authority to determine which group of workers are most needed on their jobs and which can best serve at the fighting fronts. It has determined that essential farmers shall remain on the farm so that the nation—and the world—may eat. It has plans to keep students with special aptitudes in college so that the nation may continue to get a supply of doctors, chemists and technicians.

Its program is to get and keep each person in the job where he or she can best serve.

That is the program. The manpower problem is essentially a series of local problems and it is being met on that basis by the local people in a way which gives everyone concerned a voice in the program.

FEDERAL COMMUNICATIONS COMMISSION

GROSS TO NAVY

Gerald C. Gross, Assistant Chief Engineer in charge of the Common Carrier Division since December, 1941, has received a leave of absence for the duration of the war from the Federal Communications Commission to become a Lieutenant Commander in the Navy. He has held a commission in the Naval Reserve since 1932.

CALL LETTER RULE ACTION

The FCC has adopted Section 2.65 relative to the announcement of call letters which reads as follows:

Adopted Section 2.65, relative to the announcement of call letters, which reads as follows:

> "Section 2.65. Station Identification. When not required to identify itself by some other provision or provisions of the Rules and Regulations, every radio station shall identify itself by its regularly designated call letters as follows:
>
> "1. Every station operating in the broadcast service shall transmit its call letters at the beginning and end of each period of operation, and, during operation, at least once every hour.
>
> "2. Every station used for other than broadcast service shall transmit its call letters at the end of each transmission, and at least once every fifteen minutes during an exchange of communications."

The Commission also adopted Sections 4.27 and 4.38 providing for station identification by relay and ST (studio transmitter) broadcast stations, as follows:

> "Section 4.27. Station Identification. Each relay broadcast station shall announce its call letters at the beginning and end of each period of operation, and during operation, at least once every hour it either shall announce its call letters or shall make an announcement which will permit it to be identified.
>
> "Section 4.38. Station Identification. Each ST broadcast station shall announce its call letters at the beginning and end of each period of operation, and during operation, at least once every hour it either shall announce its call letters or shall make an announcement which will permit it to be identified."

918 STATIONS

During the month of November, 1942, the FCC granted no permits for the construction of new stations, and no operating licenses were issued. One station was deleted. A comparative table by month follows:

	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1
Operating	882	887	891	893	897	899	906	906	905	905	907	909	908
Construction	37	36	32	31	27	25	18	19	16	15	12	10	10
	919	923	923	924	924	924	924	925	921	920	919	919	918

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, January 11. They are subject to change.

Monday, January 11

WISH—Capitol Broadcasting Corporation, Indianapolis, Ind.—C. P., **1310 kc.**, 5 KW, unlimited, DA-night.

Consolidated Hearing

WALB—Herald Publishing Company, Albany, Ga.—Renewal of license, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license, Station WALB; **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.**, 1 KW, DA-night, unlimited.

Tuesday, January 12

KMTR—KMTR Radio Corporation, Los Angeles, Calif.—Renewal of license, **570 kc.**, 1 KW, unlimited.

Wednesday, January 13

NEW—Eastern Broadcasting Company, Inc., Long Island, New York—C. P., **1520 kc.**, 1 KW, limited to WKBW, Buffalo, New York.

Thursday, January 14

WBRB—Monmouth Broadcasting Company, Red Bank, N. J.—C. P., **1240 kc.**, 100 watts, SH-WGBB & WFAS.

WBRB—Monmouth Broadcasting Company, Red Bank, N. J.—Renewal of license, **1240 kc.**, 100 watts, SH-WGBB & WFAS.

Friday, January 15

NEW—The Fort Hamilton Broadcasting Co., Hamilton, Ohio—C. P., **1450 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATION GRANTED

W49FW—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Granted license (B4-LH-29) to cover construction permit, in part, for high frequency broadcast station, using temporary antenna.

FINAL ORDER

The Commission has adopted an order making final its Proposed Findings of Fact and Conclusions (B-157) denying the application of West Allis Broadcasting Company, Inc., for a construction permit to establish a new standard broadcast station at West Allis, Wisconsin, to operate on **1480 kc.**, 250 watts, daytime only.

YANKEE NETWORK DECISION

The Commission en banc approved the transfer of control of The Yankee Network, Inc., licensee of four standard broadcast stations, four relay stations, two experimental stations, and two high frequency stations, through the sale of the capital stock of The Winter Street Corporation (which owns 100 per cent control of The Yankee Network), from John Shepard, 3rd, and George R. Blodgett, trustees, to The General Tire and Rubber Company, Akron, Ohio. Commissioners Walker and Durr dissented.

The sum of $1,240,000 will be paid, plus an additional amount to be determined on the date of the transfer equal to 94 per cent of the aggregate net quick assets of the seller over $100,000.

There is also being sold to The General Tire and Rubber Company, as a part of the same transaction, all of the capital stock of The Colonial Network, Inc., which is owned 50 per cent by John Shepard, 3rd, and 50 per cent by his brother, Robert F. Shepard. Colonial is not a licensee of a broadcast station, its income being derived principally from the sale of station time and wired transcription service to subscribers.

In addition to its position of licensee, The Yankee Network, Inc., is engaged in the operation of a network broadcast system employing as outlets the four broadcast stations licensed to it and 17 contract outlets or affiliated stations located in the States of Maine, Massachusetts, Connecticut, New Hampshire and Vermont.

Commissioner Walker set forth the following views in connection with his dissent:

> "The application should be set for hearing. A finding that a transfer shall be in the public interest is mandatory. The application herein does not show on its face, or contain therein, convincing facts that the public interest world be served by the proposed transfer. A public hearing would, therefore, seem advisable.
>
> "The application should, in any event, be set for hearing on the issue of transferring broadcast stations to another industry. The instant application involves not only the control of certain broadcast stations but also of The Yankee Network, Inc.
>
> "Broadcasting is of such public interest and importance that an effort should be made to keep it separate from other businesses. If a transfer of chain broadcasting interests, as herein proposed, may be granted to a tire and rubber company, may it not likewise be granted to a motor company or to a public utility? The precedent having once been established of transferring licenses controlling a network to other interests, where can the line be drawn? Chain broadcasting is of such vital public consequence and public interest that it should be a business in and of itself, and disassociated from any other business."

STATEMENT OF COMMISSIONER DURR

I think the application should be set for hearing.

First, a question of absentee ownership and control is presented. The stations involved in the transfer are all located in New England. The control is now in the hands of people who are residents of New England and familiar with its problems and needs. Transferee is an Ohio corporation with its principal place of business in Akron. Its officers and directors are residents of Ohio with the exception of one who resides in Florida. With the exception of two brokerage houses in New York City, all stockholders owning 1% or more of the outstanding capital stock are residents of Ohio. Nor does the application show that the transferee and those controlling it have a familiarity with or interest in the problems of the New England area. Accordingly, I do not believe that sufficient showing has been made to warrant a finding that the transfer of control would be in the public interest.

Second, the transferee is a large manufacturing concern whose products have a nationwide distribution. By this transfer it will acquire, as an adjunct to its private business operations, a number of broadcasting stations which together serve a major portion of the New England states. With the networks to be acquired as a part of the same transaction, it will have access by radio to virtually the entire New England area.

The issue presented here is not whether interests engaged in other lines of business should be prevented from owning any broadcasting stations, but rather the extent to which they should be permitted to go in the acquisition of such stations. Unless some limitation is imposed, they may embark upon a program of station acquisition which will force their competitors, and even concerns in entirely different lines of business, to follow the same course in order to survive. Such a course would tend to make radio broadcasting an adjunct of private commercial enterprise instead of the independent medium of entertainment and expression which it must be if it is really to serve the public interest. Moreover, the war has greatly accelerated the tendency toward bigness in industrial concerns which has long been under way. Will it be in the public interest to consolidate under a common control the economic power of large business establishments and the power to mold public opinion which is inherent in the operation of broadcasting stations?

These are questions which I believe should be carefully investigated before the application is granted.

MISCELLANEOUS

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Granted modification (B3-MP-1682) of construction permit (B3-P-3355) for extension of completion date from 1-5-43 to 3-5-43.

WSBT—The South Bend Tribune, South Bend, Ind.—Granted license (B4-L-1742) to use present licensed auxiliary transmitter as main transmitter. Also granted license (B4-L-1743) to use present licensed main transmitter as auxiliary transmitter.

WAAB—The Yankee Network, Inc., Worcester, Mass.—Granted license (B1-L-1734) to cover construction permit (B1-P-3194) for increase in power to 5 KW, installation of new transmitter and DA for day and night use, and move transmitter and studio; also granted authority to determine operating power by direct measurement (B1-Z-1476).

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted license (B3-L-1668) to cover construction permit (B3-P-2985) to install new transmitter, directional antenna for night use, change frequency to **1250 kc.**, increase power to 1 KW and move transmitter. Also authority to determine operating power by direct measurement (B3-Z-1401).

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Granted license (B3-L-1738) to cover construction permit (B3-P-2966) for change of frequency to **1480 kc.**, increase in power to 5 KW, installation of new equipment and DA for night use, and move of transmitter. Also authority to determine operating power by direct measurement (B3-Z-1480).

KTKN—Edwin A. Kraft, Ketchikan, Alaska.—Granted authority to install new automatic frequency control equipment (B-F-252). Also authority to determine operating power by direct measurement (B-Z-1486).

WGST—Georgia School of Technology, Atlanta, Ga.—Granted authority to determine operating power by direct measurement (B3-Z-1441).

WHAZ—Rensselaer Polytechnic Inst., Troy, N. Y.—Granted authority to determine operating power by direct measurement (B1-Z-1484).

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted modification (B2-MP-1679) of construction permit (B2-MP-1679) for extension of completion date from 12-31-42 to 3-1-43.

WLAB—Larus & Brother Co., Inc., Richmond, Va.—Granted license (B2-LRE-424) to cover construction permit (B2-PRE-418) for new relay station to be used with applicant's standard broadcast station WRVA; frequencies **31,620, 35,260, 37,340, 39,620 kc.**, 30 watts.

WAAD—Ralph A. Horton, Portable-Mobile, Area of Ft. Lauderdale, Fla.—Granted license (B3-LRY-288) to cover construction permit (B3-PRY-259) for new relay broadcast station to be used with applicant's standard station WFTL; **1646, 2090, 2190, 2830 kc.**, 100 watts.

KBTB—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted license (B4-LRY-289) to cover construction permit (B4-PRY-289) which authorized move of transmitter to Front St. and 63rd Ave. West, Duluth.

W6XDU—Don Lee Broadcasting System, Portable-Mobile, Area of Los Angeles.—Granted modification (B5-MPVB-90) of construction permit (B5-PVB-83), for extension of completion date of television relay station from 12-1-42 to 4-1-43.

KBTB—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted renewal of relay broadcast station license for the period ending October 1, 1944.

KGBK—Helen Townsley, Area of Great Bend, Kans.—Present license for relay broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending February 1, 1943.

WAEA—W. A. Patterson, Area of Chattanooga, Tenn.—Present license for relay broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending February 1, 1943.

The Metropolis Co., Ocala, Fla.—Granted motion to dismiss without prejudice application (B3-L-1382) for license to operate on **1490 kc.**, 100 watts, unlimited time; facilities of WTMC.

Bay County Publishers, Inc., Panama City, Fla.—Granted motion to dismiss without prejudice application (B3-L-1383) for license for new station to operate on **1230 kc.**, 100 watts night, 250 watts day; unlimited; facilities of WDLP.

WISH—Capitol Broadcasting Corp., Indianapolis, Ind.—Granted petition to dismiss without prejudice application (B4-P-3496) for construction permit to operate on **1310 kc.**, 5 KW, unlimited, DA-night.

WBRB—Monmouth Broadcasting Co., Red Bank, N. J.—Granted petition to withdraw without prejudice to refiling, and cancellation of hearing on application (B1-P-3337) for construction permit to operate on **1240 kc.**, 100 watts; S-WGBB and WFAS; and application (B1-R-185) for renewal of license.

Gloria Dalton—Granted petition to intervene in the hearing on application of KMTR, Los Angeles, for renewal of license; continued hearing from January 12 to March 1; dismissed without prejudice request for transfer of hearing to Los Angeles.

APPLICATIONS FILED AT FCC

920 Kilocycles

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Modification of construction permit (B2-P-2913 as modified which authorized changes in directional system and increase in power) for extension of completion date from 2-3-43 to 5-4-43.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199 as modified which authorized change in frequency, hours of operation, increase in power, directional antenna for night use and new transmitter) for extension of completion date from 1-20-43 to 2-20-43.

1240 Kilocycles

KMAC—W. W. McAllister and Howard W. Davis d/b as The Walmac Co., San Antonio, Texas.—Voluntary assignment of license to Howard W. Davis tr/as The Walmac Company.

1340 Kilocycles

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Voluntary assignment of license to Glenn D. Roberts, Melva F. Roberts, Wellwood Nesbit, Robert M. La Follette, Jr., Evalyn H. Dolph, Hope D. Pettey, Leo T. Crowley and James E. Markham, co-partners d/b as the Milwaukee Broadcasting Company.

1450 Kilocycles

KVAK—Carl Latenser, Atchison, Kansas.—Voluntary assignment of license from Carl Latenser to S. H. Patterson.

MISCELLANEOUS APPLICATION

KICA—Hugh DeWitt Landis, Clovis, New Mexico.—Authority to determine operating power by direct measurement of antenna power.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Allied News-Photo Service Corp., also trading under the names Allied News Photographic Service, Shelburne Studios, Shelburne Company, Miniature Gallery of New York, and Globe Press-Photo Service, 439 Madison Ave., New York, engaged in making and distributing photographs and "Goldtone Miniatures," are charged in a complaint with misrepresentation. (4884)

Booth Fisheries Corporation, with its principal offices in Chicago, is charged in a complaint with violation of the provisions of the Robinson-Patman Act by discriminating in price among its customers. (4883)

Commonwealth Training Institute, 120 Front St., Worcester, Mass., selling and distributing courses of study and instruction intended for preparing students for examinations for certain Civil Service positions, is charged in a complaint with misrepresentation. (4880)

Loomis Manufacturing Co., 1417 West Jackson Boulevard, Chicago, is charged in a complaint with the use of lottery methods in connection with the sale of cigarette chests. (4879)

Rhode Island Plush Mills, Inc.—Misbranding of textile fabrics, in violation of the Wool Products Labeling Act and the Federal Trade Commission Act, is alleged in a complaint issued against Rhode Island Plush Mills, Inc., Woonsocket, R. I. (4881)

C. H. Stemmons Manufacturing Co., 1024 McGee St., Kansas City, Mo., manufacturing and distributing arch supports designated "AirFlow Arch-Ezurs," is charged in a complaint with misrepresentation. (4882)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Amorskin Corporation, 64 Wall St., New York, selling and distributing a cosmetic preparation designated "Amor Skin" for use on the skin, has stipulated in connection with the advertising of the preparation or any other preparation of substantially the same ingredients, whether sold under such name or any other name, to cease and desist from representing that the preparation will feed or nourish the skin or that its use will improve the structure or tissue of the skin or have any effect upon the contour of the elbows. (3593)

Advance Aluminum Castings Corp., 2742 West 36th Place, Chicago, entered into a stipulation to cease and desist from the use in its advertising and sales promotional literature of certain misrepresentations in connection with the sale of aluminum alloy cooking utensils, including a pressure cooker known as "Minit-maid" and pans, roasters and similar utensils designated "Miracle Maid," all designed for use in the so-called waterless method of cooking. (3588)

Craig Institute, 256 First Avenue North, Minneapolis, Minn., selling courses of instruction by mail designed to prepare students for field service examinations and positions, has stipulated to cease and desist from use of the word "Institute" as part of the trade name under which he carries on his business and from use of such word either alone or in connection with other words so as to convey the belief that the business conducted by him is that of an organization for the promotion of learning, philosophy, the arts or sciences. (3590)

Fenton United Cleaning and Dyeing Co., Inc., 2243 Gilbert Ave., Cincinnati, engaged in the cleaning, dyeing and storing business, has stipulated to cease and desist from use of the words "U. S. Approved Storage" or from representing directly or inferentially that either its storage facilities or its method of storage has received approval, endorsement or recommendation of the United States Government, or any agency or department thereof. (3586)

Free State Oil Co. and Bernard J. Rogers, trading as Free State Oil Co., 2100 West Baltimore Ave., Baltimore, selling and distributing motor lubricating oils, have entered into a stipulation in which they agree to cease and desist from the use of the hyphenated word "Pen-Pep" as part of the trade or brand name under which to sell motor lubricating oils that are not composed of Pennsylvania oil and from use of the word "Pen," or any abbreviation of the word "Pennsylvania," whether alone or in connection with other words, so as to convey the belief that the product referred to is composed of Pennsylvania oil, when in fact it contains oil other than Pennsylvania oil; from use of the phrase "2000 Mile Oil" to designate a motor lubricant which would not, in fact, efficiently lubricate a motor throughout the indicated mileage or any other phrase as purportedly indicative of the mileage competency of a motor lubricating oil; and from failing to clearly and unequivocally disclose the fact that each of the aforesaid brands of lubricating oils is composed of or contain, as the case may be, used or reclaimed oil, in all invoices and on the printed and advertising matter, sales promotional descriptions or representations thereof, however disseminated or published. (3584)

Gerson Bedding Co., 40 Warren St., Lowell, Mass., manufacturing and selling mattresses and studio couches, has stipulated to cease and desist from use of the word "doctor" or the abbreviation "Dr." either alone or in connection with a name so as to convey the belief that its products have been made in accordance with the design or under the supervision of a medical practitioner or that the products contain special scientific or health measures which are the result of medical determination or the services of a doctor of medicine; provided, however, if the name "Dr. Coleman" is used in connection with the marking, branding, or labeling of mattresses made in accordance with the directions of or under the supervision of the named person, it shall be immediately accompanied by some other word or words such as "Osteopath," "Osteopathic Physician," or "Doctor of Osteopathy" so as to clearly indicate that the named person is other than a medical practitioner; and from use of the word "health" either alone or in connection with any other words as descriptive of mattresses so as to convey the belief that the products have therapeutic qualities which would be of value in connection with the cure or prevention of diseases or that they are of such nature as would guarantee or assure health to or the maintenance of health by their users. (3587)

Halex Co., Sappington, Mo., selling a medicinal preparation designated "Halex," has stipulated to cease representing that the preparation is of value for hay fever, asthma, catarrh, migraine, sinusitis, toothache, cold sores, drowsiness, fainting spells, lung colds, influenza or sore throat; or that prospective agents, salesmen, distributors or other representatives can make profits or earnings within a specified period of time which are in excess of the average net profits or earnings which have heretofore customarily been made in like periods of time by his active full-time agents, salesmen, distributors, dealers or other representatives in the ordinary and usual course of business and under normal conditions and circumstances. (03085)

Inter-Communication System of America, Inc., and Milton Meyer and Joseph Meyer, trading as Monarch Products Co., 2249 South Calumet Ave., Chicago, selling and distributing intercommunicative systems designated "Flash-A-Call," have stipulated to cease and desist from use of the word "free" or other term or expression of like meaning to describe or refer to products which are not given as a gratuity, and the recipient is required either to pay the purchase price or purchase some other article or to render some service to obtain the same; representing by use of the words "New Invention," "Utterly new product" or other words of like meaning that such products are representative of some new invention or are innovations that have not been heretofore used; representing that the products are non-competitive or that no competition will be encountered in their sale, that no selling effort is required in order to effect sales; that 99 out of 100 persons contacted or any specified number of persons can be depended upon to purchase the products, or that exclusive sales territory is allotted to agents or sales representatives; representing by means of statements such as "Men earning high as $150 week," or in any manner, that sales representatives generally engaged in the sale of such products earn $150 per week or any amount in excess of their actual earnings; or representing as earnings or profits which may be made during any specified period of time from the sale of the products any amounts in excess of the usual and customary amounts which actually have been earned by sales representatives generally, under usual and normal conditions. (3591)

Moffett Studio, Inc., 30 South Michigan Ave., Chicago, and Sidney M. Barton, who through due legal process has had his name changed from Seymour M. Blaufarb to Sidney M. Barton, trading as Continental Galleries, 250 East 43rd St., New York, both selling and distributing photographs, have stipulated to cease and desist from representing that any miniature or photograph not actually prepared for and displayed at an exhibit has been prepared for exhibition purposes or displayed at an exhibition, and from use of the phrase "the extremely low price of $12.50" or any other words of similar implication in connection with the sale of "Gold Tone Miniatures" or any representation tending to convey the belief to the purchasing public that the usual price at which a product is sold in the ordinary course of business is a special price or is less than the usual or customary price. (3583)

Premier Pillow Corp., 121 North 11th St., Brooklyn, manufacturing and selling pillows, has entered into a stipulation in which it agrees to cease and desist from use of the term "100% Goose Down" as descriptive of the filling of its products which are not so filled and from use of the word "down" either alone or in connection with the word "goose" or with any other words so as to convey the belief that the products are filled entirely with down or that they do not contain any material or substance other than down. (3589)

Scranton Broadcasters, Inc., operating radio station WGBI, Scranton, Pa., engaged in selling the use of its radio transmittal facilities and power, has stipulated to cease and desist from representing that WGBI is the only radio station heard in the Scranton-Wilkes-Barre market area; that outside radio stations are not heard in that area; that WGBI is the only regional or clear channel station serving the Scranton-Wilkes-Barre market area; that the station covers the entire area of Northeastern Pennsylvania, or that a survey shows that 98 per cent of the daytime listeners or 96 per cent of the nighttime listeners in Scanton's home county of Lackawanna regularly listen to WGBI, or from misrepresenting in any manner the station's audience or coverage as shown by surveys or otherwise. (03086)

Three Palms Pharmacy, First and Main Streets, Los Angeles, selling and distributing medicinal preparations designated "Vitamalt," and "Natura Calcium Compound and Vitameal," has stipulated to cease and desist from representing that either of the preparations has any reducing action or that any weight loss resulting from following the directions for their use is other than such as would naturally result from a starvation diet or abstinence from food; that the preparations or the diet prescribed therewith can be depended upon to effect weight reduction of ten pounds in five days or that such diet will effectuate any weight reduction in excess of that actually resulting therefrom; that the diet prescribed with Vitamalt will not cause or result in weakness or hunger; that the use of either preparation with rich food has any building tendency or any practical significance from the standpoint of caloric intake; that either of the preparations will give new life and freshness to the skin or free it from pimples or blotches, keep the glands or nerves functioning or nourished, have any beneficial effect upon the body metabolism, "vitalize" the system, cause the pains of rheumatism, arthritis or lumbago to disappear or provide a competent treatment for nervousness, rheumatism, stomach trouble or constipation; or that use of the preparations as directed will effectuate a weight reduction safely without lowering resistance to disease or otherwise endangering the health. (3585)

Variety Hat Co., Inc., 1597 Hudson Boulevard, Jersey City, N. J., manufacturing and selling hats for women, has stipulated that it will cease and desist from representing that hats made in whole or in part from used or second-hand materials or manufacturers seconds or imperfects are composed of new materials, by failure to stamp on the exposed surface of the sweat bands, in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands, a statement that the products are composed of second-hand, used, or manufacturers' seconds, as the case may be, provided that if sweat bands are not affixed to such hats then the stamping must appear on the bodies of such hats in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies; and from representing in any manner that hats made in whole or in part from old, used or second-hand material or from manufacturers' seconds or imperfects, are new or are composed of new materials. (3592)

Bernhard Ulmann Co., Inc., 107 Grand St., New York, selling and distributing knitting yarn, has stipulated to cease and desist from use of the word "Cassimere" or any term or word connoting Cashmere to describe any product not composed entirely of the hair of the Cashmere goat; from use of the word "Shetland" or any similar word to describe a product not composed entirely of the wool of Shetland sheep raised on the Shetland Islands or the contiguous mainland of Scotland, and from use of the word "Angora" to denote any product not composed entirely of the hair of the Angora goat; provided, however, that in each case, if the product is composed in part of the hair of the animals designated and in part of other fibers or materials, such words may be used as descriptive of the fiber content if there is used in immediate connection or conjunction therewith, in letters of at least equal size and conspicuousness, words truthfully describing such other constituent fibers or materials. (3582)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Copper Roofs Corp., 161 West Wisconsin Ave., Milwaukee, has been ordered to cease and desist from certain misrepresentations in the sale of copper roofing material. (4561)

United States Maltsters Association, Chicago, and its 18 member manufacturers have been ordered to cease and desist from entering into or maintaining any combination or conspiracy to fix uniform prices for malt, a product sold principally to brewers for making beer, ale, porter, and other malt beverages. (3555)

FTC CLOSES CASE

La Vida Bottling Co., Inc., Placentia, Calif., and its officers, have entered into a stipulation with the Federal Trade Commission to cease and desist from misrepresentation in the sale of mineral water.

Upon acceptance of the stipulation the Commission closed without prejudice the case growing out of the complaint it had issued against the corporation and its officers, Paul G. Hausman, president; William N. Miller, vice president, and Alfred D. Mitchell, secretary.

Under the stipulation, the respondents agree to discontinue disseminating any advertisement which represents that the products designated "La Vida Mineral Water" and "La Vida Blue Label" have any therapeutic effect other than that afforded by their sodium bicarbonate content or that they are competent remedies or effective treatments for kidney and gall stones, diabetes, neuritis, rheumatism, stomach ailments, liver and bladder troubles caused by excess acid, or the condition resulting from excessive indulgence in alcohol; or that the products attack any ailment at its very foundation or add any minerals to the system in adequate quantity.

They also agree to stop representing that the usual or ordinary diet is "highly acid-forming"; that cooking destroys the alkaline content of foods, or that the respondents' products can be depended upon to restore alkaline balance.

1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 3, January 15, 1943

NAB PROTESTS NEW GAS REGULATIONS TO OPA

NAB has protested to OPA the Amendment No. 8 to the Gas Rationing Regulations which denies preferred mileage to workers in the broadcasting industry other than engineers and technicians employed by stations whose transmitters are remotely located, and which would bar preferred mileage to engineers on temporary remotes. No reply has been received as yet but NAB will follow the matter up.

The letter is as follows:

January 8, 1943

Mr. Leon Henderson, Administrator
Office of Price Administration
Washington, D. C.

Dear Mr. Henderson:

On behalf of the radio broadcasting industry, I desire to request relief from that portion of Amendment 8 to the Mileage Rationing: Gasoline Regulations (Radio Order 5c) which makes workers in this industry ineligible for "preferred mileage", except for engineers and technicians under certain conditions. The Amendment seems to me unduly restrictive and a serious impediment to the effective use of radio in wartime.

That radio broadcasting is considered essential in support of the war effort is attested by letters from numerous government agencies, copies of which are attached. The Selective Service System has designated radio broadcasting as essential in Local Board Release No. 115, as amended July 15, 1942, copy of which is also attached.

Of particular concern is the new regulation which prohibits the issuance of "preferred mileage" to engineers and technicians for necessary travel to and from temporary installations. For sometime prior to Pearl Harbor, and ever since then, the War Department has been actively interested for reasons of morale in the broadcasting of shows from Army camps, maneuvers in the field, and other such remote pickups which can only be done through the use of temporary installations, and which in many instances require gasoline for the transportation of the engineers and their equipment in their own automobiles.

I am entirely in sympathy with the rationing program, and realize the difficulties your office is faced with. However, for the reasons indicated, I respectfully request that the Amendment be stricken, in so far as it relates to radio broadcasting.

Sincerely,
NEVILLE MILLER.

NM/mmr

"A CALL TO WORSHIP"

Several NAB member stations have written to headquarters asking for information upon which to base a decision with respect to the request received from the Le Tourneau Foundation to broadcast a transcribed announcement entitled, "A Call To Worship."

The Le Tourneau Foundation was immediately contacted and we are advised that the purposes and objectives of this organization are: "To teach, promulgate and disseminate the Gospel of Jesus Christ throughout the world and also to unite in Christian fellowship the large number of consecrated Christians in the various evangelical churches; and for such purpose, to appoint and engage ministers, evangelists, missionaries and others to actively pursue and accomplish the foregoing purposes."

The Foundation further advises that it has not and does not contemplate participating in any paid publicity campaign in any medium. They disclaim any intention to secure any promotion or advantage from including the credit reference for the suggestion contained upon the transcriptions.

It may be mentioned, incidentally, that Mr. Le Tourneau, the president and chief benefactor of the Foundation, is the owner of two radio stations, WRLC, Toccoa, Georgia, and WHEB, Portsmouth, New Hampshire, both of which are members of NAB.

The inquiring members have been advised of these facts. The question of whether or not any stations broadcast the announcements is, of course, entirely within the discretion of the management.

Broadcast Advertising

For three days, from Sunday evening, December 13, 1942, to 1:00 AM on Thursday morning, December 17, 1942, twelve New York City newspapers ceased publication while the members of the newspaper delivery unions were on strike.

Heavy schedules of planned newspaper advertising couldn't be published. Some retailers turned to radio advertising; others sat tight, expecting the strike to end momentarily.

To the credit of broadcasting, no New York City station tried to capitalize unduly on the misfortune of another medium. Where good time and good features were available, stations offered them for sale. Where time was at a premium, with only early morning or late evening open, stations declined to have broadcast advertising judged on the basis of such availabilities.

WHAT HAPPENED?

Department stores' sales boomed along as though nothing had happened. Here are the actual figures from the Weekly Federal Reserve Index of Department Stores' Value of sales:

	Week Ending December 19
Increase for New York City	4%
Increase for Entire District	4%

And the entire Federal Reserve district includes such war-busy markets as: Buffalo, Rochester, Syracuse, Utica, Albany, Troy, N. Y. and Newark, N. J. Despite the vastly expanded buying power in the rest of the district, New York City stores held their own against the field.

BROADCAST ADVERTISING

(Continued from page 17)

But radio can not nor does it seek to claim credit for holding sales at such a high level in the face of very adverse shopping weather. The total volume of retail radio advertising actually increased but little.

WHAT HELD SALES UP?

The answer to that question can be debated by academic students of advertising and merchandising for years to come. Probably the effect does deserve psychological probing.

But three facts do stand out: Christmas shopping was not a new idea this year; it might be termed an established American custom. Furthermore, newspapers and radio had featured Christmas merchandise, built up the urge to buy for weeks before the newspapers ceased publication temporarily. Many New York City radio stations were carrying a substantial volume of retail advertising and that continued unabated during the period.

Actually, broadcasters cooperated with newspapers during the trying days. Almost all radio stations increased the number of their newscasts. Newspapers cooperated to increase the local news coverage of radio stations. Radio did not try to profit unnaturally from the predicament of the newspapers. One of the leading newspapers had already contracted for time over one of the leading radio stations to tell its readers what the newspaper would contain when it resumed publication. Then the strike was called off. But one newspaper, nearly a thousand miles away, decided the history of advertising during the strike should be reviewed.

THE RETORT DISCOURTEOUS

Totally unaffected by the strike in any way, shape or manner, the *Chicago Daily News* carried a story by its financial editor, Royal F. Munger, that seemed totally unnecessary and definitely unfounded. Said Mr. Munger in the course of his article, after pointing out that buying held up on Monday, began to thin out on Tuesday:

> "By Wednesday, a buying slump was in full blast, and people who had forgotten to go shopping were beginning to say, 'Oh, well, it's a war Christmas anyway.'
>
> "The Crowds had fallen off, and the attempts to use radio in place of the missing advertising were getting nowhere rapidly. In fact, even through their anguish, the newspaper advertising men grinned at the job radio didn't do."

Unfortunately, Mr. Munger's article has been reprinted as a news story in many newspapers; as a house advertisement in others.

Apparently neither he nor those who reprinted his article have seen the Federal Reserve figures for department store sales during the week ending December 19, 1942.

Of course radio could answer this unprovoked and unjustified claim, but radio has more important things to do. Broadcasting as an industry has embarked, under the NAB Retail Promotion Committee, on a study of retailing and radio that should furnish concrete, factual evidence of the power of radio to help retailers solve some of the problems they face today. More reason why every radio station should subscribe to the Retail Promotion Committee Plan.

Bickering between media is the worst thing that could happen to advertising today. All media have a job to do today—the magnitude of which they have never previously faced. First and foremost, they must help to win the war and win it quickly. Then they must help manufacturers, distributors and retailers to meet utterly new problems; chart sales and institutional courses over unknown seas.

Perhaps this opportunity for inter-media cooperation is nowhere better expressed than it was on the "Inside Washington" page of *Printers' Ink* for January 1, 1943:

> "Food Administrator Wickard and OWI's Elmer Davis did an admirable job of building up for their last Sunday nights' broadcast (December 27, 1942) announcing that around 200 food products would be strictly rationed beginning sometime next February. First the Sunday morning newspapers carried top-head to the general effect that something big was cooking in Mr. Wickard's department—probably having to do with rationing—and that the double-barreled broadcast would reveal the whole plot. Then throughout the day, the forthcoming event was ballyhooed at intervals by the various broadcasting systems. Thus the interest of *hoi polloi* was really stirred up and they did not mind too much being deprived of their usual Charlie McCarthy half hour and other Sunday evening features. The execution was good, too. The dignified preliminary roundup by Mr. Davis and the forthright speech by Mr. Wickard covered the subject adequately and effectively. . . . There was not a thing wrong with the technique employed. Mr. Wickard's reminder that "your Monday morning newspaper will contain an interesting detailed announcement in this connection" was an effective stroke. The two mediums, newspaper and radio, were thus effectively hooked.

Consider that important announcement and the manner of its release. Broadcasting was used to condition the minds of the people—to prepare them for more drastic sacrifices necessary to win the war. To newspapers were left the details of how that program would be implemented.

Some of the ablest men from broadcasting and newspapers are on the staff of OWI. When they agree on such a technique, doesn't that suggest the tremendous importance of broadcasting as the prime means of communication?

Don't let your retail accounts be misled by the misinformation that has unfortunately been published in connection with the strike of the New York City newspaper delivery unions. The statements set forth in this report are verifiable facts. Use them wherever and whenever necessary to spike fraudulent claims.

But don't forget: broadcasting will progress and grow, as it has in the past, through constructive selling on your part and the part of everyone else connected with the industry.

SELL A BOOK TO SELL STAMPS

One of the most offensive attempts to tie a commercial campaign into the war effort is the recent letter of Farrar & Rinehart, Inc., book publishers of New York City, urging stations to follow "The Treasury Star Parade" programs with an announcement plugging a book of the same name containing the scripts of these programs. And the reason why you should do this? If people buy the book containing the scripts, they will be stimulated to buy more War Bonds and Stamps. It would be much more effective to broadcast "The Treasury Star Parade" twice and so make a direct appeal. We hope no NAB member station will succumb to this appeal. Let the publishing house pay card rates for the announcements following these programs.

MORE P-I INSURANCE

Many member stations have forwarded letters from the Charles Edson Rose Company of Chicago, Ill., offering advertising of several types of insurance policies on a graduated P-I basis. The continuity is described as "snappy." We hope all NAB member stations will therefore bounce the continuity back to the agency with an urge to buy on a standard rate-card basis.

WINNER LEFT AT THE POST

Described as a "winner," the "Record of Service" wall certificate offered to radio stations by the Midwest Advertising Company of Springfield, Ill. should be left at the post by all NAB member stations. Try to get the business on a straight rate-card basis. If the deal is as good as the agency says it is, they certainly ought to buy and quickly.

COVERAGE CLAIMS

A recent FTC case, wherein a radio station stipulated to desist from making certain claims as to its coverage, serves as a warning to stations. Extreme care should be taken to insure that no coverage claims are made that cannot be substantiated by reliable evidence. Statements made in brochures and direct mail constitute advertising just as much as advertisements in the trade papers.

Programs for Victory

OUTSTANDING LOCAL PROMOTION

Edgar Bill's WMBD (Peoria) sends word of a one-hour program under the title "Forward Peoria" which gained much local attention. The program was designed to congratulate and honor the organizations and the men who had been principally engaged in the local war effort. These men reported the results of their activity. Music for the program was furnished by the Municipal Band through the courtesy of the Peoria Musicians Union.

Those reporting were the chairman of the war bond campaign; of the Advertising and Selling Club, the Defense Council, War Price and Rationing Board, the Junior Chamber of Commerce, the CIO Publicity and Educational Director, American Legion, Association of Commerce, Selective Service Board and the Local Committee for Economic Development. It was an outstanding success and the idea may be of interest to other stations.

HAVENS PRESENTS BOND IN TITLE CONTEST

WMBG, Richmond, Va., had a half hour program of song and wit known as "The Show Without a Name." It's now known as "Everything Goes."

Station President, Wilbur M. Havens, recently presented Miss Carrie Moore with a $25 war bond for suggesting the new title which more accurately describes the program.

CLIPP WRITES REGIONAL DIRECTOR OF OPA

Roger W. Clipp, General Manager, WFIL, recently wrote to the Regional Director of the Office of Price Administration regarding a practice which they have inaugurated to aid OPA in its effort to cut down pleasure driving. Says Mr. Clipp in his letter:

"Feeling that many folk are often undecided whether or not to go out of an evening, we are advising them to stay home, thereby saving gas, tires and transportation facilities. The suggestion is made additionally attractive by pointing out three or four of the top comedy, musical, dramatic and news programs available for their listening pleasure over WFIL for the current evening."

"We believe," says Mr. Clipp, further, "that the theme, 'Stay home tonight—save gas and tires—listen to WFIL,' will have a noticeable effect on civilian habits."

We pass this suggestion on to other stations for what use they may want to make of it.

THANKS FOR COOPERATION

Sincere thanks to the following stations for their cooperation in acquainting the public with the reasons why radio sets needing repairs should be taken to the radio repairman instead of asking him to call:

WADC—Akron; WHMA—Anniston; KMPC—Beverly Hills; WOPI—Bristol; KFVS—Cape Girardeau; KELA—Centralia; WGKV—Charleston, W. Va.; WBT—Charlotte; WAAF—Chicago; WCBI—Columbus, Miss.; KRIS—Corpus Christi; WDAN—Danville, Ill.; WHIO—Dayton; KPOF—Denver; WKBB & KDTH—Dubuque; KROD & KTSM—El Paso; KTSW—Emporia; WFNC—Fayetteville; KORN—Fremont; WHAI—Greenfield; WHP—Harrisburg; WDRC—Hartford; WJAX—Jacksonville; WCLO—Janesville; WJAC—Johnstown; WCLS—Joliet; KFUN—Las Vegas; WCOU—Lewiston; KFOR—Long View; WHAS—Louisville; KYSM—Mankato; WMAM—Marinette; KMYC—Marysville; WMC & WMPS—Memphis; WQAM—Miami; KVOX—Moorhead; WAJR—Morgantown; WISE—Nashville; WTAR—Norfolk; KLO—Ogden; KPDN—Pampa; WPAR—Parkersburg; WFIL—Philadelphia; KDKA—Pittsburgh; KWOC—Poplar Bluff; KBPS—Portland; WKIP—Poughkeepsie; WEXL—Royal Oak; KGLU—Safford; KJBS—San Francisco; KVEC—San Luis Obispo; WSNY—Schenectady; WHBL—Sheboygan; KGH—Sidney; WSPA—Spartanburg; KFIO—Spokane; WSPR—Springfield, Mass.; KFAM—St. Cloud; WFLA—Tampa; WIBW—Topeka; KVOO—Tulsa; KSUD—Vermillion; WACO—Waco; WAIR—Winston Salem; WFHR—Wisconsin Rapids; WSBA—York; WHIZ—Zanesville.

NEW SOLDIER MAIL RULES

Lt. Col. Edward M. Kirby, Chief of the Radio Branch of the Bureau of Public Relations of the War Department, has recently communicated to all networks with reference to the matter of mail to soldiers overseas. The problem is becoming an extremely acute one. The following press release from the War Department outlines the situation which will be of interest to all engaged in broadcasting which encourages the sending of mail to soldiers abroad.

A recent survey of conditions obtaining in the shipment of mail to our soldiers overseas revealed that more than eight times as much cargo space per man was utilized in November, 1942, for mail than in November, 1918, the War Department announced today.

The mail forwarded in November, 1942, consumed cargo space equivalent to the total capacity of three 11,000-ton ships of the "Liberty" class—ships that are vitally needed to provide food, ammunition, and the countless items of supply that are the raw material of victory. With the steady expansion of our forces overseas, this presents a problem of pressing and ever-growing importance.

Insofar as the overseas mail consists of letters to soldiers by their families and personal friends, it has been welcomed by the Army, and will continue to be welcomed. However, it is clear that waste must be eliminated in the interest of military efficiency.

The enormous amount of space consumed by packages, and the fact that they so frequently contain objects that are already supplied by the Army in compact bulk shipments, have impelled the War Department, in cooperation with the Post Office Department, to issue new regulations. Effective January 15, no package may be sent to a soldier overseas unless it contains an article that has been requested by the soldier, and the request has been approved by the commander of the battalion or similar unit. The package will not be accepted by the post office unless the written request, bearing the commanding officer's approval, is presented.

These packages will be limited in weight to five pounds, and may not be more than 15 inches in length, and 36 inches in length and girth combined.

Under the new regulations, magazines and newspapers may be mailed to a soldier only by the publisher and only if the soldier is the subscriber. However, the soldier will be free to subscribe to any newspaper or magazine he wishes, and will not require special permission to do so.

The mailing to soldiers overseas of single copies of magazines and newspapers will be discontinued.

In this connection, it should be borne in mind that copies of many current publications are provided by the Special Service Division of the Army, and are available to the soldiers.

The only exception to these rules will be in the case of soldiers who have been sent overseas while packages, addressed to them at a station in the United States, were in transit. Such packages will be forwarded overseas.

Experience indicates that the new restrictions on packages will work no hardship. In the main, these rules will operate merely to prevent the duplication of items of foodstuffs, clothing, and other articles already adequately supplied by the Army. Every effort is made by the Special Service Division and the Army Exchange Service to provide items that are in general demand.

There is an obvious necessity for conserving the cargo space of airplanes as well as ships, and the V-Mail system was devised to meet this problem. V-Mail represents a saving of 98 per cent in cargo space as opposed to ordinary mail. Therefore, in loading planes bound for those overseas areas where facilities exist for the reproduction of V-Mail, air mail stamps on ordinary letters will be disregarded. The V-Mail letter will be the only type of letter bound for these destinations that will be assured of overseas transportation by air. The points at which reproduction installations for V-Mail are now available are the British Isles, Iceland, Greenland, Australia, the Near East, the Southwest Pacific, the Hawaiian Islands, and India. They will be available within the near future in North Africa.

V-Mail is quick—it goes to its overseas destination by air. It is safe—the negative from which it has been reproduced is never destroyed until the letter has reached its destination. One argument that has been advanced against it is its lack of privacy. This objection is a bit naive, since every letter sent out of the country in wartime whether by V-Mail, air mail or ordinary post, is subject to censorship.

To date, 15,000,000 V-Mail letters have been sent from and to the United States without the loss of a single one. However, the total volume of overseas mail handled by the Army has been as high as 15,000,000 a week. Army mail going overseas now exceeds the peak volume of foreign mail dispatched by the civil postal system in peace time.

The Army Postal Service, with the cooperation of the United States Post Office Department, has handled its tremendous job faithfully and well, although in the nature of things it will never be exempt from criticism. For example, when a man receives a letter dated December 15 and later gets one dated December 10, he is apt to think that somebody slipped. However, the enormous mass of mail must be handled as it comes, and the facilities available at a later date may turn out to be more expeditious.

The problems of the Army Postal Service, and an important problem of the Army as a whole, will be greatly lightened when all citizens act on the request that they write only to those soldiers with whom they are personally acquainted. Experience shows that letters from the best-intentioned of strangers mean nothing at all to the average soldier. To the Army they mean, at best, the waste of cargo space that is needed for food and war materials.

MORE ABOUT 1,000 CYCLE ALARM

The article on page nine of NAB Reports for January 8 was not intended to convey the impression that stations using an automatic alarm device would not need to maintain a continuous listening watch. Audible electronic control devices may be used *only* to supplement the continuous listening watch and not as a substitute. Prior to the construction and installation of the device described in the December 1942 issue of COMMUNICATIONS or similar devices, it is suggested that Restricted Order No. 2 of the Federal Communications Commission dated September 1, 1942 be reviewed.

MAINTAINING HOME SETS

The National Association of Broadcasters is fully aware of the necessity for maintaining home radio receivers as the most effective means of mass communication. Despite the lack of specific published information, some of which can be classified as military secrets, we are confident that home radio receivers will be maintained in efficient operation throughout the duration of the war.

Materials Problem

The availability of replacement tubes and repair parts for home radio receivers is best summed up in a statement issued December 28, 1942, by Frank H. McIntosh, Chief, Civilian Radio Section, WPB Radio and Radar Division:

"The Victory line of tubes and parts will play a part to conserve material and the programs of distribution now in effect and planned for the near future will insure the necessary items of maintenance for the radios of this country. This to the extent that at least one set per home will be insured, and that the corresponding broadcasting needs will continue to be met on the basis of the conservation measures already in force or about to be put in force."

The essential service of broadcasting during war time is succinctly described in a letter written to the NAB on October 6, 1942, by William B. Lewis, Chief, Radio Bureau, OWI:

"The OWI has a direct and vital concern with the maintenance of radio coverage in this country. It is one of the most important media for the conveyance of war information in general to the people, and may become of still greater importance when there is occasion for emergency messages from the national leadership."

Personnel Problem

Sufficient personnel to install radio parts and tubes is not a serious problem at the present time. To assist in preventing it ever becoming a serious problem, NAB has been working for some time with government training agencies, other groups and associations within the radio industry and with individual manufacturers. Prevention involves a training problem at the vocational level for men not acceptable for military service and for women. It will also involve the streamlining of service technique and its institution wherever indicated.

For some months NAB worked with the Manpower Commission to secure the recognition of the occupation

"Radio Repairman" as an essential occupation. Approved by War Manpower, the definition was forwarded through channels to Selective Service. On December 22, 1942, Selective Service issued Occupational Bulletin No. 42 and Radio Repairman was included among occupations which local boards should consider for deferment.

Philco Goes to Bat

Philco Corporation, manufacturers of home radio receivers, notified NAB this week that it is prepared to launch a nation wide plan to do its part in maintaining home radios throughout the emergency. A philco official is expected to visit headquarters next week.

Decision to implement the plan now rather than six months hence will be regarded with approval and enthusiasm throughout the radio industry. It is much easier to control a situation by locking the door before the horse escapes.

BATTERY SETS

Battery-run radios—particularly those used on farms—should be operated on the basis of obtaining at the very most only a single set of replacement batteries a year, the WPB Consumer Durable Goods Division said today.

Pointing out that production of farm radio batteries has been cut due to restrictions on zinc and to other factors, the Division urged radio owners to follow simple conservation rules for assuring maximum service from their present supply.

Wholehearted observance of the rules, it was stated, will go far towards keeping farm radios in operation despite wartime restrictions on production of batteries and will assist farm families to keep abreast of developments on the war fronts both at home and abroad.

The rules are:

1. Don't waste your batteries. Operate your radio only when there are programs that you particularly want to hear.
2. Avoid long, continuous radio operation. Break up your reception into a number of short periods.
3. Keep batteries away from heat.
4. Have the tubes checked regularly as insurance against battery wastage.
5. Disconnect the batteries from the radio when not in operation. This will be a double-check against the radio being left on accidentally. It is also a guard against young children in the family operating the radio unnecessarily.

The shortage of batteries, which has been experienced generally throughout the country for the past several months, is due to military requirements as well as to the zinc shortage, and has developed at a time when the war news and transportation restrictions have naturally resulted in greatly increased use of radios.

Last July 24, Order M-11-b (zinc) cut the use of zinc in all types of dry cell batteries fifty percent below 1941 consumption. In an effort to alleviate this situation, Order B-71 was issued on October 2 eliminating entirely production of batteries for portable radios and establishing specific quotas for production of farm radio batteries, flashlight batteries and other types for industrial and occupational use. The effect of this action was to limit the use of available zinc to the most essential batteries, in which were included radio batteries.

Most recent models of portable radios can be operated on household electric current; the remainder will have to be stored away for the duration once present stocks of batteries are exhausted.

Officials of the Consumer Durable Goods Division declared that WPB is fully cognizant of the need for maintaining farm radios in operation, both as a means of keeping America's farm population informed on the progress of the war effort, and also as a source of entertainment to replace drastically curtailed peacetime recreational facilities. To attain that objective, more than half of the zinc allocated for civilian batteries is now used for production of farm radio batteries, but until military requirements are fully met there is little possibility of any additional allocations.

Also, the available supply of batteries has been allocated to various parts of the country on as equitable a basis as possible. Purchasers are urged to go only to their regular sources for replacements. No priority rating is granted or needed for purchase of radio batteries by consumers.

WSAV TRAINING COURSE

In cooperation with Dr. R. L. Sweigert of the Georgia School of Technology, State Director of the Engineering Science Management War Training Program for Georgia, Radio Station WSAV has organized a training course in Savannah under the direction of its Chief Engineer, Meredith E. Thompson. Upon not being able to make any satisfactory arrangement with established educational institutions, Dr. Sweigert appealed to WSAV for assistance, and was immediately tendered the necessary facilities for establishment of the courses in Savannah. The class includes numerous women who are preparing for enlistment in the WAAC's and WAVE's.

"THE RAPE OF RADIO"

The attention of the NAB has been called to the fact that Rodin Publishing Company, Inc., is circulating a book entitled "The Rape of Radio," written by Robert West in a jacket which quotes "Melville Miller, Pres., National Association of Broadcasters" as saying "The most revealing book on radio since the advent of broadcasting."

Mr. Miller has never read this book, or made any such statement about it. The Rodin press admits that not only the purported quotation of Mr. Miller, but of other persons whose names appear on the book jacket, are due to "an egregious blunder."

Members coming across this book are warned with respect to the false quotation, and asked to call the attention of the NAB to any places offering it for sale in the jacket which falsely quotes Mr. Miller.

QUICK ACTION SAVES CORN FROM FLOOD

When rapidly-rising waters threatened to destroy much corn in the Ohio and Wabash river bottoms, Manager Clarence Leich of WGBF-WEOA, Evansville, Indiana, called Indiana's Governor, Henry F. Schricker. He suggested that permission be secured from the War Department to have soldiers from Ft. Breckinridge, across the river from Evansville, assist in the salvaging of the corn. The appeal was successful and several hundred soldiers saved thousands of bushels of corn in the bottomlands.

PREDICTS MORE WOMEN IN RADIO

In thanking Major Edney Ridge, Managing Director, WBIG, Greensboro, N. C., for recruiting results, Waldo Porter, manager of the Greensboro office USES, added a worth while comment regarding the employment of women.

Said Mr. Porter: "I have noticed recently the addition of two lady announcers to your staff. I want to congratulate you on this move, as I think it is good business on your part. The time is fast approaching when women are going to replace men in many occupations, and it is the smart thing to make this change while qualified women are still available. I might add that the young lady announcers are doing a fine job."

TEACHERS LIKE MATERIAL

Max U. Bildersee, radio supervisor, The University of the State of New York, The State Education Department, Albany, wrote last week:

"I want to thank you for sending me the publications you did for distribution at the annual conference of the New York State Association of Elementary Principals.

"You will be interested to know that the materials were well received and that the discussion of educational broadcasting brought forth many questions."

WHEB STILL GROWING

Mrs. Rosemary Bolles, new to radio, has joined the continuity department of WHEB, Portsmouth, N. H., and Brenda Caswell, also new to radio, the sales department. Elvy C. Scull, formerly of the Merchant Marine, is employed in the engineering department.

FLENNIKEN AND BOYLSON CHANGE

James M. Flenniken, formerly general manager, WBRW, Welch, W. Va., has joined WBLK, Clarksburg, W. Va.

New general manager of WBRW is Vernon Boylson, formerly sales manager, WRAK, Lafayette, Ind.

RECRUITS 91 RADIO STUDENTS

Three courses in Fundamentals of Radio, with approximately 91 students, are expected to get under way in Rockford, Ill., this week. They were recruited by WROK in cooperation with the University of Illinois.

Approximately 200 other students were recruited for classes in other wartime subjects, according to Bill Traum, promotion manager. Most of the radio students will be available for work within the industry.

William C. Gillespie

William C. Gillespie, General Manager, KTUL, Tulsa, died at 9:20 a.m. on Tuesday (January 12). His death resulted from a fractured skull sustained in a fall at his home. Bill Gillespie had been one of the outstanding broadcasters in his area and has taken an active and constructive part in general industry affairs. At the time of his death he was serving as a member of the Retail Promotion Committee and had been active in other general industry matters. All in broadcasting mourn his passing and extend sincere sympathy to his family and to those who were associated at the station with him.

Listener Activities

MINNEAPOLIS COUNCIL ACTIVE

Mrs. George B. Palmer, Regional Director of Listener Activity, reports that two series are being broadcast devoted to war interests. One, over WCCO, called "Woman Wanted" is a series using some of the outstanding leaders in educational and civic life of the Northwest. "Woman Wanted" is designed to meet the questions of the housewife on a number of fronts—the personal, the social, the educational, the civic and the psychological. The program is produced by the Minnesota Federation of Women's Clubs in cooperation with the Minnesota Library Association and the University of Minnesota.

The sceond series is called "Wartime Living" and is broadcast each week over KSTP, starting Wednesday, January 13th—sponsored by the Minnesota Federation of Women's Clubs in cooperation with the Office of War Information. Such subjects as "Loose Talk," "Wartime Health," "Inflation," "Consumer Interests," etc. Experts in their respective fields will discuss the subjects. Mrs. L. R. Upham, Chairman of the Women's Service Section of the State Civilian Defense, will serve as permanent chairman of the round-table discussions.

* * *

Miss Millicent Pooley, Chairman of District No. 9 for the Association of Women Directors of NAB, has resigned as Woman Director of WHBF to join the WAVES.

CHILDREN'S PROGRAMS

Miss Bernice W. Foley of WSAI, Cincinnati, formerly of WKRC, is producing a children's newscast every day at 5:00 p.m. The Cincinnati Board of Education is giving splendid cooperation.

Miss Foley states that she finds that children do listen to newscasts but that most of them are beyond their comprehension. She gives a round-up of news and supplements that with stories about the countries discussed, stressing geography and history.

HUMAN INTEREST SPORTS

A member recently mislaid an offer of a nightly sports human interest story. He wonders if anyone received a similar offer. If so, please communicate with Mr. Arney at NAB.

SALARY STABILIZATION

Wage increase agreements which violate the stabilization policy cannot be approved by the National War Labor Board even where the increase was agreed upon mutually by management and union, the National War Labor Board reiterated this week in an opinion written by Dean Wayne L. Morse, Public member of the Board, in connection with the Board's unanimous decision in a Los Angeles building employees' case.

The National War Labor Board's established wage policies "will break down completely unless wage increases set forth in prior agreements and collective bargaining contracts are to be subordinated to the national wage stabilization program," Dean Morse stated in the opinion.

FEDERAL LEGISLATION

HOUSE RESOLUTION

H. Res. 21 (Cox, D-Georgia) INVESTIGATION OF FCC—Authorizing an investigation of the organization, personnel, and activities of the Federal Communications Commission. Referred to the Committee on Rules.

HOUSE

H. R. 80 (Keough, D-N. Y.) COPYRIGHT—To amend section 25 of the Act entitled "An Act to amend and consolidate the Acts respecting copyright", approved March 4, 1909, as amended. Referred to the Committee on Patents.

H. R. 816 (Cellar, D-N. Y.) ADMINISTRATIVE PROCEDURE—To revise the administrative procedure of Federal agencies; to establish the Office of Federal Administrative Procedure; to provide for hearing commissioners; to authorize declaratory rulings by administrative agencies; and for other purposes. Referred to the Committee on the Judiciary.

SENATE

S. 149 (Clark, D-Idaho) RECORDINGS—To prohibit certain contracts, agreements, conspiracies, and combinations which prevent the making of recordations for use by radio broadcasting stations and coin-operated phonographs. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

CALIFORNIA:

A. 195 (Wollenberg) FOREIGN LANGUAGE BROADCASTS—Provides radio broadcasts in foreign language must be repeated in English. Referred to Committee on Judiciary 1/12/43.

MARYLAND:

S. 18 (Brice) RADIO ADVERTISING LOANS—To amend Sec. 14 of Art. 58A of the Code, relating to advertising small loans by radio broadcasts. Referred to Committee on Judicial Proceedings 1/7/43.

NEW YORK:

S. 72 (Quinn) FOOD & DRUGS—Creates in health dept. a consumers' bureau for advertising control, scientific research, and sale of foods, drugs, cosmetics or health devices, and for regulating traffic therein. Referred to Committee on Health 1/6/43.

S. 82 (Williamson) INDUSTRIAL BANKS—LOANS—Provides that industrial banks shall not advertise, print or broadcast any statement with regard to rate for loans unless stated as rate per cent per annum or per month on unpaid principal balances. Referred to Committee on Banks 1/6/43.

S. 83 (Williamson) PERSONAL LOAN—RATES—Prohibits advertising by bank or trust company in connection with personal loan dept., of statements relative to rates for loans unless stated in terms of rate per centum per annum or per month on unpaid principal balances. Referred to Committee on Banks 1/6/43.

S. 84 (Williamson) SMALL LOANS—RATE ADVERTISING—Requires that in advertising for loans and in other statements by licensed lenders of small loans, rate or charge shall be stated as rate per centum per month on unpaid principal balances. Referred to Committee on Banks 1/6/43.

FEDERAL COMMUNICATIONS COMMISSION

COMPLAINTS ON "VULGARITY"

At a press conference early this week FCC Chairman James Lawrence Fly said that the Commission has been receiving a larger number of complaints about vulgarity and profanity on the air than usual. He said at this particular time he would not care to express any opinion on this matter.

Mr. Fly told the newsmen that he stood ready to assist the Senate Committee in connection with the Petrillo hearing but that he has not received any formal notice and does not expect the Committee to call him at any of the early sessions of the hearing. He said that if he is called he believes that any testimony he might give would be basically the same as that he has already given to Congress.

The Chairman, in answer to a question, said that he expected within the next couple of weeks to have information on the financial standing of the small stations of the country. He stated that the Commission is not doing anything at the moment in connection with obtaining advertising for these small stations pending receipt of the financial analysis of the different stations.

Mr. Fly told the correspondents that joint consideration will be given to the setting up of new stations and frequencies by interested government departments and agencies. He said that the FCC will cooperate in this as best it can. "I think," he continued, "we all appreciate that as far as it can be done consistent with other extreme and urgent demands, that we ought to expand our international broadcast facilities. I don't think there is any debate on that anywhere in the Government."

1944 FCC BUDGET

In his annual budget message to Congress this week the President asked for a regular appropriation for the Federal Communications Commission for the fiscal year 1944, beginning July 1 next, of $2,000,000. That is identical with the amount appropriated for the present fiscal year.

An appropriation of $6,070,000 was also asked by the President for national defense needs for the Commission for the same fiscal year. The appropriation during the present fiscal year amounted to $5,363,035.

The estimates submitted for the fiscal year 1944 provide for a continuation of the regulatory work of the Commission at the same level as for 1943 and an expansion in its war activities. For the latter purpose, an increase of approximately 11 percent is submitted in the estimates. This will make provision for the work of monitoring stations which are operated on a 24-hour basis to insure a continual and effective policing of all radio communications channels and signals. It will also provide for coordination with the War Department Interceptor Commands in the silencing of radio stations during air-raid danger and insure prompt return to the air when the danger is over. Other activities affected by the increase are: Listening in on foreign radio transmissions of intelligence and propaganda, thereby guiding counter-propaganda and other necessary actions; and maintenance of an adequate communications service to meet the needs of the Nation, including the formulation of plans for the Board of War Communications.

KOA CASE

The FCC has adopted an order granting a petition for rehearing filed by NBC as licensee of station KOA. This is directed against the grant of the application of WJW, Inc., for modification of construction permit to change frequency from 1240 to 850 kilocycles, increased power from 250 watts to 5 kilowatt with directional antenna day and night, change location of transmitter to a site 13.8 miles nearer Cleveland and move the studios from Akron to Cleveland.

The Commission dismissed KOA's request for a stay order without prejudice to KOA's right to renew the request if WJW should seek authority for actual operation on 850 kilocycles in Cleveland prior to a final decision by the Commission in this matter.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, January 18. They are subject to change.

Monday, January 18

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—C. P., 1030 kc., 10 KW, DA-night, unlimited.

Tuesday, January 19

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Renewal of license (main and auxiliary), **1520 kc.,** 50 KW, unlimited, DA-day and night.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Renewal of license (main and auxiliary), **550 kc.,** 1 KW night, 5 KW day, unlimited, DA-night.

NEW—Chattahoochee Broadcasting Co., Columbus, Ga.—C. P., **1450 kc.,** 250 watts, unlimited.

Thursday, January 21

WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of license, **680 kc.,** 250 watts, unlimited.

Friday, January 22

WORK—York Broadcasting Co., York, Pa.—Modification of C. P., **1350 kc.,** 1 KW, DA-night, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATION GRANTED

KROY—Royal Miller (Assignor), Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney, and Will Thompson, a partnership, d/b as Royal Miller Radio, Sacramento, Cal.—Granted consent to assignment of license for Station KROY, Sacramento, Calif., from Royal Miller to a partnership composed of Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney, and Will Thompson, d/b as Royal Miller Radio, for a total consideration of $18,500 to be paid the assignor (B5-AL-358)

DESIGNATED FOR HEARING

WOKO—WOKO, Inc., Albany, N. Y.—Designated for hearing application for renewal of license of Station WOKO and auxiliary, upon the following issues: To determine whether the representations and statements made to the Commission or its predecessor, the Federal Radio Commission, by the licensee, its officers, directors, stockholders, or agents, with respect to the ownership or transfer of, subscription to, or consideration paid for the stock of WOKO, Inc., truly and accurately reflect the facts; to determine all the circumstances and conditions under which the stock of WOKO, Inc., has been issued, transferred, or assigned; to determine whether or not the applicant is qualified to continue the operation of Station WOKO; and to determine whether, in view of the facts adduced under the foregoing issues, public interest, convenience and necessity would be served by a grant of this application (B1-R-253).

MISCELLANEOUS

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif.—Granted license to cover construction permit as modified, for new equipment, increase in power, installation of directional antenna for night use, and move of transmitter (B5-L-1741); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1483).

WOSH—Howard H. Wilson, Oshkosh, Wis.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1448).

W39NY—City of New York, Municipal Broadcasting System, New York, N. Y.—Granted modification of construction permit as modified, which authorized new high frequency broadcast station, for extension of completion date from November 14, 1942, to March 14, 1943 (B1-MPH-117).

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted motion for postponement of hearing set for January 8 on application for modification of license; hearing continued to February 8, 1943. (Docket No. 6341)

The Commission adopted an order denying the joint petition of Woodmen of the World Life Insurance Society and Radio Station WOW, Inc., for extension of time within which assignment of license of Station WOW may be consummated.

The Commission granted permission for stations to identify mechanical records as such by appropriate announcements either immediately preceding or immediately following the broadcasting of transcribed United States Government messages of a maximum duration of two minutes on war information. This action was taken upon consideration of the request of the Office of War Information dated January 6, 1943, for permission to make the announcement "This transcribed communication is from the Office of War Information" following one-minute spot transcribed announcements.

The Commission denied the request from The Blue Network for waiver of Section 3.406 so as to eliminate station identification announcements during the course of a program on Saturday, January 30, 1943, from 11:15 p.m. to 12:15 a.m., in connection with the President's birthday.

The Commission stated further that similar requests from other networks will not be granted.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted petition to intervene in the hearing on application of WBNY, Buffalo, N. Y., for modification of license.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted motion for continuance of hearing from January 21 to February 23 in re application for modification of license.

Chattahoochee Broadcasting Co., Columbus, Ga.—Granted motion for continuance of hearing from January 19 to February 4, in re application for new station.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Cal.—Granted petition to postpone hearing now scheduled for January 26 to March 22, in re application for construction permit.

WORK—York Broadcasting Co., York, Pa.—Granted petition to continue hearing from January 22 to February 25, in re application for modification of construction permit.

APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Ore.—License to use formerly licensed main transmitter as an auxiliary with power of 1 KW.

620 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Modification of construction permit (B-P-3489, which authorized move of studio and transmitter) for extension of completion date from 1-26-43 to 7-26-43.

780 Kilocycles

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension of special service authorization to operate synchronously with WBBM from local sunset at Lincoln, Nebr., to 12 midnight, CST, for period ending 2-1-44.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Extension of special service authorization to operate synchronously with KFAB from local sunset at Lincoln, Nebr., to 12 midnight, CST, for period ending 2-1-44.

850 Kilocycles

WEEU—Berks Broadcasting Co., Reading, Pa.—Special service authorization to operate from 7 a. m. to local sunrise during months of January, February and March, 1943.

1440 Kilocycles

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Authority to determine operating power by direct measurement of antenna power.

1450 Kilocycles

KFMB—Worcester Broadcasting Corp., San Diego, Calif.—Voluntary transfer of control from Warren B. Worcester, deceased, to The First National Trust & Savings Bank of San Diego, as Trustee under Declaration of Trust for Warren B. Worcester.

1560 Kilocycles

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Extension of special service authorization to operate on **1560 kc.,** with power of 10 KW, unlimited time, non-directional antenna for period ending 4-1-44.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why cease and desist order should not be issued against it.

Frenco Laboratories, Long Beach, Calif., compounding and selling medicinal preparations designated "Pap-Tabs," "Py-O-Ten," "Pap-Tea," is charged in a complaint with misrepresentation. (4885)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Joseph G. Branch Institute of Engineering & Science—An order has been issued directing Joseph G. Branch, trading as Joseph G. Branch Institute of Engineering and Science, 3917 South Parkway, Chicago, to cease and desist from representations found to have deceived students as to the character of his correspondence school and the value of the courses offered and the purported degrees conferred. All of the 37 courses sold by the respondent are in the Spanish language and include such subjects as medicine, dentistry and several branches of engineering. (4708)

Theophilus J. Craig, 14 Federal Ave., Quincy, Mass., dealer in tombstones and monuments, has been ordered to cease and desist from misrepresentations with respect to the quality, material and price of the products he sells. (4600)

Purity Candy Co., 1135 North Sixth St., St. Louis, have been ordered to cease and desist from selling or otherwise disposing of candy or other merchandise by means of lottery schemes. (4872)

Sherwin-Williams Co., Cleveland, Ohio, and two of its subsidiaries, The Lowe Brothers Company, Dayton, Ohio, and John Lucas & Company, Inc., Philadelphia, have been ordered to cease and desist from violation of the Robinson-Patman Act by discriminating in price between different purchasers of their paint products of like grade and quality. (3965)

World's Star-Malloch, Inc., 501 Ottawa Ave., N. W., Grand Rapids, Mich., has been ordered to cease and desist from misrepresentation in the sale of hosiery. The respondent corporation also has operated under the trade name "Strand-Sealed Hosiery Co.," use of which was discontinued in 1937. (3623)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Brighton Sales, 427 Neptune Ave., Brooklyn, selling and distributing old, worn, second-hand or previously used clothing, has to cease using the words "slightly used" or the word "slightly" or other words of like meaning which tend to convey the belief that previous use or wear of the products is slight or negligible, when, in fact, the extent, degree or nature of such use or wear is such as to be improperly designated or referred to as "slightly" or "slight"; offering for sale or selling any old, worn, second-hand or previously used article of clothing unless there be attached to its exposed surface a tag or label bearing in conspicuous and legible terms a statement that such garment is old, worn, second-hand or previously used; and using any fiber designation in connection with the offering for sale, distribution, labeling or advertising of any merchandise unless such designation truthfully discloses each constituent fiber thereof in the order of predominance by weight, beginning with the largest single constituent, and also unless tags or labels bearing in conspicuous and legible terms such correct fiber content be affixed to the exposed surface of the article. (3594)

Chicago Premium Co., Inc., 54 West Illinois St., Chicago, selling and distributing so-called eyeleted gold seal booklets and trading stamps to retail dealers, engaged in the sale of petroleum products and other merchandise, for use as advertising media, has stipulated to cease and desist from placing in the hands of retail dealers or others sales promotional booklets and stamps or any other sales plans or devices which are to be used, or obviously are intended for use, in the sale or distribution of merchandise by means of a game of chance, gift enterprise or lottery scheme. (3595)

Coates Concentrates, 20 East Jackson Boulevard, Chicago, has entered into a stipulation to cease and desist from misrepresentation in connection with the sale of food and drug tablets. (03087)

OPERATOR REQUIREMENTS RELAXED

The Commission today issued Order 91-C extending the period during which temporary operators licenses will be recognized. This action on the part of FCC consummates a project initiated by the resolution introduced by Marshall Pangra, KRNR, at the 17th NAB District meeting in Portland, Oregon, on November 19.

Resolutions imploring similar action were adopted at the 11th, 10th, 9th, 8th, 7th, 2nd and 1st District meetings which followed in that order after the 17th District meeting. The views of the broadcasters were made known to the FCC by NAB when the original 17th District resolution was transmitted. Order 91-C reads as follows:

"At a meeting of the Federal Communications Commission held at its offices in Washington, D. C. on the nineteenth day of January 1943,

"The Commission having under consideration its orders no. 91, 91-A, and 91-B and the request of the Board of War Communications that the Commission consider further relaxation of its rules and regulations governing the requirements for operators of broadcast stations; and,

"It appearing, that the demand of military services for radiotelegraph and radiotelephone operators has increased as a result of the war and that such demand has decreased the number of operators qualified for operation of broadcast stations resulting in a shortage of such operators;

"It is ordered, that until further order of the Commission, notwithstanding the provision of section 13.61 of the Commission's Rules and Regulations governing commercial radio operators, a broadcast station of any class, which by reason of actual inability to secure the services of an operator or operators of a higher class could not otherwise be operated, may be operated by holders of any class of commercial operator license;

"Provided, however, that all classes of commercial operator licenses shall be valid for the operation of broadcast stations upon the condition that one or more first-class radiotelephone operators are employed who shall be responsible at all times for the technical operation of the station and shall make all adjustments of the transmitter equipment other than minor adjustments which normally are needed in the daily operation of a station;

"Provided, further, that a broadcast station may be operated by a holder of a restricted radiotelephone operator permit only in the event such permit has been endorsed by the Commission to show the operator's proficiency in radiotelephone theory as ascertained through examination.

"Provided, further, that a broadcast station having a licensed power of 1,000 watts or less may be operated by a holder of restricted telephone operator permit which has been endorsed by the Commission to show the operator's proficiency in the operation of the particular station concerned, as ascertained by certification of the first-class radiotelephone operator in charge of the station, on condition that in a technical emergency such operator shall not attempt to make any adjustment, but shall immediately shut down the station.

"Provided, further, that nothing contained therein shall be construed to relieve a station licensee of responsibility for the operation of a station in exact accordance with the rules and regulations of the Commission; and

"Provided, further, that Section 13.61 of the Commission's Rules and Regulations governing commercial radio operators shall remain in full force and effect except as modified by this order.

"This order supersedes orders 91, 91-A and 91-B."

The Commission and all other government agencies which cooperated in working out the details of this order are to be highly commended for most certainly it will contribute to relieving a pressing problem in many stations.

LINE CHARGES REDUCED

"FCC Chairman Fly and Commissioners Walker, Wakefield and Durr are to be heartily congratulated on the outcome of the move to secure a reduction in telephone rates and line charges by the American Telephone and Telegraph Company," said NAB President Miller. "With the broadcasting industry, and especially the smaller stations, struggling under the added burden incident to war responsibilities, this reduction in line charges is certain to prove a boon. It will make possible the continuance, and in some cases the expansion, of radio's contribution to the war effort, especially in cases involving remote control programs. The broadcasting industry is deeply gratified."

Reduction in line charges, according to the Commission, are equivalent to approximately 25 per cent in telephone lines and 35 per cent in private telegraph lines. Small broadcasting stations as casual users of telephone lines, will benefit from a lowering of the initial rate per hour for line costs by approximately 50 per cent. Larger broadcast users will benefit by a reduction from $6 to $8 per air line mile.

Commenting upon the matter, Chairman James Lawrence Fly said:

"I believe this agreed settlement accomplishes some highly desired results. The importance of the extension of the great benefits of network broadcasting to the small and remote radio stations of this country can hardly be over-emphasized; they are an essential part of our modern system of mass communication and every effort ought to be made to preserve these small stations and to improve the service they are rendering to the public. I think, too, the benefits to the press of the Nation and to the Nation, itself, in making more economical the free flow of news and information is of real significance.

"It is also heartening to see these adjustments substantially lower the cost of carrying on the war without in any way encouraging an undesirable increase in nonessential telephone conversations.

"Commissioners Walker, Wakefield and Durr have done a good job in negotiating the adjustments. Mr. Gifford, President of the American Telephone and Telegraph Company, and the other officials of the Bell System have cooperated in achieving these results and in avoiding the unnecessary expenditure of manpower and funds in the course of extensive proceedings and litigation.

"The settlement also recognizes the great interest of the State Commissions and of the independent companies in the charges in question, and the counsel and advice of the State Commissioners has been most helpful. It may be true that this is not an ideal settlement of an impor-

LINE CHARGES REDUCED

(Continued from page 27)

tant and intricate problem; however, under all of the circumstances, at this crucial juncture, I cannot but feel that it is over all a wholesome settlement and represents very constructive gain from the public point of view."

TREASURY SAYS "NO"

The Treasury has advised NAB that the value of broadcast time given the Government does not represent a payment made to the United States within the meaning of Section 23(q) of the Internal Revenue Code as amended, and that no deduction on account thereof is allowable. However, expenses incurred by stations in connection with broadcasting information regarding the purchase of U. S. war bonds, recruiting men for the armed forces, etc., are deductible as ordinary and necessary business expense under Section 23(a)(1) of the Internal Revenue Code as amended.

The Treasury's letter signed by Internal Revenue Commissioner, Guy T. Helvering, follows:

"Further reference is made to your letter of December 17, 1942 stating that radio stations at the request of the Treasury, War and Navy Departments, and other Government agencies, have contributed the use of their broadcasting facilities without charge to the Government to broadcast various programs and announcements designated by such agencies as necessary or desirable in furtherance of the sale of war bonds and stamps, the recruiting of men for the armed forces, and other Governmental purposes.

"You request to be advised whether radio stations so contributing the use of their facilities to the Federal Government are entitled to deduct in their Federal income tax returns under section 23(q) of the Internal Revenue Code, as amended, the value of the radio broadcast "time" contributed, using as a measure of value the published "card rates" customarily charged advertisers for similar use of the station's facilities.

"Section 23(q) of the Internal Revenue Code, as amended effective for the taxable years beginning after December 31, 1941 by section 125 of the Revenue Act of 1942 approved October 21, 1942, provides for the deduction in the case of corporations of contributions or gifts, payment of which is made within the taxable year to or for the use of:

> "'(1) The United States, any State, Territory, or any political subdivision thereof or the District of Columbia, or any possession of the United States, for exclusively public purposes;
>
> * * * * * * * *
>
> to an amount which does not exceed 5 per centum of the taxpayer's net income as computed without the benefits of this subsection.'

"The records of the Bureau disclose that the question presented in your letter was made the subject of a communication addressed to you by the Bureau on December 9, 1942. I. T. 3593, I. R. B. 1942-51, 3, which was subsequently issued on the subject reads in part as follows:

> "'The business of a radio broadcasting station includes, among other things, the broadcasting of news, advertising of products, and dissemination of other matters of interest to the public. In broadcasting information with respect to the purchase of United States war bonds, radio broadcasting stations are carrying on one of the functions for which they are organized, and the expenses incurred in connection therewith are deductible as ordinary and necessary business expenses under section 23(a)1 of the Internal Revenue Code, as amended.'

"This office is of the opinion that the value of the radio broadcast "time" does not represent a payment made to the United States within the meaning of section 23(q) of the Internal Revenue Code as amended, and no deduction on account thereof is allowable. However, expenses incurred by radio broadcasting stations in connection with broadcasting information regarding the purchase of United States war bonds, recruiting men for the armed forces etc., are deductible as ordinary and necessary business expenses under section 23(a)(1) of the Internal Revenue Code as amended.

Respectfully,

(Sgd.) Guy T. Helvering,
Commissioner.

Engineering

IRE WINTER CONFERENCE

The IRE Winter Conference will be held in the Engineering Societies Building, 33 West 39th Street, New York, on Thursday, January 28 in cooperation with the National Technical Meeting of the AIEE. In other cities, many sections of the IRE will hold local meetings at the same time. During the evening the sectional meetings will be linked by radio with the New York and Washington, D. C., meetings. Through the courtesy of the Columbia Broadcasting System, a nationwide radio network will carry an address by the Honorable James Lawrence Fly from Washington, D. C., Dr. L. P. Wheeler, President of the Institute for 1943, and Mr. A. F. Van Dyck, 1942 Institute President, will speak from the auditorium in New York.

The following technical papers will be presented at the morning session on January 28:

"Radio-Frequency-Operated High-Voltage Supplies for Cathode-Ray Tubes," by O. H. Schade, RCA Manufacturing Company, Radiotron Division, Harrison, N. J.

"Transmission-Line Charts," by R. S. Julian, Bell Telephone Laboratories, Whippany, N. J.

"Polydirectional Microphones," by H. F. Olson, RCA Manufacturing Company, Victor Division, Camden, N. J.

"Phosphorus and the Periodic System of the Elements," by H. W. Leverenz, RCA Communications Laboratories, Princeton, N. J.

The afternoon session starting at 2:30 p. m. will include the following:

Dr. L. P. Wheeler, President of the Institute for 1943, will formally take office and preside at the Annual Meeting.

A. F. Van Dyck, President of 1942, will give an account of his term of office and note the trend of Institute accomplishment.

The Institute's Medal of Honor will be presented to William Wilson.

"Electric Communications—the Past the Present Illuminate the Future: A Suggestive Interpretation," by Lloyd Espenschied, Consultant, Bell Telephone Laboratories, Inc.

"Production of Radio Facilities for the Armed Services," by Rear Admiral Stanford C. Hooper, U. S. Navy; General Consultant for Radio, Radar, and Underwater Sound Equipment.

BATTERY INFO WANTED

Battery sets are in operation in certain sections of the country remote from power lines. We would like to hear from broadcasters in these localities as to dealer and jobber battery inventories. If battery information from the trade is meager, it is suggested you check listeners during a good farm program. Our information on tubes and parts is satisfactory but incomplete on radio batteries. Specify types if there seems to be an impending shortage.

"The Army-Navy Electronics Production Agency," by F. R. Lack, Director, Army-Navy Electronics Production Agency.

"The Function of the War Production Board in Radio," by Ray Ellis, Director, Radio and Radar Division, War Production Board.

"Radio Standards Go to War," by H. P. Westman, War Committee on Radio, American Standards Association.

"The Engineer's Position in the Manpower Program," by Kirk Miles, National Roster of Scientific and Specialized Personnel, War Manpower Commission.

The evening session will be a joint meeting of AIEE and IRE beginning at 8:30. Haraden Pratt, Past President of IRE and Chairman of AIEE's National Committee on Communication, will preside. The speaker of the evening, Dr. George C. Southworth, of Bell Telephone Laboratories, Inc., has chosen as his subject "Beyond the Ultra Shorts."

Doctor Southworth has previously given notable addresses before different audiences of the two engineering societies. It is particularly felicitous that upon the occasion of their meeting together in the wartime equivalent of their national conventions they will share the privilege of hearing him again.

Registration will be in the library of the Engineering Societies Building, 9:15 a. m.-3:30 p. m., for IRE members and guests. No registration for Thursday evening meeting. All IRE Conference and AIEE Technical Meeting sessions open to registrants of both societies. On days other than Thursday, IRE members register as guests of AIEE.

Data Available

The NAB Engineering Department has available a limited quantity of two recent releases of interest to station engineers. Copies of the Engineering Section of the NAB District Meeting Handbook and the description of the Automatic Alarm 1,000 Cycle Receiver will be forwarded upon request.

THE COX RESOLUTION

On Tuesday the resolution (H. Res. 21) introduced in the House by Representative Cox (D-Ga.) calling for an investigation by a select committee of the "organization, personnel, and activities" of the FCC was passed by a nearly unanimous voice vote. The Speaker promptly appointed Mr. Cox as chairman of the investigation committee, and the following members to serve with him: Hart (D-N. J.), Magnuson (D-Wash.), Wigglesworth (R-Mass.), and Miller (R-Mo.).

Addressing the House on his resolution, Mr. Cox is reported in the Congressional Record as saying:

"Mr. Speaker, I am this morning bringing to you a matter in which I have the deepest possible personal interest. If the resolution I am offering is adopted, it will operate as a depressant upon the bureaucrats seeking to swallow up all legislative power which belongs alone to Congress and should be of like concern to you.

"In 1939 the Albany Herald, a newspaper, the editor of which is Mr. Henry T. McIntosh, the model man of my State, its first citizen, brought to my attention that it was interested in the development of a small broadcasting station in Albany, Georgia. Ours is something of a desert land insofar as radio is concerned. In Albany there is a small station, but it did not render entirely satisfactory service to the people within that territory, though it rendered a service that was valuable and appreciated.

"Following this first communication from Mr. McIntosh, the Albany Herald filed its application for leave to establish a station. The Albany Herald is a daily newspaper, the largest newspaper published in the southwest quarter of my State, and is the paper of widest circulation.

"The people who own and operate the Albany Herald are my lifelong friends. They are people with whom I was reared. They are my confidants. They are people whom I love and who love me. In the spring of 1940 permission to build and operate a station was granted by the Federal Communications Commission.

"While the application was pending in the Commission I made many visits to the Commission. I visited with Mr. Fly, with Mr. Ring, its engineer, with Mr. Walker, another member of the Commission, with the counsel of the Commission. I consulted freely and frequently with Mr. Dempsey, its general counsel. After the license had been granted and the station had been built and had been operating for about a year, a new corporation was set up to take over the property and its operation. That new corporation was created because of advice given to me, to the counsel of the Albany Herald and to its manager, by Mr. Dempsey, the general counsel of the Commission, in which Mr. Dempsey said that because of the hostile attitude of the Commission toward newspaper ownership and operation of radio, a new corporation to take over and to operate the station should be created. Tremendous correspondence passed between McIntosh, the Albany Herald, counsel, and others interested in the station and myself. When the new corporation was set up, and without any knowledge on my part, they issued to me, upon the suggestion of Mr. McIntosh, according to the minutes, a check for $2,500 which was in turn endorsed by me and returned as payment for stock in a like amount in the new corporation. Later on the stock was issued for $2,500 in the new corporation. It may be worth $2,500 or it may not be worth a dime. It will not be worth a dime unless the new corporation is permitted to function. Friends in the new corporation insisted they wanted me connected with the station; that they wanted me to serve in an advisory capacity. They had been told that I could not represent them before the Commission or anyone connected with the Commission or any other agency of the Government. They said they did not want this; that they had their regular counsel.

"When the new corporation was set up, an application for transfer of ownership of property and license to operate was made to the Commission. In March, 1942, after the station had been operating for more than a year, and after the Albany Herald had filed its application for leave to transfer, about which I had nothing to do and no information, I introduced a resolution to investigate the Commission.

"Neither the Albany Herald nor McIntosh nor any other person interested in the Albany property had any knowledge, much less anything to do with my introducing the resolution to investigate. The resolution which I offered was the result of representations made to me by the small broadcasters throughout the country, by newspapers having an interest in broadcasting, and by people in the Government—people connected with the Army and with the Navy, and many others, and because of the bad reputation of the Commission ever since it was first created; all these people insisted that Mr. Fly, the Chairman of the Commission, was undertaking to set up a despotic dictatorship over all media of communication. That he has been endeavoring to do that I attest to be a fact. To those of you who doubt the truthfulness of this statement, if you know anybody connected with the Commission in whom you have confidence, and will telephone them now, they will tell you. Or if you still have doubt and you know anybody in the newspaper field who in anywise is interested in broadcasting, ask them and they will tell you so.

"Now, after the resolution was introduced, Mr. Fly sent his agents into my district. He did for me just what he has done for other Members of Congress. He did for me just what he has done for everybody else who has made any criticism of the Commission and of its communistic operations. He set his gestapo like a pack of hungry wolves on my trail, and they have trailed me since the day I offered the first resolution, and they are trailing me now.

"As stated he sent these agents into my district. They went to the office of the broadcasters and they rifled their files. They went to the office of the Albany Herald and they rifled its files. They went to the office of the counsel of the Herald and the broadcasting company and they rifled his files. They came back and brought a bale of material here to Washington over the protest of the people whose property it was. They brought it to Washington and they have it now, and they refused to return it over repeated appeals on the part of the people whose property it is.

"That was not all. They went in the banks of my district in an effort to find something on me; they went to the post offices in my district and made investigation as to registered mail that had been sent to me, and they sought to make an investigation of that. And that is not all. This man Fly, when his agents got back to Washington, went down to the Department of Justice and appealed to the Department to prosecute me or to initiate some sort of investigation. He and his snoopers and spies have in a sense sat upon the steps of the Department of Justice for a year almost making appeal after appeal that the Department initiate an investigation of me. They cited the Herald radio station to show cause as to why the license granted to it should not be revoked and as to why other applications that it had on file should not be denied. Those hearings were continued from time to time for the purpose of giving Fly further opportunity to influence the Department of Justice to investigate me, continued not once, not twice, but more than that; and following every continuance another visit by the Gestapo of this man Fly, who is the worst of a bad lot, was made to the Department of Justice.

"And that is not all, my friends; that is not all. This same Fly—and if I were disposed to go into his record I could bury him with filth—he sent his agents into the Internal Revenue, his Gestapo into the Bureau of Internal Revenue to examine my returns from 1931 up to last year; they made photostatic copies of them. That was not all: They made a like investigation in Internal Revenue of a clerk in my office. Think of it, my friends. A clerk in my office. They went into the Internal Revenue Department in my State and made a similar investigation there.

"As to the stock that was issued to me, that was in the new corporation; it was issued on the basis of an opinion, furnished by their attorney, that it was perfectly ethical and legitimate for a Member of Congress to represent anybody insofar as he did not appear before any agency or agent of the Government in their behalf. From the time that stock was issued I have never communicated directly or indirectly with the Commission with reference to any interest of the broadcasting company or of anybody else; there was no irregularity in the transaction, no effort to cover up at all; and I might say to you as to what disposition was made of the stock, not made in the endeavor to cover up anything, it was transferred to a little private charity.

"This resolution that is pending here now is a reintroduction of the first resolution. I am endeavoring to have a special committee set up to investigate the Commission and its operations and I say to you that of all the bureaucrats who have sought to smear Congress this man Fly is the worst. His pursuit of me has been nothing but blackmail. When he was down here in the Tennessee Valley Authority a cell of the Communist Party which was referred to as the best unit of the entire organization was set up in the Authority; and there are other things I might tell you. His whole outfit now is a nest of Reds. This man Dodd, who opposed HOWARD SMITH 4 years ago, is there; so is the man who wrote the statement that Congress was the joke of the century; he is still there, this man Dodd who said to his draft board over in Virginia about 5 weeks ago that he was going to South Africa, but applied to the State Department for a passport to England was denied a passport because of his communistic affiliations, he is down there now. This Commission as run by Fly is the nastiest nest of rats to be found in this entire country."

We print below the resolution:

"*Resolved*, That there is hereby created a select committee to be composed of five Members of the House to be appointed by the Speaker, one of whom he shall designate as chairman. Any vacancy occurring in the membership of the committee shall be filled in the same manner in which the original appointment was made.

"The committee is authorized and directed to conduct a study and investigation of the organization, personnel, and activities of the Federal Communications Commission with a view to determining whether or not such Commission in its organization, in the selection of personnel, and in the conduct of its activities, has been, and is, acting in accordance with law and the public interest.

"The committee shall report to the House (or to the Clerk of the House if the House is not in session) at the earliest practicable date during the present Congress the results of its investigation, together with such recommendations as it deems desirable.

"For the purposes of this resolution the committee is authorized to sit and act during the present Congress at such times and places within the United States, whether or not the House is sitting, has recessed, or has adjourned, to hold such hearings, to require the attendance of such witnesses and the production of such books, papers, and documents, and to take such testimony, as it deems necessary. Subpenas may be issued under the signature of the chairman of the committee or any member designated by him, and may be served by any person designated by such chairman or member."

SPARKMAN'S RESOLUTION

Monday Representative Sparkman (D-Ala.) introduced a resolution (H. Res. 55) calling for an investigation of "the Federal Communications Commission, the broadcasting industry and of any business related thereto or connected therewith," which was referred to the Committee on Rules. Mr. Sparkman addressed the House, according to the Congressional Record, as follows:

"Radio broadcasting vitally affects the public. If there is to be an investigation, we want one which will get into the basic issues in this most important field. I have no objection to the Cox resolution except that it is too limited. We want to know what the commission is doing. But more important even than that we want to know about the industry, an industry in which a few networks dominating the field make inordinate profits and in which the small independent stations in our rural sections are being forced to the wall. In 1941, for example, the return on net investment, after taxes, was about 60 percent for the National Broadcasting Co. and for the Columbia Broadcasting System. While this was going on, two or three hundred of our smaller stations lost money; and they are still losing money. During this year, the small radio station, along with other small businesses, is threatened with extinction. We cannot afford to let that happen. With gasoline rationing, they are more important than ever. They are the back-bone of independent broadcasting service in the interest of our own local communities, and in the interest of the Nation at war. We must not have the building up of monopoly, control, and inordinate profits at one end of the line and economic disaster at the other end.

"We want to know the extent of the monopoly and control exercised by a very few of our 130,000,000 people over this, the world's most effective medium for molding public opinion. We want to know how that control is tied up with control over the sources of program material—over records and transcriptions, for example. Can small record and transcription companies survive? Our small independent stations cannot get network service. Those on the networks get little or nothing from it. Stations, especially the independent ones, rely to a great extent upon transcriptions. We want to know whether there is any undue concentration of control here and whether it is being exercised to the detriment of the independent stations.

"We also want to know how the control of radio broadcasting is being exercised in terms of what the public is permitted to hear. We want to know how it is that organizations like the Cooperative League are denied time to use the frequencies which belong to the public. Regardless of our own views regarding the merits or demerits of this movement, we should know how it is that a movement of such public significance is denied time on the ground that its program concerned a controversial matter or that it may be disturbing to present vested interests. We want to know the answer to that. We must know how much discrimination there is by radio stations in selling the use of their facilities, who the favored persons or groups are and the reason for their advantage.

"And the use of radio in political campaigns is another matter we have reason to be concerned with. Some Congressmen who remained in Washington during the recent campaign have particular reason to be concerned over the action of radio stations in denying time to their supporters back home.

"There are other matters any investigation should include. All of us no doubt have received complaints in recent weeks about the great wave of vulgarity, obscenity, and suggestiveness that has been coming in over various radio programs. We know that the average station is powerless to control this flood of vulgarity because it has no control over the program and no advance notice as to what may be in it. We cannot afford to let programs which come into our homes and which cannot well be kept from the ears of our children replace the Police Gazette.

"Commentators, too, merit our attention. Whose interests are they serving? The recent attacks upon this body over the radio are serious business. We want to know what is back of all this. We want to know what efforts have been made to present the other side, and if none have been, why not.

"We have only one agency, the Federal Communications Commission, which is entrusted with authority to do something about these vital subjects unless we can dispose of some of them by definitive legislation. It may well be that the Commission can be expected to do a better job in protecting the public interest if more explicit duties are placed upon it. At any rate here is a grave problem and I submit we cannot continue to overlook it."

A. F. OF M. ANTI-TRUST CASE

On Monday Judge John P. Barnes in the Federal District Court in Chicago set January 25 for hearing of the A. F. of M.'s motion to dismiss the Government's amended complaint against the union under the anti-trust laws.

KOA TO SUPREME COURT

The Supreme Court on Monday granted review of the KOA case upon petition of the FCC. The Commission is seeking reversal of the decision of the U. S. Court of Appeals for the District of Columbia. It was there held that the Denver station is entitled, under Section 303(f) of the Communications Act of 1934, to intervene in the proceedings before the Commission involving the modification of the license of WHDH, Boston, to permit night operation. Both stations are on the same frequency.

TECHNIQUE COUNTS

The Saturday Evening Post, January 16, 1943, on page 46 prints a "Letter of the Week" written by Louis Ruthenburg, president of Servel, Inc., Evansville, Ind.

Its reading is suggested because it outlines as a policy the practice for dealing with WPB which NAB has consistently followed from the beginning.

Mr. Ruthenburg wrote in part:

"We need to quit bellyaching. We need only look at the production record for inspiration and confidence. We need to give these production heroes a pat on the back instead of a kick in the pants. *They need our help. We certainly need theirs.*

"There is another thing we can do. If we have constructive suggestions—and there should be plenty—send them to those officials of the War Production Board with whom you have a personal or business acquaintance. Point out that 'here is a tip to eliminate some friction and speed up the job; take it for what it is worth.' "

Keeping industry operating during the war is a problem and keeping broadcasting functioning is going to keep all of us on our toes.

While a proposition is being negotiated is no time for publicity. That is why we believe it politic to report end results.

TODAY'S NEWS

Today's news affecting broadcasting is that WPB, on January 15, approved a list of components needed to maintain the nation's home radios.

The order for components and tubes for home radios is in process of execution with issuance expected early in February.

BANK REVIEWS INDUSTRY

The winter issue of "The Index," published quarterly by The New York Trust Company, carries a splendid eight page article on, "RADIO BROADCASTING. A New Industry Plays Vital War Role." The article was called to our attention by Major Edney Ridge, managing director, WBIG, Greensboro, N. C.

WPTF IN NEW STUDIOS

WPTF, Raleigh, N. C., has officially opened brand new offices and studios in the just-completed Durham Life Building.

Richard H. Mason, station manager, announced the event in a two-page photographically illustrated letter. Seven pasted in glossies pictured highlights of the layout.

WPTF quarters occupy a large part of the mezzanine and second floor of the super-modern, sixteen story office building. The entire building is air conditioned.

Last year WPTF went on the air with a 50,000 watt, air cooled Westinghouse transmitter.

FAY (WHAM) ADVANCES

On January 12, 1943, at the award of the Army-Navy "E" to the Stromberg-Carlson Telephone Manufacturing Company, an announcement was made of the appointment of William A. Fay, manager of WHAM, as a director of the company. Last October, Bill was elected Vice President in charge of broadcasting. Both honors are deserved recognition of the achievements and service of WHAM during the more than 15 years that Bill has served as chief executive.

NAB LISTENS

Lewis H. Avery, Director of the NAB Department of Broadcast Advertising, and Joseph L. Miller, NAB Labor Relations Director, attended the sessions of the 248th meeting of the National Industrial Conference Board in New York. Miller will attend the employer-employee relationships discussions, while Avery will sit in on the panel which is to discuss post war advertising problems. In so far as the subjects developed at the conference are open to publicity, a report will be made in a future issue of the REPORTS.

Listener Activities

MINNESOTA COUNCIL MEETS

The Minnesota Radio Council at its meeting being held today (January 22) is considering three important phases of radio: "Something New In Broadcasting," "Audience Appreciation" and "Audience Participation."

Hayle Cavanor, Regional Director of Radio for the Office of War Information, is scheduled to give a brief talk on the Overseas Radio Division. Max Karl, Educational Director of WCCO, is to analyze the returns in the recent survey of day-time listening, conducted under the sponsorship of the Council. His analysis of these returns will give new and startling information on the appreciations and limitations of the average radio listener.

The subject of what the radio audience wants will be covered by Edmund E. Sylvestre, president, and Elizabeth Reeves, vice president and script editor of the Knox-Reeves Advertising Agency.

The "Write-A-Fighter Corps," which now has more than a million members, will be the topic of discussion by Arthur H. Lund who directs the membership campaign for this Corps. He will explain how the program functions to aid the listening audience to perform a war service. Mrs. George B. Palmer, President of the Radio Council, is presiding.

COUNCIL AIDS AWARDS

The Minneapolis Radio Council, cooperating with the Minnesota Radio Council, is carrying on a very unique project. A Listening Post has been established under the auspices of both the local and the state Council. The primary objective at this time is to aid in selecting an entry for the George Foster Peabody Award for outstanding public service. In a broadcast to the members of the Council, they are urged to listen, given instructions as to how to listen, and to then express their own personal judgment on certain programs which they believe are deserving of consideration at the hand of the awards committee. Members are requested to listen a minimum of three times during the week.

This project has been in progress since November and undoubtedly many valuable suggestions will be submitted to the committee. This represents a splendid method by which listeners may participate in an effort to reward meritorious public service programs.

TENNESSEE COUNCIL ACTIVITY

The Education Committee of the Radio Council of Middle Tennessee has been divided into two groups. One will make a study of newscasts for children under the chairmanship of Mr. R. L. Thomas, Elementary Supervisor, State Department of Education. The second group will explore the Children's Book Reviews on the air, with Miss Martha Parks, State Department of Libraries, Nashville, Tennessee.

Women Directors

MISS CHILTON, MISS GOUDY FETED

Dorothy Lewis, NAB Coordinator of Listener Activity, tendered a tea at her home in New York, honoring Miss Ruth Chilton (WSYR), President of the Association of Women Directors of NAB, and Miss Elizabeth Goudy, Radio Director of the Los Angeles County Schools and noted authority on radio education.

The following were guests: Miss Kathryn Cravens, WNEW; Miss Margaret Cuthbert, NBC; Miss Henrietta Harrison, Radio Director, YMCA; Mrs. Harold V. Milligan, President, National Council of Women; Miss Grace Johnson, Blue Network; Miss Lucille Clark, Radio Director, Girl Scouts; Mrs. Joseph E. Goodbar, Radio Chairman, National Federation of Press Women; Mrs. Georgiana Brown Harbeson, President, Society of American Painters; Miss Luella Hoskins, Radio Workshop, New York University; Miss Dorothy Gordon, radio artist; Miss Luella Laudin, Radio Chairman, National Council of Women; and Miss Esther Hilton, Director, Federation of Protestant Social Agencies.

DISTRICT 3 ACTIVITIES

Miss Victoria Corey (KDKA) Chairman, Association of Women Directors of the National Association of Broadcasters for District 3, held a luncheon on January 16 in Pittsburgh. Eighteen members, several from out of town, attended. Guest speakers addressed the meeting and a round table discussion followed on topics having to do with better ways of public service by women directors. Messages of greeting were sent by Ruth Chilton, WSYR, President of the Association, and Dorothy Lewis, NAB Coordinator of Listener Activities. It was voted to hold regular meetings in the future.

FEDERAL LEGISLATION

HOUSE RESOLUTION

H. Res. 55 (Sparkman, D-Alabama) INVESTIGATION OF FCC—Authorizing an investigation of the organization, personnel, and activities of the Federal Communications Commission, and of the radio-broadcasting industry. Referred to the Committee on Rules.

STATE LEGISLATION

CALIFORNIA:

A. 388 (Rosenthal) LIBEL—Providing a penalty for writing and circulating publications intended to injure a candidate. Referred to Committee on Elections 1/15/43.

MASSACHUSETTS:

S. 148 (Grant) BROADCASTING—Requiring that the names of persons broadcasting political speeches, either orally or by means of a record, shall be announced at the beginning of the broadcast. Referred to Committee on Constitutional Law 1/18/43.

FEDERAL COMMUNICATIONS COMMISSION

FLY PRESS CONFERENCE

Work of preparing the new list of essential occupations in the broadcast industry dealing with the manpower situation is about completed and is now "in very fine shape", James Lawrence Fly of the FCC said at a press conference early this week.

Mr. Fly told the newsmen that in his opinion all concerned in that matter have worked very hard on it and turned out a splendid job.

Mr. Fly announced also that the equipment survey which the Commission has been making as a result of a questionnaire sent out is about ready for distribution.

As is well-known this is not a pooling plan, but basically an informational set-up where everybody sets forth with some accurate description just what he has "which is available and then we give that information to everyone else and he in turn gets the information regarding equipment that all the other people have."

DRAFT DEFERMENT EXTOLLED

Men who are occupationally deferred can and should take a justifiable pride in their deferment, Chairman Paul V. McNutt of the War Manpower Commission said today.

"Although a great deal of emphasis has been laid on the fact that essential workers are vital to war production, there is still much work ahead in registering this fact with the public, and with the workers themselves," Mr. McNutt said.

"Occupational deferment usually indicates that a man is making a more valuable contribution to the war, right now, than if he were in uniform," Mr. McNutt said. "Such men should remember that our fighting men need materials and supplies to carry on their fight, plenty of them.

"It is the War Manpower Commission's job to see that the nation's manpower is properly allocated—to supply the men for our fighting forces through Selective Service, and at the same time to supply the workers for producing the goods those fighting men need. We are in the position to see the overall picture—the overall need—which the individual worker cannot see.

"We realize how difficult it is for workers in civilian clothes to explain to their friends and neighbors why they are not in the armed forces. The public should realize that the young, able-bodied man in civilian clothes may be anxious to join the armed forces. It simply happens that his work is too important to induct him at this time, or, perhaps, he may have already been considered and did not measure up to the physical standards of the armed forces, even though he has a healthy outward appearance.

"There are some 3,000 occupations which have been designated as essential occupations. Men in these occupations will be kept in those jobs until changing circumstances, such as the training of suitable replacements, make it advisable to induct them into the armed forces."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, January 25. They are subject to change.

Tuesday, January 26

Further Hearing

NEW—Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—C. P., **1240 kc.,** 250 watts, unlimited, request facilities of WBAX.

NEW—Central Broadcasting Co., Wilkes-Barre, Pa.—C. P., **1240 kc.,** 250 watts, unlimited, request facilities of WBAX.

NEW—Northeastern Pennsylvania Broadcasters, Inc., Wilkes-Barre, Pa.—C. P., **1240 kc.,** 250 watts, unlimited, request facilities of WBAX.

NEW—Key Broadcasters, Inc., Wilkes-Barre, Pa.—C. P., **1240 kc.,** 250 watts, unlimited, request facilities of WBAX.

Thursday, January 28

W55NY—William G. H. Finch, New York, N. Y.—Modification of C. P., **45500 kc.,** 8,500 square miles, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

The Crosley Corp., Cincinnati, Ohio.—Granted construction permit (B2-PST-13) for new ST broadcast station to be used in connection with International Broadcast station WLWO at Cincinnati, to operate on **341800 kc.,** main transmitter 5 watts, booster amplifier 20 watts, special emission for frequency modulation.

WDEL—WDEL, Inc., Wilmington, Dela.—Granted modification of construction permit to change directional antenna for daytime operation only and extension of commencement and completion dates. This application was granted providing the station assumes full responsibility for interference due to blanketing (B1-MP-1677).

KWTO—Ozarks Broadcasting Co., Springfield, Mo.; KGBX, Springfield Broadcasting Co., Springfield, Mo.—Granted additional time within which licensees may effect a plan to separate the common ownership of the stations, such time not to extend beyond May 18, 1943, the completion date of KWTO's outstanding construction permit. Also granted KWTO's request to operate for 30 days as present licensed with 5 KW at the new site specified in its outstanding construction permit, using a single tower and indirect power measurement.

W3XAD—RCA Manufacturing Co., Inc., Camden, N. J.—Granted authority to cancel construction permit (B1-PVB-92) and close the records of the Commission with respect to this station, and cancel license and delete call signal.

W3XEP—RCA Manufacturing Co., Inc., Camden, N. J.—Granted authority to cancel construction permit (B1-PVB-93) and close the records of the Commission with respect to this station, and cancel license and delete call signal.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending February 1, 1945:

KADA, Ada, Okla.; KELO, Sioux Falls, S. Dak.; KFXD, Nampa, Idaho; KGDE, Fergus Falls, Minn.; KGHI, Little Rock, Ark.; KMLB, Monroe, La.; KODL, The Dalles, Ore.; KPHO, Phoenix; KPOW, Powell, Wyo.; KVCV, Redding, Calif.; KVEC, San Luis Obispo, Calif.; KWNO, Winona, Minn.; KYSM, Mankato, Minn.; WAJR, Morgantown, W. Va.; WBLJ, Dalton, Ga.; WCED, DuBois, Pa.; WCLO, Janesville, Wis.; WCOL, Columbus, Ohio; WCPO, Cincinnati, Ohio; WDSM, Superior, Wis.; WENY, Elmira, N. Y.; WESX, Marblehead, Mass.; WHOP, Hopkinsville, Ky.; WIBX, Utica, N. Y.; WIL, St. Louis, Mo.; WISE, Asheville, N. C.; WJBC, Bloomington, Ill.; WJOB, Hammond, Ind.; WKBO, Harrisburg, Pa.; WMFR, High Point, N. C.; WMPC, Lapeer, Mich.; WRBL, Columbus, Ga.; WSKB, McComb, Miss.

The following stations were granted renewals for the period ending February 1, 1945:

KGEK, Sterling, Colo.; WBOW, Terre Haute, Ind.; WHBY, Appleton, Wis.; WJRD, Tuscaloosa, Ala.; WLVA, Lynchburg, Va.; WMOB, Mobile, Ala.

Licenses for the following stations were extended upon a temporary basis only, for the period ending March 1, 1943, pending determination upon applications for renewals:

KFUN, Las Vegas, New Mex.; KHAS, Hastings, Neb.; KOOS, Marshfield, Ore.; KVNU, Logan, Utah; KVOS, Bellingham, Wash.; WAIM, Anderson, S. C.; WBHP, Huntsville, Ala.; WCAT, Rapid City, S. Dak.; WITH, Baltimore, Md.; WJNO, West Palm Beach, Fla.; WLOG, Logan, W. Va.; WTHT, Hartford, Conn.; WTOL, Toledo, Ohio.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon applications for renewal, for the period ending April 1, 1943:

KWG, Stockton, Calif.; WABI, Bangor, Me.; WAYX, Waycross, Ga.; WBOC, Salisbury, Md.; WOLS, Florence, S. C.

KWFC—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—Granted renewal of license for the period ending June 1, 1943.

WLBJ—The Bowling Green Broadcasting Co., near Bowling Green, Ky.—Granted renewal of license for the period ending June 1, 1943.

WCRS—Grenco, Inc., Greenwood, So. Car.—Granted renewal of license for the period ending October 1, 1943.

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Granted renewal of license for the period ending October 1, 1943.

KID—KID Broadcasting Co., Idaho Falls, Idaho.—Granted renewal of license for the period ending October 1, 1944.

KBUR—Burlington Broadcasting Co., Burlington, Ia.—Granted renewal of license for the period ending December 1, 1943.

WAAB—The Yankee Network, Inc., Worcester, Mass.—Granted renewal of license for the period ending December 1, 1944.

MISCELLANEOUS

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted license to cover construction permit as modified, for increase in power, change hours of operation, install new transmitter and directional antenna for night use, and move transmitter (B5-L-1731). Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1473).

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Granted license to cover construction permit as modified, for change of frequency, increase power, move transmitter, install new transmitter and directional antenna for day and night use (B4-L-1735); granted authority to determine operating power by direct measurement of antenna power (B4-Z-1477).

WDZ Broadcasting Co.—Cancelled relay station license authorizations for WAAC, WAAE, WELU, area of Tuscola, Ill., in accordance with request.

Columbia Broadcasting System, Inc., area New York City.—Granted modification of construction permit to extend completion date to July 7, 1943, for television relay station.

APPLICATIONS FILED AT FCC

1230 Kilocycles

KGHI—Arkansas Broadcasting Co., Little Rock, Ark.—License to cover construction permit (B3-P-3495) which authorized new transmitter.

KGHI—Arkansas Broadcasting Co., Little Rock, Ark.—Authority to determine operating power by direct measurement of antenna power.

WRBL—The Columbus Broadcasting Co., Inc., Columbus, Ga.—Authority to determine operating power by direct measurement of antenna power.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Construction permit to install a new transmitter.

1320 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Texas.—License to use formerly licensed main transmitter as auxiliary transmitter with power of 1 KW.

1400 Kilocycles

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Authority to determine operating power by direct measurement of antenna power.

1560 Kilocycles

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-MP-1086 as modified for change in equipment, increase power and installation of directional antenna for day and night use) for extension of completion date from 3-1-43 to 4-1-44.

MISCELLANEOUS APPLICATIONS

W3XE—Philco Radio & Television Corp., Philadelphia, Pa.—Construction permit for move of transmitter from Tioga and C Sts., Philadelphia, Pa., to Mermaid Ave. west of Cheltenham Ave., Springfield Twp., Montgomery County, Pa., and make changes in transmitter, emission and antenna system.

W3XE—Philco Radio & Television Corp., Philadelphia, Pa.—License to cover above construction permit.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

Colran Institute, 3809 Main St., Houston, Tex., and Mervyon E. Randall, actively engaged in the operation of the business and in the dissemination of its advertising, are charged in a complaint. with misrepresentation. (4886)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

George & Thomas Cone Co., Sharon, Pa., manufacturer of ice cream cones, has been ordered to cease and desist from the use of lottery methods in the sale of his products. (4837)

Parker-McCrory Manufacturing Co., 2609 Walnut St., Kansas City, Mo., manufacturing and selling electric fence controllers designated "Parmak Electric Fencers," has been ordered to cease and desist from certain representations in the sale of its product.

The Commission finds that in advertisements in newspapers, trade journals and other media the respondent represented among other things concerning its product that: "A single wire on light stakes three rods apart holds the stock * * * cuts fencing costs to less than $10.00 per mile * * * save up to 90% of fencing * * * one wire on light stakes holds stock like steel and concrete * * * gives a sting that holds the stock just as surely as any fence you ever built", and "The dry weather intensifier has increased voltage and affords positive stopping power under all weather conditions." These representations are found by the Commission to have been false and misleading. (4707)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 5, January 29, 1943

NEW CRITICAL OCCUPATIONS

On January 23, the Director of Selective Service issued "Occupational Bulletin No. 27 (as amended January 23, 1943)." This revises the list of critical occupations in the communications industry, breaking them down into seven communications services activities. Number 4 is "Radio Broadcasting; Radio Communications; and Television Services." (The text of the bulletin is printed in Supplement No. 4 to the NAB Selective Service Handbook dated January 29, 1943.) Ten new critical occupations in domestic and international broadcasting and television are added to the list appended to the original Occupational Bulletin No. 27. Those of most general interest are: Station Manager; Program Director; News Editor; Managing Editor, News, Special Events or Public Affairs; Traffic Manager; Radio Broadcast Technician (All Around); and Maintenance Mechanic.

The amendment is the culmination of efforts begun, immediately after the original bulletin was issued, by the Domestic Broadcasting Committee of BWC. Conferences with officials of the War Manpower Commission have ironed out any differences, and NAB feels that the essential needs of the industry are now well cared for.

WPB APPROVES TUBE LIST FOR HOME SETS

The list of tubes for home radio sets which will be manufactured during 1943 under the augmented program has been approved by WPB. Tubes for battery operated farm sets are included according to Frank McIntosh, chief, Domestic & Foreign Radio Section, Radio and Radar Division.

Last week's NAB REPORTS announced the approval of the list of component parts also required for the maintenance of home radios during wartime. Actual production of both parts and tubes will be authorized as soon as the "paper" work involved is completed.

Stations are urged to circulate this constructive news throughout their local radio trade.

"SANDERS BILL" REINTRODUCED

On Monday Representative Holmes (R-Mass.) introduced a bill (H. R. 1490) to amend the Communications Act. Referred to the Committee on Interstate and Foreign Commerce of the House, the bill is identical with the Sanders Bill by Representative Sanders (D-La.), who failed of election to this Congress, and on which hearings were held from April to June of last year except for unimportant changes in the amending clauses and the renumbering of sections 7 through 10. Section 7 of the Sanders Bill appears as Section 10 of the Holmes Bill, while Sections 8, 9 and 10 of the Sanders Bill appear as Sections 7, 8 and 9, respectively, of the new bill.

The Sanders Bill, sponsored by Rep. Sanders (D-La.) who failed of re-election was the subject of extensive hearings last spring.

The Holmes Bill is printed in full below:

A BILL

To amend the Communications Act of 1934, as amended, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Communications Act of 1934, as amended, is amended by adding after paragraph (aa) the following new paragraphs:

"(bb) The term 'construction permit' or 'permit for construction' means that instrument of authorization required by this Act for the construction of apparatus for the transmission of energy, or communications, or signals by radio, by whatever name designated by the Commission.

"(cc) The term 'license', 'station license', or 'radio-station license' means that instrument of authorization required by this Act, or the rules and regulations of the Commission enacted pursuant to this Act, for the use or operation of apparatus for the transmission of energy, or communications, or signals by radio, by whatever name designated by the Commission."

SEC. 2. Subsection (b) of section 4 of such Act, as amended, is amended by striking out the last sentence thereof and by inserting in lieu thereof the following: "Not more than four members of the Commission and not more than two members of either Division thereof shall be members of the same political party."

SEC. 3. Section 5 of such Act, as amended, is amended to read as follows:

"DIVISIONS OF THE COMMISSION

"SEC. 5. (a) The members of the Commission other than the Chairman shall be organized into two divisions of three members each, said divisions to be known and designated as the Division of Public Communications and the Division of Private Communications and no member designated or appointed to serve on one Division shall have or exercise any duty or authority with respect to the work or functions of the other Division, except as hereinafter provided. The President shall designate the Commissioners now in office who shall serve upon a particular Division, but all Commissioners other than the Chairman subsequently appointed shall be appointed to serve upon a particular Division and the Chairman subsequently appointed shall be appointed to serve in that capacity.

"(b) The Division of Public Communications shall have jurisdiction over all cases and controversies arising under the provisions of this Act and the rules and regulations of the Commission enacted pursuant to this Act relating to wire and radio communications intended to be received by the public directly, and shall make all adjudications in-

"SANDERS BILL" REINTRODUCED

(Continued from page 35)

volving the interpretation and application of those provisions of the Act and of the Commission's regulations.

"(c) The Division of Private Communications shall have jurisdiction over all cases and controversies arising under the provisions of this Act and the rules and regulations of the Commission enacted pursuant to this Act relating to wire and radio communications by a common carrier or carriers, or which are intended to be received by a designated addressee or addressees, and shall make all adjudications involving the interpretation and application of those provisions of the Act and of the Commission's regulations.

"(d) The whole Commission shall have and exercise jurisdiction over the adoption and promulgation of all rules and regulations of general application authorized by this Act, including procedural rules and regulations for the Commission and the Divisions thereof; over the assignment of bands of frequencies to the various radio services; over the qualification and licensing of all radio operators; over the selection and appointment of all officers and other employees of the Commission and the Divisions thereof; and generally over all other matters with respect to which authority is not otherwise conferred by the other provisions of this Act. In any case where a conflict arises as to the jurisdiction of the Commission or any Division thereof, such question of jurisdiction shall be determined by the whole Commission.

"(e) The Chairman of the Commission shall be the chief executive officer of the Commission. It shall be his duty to preside at all meetings and sessions of the whole Commission, to represent the Commission in all matters relating to legislation and legislative reports, to represent the Commission or any Division thereof in all matters requiring conferences or communications with representatives of the public or other governmental officers, departments, or agencies, and generally to coordinate, and organize the work of the Commission and each Division thereof in such manner as to promote prompt and efficient handling of all matters within the jurisdiction of the Commission. The Chairman of the Commission shall not be a member of or serve upon either of said Divisions, except that in the case of a vacancy or the absence or inability of any Commissioner appointed to serve thereon, the Chairman may temporarily serve on either of said Divisions with full power as a member thereof until the cause or circumstance requiring said service shall have been eliminated or corrected.

"(f) Each Division of the Commission shall choose its own chairman, and, in conformity with and subject to the foregoing provisions of this section, shall organize its membership and the personnel assigned to it in such manner as will best serve the prompt and orderly conduct of its business. Each Division shall have power and authority by a majority thereof to hear and determine, order, certify, report, or otherwise act as to any of said work, business, or functions over which it has jurisdiction. Any order, decision, report made, or other action taken by either of said Divisions with respect to any matter within its jurisdiction, shall be final and conclusive, except as otherwise provided by said Communications Act of 1934 as hereby amended. The secretary and seal of the Commission shall be the secretary and seal of each Division thereof.

"(g) In the case of a vacancy in the office of the Chairman of the Commission or the absence or inability of the Chairman to serve, the Commission may temporarily designate and appoint one of its members to act as Chairman of the Commission until the cause or circumstance requiring said service shall have been eliminated or corrected. During the temporary service of any such commissioner as Chairman of the Commission, he shall continue to exercise the other duties and responsibilities which are conferred upon him by this Act.

"(h) The term 'Commission' as used in this Act shall be taken to mean the whole Commission or a Division thereof as required by the context and the subject matter dealt with. The term 'cases and controversies', as used herein, shall be taken to include all adversary proceedings whether judicial or quasi-judicial in nature, and whether instituted by the Commission on its own motion or otherwise, and the term 'adjudications' means the final disposition of particular cases, controversies, applications, complaints, or proceedings involving named persons a named res."

SEC. 4. So much of subsection (a) of section 308 of such Act, as amended, as precedes the first proviso is amended to read as follows: "The Commission may grant instruments of authorization entitling the holders thereof to construct or operate apparatus for the transmission of energy, or communications, or signals by radio only upon written application therefor received by it:".

SEC. 5. Section 309 of such Act, as amended, is amended to read as follows:

"HEARINGS ON APPLICATIONS FOR LICENSES; FORM OF LICENSES; CONDITIONS ATTACHED TO LICENSES

"SEC. 309. (a) If upon examination of any application provided for in section 308 the Commission shall determine (1) that public interest, convenience, or necessity would be served by the granting thereof, and (2) that such action would not aggrieve or adversely affect the interest of any licensee, applicant, or other person, it shall authorize the issuance of the instrument of authorization for which application is made in accordance with said findings.

"(b) If upon examination of any such application the Commission is unable to make either or both of the findings specified in subsection (a), it shall designate the application for hearing and forthwith notify the applicant and other parties in interest of such action and the grounds or reasons therefor. Any hearing subsequently held upon such application shall be a full hearing in which the applicant and all other parties in interest, whether originally notified by the Commission or subsequently admitted as interveners, shall be permitted to participate. Such hearing shall be preceded by a notice to all such parties in interest specifying with particularity the matters and things in issue and not including issues or requirements phrased generally or in the words of the statute.

"(c) When any instrument of authorization is granted by the Commission without a hearing, as provided in subsection (a), such grant shall remain subject to protest as hereinafter provided for a period of thirty days. During such thirty-day period, any person who would be entitled to challenge the legality or propriety of such grant under the provisions of section 402 may file a protest directed to such grant, and request a hearing on said application so granted. Any protest so filed shall contain such allegations of fact as will show the protestant to be a proper party in interest and shall specify with particularity the matters and things in issue but shall not include issues or allegations phrased generally or in the words of the statute. Upon the filing of such protest, the application involved shall be set for hearing upon the issues set forth in said protest and heard in the same manner in which applications are heard under subsection (b). Pending hearing and decision upon said protest, the effective date of the Commission's action to which said protest is directed shall be postponed to the date of the Commission's decision after hearing unless the authorization involved in such grant is necessary to the maintenance or conduct of an existing service, in which event the Commission shall authorize the applicant to utilize the facilities or authorization in question pending the Commission's decision after hearing on said protest.

"(d) Such station licenses as the Commission may grant shall be in such general form as it may prescribe, but each license shall contain, in addition to other provisions, a statement of the following conditions to which such license shall be subject: (1) The station license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term thereof nor in any other manner than authorized therein; (2) neither the license nor the right granted thereunder shall be assigned or otherwise transferred in violation of this Act; (3) every license issued under this Act shall be subject in terms to the right or use or control conferred by section 606."

SEC. 6. Subsection (b) of section 310 of such Act, as amended, is amended to read as follows:

"(b) No instrument of authorization granted by the Commission entitling the holder thereof to construct or operate radio apparatus shall be transferred, assigned, or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation holding such instrument of authorization, to any person except upon application to the Commission and upon a finding by the Commission that the proposed transferee or assignee is capable of constructing or operating under such instrument of authorization in the public interest, convenience, and necessity. The procedure to be employed in the handling of such applications shall be that provided in section 309, as amended."

SEC. 7. Section 402 of such Act, as amended, is amended to read as follows:

"PROCEEDINGS TO ENFORCE OR SET ASIDE THE COMMISSION'S ORDERS—APPEAL IN CERTAIN CASES

"SEC. 402. (a) The provisions of the Act of October 22, 1913 (38 Stat. 219), as amended, relating to the enforcing or setting aside of orders of the Interstate Commerce Commission are hereby made applicable to suits to enforce, enjoin, set aside, annul, or suspend any order of the Commission under this Act (except those appealable under the provisions of subsection (b) of this section), and such suits are hereby authorized to be brought as provided in that Act. In addition to the venues specified in that Act, suits to enjoin, set aside, annul, or suspend, but not to enforce, any such order of the Commission may also be brought in the District Court for the District of Columbia.

"(b) Appeals may be taken from decisions and orders of the Commission to the circuit court of appeals of the United States within any circuit wherein the appellant resides or has his principal place of business, or to the United States Court of Appeals for the District of Columbia in any of the following cases:

"(1) By an applicant for any instrument of authorization required by this Act, or the regulations of the Commission enacted pursuant to this Act, for the construction or operation of apparatus for the transmission of energy, or communications, or signals by radio whose application is denied by the Commission.

"(2) By any party to an application for authority to assign any such instrument of authorization or to transfer control of any corporation holding such instrument of authorization whose application is denied by the Commission.

"(3) By any applicant for the permit required by section 325 or any permittee under said section whose permit has been modified, revoked or suspended by the Commission.

"(4) By any other person who is aggrieved or whose interests are adversely affected by any order of the Commission granting or denying any application described in paragraphs (1), (2), and (3) of this subsection.

"(5) By the holder of any instrument of authorization required by this Act, or the regulations of the Commission enacted pursuant to this Act, for the construction or operation of apparatus for the transmisison of energy, or communications, or signals by radio, which instrument has been modified, revoked, or suspended by the Commission.

"(6) By any radio operator whose license has been revoked or suspended by the Commission.

"(c) Such an appeal shall be taken by filing a notice of appeal with the appropriate court within thirty days after the entry of the order complained of. Such notice of appeal shall contain a concise statement of the nature of the proceedings as to which appeal is taken; a concise statement of the reasons on which the appellant intends to rely, separately stated and numbered; and proof of service of a true copy of said notice and statement upon the Commission. Upon the filing of such notice, the court shall have exclusive jurisdiction of the proceeding and of the questions determined therein and shall have power, by order directed to the Commission or any other party to the appeal, to grant such temporary relief as it may deem just and proper. Orders granting temporary relief may be either affirmative or negative in their scope and application and may be such as to permit either the maintenance of the status quo in the matter in which the appeal is taken or the restitution of a position or status terminated or adversely affected by the order appealed from and shall, unless otherwise ordered by the court, be effective pending hearing and determination of said appeal and compliance by the Commission with the final judgment of the court rendered in said appeal.

"(d) Upon the filing of any such notice of appeal, the Commission shall, not later than five days after date of serivce upon it, notify each person shown by the records of the Commission to be interested in said appeal of the filing and pendency of the same and shall thereafter permit any such person to inspect and make copies of said notice and statement of reasons therefor at the office of the Commission in the city of Washington. Within thirty days after the filing of an appeal, the Commission shall file with the court a copy of the order complained of, a full statement in writing of the facts and grounds relied upon by it in support of the order involved upon said appeal, and the originals or certified copies of all papers and evidence presented to and considered by it in entering said order.

"(e) Within thirty days after the filing of an appeal any interested person may intervene and participate in the proceedings had upon said appeal by filing with the court a notice of intention to intervene and a verified statement showing the nature of the interest of such party, together with proof of service of true copies of said notice and statement, both upon appellant and upon the Commission. Any person who would be aggrieved or whose interests would be adversely affected by a reversal or modification of the order of the Commission complained of shall be considered an interested party.

"(f) The record upon which any such appeal shall be heard and determined by the court shall contain such information and material and shall be prepared within such time and in such manner as the court may by rule prescribe.

"(g) At the earliest convenient time the court shall hear and determine the appeal upon the record before it and shall have power upon such record to enter judgment affirming or reversing the order of the Commission. As to the findings, conclusions, and decisions of the Commission, the court shall consider and decide, so far as necessary to its decision and where raised by the parties, all relevant questions of (1) constitutional right, power, privilege, or immunity; (2) the statutory authority or jurisdiction of the Commission; (3) the lawfulness and adequacy of Commission procedure; (4) findings, inferences, or conclusions of fact unsupported, upon the whole record, by substantial evidence; and (5) administrative action otherwise arbitrary or capricious.

"(h) In the event that the court shall render a decision and enter an order reversing the order of the Commission, it shall remand the case to the Commission to carry out the judgment of the court and it shall be the duty of the Commission, in the absence of proceedings to review such judgment, to forthwith give effect thereto, and unless otherwise ordered by the court, to do so upon the basis of the proceedings already had and the record upon which said appeal was heard and determined. The court's judgment shall be final, subject, however, to review by the Supreme Court of the United States upon writ of certiorari on petition therefor under section 240 of the Judicial Code, as amended, by appellant, by the Commission, or by any interested party intervening in the appeal.

"(i) The court may, in its discretion, enter judgment for costs in favor of or against an appellant, or other interested parties intervening in said appeal, but not against the Commission, depending upon the nature of the issues involved upon said appeal and the outcome thereof."

Sec. 8. Section 405 of such Act as amended, is amended to read as follows:

"REHEARING BEFORE COMMISSION

"Sec. 405. After a decision, order, or requirement has been made by the Commission or any Division thereof in any proceeding, any party thereto or any other person aggrieved or whose interests are adversely affected thereby may petition for rehearing. When the decision, order, or requirement has been made by the whole Commission, the petition for rehearing shall be directed to the whole Commission; when the decision, order or requirement is made by a division of the Commission, the petition for rehearing shall be directed to that Division; petitions directed to the whole Commission requesting a rehearing in any matter determined by a division thereof shall not be permitted or considered. Petitions for rehearing must be filed within thirty days from the entry of any decision, order, or requirement complained of and except for those cases in which the decision, order, or requirement challenged is necessary for the maintenance or conduct of an existing service, the filing of such a petition shall automatically stay the effective date thereof until after decision on said petition. The filing of a petition for rehearing shall not be a condition precedent to judicial review of any such decision, order or requirement, except where the party seeking such review was not a party to the proceedings before the Commission resulting in such decision, order or requirement, or where the party seeking such review relies on questions of fact or law upon which the Commission has been afforded no opportunity to pass. Rehearings shall be governed by such general rules as the Commission may establish but any decision, order, or requirement made after such rehearing reversing, changing, or modifying the original determination shall be subject to the same provisions as an original order."

Sec. 9. Subsection (a) of section 409 of such Act, as amended, is amended to read as follows:

"(a) In all cases where a hearing is required by the provisions of this Act, or by other applicable provisions of law, such hearing shall be a full and fair hearing. Hearings may be conducted by the Commission or a Division thereof having jurisdiction of the proceeding or by any member or any qualified employee of the Commission when duly designated for such purpose. The person or persons conducting any such hearing may sign and issue subpenas, administer oaths, examine witnesses, and receive evidence at any place in the United States designated by the Commission. In all cases, whether heard by a quorum of the Commission or a Division thereof, or by any member or qualified employee of the Commission, the person or persons conducting such hearing shall prepare and file an intermediate report setting out in detail and with particularity all basic or evidentiary facts developed by the evidence as well as conclusions of fact and of law upon each issue submitted for hearing. In all cases the Commission, or the Division having jurisdiction thereof, shall, upon request of any party to the proceeding, hear oral argument on said intermediate report or upon such other and further issues as may be specified by the Commission or the Division and such oral argument shall precede the entry of any final decision, order, or requirement. Any final decision, order, or requirement shall be accompanied by a full statement in writing of all the relevant facts as well as conclusions of law upon those facts."

Sec. 10. (a) The Federal Communications Commission shall study the following proposals and shall report to Congress not later than January 1, 1944, its recommendations thereon together with the reasons for the same:

(1) Whether and upon what terms and conditions Congress shall by statute confer upon the Commission the power to regulate the contractual or other relations between the licensees of radio broadcast stations and networks or other organizations which supply program material to such licensees.

(2) Whether and upon what terms and conditions the Congress shall provide by statute for the licensing of networks.

(3) Whether and in what terms the Congress shall by statute redefine and fix the qualifications of the licensee of any radio station which is intended to and does communicate with the public.

(4) Whether and upon what terms and conditions the Congress shall by statute limit the number of services which may be conducted by any network organization and the number of stations of any class which may be licensed to any network organization.

(b) The Commission shall report to Congress not later than July 1, 1943, the standards and principles adopted by it to effectuate the mandate contained in section 307 (b) of the Communications Act of 1934, as amended, which requires the Commission to make and maintain a fair, efficient and equitable distribution of radio facilities among the several States and communities, together with its recommendations, if any, for further legislation on this subject.

(c) The Commission shall report to Congress not later than July 1, 1943, the steps taken and the policies adopted by it to effectuate the purposes of paragraph (g) of section 303 of the Communications Act of 1934, as amended, insofar as those purposes have application to the larger and more effective use of radio by stations which are intended to and do communicate with the public."

OPA REFUSES TO RELAX NEW GAS ORDER

The Eligibility Committee on gasoline rationing of the OPA on Tuesday turned down the pleas of NAB and OWI for relaxation of Amendment 8 to Ration Order 5 C (see NAB REPORTS, January 8, p. 7, and January 15, p. 17). NAB had requested that the amendment be stricken to restore the eligibility of workers in the broadcasting industry, other than salesmen, for Class C coupon books. Particular stress was laid on the need for Class C books for engineers and technicians who have to use their own cars to install and service temporary, remote-control pickups, and OWI joined in this plea.

Meeting has been scheduled for today with Mr. Richard C. Harrison, Chief of Eligibility, Gasoline Rationing, at which time NAB will present evidence of the need of "preferred mileage" for the industry generally, and for temporary remotes in particular.

Labor

REGIONAL WAR LABOR BOARDS

Twelve Regional War Labor Boards, with full authority to make final decisions in labor disputes and in voluntary wage and salary adjustment cases, are being established by the National War Labor Board under a sweeping decentralization program announced today by the Board.

Each of the Regional Boards will be set up on the same tri-partite system of public, employer and labor representatives as the National Board. In addition, the program calls for establishment of permanent tri-partite panels in all the major cities of the United States to handle dispute cases and make recommendations to the Regional Boards.

Petitions for approval of voluntary salary adjustments will continue to be filed as heretofore with the nearest Wage and Hour Division field office. That office will forward them for ruling by the Regional Wage Stabilization Director, whose decisions can be appealed to the Regional War Labor Board.

Regional Boards will be located in the following cities where Regional Advisory Councils now function, as well as in Detroit and Seattle:

Boston, Mass.—Saul Wallen, Chairman; including all New England states.

New York—Theodore Kheel, Chairman; including New York and all but the southern counties of New Jersey.

Philadelphia—Sylvester Garrett, Chairman; including Pennsylvania, Virginia, Delaware, Maryland, District of Columbia and southern counties of New Jersey.

Atlanta, Ga.—M. T. Van Hecke, Chairman; including Georgia, North Carolina, South Carolina, Florida, Tennessee, Alabama and Mississippi.

Cleveland, Ohio—Lewis Gill, Chairman; including Ohio, West Virginia and Kentucky.

Chicago, Illinois—Robert K. Burns, Chairman; including Indiana, Illinois, Wisconsin, Minnesota, North Dakota and South Dakota.

Kansas City, Missouri—Joseph A. Hoskins, Chairman; including Missouri, Arkansas, Nebraska, Kansas and Iowa.

Dallas, Texas—Floyd McGown, Chairman; including Texas, Louisiana and Oklahoma.

Denver, Colorado—Charles Graham, Chairman; including Colorado, New Mexico, Montana, Wyoming, Utah and Idaho.

San Francisco, California—Thomas Fair Neblett, Chairman; including California, Nevada and Arizona.

LABOR COMMITTEE

The following broadcasters make up the membership of the NAB Labor Executive Committee:

Ralph R. Brunton, KJBS, San Francisco, California
Martin B. Campbell, WFAA, Dallas, Texas
John Elmer, WCBM, Baltimore, Maryland
W. E. Hutchinson, WAAF, Chicago, Illinois
Henry P. Johnston, WSGN, Birmingham, Alabama
C. L. Thomas, KXOK, St. Louis, Missouri
John H. MacDonald, NBC, New York, New York
Alternate: Ernest de las Ossa, NBC, New York, N. Y.
Frank White, CBS, New York, New York.

CONTRACT POOL

Response to the NAB Labor Relations Department's request for up-to-date information on labor contracts in the industry has been prompt and gratifying. Any member who has neglected to answer this request should do so immediately.

A. F. OF M. JUDGMENT RESERVED

Last Monday (25th) Judge Barnes in the Federal Court in Chicago reserved judgment on the A. F. of M.'s motion to dismiss the Government's amended complaint. He allowed Joseph Padway, A. F. of M. counsel, one week in which to file an additional brief, and Thurman Arnold, Assistant Attorney General, one week in which to reply.

MORE DEFERMENT FOLIOS DISTRIBUTED

Several thousand additional folios concerning the Selective Service Occupational Bulletin No. 42, and the deferment of qualified radio repairmen, are being circulated through radio trade channels. The following radio manufacturers distributed copies to their respective jobbers:

Galvin Manufacturing Corp. (Motorola), Philco Corp., RCA Victor Division of RCA, Stewart-Warner.

Other copies were distributed to parts jobbers by: the National Electronic Distributors Association.

Electric Institute of Washington mailed copies to the electric leagues in other cities and to industry organizations.

Radio Jobber News, Radio Retailing and one of the Bryan Davis publications cooperated in splendid fashion to get the news around in the trade.

With copies in the files of all broadcast stations and with the broadcast stations notifying servicemen of its availability, a large proportion of the servicemen of the United States should soon be acquainted with the regulations.

John Fetzer, president, WKZO, Kalamazoo, Mich., has distributed 25 copies directly to servicemen in his city.

Deferment Data Used in Muncie

When the folio concerning the deferment of radio servicemen and Occupational Bulletin No. 42 came to WLBC, Muncie, Ind., D. A. Burton, owner, put it to use immediately.

One "rush" case was discovered with two more anticipated in the near future.

Every serviceman in the Muncie area was notified regarding deferment procedure, easily and quickly, through students attending the NAB-ESMWT Radio Technician Training Course, two classes of which are taught by WLBC's chief engineer.

RADIO COURSES WILL CURE "TECHNICIAN TROUBLES"

Several queries have been received from stations asking whether any policy changes had been instituted by ESMWT for the Fundamentals of Radio courses being taught throughout the United States.

Policy remains the same according to a check made January 28. Courses in Fundamentals of Radio will continue to be approved by ESMWT, Washington, whenever they are received, provided, of course, that petitioners make out a case for their necessity. This qualification is not new. It has always been in existence.

Stations should not lose sight of the original intention of the legislation which provides for the establishment of courses such as Fundamentals of Radio. Courses were intended and are intended to provide trained personnel for industry. Broadcasting is essential to the war industry, as is the occupation of radio repairman.

Incidentally, it has been found that many high school graduates, working at radio service, have increased their individual output and improved the quality of their work by completing Fundamentals of Radio.

All stations are urged to arrange for Fundamentals of Radio courses wherever it appears that the need exists now or at the completion of training. Such foresight will eliminate many of the current "technician headaches." Letters indicate that stations located where these courses have been given are apt to be troubled only slightly, if at all, by technician shortages.

In Orlando, Fla.

Part II of Fundamentals of Radio will be completed in five more weeks of study. It is interesting to note that two of the graduates will be women, Hazel O. Yarbrough, wife of the chief engineer of radio station WDBO, and Mrs. Charles F. Batchelder, wife of a staff member of WDBO.

ROBERT MOODY NEW WHIO MANAGER

Robert H. Moody has taken over the managership of Station WHIO, Dayton, Ohio. Lester Spencer has been appointed as Assistant Manager in Charge of Programs and Production.

1940 BROADCAST INCOME

Secretary of the Treasury Morgenthau has made public a report on the income of industrial groups, including radio broadcasting and television, for the year 1940.

Radio and television broadcasters filed 650 returns; their total compiled receipts were $153,273,000; net income, $26,746,000; and income tax (includes income defense tax) $6,075,000.

FEDERAL LEGISLATION

HOUSE

H. R. 1490 (Holmes, R-Mass.) COMMUNICATIONS ACT—To amend the Communications Act of 1934, as amended, and for other purposes. Referred to the Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

ARKANSAS:

H. 94 (Gates) LEGISLATIVE PROCEEDINGS—BROADCASTING—Providing for recordings and transcriptions of speeches and votes in the legislature, and also to provide for radio broadcasting from the floor. Referred to Committee on Calendar 1/21/43.

CALIFORNIA:

A. 667 (Potter) REGULATING DRUGS AND DEVICES—Department of health bill which is to regulate the branding and advertising of drugs and devices. Referred to Committee on Public Health 1/22/43.

A. 765 (Bashore) MONEY LENDERS ADVERTISING—Prohibits advertising by money lenders. Referred to Committee on Finance 1/25/43.

COLORADO:

S. 301 (Hart) PUBLIC SERVICE TAX LAW—To amend the public service tax law of 1937 as originally enacted and as amended and reenacted by the Colorado Sess. Laws 1939-1941, by providing a Statute of Limitations with respect to the taxes imposed thereby. Referred to Committee on Finance 1/20/43.

S. 346 (Laws) TAX REVIEW—A bill providing for court review of final decisions and determinations by the director of revenue in cases involving the Colorado retail sales and use taxes, the Public Revenue Service Tax and the Colorado Income Tax and repealing all acts and parts of acts in conflict herewith. Referred to the Committee on Judiciary 1/20/43.

CONNECTICUT:

H. 621 (Beckwith) RADIO ADVERTISING—Providing that no permittee shall sell or offer for sale any alcoholic liquor which has been advertised over any radio broadcasting station since July 1, 1941, and one who does shall have his permit suspended. Referred to Committee on Judiciary 1/22/43.

S. 484 (Brook) CONNECTICUT FOOD, DRUG AND COSMETIC ACT—concerning the Amendment of the 1939 Supplement to the General Statutes, Sections 900e, 901e, 902e, 908e, 909e known as the Connecticut Food, Drug and Cosmetic Act and the 1935 Supplement to the General Statutes, Section 976e. Referred to Committee on Public Health and Safety 1/22/43.

GEORGIA:

H. 142 (Golberg & Hurst) COPYRIGHT MUSIC, ETC.—LICENSE FEE—Repealing Code Section 92-512 of the Georgia Code of 1933 (Ga. Laws, 1935, page 83). Referred to Committee on General Judiciary #1 1/22/43.

IOWA:

S. 55 (Sjulin, et als.) INSURANCE—SALE BY RADIO—Require license to sell insurance by radio. Referred to Committee on Insurance 1/21/43.

MASSACHUSETTS:

Pub. Doc. 144—JJ (Item 16) Recommended by Judicial Council LIBEL AND SLANDER—Relates to malice as affecting libel and slander. Referred to Joint Judiciary Hearing 1/26/43.

H. 455 (Int. Workers' Union) ADVERTISEMENTS—Regulate advertisements restricting employment by reason of race, creed or color. Referred to Committee on Labor & Industries 1/21/43.

H. 425 (Shubow) LIBEL—Prohibiting libel of racial and religious groups. Referred to Committee on Judiciary 1/21/43.

H. 618 (Cameron) LIBELS—Limit liability for libels in certain cases.

H. 619 (Carroll, et al.) MUSICAL COMPOSITIONS—Requiring the filing with the State Secretary of contracts pertaining to the sale, licensing and disposition of performing rights in copyrighted musical compositions and relative to imposing a tax on such sales and licenses.

S. 222 (Harrison) EMPLOYMENT DISCRIMINATION—Prevents discrimination in certain employment, by persons operating employment offices, by newspapers and broadcasting stations, by innkeepers, etc., because of race, color, religion or nationality. Referred to Committee on Labor & Industries 1/21/43.

S. 318 (Sullivan) LOTTERY—Providing for a state lottery for the purpose of raising additional funds for defraying expenses of the commonwealth. Referred to the Committee on Ways and Means 1/43.

New York:

H. 20 (Bannigan) LOTTERIES—CHARITABLE—Permits lotteries and drawings by recognized religious, charitable or veterans' organizations for benefit of charitable or educational objects. Referred to Committee on Codes 1/6/43.

South Dakota:

H. 45 (State Affairs) LIBEL—An act to amend section 170814 of the 1939 Code, requiring retention of reports for five years, and prohibits the use of reports in suits for slander or libel.

Texas:

H. 19 (Senterfitt) TAX UPON RADIOS, COSMETICS—Placing a gross receipts tax upon the retail sales of new radios and placing a stamp tax upon the sale of cosmetics and playing cards. Referred to Committee on Revenue and Taxation 1/20/43.

FEDERAL COMMUNICATIONS COMMISSION

FCC EQUIPMENT CATALOG

Assembly of the Catalog of Surplus and Salvageable Equipment is completed and distribution being made to the interested government departments, inspectors-in-charge of regular and sub-field offices and to 124 broadcast stations located throughout the United States, Alaska, Hawaii and Puerto Rico, to give the best possible geographical distribution of these catalogs which contain some 1100 pages (approximately 550 sheets), by the FCC.

Responses to the surplus equipment questionnaires of the Commission pursuant to the Notice to All Radio Station Licensees dated November 20, 1942, have been analyzed.

As stated in the above notice, it was intended that a full listing would be sent each licensee. However, the material listed is so voluminous that this procedure is entirely impractical. Therefore, it has become necessary to distribute copies throughout the United States for inspection by interested parties at as many locations as practicable.

A copy will be available for inspection in the office of each Inspector in Charge of the Radio Districts, in the office of the Secretary of the Commission in Washington, D. C., and at the stations. The stations within the city were determined by taking the first standard broadcast station in the city when arranged alphabetically by call letters.

Each station accepting this catalog accepts the responsibility of making it equally available to all persons interested. However, such stations shall not permit its removal from the premises nor permit its removal within the station to a point where it is not available for public inspection. The station further agrees to accept and handle all supplements and corrections in the same manner.

In the event any station does not elect to accept this responsibility it will be passed to the next station in the city alphabetically by call letters.

Persons interested should inspect the lists in person and not attempt to correspond with the Commission or the stations in custody of the lists as these include thousands of items and such correspondence is entirely impractical and would constitute an unreasonable burden.

Owners who do not find their equipment listed will please note that tabulations were stopped January 12, 1943, in order to make the bulk of the listings immediately available. It is expected that a supplement will be issued at an early date.

The value of this catalog is largely dependent upon its being kept current, therefore the owner of equipment which has been reported but subsequently disposed of either through sale, use in the owner's licensed equipment, or otherwise should so advise the Commission immediately.

NETWORK REGULATIONS POSTPONED

The FCC on January 20 adopted a minute suspending the effectiveness of the Commission's order regarding chain broadcasting regulations (issued May 2, 1941 and amended October 11, 1941, Docket No. 5060), until April 1, 1943, or the date of the decision of the Supreme Court of the United States, whichever is earlier.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 1. They are subject to change.

Monday, February 1

Further Consolidated Hearing

WALB—Herald Publishing Co., Albany, Ga.—Renewal of license, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license, Station WALB, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.,** 1 KW, DA-night, unlimited.

Wednesday, February 3

Oral Argument Before the Commission

Report No. B-163:

WGRC—Northside Broadcasting Corp., New Albany, Ind.—C. P., **790 kc.,** 1 KW night, 5 KW day, DA-night.

WKPT—Kingsport Broadcasting Co., Inc., Kingsport, Tenn.—C. P., **790 kc.,** 1 KW, unlimited, DA-night.

Wednesday, February 3

Further Hearing

KVOE—The Voice of The Orange Empire, Inc., Ltd., Santa Ana, Calif.—C. P., **1480 kc.,** 1 KW, unlimited.

Thursday, February 4

NEW—Chattahoochee Broadcasting Co., Columbus, Ga.—C. P., **1450 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

The Blue Network Co., Inc., and Mutual Broadcasting System.—Granted application for permission to eliminate identification break during the period 11:15 p. m. on January 30 to

12:15 a. m. on January 31 *only,* while broadcasting the President's birthday celebration.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted modification of license (B5-ML-1149) to move main studio to Norwegian Ave., between Sunrise Avenue and Coffee Road, near Modesto, Calif.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Granted extension of special service authorization to operate synchronously with Station WBBM, Chicago, Ill., from local sunset at Lincoln, Nebr., to 12 midnight CST, for the period ending February 1, 1944 (B4-SSA-61).

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special service authorization to operate synchronously with Station KFAB, Lincoln, Nebr., from sunset at Lincoln to 12 midnight, CST, for the period ending February 1, 1944 (B4-SSA-62).

KTHS—Radio Broadcasting, Inc., Hot Springs National Park, Ark.—Granted extension of special service authorization to operate unlimited time, simultaneously with Station WBAL, Baltimore, Md., with power of 1 KW night, 10 KW local sunset, for the period ending April 1, 1944 (B3-SSA-55).

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Granted extension of special service authorization for a period of 60 days, to operate unlimited time (B4-SSA-57).

WINS—Hearst Radio, Inc., New York, N. Y.—Granted special service authorization to operate unlimited time with 1 KW power, employing directional antenna night (B1-SSA-64).

W3XE—Philco Radio and Television Corp., Philadelphia, Pa.—Granted construction permit (B2-PVB-95) to move experimental television station from Tioga and C Streets, Philadelphia, to Wyndmoor, Pa., and granted license (B2-LVB-38) to cover same. Also granted renewal of license to operate on **66000-72000 kc.** (Channel 3), power 10 KW (peak) visual, 11 KW aural; emission A5, and Special for FM (aural).

Metropolitan Television, Inc., New York City.—Granted modification of construction permit to reduce power to 50 watts (peak) visual and 50 watts aural, Emission A3, A5, and Special for FM (aural), and with March 31, 1943, as completion date for the construction.

LICENSE RENEWALS

Granted renewal of following station licenses for the period beginning February 1, 1943, and ending in no event later than February 1, 1945:

KBTM, Jonesboro, Ark.; KFDA, Amarillo, Tex.; KFIO, Spokane, Wash.; KFJB, Marshalltown, Iowa; KGFJ, Los Angeles, Calif.; KSUN, Lowell, Ariz.

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted renewal of license for the period ending in no event later than December 1, 1944.

Granted further extension of following station licenses, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than March 1, 1943:

KBST, Big Spring, Texas; KCMC, Texarkana, Texas; KCRJ, Jerome, Ariz.; KFMB, San Diego, Calif.; KGEZ, Kalispell, Mont.; KCFW, Kearney, Nebr.; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Tex.; KHBC, Hilo, Hawaii; KHBG, Okmulgee, Okla.; KIEM, Eureka, Calif.; KPLT, Paris, Tex.; KRBA, Lufkin, Tex.; KRBC, Abilene, Tex.; KVGB, Great Bend, Kans.; KWKH, Shreveport, La.; KXL, Portland, Ore.; WBBZ, Ponca City, Okla.; WBNX, New York, N. Y.; WBRW, Welch, W. Va.; WCAZ, Carthage, Ill.; WCBT, Roanoke Rapids, N. C.; WEDC, Chicago, Ill.; WFCI, Pawtucket, R. I.; WFTC, Kinston, N. C.; WGES, Chicago, Ill.; WHOM and auxiliary, Jersey City, N. J.; WING, Dayton, Ohio; WJBW, New Orleans, La.; WLOF, Orlando, Fla.; WNBZ, Saranac Lake, N. Y.; WOCB, near Hyannis, Mass.; WSYB, Rutland, Vt.; WTEL, Philadelphia, Pa.; WTRC, Elkhart, Ind.

Granted extension of following station licenses, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than March 1, 1943:

KAST, Astoria, Ore.; KRLH, Midland, Tex.

WCBW—Columbia Broadcasting System, Inc., New York City.—Granted conditional license for commercial television broadcast station to operate with reduced ESR (effective Signal radiated) of 1000, upon condition that construction will be completed according to the Commission's rules, regulations and standards as soon as the required materials and engineering personnel have become available.

The Commission granted renewal of licenses for the following experimental television broadcast stations for the period ending February 1, 1944:

W2XBT, W2XBU, National Broadcasting Co.; W2XGE, W2XI, General Electric Co.; W2XVT, W2XVW, Allen B. DuMont Labs., Inc.; W3XP, W3XPR, Philco Radio and Television Corp.; W6XAO, W6XDU, Don Lee Broadcasting System; W9XPR, Balaban & Katz, Corp.; W9XZV, Zenith Radio Corp.; W10XKT, Allen B. DuMont Labs., Inc.

WRGB—General Electric Co., Schenectady, N. Y.—Granted renewal of commercial television broadcast station for the period ending February 1, 1944.

W9XBT—Balaban & Katz, Corp., Chicago, Ill.—Present license for experimental television broadcast station was extended on a temporary basis only, pending determination upon application for renewal, for the period ending March 1, 1943.

WNBT—National Broadcasting Co., Inc., New York City.—Present license for commercial television broadcast station extended on a temporary basis only, pending determination upon application for renewal, for the period ending March 1, 1943.

W9XUI—State Univ. of Iowa, Iowa City, Ia.—Present license for experimental television broadcast station was extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending March 1, 1943.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—Present license for international broadcast station further extended upon a temporary basis pending determination upon application for renewal, for the period ending March 1, 1943.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present high frequency broadcast station license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending March 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present high frequency broadcast station license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending March 1, 1943.

W75NY—Metropolitan Television, Inc., New York City—Granted license (B1-LH-25) to cover construction permit (B1-PH-52) in part and approval of studio location for new FM station in New York.

W71NY—Bamberger Broadcasting Service, Inc., New York City.—Granted modification of construction permit (B1-MPH-92) for extension of completion date to January 26, 1943, and granted license (B1-LH-22) to cover construction permit in part.

W71NY—Bamberger Broadcasting Service, Inc., New York City.—Granted petition for temporary waiver of Section 3.261 of the Commission's Rules, for a period of 90 days.

MISCELLANEOUS

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Granted modification of construction permit as modified, for installation of directional antenna for night use, move of transmitter, and increase in power to 5 KW day and night, for extension of completion date from January 20 to July 20, 1943 (B3-MP-1685).

W3XWT—Allen B. Dumont Labs., Inc., Washington, D. C.—Granted modification of construction permit as modified, which authorized new television station, for extension of commencement and completion dates from June 26, 1942, and December 26, 1942, to December 26, 1942, and June 26, 1943, respectively (B1-MPVB-93).

KEX—Oregonian Publishing Co., Portland, Ore.—Granted motion to dismiss without prejudice application for construction permit to operate on **1190 kc,** 50 KW, unlimited time, using directional antenna.

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Granted petition for leave to dismiss without prejudice application for construction permit to operate on **1030 kc** with 10 KW power, unlimited time. (Docket No. 6441)

WGRC—Northside Broadcasting Corp., New Albany, Ind.; WKPT—Kingsport Broadcasting Co., Kingsport, Tenn.—Scheduled for oral argument on February 3, 1943, in re applications for change in operating assignments. (Dockets 6052 and 6249)

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Denied request for permission to change call letters to WINK.

W55NY—William G. H. Finch, New York, N. Y.—Granted motion for continuance of hearing scheduled for January 28 to February 26, in re application for modification of construction permit for high frequency broadcast station W55NY. (Docket 6363)

Chattahoochee Broadcasting Co., Columbus, Ga.—Granted motion for continuance of hearing scheduled for February 4 to March 4, in re application for construction permit for new broadcast station. (Docket 6456)

WSAV—WSAV, Inc., Savannah, Ga.—Granted motion for dismissal without prejudice application for construction permit to operate on **1370 kc.** 1 KW, directional antenna night, unlimited time. (Docket 6407)

APPLICATIONS FILED AT FCC

560 Kilocycles

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—License to cover construction permit (B3-P-3500) which authorized installation of new transmitter.

960 Kilocycles

KMA—May Broadcasting Co., Shenandoah, Iowa.—Modification of construction permit (B4-P-2599 as modified which authorized directional antenna for night use and increase in power) for extension of completion date from 2-22-43 to 4-23-43.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199 as modified which authorized change in frequency, hours of operation, increase in power, directional antenna for night use and new transmitter) for extension of completion date from 2-20-43 to 3-20-43.

1160 Kilocycles

KSL—Radio Service Corporation of Utah, Salt Lake City, Utah.—Modification of construction permit (B5-P-3502 which authorized changes in transmitting equipment) for further changes in equipment, and extension of commencement and completion dates from 9-1-42 and 3-1-43 to 14 days after grant and 7 days thereafter respectively.

KSL—Radio Service Corporation of Utah, Salt Lake City, Utah.—License to cover construction permit (B5-P-3502 as modified) for changes in equipment.

1240 Kilocycles

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Authority to determine operating power by direct measurement of antenna power.

TELEVISION APPLICATION

W6XLA—Television Productions, Inc., area of Los Angeles, Calif.—Modification of construction permit (B5-PVB-87, which authorized a new television relay station) to make changes in equipment, reduce power from 800 watts to 25 watts (100 watts peak) and extend commencement and completion dates from 8-2-42 and 2-2-43 to 30 days after grant and 90 days thereafter respectively.

MISCELLANEOUS APPLICATION

NEW—Baylor University, Corpus Christi, Texas.—Construction permit for new broadcast station to be operated on **1010 kc.**, 50 KW, unlimited time, directional antenna for day and night use, transmitter site NE of Gregory, Texas.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Booth Fisheries Corporation, engaged in the sale and distribution of fish products with its principal office in Chicago and about thirty branch offices located in various parts of the country, is charged in a complaint with misrepresentation. (4888)

J. H. Camp and Drug Profits, Inc., Ravenswood, W. Va., engaged in the sale and distribution of certain preparations containing drugs designated "Phalene" and "Burtone," recommended for treatment of various ailments of the human body, is charged in a complaint with misrepresentation. (4893)

S. Friedman & Sons and Sunray Yarn House, 349 Grand St., New York, selling and distributing yarn, are charged in a complaint with misrepresentation. (4891)

Logan's Inc., also trading as Logan-Rogers, selling and distributing ladies ready-to-wear apparel, with its principal place of business in Elmira, N. Y., and operating stores in Elmira and Harrisburg, Lebanon and Lancaster, Pa., is charged in a complaint with violation of the provisions of the Federal Trade Commission Act and of the Wool Products Labeling Act of 1939 and the Rules and Regulations promulgated under the latter Act. (4892)

Ostrex Co., Inc., 801 Second Ave., New York, selling and distributing a medical preparation designated "Ostrex," and David Steuerman and Lillian Steuerman, trading as Steuerman Advertising Agency, 205 East 42nd St., New York, preparing and disseminating advertising material in connection with the sale and distribution of the preparation, are charged in a complaint with misrepresentation. (4894)

Felix Portnow, trading as M. Portnow, 445 Grand St., New York, manufacturing and selling trusses, is charged in a complaint with misrepresentation. (4887)

John Solari & Co., and Par-Ex Products Co., 65 Beach St., New York, selling and distributing a food product designated "Par-Ex Hollandaise Sauce," is charged in a complaint with misrepresentation. (4895)

Universal Match Co., et al.—Unlawful use of the name and emblem of the American National Red Cross for commercial purposes in connection with the sale of cough drops and book matches is alleged in a complaint issued against Candy Brothers Manufacturing Co., Inc., and Universal Match Corp., both of St. Louis, Mo., and two individuals, Adolph H. Rosenberg and John Feinstein. (4889)

Washington Institute, 1230 Vance Building, Seattle, selling correspondence courses intended to prepare students for Civil Service examinations, is charged in a complaint with falsely representing that its business is connected with the United States Government. (4890)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Ferbo Co., Madison, N. J., manufacturer and distributor of food products including one designated "French Tang Vanilla Flavor" and also as "Sun-Cu-Nilla," has been ordered to cease and desist from misrepresentation of the product. (4706)

Hollywood Magic Garment Co., Los Angeles, has been ordered to cease and desist from misrepresentation in connection with the sale of a device designated "Hollywood Magic Garment", offered as a weight-reducing device. Although the corporation has discontinued active business operations it has not been dissolved. Its last known address was 8254 Beverly Boulevard. (4702)

Mono Service Co., 349 Oraton St., Newark, N. J., manufacturing and selling paper cups for the packing of ice cream, has been ordered to cease and desist from the use of lottery methods in connection with the sale of its products. (4834)

United Inheritance Bureau—An order to cease and desist from unfair and deceptive acts and practices has been issued against Harold M. May, trading as United Inheritance Bureau and as Guardian Service Bureau, 1278 Jefferson Ave., Buffalo, engaged in the sale of envelopes and questionnaire letters for use by creditors and collection agencies in obtaining information concerning debtors. (4874)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Breosan Laboratories, P. O. Box 140, Long Island City, N. Y., selling and distributing four medicinal preparations designated "Breosan Suppositories," "Breosan Solution," "Breosan Ointment" and "Breosan Lanolin," has stipulated to cease and desist from representing that Breosan Suppositories or the Breosan Treatment have any therapeutic value in the treatment of hemorrhoids other than that as an emollient palliative; that Breosan Solution is a prophylactic or an antiseptic, will cause wounds to heal without scars or promote the growth of new tissue, is not a drug or has any beneficial therapeutic effect in the treatment of wounds, abrasions, blood poisoning, boils, or other ailments enumerated in his advertisements, or that Breosan Ointment or Breosan Lanolin have any beneficial therapeutic effect in the treatment of wounds of many kinds, burns, chapped hands or similar ailments. (03088)

Simplex Time Recorder Co., Gardner, Mass., and Morse Magneto Co., also trading as American Watchman's Time Detector Co., 17 East 42nd St., New York, both engaged in the sale and distribution of clocks, including a clock designated "The Morse Tape Clock", have stipulated to cease and desist from representing that each and every part of such clocks have been made in the United States when, in fact, any constituent part or parts thereof have been made or manufactured in any other country. (3597-3598)

Universal Selling Co., 5109 Marion St., Philadelphia, selling and distributing a product designated "Weldex" intended for use in repairing cracks and leaks in water-cooled motors, has stipulated to cease and desist from use of the word "Weldex" as a trade name for their product; and from use of the word "Weldex" or the word "weld" as a trade name for the product, or in any other way, to convey the belief that the product is a weld or that its use with metals will effect a state or condition of their becoming welded or will cause the union, consolidation or fusion of the metals or metal parts such as would be accomplished by a welding process. (3596)

Vogue Company and Vogue Eliminator Co., 7759 South Halsted St., Chicago, engaged in selling a radio device designated "3 in 1 Radio Tuner," for attachment to radio receiving sets for the purpose of improving reception, has stipulated to desist from representing that by the attachment of the device to a radio receiving set, interference in the reception of radio waves, caused by electrical appliances, will be eliminated. (03089)

R. Wallace & Sons Manufacturing Co., Wallingford, Conn., selling and distributing merchandise, including trophies, has stipulated to cease and desist from use in connection with its merchandise of any false, fictitious or misleading price representation which purports to be the retail sales price but which, in fact, is in excess of the price for which such merchandise is customarily sold, or from directly or inferentially representing through use of a fictitious or marked-up price that the price for which such merchandise is offered for sale is an exceptional price, a low price, or a discounted price, when in fact the sales price offered the purchaser is not an exceptional, low or a discounted price, but actually is the price for which the merchandise is customarily sold in the usual course of retail trade. (3599)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 6, February 5, 1943

RADIO GETS AA PRIORITY

As first predicted in NAB Reports November 13, 1942, page 648, the preference rating applying to materials for maintenance, repair or operating supplies of the broadcast industry has been raised from A-1-J to AA-2X under Preference Rating Order P-133 as amended February 4, 1943, by the Director General for Operations, War Production Board. The amendment also raises the ratings allowed to those engaged in commercial sound recording and radio communications. Broadcasters and those engaged in commercial sound recording may now apply the preference rating AA-2X to purchases of recording blanks and other necessary replacement items used in recording.

The new order does not provide replacement materials for automotive replacement as defined by General Limitation Order L-158 (this has been interpreted as eliminating mobile police stations). NAB has been informed that the new preference rating is the highest generally obtainable for non-military requirements. The suffix letter X of the preference rating identifies purchases of a non-military nature.

The amended order requires that broadcasters "keep and preserve for two years copies of all purchase orders or contracts applying such rating," and that those "affected by this order shall execute and file with the War Production Board such reports and questionnaires as the War Production Board shall from time to time prescribe." General instructions for the purchase of material in accordance with P-133 as amended February 4, 1943, are as follows:

1. Read Preference Rating Order P-133 as amended and become familiar with the provisions of the order.
2. Operate all tubes and parts to absolute failure, before installing replacements, in order to bring inventory within the limits of the order.
3. Hold best spare tubes for last use in the equipment thus minimizing the chance of failure while procuring replacements. In order to check the condition of spare tubes and to insure their immediate availability without conditioning, use all spares not less than one day every three months and not more than one day of each month. This practice is preferable to the rotation of spare tubes on an equal use basis.
4. Immediately upon the failure of spares which will reduce the inventory to less than one hundred per cent, as permitted by the order, place a purchase order with your supplier. This purchase order should bear the required certification assigning an AA-2X preference rating. When placing the purchase order request delivery prior to a definite date and ask your supplier to advise you immediately if for any reason the order cannot be filled on or before the required date. If notice is received from supplier that delivery cannot be made by the date specified, immediate *inquiry* should be made to all other known sources of supply concerning their ability to fill the order in accordance with your requirements. If these inquiries result in a satisfactory delivery promise from another supplier, the original order *should be cancelled* and another order placed with the new supplier (WPB Regulation 3, amended June 26, 1942, Section (b), paragraph 3. This regulation forbids duplicate orders.)
5. If after following the procedure outlined in paragraph 4 a satisfactory delivery promise is not obtained, an order should be placed with the supplier offering the best delivery promise. At the same time a PD-1A form should be filed with the War Production Board, Director of Industry Operations, Washington, D. C. Be sure to furnish all required information on the PD-1A form and outline in the covering letter the substance of your correspondence under paragraph 4 above.
6. If your station is actually off the air due to the failure to obtain spare tubes or parts or if the tubes or parts in use (for which no replacements are available) appear to be approaching failure communicate immediately by telephone or telegraph with the WPB Emergency Branch, Washington, D. C. The telephone number is REpublic 7500, extension 2333 or extension 2330. This communication should refer to your PD-1A application.

To avoid confusion it is suggested that the original P-133 dated October 5, 1942 be removed from your files and the amended order substituted. The revised sections of the order are printed in bold face type. The new order is printed on page 48 of this issue of the NAB REPORTS.

MORE BATTERY INFO WANTED

Battery sets are in operation in certain sections of the country remote from power lines. We would like to hear from broadcasters in these localities as to dealer and jobber battery inventories. If battery information from the trade is meager, it is suggested you check listeners during a good farm program. Our information on tubes and parts is satisfactory but incomplete on radio batteries. Specify types if there seems to be an impending shortage.

The above paragraph was first printed in NAB REPORTS of January 22. It produced several informative letters. It will be helpful to receive more. Please send them to Arthur Stringer, NAB, 1760 N Street, N. W., Washington, D. C.

NAB NAMES WILLARD EGOLF

Willard D. Egolf, for the past ten years commercial manager of KVOO, Tulsa, Oklahoma, has been named to the NAB executive staff, as successor to Lt. Col. Edward M. Kirby. In announcing the appointment, Neville Miller said that in addition to the public relations activity

(Continued on page 46)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N St., N.W. WASHINGTON Phone NAtional 2080

Neville Miller, *President* C. E. Arney, Jr., *Assistant to President*

Lewis H. Avery, *Director of Broadcast Advertising;* Howard Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Russell P. Place, *Counsel;* Arthur C. Stringer, *Director of Promotion.*

NAB NAMES WILLARD EGOLF

(Continued from page 45)

formerly directed by Lt. Col. Kirby, which involved the relations between the industry and religious, educational, civic and social groups, Mr. Egolf will assist him in handling broad industry matters involving governmental relations.

Mr. Egolf brings to his new position at NAB a background of 15 years of extensive experience in the advertising and radio field. Born in Kansas City, Missouri, he was educated at Muskogee, Oklahoma, and is a graduate of the Law School of the University of Oklahoma.

In both high school and college he took a prominent part in student affairs. He was sports editor of his high school paper and editor of the annual in his senior year. At the University he was editor and co-publisher of a college magazine and took an active part in musical circles, being a member of the glee club and of the college dance orchestra.

Following his graduation he went to Florida where he was engaged for two years in legal work and in editing and advertising as director of publicity for the Rose Investment Company. He returned to Oklahoma to join the Rogers-Gano Advertising Agency of Tulsa and Chicago as account executive and copy writer. For five years in this connection he handled all types of advertising in magazines, newspapers, direct mail, poster boards and radio. He edited several house organs for clients of the agency.

In 1932 he became commercial manager of KVOO, then a 5,000 watt operation, and assisted its growth to its present status of a 25,000 watter. In 1940 Mr. Egolf was a member of the Sales Managers Committee of the NAB, and at the same time was President of the Tulsa Advertising Federation. He is a member of the Board of the Tulsa Better Business Bureau and of the Market Development Committee of the Tulsa Chamber of Commerce.

In 1941 he was re-elected President of the Advertising Federation and Treasurer of the Better Business Bureau, and also First Lieutenant Governor of the Tenth District of the Advertising Federation of America. In June of last year he was elected Vice President of the Advertising Federation of America, and in November as Governor of the Tenth District of AFA.

Mr. Egolf is a member of Phi Delta Gamma Fraternity, is married and the father of two children.

AND NOW, THE RADIOETTE

"Radioette" is the name suggested by NAB to indicate a woman engaged in servicing home radios. Not only does this establish the identity of the sex in a new war job, but it gets away from referring to such persons as a feminine radio repairman.

It is believed that the general use of "radioette" will be of value when, as and if conditions warrant the recruiting, training and employment of women to help maintain radio receivers. The term is not intended to be synonymous with "radio repairman," "radio mechanic" or any other term descriptive of an all around technician.

The term is believed to be one which will fit in with a streamlined service technique in which women may presently be engaged.

The "radioette" would work with others under the direction of a "trouble-shooter," "foreman" or "diagnostician."

Labor

"LITTLE STEEL" FORMULA THREATENED

John L. Lewis' demand for a $2-a-day raise for his soft coal miners threatens to break the President's wage stabilization program in general, and the so-called "Little Steel" formula in particular.

The "Little Steel" formula, devised by the War Labor Board last summer to hold the line against inflation, provides that employees may obtain increases up to 15 per cent of their wage rates in January, 1941, to compensate for the increase in the cost of living between that date and May, 1942.

The miners in April, 1941, received an increase which just about amounted to 15 per cent. Now they are back for more, and Mr. Lewis has blood in his eye.

The WLB already is talking about raising the 15 per cent to 20 per cent to take care of further increases in the cost of living since last May (see figures below). Another suggestion is to keep the basic wage rates unchanged but to put all industry on a 48-hour week. This would put more money into labor's pockets, with premium pay for the last eight hours each week. It also might relieve the manpower shortage to a certain extent. Still another suggestion is to hold the line, come what may.

Whatever happens in coal will be reflected almost immediately in steel, automobiles and other big industries. A general industrial wage increase will be reflected in broadcasting.

FCC Salary Figures

Despite an acute manpower shortage of its own, the FCC is assembling as fast as possible its tabulations of employment figures for the week of October 11, 1942. These, as many broadcasters know, are invaluable in negotiations with unions and in proceedings before the War Labor Board or Treasury Department in obtaining salary adjustments.

The Commission has advised the NAB that it will be glad to produce necessary figures, in emergencies, for stations. Advise the NAB Labor Relations Department what your needs are along this line.

COST OF LIVING

Living costs were one-half of one percent higher on December 15 than on November 15, 1942, bringing the total rise for America's first war year to 9 percent, Secretary of Labor Perkins has reported. "Since the outbreak of war in Europe, the increase has been 22.1 percent, as compared with almost 35 percent during the same period of the last war," she said.

Broadcast Advertising

"TREASURY STAR PARADE"

In line with the recent denunciation of the effort of Farrar and Reinhart, Inc., to obtain free announcements of their "Treasury Star Parade" book following the "Treasury Star Parade" programs, Vincent F. Callahan, Director of Radio, Press & Advertising War Savings Staff, recently sent the following letter to radio stations:

"You have undoubtedly received within the last few days a letter from John Farrar of Farrar and Reinhart, Incorporated, asking you to use announcements to promote the book Treasury Star Parade published by that company.

"This is to advise you the Treasury Star Parade Book was published by Farrar and Reinhart as a private venture. It is not a Treasury Department publication. Your decision as to the use of the announcements concerning the book requested by Farrar and Reinhart should depend upon your policy in such matters."

SUPER BARTER DEAL

In exchange for thirteen 50-word announcements for "Liberty" Magazine and nine 25-word announcements for theatrical productions on Broadway, New York City, you will receive absolutely free (except for shipping charges) thirteen episodes of the quarter-hour transcribed "Famous Fathers" programs, declares the Kermit-Raymond Corporation, 745 Fifth Avenue, New York City, in duplicate agreements which have been sent to NAB headquarters by several member stations. There is positively nothing wrong with the deal, if that is the way you like to "sell" your station time. But it looks to us as if "Liberty" magazine came off handsomely at the expense of radio stations.

STRAIGHT FROM THE SHOULDER

Robert Peterson of the Robert Peterson Advertising Agency, Daily News Building, Chicago, Ill., approaches member stations on two per-inquiry deals with complete candor. He asks three questions and if you answer them correctly, one or both of the deals is yours. A somewhat refreshing approach, but the same old offers without the semblance of new clothes. This one isn't worth a reply.

DON'T PLAY THE SUCKER

Several member stations have sent us copies of the form letter and announcements from Progressive Circulation Co., Inc., P. O. Box 9385, Station "S", Los Angeles, Calif., urging the broadcast of announcements seeking to sell subscriptions to the "Writer's Journal" on a per-inquiry basis. It's the same old gag in other words. From long experience in the direct-selling field, we doubt if one station in a thousand could pay out at card rates on this scheme.

McCRAY TO CENSORSHIP

Thomas C. McCray has been granted a leave of absence from his position as Assistant General Manager, in charge of all program and news activities, from Station WTIC, Hartford, Connecticut, to join the Broadcasting Division of the Office of Censorship, it was announced today by Assistant Director J. H. Ryan.

Mr. McCray has been with the Travelers Insurance Company, owners of WTIC, since 1920 and has been supervising the program and news departments of the radio station since 1926.

His duties with the Office of Censorship will include censoring short-wave material designed for export and he will be stationed in New York City, Mr. Ryan said.

Mr. McCray will report to the Washington office of the Broadcasting Division on February 8. He will remain there for a short time before taking up his duties in New York.

Simultaneously in Hartford, Paul W. Morency, General Manager of WTIC, announced that Leonard J. Patricelli, at present Assistant Program Manager, has been made Program Manager.

THIS HELPS INDUSTRY

Nineteen more important broadcast stations are telling listeners to transport sets requiring repair to the radio repairman. Other stations helping in this job have been printed in NAB REPORTS. During our war effort this conservation of manpower is extremely important.

KVAK—Atchison; WBEN—Buffalo; WDAY—Fargo; WOOD—Grand Rapids; WNOX—Knoxville; KRKD—Los Angeles; WALL—Middletown; WJAG—Norfolk, Nebr.; WOSH—Oshkosh; KOY—Phoenix; KOAM—Pittsburg, Kans.; W47P—Pittsburgh, Pa.; WPRO—Providence; KVOE—Santa Ana; KDRO—Sedalia; KRRV—Sherman; WTCN—St. Paul; WDZ—Tuscola; KWAT—Watertown; WTAG—Worcester.

WCAU OFFERS HOUR OF LAUGHTER

Following a discreet survey of listener desires in the Philadelphia area, WCAU came to the conclusion that what the public might like is a rousing afternoon show in which mirth and melody would predominate. Result: a 3:30-4:30 p.m. presentation, "Open House," Monday through Friday.

"Open House" means just what it says. The program schedules entertainment of all sorts—with spontaneity the keynote. It is the hope of its producers that it will at all times lean toward the unexpected or "surprise" elements in radio.

COFFEYVILLE'S TRIBUTE TO RADIO

Hugh Powell, Coffeyville, Kans., owner, KGGF, has forwarded the editorial appearing below from a recent issue of the Coffeyville Journal. It's printed in NAB REPORTS because it so appropriately expresses radio's contribution to the war effort.

The Radio Serves

"Some one in the industry has taken the time to figure that if Christopher Columbus had broadcast a one minute announcement promoting America every 10 minutes without interruption, 24 hours a day right down to the present time, he still could not have done the job American radio stations have done since that fateful day, Sunday, December 7, 1941.

"Since bombs fell on Pearl Harbor, a National Association of Broadcasters' survey shows, 25,048,400 minutes of radio time have been given by American radio stations to assist in sale of bonds, to encourage enlistments in the various armed services, help in scrap collection campaigns, Red Cross and community chest drives and in many other ways to promote the war effort.

"Which is a lot of time and effort. And for which no applause is asked, or desired. It was the patriotic duty of broadcasting stations, incumbent on them in their great mission to serve the public interest, convenience and necessity which is what their government enjoined on them when licenses were issued. The consciousness of duty done is all the reward any broadcaster wants, if this writer knows his fellows in the industry, and he thinks he does."

WPAR SOLVES A PROBLEM

When you have a good client, pleased with results, pleased with your station and completely satisfied with everything, but who also wants to reduce his radio time, you have a man-sized problem on your hands.

This "I have nothing to sell" problem seems to be plaguing a lot of stations. How Carl Loose, program manager, and George Clinton, station manager, WPAR, Parkersburg, W. Va., successfully handled this kind of a situation, makes good reading.

Their solution also illustrates the extra lift a station can give to the war effort right in the home community.

To begin with, the station's "1450 Club" was one year old in December, 1941. It came under sponsorship of the Storck Baking Co. right after Pearl Harbor—30 minutes daily, Monday through Friday. Program content of the 2½ hours per week is described lower down.

Content was appreciated by listeners to such an extent that membership in the club grew to 10,239 registered members in the first year of sponsorship. Mail returns were never less than 50 letters daily.

Came the day the sponsor said he had nothing to sell; when he feared that the 5 one-half hours a week would produce more sales than he could handle. Said he didn't want to go off the air entirely, but what he had in mind was something a great deal less.

By this time the boys at WPAR were pretty blue. The "1450 Club" was one of their best programs, actually their own baby.

Then Messrs. Clinton and Loose began exercising their gray matter to save the day. Told the client, in substance, "sell your complete line. This will relieve the pressure on 'over-sold' items and increase sale of items for which you have unused facilities. Let's give a gift coupon good for a cross-section of your products."

The baker tried it and liked it. Customers liked it, too. Mail has held up and letters are of a most flattering nature.

Nature of Program

Pattern follows the typical "Women's Club" with frequency of station the club name, "1450 Club."

OWI information is used, Treasury Song Parade, Local Scrap Drive and the like. There are clubs within the club with suitable identification as: "Service Mothers Club," a "Rumor Club" which attempts to squelch rumors, etc.

KMBC WAR EFFORT

KMBC, Kansas City, has just released an attractive brochure concerning the station's 1942 war broadcasting activities. A letter from Karl Koerper, station vice president, explains the methods employed.

For all of us, last year was one replete with readjustments predicated on gearing ourselves most effectively to the war effort.

This problem was approached here at KMBC from the standpoint of the area we serve. With this in mind, all material was rewritten and insofar as possible placed in the mouths of well-known station personalities with established audiences. Naturally, this required a tremendous number of man hours of planning and preparation—but, in our judgment, this was more than justified by the increased effectiveness of the entire effort.

SERVICEMAN FOLIO A HIT

The Radio Serviceman's draft deferment folio reached a number of spots at the psychological moment.

Says Otis Morse, manager, WSBA, York, Pa.:

"I thought that you would probably be interested in knowing the *immediate use* WSBA had for the NAB release concerning draft deferment for radio servicemen. The day after it arrived, our sales manager, Sydney Robbins, got in touch with several of the radio repair shops here in town and told them to contact WSBA when the draft board tapped any of their men on the shoulder. Within two days we talked to four servicemen and I spent last Friday afternoon helping to fill out Form 42-A for one of them. . . to my mind, it is just another example of the many fine services the NAB has always offered."

Wide Response

As a result or radio trade paper publicity radio servicemen in nearly every state have been mailed form 42-A (THESE ARE ALSO AVAILABLE AT LOCAL SELECTIVE SERVICE BOARDS) and extra copies of the folios previously mailed all stations.

In Omaha

In Omaha, Johnny Gillin, manager, WOW, distributed folios to 200 servicemen.

In Philadelphia

A mass distribution will be done in Philadelphia by William B. Caskey, WFIL business manager. Arrangements were made January 30 at an executive committee meeting of the Philadelphia Servicemen's Association.

SCHOOL BROADCAST AWARDS

Teachers throughout the United States are invited to enter the fourth annual cempetition in the use of radio in the classrooms, sponsored each year by the School Broadcast Conference, national radio education meeting primarily concerned with the utilization of radio in the schools.

Information regarding entries may be had from School Broadcast Conference headquarters, George Jennings, Acting Director, 228 N. La Salle Street, Chicago.

New Priority Order

Part 3037—Electronic Equipment

[Preference Rating Order P-133 as Amended Feb. 4, 1943]

§ 3037.5 *Preference Rating Order P-133*—(a) *Definitions.* For the purpose of this order:

(1) "Operator" means any individual, partnership, association, business trust, corporation, receiver or any form of enterprise whatsoever, whether incorporated or not, the United States, and the several states thereof, and any political, corporate, administrative or other division or agency thereof, to the extent engaged in any activity listed in Schedule A, hereof.

(2) "Material" means any commodity, equipment, accessory, assembly or product of any kind; exclusive, however, of automotive replacement parts as defined by General Limitation Order L-158.

(3) "Maintenance" means the upkeep of an operator's buildings, structures and equipment in sound working condition; and this, without regard to whether the expenditures therefor are for any reason required to be recorded in the operator's accounting records in accounts other than maintenance and repair.

(4) "Repair" means the reconstruction or restoration without expansion, improvement or change of design of any portion of an operator's buildings, structures and equipment when such portion has been rendered unsafe or unfit for service by wear and tear or other similar

causes, but not including reconstruction or restoration of any portion damaged or destroyed by fire, flood, tornado, earthquake, act of God or the public enemy; and this, without regard to whether the expenditures therefor are for any reason required to be recorded in the operator's accounting records in accounts other than maintenance and repair.

(5) "Operating supplies" means any material which is essential to and consumed directly in the operation of any of the services specified in paragraph (a) (1) above, but does not include photographic film, fuel, office or building supplies, or any material which is physically incorporated in whole or in part in the property or equipment of the operator.

(b) Assignment of preference rating. Subject to the terms of this order, preference rating of AA-2X is hereby assigned:

(1) To deliveries of material to an operator for operating supplies and for maintenance and repair.

(2) To deliveries to any supplier of material to be physically incorporated in other material required by an operator for operating supplies, maintenance or repair.

(c) *Persons entitled to apply preference rating.* The preference rating hereby assigned shall be applied where a preference rating is required to obtain material for maintenance, repair and operating supplies by:

(1) Any operator engaged in an activity in Schedule A hereof and may be applied by

(2) Any supplier, provided deliveries to an operator or another supplier are to be made by him, which are of the kind specified in paragraph (b) and have been rated pursuant to this order.

(d) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(e) *Restrictions on inventory and use.* The preference rating hereby assigned may be applied by any operator, provided:

(1) Such rating is not used to replace in inventory more than one spare tube for each active tube socket.

(2) Such rating is not used to replace in inventory any spare parts except:

(i) Those subject to frequent failure, deterioration or other exhaustion.

(ii) Those which are so unique that failure would inevitably result in long delay in resumption of essential operations.

(3) Such rating is not used in any case to increase the value of an operator's inventory of repair parts, other than tubes, above the value of such inventory on the date of this order.

(4) Such rating is not used to replace in inventory a new part if the defective part can be repaired with a smaller consumption of raw material.

(5) The tube which has been replaced from operator's inventory or for which replacement is requred has been operated to failure.

(6) The operator has returned to the manufacturer any power tube rated at 25 watts or more which has failed, unless such tube is to be repaired.

(7) Equipment which has failed has been operated within the ratings specified by the manufacturer.

(8) Such rating is not used to build up inventory of operating supplies other than tubes, in excess of requirements for a three-month period.

(9) Such operator was actively engaged in one of the activities listed on Schedule A hereof, on the date of issuance of the order, or has received specific authorization for his installation from the Director General for Operations of the War Production Board.

(f) *Application and extension of rating.* An operator or supplier, in order to apply the preference rating assigned by this order, shall endorse the following statement on the purchase order or contract for such material signed manually or as provided in Priorities Regulation No. 7 (§ 944.27) by an official duly authorized for such purposes.

CERTIFICATION

The undersigned purchaser hereby represents to the seller and to the War Production Board that he is entitled to apply or extend the preference ratings indicated opposite the items shown on this purchase order, and that such application or extension is in accordance with Priorities Regulation No. 3, as amended, with the terms of which the undersigned is familiar.

....
Name of Purchaser Address
By.................................... ....
(Signature and title of duly authorized officer) Date

(g) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(h) Records. All operators assigned a preference rating by or pursuant to this order shall keep and preserve for two years copies of all purchase orders or contracts applying such rating.

(i) Reports. All operators affected by this order shall execute and file with the War Production Board such reports and questionnaires as the War Production Board shall from time to time prescribe.

(j) Communications. All reports to be filed, and other communications concerning this order, should be addressed to War Production Board, Radio and Radar Division, Washington, D. C. Ref: P-133.

Issued this 4th day of February 1943.

CURTIS E. CALDER,
Director General for Operations.

SCHEDULE A

1. Radio communication, including broadcasting.
2. Sound recording for commercial purposes.
3. Radio direction finding.

EXECUTIVE ENGINEERING COMMITTEE

The following broadcasters make up the membership of the NAB Executive Engineering Committee:

John V. L. Hogan, Chairman, WQXR, New York
E. K. Cohan, CBS, New York, N. Y.
Franklin M. Doolittle, WDRC, Hartford, Conn.
O. B. Hanson, NBC, New York, N. Y.
G. Porter Houston, WCBM, Baltimore, Md.

The Committee held a meeting in New York City on January 27. Included in the discussion were the following subjects: training of replacement operators and technicians, availability of repair facilities for broadcast equipment and components, methods for the recruiting of new technical personnel, servicing of home receivers, consideration of standard coverage recommendations, priority regulations, batteries for farm radios, publicizing NAB recording standards and post war planning.

Much constructive progress was made through policy recommendations and outlining future activity of the Engineering Department.

FEDERAL LEGISLATION

HOUSE CONCURRENT RESOLUTIONS

H. CON. RES. 9 (BREHM, R-Ohio) DAYLIGHT SAVING TIME—To provide that the Act of January 20, 1942, establishing daylight saving time, shall cease to be in effect. Referred to Committee on Interstate and Foreign Commerce.

H. CON. RES. 10 (Cole, R-Mo.) DAYLIGHT SAVING TIME—To repeal Public Law 403, Seventy-seventh Congress, chapter 7, second session, and reinstate the standard time provided in the Act entitled "An Act to save daylight and to provide standard time for the United States," approved March 19, 1918, as amended. Referred to Committee on Interstate and Foreign Commerce.

HOUSE

H. R. 1562 (Marcantonio, A.L.-N. Y.) COMMUNICATIONS—To amend the Communications Act of 1934, as amended, to prohibit abandonment of communications facilities, increase the security of communications systems, and for other purposes. Referred to Committee on Interstate and Foreign Commerce.

H. R. 1570 (Scott, R-Pa.) (By request) COPYRIGHT —to amend the Act entitled "An Act to amend and consolidate the Acts respecting copyright," approved March 4, 1909, as amended. Referred to Committee on Patents.

H. R. 1571 (Scott, R-Pa.) (By request) COPYRIGHT —To amend the Act entitled "An Act to amend and consolidate the Acts respecting copyright," approved March 4, 1909, as amended. Referred to Committee on Patents.

STATE LEGISLATION

Arizona:

H. 107 (Mitchell, et al.) RADIO—ELECTIONS—To include radio broadcasts among the expenditures of candidates for office upon which there is no financial limitation.

California:

A. 1166 (Collins) MINORS IN RADIO—Relating to employment of minors in radio broadcasting and television studios. Referred to Committee on Labor, 1/28/43.

S. 423 (Burns) FALSE ADVERTISING OF FOODS —Author says this bill is a codification of the law on adulterating, mislabeling and false advertising of foods. Referred to Committee on Public Health, 1/25/43.

California:

S. 911 (Quinn) FOREIGN LANGUAGES BROADCASTS—New act relating to radio broadcasts in foreign languages. Referred to Committee on Judiciary, 1/31/43.

Kansas:

S. 86 (Griffith) CLARIFIES COPYRIGHT LAW— Clarifies the language of the copyright law and amends 57-206, 57-207, 57-209, G. S. Supplement, 1941, and repeals 57-202, 57-203, and 57-204, G. S. Supplement, 1941.

Nebraska:

B. 268 (Rakow) MUSICAL COMPOSITIONS COPYRIGHTS—Regulates issuance of licenses with respect to copyrights and public performing rights to musical compositions and levies tax of 3 percent on gross receipts of all sales and licenses for use, prohibits discrimination in price and repeals present law.

New York:

A. 436 (Ehrlich) (Same as S. 343) CHILDREN—EMPLOYMENT—Prohibits employment of children under 16 years in theatrical performances, circuses, motion pictures, radio broadcast performances, except church or school exhibition or amateur programs with written consent of education board or officials when in their opinion such performances are not harmful. Referred to Committee on Education, 1/26/43.

S. 343 (Hampton) (Same as A. 436) CHILDREN—EMPLOYMENT—Prohibits employment of children under 16 years in theatrical performances, circuses, motion pictures, radio broadcast performances, except church or school exhibition or amateur programs with written consent of education board or officials when in their opinion such performances are not harmful. Referred to Committee on Education, 1/26/43.

FEDERAL COMMUNICATIONS COMMISSION

SMALL STATION SITUATION

Questioned on the FCC's survey of the financial condition of small stations for last year, Chairman James Lawrence Fly said at his press conference early this week that he has a tentative report "but unfortunately a substantial number of stations (a minority but still a fairly substantial number) has been sluggish in getting the material in and we are not yet to the point where we can give the sort of analysis that we want to do. Just a few days ago we sent a follow up letter to the laggard group of stations asking them to get their material in."

The Chairman was asked if the Commission would make the study public when it was completed. "Yes, I think I will give you a statement," he said, and he commented further that "I will also continue to make public statements about what I am trying to do." Following this further the Chairman said:

"In fact I don't mind telling you now, as I have indicated before that I will consider my job simply to help the stations in any way I can and incidently I think to help the advertisers in getting their teeth into the problem and into the potential of this mode of advertising. I do hope to stimulate some responsible advertising in the field of the small and remote stations, and move into the background with the thought that the whole matter would be one of private business and private relations between the advertiser and the stations. All we would expect to do would be to furnish background information as far as it is available to us."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 8. They are subject to change.

Monday, February 8

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of license, **700 kc.**, 50 KW night, 500 KW day, unlimited, using W8XO transmitter.

Tuesday, February 9

Further Consolidated Hearing

WTNJ—WOAX, Inc., Trenton, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WCAM and WCAP.

WTNJ—WOAX, Inc., Trenton, N. J.—Modification of license, **1310 kc.**, 500 watts, unlimited, request facilities of WCAM and WCAP.

WCAM—City of Camden, Camden, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH1WTNJ and WCAP.

WCAM—City of Camden, Camden, N. J.—Modification of license, **1310 kc.**, 500 watts, SH-WCAP; request facilities of WTNJ.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.— Renewal of license, **1310 kc.**, 500 watts, SH-WTNJ and WCAM.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.— Modification of license, **1310 kc.**, 500 watts, SH-WCAM, request facilities of WTNJ.

Wednesday, February 10

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Modification of license, **1330 kc.,** 100 watts night, 250 watts day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted special service authorization (B3-SSA-65) for the period ending April 1, 1944, to operate on **1170 kc.** with power of 25 KW night, 50 KW until local sunset, unlimited time, employing a directional antenna at night, and using transmitter specified in construction permit (B3-P-2539) as modified.

WTNJ—WOAX, Inc., Trenton, N. J.; WCAM—City of Camden, Camden, N. J.; WCAP—Radio Industries Broadcasting Co., Asbury Park, N. J.—Adopted an order directing that the further hearing now scheduled for February 9, on applications of WTNJ, WCAM and WCAP, be held in Trenton, N. J., on that date instead of Washington, D. C., as heretofore scheduled.

DESIGNATED FOR HEARING

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Designated for hearing application (B2-MP-1684) for modification of construction permit (B2-P-3328) for extension of commencement and completion dates of new station.

MISCELLANEOUS

WALB—Herald Publishing Co., Albany, Ga.—Denied petition for leave to continue the further hearing from February 1 to March 15 on applications for renewal of license, construction permit, and voluntary assignment of license (Dockets 6398, 6399 and 6400).

KXEL—Josh Higgins Broadcasting Co., Waterloo, Iowa.—Granted license to cover construction permit as modified, for new station, and to move studio from Josh Higgins Bldg. to Insurance Bldg., Fourth and Franklin Sts., Waterloo (B4-L-1689); granted authority to determine operating power by direct measurement of antenna power (B4-Z-1422).

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1488).

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Granted modification of construction permit as modified, which authorized changes in directional antenna system and increase in power, for extension of completion date from February 3 to May 4, 1943 (B2-MP-1687).

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted license to cover construction permit as modified, for change of frequency, increase in power, install directional antenna for day and night use, and move of transmitter (B3-L-1744); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1485).

KGBK—Helen Townsley, area of Great Bend, Kans.—Granted further extension of relay broadcast station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than March 1, 1943 (B4-SRY-240).

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Granted further extension of relay broadcast station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than March 1, 1943 (B3-SRY-132).

The Commission has affirmed the decision of the Motions Commissioner in denying the petition filed by Herald Publishing Co. (WALB), Albany, Ga., for leave to continue the further hearing from February 1 to March 15 on applications for renewal of license, construction permit, and voluntary assignment of license (Dockets 6398, 6399 and 6400). The Commission provided further that the completion of the testimony of the witness Mr. Tounsley, should be postponed to 10:00 a. m., February 25, 1943. At the resumption of the hearings on February 1, counsel for Station WALB shall have opportunity to put on such further testimony as he may be prepared to present.

WHEB—WHEB, Inc., Portsmouth, N. H.—Denied special service authorization to operate from 7:00 a. m. to local sunrise during November, December, January and February, power 250 watts, for period ending February 1, 1944 (B1-SSA-58).

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted motion for postponement of hearing on application for modification of license to use 500 KW, from February 8 to March 9.

WGRC—Northside Broadcasting Corp., New Albany, Ind.; WKPT—Kingsport Broadcasting Co., Inc., Kingsport, Tenn. —Granted applicants' motion to dismiss without prejudice applications for construction permits (B4-P-2782 and B3-P-3308) and cancelled oral argument scheduled for February 3, 1943.

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Granted motion to dismiss without prejudice application for modification of construction permit to operate on **1000 kc.,** 50 KW, DA-unlimited.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted petition to continue hearing on application for modification of license from February 10 to April 12.

APPLICATIONS FILED AT FCC

590 Kilocycles

WOW—Radio Station WOW, Inc., Omaha, Neb.—Authority to determine operating power by direct measurement of antenna power.

690 Kilocycles

KGGF—Hugh J. Powell, Coffeyville, Kan.—Construction permit to install a new transmitter.

1000 Kilocycles

WINS—Hearst Radio, Inc., New York, N. Y.—Special service authorization to operate on **1000 kc.,** 1 KW power, unlimited time, employing directional antenna day and night at Near Kingsland, N. J. (site and antenna authorized under construction permit B1-P-3026, as modified) for the period ending 4-1-44.

WINS—Hearst Radio, Inc., New York, N. Y.—Authority to determine operating power by direct measurement of antenna power on special service authorization.

1150 Kilocycles

KTBC—State Capital Broadcast Assn., Inc., Austin, Texas.—Transfer of control of licensee corporation from A. W. Walker, Jr., R. B. Anderson and R. A. Stewart to Claudia T. Johnson (250 shares).

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—License to use formerly licensed composite main transmitter of WAAB as an auxiliary transmitter, with power of 1 KW.

1300 Kilocycles

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Modification of license to change hours of operation from shares time with WASH to unlimited time. Requests facilities of WASH.

MISCELLANEOUS APPLICATIONS

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Construction permit to move main transmitter from RFD No. 1, Dixie Gardens, near Shreveport, La., to Harts Island Road, near Shreveport, La.

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Construction permit to move auxiliary transmitter same address as above.

W2XMC—Muzak Corporation, New York, N. Y.—Modification of construction permit (B1-PEX-36, as modified, which authorized a new developmental broadcast station) for extension of completion date from 3-1-43 to 9-1-43.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Carlay Co., 160 East Illinois St., Chicago, and its president and treasurer, Carl A. Futter, is charged with misrepresentation in connection with the sale of a candy product known as "Ayds," sold in connection with so-called weight-reducing plans and recommended as a treatment or cure for obesity. (4898)

International Trading Corporation, 814 Second Avenue Building, Seattle, engaged in the import and export business, and its president, George W. Nelson, are charged in a complaint with disparaging two of their competitors by falsely stating that one is dominated by the German government and that the other is a Nazi sympathizer. The respondents, who have been particularly active in the importation of hardwoods from certain Asiatic countries, allegedly used the mails and other media to circulate the disparaging statements among their customers. (4865)

Thomas Leeming & Company—Dissemination of false advertising concerning the therapeutic value of a medicinal preparation designated "Baume Ben-Gay" is alleged in a complaint issued against Thomas Leeming & Co., Inc., 101 West 31st St., New York. The respondent recommends the product for external application in the treatment of various painful conditions of the body and advertises it over the radio and in newspapers, circulars and pamphlets. (4899)

Terminal Messenger Service and Pioneer Inheritance Service, Stuart Building, Lincoln, Nebr., are charged in a complaint with misrepresentation in connection with the sale of questionnaire letters and envelopes intended for use in obtaining information concerning debtors. (4897)

Washington Institute, 1230 Vance Building, Seattle, selling correspondence courses intended to prepare students for Civil Service examinations, is charged in a complaint with falsely representing that its business is connected with the United States Government. (4890)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Bates Shoe Co., Webster, Mass., manufacturing and selling shoes, has stipulated to cease and desist from the use, as a mark, stamp, brand or label for or in the advertisement of its products, of the name or private brand, or any simulation of the name or private brand, of a shoe manufacturer or dealer, the effect of which conveys the belief to purchasers that the products thus marked, branded or labeled are manufactured by or for the concern whose name is so used or that they had been manufactured in accordance with the specifications or pursuant to the instructions of such concern; from use of the word "Custom" either alone or in connection with the word "Made," or any word or words of similar meaning, as descriptive of products that are not, in fact, made to order of an indicated person or concern; from use of the words "Bench Made" as descriptive of products not made on a bench or as descriptive of machine-made products, and from use of the words "Lloyd, Ltd." or "British Brogue" or any other words customarily associated with the British Isles or any foreign country so as to convey the belief or impression to purchasers that the products are of British or an indicated foreign origin. (3602)

Granite Textile Mills, Inc., Midland Park, N. J., manufacturing and distributing towels and other textile products, has stipulated to cease and desist from the use of percentages or any other quantitative designations on labels or in trade literature attached to or used in connection with its towels or other products composed in part of linen and in part of cotton or other fiber or fibers, or composed in part of rayon and in part of cotton or other fiber or fibers, as descriptive of the fiber content of such products unless such percentages or other quantitative designations definitely and accurately disclose or set forth the correct percentage or proportion thereof; and from advertising, branding, labeling, invoicing or selling any product composed in part of linen and in part of other fiber or fibers without accurately designating and naming, in equally conspicuous type, each constituent fiber thereof in the order of its predominance by weight, beginning with the largest single constituent, such as "Cotton and Linen" for towels or other articles composed of cotton and linen, when the fibers named are present in substantial proportion, with cotton present in larger proportion than linen. (3600)

Great Northern Chemical Co., Inc., Oak Park, Ill., selling and distributing a so-called anti-freeze solution designated "No-Freeze" for use in automobile radiators, has stipulated to cease and desist from representing that the product is harmless to rubber hose or that its use will not result in or cause accelerated deterioration of rubber products with which it comes in contact, and that "No-Freeze" protects against overheating even in summer weather, or other representations of like import which tend to convey the belief that use of the product will assure against overheating of automobile engines and radiators in summer or mild weather. (3603)

Francis H. Leggett & Co., 27th St. and 13th Ave., New York, selling and distributing food products including a preparation designated "Premier Hollannaise," has entered into a stipulation in which it agrees to cease and desist from use of the coined word "Hollannaise," or other word or term connoting Hollandaise, either alone or in connection with other words to designate or describe a preparation, the fatty content of which does not consist wholly of butter and which is not made in accordance with the generally accepted recipe for Hollandaise sauce; and from representing directly or inferentially, that the combining of such preparation with any other ingredient or ingredients will result or produce Hollandaise sauce. (3601)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Alfred Kohlberg, Inc., 1 West 37th St., New York, selling and distributing laces and linen goods, has been ordered to cease and desist from certain misrepresentations of its lace products. (4604)

National Inheritance Service, 26 O'Farrell St., San Francisco, and O. F. Blaker, 4642 York Road, Baltimore, have been ordered to cease and desist from the use of unfair and deceptive acts and practices in connection with the sale and use of envelopes and form letters intended to be used by creditors and collection agencies in obtaining information concerning debtors. (4849)

1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 7, February 12, 1943

48-Hour Week

American industry, including radio, was ordered by President Roosevelt this week to go on a 48-hour week, with time and one-half for overtime above 40 hours.

The War Manpower Commission, entrusted with administration of the executive order, limited its immediate effect to 32 "labor shortage areas."

The Commission indicated, however, that the application of the order would be extended to a long list of areas where labor shortages were expected within six months.

Such a drastic and far-reaching order naturally found the War Manpower Commission unable to answer immediately all the questions that have arisen or to supply all the interpretations that have been asked for.

This will take time. However, the NAB is well aware of the many problems which will arise in the broadcasting industry as a result of the order and will supply to the entire industry all available material as it can be obtained. Individual questions will be welcomed and every effort will be made to obtain the answers.

The NAB Labor Executive and Wage and Hour Committees have been called for a joint meeting in Washington on February 23 to discuss industry policy on this matter. These committees will report to the NAB Board of Directors at its February 25-26 meeting in New York.

The idea behind the President's plan is to release for other work one man in every six who are now employed on a 40-hour week. The idea is *not* to require eight hours of boondoggling on anyone's part at time and one-half.

If six men are now working a 40-hour week, and one is released while the others go to a 48-hour week at time and one-half, the increase in payroll is about 8 per cent (provided, of course, that all six are employed at the same salary). The individual increase, from the employee's standpoint, is about 30 per cent.

The only WMPC interpretations to date have come in a series of questions and answers printed on page 67. A list of the "critical areas" is printed on page 68. The President's Executive Order is on page 69.

Industries in the 32 areas have been given until March 31 to make necessary adjustments, and have been specifically instructed not to discharge anyone before that date.

Local United States Employment Service officials may prove helpful, and should be consulted.

OWI ASKS NAB ASSISTANCE

The Office of War Information, International Division, has requested NAB to render necessary assistance to it in securing personnel for the government operated studios in New York City.

OWI, it will be recalled, assumed the responsibility for programming of the international broadcasting stations under an agreement with the private owners. Considerable difficulty has been experienced according to the officials in charge in securing even the very limited numbers now needed to make up their necessary personnel.

To avoid indiscriminate pirating of personnel from domestic broadcast stations, OWI now requests the assistance of the industry, through NAB, to meet an emergency situation. A survey of the personnel immediately required discloses that studio control engineers, recording engineers, transcription engineers, studio supervisors, studio master control supervisors, transmitter engineers, maintenance supervisors, maintenance men, designing and planning engineers and radio draftsmen are the categories in which a shortage exists.

These positions are open to both men and women and while experience is desirable those without it will be considered in the lower grades with opportunity for promotion.

NAB has agreed to present this problem to the industry with an appeal to station managements to make a careful survey of their present personnel to see if there are not on their staffs, individuals who could be made available to OWI. It is thought that this method of procuring personnel is far more advantageous from both the standpoint of OWI, as well as that of the domestic broadcast stations, than to permit a hit and miss process which would inevitably work great harm on a few stations which are now under-staffed.

We, therefore, make a strong appeal to station managements to carefully examine the foregoing list and to weigh it against their existing personnel to see if they could not possibly release one or more employees to assist OWI. The individual would, of course, have to be willing to work in New York City.

All detailed information regarding salaries, working conditions, etc., will be supplied upon inquiry addressed to NAB. If as a result of a study of their situation any station management is in a position to list a man or men as available, NAB should be advised.

The importance of this project should be apparent for unless through this cooperative effort on the part of OWI and NAB sufficient personnel is made available on a voluntary basis, it is obvious that to carry out its function, OWI will be compelled to resort to direct solicitation of employees which inevitably would produce great confusion and harm.

New Censorship Code

There is both "additional" and "subtraction" of restrictions in the second revision of the voluntary Code of Wartime Practices for the American Press and a similar code for American Broadcasters, announced today by Byron Price, Director of Censorship, a little more than a year after the two Codes originally were issued.

(Continued on page 56)

NEW CENSORSHIP CODE

(Continued from page 55)

The principal additions to the Press Code result from putting into print five special requests since the first revision was made last June to keep abreast of war experience.

One new clause surrounds the treatment of war prisoner information in this country. Another asks restrictions on "war intelligence or counter-intelligence operations, methods, or equipment . . . enemy codes or ciphers . . . use of secret inks or chemicals or detection of these; secret detection devices; secret means or systems of military communication."

Special requests as to news of diplomatic ships, news of forest fires, and for co-operation with Canadian censorship practices are the other additions from working experience of censorship in the last six months.

To the "General" clause of the Code is added a request that there be published no advance notice of the location of the President's broadcasts, and a request that no "secret war plans" be published.

The Code also has a clause explaining the responsibility of accredited war correspondents to seek censorship from the accrediting War or Navy Departments; makes an entire clause of previous sabotage restrictions, extended to transportation and public utilities; makes a new clause of the previous request for submission of all combat zone interviews by returned soldiers or civilians, plus a direction to newspapers how to edit letters from combat zones correctly; and adds to this a request for submission of all stories of escape from foreign territory.

A special note is introduced to explain with exactness the blackout to be placed around identities of military or naval units outside the country or in defense or embarkation stages.

On the "subtraction side," the Code has dropped all restrictions on publication of casualty information after this has been made known either by the military department or the next of kin; it releases from restrictions information about bomb shelters except when "specially constructed"; and it modifies the restrictions hitherto placed on war production in four instances.

There is no longer any mention of contracts between government agencies and war producers in the War Production clause. Experience has shown, Mr. Price said, that the government agencies have all the suitable controls they need over contractors to dispense or limit contract details for publication.

Secret war designs or formulas still are restricted, but the phrase "capable of adaptation for war production" has been dropped from the restriction.

There is no longer objection, except in the case of "secret weapons, designs, formulas or experiments," to publication of the exact type of war product. "Generalized" names previously suggested in the Code are out.

There is no longer objection to local or national war production "round-up" articles as long as these do not reveal production rate of a specific war product.

One other change may be in the nature of relaxation in certain cases. Where the Code has stated that any restricted matter may be published when "made available officially by appropriate authority," the revised Code says: " . . . made available for publication by appropriate authority."

This change, according to Mr. Price, is intended to register the intent of the Office of Censorship to establish that some agency or person suitably responsible has taken the responsibility for publication of otherwise restricted matter. "Officially" is too hard a word to define, and often implies "official" approval by an agency or person concerned where "no objection" without "approval" is really what is meant, the Director explained.

Inside the front cover of the revised Code is a direction which underlines previously published advice to bring all doubtful censorship press instances to the Office of Censorship. The new note says:

> "The Code of Wartime Practices is issued pursuant to instructions by the President, who commissioned the Office of Censorship to supervise domestic voluntary censorship.
>
> "You are reminded that whenever any one else, in any part of the country, makes a request which appears unreasonable or out of harmony with the Code, you are at liberty to appeal at once to the Office of Censorship. Much confusion would be avoided if such appeals were more frequent."

A new note on the cover of the Code says:

> "This Code covers everything published and circulated inside the United States—press, periodicals, magazines, books, news letters, report, directories, almanacs, trade and financial papers, and all else. This is the guide by which you are expected to censor your own operations. If in doubt, call, write, or telegraph the Office of Censorship, Apex Building, Washington, telephone EXecutive 3800."

In a foreword, notice is taken by the censors of "commentators and columnists." "All requests of the Code," it says, "apply to advertising matter, news letters, corporation and business reports, letters to the editor, personal and society news (which often discloses military or diplomatic movements or identity restricted herein), and commentators and columnists who deal both with news and circulated reports. The Code does not limit speculation or opinion. But use of any device of 'speculation' to disclose restricted information presents a hazard to voluntary censorship."

For the first time, the Press Code publishes an index of topics covered.

The News Section of the Broadcasters' Code has been revised to conform with the Press Code, with the exception that weather information is more severely restricted on radio. This suggestion, however, is the same as that contained in the June edition of the Broadcasters' Code.

Probably the most significant change affecting domestic broadcasters is the incorporation of new principles to guide foreign language station managers in their voluntary censorship efforts. A new section is added for this purpose. It outlines the responsibility of the Office of Censorship in surveying foreign language personnel on domestic radio stations.

"The Office of Censorship, by direction of the President," it says, "is charged with the responsibility of removing from the air all those engaged in foreign language broadcasting who, in the judgment of appointed authorities in the Office of Censorship, endanger the war effort of the United Nations by their connection, direct or indirect, with the medium."

This duty, the Code emphasizes, does not relieve the broadcast manager of his full responsibility to "employ only those whose loyalty he does not question."

Specific suggestions intended to assist broadcasters in this specialized field are incorporated in the section.

The Program Section of the Broadcasters' Code contains one new paragraph, dealing with simulated air raids and blackouts. It advises broadcasters not to employ their facilities during these simulated events in such a way that listeners would grow to depend on the radio for assistance in the event of an actual air raid. During an actual air raid stations in the affected area will be off the air by order of the area defense command.

Broadcast Advertising

NEW OPA RULES

Two new rules of the Office of Price Administration deserve careful study by radio station commercial managers and commercial continuity editors. These apply to manufacturers who quote the retail price of their merchandise in advertising.

The rules must be followed, OPA explained, since retail prices given in advertising of national or regional manufacturers or distributors cannot affect the ceiling prices of retail outlets handling the products. Here are the rules:

1. When a national manufacturer mentions the retail price of his product in newspaper, magazine, and radio advertisements, he need not include a statement saying that the retail price mentioned in the advertisement cannot be charged by retailers whose individual ceilings are below the price mentioned. But this rule has a qualification if the advertisement lists the names of the retailers selling the product at the advertised price.

In case the names of the retailers are listed in an advertisement giving the retail price, the manufacturer sponsoring the advertisement is himself responsible for a violation if the retailer in selling at the advertised price exceeds his own maximum price, unless the advertisement itself contains a statement that the mentioned price cannot be charged by any named outlet whose ceiling is below the mentioned price. Of course, a retailer who sells above his ceiling is guilty of a violation even if he sold at a price mentioned in the producer's advertising.

2. When a manufacturer sends a retailer "copy" which mentions the retail price to be used in advertising the manufacturer's products for sale in the retailer's store, the manufacturer should notify the retailer that he can use the "copy" with the mentioned retail price only, if the mentioned price does not exceed the retailer's ceiling. Only if the manufacturer gives this notice to the retailer does he free himself of any responsibility in case the retailer violates his own ceiling by selling at the mentioned price.

DON'T GO FOR PEPGO

Several member stations have sent in the letter and folder from Solis S. Cantor, 1600 Walnut Street, Philadelphi, Pa., urging broadcasters to present a schedule for PEPGO Battery Chemical Treatment on a per-inquiry basis. Apparently aware that the basis on which he proposed this advertising is unethical and forbidden by the NAB Code, Mr. Cantor coyly seeks to clinch the deal in a postscript that assures the broadcaster "if you would wish us to keep any transaction that may transpire between us on a confidential basis, you may be assured of our cooperation." As several of the stations pointed out in sending this material to NAB, the product is promoted through such extravagant claims that any station considering this advertising on a rate-card basis should satisfy itself that the claims are fully substantiated and not liable to FTC action.

YOU WON'T NEED A MONEY BELT TO KEEP THE MONEY YOU WON'T MAKE

In the course of a letter, urging broadcasters to offer a money belt on a per-inquiry basis, Paul Grant, 520 N. Michigan Avenue, Chicago, Ill., writes:

"We ran on to one the other day—a Money Belt—about which there was considerable controversy here in Chicago." Right now there appears to be controversy about the subject from coast-to-coast, from Canada to Mexico. Presumably to be fair to all broadcasters, Mr. Grant apparently sent his letter to every radio stations in the United States.

All should send Mr. Grant the same reply: "We don't take business on a per-inquiry basis. Broadcasting is well established as an advertising medium. If the merchandise or service you are offering is something the public wants, you can well afford to buy time at card rates, for broadcasting will give you good advertising value for every dollar you spend."

ANOTHER WAR SERVICE RECORD BOOK TO SELL ON A PER-INQUIRY BASIS

In the "NAB REPORTS" for January 15, 1943, we reported the offer of a "Record of Service" wall certificate to various radio stations on a per-inquiry basis. Several member stations have sent in letters and folders regarding a "War Service Record" book from Weston-Barnett, Inc., Waterloo, Iowa. From outside sources we learn that this record book does not pull well with very few exceptions. Why waste valuable station time and talent trying to promote something which has so little chance of paying out?

DEFERMENT FOLIO APPRECIATED

WOW—Omaha

As a result of a two weeks' spot campaign some 45 radio servicemen in Nebraska, Iowa, Missouri, and Kansas sought complete information from station WOW, Omaha, on the possible deferment of radio repairmen. According to Assistant Manager Harry Burke, "The men are very grateful for this service. In most cases we find that this information is not available at local draft boards."

WPDQ—Jacksonville

Frank Taylor, Jr., business manager, WPDQ, Jacksonville, Fla., is another who used Occupational Bulletin No. 42 folio to good advantage. Servicemen were very appreciative of this help.

WTAR—Norfolk

J. L. Grether, technical director, WTAR, Norfolk, Va., has been helping local servicemen fill out their occupational classification affidavits. Put to good use was the folio of facsimile letters forwarded by NAB.

ISSUE WAR BULLETIN NO. 13

NAB War Bulletin No. 13, dated February 12, has been mailed all stations. It is concerned entirely with wartime maintenance of home radios.

Bulletin contains statement by Frank McIntosh, Domestic & Foreign Radio Section, Radio & Radar Branch, WPB, that ample tubes and parts would be provided; also details of the Philco Radio & Television Corporation plan of wartime service operation.

Said R. F. Herr, Philco vice president, . . . "Our obligation (for maintaining radios) is therefore two-fold, to our government and to the millions of radio families. We of Philco pledge ourselves to do whatever it takes to do the job."

DAYTIME SERIALS

The virtues of radio daytime serials far outweigh their shortcomings, it was declared this week by an advisory committee of three well known physicians recently appointed by NBC to study the morale qualities of network broadcasting.

A scientific evaluation of daytime serials demonstrates, the physicians reported, that they feature problems which are essentially the problems of ordinary American life. The tendency of daytime serials is towards solutions generally accepted as ethical in present society and hence, the committee found, their effects are helpful rather than harmful.

"They seem to fill a real demand for a public of considerable size and their shortcomings are heavily overweighed by their virtues," said the committee in a preliminary report on the daytime serials.

The committee was headed by Dr. Morris Fishbein, editor of the Journal of the American Medical Association and a leader in the field of public health. The other members were Dr. Henry R. Viets, noted Boston neurologist and lecturer on neurology at the Harvard Medical School, and Dr. Winfred Overholser, a well known psychiatrist.

FCC SURPLUS EQUIPMENT CATALOG

As stated in the FCC Notice to all Radio Station Licensees (Serial No. 60) dated November 20, 1942, it was the original intent of the Commission to provide each licensee with a copy of the complete catalog. However, the material listed is so voluminous, approximately 1,100 pages, that this procedure is entirely impractical.

Copies have been located at strategic points throughout the country where the catalog may be inspected by stations in need of materials. According to the Commission,

> "Persons interested should inspect the lists in person and not attempt to correspond with the Commission or the stations in custody of the lists as these include thousands of items and such correspondence is entirely impractical and would constitute an unreasonable burden."

As a service to all broadcast stations the NAB Engineering Department will answer promptly inquiries concerning equipment listed in the catalog. There will be no charge for this service. When requested, replies will be made by collect telegraph. Please do not telephone.

The 1,100 page catalog is a Treasure Chest "chuck full of" essential replacement material and will become increasingly valuable as existing equipment deteriorates.

To indicate the scope of the catalog, there are, for example, 1402 listings of vacuum tubes in quantities varying from 1 to 100 tubes per listing. This is a lot of tubes in any man's language. The offering of some other items is comparable. The FCC catalog is a major contribution to wartime conservation. Use this new NAB service and make the most of the national inventory.

BOARD MEETING

Neville Miller has called a meeting of the NAB Board of Directors for February 25-26 at the Roosevelt Hotel, New York.

LABOR CONTRACTS

Approximately 50 per cent of the NAB members have answered the Labor Relations Department's letter of January 6 asking (1) whether members had any contracts with labor unions and (2) for copies, if any. If you have delayed your answer to this important request, please send it as soon as possible.

NETWORK RULES ARGUMENT

Radio station rights are being denied, not regulated, by proposed orders of the FCC, the Supreme Court was told on Wednesday by John T. Cahill, arguing for NBC asking a court denial of FCC authority.

The attempted regulation of the business operation and network broadcast contracts of a radio station were likened by Mr. Cahill to the situation facing newspapers, due to the shortage of newsprint. He pointed out that Congress has enacted a law setting up a Newsprint Allocation Board authorized to license the use of newsprint to newspapers according to "the public interest, convenience, or necessity."

If this Newsprint Board should promulgate an order that no newspaper shall get newsprint if it continues to have a contract with the United Press or with Syndicated Features, Inc., it would be paralleling the proposed orders of the FCC with regard to radio stations, Mr. Cahill urged.

Such an order by the Newsprint Board would be a clear departure from the objectives of Congress in creating the Board, and the same is true of the FCC order with regard to radio stations, Mr. Cahill argued.

"Congress has stated that the traditional freedom of the press is fully applicable to radio," said Mr. Cahill. "Ours is the first generation to fight the perennial battle of freedom on this new front. Unless the same vigilance is applied to freedom of radio as former generations applied to freedom of the press, one of our most sacred rights will be lost."

Mr. Cahill also pointed out that the District Court in New York, which ruled in favor of the FCC, admitted in its opinion that the proposed regulations "do fetter the choice of the stations (with regard to network contracts); do therefore coerce their choice and their freedom", but still held that this created a problem that does not come under the free press and freedom of speech provision of the Constitution.

"The District Court thus not only accepted the vague and undefined nature of the power asserted by the Commission, but went on to admit that the Commission directly coerced freedom of speech over the radio", said Mr. Cahill. "Instead of drawing the only conclusion compatible with the command of the First Amendment—that such a power does not exist—the District Court upheld the power because the Commission proclaimed that it acted in the name of free speech".

Another point raised against the Commission order by Mr. Cahill was that the FCC claimed authority for its orders in the wording of Paragraph i of Section 303 which has to do entirely with technical matters concerning radio stations, their power and wavelengths, and makes no reference to licensees who are directly affected by the orders.

"Although Section 303 (i) has been a part of the law governing radio broadcasting since 1927, there has been no previous attempt to construe it as other than technical," Mr. Cahill said.

The attorney for NBC, both in a ninety-eight page brief he submitted, and in his oral presentation to the Supreme Court, appealed particularly against the FCC order which prevents a station from definitely optioning part of its broadcast time to a radio network organization for the purpose of selling it.

"Without option time there could be no competitve nationwide network broadcasting," said Mr. Cahill. "Cohesive network organizations able to compete with other advertising media or with one another, could not exist."

Contracts for affiliation of radio stations with NBC allow the network to sell only part of the stations' time in the morning, afternoon and evening, the Supreme Court was told. It was shown that these contracts give the stations plenty of time to handle whatever local programs they feel are necessary in the public interest. At the same time, a network must have an option on certain periods of time in order to sell the stations' facilities to an advertiser, or there would be none of the fine, expensive network programs, Mr. Cahill pointed out.

"Unless the requisite national circulation can be guaranteed to the national advertiser, he will not use network broadcasting," said Mr. Cahill, pointing out that while about one-third of the total radio broadcasting time in America is paid for directly by advertisers, this one-third supports the wide variety of public service and sustaining programs covering the remaining two-thirds of the broadcast day.

"The FCC order represent a frolic and a detour, as it were, into the field of business practices, competition, and the meaning of the anti-trust laws," said Mr. Cahill. He argued that if option time is lost for network operation, only the best stations in each area will carry national advertising; existing networks will no longer have either the incentive or the funds to produce their existing schedule of sustaining programs; the revenues of smaller stations will be so reduced that they will be unable to afford even the cost of wire lines to get outside programs, let alone the production of sustaining programs.

"Irreparable injury to the present radio service would result if the FCC order becomes effective," Mr. Cahill said, pointing out that in its hearings before issuance of the orders, only a small part of the testimony had to do with affiliation contracts of stations or option time, and even that was addressed to explanation rather than to defense. Mr. Cahill also pointed out that the Commission in its investigation did not even request the presence of national advertisers who alone support network broadcasting.

Mr. Cahill urged the Supreme Court to set aside the lower court approval of the FCC regulations, on the ground that they were issued "in utter disregard of the stated functions of the FCC."

Court cases cited by Mr. Cahill to show precedents for setting aside orders of regulatory commissions that exceeded their authority, included the famous Osage Indian case where the Commissioners sought to limit the amount of oil revenues to be paid to Indian children; and the Commerce Department's attempt to write a regulation on the importation of tea, which exceeded its authority.

FCC APPROPRIATION

A total of $7,609,914 is included in the bill for this agency, which is $223,279 more than the 1943 appropriation and $479,686 less than the Budget estimates. The committee has approved the Budget estimate of $2,000,000 for regular activities, which is the amount of the 1943 appropriation, and has allowed the total amount provided for the current year for national-defense activities, plus such sums as are necessary to place certain personnel in the Foreign Broadcast Intelligence Service, departmental and field, and the law department (departmental) on a full-year basis. The committee has added $227,279 to the 1943 appropriation for this purpose and has denied additional funds requested for the expansion of other services.

The committee calls attention to the provisions in the bill providing $27,840 for a hemisphere communications unit and $206,160 for a war-problems division, under the law department. The committee has not eliminated these funds because they are requested as a national-defense measure, but it does regard the value of such projects with some skepticism and recommends that the Commission carefully consider the desirability of discontinuing them.

Excess Profits Tax

NAB tax counsel, Ellsworth C. Alvord, has prepared a memorandum to assist broadcasters in preparing their excess profits tax return. This memorandum, together with a statement by Internal Revenue Commissioner Guy T. Helvering, and data on "Constructive Average Base Period" prepared under the direction of the NAB Research Committee, follows:

EXCESS PROFITS TAX RELIEF

Did you begin business after 1939, or even after 1934 or 1935? Did you, from 1934 or 1935 to December 31, 1939, become a member of a network or change your network affiliation, change your management, adopt an important technological improvement, change your broadcast frequency, step-up your power out-put, benefit from the use of directional antennae, change from a part-time to a full-time program, or undergo any other change causing the years 1936 to 1939, in whole or in part, to be unrepresentative of your normal earnings level? Or were there any interruptions in your operations during the base period attributable to abnormal events such as fires, floods, strikes, etc.? If, for any of these reasons, your base period experience was abnormally low or if you had no base period experience because of having been organized since 1939, you should be interested in the possibilities of relief under section 722 of the Internal Revenue Code in connection with your excess profits taxes. That section may enable you to increase your excess profits credit substantially, thereby reducing the amount of income on which excess profits taxes must be paid. Ignoring special provisions such as the post-war credit or refund, the net saving in taxes should be 50% of the amount by which you are able to increase your credit, since the effect of such an increase will be to subject an equivalent amount of income to tax at only 40% in lieu of 90%.

The nature of this relief and the types of situations in which the section operates, are explained below.

APPLICATION OF SECTION 722 OF THE INTERNAL REVENUE CODE TO THE RADIO BROADCASTING INDUSTRY

I—Function of Section

The function of section 722 will best be understood from a brief review of the structure of the Excess Profits Tax Act, with particular reference to the credits allowed against excess profits net income in the determination of the amount subject to the tax.

Basically, the excess profits tax is intended to be imposed only on *excess profits*. Under the statute excess profits are, roughly speaking, the excess of the taxpayer's excess profits net income (the special rules for the computation of which are not pertinent here) over the taxpayer's excess profits credit. A domestic corporation in existence prior to January 1, 1940 has two alternatives open to it in the way of excess profits credit: (1) The excess profits credit based on income, commonly known as the average earnings credit; and (2) the excess profits credit based on invested capital. A domestic corporation not in existence prior to January 1, 1940, and not an acquiring corporation under Supplement A, may use only the excess profits credit based on invested capital.

The average earnings credit is based on the corporation's earnings experience for the four years 1936 through 1939. Various special rules are provided to reflect growth and to lessen the burden of a single low income or loss year, but in general 95% of the average of the income for the four base period years is used as the basis for the credit. To this amount is added 8% of any net capital additions since the close of the base period or subtracted 6% of any net capital reduction since such date. The credit is based upon the theory that "the period from 1936 through 1939 represents a period of moderate prosperity for business in general" (Sen. Rept., p. 199), and that, therefore, the average earnings for such period represents a fair reflection of normal peace-time earnings.

The excess profits credit based on invested capital is 8% of the first $5 million of invested capital, 7% of the next $5 million, 6% of the next $190 million, and 5% of anything above $200 million. Various complicated special rules are provided for the computation of invested capital. In general, it consists of the tax basis of assets paid in for stock, plus accumulated earnings and profits, plus 50% of borrowed capital. The credit is intended to permit a corporation a reasonable return on its investment, before being subjected to excess profits tax. By reason of the arbitrary nature of the computation, however, and the fact that invested capital is frequently not the substantial income-producing factor, this credit fails in many cases to afford a fair measure of normal earnings. The radio industry is a typical example of the case where individual initiative and ability, goodwill developed through operations, and similar factors which may not be reflected in invested capital account primarily for the earnings produced.

It is obvious that, whatever may be said of this system of credits in the general run of cases, there are bound to be many instances in which such purely mechanical rules will fail to reflect normal earnings and will, therefore, produce extreme hardship. In the case of a given taxpayer the years 1936 through 1939 may be completely unrepresentative. The corporation may have commenced business too late to permit a fair reflection of its normal earning capacity during the base period. Changes in the character of the business may have occurred which caused the enterprise as of the close of the base period to be quite different from that during one or more years of the base period. Abnormal events may have existed in the years 1936 through 1939 which completely destroy those years as a criterion of the tax-payer's normal earning power. Obviously, it is desirable to provide an additional opportunity to the taxpayer under such circumstances to demonstrate what may reasonably be considered to be a fair and just amount representing its normal earnings.

The same may be said of a taxpayer which is not entitled to use the average earnings credit because of nonexistence prior to January 1, 1940 and is, consequently, limited to the invested capital credit. Many such taxpayers find the latter credit completely inadequate and inappropriate, particularly in the case where capital is not a material income-producing factor. Since the fundamental credit concept is that of normal earnings, an adequate opportunity should be given to the new corporation to establish what its normal earnings are or would be in the absence of war conditions and such a taxpayer should not be arbitrarily compelled to rely solely on the invested capital credit in computing its excess profits tax.

The function of section 722 is to provide such an opportunity to any taxpayer which can establish that the excess profits tax computed under the mechanical rules above described results in an excessive and discriminatory tax. In other words, this section provides for a constructive average base period net income in those cases in which the actual base period net income is not fairly representative of the taxpayer's normal earning power, or where the taxpayer is not entitled otherwise to use the earnings credit and the invested capital credit is demonstrably inadequate.

II—Grounds for Relief

(a) General Pre-requisite to Relief.

In order to be entitled to relief under section 722 the primary facts which the taxpayer must establish are:

(1) That the excess profits tax, computed without regard to section 722, results in an excessive and discriminatory tax, and

(2) The amount which would be a fair and just amount representing normal earnings to be used as a constructive average base period net income.

The circumstances in which the excess profits tax is considered to be excessive and discriminatory are set forth in subsections (b) and (c) and are discussed below.

The section provides that, in computing such constructive earnings, events or conditions subsequent to December 31, 1939 must be ignored except to the extent necessary to reflect (1) a change in the character of the business permitted to be taken into account even though not fully completed until after December 31, 1939, and (2) the nature of the business of a taxpayer not organized until after December 31, 1939.

(b) What Constitutes a Discriminatory Tax in the Case of a Domestic Corporation Organized Prior to January 1, 1940.

Relief is granted to domestic corporations organized prior to January 1, 1940 if their actual average base period net income is an inadequate standard of normal earnings because of any one or more of the following circumstances:

(1) *Normal production, output, or operation during any part of the base period was interrupted or diminished because of the occurrence, during or immediately prior to the base period,* of events unusual and peculiar in the experience of such taxpayer.*

The type of event or circumstance for which relief is intended to be granted under this paragraph is primarily a physical rather than an economic event or circumstance. A fire, a flood, or a strike would be within the scope of this provision. In the case of any corporation experiencing such an event, both the immediate results and the after-effects should be taken into account. For example, a prolonged strike would not only cause the taxpayer to be completely or partly inactive during the period of the strike itself, but might have caused a temporary set-back in the business, the effects of which were felt for some period after the strike was concluded.

(2) *The taxpayer's business was depressed in the base period because of temporary economic circumstances unusual in the case of such taxpayer or because it was a member of an industry which was depressed on account of temporary economic circumstances peculiar to such industry.*

As a general rule, ordinary economic hazards to which business in general is subject, such as high costs of production, or low demand, or low selling prices for taxpayer's product, do not afford ground for relief. This classification of hardship cases deals primarily with distortions of base period income by reason of temporary economic circumstances peculiar to the taxpayer's business or peculiar to the industry of which it is a member. For example, a price war may have been carried on within an industry during the base period, affecting the earnings of the entire industry. On the other hand, although the industry's experience during the base period may have been normal, a particular member thereof may have suffered losses or a reduction in earnings by reason of events peculiar to it. For example, business may have been carried on with a single customer who, at sometime during the base period, decides to manufacture his own product. The base period would represent a period of development of new business rather than a period of normal operations (Sen. Rept., p. 199).

(3) *Owing to conditions generally prevailing in the industry, the taxpayer's profit cycle differs from the general business cycle or its earnings are sporadic, with the result that the base period does not represent a period of average normal profits to the same extent that it does for business generally.*

This paragraph seems wholly inapplicable to the radio broadcasting industry.

(4) *Either during or immediately prior to the base period, the taxpayer commenced business or changed the character of its business and the average base period net income does not reflect the normal operation of the business so commenced or changed for the entire base period of such business.*

---

* See discussion under III below for meaning of phrase "immediately prior to the base period".

This test presents a more varied subject-matter than any of the others and will be discussed in detail under a separate heading.

(5) *Any other factor, consistent in principle with the foregoing, which prevented the base period earnings from representing an adequate standard of normal earnings.*

This test is designed to insure that corporations which do not meet the strict eligibility requirements set forth in other parts of the section will not be debarred from relief if their cases are within the spirit of the statute and if its application would not be inconsistent with its principles, conditions, and limitations. An example of the application of this paragraph is that of a business involved in the manufacture of a product requiring an extensive period for preparation or manufacture, and which had no stocks of such product on hand at the commencement thereof.

(c) What Constitutes a Discriminatory Tax in the case of a Domestic Corporation organized after December 31, 1939.

This category embraces newly organized corporations which, except for section 722, would be forced to rely exclusively on the invested capital credit. The tax in the case of such corporations is considered to be excessive and discriminatory if the invested capital credit is an inadequate standard for determining excess profits for any one or more of the following reasons:

(1) The business of the taxpayer is of a class in which intangible assets not includible in invested capital under section 718 make important contributions to income;

(2) The business of a taxpayer is of a class in which capital is not an important income-producing factor; or

(3) The invested capital of the taxpayer is abnormally low.

If a business qualifies under this heading, it is permitted to construct an average base period net income, which may be used as a substitute for the invested capital credit. Provision is made for avoiding duplication between capital additions as such and the reflection of such items in the constructive average base period net income.

III—Changes in Character of Business

As already pointed out, relief is granted under section 722 in cases where the taxpayer, during the base period or immediately prior thereto, commenced business or changed the character of its business.

As illustrative of what the term "change in the character of the business" is intended to embrace, the statute itself lists the following examples:

(1) A change in the operation or management of the business;

(2) A difference in the products or services furnished;

(3) A difference in the capacity for production or operation;

(4) A difference in the ratio of nonborrowed capital to total capital;

(5) The acquisition before January 1, 1940 of all or part of the assets of a competitor, with the result that the competition of such competitor was eliminated or diminished.

The rule that the change in the character of the business must have occurred during or immediately prior to the base period is relaxed in one respect: Any change in the capacity for production or operation of the business consummated during any taxable year ending after December 31, 1939 as a result of a course of action to which the taxpayer was committed prior to January 1, 1940, is deemed to be a change on December 31, 1939 in the character of the business. Such a commitment need not, however, take the form of a legally binding contract. It may take the form of the expenditure of money at the commencement of the desired changes or other alterations in position unequivocally establishing the intent to make the change. It is contemplated, however, that a change of this character will not be taken into account in determining the constructive average base period net income for credit purposes until the excess profits tax year in which such change was completed. (Sen. Rept., p. 202) Presumably, the word "completed" in this connection will be given a broad enough construction to justify taking into account those parts of a large project which may have been completed in years prior to the completion of the entire project as a unit. Furthermore, it is apparently intended that some flexibility will be employed in the determination of the extent to which such a change will be taken into account in computing average base period net income for the statement is made in the Committee Report that the extent to which the new facilities enter into the business of the corporation for the taxable year shall be considered to be the extent to which the character of the business was changed on December 31, 1939.

In determining whether a change of business antedating the base period occurred "immediately prior to the base period," no arbitrary temporal limitations control. The test is whether under normal conditions the effect of the change would not be manifested until sometime after the beginning of the base period and would be directly related to the change. (Sen. Rept., p. 200) The same principle would presumably apply with respect to a commencement of business prior to the base period.

An important feature of section 722 is the two year date-back provision. The section provides that in the case of commencement or a change in the character of business occurring during or immediately prior to the base period, if the business did not reach the earning level by the end of the base period which it would have reached if the business had been commenced or changed two years earlier, the commencement or change shall be deemed to have occurred at such earlier date. The purpose of this provision is to afford to growing corporations an opportunity to reflect in its constructive earnings for the base period the results of growth that otherwise would fall outside the base period.

In determining whether the corporation would have reached a higher earnings level at the end of the base period if the commencement or change of business had occurred two years earlier, consideration is to be given to the business experience of the taxpayer and to its prospects at the end of the base period. Events occurring or existing after December 31, 1939, cannot be considered. Accordingly, the operation of the date-back provision will not necessarily reflect as of the end of the base period the earnings level actually reached at the end of the second year following the base period. It may be lower or higher, depending on whether the war period has been favorable or unfavorable to the taxpayer's business.

IV—Potentialities of Section 722 in the Radio Broadcasting Field

The potentialities of section 722 in the radio broadcasting industry are substantial and warrant a careful examination of its possibilities by every member of the industry. While the particular event, circumstance, or situation which may form the basis of any given taxpayer's claim can be determined only in the light of that taxpayer's own experience, there are a number of broad categories of typical situations in the industry which, if borne in mind, will serve to organize the examination of a particular case and narrow its possibilities. Particular attention should be given to the following:

(1) *Commencement of business.*—(a) *Since 1939.*—Section 722 should be available in most instances to new radio broadcasting corporations which have commenced business since the end of the base period and which would otherwise be dependent upon an invested capital credit. Such corporations ought to be able to satisfy all three tests laid down in such cases. The broadcasting business is an excellent example of a business in which invested capital is not the principal income-producing factor. The location of the station, the power and frequency al-

lotted to it, the efficiency of the management and the caliber of the programming are some of the substantial contributing factors. Compared with the potential earning capacity of a station, the amount of capital required for equipment and operations is relatively small. Consequently, the new companies should make every effort to establish a constructive base period earnings credit under section 722 which will afford them a much fairer measure of normal earnings than mere return on invested capital. Such corporations will probably encounter some complications in establishing what their earning capacity would have been had they operated on a comparable basis in the same area during the base period, giving attention to geographical location, power output, frequency, and other relevant factors of a specific nature. However, the general business conditions prevailing in the industry during such period are well known, and comparisons with other stations operating during the base period (which will be one of the principal standards in these cases) can readily be drawn .

(b) *During or immediately prior to the base period.*—Many companies which began business prior to 1940, but during or immediately prior to the base period, will also find section 722 beneficial. Vacant years in the base period are, apart from section 722, given an excess profits net income based on the invested capital principle. Section 722 will enable the taxpayer to substitute a hypothetical experience more nearly in line with normal earnings. Careful calculations should be made, however, for in many instances a low base period experience in the first half of the base period will be of greater advantage, coupled with the use of the growth formula, than a constructive credit under section 722. This is most likely to be true if the taxpayer actually reached its normal earnings level prior to the close of the base period, and is therefore deprived of the benefits of the two-year date-back provision already described. The important factor will generally be whether substantial increases can be made in the excess profits net income for the second half of the base period.

(2) *Changes in management.*—Changes in management are particularly significant in their effect upon earnings in any industry where, as in the radio broadcasting industry, the personal ability and judgment of those running the business play so important a part in attaining results. In many instances it will be a relatively simple matter to demonstrate that the company's improved earnings are attributable to such a change. Where the case is clear as to cause and effect, relief should be available under section 722 even though it will probably be impossible to prove the effect on earnings with mathematical certainty. The two-year date-back provision may operate to produce a credit which can not be obtained under other provisions of the statute.

(3) *Strikes, fires, etc.*—The individual stations may find that one or more events of a physical nature, such as strikes, fires, etc., may have occurred in the base period and resulted in depressing their earnings for one or more base period years. Distortions in base period income can be corrected under section 722. It should be pointed out, however, that if the company is using the normal growth provision under section 713, such a correction may not produce an increased credit if the distortion occurred in the first half of the base period. If in the last half, the advantages of the correction are obvious.

(4) *Increases in capacity.*—It is doubtful whether mere lack of physical facilities for handling available business will afford grounds for substantial relief in many cases. However, increases in the power of the station, the development of networks and other factors may be extremely important. The importance of these factors, which are more properly classified under changes in methods of operation, are considered further below.

(5) *Technological Developments.*—Any significant technological development in the radio field, from the point of view of either sending or receiving, should be carefully investigated to determine whether there has been any appreciable upturn in business or decrease in expenses following the adoption of such improvement which can be attributed thereto. If such changes have occurred since the beginning of the base period, their effect upon net earnings for the entire base period should be reflected in the constructive earnings under section 722. Statistics relative to the industry as a whole may prove the most helpful source of supporting data.

(6) *Mechanical improvements in individual stations.*—The installation of directional antennae, increases in power, and changes in frequency have contributed substantially to the earning capacity of many stations since the beginning of the base period. These improvements will usually be directly reflected in earnings through increases in time charges and in the attraction of new advertisers whose business requires reaching a listening public in outlying districts. In some instances, such changes have been responsible for a station's going on a full-time, rather than part-time, basis. Stations which have been developed along these lines should give careful consideration to the possibility of obtaining relief under section 722.

(7). *Development of networks.*—The developments in the national and regional network systems which have occurred since 1936 (or "immediately" prior thereto) have had a substantial effect upon the earning capacity of those stations which have participated therein. The development of the network system by the initiating corporation results in an increase in its capacity. The joining of the system by the affiliated corporations represents a change in method of doing business, or in method of operation. In either case the change unquestionably falls within the classification of a "change in the character of the business" within the meaning of section 722.

Almost invariably earnings have been enhanced thereby. Both the initiating company and the affiliate are put in a position to offer a more valuable service to the public, and, therefore, to their advertising clientele. Clientele, rate structures, and costs, all of which are basic factors that contribute to the determination of net income, are affected by the change from local broadcasting to broadcasting as a part of a network system. Consequently, in cases of this type, the reconstruction of base period earnings may be essential in order to obtain a fair measure of normal profits from network operations.

(8) *Other Possibilities.*—It is not believed that any relief can be predicated upon distortion due to temporary economic circumstances peculiar to the radio broadcasting industry as a whole. The history of the industry does not show any such situation to have existed. However, the individual members thereof may find grounds for relief based on peculiarities in their own base period experience.

If, during the base period, the taxpayer has expanded its activities by venturing into some new but related field, such as recording, relief under section 722 should be available for the purpose of revising the taxpayer's credit to reflect the bearing of the new activity on base period earnings.

V—Supplement A Cases

Supplement A of the Code, which has been completely revised in the 1942 Act, provides that where the taxpayer has, since the beginning of the base period, absorbed the business of another corporation pursuant to certain specified transactions, it is entitled to include in its average earnings credit the base period earnings experience of the other corporation. The question has arisen as to the application of section 722 where the changes in the character of the business or other factors recognized in that section as producing an inadequate standard of normal earnings occur in the base period experience of the absorbed corporation rather than in the base period experience of the taxpayer itself.

Section 722(e), as revised by the 1942 Act, specifically provides that in such cases the business of the absorbed corporation shall be treated as the business of the taxpayer for the purposes of that section. The effect of this provision is, obviously, to permit a reconstruction of the earnings credit by reconstructing the earnings of the absorbed corporation as well as the earnings of the taxpayer. However, in spite of the clear language of the section, the Bureau has recently ruled in I. T. 3585, 1942-46 Int. Rev. Bull., page 3, that the taxpayer must choose between the benefits of section 722 and Supplement A and that in the event that it elects the latter it is not entitled to the benefits of the relief provision. The ruling is in direct conflict with the specific provisions of section 722 as now written and consequently can be disregarded. It is understood that the ruling was prepared on the basis of the preexisting law, as is evidenced by the references to Committee Reports on the excess profits tax amendments of 1941. It is hoped that the ruling will eventually be revoked in order to eliminate the doubts that have been created by its promulgation.

In the event that section 722 relief is applied for in a Supplement A situation, it is probable that the constructive earnings will be developed by considering the activities of the taxpayer and its component corporations as a single enterprise during the base period rather than by considering each corporation separately. To the extent that the ruling above referred to provides for this treatment, it is unobjectionable.

VI—Procedure

(1) *Filing of application.*—Basically, the benefits of section 722 must be obtained by way of credit or refund rather than in the computation of the tax shown on the return. Application for such relief must be filed within six months from the date prescribed by law for the filing of the excess profits tax return for the taxable year for which the relief is requested. The time prescribed by law for filing the return includes the period of any extension of time granted by the Commissioner. If, however, the taxpayer does not apply for relief within such period and a deficiency in tax is subsequently proposed by the Commissioner, the taxpayer is given a further opportunity to claim the benefits of section 722, but in such case the relief is merely by way of offset and cannot accomplish more than the reduction or elimination of the proposed deficiency. If the notice is a preliminary notice, an application may be filed within 90 days after the date thereof. If the notice is a final notice and either no preliminary notice was issued or it was issued less than 90 days before the date of final notice, the benefits of section 722 may be claimed in the taxpayer's petition or amended petition before The Tax Court of the United States.

The relief accorded by section 722 is retroactive, *i. e.*, the taxpayer may claim it for taxable years beginning in 1940 and 1941 as well as years beginning thereafter. The statute provides that the application for retroactive relief in the case of taxable years beginning prior to 1942 shall be filed by April 21, 1943.

As to the detail required in the original application for relief, see I.T. 3599, published herewith.

(2) *Subsequent years.*—Once the constructive average base period net income has been determined, the Commissioner is authorized by regulation to waive some or all of the limitations above described relative to the manner in which relief may be claimed. It is contemplated that such regulations will provide that, in the absence of substantial evidence requiring a redetermination for future years, the taxpayer may continue to use such constructive average base period net income on its return.

(3) *Deferment of tax in certain cases.*—Although the general rule is that the taxpayer must compute and pay its tax in the first instance without regard to section 722, it is recognized that there may be cases of special hardship in which relaxation of this rule ought to be made. Section 710(a)(5), therefore, provides that if more than 50% of the taxpayer's income would, without regard to section 722, be subject to excess profits tax, a taxpayer claiming the benefits of section 722 on its return may defer payment of 33% of the amount of excess profits tax which would be saved by the application of section 722. For example, if a taxpayer has a total income of one million dollars and an excess profits credit (computed without regard to section 722) of $195,000, the adjusted excess profits net income will amount to $800,000, which is in excess of 50% of one million dollars. If the taxpayer claims section 722 and determines that the application of that section will produce an excess profits credit of $595,000 the adjusted excess profits net income will be only $400,000. The saving in excess profits tax as a result of the application of section 722 would therefore be $360,000, *i. e.*, 90% of $400,000 (the difference between $800,000 and $400,000). The taxpayer may defer the payment of 33% of this amount, or $118,800, thus being required to pay an excess profits tax of only $601,200, in lieu of $720,000. If the claim is valid in its entirety, the taxpayer will be entitled to the remainder of the $360,000 excess profits tax relief claimed, or $241,200. The net tax saving on all taxes will, of course, be less than $360,000, owing to adjustments which will have to be made in the normal and surtax.

(4) *Review of Commissioner's determination.*—Issues arising under section 722 cannot be tried by suit for refund in the Court of Claims or District Courts of the United States. Review may be had only in The Tax Court of the United States (formerly the Board of Tax Appeals), and for this purpose the denial of a section 722 application is treated as a deficiency notice. The Tax Court's decisions on section 722 cases are final and may not be appealed to any higher tribunal. Furthermore, it is provided that although section 722 matters may be tried by any Division of The Tax Court in the first instance, any determinations and redeterminations shall be reviewed only by a Special Division of the Court appointed by the Presiding Judge and consisting of not less than three members. Decisions of this Special Division, which cannot be reviewed by the Court as a whole, are nevertheless to be deemed decisions of the Court, and are final.

EXCESS PROFITS TAX RELIEF RULING

Commissioner of Internal Revenue Guy T. Helvering last Monday called attention to a ruling which will be published in the Internal Revenue Bulletin, relative to the general relief provisions of section 722 of the Internal Revenue Code, as amended by section 222 of the Revenue Act of 1942.

The Commissioner stated that the ruling sets forth certain conditions under which applications for relief on form 991 (revised January, 1943), which must be filed on or before April 21, 1943, in order to obtain relief for the taxable years 1940 and 1941, may be supplemented within a reasonable time after the time prescribed for filing if it is not possible for the corporation to obtain and present all the detailed information required to fully establish its eligibility for relief and the amount of its constructive average base period net income.

The Commissioner stated, however, that the corporation's application for relief must set forth in detail and under oath each ground under section 722 and the factors upon which the application is based with sufficient data and information to apprise the Commissioner of the exact basis thereof.

The same conditions apply to applications for relief for the taxable year 1942 and subsequent years which must be filed not later than six months after the date prescribed for the filing of the excess profits tax return. The ruling also deals with the requirements where corporations claim the benefits of section 710 (a) (5) of the Internal Revenue Code, as added by section 222 (b) of the Revenue Act of 1942, which relate to deferment of payment of excess profits tax shown on the 1942 return based upon a claim that such taxes are excessive and discriminatory.

The text of the ruling is as follows:

SECTION 722.—GENERAL RELIEF—CONSTRUCTIVE AVERAGE BASE PERIOD NET INCOME

Regulations 109

1943-3-11344—I.T. 3599

Internal Revenue Code

Time for filing and information to be contained in Form 991 (revised January 1943)—Application for relief under section 722 of the Internal Revenue Code.

Advice has been requested relative to section 722 of the Internal Revenue Code, as amended by section 222 (a) of the Revenue Act of 1942, which extends general relief to corporations where their excess profits taxes are determined to be excessive and discriminatory. The relief is granted to corporations which establish what would be a fair and just amount representing normal earnings to be used as a constructive average base period net income for the purposes of an excess profits tax based upon a comparison of normal earnings and earnings during the excess profits tax taxable year. This relief has been made retroactive to taxable years beginning in 1940 and 1941.

In order to obtain relief with respect to the tax shown on the excess profits tax return for taxable years beginning in 1940 or 1941, an application on Form 991 (revised January 1943) must be filed on or before April 21, 1943, with the Commissioner of Internal Revenue, Washington, D. C. However, if the taxpayer has already filed a claim for relief upon Form 991 under section 722 prior to its amendment by the Revenue Act of 1942, the data and information submitted with such earlier form need not be repeated in Form 991 (revised January 1943), provided reference is made to such earlier form as constituting a part of the revised form. The corporation's application for relief must set forth in detail and under oath each ground under section 722 upon which the application for relief is based, and facts sufficient to apprise the Commissioner of the exact basis thereof. The mere statement of the provision or provisions of law upon which a claim for relief is based shall not constitute an application for relief within the meaning of section 722. If a claim for relief is based upon section 722 (b) (5) (relating to factors other than those expressly provided by section 722 (b) (1), (2), (3), and (4)), the application must state the factors which affect the corporation's business and which may reasonably be considered as resulting in an inadequate standard of normal earnings during the base period. However, if it is not possible for the taxpayer on or before April 21, 1943, to obtain and present all the detailed information required to establish its eligibility for relief and the amount of its constructive average base period net income, such detailed information may be submitted later as a supplement to the application.

If the benefits of section 722 are claimed with respect to the tax shown on the return for a taxable year beginning in 1942 or a subsequent year, an application must be filed in the same manner as is prescribed with respect to applications filed for years beginning in 1940 or 1941, except that the application for a taxable year beginning in 1942 or a subsequent year must be filed not later than six months after the date prescribed by law for the filing of the excess profits tax return. Such date includes the period of any extension of time granted for the filing of such return. Corporations claiming the benefits of section 710 (a) (5) of the Internal Revenue Code, as added by section 222 (b) of the Revenue Act of 1942, relating to deferment of payment of excess profits tax shown on the return, must attach Form 991 (revised January 1943) to their excess profits tax returns at the time of the filing of such returns. In such case, there must be set forth in the form the data and information relied upon, in sufficient detail to establish eligibility for relief, the amount of constructive average base period net income claimed, the amount of tax reduction claimed by the use of section 722, and the amount of tax deferment claimed on the return.

A corporation may, within a reasonable time after the time prescribed for the filing of Form 991 (revised January 1943), supplement its application for relief by furnishing additional data and information to prove the grounds for relief stated in such application and to establish the amount of the constructive average base period net income. However, no new grounds for relief presented by a corporation after the date prescribed for the filing of its application for relief will be considered.

DATA ON "CONSTRUCTIVE AVERAGE BASE PERIOD"

At the direction of the NAB Research Committee, an effort has been made to collect figures which will be useful to stations which elect to file for relief from the Excess Profits Tax, under Section 722 of the Internal Revenue Code, as amended. It was the hope of Roger W. Clipp, WFIL Philadelphia, committee chairman, that concise figures of net profit before Federal tax could be devoloped by station classification and city size, which would enable stations to use the figures furnished in the tax returns they file. This objective has not been attained because of incomplete data, the lack of refinement of those data available, and insufficient detail to classify stations as to like Commission assignment and city size as a criterion of market service. The Research Committee and the Research Department are continuing their efforts to obtain useful data in this connection, but release that information which is available at this time to satisfy the numerous requests which have been received from stations.

There are but two sources of net income data outside of the books of broadcasting stations. These are the financial reports for broadcast stations and networks of the FCC and the U. S. Treasury Department. The Treasury is not able at this time to make available any information on the net income of stations and networks as filed in their tax returns for 1936 through 1939.

The FCC has prepared and made limited releases of such information for the years, 1937, 1938 and 1939. No such information is available for the year 1936. Some consideration has been directed to the possibility of preparing estimates for that year. However, it is the opinion of the Research Director that a reliable estimate of net income in the detail of station classification and city size cannot be made from existing data within acceptable limits of error to render such information valuable in filing tax returns.

In the following table, broadcast service income (net profits before Federal tax) is presented by class of station and network affiliation showing the detail of the number of stations reporting the total net income and average per station for the years, 1937, 1938 and 1939:

BROADCAST SERVICE INCOME*
BY CLASS OF STATION AND NETWORK AFFILIATION
1937, 1938 AND 1939

	1937			1938			1939

* Broadcast Service Income is the figure of profit and loss from operation before Federal Taxes are deducted. These are the figures, insofar as the FCC has maintained accounting comparability between the three years involved. In the physical set-up of the financial reports there have been numerous changes in accounting terms ascribed to various items of income and expense which leaves some question as to whether strict comparability has been maintained.

Source: "Financial and Employee Data for the Broadcast Industry" compiled and published by the FCC.

(d) Deficit.

February 8, 1943

The following table presents broadcast service income by city size and class of station for the years 1937 and 1939. This detail of information was not prepared by the FCC for the year 1938, and it is reported that the Commission cannot furnish such information without resorting to a costly and time-consuming re-tabulation of some 660 station reports. In presenting this information, some adjustments were necessary to establish direct comparison of the two years. The FCC report for 1939 contained finer population brackets than that for 1937. As an example, the top city size was 2,000,000 population and over. The second bracket was 1,000,000 to 2,000,000. These two were combined to enable comparison. Any adjustments made were accomplished by straight addition without need for any estimating or apportioning.

* Includes one part-time, clear channel station, which the FCC classified as regional, so that single station information would not be disclosed.

Copies of the above tables have been sent to officials of the Treasury Department and the Bureau of Internal Revenue. The letters transmitting the tables set forth the objective in preparing this information as that of aiding stations seeking relief under Section 722 of the Internal Revenue Code, as amended, which provides for the establishment of a constructive average base period net income. It is pointed out that the information contained in the two tables constitutes all of the official information on the subject which is immediately available to the industry. It is mentioned that the Treasury and the Bureau of Internal Revenue have the basis information from which the exact data desired could be prepared. The query is made whether the Department will elect to assist the taxpayer in establishing a constructive average base period net income on the experience of similar station business situations. It is realized that to follow this procedure would involve a tremendous amount of work on the part of the Department for broadcasting alone. The task for all business would be staggering. NAB is in a fortunate position to offer material assistance, if that course is followed, through the use of the historical station file maintained in the Research Department. Complete information has been maintained in this file on the Commission assignments of power, frequency, operating time, size of city, and network affiliation which appear to be the principal criteria for establishing like situations among station businesses. New developments along this line will be reported to the membership.

48 - Hour Questions

Here are answers from the War Manpower Commission to some of the questions raised about the application of the President's Executive Order of February 9, 1943, establishing the minimum 48-hour week for the duration of the war:

1. Q. Does this order apply to everyone in this country?

A. At the outset, the War Manpower Commission is making it mandatory in 32 labor shortage areas, although other industrial areas will be added as labor shortages become acute. The 32 areas are: Bath, Maine; Bridgeport, Conn.; Hartford, Conn.; New Britain, Conn.; Portsmouth, N. H.; Springfield, Mass.; Waterbury, Conn.; Buffalo, N. Y.; Somerville, N. J.; Baltimore, Md.; Elkton, Md.; Hampton Roads, Va.; Washington, D. C.; Akron, Ohio; Dayton, Ohio; Detroit, Mich.; Manitowoc, Wis.; Sterling, Ill.; Brunswick, Ga.; Charleston, S. C.; Macon, Ga.; Mobile, Ala.; Panama City, Fla.; Pascagoula, Miss.; Wichita, Kans;. Beaumont, Tex.; Cheyenne, Wyo.; Ogden, Utah; Las Vegas, Nev.; Portland, Ore.; San Diego, Calif.; Seattle, Wash.

2. Q. Does it apply to everyone in these areas?

A. To all full-time employment. If you don't employ anyone but yourself, it doesn't apply. Such persons, however, have an obligation to their country and themselves to contribute to the extent of their ability.

3. Q. How about part-time workers?

A. It doesn't apply. Here, however, both employer and employe have the same obligation to produce as much as they can for the war.

4. Q. Should firms in other areas try to go on the 48-hour week?

A. Yes, if by doing so they can reduce their labor requirements and not have to discharge workers now on their payroll. Most war plants in all areas are expanding their work-weeks, so as to utilize available labor better. Non-war plants would be well advised to plan similar action, in view of the drain of their workers into the armed forces, and into war industries.

5. Q. Must time and one-half be paid for all time over 40 hours in any and all employment?

A. Yes, with certain exceptions. The President's order provides expressly that no change is made by it in any collective bargaining agreement as to the rate of overtime pay. The order, of course, abrogates labor contracts which restrict the work-week to less than 48 hours, in the areas to which the mandatory order is applied.

6. Q. What about jobs not covered by the Wage-Hour Act, such as farm workers, domestic workers?

A. The order does not require time and one-half for overtime worked by these people.

7. Q. Should a store or office now working employes less than 48 hours go up to 48 hours at once?

A. Yes, but only if going to 48 hours would result in more effective use of employes, or if it would avert employment of additional employes. However, the purpose of the order is to release workers for war and essential jobs. Mere increase of hours that will not result in this was not intended.

8. Q. Who is putting the order into effect, and enforcing it?

A. The War Manpower Commission was directed by the

President to interpret and apply the order, and to permit longer or shorter work weeks if they will help win the war.

9. Q. When is the order effective?

A. The President's order is effective immediately in the 32 areas designated by WMC Chairman McNutt, and workers should be paid overtime rates as overtime is instituted. However, the War Manpower Commission has announced that employers have until March 31 to bring their work week up to 48 hours, or to report how much longer it will take them to do so, in these critical areas.

10. Q. Does the order apply to establishments whose hours are limited by state law—bars in most states, for instance?

A. No. The Executive order says "nothing in this order shall be construed as superseding or in conflict with any Federal, State or local law limiting hours of work."

11. Q. With whom should local plant, union, and employer problems, created by the order, be taken up?

A. With area or regional officials of the War Manpower Commission. The WMC intends to decentralize administration of the order as much as possible, leaving decisions in the hands of local WMC Officials and their Management-Labor committees.

12. Q. How can the order be enforced, if an employer is recalcitrant?

A. All departments and agencies of the Federal Government shall require their contractors to comply with the order. The USES which has control of hiring in the areas will not refer employes to any employers not complying with the order, unless they are specifically exempted from its terms by the WMC. Smaller establishments not influenced by these conditions will probably comply for patriotic or economic reasons. Few objections are expected.

13. Q. Suppose an employer or worker contends that the 48-hour week is impossible in his shop or plant?

A. The WMC will investigate and make such exceptions or exemptions so as to make possible the fullest possible contribution to the war.

14. Q. Does the order apply to coal miners, most of whom have a 35-hour week under union contract?

A. The first areas designated include no coal-mining centers. But successful efforts are being made now by the government to have the work week extended in many areas to meet war fuel needs. Some hazardous occupations or industries may be exempted.

15. Q. How much additional productive power is made available by this order?

A. No statistics are available. It has been estimated that if the 48-hour week were in effect, in all industries and areas where it would result in maximum use of labor that it would add the equivalent of 1,000,000 men to the labor force.

16. Q. Will the 48-hour week be applied in the steel mills of Detroit and Buffalo, which are labor shortage areas, and not in Pittsburgh, which is not now listed as a labor shortage area?

A. This will be decided later, upon investigation by the WMC and consultation with the industry, to determine whether it is possible and feasible. A few industries may have to be handled on an industry-wide instead of an area basis.

17. Q. Will OPA permit prices to be raised on a showing of increased costs?

A. That is governed by OPA regulations, but it is unlikely that the increased labor cost will add more than a small fraction to the cost of production.

18. Q. Does the order apply to government arsenals and navy yards?

A. Yes, but practically all these are on a work week of 48 hours or more already.

19. Q. What about Government offices?

A. The Government recently adopted a 48-hour work week for the duration, with overtime pay for work in excess of 40 hours as fixed by Federal law.

20. Q. Does the order apply to newspapers and retail stores?

A. Yes, in the critical areas. But it should be emphasized that the purpose of the order is to economize on manpower, and not to increase hours of work where it will not contribute to the war.

21. Q. What about little one-man business and professional people like doctors and dentists?

A. The order applies only to employment, and self-employed persons are not regarded as employes.

22. Q. Does the order apply to laundries?

A. Yes, in the critical areas.

23. Q. Suppose an employer declines to increase the weekly pay of an employe although he increases the work week to 48 hours. What can the worker do?

A. If the employer is governed by the Wage-Hour Act, the employer is required to pay time and one-half for all overtime over 40 hours in a week. There is no law covering the employer whose workers are not covered by the law. However, such an employer as described in this question would be likely to lose his employes to employers who are paying time and one-half for overtime.

24. Q. Could an employer get away with paying a worker straight-time for pay over 40 hours?

A. If the worker is covered by the Wage-Hour Act, the employer would be violating Federal law. If the worker is not covered, he would be likely to leave his job for employment with an employer who is paying time and one-half.

25. Q. Should State and local governments adopt the 48-hour week under this order?

A. Yes, if their employes' hours of work are not fixed by State or local law. The order does not change any rate of wage or overtime pay fixed by local, State or Federal law.

26. Q. Is the order inflationary, in that workers will get much larger pay checks?

A. No, because of the great production needs of the war; because the worker will produce more; because the work in any given plant will be spread out among fewer employes; and because price ceilings and wartime limits on luxury goods production will prevent workers from excessive and inflationary spending. In addition, income taxes will recapture part of the workers' added income.

32 Labor Shortage Areas

The list of 32 labor-shortage areas is as follows:

Bath, Maine: Bath, Brunswick (town), Gardiner, Hallowell, Lisbon.

Bridgeport, Conn.: Bridgeport, Fairfield, Milford, Stratford, Trumbull.

Hartford, Conn.: Bloomfield, Canton, East Hartford, East Windsor, Enfield, Farmington, Glastonbury, Hartford, Manchester, Newington, Rockville, Rocky Hill, Simsbury, South Windsor, Suffield, Vernon, West Hartford, Wethersfield, Windsor, Windsor Locks.

New Britain, Conn.: Berlin, Bristol, New Britain, Plainville, Plymouth.

Portsmouth, N. H.: Amesbury, Mass., Dover, N. H., Exeter, N. H., Farmington, N. H., Kittery, Maine, Newburyport, Mass., Newmarket, N. H., Portsmouth, N. H., Rochester, N. H., Somersworth, N. H., South Berwick, Maine, York, Maine.

Springfield, Mass.: Agawam, Amherst, Belchertown, Chicopee, Easthampton, East Longmeadow, Hadley, Holyoke, Longmeadow, Ludlow, Monson, Northampton, Palmer, South Hadley, Springfield, Ware, Warren, Westfield, West Springfield, Wilbraham.

Waterbury, Conn.: Cheshire, Haugatuck, Thomaston, Waterbury, Watertown.

Buffalo, New York: Buffalo, Depew, East Aurora, Gowanda, Hamburg, Kenmore, Lackawanna, Lancaster, Lockport, Niagara Falls, North Tonawanda, Sloan, Springville, Tonawanda, Williamsville.

Somerville, N. J.: Bound Brook, Manville, Raritan, Somerville.

Baltimore, Md.: Baltimore.

Elkton, Md.: Elkton.

Hampton Roads, Va.: Norfolk, Phoebus, Portsmouth, South Norfolk, Virginia Beach, Williamsburg.

Washington, D. C. (Md., Va., D. C.): Alexandria, Va., Arlington, Va., Falls Church, Va., Greenbelt, Md., Hyattsville, Md., Mt. Rainier, Md., Takoma Park, Md., Washington, D. C.

Akron, Ohio: Akron, Barberton, Cuyahoga Falls, Medina, Tallmadge, Wadsworth.

Dayton, Ohio: Dayton, Eaton, Fairfield, Miamisburg, Oakwood, Springfield, Urbana, Xenia.

Detroit, Michigan: Allen Park, Berkley, Centerline, Clawson, Dearborn, Detroit, Ecorse, Ferndale, Garden City, Grosse Pointe, Grosse Pointe Farms, Grosse Pointe Park, Grosse Pointe Woods, Hamtramck, Highland Park, Inkster, Lincoln Park, Melvindale, Northville, Pleasant Ridge, Plymouth, River Rouge, Royal Oak, Trenton, Wayne, Wyandotte, Ypsilanti.

Manitowoc, Wisconsin: Manitowoc, Two Rivers.

Sterling, Illinois: Dixon, Morrison, Oregon, Rochelle, Rock Falls, Sterling.

Brunswick, Georgia: Brunswick.

Charleston, South Carolina: Charleston, Summerville, Walterboro.

Macon, Georgia: Fort Valley, Macon, Milledgeville.

Mobile, Alabama: Mobile, Prichard.

Panama City, Florida: Panama City.

Pascagoula, Miss.: Biloxi, Gulfport, Moss Point, Pascagoula, Pass Christian.

Wichita, Kansas: Augusta, El Dorado, Newtown, Wichita.

Beaumont, Texas: Beaumont, Orange, Port Arthur, Silsbee.

Cheyenne, Wyoming: Cheyenne, Wyoming.

Ogden, Utah: Brigham, Ogden.

Las Vegas, Nevada: Boulder City, Las Vegas, Midway, North Las Vegas, Whitney.

Portland, Oregon: Camas, Wash., Hillsboro, Ore., Oregon City, Ore., Portland, Ore., St. Helens, Ore., Salem, Ore., Vancouver, Wash.

San Diego, California: Chula Vista, Coronado, Escondido, La Mesa, National City, Oceanside, San Diego.

Seattle, Washington: Auburn, Bremerton, Enumclaw, Kent, Port Orchard, Renton, Seattle, Shelton.

The most recent listing of labor market areas classifies in four groups all labor market areas in which there is a central city of 50,000 or more, or in which at least 5,000 additional workers will be needed before peak production is reached.

The four groups are defined as follows:

Group I—Areas of current acute labor shortage—32 areas.

Group II—Areas of labor stringency and those anticipating a labor shortage within six months—102 areas.

Group III—Areas in which a general labor shortage may be anticipated after six months—59 areas.

Group IV—Areas in which labor supply is and will continue to be adequate to meet all known labor requirements—76 areas.

Order for 48-Hour Week

President Roosevelt's executive order establishing a national forty-eight-hour work week read as follows:

"By virtue of the authority vested in me by the Constitution and statutes, as President of the United States, and in order to meet the manpower requirements of our armed forces and our expanding war production program by a fuller utilization of our available manpower, it is hereby ordered:

"1. For the duration of the war, no plants, factories or other place of employment shall be deemed to be making the most effective utilization of its manpower if the minimum work week therein is less than forty-eight hours per week.

"2. All departments and agencies of the Federal Government shall require their contractors to comply with the minimum work week prescribed in this order and with policies, directives, and regulations prescribed hereunder, and shall promptly take such action as may be necessary for that purpose.

"3. The chairman of the War Manpower Commission shall determine all questions of interpretation and application arising under this order and shall formulate and issue such policies, directives, and regulations as he determines to be necessary to carry out this order and to effectuate its purposes. The chairman of the War Manpower Commission is authorized to establish a minimum work week greater or less than that established in Section 1 of this order or take other action with respect to any case or type of case in which he determines that such different minimum work week or other action would more effectively contribute to the war effort and promote the purposes of this order.

"4. All departments and agencies of the Federal Government shall comply with such policies, directives, and regulations as the chairman of the War Manpower Commission shall prescribe pursuant to this order, and shall so utilize their facilities, services, and personnel, and take such action under authority vested in them by law, as the chairman determines to be necessary to effectuate the purposes of this order and promote compliance with its provisions.

"5. Nothing in this order shall be construed as superseding or in conflict with any Federal, State or local law limiting hours of work or with the provisions of any individual or collective bargaining agreement with respect to rates of pay for hours worked in excess of the agreed or customary work week, nor shall this order be construed as suspending or modifying any provision of the Fair Labor Standards Act (act of June 25, 1938; 52 Stat. 1060; 29 U. S. C. 201 et seq.) or any other Federal, State or local law relating to the payment of wages or overtime.

FRANKLIN D. ROOSEVELT.

White House, Feb. 9, 1943."

917 STATIONS

During the month of December, 1942, the Federal Communications Commission granted no permits for the construction of new stations. Operating license was issued to one station, and one station was deleted. A comparative table by month follows:

	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1
Operating	887	891	893	897	899	906	906	905	905	907	909	908	909
Construction	36	32	31	27	25	18	19	16	15	12	10	10	8
	923	923	924	924	924	924	925	921	920	919	919	918	917

FEDERAL LEGISLATION

SENATE

S. 682 (Johnson, D-Colo.) LIQUOR ADVERTISING—To prohibit the paid advertising of alcoholic beverages by radio in certain circumstances, and for other purposes. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

ARKANSAS:

H. 182 (Pickering) ADVERTISING OF ALCOHOLIC BEVERAGES—To provide punishment for the advertising for sale of any liquor, wine or beer. Referred to Committee on Labor.

CALIFORNIA:

S. 607 (Tenney) DEFAMATION—Amend Sections 45 and 46 and add Sections 45c, 46d, and 46e to the Civil Code, relating to defamation. Referred to Committee on Judiciary.

DELAWARE:

H. 145 (McIlvaine) MUSIC BOXES—IN TAVERNS—An act to prohibit radios, nickolodions, music boxes or musical machines of any kind, in hotels, restaurants, stores or taverns where alcoholic liquors, wines, or beer is sold. Referred to the Miscellaneous Committee.

MASSACHUSETTS:

H. 94 (Recommendation of Dept. of Public Health) FOODS AND DRUGS—Making various changes in the laws relating to foods and drugs so that said laws may be more nearly in conformity with the federal food, drug, and cosmetic act in so far as it pertains to drugs and foods. Referred to the Committee on Public Health.

MICHIGAN:

H. 98 (Engstrom & Warner) ADVERTISING—INTERLOCHEN—$10,000 appropriation to advertise national music camp at Interlochen, the advertising media to be restricted to motion picture and broadcasting publicity. Referred to Committee on Ways and Means.

NEW MEXICO:

H. 98 (Gonzales & Dunham) MUSICAL PERFORMING RIGHTS—Prescribing performing rights in musical compositions. Referred to Committee on Corporations.

NEW YORK:

A. 643 (Same as S. 522) (Knauf) ADVERTISING—EYEGLASSES—Makes it misdemeanor to include in any newspaper, radio, display sign or other advertisement, any statement which misrepresents material, frames or mounting or price of lenses or complete eyeglasses or the price of any frame unless advertised with words "without lenses" or which misrepresents service or credit terms. Referred to Committee on Codes.

S. 234 (Same as A. 281) (Quinn) UNEMPLOYMENT INSURANCE BENEFITS—Increases from 20 to 26 times benefit rate total maximum unemployment insurance benefits to which an employee shall be entitled in any fiscal year. Referred to Committee on Labor.

S. 522 (Same as A. 654) (Anderson) ADVERTISEMENT—EYEGLASSES—Makes it misdemeanor to include in any newspaper, radio, display sign or other advertisement, any statement which misrepresents material, frames or mounting or price of lenses or complete eyeglasses or price of any frame unless advertised with words "without lenses" or which misrepresents service or credit terms. Referred to Committee on Codes.

S. 538 (Mahoney) ADVERTISING—OPTOMETRIST—Authorizes education dept. to revoke license or certificate of any optometrist advertising by use of handbills, posters, motion pictures, radio or newspapers or other printed publications or by means of glaring signs or any sign having representation of human eye or appliance. Referred to Committee on Education.

NORTH CAROLINA:

H. 260 (Uzell) EXEMPTION FROM JURY DUTY—Amends section 2329 of the Consolidated Statutes, as amended to include among those exempted from jury duty, radio broadcast technicians and announcers. Referred to Committee on Judiciary No. 2.

NORTH DAKOTA:

H. 112 (Williams et al) LIQUOR ADVERTISING—Prohibits advertising intoxicating liquor by newspaper, circular, billboard or radio. Referred to Committee on Temperance.

OREGON:

H. 12 (Harvey) BREWERIES—ADVERTISING—Required breweries and distilleries to pay fifty percent of cost of advertising for permit to advertise. Referred to Committee on Alcohol control. Tabled or Indefinitely Postponed, 1/26/43.

WASHINGTON:

H. 180 (Zent) BROADCASTING LIABILITY—Defines liability in broadcasting of defamatory matter. Referred to Committee on Judiciary.

S. 151 (Parker) RADIO BROADCASTING—Relating to broadcasting of defamatory matter over radio stations. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 15. They are subject to change.

Monday, February 15

Further Consolidated Hearing

NEW—R. O. Hardin and J. C. Buchanan, d/b as Nashville Broadcasting Co., Nashville, Tenn.—C. P., **1240 kc.**, 250 watts, unlimited, facilities of WXIX when vacated.

NEW—Tennessee Radio Corporation, Nashville, Tenn.—C. P., **1240 kc.**, 250 watts, unlimited.

WQBC—Delta Broadcasting Company, Inc., Vicksburg, Miss.—Modification of license, **1470 kc.**, 500 watts night, 1 KW day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted special service authorization to operate from 7 a. m. to local sunrise during December, January, February and March, with power of 250 watts, subject to termination if interference arises (B2-SSA-56).

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Granted construction permit (B3-P-3521) to move auxiliary transmitter to new location. Granted construction permit (B3-P-3520) to move main transmitter, subject to applicant's submission of proof that the antenna system is capable of producing an effective field of 175 mv/m and installation of a tower lighting system in accordance with Specification A.

KSRO—Ernest L. Finley (assignor), Ruth W. Finley, Executrix of the estate of E. L. Finley (deceased) (assignee), Santa Rose, Calif.—Granted consent to involuntary assignment of license for broadcast station KSRO from Ernest L. Finley (deceased) to Ruth W. Finley, Executrix of the estate of Ernest L. Finley (B5-AL-359).

WINX—WINX Broadcasting Co., Washington, D. C.—Granted petition for waiver of Section 2.53 of the Commission's Rules so as to permit operation of petitioner's synchronous amplifier by remote control, subject to the following conditions: (1) that authority to operate the synchronous amplifier in connection with Station WINX upon a remote control basis is granted until such time as, in the opinion of the Commission, qualified operators become available for operation of said amplifier in accordance with Sections 2.53 and 13.61 of the Commission's Rules, but in no event beyond June 1, 1943; (2) that all meters of the synchronous amplifier be read and logged daily; and (3) that the remote control operation of the synchronous amplifier be carried on at all times by at least one licensed operator at the main transmitter location of Station WINX.

LICENSE RENEWALS

KHBC—Hawaiian Broadcasting System, Ltd., Hilo, Hawaii.—Granted renewal of license (B-R-885) subject to the condition that the licensee shall install an antenna in accordance with the Standards of Good Engineering Practice and determine power by direct measurement, when requested to do so by the Commission.

KAST—Astoria Broadcasting Co., Astoria, Ore.—Granted extension of license for a period of 90 days.

WJHP—The Metropolis Co., Jacksonville, Fla.—Granted renewal of license on a regular basis (B3-R-1083). (Commissioners Fly and Durr voted "No.")

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Granted renewal of license on a regular basis (B3-R-434). (Commissioners Fly and Durr voted "No.")

Granted renewal of following station licenses for the period ending in no event later than February 1, 1945:

KFUN, Las Vegas, N. Mex.; KHAS, Hastings, Nebr.; KOOS, Marshfield, Ore.; KVNU, Logan, Utah; KVOS, Bellingham, Wash.; WAIM, Anderson, S. C.; WBHP, Huntsville, Ala.; WCAT, Rapid City, S. D.; WITH, Baltimore, Md.; WJNO, West Palm Beach, Fla.; WLOG, Logan, W. Va.; WTHT, Hartford, Conn.; WTOL, Toledo, Ohio.

KGEZ—Donald C. Treloar, Kalispell, Mont.—Granted renewal of license for the period ending not later than June 1, 1943 (B5-R-126).

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted renewal of license for the period ending not later than December 1, 1944 (B4-R-557).

MISCELLANEOUS

KMA—May Broadcasting Co., Shenandoah, Iowa.—Granted modification of construction permit as modified, which authorized installation of directional antenna for night use and increase in power, for extension of completion date from February 22 to April 23, 1943 (B-4-MP-1691).

KGDM—E. F. Peffer, Stockton, Calif.—Granted modification of construction permit as modified, which authorized change in frequency, hours of operation, increase in power, install directional antenna for night use and new transmitter, for extension of completion date from January 20 to February 20, 1943 (B5-MP-1686). Granted further extension to March 20 (B5-MP-1692).

KGHI—Arkansas Broadcasting Co., Little Rock, Ark.—Granted license to cover construction permit which authorized installation of new transmitter (B3-L-1748); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1491).

KFDM—Beaumont Broadcasting Corp., Beaumont, Tex.—Granted license to cover construction permit which authorized installation of new transmitter (B3-L-1749).

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted license to cover construction permit as modified, for installation of new transmitter and directional antenna for day and night use, increase in power, change hours of operation, and move transmitter (B4-L-1736).

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1478).

WRBL—The Columbus Broadcasting Co., Inc., Columbus, Ga.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1490).

KICA—Hugh DeWitt Landis, Clovis, N. Mex.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1487).

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1492).

WKAQ—Radio Corp., of Puerto Rico, San Juan, P. R.—Granted modification (B-MP-1638) of construction permit (B4-P-3489) for extension of completion date to 7-26-43.

WAUQ—Onondaga Radio Broadcasting Corp., area of Syracuse, N. Y.—Granted modification of license for relay broadcast station to change designation of type and serial number of transmitter to show: Mfg.-Tenco; Serial No. 111.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted modification of construction permit as modified, which authorized increase in power, change hours of operation, install new transmitter and directional antenna for night use, for extension of completion date from February 2 to April 4, 1943 (B3-MP-1693).

The Commission approved a power of attorney for the affairs of licensee Philip Weiss, to be handled by his brother, Jack Weiss, during his service in the armed forces. Philip Weiss is licensee of Station WSYB, Rutland, Vt.

WRUS—World Wide Broadcasting Corp.—Cancelled the special temporary authorization for the operation of Station WRUS.

Tennessee Radio Corp., Nashville, Tenn.—Granted petition to dismiss without prejudice application for construction permit for new broadcast station to operate on **1240 kc.**, 250 watts, unlimited. (Docket No. 6193)

APPLICATIONS FILED AT FCC

1070 Kilocycles

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—License to cover construction permit (B3-P-3098) as modified for change in frequency, increase power, change hours and installation of directional antenna for night use.

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Authority to determine operating power by direct measurement.

1110 Kilocycles

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—License to cover construction permit B5-P-3261 as modified for new 10 KW station.

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Authority to determine operating power by direct measurement.

1150 Kilocycles

WDEL—WDEL, Incorporated, Wilmington, Del.—License to cover construction permit (B1-P-2758) as modified for increase in power, installation of new transmitter and directional antenna for day and night use.

1170 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Modification of construction permit (B3-P-2539 as modified which authorized increase in power, change in hours, install new transmitter and directional antenna for night) for extension of completion date from 2-2-43 to 4-4-43.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Extension of special service authorization to operate unlimited time, with power of 25 KW night, 50 KW day, employing directional antenna at night, using transmitter described in construction permit B3-P-2539 as modified, for period ending 4-4-43.

1250 Kilocycles

KWSC—State College of Washington, Pullman, Wash.—Construction permit to change frequency from **1250 kc.** to **1030 kc.**, change power from 5 KW to 1 KW night, 5 KW day, hours from share with KTW to unlimited and make changes in antenna and ground systems. Requests facilities of KOB.

1400 Kilocycles

WGRC—North Side Broadcasting Corp., Louisville, Ky.—Construction permit to move studio and transmitter from New Albany, Ind., to Louisville, Ky.

1450 Kilocycles

WILM—Delaware Broadcasting Co., Wilmington, Del.—License to cover construction permit (B1-P-3387) for move of transmitter and use of WDEL's South Tower of directional array.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Authority to determine operating power by direct measurement.

WDEL—Delaware Broadcasting Co., Wilmington, Del.—Authority to determine operating power by direct measurement.

1490 Kilocycles

WKBV—Knox Radio Corp., Richmond, Ind.—Transfer of control from William O. Knox to Central Broadcasting Corporation (1000 shares).

WKBB—Sanders Brothers Radio Station, Dubuque, Iowa.—Voluntary assignment of license to Dubuque Broadcasting Company.

MISCELLANEOUS APPLICATIONS

W9XMB—Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PST-4 as modified which authorized new studio transmitter station) for extension of completion date from 2-16-43 to 5-16-43.

NEW—The Associated Broadcasters, Inc., San Francisco, Calif.—Construction permit for new International Broadcast Station to be operated on **6030, 7230, 9570, 11870, 15290, 17760, 21610 kc.**, power 50 KW. Hours: share with WBOS and KWID on **6960, 9570, 11870**; and share with KWID on **7230, 15290, 17760, 21610 kc.**

WBEZ—Board of Education, City of Chicago, Chicago, Ill.—Modification of construction permit (B4-PED-22 as modified, which authorized new non-commercial educational station) for extension of completion date from 3-7-43 to 4-7-43.

W6XDU—Don Lee Broadcasting System, Portable-Mobile, Area of Los Angeles, Calif.—License to cover construction permit (B5-PVB-83) as modified, which authorized addition of aural equipment using special emission.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Refractories Institute—Thirty-nine corporations manufacturing more than 75 per cent of the refractory products produced annually in the United States, and their trade association, American Refractories Institute, Pittsburgh, are charged in a complaint with combination and conspiracy to fix prices and eliminate competition in the sale of their products, including standard 9-inch brick, special shape brick and tile, fire brick, fire brick cement and high temperature mortars.

Large consumers of refractory products, which are required in furnaces and other devices where the intensity of the heat produced is sufficient to melt metals and ceramic materials, are the iron and steel, glass, copper smelting, cement, and wood pulp industries. The complaint alleges that one of the effects of the practices and the delivered price systems maintained by the corporate respondents is to unduly enhance the costs of refractory products used by industries directly engaged in producing materials of war.

The complaint states that the membership of the respondent institute constitutes a class so numerous and changing as to make it impracticable to specifically name in the complaint all of the members. (4900)

Home Diathermy Co., et al.—Misrepresentation of the provisions of an order issued by the Federal Communications Commission and unfair and deceptive acts in commerce are charged in a complaint against two distributors of home diathermy apparatus and two officials of the companies. The respondents are Home Diathermy Co.. Inc., 1780 Broadway, New York, Home Diathermy Co.. Inc., 15 Public Square, Wilkes-Barre, Pa., and Arnold Steindler and Isadore Teitelbaum. (4901)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Lentheric, Inc., 745 Fifth Ave., New York, has stipulated that in selling, advertising, or labeling its perfumes it will cease representing, through use of the word "Paris" or "French" or any other word, term or picturization indicative of French or foreign origin, that perfumes made or compounded in the United States are made or compounded in France or any other foreign country. The stipulation provides, however, that the country of origin of the various ingredients of the perfumes may be stated when immediately accompanied by a statement that the perfumes are made or compounded in the United States. (3604)

Lion Neckwear Co., 4626 North 10th St., Philadelphia, engaged in the sale of men's neckwear, has entered into a stipulation to cease and desist from misrepresenting its business status and the fiber content of the products it sells. (3606)

Dr. Propper Manufacturing Co., 127 West 24th St., New York, engaged in the sale of surgical supplies including wound clips designated "Serature," has stipulated that they will cease and desist from use of the word "Manufacturing" or the abbreviation "Mfg." or other word or term of like meaning as part of their trade name, and from the use of such word or term in any manner implying that they actually own or operate or directly control the factory in which the products they sell are manufactured. (3605)

Weisfield & Goldberg, Inc., 414 Pike St., Seattle, stipulated that it will cease and desist from representing that watches or other jewelry products it sells are made in the United States when, in fact, they are manufactured in whole or in part in other countries and that any watch it receives in trade or as partial payment for another article will be given to men or women in the armed services, unless the watch actually is disposed of in the manner indicated. The corporation agrees to discontinue the use of statements such as "Uncle Sam Wants Your Old Watches for the Boys in the Service" which may tend to convey the belief that the Government has requested used watches for men or women in the armed services. (3607)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

S. & M. Grand Rapids Furniture Factories, Inc.—An order to cease and desist from misrepresentation in the sale of household furniture has been issued against S. & M. Grand Rapids Furniture Factories, Inc., 123 Ferry St., Newark, N. J., also trading as S. & M. Grand Rapids Furniture Co. of Newark, New Jersey, and as Grand Rapids Showrooms. (4642)

Purity Products, Inc., 1060 Broad St., Newark, N. J.—The Journal of Living Publishing Corporation, 1819 Broadway, New York, and Victor H. Lindlahr have been ordered to cease and desist from misrepresentation in advertising and selling a medicinal preparation known as "VBev." (4021)

FTC COMPLAINT DISMISSED

The Federal Trade Commission has entered an order dismissing its complaint against Robert T. K. Hee, trading as The Eastern Herb Co., San Diego, Calif., engaged in the sale of a preparation designated "Chinese Herbs."

The complaint charged that in the dissemination of advertisements concerning the preparation the respondent had made misrepresentations with respect to its therapeutic value in the treatment of various ailments.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 8, February 19, 1943

FCC Under Fire in House

The House approved the FCC's 1943-44 appropriation this week only after considerable debate. It was proposed at one point to hold up any appropriation until the conclusion of the Cox investigation. This proposal was rejected, 162 to 87.

Most of the debate, as reported in the *Congressional Record*, pp. 1017-1018—1084-1088, is printed below.

February 15

The Federal communications testimony appears on page 1212 of the hearings. The recommendation of your committee is $7,609,000, as compared with the appropriations for the current year of $7,386,000. The recommendation reflects a reduction in the budget estimate of over $479,000.

It is difficult to escape the conviction that there is a good deal of duplication of effort between the F. C. C. on the one hand and the Army and the Navy on the other. The Army, I understand, has thousands of people in its radio intelligence companies. The Navy also has its own set-up. The F. C. C. admits that both services advised at one time that they did not require what the F. C. C. was furnishing them. The Bureau of the Budget, in its testimony, recognizes the conflict.

This agency shows a tremendous number of promotions in the past year or so, 1,806, to be exact, at an increase of $145,100. Details were furnished the committee with reference to the Legal Division and the Foreign Broadcast Intelligence Service. I shall not encumber the RECORD with those details. I may say in passing, however, that the number of promotions was not only enormous, but that in many instances the same individual has been given more than one promotion in the same year. Among other examples is one individual receiving $3,400 increase, or 105 percent, within a period of 8 months, another receiving $1,400, or a 75-percent increase, in 6 months, and another receiving $2,200, a 110-percent increase, in 16 months. There are many other examples that I could cite.

The record also indicates a request by this agency for deferments from the draft to the number of 442. Of this number, there have geen granted 391, in respect to which Chairman Fly expresses the hope that the deferments may be for the duration. All of these deferments may, in fact, be justified. It may be stated, however, that neither the description of the positions held, nor the salaries paid, nor the fact that many of them joined the force after Pearl Harbor, lends force to this conclusion in the first instance.

Mr. O'HARA. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. Yes.

Mr. O'HARA. With reference to the deferments of this agency, dces the gentleman mean deferments from going into the armed forces?

Mr. WIGGLESWORTH. Yes.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. Yes.

Mr. COX. It is common gossip all over town that there is a higher percentage of draft dodgers as a result of the requests of the departments in the Communications Commission than in any other department of the Government. If the gentleman will indulge me further, I am very much surprised to note the success of Mr. Fly in obtaining this large appropriation carried in this item. Apparently he is the witness that appeared in behalf of the Commission, on whose testimony the committee bases its finding. The committee says that the Commission is divided, and that the division differing with Mr. Fly says that the essential work of the Commission can be carried on and carried on effectively with a large reduction of personnel and a large reduction in appropriations. To be exact, it is contended by those in the know that with $2,000,000 the work of the Commission can be carried on. Mr. Fly, who heads the Commission, has no knowledge of communications, other than experience that he obtained as a switchboard operator before he was placed in the chairmanship. At the present time we find the Army and the Navy subordinated to him, and if the committee had found it possible to have consulted the Army and the Navy, disclosures would have been made to it that Mr. Fly is a terrible handicap to them in his effort to dominate completely in foreign communications of the Army and the Navy.

Others in the know have said to me that the larger part of the appropriations that are made for this Commission are wasted; that you may as well shovel the money out of the window as to expend it in the manner in which the Commission does. In view of the investigation that is going on, the item ought to be stricken from the bill altogether, and later the Congress will be able to make an appropriation that is proper.

Mr. WIGGLESWORTH. I was about to answer the gentleman by saying that the suggestion he makes was in fact made in the subcommittee, to the effect that inasmuch as an investigation has been authorized by the House to go into the activities of this Commission, it might be just as well to delete this item wholly and allow it to be considered later as a deficiency item. The money, of course, will not be required until the first of the fiscal year, July 1.

Mr. COX. I agree with the gentleman that the circumstance demands that the entire item be deleted until later on.

Mr. WOODRUM of Virginia. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. Yes.

Mr. WOODRUM of Virginia. The same logic would apply to the War Production Board, and to the Army or the Navy, and to any other agency of the Government that is under fire by anybody. That is, put them out of business, convict them, and then afterward, if they are able to prove that they are innocent, give them enough money to carry on. I submit right here in the midst of the colloquy between my two friends that that is not a logical

FCC UNDER FIRE IN HOUSE

(Continued from page 73)

approach to the problem. I feel confident that the investigation of the Federal Communications Commission in the able hands of my friend the gentleman from Georgia [Mr. Cox] and the distinguished gentleman from Massachusetts [Mr. WIGGLESWORTH] will be thorough-going.

We may rest assured that long before July 1, when this bill will become law, these gentlemen will apprise Congress of everything they can find that would justify putting the Federal Communications Commission and Mr. Fly out of business. In the meantime it is an agency that Congress has set up to do business and has delegated to it important war functions. The monitoring work of the Federal Communications Commission is very important. However we may feel about individuals in it, let no Member of this House be under any misapprehension that they are performing a very vital and critical service in the war effort. Somebody has to perform that service.

Mr. WIGGLESWORTH. May I say to the gentleman from Virginia that I certainly do not want to place myself in the position of failing to accord this agency every consideration to which it is entitled. It does not seem to me, however, that the deletion of this item has anything to do with the findings which may be made in the course of the investigation. Of course, the Commission must have the money that is necessary on July 1, but it does not need any part of these funds until that time.

Mr. FITZPATRICK. Will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from New York.

Mr. FITZPATRICK. I do not recall any evidence before our subcommittee that the Federal Communications Commission was a handicap to either the Army or the Navy. Does the gentleman recall any such testimony?

Mr. WIGGLESWORTH. The gentleman from South Dakota [Mr. CASE] interrogated the representatives of the agency along that line, and I think substantiated the statement I have made.

Mr. FITZPATRICK. I am referring to the statement contained in a question asked the gentleman as to whether or not they were a handicap to both the Army and the Navy.

Mr. WIGGLESWORTH. A duplication.

Mr. FITZPATRICK. "Handicap" was the word used.

Mr. COX. I used the word "handicap" and I used it advisedly, and if the gentleman will take the pains and manifest sufficient concern in the public interest to call upon the Army and the Navy he will find that the statement is justified.

Mr. WOODRUM of Virginia. If the gentleman will permit, I will say to the gentleman from Georgia [Mr. Cox] that as soon as I can get to a telephone I shall certainly make inquiry of the responsible heads of the Army and the Navy, and if any of those gentlemen say that the Federal Communications Commission is a detriment to the war effort, I will take advantage of my seniority in the proceedings to move to delete the item myself. Now will the gentleman join me in saying that if the Army and the Navy say they are performing a useful war service, he will give them a chance to have a fair trial before he executes them?

Mr. COX. I am not trying to execute anybody.

Mr. WOODRUM of Virginia. Just take their money away from them?

Mr. COX. No; I am not. I am insisting that in view of existing circumstances the appropriation should not be made available at the time. I can tell the gentleman something that would interest him.

Mr. DWORSHAK. Will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from Idaho.

Mr. DWORSHAK. In spite of the demands throughout the country for economy, it would appear that most of these agencies are attempting to expand their functions under the guise of defense and war activities. In that respect, will the gentleman explain the item of $206,160 for a War Problems Division under the Law Department, and explain why that is being created? Is there not some existing agency which already has jurisdiction over such activities?

Mr. WIGGLESWORTH. That matter was given consideration by the committee in reducing the request $479,000 below the budget.

I shall not dwell further upon this item, in view of the fact that an investigating committee has been set up to consider the activities of this Commission in detail.

I may mention in passing, however, first, that the record indicates continued approval of the transfer of stations or control of stations for considerations far in excess of the value of the physical assets transferred, with all the danger we have seen in other fields in the capitalization of Government franchises.

Second, that the serious charges said to have been made in connection with former Commissioner Pickard and others have apparently been whitewashed to the satisfaction of the Commission and the Department of Justice in the absence of further evidence.

Third, that 3 of those included in the list of 38 recently published by the Dies committee are to be found on the pay rolls of this agency.

February 17

Mr. CASE. Mr. Chairman, this amendment, with two succeeding amendments which I propose to offer, would leave the title "Federal Communications Commission" in line 3 but strike out the appropriations relating to the Federal Communications Commission and defer their consideration until later. I had expected to offer the amendments together in the thought that that would save some time. However, this will accomplish the same result.

The purpose in offering this amendment is to permit an intelligent appropriation to be made. The House has adopted a resolution authorizing a select committee to investigate the Federal Communications Commission. In view of the action already taken by the House it would be nonsensical for us now to attempt to appropriate for the Federal Communications Commission for the fiscal year that begins after July 1. How can we appropriate intelligently in this bill when there is pending for a detailed investigation of the activities of the Commission? Some of us believe we cannot so appropriate at this time. Consequently, we believe this appropriation should be deferred.

This does not mean we expect the Federal Communications Commission to be abolished or its activities to be ended. I, for one, would be opposed to that, and so would the other Members of the House. We are acquainted with the work the Federal Communications Commission is doing, in a large way. Most of it should be continued; possibly some of it should not. Of course, the Deficiency Committee is meeting regularly, and it can handle appropriations for this Commission; or, if the special committee makes its report before the appropriation is considered in the Senate it can be handled there.

There are reasons for raising some question about this appropriation. We asked the Commission for its figures on the draft deferments it had asked for its employees, and found that the Commission had asked for 442 deferments, receiving 391. It is true that the Federal Trade Commission has to have some highly trained technical men. It is probably true that those men in the service of the Federal Communications Commission can do just as effective work as they could if they were in uniform. However, until the select committee is satisfied that these deferments, for example, are justified, we ought not to make appropriations to carry on activities which we may not approve.

Not only that, but there was evidence before the committee that the Commission was doing some work the Army and Navy have the personnel to do. We asked direct questions on that point about some of the inspections and some of the examinations the Federal Communications Commission was making.

It was testified they were doing this at the request of the War and Navy Departments, but upon pursuing the question, it was apparent that the Army and the Navy had the personnel to do these same things. If there is a shortage of manpower, why should we be deferring men to put them in the Federal Communications Commission in jobs that the Army and the Navy have personnel to do? Not only that, but there was some questioning of the promotions made in this agency during 1942. They totaled 1,800, at a total cost of $145,000. Doubtless some of them were necessary to hold personnel but they should be examined in detail. They should be gone into more fully, and the House has already provided for that. Then, why should we make this appropriation, based upon activities, some of which we may want to abandon after the committee has made its report?

There is another reason. Three or four of the men who are on the list about which there has been a great deal of debate are some of the employees of the Federal Communications Commission. If we were to get into a debate upon the entire appropriation, I have been told those names would come up, and until they have been investigated either by the select committee or the special committee of the Committee on Appropriations which have been authorized to hear these people, we could not appropriate intelligently. I for one do not want to pass judgment on them until they have been heard. It seems to me that we would save time and appropriate more intelligently, if we wait until we have a report from the special committee.

Mr. RAMSPECK. Mr. Chairman, will the gentleman yield?

Mr. CASE. Yes.

Mr. RAMSPECK. Is not the same logic applicable also to the Army and the Navy and the appropriations for those Departments?

Mr. CASE. They are not under specific investigation by select committees of the House. Their appropriations are not before us yet and we hope the regular committees will keep the subcommittees currently informed of matters that come to their attention. Remember that I am not striking out this activity. The amendment does not strike out the title in line 3. And as I have already stated there will be ample time to appropriate for this agency before July 1. Of course, if the select committee has not reported by July 1, then we will have to appropriate for Federal Communications as best we can. And the gentleman knows we will appropriate for the Army and the Navy in due course when their estimates come before us.

Mr. RAMSPECK. And the same thing is true about all of them.

Mr. WOODRUM of Virginia. Mr. Chairman, I ask unanimous consent that debate upon this amendment and all amendments thereto close in 25 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LAMBERTSON. Mr. Chairman, I ask unanimous consent to proceed for 1 minute out of order.

The CHAIRMAN. Is there objection?

Mr. WOODRUM of Virginia. Mr. Chairman, I object.

Mr. LAMBERTSON. Mr. Chairman, I was not on the floor yesterday when the very able floor leader, the gentleman from Massachusetts [Mr. McCORMACK], made his speech attacking Herbert Hoover, who in the minds of a great many people is the greatest living American. He made the direct charge that Mr. Hoover had opposed recommendations to prepare our country for defense, and then went on to cast a long line of suspicion about Mr. Hoover being for appeasement. I want to dismiss it by using the words of the gentleman himself that he used on a recent occasion:

> Any such thought is without foundation, and if the gentleman had the courage to make the direct accusation within the rules, I would say that he is making a complete misstatement of the facts. Outside of the House anyone making such statements I would say tells a deliberate lie.

Mr. RAMSPECK. Mr. Chairman, I rise in opposition to the amendment. I am astonished that the gentleman from South Dakota [Mr. CASE] takes the position he does in this matter. He is generally a very level-headed member of this subcommittee, but the proposal he makes today seems to me to be absurd. He bases his amendment upon the theory that we should not appropriate money for this agency, which was created by this Congress, because we have authorized an investigation under the leadership of my colleague from Georgia [Mr. COX]. If his reason is sound and logical, then we should not bring in any appropriation for the Army or the Navy or practically any other agency of the Government until these investigating committees report. We have also authorized the Smith committee to look into the actions of all of the agencies of the Government practically, to see whether they are operating in accordance with the acts of Congress. It seems to me that this type of legislation that is contained in the amendment which we are to vote on here this morning is a type of action that brings Congress into disrepute in the eyes of the country. It is demagogery, and while I do not impute any motive of that sort to the gentleman from South Dakota, I do say that the critics of Congress will look upon it in that way, and to me I think that criticism will be justified. It is our duty as members of Congress to finance the agencies that Congress sets up. We have a splendid gentleman from my own State who is going to investigate the operations of this Commission.

He is going to do a good job, and if there is anything wrong with this Commission I am sure that the gentleman from Georgia will find out about it, and Congress then can take such action as the facts justify, but this is not the proper method of legislation, it is not in keeping with the dignity and the importance of a legislative body, for us to say that we are not going to appropriate any money for an agency we created, an agency that is doing important war work. If the subcommittee could not get the information it desired in the usual manner it could have resorted to the subpena power recently given to the Appropriations Committee.

Mr. CASE. The committee did not have that power when this bill was prepared.

Mr. RAMSPECK. We have a committee appointed, headed by the gentleman from Georgia [Mr. Cox], that has the power of subpena and all the power of this Congress with it, and that is the orderly way to act. That is the orderly way to do it. The gentleman did not take the same position the other day about William Pickens. Did we not vote to investigate first before we took him off the pay roll? Are you going to take all these men off the pay roll who are monitoring war messages from across the seas? No; that is not the way to legislate.

Mr. CASE. Will the gentleman yield?

Mr. RAMSPECK. Yes; I yield.

Mr. CASE. Does not the gentleman feel that the Congress would be in a more ridiculous position if it appropriated money for this independent agency and then the special committee set up by the House came in and said, "Here is something that should have been cut out" and the money has already been appropriated?

Mr. RAMSPECK. I certainly do not. I think that is the orderly way to proceed. We have a committee to investigate them and we should not usurp their functions through an appropriation bill.

Mr. CASE. We are not usurping their functions; we are simply withholding action until the full story is before us. The gentleman knows, of course, that this does not touch a dollar of their current appropriation.

Mr. RAMSPECK. I am aware of that fact.

Mr. CASE. And there is plenty of time to appropriate for next year between now and July 1 after the special committee has a chance to report.

Mr. RAMSPECK. Yes, and there is plenty of time to cut off their appropriation after the committee makes its report, if we should so desire.

Mr. HARE. Mr. Chairman, will the gentleman yield?

Mr. RAMSPECK. I yield to the gentleman from South Carolina.

Mr. HARE. If it is abolished between now and July 1 the appropriation will not be necessary.

Mr. RAMSPECK. The gentleman is correct. If as a result of this investigation the Congress decides to abolish the commission or change its function or its personnel, then the appropriation would not be effective.

Mr. FORD. Will the gentleman yield?

Mr. RAMSPECK. I yield.

Mr. FORD. It this not about equivalent to convicting a man in advance without an investigation?

Mr. RAMSPECK. Well, that is true, too. It is an interference with the prerogatives of the investigating committee headed by my colleague, the gentleman from Georgia [Mr. Cox].

The CHAIRMAN. The time of the gentleman from Georgia [Mr. RAMSPECK] has expired.

Mr. EDWIN ARTHUR HALL. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, in supporting the amendment offered by the gentleman from South Dakota [Mr. CASE], I welcome one of the first opportunities that I have had to cast my vote against the rising tide of bureaucracy that is daily encroaching upon the prerogatives and powers of the people's Congress. I welcome this opportunity, and I hope I will have many more occasions to cast my vote against these bureaucrats who are day by day destroying the people's rights with the excuse that they are justified in so doing because they are doing it to win the war. I question very much whether using iron-handed tactics such as the Federal Communications Commission has used over individual and separate radio stations, in choking off free expression as they have done on numerous occasions, is contributing very much to winning the war.

In my locality, just as in every other section of the country, there is a radio station that I beileve is serving the community in a patriotic manner. It has opened its air waves to every call of the Government. It has functioned just as the Federal Government would have it function, and it has given wide expression to wishes of the Government in helping put on War Bond sales, in making announcements for the Army and the Navy, in giving out uncensored information of all kinds. I submit today that this same radio station of which I speak has every right to conduct its business in a private and individual way. I maintain that the Government has no right to step in and question its patriotism, its right to proceed in an orderly, patriotic manner.

Therefore, I welcome the opportunity today to cast my vote for this amendment. I will welcome any other such opportunities. I hope this is but the beginning of an attempt to place the power where the people originally intended it to be placed, to bring prestige back to the House and the Senate. Heaven knows within the past 2 years, due to the encroachments of these bureaucrats, we have lost plenty, at least with the folks back home, and they are the ones who count.

Mr. HARE. Mr. Chairman, will the gentleman yield?

Mr. EDWIN ARTHUR HALL. I yield.

Mr. HARE. Assuming that the statement of the gentleman is correct, what would happen in case this amendment were adopted and the war would continue beyond July 1 of this year and the communications systems of the world would be free to communicate any message to inform our enemies? Does not the gentleman think there would be chaos in our war program and in our war effort?

Mr. EDWIN ARTHUR HALL. I am informed by the gentleman from South Dakota [Mr. CASE] that nothing will happen before July 1, as far as the continuation of this Commission goes. Furthermore, I would be the first to raise my voice in indignation against the insinuation of any Government bureau that the people in the radio station in my community would be guilty of any unpatriotic act or of disseminating any propaganda over the radio that would in any way obstruct the war effort.

I pledge my vote to this amendment and I welcome the chance to cast it this way.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. COX. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I know there are those of you who think I am sometimes too severe, and yet I speak the truth when I say to you that there is not one of you to whom I would not give the coat off my back did I think you were cold.

My position on this amendment is not an easy one. You know that I happen to be a member of a special committee that has been set up to investigate this agency of the Government. For that reason I am not going to appeal to my friends to support the amendment. That is a matter that they will have to determine for themselves without any appeal on my part. I will not under the circumstances vote on this amendment.

I have no brother nor son—no kinsman—who holds a job with the Federal Communications Commission whose continuance in service is dependent upon my support. On the other hand, I have been maligned, blackmailed, and criminally misrepresented by this agency of the Government.

I have expressed my views heretofore and you know what they are. Exception was taken to an observation I made on the floor that the Chairman of this Commission was in the hair of everybody in Washington, and particularly the Army and the Navy. I would have liked it better had the gentleman from Virginia [Mr. WOODRUM] made his statement before I submitted these remarks to you. I think I know that he is this morning armed with a statement furnished by the Secretary of War and the Secretary of the Navy negativing the statement that I made the other day. I am wondering if the gentleman from Virginia on Monday, after the colloquy we had on the floor, communicated over the telephone with Mr. Fly with respect to this matter and if he knows that Mr. Fly appealed to the Secretary of War and the Secretary of the Navy for the statements which I think he holds. And I am wondering too if the gentleman from Virginia [Mr. WOODRUM] happens to know that this Uriah Heep of the Commission brought political pressure to bear upon the Secretary of the Navy and forced into retirement the man who knew more about communications than any other man connected with the Navy, Admiral Hooper?

Now, Mr. Chairman, I am not urging that you take one position or the other; I will say, however, that I do not consider this motion to strike as being a piece of demagogery.

You will remember that at the beginning of this session we talked about the use of the appropriating power of this Congress as a means of repressing the bureaucrats who are governing America at this time. Now, I know this statement is disappointing to some of my friends, and I regret to make it, but I would feel ashamed of myself if I did not manifest sufficient courage and sufficient decency to say something on this subject. I could say more; I could say much more if the proprieties of the moment made it permissible; but I will say this to you: That I am not the only Member of this House who has been criminally maligned and falsely represented by this Commission; there are others I could name, and I could name them now; and if challenged I might do so.

[Here the gavel fell.]

Mr. McCORMACK. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The Chair regrets to inform the gentleman that debate on this amendment has been limited and time allocated. The Chair feels constrained to recognize the gentleman from Virginia. If time remains after the gentleman from Virginia has concluded the Chair will recognize the gentleman from Massachusetts.

The gentleman from Virginia [Mr. WOODRUM] is recognized.

Mr. WOODRUM of Virginia. Mr. Chairman, it may be that because of the great disparity of numbers, that one who tries to defend the action of this subcommittee is crying in the wilderness.

Mr. O'KONSKI. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM of Virginia. I yield.

Mr. O'KONSKI. Where are the Members on the gentleman's side?

Mr. WOODRUM of Virginia. That is what I should like to know. If the gentleman could inform me where they are I should like to know; certainly they are not helping me very much today, I will say to the gentleman.

On a strictly political division of the House awhile ago, strictly political, every Member on the Republican side stood up in support of a motion and every Member on the Democratic side stood up; and there were 84 Republicans and 36 Democrats, I think. I feel that the people should know that, I feel that the Democrats of the country should know that.

But I have got a little bit of a job to do here and I am going to try to do it. First I should like to try to relieve my dear friend from Georgia, because he has been worried as to what I might have said to the Chairman of the Communications Commission and what he might have said to somebody else. Well, I did not call the Chairman of the Communications Commission; I had a clerk call and tell him that it had been stated on the floor of the House that his agency was a detriment to the war effort; and to tell him that if that was so I could not defend it. Mr. Fly replied that he had already gone to the War and the Navy Departments some time ago when the charge was made and that he did not like to annoy them again but that he would enclose me copies of the letters they had written. This he did, and the gentleman from Georgia is already familiar with them.

I have here, though, Mr. Chairman, a little folder which he sent me, about 12 or 15 sheets. I cannot read them; I cannot put them in the *Record*. Their nature is so highly confidential, so vitally concerned with the heart of the war effort—they are from high-ranking Army and Navy officers, and State Department officials showing the vital, critical work this Federal Communications Commission is doing. I will be delighted, if any Member interested wants to come to my office, to lay them before him and let him read them; and I think he will agree when he sees them that they could not be made public because of their confidential nature.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM of Virginia. I yield.

Mr. TABER. It would be possible for the investigating committee to proceed with its efforts and make a report promptly and to have whatever appropriation might be needed for the Commission provided before the first of July. In this way the Appropriations Subcommittee could have the benefit of the work the investigating committee does.

Mr. WOODRUM of Virginia. No; I do not think that position is tenable at all.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM of Virginia. Not for a few minutes: I have but limited time and several very important things I want to say.

Our committee felt there was some duplication in certain of the activities of the Federal Communications Commission and we cut the appropriation over $400,000 because of the suggestions made by the gentleman from South Dakota, and brought out in the hearings, which showed that some of the work the Communications Commission was doing the Army was doing and had the personnel to do it. We made that cut in the appropriations.

Here is the core of the whole business. If you want to take the responsibility you may do so. The Federal Communications Commission in its monitoring work, in its control of the airways, has to have highly technically skilled, trained personnel, mostly young people, and that is the reason for the high number of deferments in that branch. They have had the greatest difficulty in keeping their people. They have had to get young people, train them, start them at the bottom and work them on up, hence the great number of promotions. They have had great difficulty in keeping this personnel. They are jittery anyway.

Let the Congress today strike out this appropriation and those twelve or fifteen hundred people, who want to work, who want to eat, and who want to serve, not knowing where they are going to be, or when their jobs are going to be cut off, or whether they will have a job after July 1; and I say to you, you have demoralized that agency, you have thrown confusion into the work of this vital, critical agency, and I do not believe any Member of this House ought to be willing to take the responsibility for doing that.

We have an investigating committee, with full powers, a zealous investigating committee, if you please. You and I may rest with the greatest feeling and security that speedily and thoroughly everything about the Communications Commission will be brought to us and the Congress may then take action.

[Here the gavel fell.]

Mr. RAYBURN. Mr. Chairman, I think I have a right to speak on this amendment because I happened to be the chairman of the committee that reported the bill to set up the Communications Commission and was the author of the bill. Before that time there was chaos in communications throughout the length and breadth of the land. The telegraph and telephone business had hardly been touched by the agencies that were supposed to handle them, the Interstate Commission. The old Radio Commission was devoting a little time to broadcasting and to broadcasting only. It was thought at that time that all communications should come under one commission of the Government. This was done back in 1934.

Now, Mr. Chairman, if the amendment offered by the gentleman from South Dakota should be brushed aside as sheer demagogy, that would be one thing. If the begging of the question by the gentleman from New York that if the investigating committee reported between now and the first of July were convincing, that would be another thing. I do not appeal to your prejudices or to your passions, and I do not accuse people of demagogy, but I do want to counsel with your reason, with your reason I repeat, with all the earnestness I can command. A great war is on, the world is aflame and the air is full of propaganda from every conceivable portion of the earth. There is only one agency in the United States of America, let me say to you, that has any control whatsoever over the air of the United States. Do you by your vote at this time want to strike down that only agency?

The CHAIRMAN. All time has expired. The question recurs on the amendment offered by the gentleman from South Dakota [Mr. CASE].

The question was taken; and on a division (demanded by Mr. CASE) there were—ayes 87, noes 162.

So the amendment was rejected.

The CHAIRMAN. May the Chair say at this time, that it is only fair to advise the Members that the Clerk, in the absence of any amendments on the desk and in the absence of any objection from members of the committee, was pursuing the course heretofore followed in the reading of bills.

The Clerk will read.

The Clerk read as follows:

Salaries and expenses, national defense: For all expenses necessary to enable the Federal Communications Commission, without regard to section 3709 of the Revised Statutes, to perform its functions related to national defense, including radio monitoring and foreign broadcast analysis, including all of the items of expenditure for which the appropriation "Salaries and expenses, Federal Communications Commission," is available and not to exceed $9,000 for salary of Director of the Foreign Broadcast Intelligence Service; not to exceed 56 passenger-carrying automobiles; not to exceed $50,000 for the temporary employment of persons or organizations, by contract or otherwise, without regard to the civil service and classification laws and, in the case of language or other experts, without regard to any requirements of this act with respect to citizenship, where citizens qualified to perform such work are not available; allowances for living quarters, including heat, fuel, and light (not exceeding $1,700 for any one person), as authorized by the act approved June 26, 1930 (5 U. S. C. 118a); and printing and binding, $5,590,314.

Mr. DIRKSEN. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. DIRKSEN: Page 13, line 14, strike out the period, insert a colon and the following: "*Provided*, That upon the expiration of 60 days after the cessation of hostilities between the United States and the principal enemy powers or after the date of an armistice between the United States and the principal enemy powers, this appropriation shall cease to be available for obligations unless Congress shall otherwise provide by law."

Mr. WOODRUM of Virginia. Mr. Chairman, I have no objection to that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. DIRKSEN].

The amendment was agreed to.

Mr. DWORSHAK. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. DWORSHAK: Page 13, line 4, strike out "$5,590,314" and insert "$5,384,154."

Mr. DWORSHAK. Mr. Chairman, this amendment simply proposes to eliminate $206,160 which has been provided in the bill for the use of the war-problems division of the law department of the Federal Communications Commission. Unlike the amendment which has just been disposed of, I do not believe there will be much opposition or controversy over this proposed amendment. I believe the subcommittee which has considered this bill probably will be inclined to support my amendment. In proof of that assertion I quote one paragraph of the committee's report:

The committee calls attention to the provisions in the bill providing $206,160 for a war-problems division under the law department. The committee has not eliminated these funds because they are requested as a national defense measure, but it does regard the value of such projcts with some skepticism and recommends that the Commission carefully consider the desirability of discontinuing them.

Mr. Chairman, I think it is our responsibility, not that of the Federal Communications Commission, to determine whether this particular division shall be continued or discontinued.

Mr. AUGUST H. ANDRESEN. Mr Chairman, will the gentleman yield?

Mr. DWORSHAK. I yield to the gentleman from Minnesota.

Mr. AUGUST H. ANDRESEN. Was any attempt made by an official of the Commission to justify this appropriation?

Mr. DWORSHAK. Yes. The officials pointed out in the hearings that this new War Problems Division was created early in 1942 to take care of the peculiar problems arising because of our participation in the war. However, the normal functions of the law department certainly can be carried on and expanded in wartime. The hearings disclosed that normally the law department employs 56 attorneys. The War Problems Division has 15 attorneys and 8 other employees.

I call attention to the fact that while it has been said that the proposed funds for this Commission have been cut by $479,686, that is only reduced from the Budget request; and even with the adoption of my amendment this bill carries more than the amount provided during the current year for the operation of this Commission.

May I stress the point that for the regular activities of this Commission $2,000,000 is provided, and that under the heading of national defense activities more than $5,000,000 is provided, so that with the adoption of my amendment no effort will be made to interfere with or frustrate the work of the Commission insofar as the war program is concerned.

Much has been said about duplication; that it is time to eliminate 1,000,000 Federal employees of the 3,000,000 now on the pay roll. The only way we can retrench is to retrench. It seems to me this is an evidence of the good faith of Congress in serving notice upon these commissions that existing peacetime personnel should be readjusted and utilized to the fullest extent, so that the emergency activities arising from our participation in the war can be carried on successfully and efficiently.

I do not want to interfere with the operation of this Commission, but I believe it is time to consider the serious aspects of the manpower problem now confronting our country.

I ask the Committee at this time to support this amendment, which eliminates only $206,160 for a war-problems division. Let us serve notice that the regular law department of the Federal Communications Commission should carry on effectively.

Mr. WOODRUM of Virginia. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 3 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. WOODRUM of Virginia. Mr. Chairman, I direct the attention of the Committee especially to the fact that this is a part of the national-defense program of the Federal Communications Commission, a particular appropriation for that purpose, not a part of their regular activities.

The War Problems Division, a very small unit, with a small amount of money involved, was set up by the Federal Communications Commission at the request of the Board of War Communications, which is composed of representatives of the Army, the Navy, the State Department, the Marine Corps, and the other agencies interested in communications. It has to deal and it is the only agency having to deal with the broad subject of international communications, the priority of war communications, the sufficiency of telegraph and telephone communications, and the various and sundry complicated legal questions that arise.

When we are establishing and maintaining this intensive network of international communications which are brought about by this war effort, as our committee says, we felt and we suggested that the Federal Communications Commission ought to survey it carefully to see whether it is necessary. They say it is necessary. The War Communications Board says it is necessary. The Army and the Navy say it is necessary. It is a small item, and I believe we ought not now to delete it and deprive them of the functions of that activity.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho.

The question was taken; and on a division (demanded by Mr. DWORSHAK) there were—ayes 76, noes 99.

So the amendment was rejected.

The Clerk read as follows:

National defense activities: For all necessary expenses (excepting printing and binding) to enable the Federal Power Commission to perform additional activities in connection with the national security and defense, including activities under the provisions of the Federal Power Act, activities under Executive Order No. 9165, dated May 19, 1942, and activities for the protection of the electric power supply against hostile acts, such expenses to include all items of expenditure for which the appropriations under the heading "Salaries and expenses, Federal Power Commission," are available, $519,255: *Provided*, That the Commission may make expenditures in addition to the foregoing, for duties connected with the national security and defense from other appropriations available to it.

Mr. DIRKSEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DIRKSEN: On page 14, line 21, strike out the period and insert a colon and the following: "*Provided*, That upon the expiration of 60 days after the cessation of hostilities between the United States and the principal enemy powers or after the date of an armistice between the United States and the principal enemy powers, this appropriation shall cease to be available for obligations unless Congress shall otherwise provide by law."

Mr. WOODRUM of Virginia. I have no objection to the amendment, Mr. Chairman.

The amendment was agreed to.

COX INVESTIGATION

The House on Thursday approved the Cox resolution (H. Res. 122) asking for an appropriation of $60,000 to carry on his investigation of the FCC. The Resolution which has been referred to the House Committee on Accounts is as follows:

"That the expenses of the study and investigation by the select committee created by H. Res. 21 not to exceed $60,000, including expenditures for the employment of clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee conducting such investigation and study or any part thereof, signed by the Chairman of the committee and approved by the Committee on Accounts.

"The official stenographers to committees may be used at all hearings held in the District of Columbia unless otherwise officially engaged."

Labor

48-HOUR WEEK

If usually well-informed sources are correct, smaller radio stations in the 32 "labor shortage areas" will not need to institute the 48-hour week ordered last week by President Roosevelt (NAB REPORTS, p. 55).

The War Manpower Commission has not yet issued its rules and regulations for administering the Executive Order, and nothing definite can be said until these come out, probably next Tuesday.

However, it is said that these rules will exempt not only employers of less than eight but also *groups* of employees when putting such groups on a longer work week would not enable an employer to release manpower.

If this is true, a station now getting along with four or five technicians on a 40-hour week would be allowed to continue this schedule if it could show that lengthening the work week to 48 hours would not permit the release of a technician.

It would be well for every station in the labor shortage areas to canvass each department—technical, program, clerical, etc.—to see whether the institution of a 48-hour week would permit the release of any employees. If not, why not? Each station may be required to answer this question.

TWO RATES OF PAY

A few stations have employees who work at two different rates of pay during the week. In the past, the Wage and Hour Division has required computation of the overtime rates by dividing total earnings at the two rates by total hours at the two jobs, and multiplying the result by one and one-half. Now the Wage and Hour Division says that one and one-half times the rate in effect when the overtime occurs is acceptable. Please make a note of this change on page 7 of your green Wage and Hour pamphlet.

FARM RADIO BATTERIES

The farm battery situation this month received the attention of legislators, both state and national.

The North Dakota legislature has memorialized the Congress of the United States appealing for relief and Representative Karl Stefan of Nebraska discussed the problem in the House.

Said Representative Stefan:

If conditions that exist in northeast Nebraska respecting the procurement of radio batteries are general throughout the United States, thousands of radio listeners who must depend upon battery receiving sets will be cut off from valuable radio service.

Hundreds of owners of battery receiving sets in northeast Nebraska cannot get batteries. One radio station has told its listeners that because zinc is needed so badly for war purposes it may be impossible for them to get batteries, and as a result a great many letters have been received indicating that large numbers of radio receiving sets have already been put out of use.

There are hundreds of families in my district who do not have electricity. Many of them have applied for R.E.A. hook-up. In some parts of my district the poles, insulators, and transformers have been installed, but, due to the inability to get copper conductors, these projects must wait over until after the war for completion. This means that hundreds of people who have planned to convert their battery receiving sets to electric-powered sets will have to rely on battery sets for the duration.

A very great number of families that depend solely on radio for news and information are threatened with the discontinuation of this service because they can get no batteries, and the result will be that radio stations will lose thousands upon thousands of listeners.

There are many farmers in my district who do not take newspapers, who do not have telephones, and who have depended entirely on radio for news about livestock markets, and so forth.

One radio station in my district made a survey a few days ago and received over 300 letters from owners of battery receiving sets. Out of the first 234 tabulated, the report is that in a very small area 384 radio sets are now out of use or soon will be. Forty listeners mentioned the time that their machines have been out of use as follows:

One, 6 months
Four, 5 months
Eight, 3 months
Twenty-five, 2 months
Two, 2 weeks

Radio is a valuable and absolutely necessary part of the life of the people of my district. The people there are most patriotic. They have sent their sons to war. With less than the needed amount of farm help, they have produced a record-breaking amount of food. They are preparing to follow the suggestions of our Government to plant more and more in order to raise more crops, and to produce more meat to feed our fighting men, our allies and our own civilian population. The work of our farms will be more important than ever before in the history of our country during the coming planting time and the time when harvest approaches. The farmer, his wife, and children are and will continue to be the busiest people in our land. They will work from the early dark hours of the morning until far into the night without regard to minimum hours or minimum wages. Their time is just as precious as is the time of the factory or the office in the cities. They must depend upon information about condition of roads, weather, markets, and so forth, which is so vitally important and necessary to keep the farm business going. These farmers have conducted their business in spite of the fact that they face this labor shortage and have faced a shortage of farm machinery and repairs for that machinery. Many of them would like to have their farms electrified through the extension of R.E.A., which had to be curtailed because we could get no more copper and other material for projects, even those partially completed. Now, hundreds of them have a just complaint because they cannot get a battery to keep the medium of information—the radio receiving set—in condition to get the valuable reports which are so necessary to keep the farm fully informed on conditions as they exist in our country and elsewhere, the progress of the war, markets, and weather and road conditions. These farmers listen carefully to the Government-planned programs on drives for the sale of bonds and other matters so vital for the successful prosecution of the war. They invest heavily in bonds and the Treasury Department is largely dependent upon the information which the radio stations broadcast regarding the bond sales and other matters. Should the radio stations lose hundreds of thousands of listeners because these listeners can no longer get batteries for their receiving sets, our Government departments that depend upon the radio stations to furnish that information to these listeners, will lose, in my opinion, thousands of supporters of their programs and, as a result, the war effort will be the loser.

You may be interested to know that the Treasury Department, in its war savings program publicity, does not pay anything for radio announcements and radio programs which the stations use. The Department has prepared radio announcemente and there is a little printing expense, but the radio stations have not charged the Government 1 cent for millions of dollars' worth of free publicity which has gone to our people over many of these stations.

I am not prepared to say that zinc or other materials which go into the construction of a radio battery are so scarce that we must now discontinue service for the people who have no means of receiving absolutely necessary news over the radio other than battery receiving sets. I feel that the situation is so serious that immediate attention should be given to it in order that something be done, if that is at all possible, to give these people some immediate assistance. If some assistance could be given to them now, I am sure that we will not only be aiding them to continue to receive the radio service to which they are entitled, but we will be doing a service to our war effort by keeping thousands of people fully informed, whereas, if the service is discontinued, our Government will lose the attention of some of the most patriotic people in our land. Do not forget that a radio receiving set is almost as necessary on a farm today as is a plow.

NAB supplemented its basic information on the subject through the cooperation of the industry, other civilian groups and several Government agencies. Final requests for information from broadcasters was made in NAB REPORTS of January 22 and February 5.

Procedure for preventing the situation becoming acute follows the pattern employed when broadcast equipment was involved.

TECHNICIAN TRAINING

A substantial number of men and women are now employed in the industry who hold restricted operator permits. Many of them have only a very limited technical knowledge of radio, but are anxious to improve their usefulness through spare time study. Chief engineers and other experienced technical personnel can be very helpful in directing this study effort.

Several recent government publications, used in vocational training of war workers, are suggested for this purpose.

1. "Unit Course, Mechanic Learner—Radio," used in training civilian personnel of the U. S. Army Signal Corps. This publication may be obtained from the printer, John Spencer, Inc., Chester, Pa., at $1.35 per copy, f.o.b. Chester. The course comprises 380 pages of extensively illustrated lessons. Described are mechanical operations, such as soldering practices, soldering wires to terminals, cable forming, hardware used in radio work, drilling and tapping, chasis fabrication, use of the multimeter, resistance and continuity checking, testing tubes, capacitor testing, removal and reinstallation of components from radio chassis and coil repairing.

Descriptive material covers power supplies, audio oscillators, Hartley oscillators, resistance coupled oscillators, radio frequency amplifiers and simple receivers.

The course is particularly recommended for training broadcast station maintenance personnel and home receiver service men. Only limited electrical knowledge is necessary to absorb the instructions.

2. The New York State Education Department, in cooperation with the U. S. Office of Education, has prepared a series of monographs. These publications comprise a laboratory course, well suited to the training of technical personnel for broadcast stations and radio service work, who lack even an elementary knowledge of electricity. The courses do not prepare the student for FCC operator examinations, but are useful in acquiring a good general background of radio fundamentals. The laboratory experiment type of presentation is used throughout the courses.

Each of these monographs present a suggested course dealing with basic principles. The training supervisor should select from these monographs those units and lessons which fit the needs of the individual student, and omit or modify the other portions of the course.

It is suggested that study be in the order listed below.

(a) "Direct Current Fundamentals," 245 pages, price $1.35.

(b) "Alternating Current Fundamentals," 164 pages, price $1.25.

(c) "Measurements," 108 pages, price $.90.

(d) "Fundamentals of Radio Receivers," 320 pages, price $1.50.

(e) "Electronics," 148 pages, price $1.10.

This series of publications is obtainable from the New York State Education Department, Albany, New York. Prices indicated are postpaid.

Station engineers can assist radio service organizations by passing this information along to individuals interested in training men and women in the servicing of home receivers.

FLY COMMENTS ON STATIONS' FINANCIAL CONDITION

The results of the 1942 preliminary survey of financial conditions of the broadcast stations are about roughly what the Commission had expected, FCC Chairman James Lawrence Fly told a press conference early this week. There are still a sizable number of stations that failed to get in the returns on this series of questions, the Chairman said.

"The results of this survey," the Chairman said, "are so far roughly about what we expected. 1942, due to the various stimuli in most of the communities, and due further to the fact that the restrictions had not had their full impact during the major portion of the year was on the whole a pretty good year. We are fearful that 1943 and 1944 are likely to be much worse for very obvious reasons."

Mr. Fly said that a handful of stations folded up; six or eight of them have surrendered their licenses, and there have been other possibilities of surrendering licenses, but the number that have lost money recently, "have been pushed into the red due to the present conditions is to date not a startling number. I think it is however obviously a very significant problem and something that we must do whatever we can to alleviate."

Questioned about the Petrillo suggestions for royalties Mr. Fly said that he did not feel competent to pass on the merits of the proposal. He said that he believed as a practical matter that the industry ought to be careful "in any potentiality, to be practical in settling the whole difficulty, and I should be very reluctant to say that it should not be given serious consideration. It is conceivable that something could be worked out of it, or in any event that a good faith attempt to settle the matter around the table will lead to some form of arriving at a satisfactory settlement."

NETWORK RULES ARGUMENT

Continuing the argument before the Supreme Court last week on the validity of the FCC's chain broadcasting regulations, E. Willoughby Middleton, attorney for Stromberg Carlson Mfg. Co., licensee of WHAM, relied on the legal points made by Mr. Cahill for NBC, and introduced two others: (1) the intimation by the trial court that the affiliated stations considered their affiliation contracts burdensome was wrong so far as his client was concerned, their contract being "entirely satisfactory and in fact one of our most valuable assets"; and (2) WHAM had never had its day in court on the question of the validity of its affiliation contract, the FCC's announcement having indicated only an investigation of the networks and not the affiliation contracts.

Charles Fahy, Solicitor General, argued the case for the FCC. Admitting that the parties to the Commission's investigation were entitled to a full hearing, he contended that such had been the case. Nothing in the Constitution, he said, required a full hearing to be had before a court.

Arguing to Mr. Cahill's point that the regulations would abridge the right of free speech guaranteed by the First Amendment to the Constitution, Mr. Fahy declared that nothing in the regulations would deny any person the right to say whatever he might say under the First Amendment, or deny any radio station the right to rebroadcast any such statement. No restraint of free speech was intended or will be effected by the regulations, he averred.

Ample statutory authority exists for the regulations, he said, under the Communications Act which authorizes whatever regulations may be necessary in the public interest, excepting only those expressly prohibited by the Act.

Referring to Section 311 of the Act, the Chief Justice inquired what section empowered the Commission to revoke a station license in the absence of court adjudication that the licensee was guilty of a violation of the Sherman Act. The Solicitor General replied that the Commission has power to consider monopolistic practices under its power to determine what is in the public interest, and cited the legislative history of the Act in support of his contention.

Charles E. Hughes, Jr., representing CBS, argued that the trial court seemed to rely neither on the Commission's rule-making power nor on its licensing power, but rather on the two powers together. These two powers are separate and distinct, Mr. Hughes declared, and a decision based upon a loose integration of the two in order to support the Commission's authority is not a valid basis for affirmance of the regulations.

Mr. Justice Jackson, referring to Section 303(i), which empowers the Commission "to make special regulations applicable to radio stations engaged in chain broadcasting," asked: "What does Section 303(i) refer to unless it refers to relations between radio stations and network chains?"

"If you read 303(i) alone," Mr. Hughes replied, "the question is raised 'special regulations as to what?' The Commission has authority to make a wide variety of general regulations. The only conclusion is that that power means regulations of the same general type as authorized elsewhere in the Act but applicable only to chain stations rather than being applicable generally. The Government's construction of the Act that this section means something completely dissimliar from other associated provisions of the Act is offensive to all recognized rules of statutory construction."

As to the validity of the regulations under the Commission's licensing power, Mr. Hughes argued that it was beyond the authority of the Commission to follow such inflexible rules as to selection between applicants for facilities. The licensing power, he maintained, was given for the sole purpose of selecting the most competent operators in view of the physical limitations on radio service, and was not intended to be used as a threat to force stations to comply with the Commission's views as to how the business of broadcasting was to be conducted.

Mr. Justice Frankfurter asked if it would make any difference if the Commission came to the same conclusion on similar facts in an individual case. "Yes, a great difference," Mr. Hughes replied. "Whether these competitive facts can be considered in individual applications need not be decided here, but there can be no single controlling test as the one contained in these regulations."

Mr. Fahy, again arguing for the FCC in the CBS case, stressed the point that if the Commission can consider competition in individual cases, it must have the power to promulgate general regulations on the basis of its experience in passing on individual cases. Such a general rule is beneficial both to the administration of the Act and to the radio industry, he maintained, for the stations will know in advance what the Commission's policy will be with regard to license applications.

Louis G. Caldwell, representing MBS, maintained that the obvious purpose of the Radio Act of 1927 and the Communications Act of 1934 was to guard against monopolis, chiefly the development of chains driving out local programs and controlling local stations. He argued that under the regulations the networks could still obtain options and engage in chain broadcasting, but that they could not keep new networks out of the majority of the cities in the country.

Both NBC and CBS presented motions at the outset seeking a stay of the operation of the regulations for ten days after the court's decision in the event the case should be decided in favor of the Commission. The motions were unopposed. It is expected that the decision of the court will be handed down late next month or early in April. Conclusion of the argument marks the final opportunity in court for NBC and CBS to overthrow the regulations, unless the Supreme Court remands the cases to the statutory three-judge court for trial on the merits.

FREE TIME AND PER INQUIRY

Newby, Peron and Flitcraft Advertising Co., Chicago, is soliciting broadcasting stations with a deal for the "Parfax Gas Booster" on a per-inquiry basis.

The United Advertising Companies, Inc., Chicago, again joins the P-I caravan, this time in the interests of a client selling drinking glasses, and another offering "Money Belts."

Union Fork and Hoe Company, Columbus, Ohio, is attempting to "favor" the broadcasting industry by giving them the privilege of donating free time, as a service to the nation's Victory Gardeners, to promote the company's manual on tool repairs.

All of these companies should be informed by the stations that these methods of advertising are unethical and business will be accepted only on a standard card-rate basis.

CHARLES KAHLER

Any station desiring information about Charles Kahler, alias Dale Tyler, Charles Bennett or Ben Mason should communicate with the NAB. He has been on the Pacific Coast.

PRICE PRAISES RADIO

In a letter to Vice-President Wallace and Speaker Rayburn this week, Byron Price, Director of Censorship, praised the cooperation of the broadcasting industry with his office.

He said that "the entire group of large and small broadcasters have cooperated magnificently in this voluntary enveavor."

CODE MANUAL

New pages for substitution in the Code Manual were mailed to member stations on Tuesday of this week. Extra sets of these new pages may be obtained on request to the Secretary of the Code Compliance Committee at NAB Headquarters, Washington, D. C.

WBAP AND KGKO JOBBERS COOPERATE

WBAP and KGKO, Fort Worth, and radio jobbers of same city cooperated in bringing information and instruction concerning occupational deferment of radio servicemen to the service fraternity.

The stations paid for the printing of the material and the jobbers did the mailing. "A good mutual proposition," said R. C. Stinson, technical supervisor. "Jobbers and servicemen both appreciated it."

N. Y. C. JOBBER TELLS SERVICEMEN

H. L. Dalis, Inc., radio parts jobber, New York City, next week will mail 1,500 copies of the procedure to be followed by self-employed radio servicemen or their employers in handling deferment cases. The mailing covers firms in metropolitan New York including southern Connecticut and northern Jersey.

WALL MAINTENANCE PROGRAM

WALL, Middletown, N. Y., has scheduled a 3 p. m. Sunday program featuring Joe Gibbons, local radio technician. Joe gives radio set maintenance hints and is supported with excellent amateur talent. Show is titled "Keep Listening."

TRADE PAPER PROMOTES SERVICE

Alex H. Kolbe, managing director, Radio & Television Journal, has launched a promotion to the trade in furtherance of keeping radios in first-class operating condition. He has distributed thousands of two color window posters among dealers and servicemen.

Top display reads: "Don't Let Your Radio Die!" Then follows: "If your radio is not in first-class condition, have our service department take care of it at once . . . and keep it so for the duration."

FEDERAL LEGISLATION

SENATE

S. 569 (Capper, R-Kans.) LIQUOR ADVERTISING—To prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

ARIZONA:

S. 104 (Minotto) ADVERTISING EXPENSES—CANDIDATES—To exempt from limitations of expenditures by public office candidates the amounts spent for magazine and radio broadcasting.

CALIFORNIA:

A. 1311 (Thurman & Call) ADVERTISING—PHOTOGRAPHY—No person's portrait, name, or picture can be used for advertising or exhibit without obtaining permission from the individual first. Referred to Judiciary Committee.

A. 1824 (Lyons) (For Substitution) FOOD AND DRUGS—To amend Section 26825 and 26826 of the Health and Safety Code, so as to include food. Referred to Committee on Public Health.

IDAHO:

S. 55 (Hanis and Manville) ADVERTISING OF LIQUOR—Amends Section 907, Chapter 222 Idaho Session Laws 1939 prohibiting advertising of spirituous, vinous malt or other alcoholic or intoxicating liquor or beverages and providing an exception. Referred to Committee on State Affairs in Senate, 1/23/43. Passed the Senate, 2/3/43. Referred to Committee on State Affairs in House, 2/5/43. Reported out of Committee without Recommendation, 2/6/43 and recommitted to Committee on State Affairs, 2/8/43.

NORTH CAROLINA:

H. 373 (Hatch et al) LIBEL AND SLANDER—RADIO STATIONS—Partially safeguarding radio stations from libel and slander suits. Referred to Committee on Judiciary.

NORTH DAKOTA:

HCR R (Dahlen & Forseth) RADIOS ON FARMS—Memorializing U. S. Congress to lift restrictions on batteries for radios on farms. Referred to Committee on Federal Relations.

SOUTH DAKOTA:

H. 163 (Hyde) LIBEL—POLITICS—Relating to the writing, printing, or circulating through the mails. or otherwise, of letter, circular, bill, placard, or poster, relating to any election or candidate at any election, without showing source and authorship; false statements in such letter, circular, bill, placard or poster; what constitutes political criminal libel.

TEXAS:

H. 290 (Knight) RADIO—ELECTION CAMPAIGNING—Providing that any representative, etc., of any radio station who sells, leases, or gives an option on any radio time or services for any purpose designed to advance or defeat the candidacy of any person for State office, must make a report within three (3) days to the Secretary of State, etc. Referred to Committee on State Affairs.

WASHINGTON:

HJM 8 (Behm) ALCOHOLIC BEVERAGES—ADVERTISING—To prohibit circulation in interstate commerce and on the radio of advertising of alcoholic beverages. Referred to Committee on Memorials.

S. 205 (Marsh) COPYRIGHTS—GROSS SALES—Repeals chapter 218, laws of 1937. Relates to use of copyrights and public performance rights of musical compositions. It leaves a three per cent tax on gross receipts of sales.

916 STATIONS

During the month of January, 1943, the Federal Communications Commission issued operating license to one station, and one station was deleted. A comparative table by month follows:

	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1
Operating	891	893	897	899	906	906	905	905	907	909	908	909	909
Construction ...	32	31	27	25	18	19	16	15	12	10	10	8	7
	923	924	924	924	924	925	921	920	919	919	918	917	916

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 22. They are subject to change.

Tuesday, February 23

WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of license, **680 kc.,** 250 watts, unlimited.

Thursday, February 25

WORK—York Broadcasting Company, York, Pa.—Modification of C. P., **1350 kc.,** 1 KW, DA-night, unlimited.

Further Consolidated Hearing

WALB—Herald Publishing Company, Albany, Ga.—Renewal of license, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license Station WALB, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.,** 1 KW, DA-night, unlimited.

Friday, February 26

W55NY—William G. H. Finch, New York, N. Y.—Modification of C. P., **45500 kc.,** 8,500 sq. miles, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted modification of license to change hours of operation from sharing WASH to unlimited with facilities of WASH (B2-ML-1152).

KTBC—A. W. Walker, Jr., R. B. Anderson, and R. A. Stuart, Transferors, and (Mrs.) Claudia T. Johnson, Transferee, Austin, Texas.—Granted transfer of control (B3-TC-316) of State Capital Broadcasting Association, Inc., licensee of station KTBC, from A. W. Walker, Jr., R. B. Anderson and R. A. Stuart to Claudia T. Johnson, for a consideration of $17,500 in cash.

WORK—York Broadcasting Co., York, Pa.—Granted petition for reconsideration of Commission's action of July 7, 1942, designating for hearing application for modification of construction permit (B2-MP-1560), to install new transmitter, and granted said application.

DESIGNATED FOR HEARING

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, co-partners, d/b as Red Lands Broadcasting Corp., Lufkin, Texas.—Designated for hearing application (B3-R-962) for renewal of license.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, co-partners, d/b as Red Lands Broadcasting Association (Assignor), Darrell E. Yates (Assignee), Lufkin, Texas.—Designated for hearing application (B3-AL-355) for voluntary assignment of license from Ben T. Wilson, R. A. Corbett and Thomas W. Baker, etc. (Assignor), to Darrell E. Yates (Assignee).

MISCELLANEOUS

KQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Granted petition for a 30-day continuance of the hearing set for February 15, 1943, on application for modification of license to operate on **1470 kc.,** with 1 KW day, 500 watts night, unlimited time; hearing continued to March 15, 1943 (Docket No. 6166).

The Liberty Life Insurance Co., Portable Mobile, Area of Columbia, S. C.—Granted modification of license of relay station to change name of licensee from The Liberty Life Insurance Co. to Surety Life Insurance Co. (B3-MLRE-110).

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1489).

WEGO—Wayne M. Nelson, Concord, N. C.—Granted modification of construction permit as modified, for new broadcast station, for extension of completion date from February 9 to March 9, 1943 (B3-MP-1697).

WBAL—Hearst Radio, Inc., Baltimore, Md.—Approved cancellation of Special Service Authorization expiring April 1, 1944, upon request of applicant.

APPLICATIONS FILED AT FCC

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Modification of construction permit (B2-P-2547 as modified.

which authorized increase in power, installation of new transmitter and directional antenna for night use, and change hours of operation) for extension of completion date from 3-1-43 to 4-1-43.

600 Kilocycles

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Modification of construction permit (B3-P-2814 as modified which authorized installation of new equipment and directional antenna for day and night use, change of frequency, increase in power and move) for extension of completion date from 3-22-43 to 6-22-43.

710 Kilocycles

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Modification of construction permit (B3-P-3355 as modified which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and move of transmitter) for extension of completion date from 3-5-43 to 5-5-43.

930 Kilocycles

WPAT—North Jersey Broadcasting Co., Inc., Paterson, N. J.—Transfer of control of licensee corporation from Frank Falknor and Rex Schepp to Donald Flamm (50 per cent of stock).

1410 Kilocycles

WEGO—Wayne M. Nelson, Concord, N. C.—Modification of construction permit (B3-P-3007 as modified which authorized new broadcast station) for extension of completion date from 2-9-43 to 3-9-43.

1490 Kilocycles

WSAP—Portsmouth Radio Corp., Portsmouth, Va.—License to cover construction permit (B2-P-3097 as modified) for a new broadcast station.

WSAP—Portsmouth Radio Corp., Portsmouth, Va.—Authority to determine operating power by direct measurement of antenna power.

WOSH—Howard H. Wilson, Oshkosh, Wis.—Voluntary assignment of license from Howard H. Wilson to Oshkosh Broadcasting Company.

MISCELLANEOUS APPLICATIONS

KEJK—National Broadcasting Co., Inc., Portable-Mobile, Area San Francisco, Calif.—Construction permit to install new transmitter.

KNBC—National Broadcasting Co., Inc., Portable-Mobile, Area San Francisco, Calif.—Construction permit to install new transmitter and reduce power from 100 watts to 75 watts.

NEW—The Crosley Corporation, Mason, Ohio.—Construction permit for a new International Broadcast Station. Frequencies **6080, 9590, 11710, 15250, 17800** and **21650.** Power: 200 kilowatts. Emission: A3.

NEW—The Crosley Corporation, Mason, Ohio.—Construction permit for a new International Broadcast Station. Frequencies **6080, 9590, 11710, 15250, 17800** and **21650.** Power: 200 kilowatts. Emission: A3.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bausch & Lomb Optical Co., Rochester, N. Y., is charged in a complaint with misrepresenting the superiority of the Orthogon type of spectacle lenses it manufactures for resale by dealers, opticians and optometrists. (4903)

Conway Tailors—Use of lottery methods in the sale of men's clothing is alleged in a complaint issued against Ben Cottonbrock, trading as Conway Tailors, 434 Elm St., Cincinnati. (4910)

Freedom Chemical Co., Inc.—Misrepresentation of the quality and performance of a so-called anti-freeze solution designated "60 Below" is alleged in a complaint issued against Freedom Chemical Co., Inc., 815 Superior Ave., East, Cleveland, Ohio. The preparation is sold by the respondent to jobbers, garages and service stations for resale to the public and is advertised in newspapers, trade journals, pamphlets and circular letters. (4905)

Hollywood Film Studios, 7021 Santa Monica Boulevard, Hollywood, is charged in a complaint with misrepresenting the quality of photographic enlargements he sells and the terms on which they may be obtained. (4902)

Master Laboratories, Inc., 27th and N Streets, Omaha, Nebr., compounding and selling hog and poultry medicinal preparations designated "Master Liquid Hog Medicine," "One-Shot Hog Wormer," "Master Floresine," "Master Fluid," "Master Liquid Poultry Medicine," and "Masterol" recommended for use in the prevention of and treatment for various hog and poultry diseases and ailments, are charged in a complaint with misrepresentation. (4908)

H. L. Robinson Company—A complaint has been issued charging Hubert L. Robinson, trading as H. L. Robinson Co., 1447 Northwest Sandy Blvd., Portland, Oreg., with concealing the true terms or conditions under which he sells or leases the Neon display signs he manufactures. (4906)

Superior Hatchery, Windsor, Mo., engaged in the hatchery business and in the sale of chickens and baby chicks, is charged in a complaint with misrepresentation. (4909)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

STIPULATION

During the past week the Commission has announced the following stipulation:

Allied Laboratories, Inc., also trading as Pitman-Moore Co., Indianapolis, has entered into a stipulation to cease and desist from misleading advertising in connection with the sale of biological products used in the treatment of diseases of domestic animals. (3608)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 9, February 26, 1943

48-HOUR WEEK

The War Manpower Commission will consider the possibility of issuing a directive about radio to its local enforcement officials and to local draft boards relative to the 48-hour week to take effect in 32 "critical" labor shortage areas before March 31.

Meantime, the NAB is making a study of working schedules in representative stations in several of the 32 areas to present to the WMC. The NAB believes that this study will show that an increase in present schedules would in few, if any, instances help to relieve the manpower shortage.

The NAB Labor Executive and Wage and Hour Committees, at a joint meeting February 23, heard a representative of the WMC explain the dual purpose of the 48-hour week order:

(1) To release men to war industries.

(2) To obviate the necessity for hiring more men.

The order is to be enforced locally. In all cases, the employer will be called upon to justify not going to a 48-hour week. To do this, he will be asked to explain in detail why the two purposes of the order (stated above) would not be served by increasing schedules to 48 hours.

Rules and regulations for enforcement of the order have not yet been made public.

SMALL STATIONS

At a press conference early this week FCC chairman James Lawrence Fly said that he will see that the financial statement of broadcast stations for 1942 will be made public. In this connection the chairman said, "As you know the material has come in from week to week more recently in driblets and I am rather convinced that before we get out any definite statement we will consider the regular annual reports. They will be in very shortly now and they will give us a very comprehensive coverage of the whole problem, and I think that the financial figures which we make up will be based on the regular financial reports of the stations." He explained this because it had been thought at one time that a preliminary report would take care of early needs. Mr. Fly said that the stations' annual reports are generally all in by March 15.

Referring still to the financial reports the chairman was told that there seems to be an idea among some advertisers that the financial plight of some of the small stations is not particularly a war problem—that they have been in financial straights for some time. Mr. Fly said that he did not believe that that "is quite accurate."

CONGRESSIONAL COMMITTEES

The membership of the Congressional committees to which bills affecting radio broadcasting are referred are listed on page 88 of this issue. For convenient reference, the various members are also listed by States within the NAB Districts.

GAS COUPONS

Effective February 24, workers in any industry are made eligible by OPA for additional mileage over and above the limit allowed on Class B coupon books. The additional mileage is ONLY for driving between home and a FIXED place or places of work in connection with the principal occupation of the individual.

The procedure is to apply to the local War Price and Rationing Board under Section 1394.7707(a) of the Gasoline Regulations as amended by Amendment 23 to Ration Order 5C.

Paragraph (b) of that section provides that an applicant for such additional mileage must establish "by clear and convincing proof" that: (1) such driving is between home and a fixed place or places of work, in connection with the principal occupation of the applicant or the person entitled to the use of the vehicle, (2) a bona fide ride-sharing arrangement has been made pursuant to which at least four persons (including the operator) are regularly carried in the vehicle for the purpose of going to and from their occupations, or that no such ride-sharing arrangement exists but that the vehicle carries as many persons as could reasonably be expected under the circumstances, and (3) there are no reasonably adequate alternative means of transportation.

If the local Rationing Board recommends allowance of additional mileage, it forwards the application to the "State Director" for final decision. The State Director is the person appointed by the Regional Administrator to decide appeals from the decisions of local rationing boards in a given area. Any person may appeal to the Regional Administrator from an adverse decision of the State Director, pursuant to Procedural Regulation No. 9.

GAS FOR REMOTES

An amendment to the Gasoline Regulations to allow "preferred mileage" for radio engineers and technicians on temporary remotes may be expected any day, NAB is unofficially informed. Network engineers and Washington, D. C., station men met on January 29 with Richard C. Harrison, OPA Chief of Eligibility, Gasoline Rationing. Strong pleas for relief were made, the actual equipment that may be involved was exhibited, and supporting data was filed.

Present were: Ken Berkeley, WMAL; Burton Harkins, WOR; Clyde Hunt, WJSV; George McElrath, NBC; George Milne, Blue; and Russell P. Place, NAB Counsel.

FILE PD-1A'S LOCALLY

Another long step in the decentralization of War Production Board activities was made public today, when Chairman Donald M. Nelson announced a new WPB administrative order which directs that, after March 1, applications for priority assistance on Form PD-1A be filed with the nearest of the 131 WPB district offices.

STRESS MATTER OF APPEAL IN CONTACTS WITH RADIO REPAIRMEN

A meeting of St. Louis radio repairmen in the studios of KMOX has been scheduled by Harry Harvey, chief engineer. The NAB folio on Selective Service Occupational Bulletin No. 42 will be distributed.

At such meetings the matter of appeal should be discussed thoroughly because all local board members previously may not have given thought to the importance of maintaining broadcast service.

It is simple, however, to appeal the findings of the local board: Perhaps the simplest way is to write a letter to the local board, stating that you wish to appeal the classification to the Board of Appeals.

Another way is to go to the local board and sign the appeal form on the back of the registrants questionnaire. Ten days from date of mailing of notice of classification are allowed to make appeal. Also, it should be pointed out to radio servicemen that they must use the term radio repairman to indicate their business, because this is the language of occupational Bulletin No. 42.

IS THIS BELIEF CORRECT?

Radio Station WOW believes it carries the oldest non-denominational Sunday church service of any radio station in America. It is called "The World Radio Congregation" and has been on the air every Sunday, without a single interruption, since April 8, 1923. Rev. R. R. Brown is its pastor.

Has any station anywhere broadcast an identical type of program over a longer period? Write NAB.

CLARIFICATION OF MERCHANT MARINE TERMS

Such terms as "Merchant Marine," "United States Maritime Service" and the "United States Maritime Commission" are frequently manhandled on radio programs and in the press.

UNITED STATES MERCHANT MARINE is the over-all term which includes commercial vessels of all kinds and the personnel who operate and man them. It is never "The Marines," "The Coast Guard" or "The Navy." These ships are manned by officers of the Merchant Marine and seamen who are called *merchant seamen.* Term like "merchant marines" should never be used.

UNITED STATES MARITIME COMMISSION, established by an Act of Congress in 1936 as a separate federal agency, is composed of five commissioners appointed by the President. Its purpose is to foster the development and encourage the maintenance of a merchant marine, described above. It is a permanent agency whose war job is the construction of a cargo fleet—the Victory Fleet. During the war its peacetime operating function is assumed by the War Shipping Administration. Post-war job is to restore and maintain the peacetime merchant marine.

WAR SHIPPING ADMINISTRATION, established in February 1942 by the President, assumes (for the duration of the war plus six months) the functions, duties and powers of the United States Maritime Commission with respect to the operation, purchase, charter, insurance, repair, maintenance and requisition of merchant cargo vessels. The War Shipping Administration is also charged with the operation of the Division of Training which is composed of two principal branches:

(1) UNITED STATES MERCHANT MARINE CADET CORPS. Here young men without sea experience are trained to become officers.

(2) UNITED STATES MARITIME SERVICE. Here young men are trained to become seamen. Also the service gives refresher courses to experienced seamen to become officers.

BRINGING IN THE SETS

Listeners of the following stations also have received advice to take radio sets needing repairs to the servicemen:

KGIW—Alamosa; WNBF—Binghamton; WHFC—Cicero; WOSU—Columbus, Ohio; WDAY—Fargo; WFIN—Findlay; WEBQ—Harrisburg, Ill.; KOMA—Oklahoma City; KVOE—Santa Ana; KRRV—Sherman; WDZ—Tuscola, and WJSV—Washington, D. C.

FM AND TELEVISION

Because of extreme shortages in material, equipment and skilled personnel, and in order to sustain the interest in television and high frequency (FM) broadcasting, the FCC has adopted the following policies:

FM Broadcasting Stations

The Commission will not dismiss or deny any FM applications which cannot qualify under the provisions of the Memorandum Opinion of April 27, 1942 (freeze order), for construction permits or for modification of construction permits requesting extension of the periods of construction. Instead, the Commission will take no action at this time upon such applications but will retain them in the pending file. Applicants for construction permits whose applications were surrendered or dismissed pursuant to the Memorandum Opinion of April 27, 1942, may request reinstatement of their applications.

This policy is in addition to the policy announced August 4, 1942, which provided for the issuance of licenses for high frequency (FM) broadcast stations during the war provided construction had reached a point where substantial service could be rendered.

Television

Holders of construction permits for television stations, experimental and commercial, may obtain licenses during the war to operate existing facilities on either an experimental or commercial basis, provided construction has reached a point where the station is capable of rendering a substantial service. Licenses issued under this policy will be subject to the condition that construction will be completed in accordance with the Rules, Regulations and Standards of the Federal Communications Commission as soon as the necessary materials and engineering personnel become available.

The Commission also decided to continue its policy of not dismissing or denying television applications which cannot qualify under the provisions of the Memorandum Opinion of April 27, 1942. Instead, no action will be taken at this time upon such applications and they will be held in the pending file. Applicants for construction permits for television stations whose construction permits have been surrendered or dismissed pursuant to the freeze order may request reinstatement of their applications.

COX COMMITTEE COUNSEL

The House Committee headed by Edward E. Cox (D-Ga) to conduct the investigation of the Federal Communications Commission pursuant to the Cox Resolution, announces the engagement of Honorable Eugene L. Garey, senior member of Garey, Desvernine and Garey, New York City, as its counsel.

"Mr. Garey is an eminent lawyer of great ability and high standing," said a Committee spokesman, "and will do his work without prejudice or predilection and with the single purpose of constructive service in the public interest. The Committee deems itself fortunate in having Mr. Garey connected with the investigation."

Mr. Garey, 51 years old, was born in Chicago and educated and practiced in Illinois for some years. He has been engaged in the practice of law in New York for the past quarter of a century. He is a member of the Committee on Administrative Law of the American Bar Association which collaborated in drafting the Walter-Logan bill. His office is at 63 Wall Street, New York.

Radio Bills in Congress

Radio Advertising

Three Bills would prohibit the advertising of alcoholic beverages by radio.

Senator Johnson (D-Colo.) introduced S. 682, which provides criminal penalties and loss of station license for broadcasting advertising or information concerning any alcoholic beverage, if the broadcast is received or receivable by means of any ordinary receiving set in any State of the United States or any Canadian Province at any time when the broadcasting of similar advertising by a radio station located in such State or Province is prohibited by the laws or regulations of such State or Province. This is identical with his bill (S. 517) introduced in the 77th Congress, which died in Committee, no hearings having been held. In the 76th Congress, his first bill (also S. 517) was favorably reported out, but action was spiked when Senator Clark of Missouri threatened on the floor to introduce the anti-lynching amendment if the bill was brought up. The present bill was referred to the Senate Committee on Interstate Commerce. NAB has written Chairman Wheeler, asking to be advised if public hearings are held; no reply has been received as yet.

Senator Capper (R-Kans.) put in a bill (S. 569) making it unlawful to broadcast any advertisement of alcoholic beverages (Sec. 4) and imposing criminal penalties for violation. The bill would also bar the transportation in interstate commerce of any kind of liquor. No word has been received from Senator Wheeler as to hearings.

Representative Culkin (R-N. Y.) last week introduced H. R. 1924, to the same effect as Sec. 4 of the Capper Bill. It was referred to the House Committee on Interstate and Foreign Commerce. NAB has written Chairman Lea, asking to be notified of public hearings if scheduled.

Copyright

H. R. 80 introduced by Rep. Keogh (D-N. Y.), would amend Sec. 25 of the Copyright Act. In general, it limits the liability of broadcasters for innocent infringements and would be beneficial to radio. At the present time no hearings whatever are contemplated on the bill by the House Committee on Patents.

Rep. Scott (D-Penna) put in two bills to amend the Copyright Act. H. R. 1571 would make the rendition of musical compositions on coin-operated machines a public performance for profit, even though no admission fee is charged. H. R. 1570 would give the recording artist copyright in the recorded renditions of his work; this bill parallels the Sachs Bill in the 77th Congress and the McGranery Bill in the 76th Congress, both of which were NAPA inspired, and is decidedly unfavorable to radio. Hearings have never been scheduled on similar bills, and it is believed there will be no hearings or action on the Scott Bill at this session.

"Executive E," providing for adherence to the Berne International Copyright Convention, remains in the Senate Foreign Relations Committee. Strongly backed by the State Department and vigorously opposed by NAB and all other users of copyright at the 1st session of the 77th Congress, no report has yet been made by the Committee.

Communications

The Holmes Bill (H. R. 1490) amends the Communications Act and is like the Sanders Bill (H. R. 5497, 77th Cong.), which NAB supported last spring.

Rep. Marcontonio (Am. Labor-N. Y.) introduced H. R. 1562 to amend Sec. 310(a) of the Communications Act. It would tighten up the requirements against foreign ownership or control of radio stations, and seems unobjectionable.

The Cox Resolution (H. Res. 21) passed the House, and the investigation of the FCC by a select committee is expected to begin late in March or early in April. A resolution introduced by Rep. Sparkman (D-Ala.), H. Res. 55, calling for an investigation of the FCC and the broadcasting industry, has been referred to the Committee on Rules. Chairman Sabbath has indicated that no hearings will take place, in view of the Cox Resolution.

Daylight-Saving Time

H. Con. Res. 9, by Rep. Brehm (R-Ohio), and H. Con. Res. 10 by Rep. Cole (R-Mo.), would both repeal the War Time Act of January 20, 1942. Hearings have not yet been scheduled.

A. F. of M.

Sen. Clark of Idaho reintroduced his bill amending the Clayton Act to make it unlawful to refuse to make recordings if a purpose or effect "of the contract, agreement, conspiracy or combination" is to limit or curtail the supply or use of records or transcriptions by radio stations or juke boxes. Such contracts, etc., would not be unlawful if based on a dispute concerning compensation, hours, health, safety, or conditions of employment. The amendment would remain in effect for the duration of the war plus six months, unless sooner repealed. Senator Clark is chairman of the committee investigating the A. F. of M. recording ban.

Administrative Law

Rep. Celler (D-N. Y.) has introduced H. R. 816 to revise the administrative procedure of Federal agencies. It would establish the Office of Federal Administrative Procedure, provide for hearing commissioners, and authorize declaratory rulings by administrative agencies. The measure is identical with the recommendations of the majority of the Attorney General's Committee on Administrative Procedure made in 1941 (See Senate Document No. 8, 77th Cong., 1st Sess.).

FEDERAL LEGISLATION

HOUSE

H. R. 1924 (Culkin, R-N. Y.) LIQUOR ADVERTISING—To prohibit the advertising of alcoholic beverages by radio, and for other purposes. Referred to Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

MISSOURI:

H. 243 (Gill et al) LIQUOR ADVERTISING—Enacting a new section to the revised statutes regarding liquor advertising.

NEW YORK:

S. 873 (Farrell) (Same as A. 964) RADIO BROADCAST—TAX—Imposes tax of 10 cents on each person over 14 years attending as spectator, radio broadcast show or exhibition in radio station or theatre, except show to encourage sale of U. S. war bonds where admission is contingent on their purchase; exempts firemen, police and peace officers assigned to attend and representatives of press. Referred to Committee on Taxation.

WEST VIRGINIA:

H. 281 (Knight) PUNITIVE DAMAGES—LIBEL—Prohibiting recovery of punitive damages for libel if retraction is published, unless malicious premeditation is shown. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, March 1st. They are subject to change.

Monday, March 1

Broadcast

KMTR Radio Corporation, Los Angeles, Calif.—Renewal of license, **570 kc.**, 1 KW, unlimited.

Further Hearing

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Renewal of license (main and auxiliary), **1520 kc.**, 50 KW, unlimited, DA-day and night.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Renewal of license (main and auxiliary), **550 kc.**, 1 KW night, 5 KW day, unlimited, DA-night.

Tuesday, March 2

WLAN—Thomas J. Watson, Endicott, N. Y.—Modification of C. P., **1450 kc.**, 250 watts, unlimited.

Thursday, March 4

NEW—Chattahoochee Broadcasting Co., Columbus, Ga.—C. P., **1450 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KIDO—Frank L. Hill, as surviving co-partner of Hill and Phillips, co-partners, and Georgia Phillips, Executrix of the Estate of C. G. Phillips, deceased (assignors), and Georgia Phillips, d/b as Boise Broadcast Station (assignee), Boise, Idaho.—Granted consent to assignment of license of station KIDO from Frank L. Hill, as surviving co-partner of Hill and Phillips, co-partners, and Georgia Phillips, Executrix of the Estate of C. G. Phillips, deceased, to Georgia Phillips, d/b as Boise Broadcast Station (B5-AL-351).

KORE—Frank L. Hill, as surviving co-partner of Hill and Phillips, co-partners, and Georgia Phillips, Executrix of the Estate of C. G. Phillips, deceased (assignors), and Frank L. Hill and Violet G. Hill, co-partners, d/b as Eugene Broadcast Station (assignees), Eugene, Ore.—Granted consent to assignment of license of Station KORE, from Frank L. Hill, as surviving co-partner of Hill and Phillips, co-partners, and Georgia Phillips, Executrix of the Estate of C. G. Phillips, deceased, to Frank L. Hill and Violet G. Hill, co-partners, d/b as Eugene Broadcast Station (B5-AL-350).

Evangelistic Mission, Pontiac, Mich.—Granted authority to transmit programs from Pontiac, Mich., to Canadian Station CKLW, Windsor, Canada (B2-EP-107).

W47NY—Muzak Radio Broadcasting Station, Inc., New York City.—Granted modification (B1-MPH-112) of construction permit (B1-PH-48) for new FM station, to extend completion date to February 4, 1943. Also granted license (B1-LH-31) for FM broadcast station to use **44700 kc.**, with service area of 8,500 square miles, subject to condition that licensee will take steps to comply fully with the Rules and Regulations, and Standards of the Commission when materials and personnel become available or when required by the Commission to do so.

W51C—Zenith Radio Corp., Chicago, Ill.—Granted extension of time within which to submit field intensity measurements required by Sec. 3.229 of the Rules.

LICENSE RENEWALS

Licenses for the following stations were further extended on a temporary basis only, pending determination upon application for renewal of license, for the period ending April 1, 1943:

KBST, Big Springs, Texas; KCMC, Texarkana, Texas; KCRJ, Jerome, Ariz.; KFMB, San Diego; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Texas; KIEM, Eureka, Calif.; KPLT, Paris, Tex.; KRBC, Abilene, Texas; KRLH, Midland, Texas; KVGB, Great Bend, Kans.; KXL, Portland, Ore.; WBBZ, Ponca City, Okla.; WBNX, New York; WBRW, Welch, W. Va.; WCBT, Roanoke Rapids, N. C.; WEDC, Chicago; WFCI, Pawtucket, R. I.; WFTC, Kinston, N. C.; WHOM and auxiliary, Jersey City; WING, Dayton; WJBK, New Orleans; WNBZ, Saranac Lake, N. Y.; WOCB, near Hyannis, Mass.; WSYB, Rutland, Vt.; WTEL, Philadelphia; WTRC, Elkhart, Ind.

KGFW—Central Neb. Broadcasting Corp., Kearney, Neb.—Granted renewal of license for the period ending June 1, 1943.

WCAZ—Superior Broadcasting Service, Inc., Carthage, Ill.—Granted renewal of license for the period ending April 1, 1944.

WLOF—Hazlewood, Inc., Orlando, Fla.—Granted renewal of license for the period ending February 1, 1945.

KHBG—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Granted renewal of license for the period ending April 1, 1945.

WNBT—National Broadcasting Co., Inc., New York City.—Granted renewal of license for the period ending February 1, 1944.

W2XWE—WOKO, Inc., Albany, N. Y.—License for facsimile broadcast station was extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending April 1, 1943.

W9XWT—Courier-Journal and Louisville Times Co., Louisville, Ky.—License for facsimile broadcast station was extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending April 1, 1943.

W8XUM—WBNS, Inc., Columbus, Ohio.—License for facsimile broadcast station was extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending April 1, 1943.

W9XBT—Balaban and Katz Corp., Chicago, Ill.—Present experimental television broadcast station license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending April 1, 1943.

W9XUI—State Univ. of Iowa, Iowa City, Iowa.—Present experimental television broadcast station license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending April 1, 1943.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted renewal of license for station KWKH on a regular basis, **1130 kc.**, 50 KW, using DA at night (B3-R-452).

WRUL—World Wide Broadcasting Corp., Boston, Mass.—Granted renewal of international broadcast station license (B1-RIB-12).

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present high frequency broadcast station license further extended upon a temporary basis pending determination upon application for renewal of license, for the period ending April 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present high frequency broadcast station license further extended upon a temporary basis pending determination upon application for renewal of license, for the period ending April 1, 1943.

DESIGNATED FOR HEARING

KGNC—Plains Radio Broadcasting Co., Amarillo, Texas.—Designated for hearing application (B3-ML-1151) for modification of license to change frequency from **1440** to **860 kc.**, and decrease nighttime power from 1000 to 500 watts.

FINDINGS OF FACT

The Commission has announced adoption of its Proposed Findings of Fact and Conclusions (B-168), proposing to deny without prejudice the application of Kanawha Valley Broadcasting Co.

(WGKV), Charleston, W. Va., for construction permit to make changes in transmitting equipment and increase power from 100 to 250 watts (Docket No. 6367).

The Commission also announces adoption of its Proposed Findings of Fact and Conclusions (B-167), proposing to deny without prejudice the application of Paducah Broadcasting Co., Inc. (WSON), Henderson, Ky., for modification of construction permit to increase power from 250 watts to 500 watts, daytime only, using the frequency 860 kilocycles, and for authority to make changes in transmitting equipment (Docket No. 6235).

In reaching decision in the above cases, the Commission based its conclusions upon the policy announced in the Memorandum Opinion of April 27, 1942, which specifically refers to the use and not to the acquisition of materials.

MISCELLANEOUS

WORK—York Broadcasting Co., York, Pa.—Dismissed petition to continue hearing scheduled for February 25 on application for modification of license, since Commission granted application on February 16.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Granted motion to take depositions in re application for construction permit (B5-P-3499).

WWNC—Asheville Citizen-Times Co., Inc., Asheville, N. C.—Granted motion to dismiss without prejudice application (B3-MP-1437) for modification of construction permit to operate on **570 kc.**, 5 KW, DA-night, unlimited.

KARM—KARM, The George Harm Station, Fresno, Calif.—Granted petition to dismiss without prejudice application (B5-ML-1122) for modification of license to operate on **1030 kc.**, 5 KW, DA-day and night, unlimited.

Central Broadcasting Co., Wilkes-Barre, Pa.; Key Broadcasters, Inc., Wilkes-Barre, Pa.; Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—Denied petitions requesting that proposed findings of fact and conclusions of law as required by Sec. 1.231(d) of the rules in connection with the further hearing ordered by the Commission on September 15, 1942, be waived.

Central Broadcasting Co., Wilkes-Barre, Pa.; Key Broadcasters, Inc., Wilkes-Barre, Pa.; Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—Granted joint supplemental petition of applicants requesting that proposed findings heretofore filed by them be accepted as complying with the requirements of Sec. 1.231(d) in these proceedings.

WOW—Radio Station WOW, Inc., Omaha, Neb.—Granted authority to determine operating power by direct measurement of antenna power.

W9XMB—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted modification (B4-MPST-12) of construction permit which authorized a new ST broadcast station, for extension of completion date to 5-16-43.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted modification of construction permit which authorized installation of directional antenna for night use and increase in power, for extension of completion date to 4-15-43 (B3-MP-1699).

WEEU—Berks Broadcasting Co., Reading, Pa.—Denied Special Service Authorization to operate from 7 a. m. to sunrise during months of January, February and March, 1943 (B2-SSA-63).

National Broadcasting Co., Inc.—Passed for one week consideration on petition for indefinite continuance of hearing on petition for rehearing filed by National Broadcasting Co., Inc. (KOA), directed against the action of the Commission in granting modification of construction permit to WJW, Inc. (WJW), Akron, Ohio (B2-MP-1662; Docket No. 6485).

KMTR—KMTR Radio Corp., Los Angeles, Calif., and Gloria Dalton (intervenor).—Granted petition for continuance of hearing now set for March 1 to April 15, 1943, on application for renewal of license of KMTR to operate on **570 kc.**, 1 KW, unlimited time, and continued until March 24, 1943, consideration of the request to transfer the hearing to Los Angeles, Calif. (Docket No. 6437).

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Granted motion for continuance of hearing now scheduled for March 16 to April 19, 1943, on application for renewal of license (Docket No. 6476).

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Modification of license to operate unlimited time at site specified in construction permit (B4-P-2827) as modified with 310′ vertical antenna and indirect power measurement. Amended: to omit request for unlimited time.

620 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Modification of construction permit (B-P-3501 which authorized move of auxiliary transmitter) for extension of completion date from 3-1-43 to 7-26-43.

1010 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Modification of construction permit (B3-P-3049 as modified which authorized move of transmitter, new transmitter, change in frequency, increase in power, changes in directional antenna for night use) for extension of completion date from 3-13-43 to 6-13-43.

1190 Kilocycles

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Extension of Special Service Authorization to operate unlimited time for period ending 4-1-44.

1290 Kilocycles

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Modification of construction permit (B3-P-2944 as modified which authorized installation of directional antenna for night use and increase in power) for extension of completion date from 2-15-43 to 4-15-43.

1420 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Extension of Special Service Authorization to operate on **1010 kc.**, 5 KW night, 10 KW day, directional antenna night, using transmitter as authorized by B3-P-3049 as modified for period ending 12-1-44.

1430 Kilocycles

WBYN—WBYN-Brooklyn, Inc., New York, N. Y.—Special Service Authorization to operate with main studio at 132 W. 43rd St., New York, instead of 1 Nevins St., Brooklyn, N. Y.

TELEVISION APPLICATION

W6XYZ—Television Productions, Inc., Los Angeles, Calif.—Modification of construction permit (B5-PVB-33 as modified, which authorized new experimental television station) for extension of completion date only, from 3-15-43 to 9-15-43.

MISCELLANEOUS APPLICATIONS

KNBC—National Broadcasting Co., Inc., area San Francisco, Calif.—Construction permit to install new transmitter and reduce power from 100 watts to 75 watts. File No. changed from B5-PRE-435 to B5-PRY-290.

W69PH—WCAU Broadcasting Co., Philadelphia, Pa.—Modification of license for reduction of service area pursuant to August 4, 1942, policy and for reduction of input power from 16,000 watts to 6,150 watts.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Book Give-Away Plan, 80 Willoughby St., Brooklyn, selling and distributing books which include a 13-volume set designated the "Family Medical Library" and a 15-volume set designated "Modern Concise Encyclopedia," are charged in a complaint with misrepresentation. (4913)

Bureau of Engraving, Inc., and Art Instruction, Inc., both located at 500 South Fourth St., Minneapolis, are charged in a complaint with misrepresentation. Bureau of Engraving, Inc., is engaged in the commercial printing and engraving of advertising matter. Art Instruction, Inc., is a subsidiary of and was organized by Bureau of Engraving, Inc., which, the complaint charges, controls all the acts and practices of Art Instruction, Inc. (4914)

Dentists' Supply Company—Violation of both the Robinson-Patman and the Federal Trade Commission Acts is alleged in a complaint issued against the Dentists' Supply Company of New York, 220 West 42nd St., New York, said to be the largest manufacturer and distributor of artificial teeth in the United States. Operating factories at York, Pa., and Philadelphia, the respondent corporation's sales constitute approximately 70 percent of the total production of artificial teeth in the United States and its annual net sales are estimated at about $3,000,000. (4915)

Milton Goldenberg, also known as Milton Golden, Natalie Goldenberg, also known as Natalie Golden, and Leonard Goldenberg, also known as Leonard Golden, 2857 Sedgwick Ave., New York, engaged in selling and distributing post cards designed for the use of creditors and collection agencies in obtaining information concerning debtors, are charged in a complaint with misrepresentation. (4907)

Grodin Pen Company—A complaint involving alleged misrepresentation of the quality and price of fountain pens and pen points has been issued against Theodore, Ida, Jack and Fred Grodin, doing business as Grodin Pen Co., Grodin Pen & Pencil Co., and Underwood Pen Co., with their principal place of business at 693 Broadway, New York. The respondents are in the business of assembling fountain pens which they sell at wholesale. (4916)

Howard Hunt Pen Company—Misbranding of fountain pen points is alleged in a complaint issued against C. Howard Hunt Pen Co., Camden, N. J. The respondent corporation is a manufacturer and distributor of stationery supplies, including pen points which it sells to others for use in manufacturing and assembling fountain pens. (4918)

C. F. Lusk Company, 6523 Euclid Ave., Cleveland, selling and distributing a product called "Lusco," used to repair cracks and leaks in radiators and water-cooled motors and for other industrial repair purposes, is charged in a complaint with misrepresentation. (4911)

Standard Chemical Manufacturing Co., 703 South 42nd St., Omaha, Nebr., selling and distributing medicinal preparations, one for livestock and poultry designated "P-O" and one for poultry designated "Standard Poultry Pills," is charged in a complaint with misrepresentation. (4912)

Super-Cold Corp.—A complaint has been issued charging Super-Cold Corp., 1020 West 59th St., Los Angeles, manufacturer of refrigerators and refrigerator display cases, with misrepresenting its own products and disparaging those of certain competitors. The respondent's refrigerators are principally of the type used by merchants for the preservation and display of meat and other food products. (4904)

William H. Wise & Co., 48 West 47th St., New York, and its president, John J. Crawley, are charged in a complaint with misrepresentation in connection with the sale of certain books they publish, including a ten-set volume known as "Universal World History" which they advertise extensively in magazines, newspapers, catalogs, circulars and by other means. (4917)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Donna Kiddie Togs, et al.—Four stipulations have been accepted under which the signers, all engaged in the sale of children's dresses, agree to discontinue use of the word "silk" or words connoting silk to designate a product not composed of silk.

Signers of the stipulations are, respectively, William H. Jacobsen, 201 Plymouth Building, Minneapolis (3612); Alfred Lewis and Abraham Goldman, co-partners trading as Donna Kiddie Togs, 519 Eighth Ave., New York (3613); Samuel Topp, trading as Alpine Children's Dress Co., 519 Eighth Ave., New York (3614); and Charles Edelman, Broad St. and Lehigh Ave., Philadelphia (3615).

Freitag & Sons, Inc., 400 Concord Ave., New York, manufacturer and distributor of buttons, has stipulated to cease and desist, in connection with the advertising of its products, from use of the word "horn" either alone or in connection with the word "genuine" or any other words as descriptive of buttons not made of horn and from use of the word "horn" in any way which may convey the belief that the products are made of horn or composed of the same tough fibrous material of which true horns are composed; from use of the word "ivory" as descriptive of buttons not made of ivory, the dentine of the tusks of large mammals, and from use of the word to describe buttons cut from a type of a nut, a vegetable product, unless in such use the word "ivory" shall be immediately accompanied by the word "vegetable" or other words so as to indicate clearly that the products are not made of ivory; and from use of the words "Official U. S. Army" as descriptive of its buttons so as to imply that the War Department, or any other official agency of the U. S. Government, has approved or endorsed the buttons made by it or that the buttons manufactured by it have been adopted or established by the U. S. Government, or any agency thereof, as the official button or insignia for its armed forces; provided, however, that this shall not be construed to prevent the corporation from representing that its buttons conform with the specifications as approved and used by the U. S. Army, when and if such is the fact. (3610)

Hollywood Liquefier Sales, 4156 Beverly Boulevard, Los Angeles, Calif., selling and distributing a device designated "Hollywood Liquefier" for use in pulverizing and reducing fruits and vegetables and other products to a puree or a semi-liquid condition, has stipulated to cease and desist from certain misrepresentations made in connection with the sale of his product. Among the misrepresentations to be discontinued are that the digestion of man cannot make available to the body the vitamins or mineral salts contained in vegetable cells, that the human alimentary tract is incapable of liberating and assimilating the nutrient contained in fruits or vegetables, that it is necessary that fruits or vegetables be reduced to a semi-liquid or puree in order to be assimilated by the digestive process; that the nutritive substances contained in fruits, vegetables, meats or nuts processed in the Hollywood Liquefier are more easily digested or more quickly assimilated than when such food products are eaten in their customary forms; that the ordinary diet is deficient in vital organic materials contained in fresh fruits or vegetables or that the cells of fruits or vegetables must be broken down by a mechanical device such as the Hollywood liquefier in order that the food elements may be assimilated. (3611)

Walter C. Leute, 54 Day St., New York, selling and distributing luggage, has stipulated to cease and desist from representing as the customary or regular retail prices of his merchandise, prices which are fictitious and in excess of prices at which the merchandise is regularly and customarily sold at retail and from using fictitious price figures on the labels of the merchandise or in pricing sheets pertaining to it; representing that prices at which he actually sells his merchandise constitute a discount to purchasers when in fact they are the usual and customary prices at which it is sold in the normal course of business; representing his business as a wholesale business or that the prices at which he sells his merchandise are wholesale prices, and using or disseminating any so-called discount cards or any similar writing or device purporting to enable the holder to receive a discount or other financial advantage in the purchase of merchandise when the holder does not, in fact, receive such a discount, deduction, or other material financial or trade advantage based upon the actual prices at which the merchandise is customarily sold. (3609)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

D. M. Alachuzos Company, 336 South Fourth St., Philadelphia, selling and distributing sponge and chamois skin products, has been ordered to cease and desist representing that it is a sponge producer and packer. (4051)

Northwest Film Ad Service, Inc., 505 Guardian Building, Portland, Oreg., and its president, Frank D. Atkins, have been ordered to cease and desist from misrepresentation in the sale of films and moving picture trailers used for displaying nationally advertised articles and sold to retail dealers. (4007)

Pasadena Products, Inc., 300 North Lake Ave., Pasadena, Calif., selling and distributing a medicinal preparation designated "Sal-Ro-Cin," has been ordered to cease and desist from disseminating false advertisements of the product in newspapers, over the radio or by other means. (3945)

Pergande Institute—An order issued directs G. F. Pergande, trading as Pergande Institute, Washington, D. C., to cease and desist from misrepresentations concerning the correspondence courses he sells and which are intended to prepare students for examinations for civil service positions in the Government. At the time the complaint was issued Pergande's address was given as 314 Randolph Place, N. E. (4583)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 10, March 5, 1943

48-Hour Week

A full account of the 48-hour week situation, together with the WMC's rules, regulations, etc., will be found on page 108 of this issue.

NAB Board Meets

The Board of Directors held a two-day meeting in New York, Thursday and Friday (February 25-26). All members, except Edwin Craig who was prevented by illness, attended.

Petrillo

The developments in the Petrillo situation were fully discussed. The communication sent by the transcription companies in response to Petrillo's demands was read. (See AFM Bulletin No. 17). The Board decided to assist and cooperate with the transcription companies in any course of action which they determined to take. The majority of the transcription companies being NAB associate members, it was felt that such aid as could be rendered should be offered.

48-Hour Week

Joseph L. Miller, NAB Labor Relations Director, reported upon the joint meeting of the Labor Executive Committee and the Wage and Hour Committee to discuss the 48-hour week. The status of radio stations in the 32 critical areas thus far designated by WMC is uncertain. Mr. Miller reported the results of a conference with representatives of WMC which indicates that ultimately 190 areas will be affected. Any employer in any of these areas who does not go on the 48-hour week will, according to the committee, have to justify his action and show that by so doing he would not release men or obviate the employment of more men.

To determine the application of the rules to various situations a spot check is being made by the Labor and Wage and Hour Committees in certain critical areas and the results of this check will be discussed with WMC. Mr. Miller reported further that it is probable that regional offices of the WMC will be established to administer the regulations.

Batteries and Tubes

The question of batteries and tubes for home sets was discussed. In both of these matters NAB has been working for some time with WPB officials to bring about a solution. Considerable progress in the matter of tubes was reported in the inauguration of the Victory Line. It was further revealed that the battery situation was progressing satisfactorily and action was expected soon.

Legislation

The legislative situation, including the hearing on the Cox Resolution, and the Holmes Bill, was outlined. With respect to the Cox Resolution it was felt that the industry should preserve a neutral attitude, since the subject matter of the inquiry is one between Congress and the FCC, one of its creatures. The Holmes Bill, being identical to the Sanders Bill in the 77th Congress, has been the subject of a full hearing and NAB has presented its testimony and views. Therefore, unless called upon by some committee of Congress to submit further testimony, no action will be taken.

Retail Promotion Plan

Paul Morency, Chairman of the Retail Promotion Committee, reported that the response to the financial campaign while quite satisfactory and having resulted in the pledge of $80,000, needed encouragement from the members of the Board. A resolution commending the committee upon the splendid work thus far done, reaffirming the confidence of the Board in the plan and pledging individual cooperation of each of the Directors to the successful consummation of the project was unanimously adopted.

Radio-War Conference

The Board determined to hold an annual membership meeting in the form of a radio war conference instead of a convention, the conference to be held sometime between April 15 and May 15 in either Chicago or New York. The conference is to be devoid of any entertainment features. Breakfast roundtables, mass meetings and forum discussions are to be arranged.

Membership

The following new members were elected to membership in NAB:

KBUR—Burlington, Iowa; KFUN—Las Vegas, New Mexico; KLBM—La Grande, Oregon; KOL—Seattle, Washington; KSLM—Salem, Oregon; KTKN—Ketchikan, Alaska; KTRB—Modesto, California; KWG—Stockton, California; WABY—Albany, New York; WHLS—Port Huron, Michigan; WJPR—Greenville, Mississippi; WPDQ—Jacksonville, Florida; WTTM—Trenton, New Jersey.

A membership campaign was suggested and the Secretary-Treasurer was instructed to proceed immediately in the formulation of such a campaign.

1943 Budget

Frank King, Chairman of the Board Finance Committee, submitted the 1943 budget with the Committee's recom-

NAB BOARD MEETS

(Continued from page 97)

mendations. The budget as finally approved by the Board calls for a normal operations outlay of $258,000 for 1943. This figure is some $3,000 below the normal expenditures of the Association for the past year.

C. E. Arney, Jr., who for the past three years has served as Assistant to the President, was elected to the office of Secretary-Treasurer.

By-Law Amendments

The Board voted to submit three amendments for the consideration of the membership. The first relates to the method of election of Directors-at-Large; the second transfers the State of Maryland from the Fourth into the Third District along with Pennsylvania and Delaware. The third amendment corrects the By-Laws and eliminates all references to the Executive Committee. The full text of these suggested amendments will be printd in a subsequent issue of the REPORTS.

New Radio Bill

Senator Wheeler (D-Mont.), Chairman of the Senate Interstate Commerce Committee joined with Senator White (R.-Maine) in introducing this week a bill (S. 814) to amend the Communications Act of 1934. The bill was referred to the Interstate Commerce Committee.

Drafted along the lines previously introduced by its sponsors, the bill provides for changes in the organization of the FCC, in its procedure, in judicial review, and authorizes declaratory judgments. It seeks to assure equality of right and opportunity among those who utilize radio for public discussion, and to further provide against censorship. It writes into the statute the language of the Supreme Court in the Sanders Brothers case, designed to spell out in "black and white" the Congressional intent that the Commission shall not concern itself with the business phases of broadcasting and the source of program material. These changes "make the bill of supreme importance," Senator White declared, "and justify its study and approval in substantially its present form by the present Congress."

Senator White explained the purposes of the bill to the Senate as follows:

"The radio bill today introduced by Senator Wheeler and Senator White has its source in S. 1268, a bill introduced by Senator Wheeler in a previous Congress; in S. 1806 and S. 1520, introduced in previous sessions by Senator White; in recommendations made to the Federal Communications Bar Association by a committee thereof; in court decision; and in recommendations found in the Report of the Attorney General's Committee on Administrative Procedure.

"This measure should not be regarded as a general revision of our Communications Act of 1934, but the changes in the organization of the Federal Communications Commission, in its procedure, in the sections of present law with respect to appeals to the courts, in the efforts made to assure equality of right and opportunity among those who utilize radio for public discussion, in the attempt to further provide against censorship and in the authorization of declaratory judgments, make this bill of supreme importance and justify its study and approval in substantially its present form by the present Congress.

"There follows an explanation of the sections of the bill.

Section 1

"This section defines the terms 'license', 'station license', or 'radio station license' appearing throughout the act as that instrument of authorization required by the act or the Commission's rules and regulations for the use or operation of radio apparatus. This definition is made necessary because of a recent tendency upon the part of the Commission to treat what are in fact licenses as instruments of a different character and lesser import, thereby making possible avoidance of compliance with procedural and appellate provisions of the act intended as safeguards against arbitrary administrative action, provisions necessary to be respected if orderly procedure is to be had. This broad definition of the term 'license' tends to insure that result.

Sections 2 and 3

"Sections 2 and 3 basically change the administrative set-up and functions of the Commission. They can be summarized as the separation of the Commission of seven members into two statutory divisions of three members each and a clarification of the status and functions of the Chairman of the Commission.

"Under this plan the whole Commission would have power and authority to adopt and promulgate any rule or regulation of general application required or authorized by the act, including procedural rules and regulations for the Commission and each division. The whole Commission would have plenary authority over amateur services, emergency services, the qualification and licensing of operators, the selection and control of personnel, the assignment of bands of frequencies to the various radio services and many other subjects and services as at present. But the present judicial and quasi-judicial functions of the Commission would be vested in the proposed divisions insofar as those functions relate to the most important and controversial subjects within the present jurisdiction of the Commission.

"Jurisdiction to hear and determine all cases arising under the act or regulations, relating to broadcast, television, facsimile, and kindred communications intended for public reception is vested in the Division of Public Communications. Similar jurisdiction with respect to common carriers and communications intended for a designated addressee is vested in the Division of Private Communications. This plan not only recognizes the basic and fundamental differences between the two types of communications involved and the nature of the questions presented by each, but it also provides a method for obtaining proper consideration of those cases by persons who will be able to devote their time and attention to the questions committed to them without undue interruption or interference occasioned by the demands of basically different problems.

"Under the plan proposed, the status of the chairman would be that of an executive officer and coordinator participating fully in all matters within the jurisdiction of the Commission except the determination and decision of contested matters which are made the exclusive business of the divisions. Experience has amply demonstrated that the chairman cannot be expected to devote the time and attention necessary to the proper handling and disposition of these matters and also efficiently to discharge the many other duties which are unavoidably his under the act. As to these other duties, an attempt has also been made to clarify the status of the chairman and to make him, and him only, the official spokesman and representative of the Commission in certain important respects.

"When the present act was before the Congress in 1934, the bill passed by the Senate provided for a mandatory separation of the Commission into divisions as is now proposed but this plan was later abandoned and the present Commission has been operating under a law which permitted but did not require it to organize itself into divisions. In recent years, the division plan has been entirely abandoned by the Commission and it seems certain that such abandonment has operated to the detriment of orderly procedure and to wise administration and regulation. We believe students of our legislation are thoroughly convinced of the wisdom of the mandatory division plan for at least two important reasons. They recognize that there are fundamental differences in the two classes of communications above referred to; that rate making and public utility concepts are the very essence of private communications but have little, if any, application to communications with the public directly; that there has been a tendency upon the part of the Commission to confuse the two and to apply the same concepts and philosophies in the regulation of the two. This must be avoided. In the second place, it is apparent that the subject of public or mass communications and the problem incident to the regulation thereof are so interesting and attractive that they draw public attention; that on the other hand, there is very little of news value or opportunity for publicity in the regulation of common carriers and this has had the result of centering the attention of the Commission and its personnel almost exclusively on broadcasting and related problems and of preventing the giving of sufficient attention to equally important problems relating to private communications.

"The changes proposed in these two sections would bring about a much needed and desired separation of the judicial and legislative functions of the Commission; would contribute to a sounder knowledge on the part of the commissioners of the communication problems committed to them; would make for orderly procedure and harmony of decision; and would speed up the disposition of cases before the Commission and the divisions thereof.

"The last paragraph of section 3 gives definite authority to the Commission or to either division to assign or refer to an individual commissioner or to a board composed of an employee or employees, any portion of its work, business, or functions but with an assured right of review by the Commission or the appropriate division. This obviates the necessity for full Commission or division action in cases where this is not believed necessary. It should result in speedier consideration and decision.

SECTIONS 4 AND 5

"These sections propose certain amendments to the procedural sections of the present act (secs. 308 and 309). These amendments are made necessary by the restrictive character of the language now employed and by the disposition of the Commission to give that language an extremely literal rather than a broad interpretation. The result has been to deprive applicants for certain types of licenses of the right to be heard before their applications are denied and also to deprive persons who are adversely affected by the action of the Commission in granting the application of others, of an opportunity to be heard before the Commission.

"The first amendment to section 308 will make it clear that all instruments of authorization granted by the Commission entitling the holders to construct or operate radio apparatus should in general be the subject of a written application. The next amendment adding new language to paragraph (a) of section 308 authorizes in emergencies or in time of war the issuance of construction permits of stations or the operation of radio apparatus during the emergency or war without the filing of a formal application.

"The amendments to section 309 make it clear that any person filing an application described in section 309 is entitled as a matter of right to have his application handled in a definite procedural way. This is not assured under present practice of the Commission.

- "The procedure to be followed in the handling of applications is that which was successfully followed by the Commission for a considerable period of time pursuant to rules and regulations enacted by it, but which method was recently abandoned apparently upon the theory that the Commission was according to applicants and others in interest greater rights than those which the act guaranteed to them. Since the right to notice and hearing is the very essence of orderly procedure, amendments to the act which leave no doubt that such right is secured are absolutely imperative. The amendments proposed would assure this result.

SECTION 6

"This section proposes a redraft of the transfer section of the present act (section 310 (b)). As now drafted, this section in terms relates only to station licenses and does not apply to construction permits or other instruments of authorization which the Commission may issue under its rules and regulations. The redraft would remedy this deficiency. The present transfer section is also silent concerning the procedure to be employed by the Commission in passing upon such applications and the proposed amendment would remedy this defect by providing that transfer applications be handled in the same manner and in accordance with the same procedure employed in the handling of applications for original instruments of authorization.

"Aside from these questions of procedure, the decisions of the Commission relating to transfer applications have given rise to the theory that the proposed transferee of a station license may be subjected to conditions not required of an applicant for an original license. This is believed to be unsound and has been due, at least in part, to the fact that the statutory standard employed in the present transfer section differs slightly in phraseology from that used elsewhere in the act. By providing for the use of the same statutory standard in the proposed amendment and by the use of other clarifying language, it is believed that this cause for controversy will be eliminated. Language is included to make the paragraph apply not only to the instrument which may be the subject of assignment, but to any rights the holder of the license may have by virtue of his license.

SECTION 7

"This section proposes amendments to section 315 of the present act relating to the use of broadcast facilities by candidates for public office. The amendments proposed are the deletion of the proviso clause now appearing in that section which provides that the licensee shall have no power of censorship over the material broadcast under the provisions of this section and the substitution therefor of clearer language to the same purpose found in a proposed new section 330. This present proviso has been the source of much uncertainty and controversy. We believe the change urged clarifies and enforces the congressional intent.

SECTION 8

"Section 8 of the bill proposes a new sentence as an amendment to section 326 of the present act, which codifies an interpretation placed upon the act by the Supreme Court of the United States in the case of the *Federal Communications Commission* v. *Sanders Brothers Radio Station*, decided March 25, 1940. In this case the Supreme Court said:

"But the act does not essay to regulate the business of the licensee. The Commission is given no supervisory control of the programs, of business management or of policy. In short, the broadcasting field is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the assigned channel.

"Notwithstanding this pronouncement of the Supreme Court, notwithstanding the fact that no language can be found in the act which confers any right upon the Commission to concern itself with the business phases of the operation of radio broadcast stations and notwithstanding the further fact that section 3 (h) of the act provides that a person engaged in radio broadcasting should not be regarded as a common carrier, the Commission has nevertheless concerned itself more and more with such matters. The charge is made that the Commission is attempting to control both the character and source of program material and the contractual or other arrangements made by the licensee for the acquisition of such material.

"The amendment proposed spells out in black and white what it is believed was not only the original intention of Congress but is its present intention, with respect to this subject, in the hope that confusion and controversy can be eliminated. The amendment preserves the prohibition now contained in the act against interference with the right of free speech and that against the utterance of obscene, indecent, or profane language by means of radio communication.

SECTION 9

"This section of the bill proposes the addition of an entirely new section to the act (sec. 330), which will require the identification of the speaker in the case of broadcasts dealing with public or political questions either local, State, or national in their scope and application. Ever since the enactment of the Radio Act of 1927, the law has carried a provision requiring that in the case of the commercial use of a station the person or organization sponsoring such broadcast be identified in connection with the broadcast. Such a provision is found in section 317 of the present act. The proposed new section would merely carry the principle of identification further and make it obligatory in the discussion of political or public questions to make clear not only who the speaker is but whose views he expresses. It is unfortunately a fact that most propaganda by radio is found in sustaining programs or programs which have no commercial sponsor. The adoption of this new section would carry the salutary principle of identification into a field where it is much needed.

SECTION 10

"Section 10 of the bill proposes the inclusion of a new section (sec. 331) the effect of which would be to require the licensee of any station to afford a right of reply where public officers, other than the President of the United States, use his station for the discussion of public or political questions. This right of reply is to be exercised by the accredited representatives of the opposition political party or parties, and is to be afforded upon the same terms and conditions as the initial discussion. This substantially enlarges the scope of section 315 of the 1934 act. The subject matter of this proposed section merits immediate consideration.

SECTION 11

"Section 11 of the bill proposes the addition of another new section (sec. 332), the effect of which would be to clarify the duties and responsibilities of a licensee where his station was used by a candidate for public office or by public officers or others for the discussion of public or political questions. The no-censorship clause of section 315 of the present act does not adequately define the duties of a licensee under such circumstances. The proposed new section (sec. 332) affords the licensee an opportunity to examine the material to be broadcast before its intended use and to delete therefrom any material which is slanderous or libelous or which the licensee may have reason to believe would subject him or his station to any action for damages or to a penalty or forfeiture under any local, State, or Federal law or regulation. This section specifically provides that no licensee of any broadcast station shall have the power to censor, alter, or in any way affect or control the political or partisan trend of any material submitted by a candidate for public office or by public officers or others discussing public and political questions. With the exception of material which might subject the licensee to damages or penalties or material which is submitted for broadcast by or upon behalf of any person or organization which advocates the overthrow of government by force or violence, the licensee has no control over the subject matter of any broadcast.

SECTION 12

"Section 12 is designed to clarify provisions of existing law relative to proceedings to enforce or set aside orders of the Commission and in appeals from decisions of the Commission. The present law upon this subject is now found in section 402 of the act.

"Paragraph (a) of section 402 of the pending bill deals with actions to enforce or set aside orders of the Commission except those appealable under paragraph (b) of that section. More specifically, paragraph (a) of this section as it now stands relates to those orders of the Commission entered in matters involving common carriers and certain other orders relating to radio broadcast stations not now appealable to the United States Court of Appeals for the District of Columbia under paragraph (b) of section 402. Under the proposed amendment, all orders entered by the Commission in the performance of its licensing functions would be appealable under paragraph (b) and would not be brought before a statutory three-judge district court. Moreover, suits brought before a statutory three-judge court to enjoin the enforcement of an order of the Commission could be brought in the District Court of the District of Columbia as well as in other judicial districts.

"The principal changes proposed in paragraph (b) of section 402 can be summarized as follows: (1) Persons desiring to appeal from orders of the Commission entered in all cases where the Commission exercises its licensing functions, must appeal to the United States Court of Appeals for the District of Columbia; (2) language is adopted which will remove doubt as to which cases are appealable and which will extend the right of appeal to persons which should have such right but which have been excluded due to imperfections in the present act; (3) the time in which an appeal must be taken is made 30 rather than 20 days, as at present, and the contents of the notice of appeal are specified with particularity along the lines now provided by the rules of the United States Court of Appeals for the District of Columbia; (4) jurisdiction is expressly conferred upon the court to which an appeal is taken to grant temporary relief either affirmative or negative in character; (5) the court is given authority to specify by rule what the record upon appeal shall contain; (6) the questions which can be raised upon appeal and which the court must consider in determining an appeal are specifically enumerated; and (7) the Commission will be required to comply with the mandate or decision of the court upon the basis of the record upon which an appeal is taken unless the court upon petition shall otherwise determine. Other provisions of the present act relating to the right of persons to intervene in an appeal are retained.

"All of these changes are, in our opinion, not only desirable but necessary if adequate judicial review of the Commission's exercise of its licensing function is to be made effective. Present language of section 402, and particularly paragraph (b) thereof, is so vague as to result in great doubt concerning the proper court in which to seek judicial review in many cases. Moreover, recent decisions of the United States Court of Appeals for the District of Columbia and of the Supreme Court of the United States are such as to cast further doubt upon the meaning and application of these provisions.

"Generally speaking, the same considerations which controlled the Attorney General's committee on administrative procedure in the making of its recommendations concerning judicial review of the decisions and orders of other administrative tribunals have prompted the amendments to section 402 here proposed. But we have gone further in certain respects than the Attorney General's committee and have attempted to adapt the theory of that report to the peculiar problems incident to the licensing of radio stations and the review of decisions and orders of the Commission in licensing such stations.

"An important instance of an adaptation peculiar to the subject matter has to do with judicial review of actions instituted by the Commission against the holder of a license.

"It is unfortunately the fact that since the organization of the Federal Radio Commission in 1927 certiorari has not been granted by the Supreme Court in any case upon the application of an individual litigant, while on the other hand only one such request for review has been denied when made by the Commission. From 1927 to 1942 the Supreme Court granted a review in seven cases upon petition by this governmental agency and denied only one; it granted no review in behalf of a private litigant, although many were requested. Obviously the road to the Supreme Court for persons unsuccessful before the Court of Appeals is a one-way street.

"We have attempted to deal with this situation and subject in such a way as to insure review by the Supreme Court in a limited but most important class of cases, namely those cases in which the Commission on its own motion proceeds against the holder of an existing license. This is by a provision which would make Supreme Court review in this class of cases obligatory upon the Court rather than optional with it. Such a provision is not unique or without precedent. In other important classes of cases it has been in effect and it should be adopted here if judicial review of Commission action is to be a meaningful rather than an empty term.

SECTION 13

"Section 13 of the bill provides for such changes in section 405 of the present law relating to the subject of rehearings as are necessary to conform to the changes in the administrative organization of the Commission proposed in sections 2 and 3 of the bill. Further provision is made for delaying the effective date of any decision, order or requirement made in any case which is the subject of petition for rehearing until after final decision upon such petition. An attempt has also been made to eliminate doubt now prevalent concerning when his petition for rehearing must be filed before judicial review of the Commission's order can be had. Under the provisions of the amendment proposed, the petition for rehearing will not be a condition precedent to judicial review except where the party seeking such review was not a party to the proceedings before the Commission resulting in such order or where the party seeking such review relies upon questions of law or fact upon which the Commission has been afforded no opportunity to pass.

SECTION 14

"Section 14 of the bill proposes an amendment to paragraph (a) of section 409 of the present act which deals with the cases heard by less than a quorum of the Commission or either division thereof. The procedure employed by the Commission in cases of this character has led to a great deal of controversy and there has been a decided lack of uniformity both in the handling of such matters and the character of reports submitted by the hearing officer. The proposed amendment requires not only the submission of a uniform type of report setting out in detail and with particularity all basic or evidentiary facts developed as a result of the evidence taken but also conclusions of fact and law upon each issue submitted for hearing. It further makes mandatory the hearing of oral argument by the Commission or the division having jurisdiction of any case upon request of any party before the entry of a final order. The Commission or division is also required to accompany any final order with a full statement in writing of all the relevant facts as well as conclusions of law upon those facts.

"Here again an attempt has been made to conform to the recommendations of the report of the Attorney General's committee on administrative procedure, and these provisions, if enacted, would be wholly consistent with those recommendations or any legislation which may result therefrom.

SECTION 15

"Section 15 authorizes the issuance of declaratory rulings respecting the rights and the legal relations of any person who is the holder of or applicant for a license or a construction permit.

"It is proposed that whenever necessary to end a controversy or to remove substantial doubt and uncertainty as to the application of this act or of any regulation of the Commission to any such person, the Commission upon petition therefor, may hear and determine the matters and things in issue and may enter a judgment ruling, which shall have, in the absence of reversal after judicial proceeding, the same force and effect as a final order of the Commission and in the case of proceedings by the Commission having as their purpose the revocation, modification, or failure to renew or extend an existing permit or license, the Commission shall be required to entertain such petition for declaratory relief.

"Provision is made for notice and hearing upon any such petition and for appeal to the Court of Appeals of the District.

"This proposal provides a means by which applicants and licensees may have a judicial determination as to questions of vital importance to their business without putting in jeopardy their very business existence.

SECTION 16

"Section 16 of the bill proposes the addition of an entirely new section. This section is designed to curb an alleged tendency upon the part of the Commission to discriminate in a manner not authorized by the statute between applicants for broadcast and other radio facilities and to require as a condition to grants made, the doing of acts which the Commission has no authority under the statute to require.

"When the Congress enacts a law creating an administrative tribunal and defines its powers, duties, and functions, we consider it as fundamental that the authority conferred must be limited by the enabling act. Such a tribunal has and must exercise those powers which are specifically enumerated. In addition, it must exercise those powers which are necessarily incident to the exercise by it of those powers expressly enumerated. It is not, however, authorized or permitted to set itself up as a general legislative body making its own rules of conduct and decision wholly apart from and beyond the language of the statute. The tendency to do this, prevalent among virtually all administrative tribunals, has recently become very aggravated at the Commission. This, in our opinion, must be arrested by the enactment of specific legislation along the lines here suggested."

We print the bill below:

THE WHITE-WHEELER BILL

S. 814

A BILL

To amend the Communications Act of 1934, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of title I of the Communications Act of 1934 be amended by adding after paragraph (aa) of said section the following:

"(bb) The term 'license', 'station license', or 'radio-station license' means that instrument of authorization required by this Act, or the rules and regulations of the Commission enacted pursuant to this Act, for the use or operation of apparatus for the transmission of energy, or communications, or signals by radio, by whatever name the same may be designated by the Commission."

SEC. 2. Amend paragraph (b) of section 4 of said title I by striking out the last sentence of said paragraph and by inserting in lieu thereof the following: "Not more than four members of the Commission and not more than two members of either division thereof shall be members of the same political party."

SEC. 3. Amend section 5 of said title I by striking out the whole of said section and by inserting in lieu thereof the following:

"(a) The members of the Commission, other than the Chairman, shall be organized into two divisions of three members each, said divisions to be known and designated as the Division of Public Communications and the Division of Private Communications, and no member designated or appointed to serve on one division shall have or exercise any duty or authority with respect to the work or functions of the other division, except as hereinafter provided. The President shall designate the Commissioners now in office who shall serve upon a particular division, but all Commissioners other than the Chairman subsequently appointed shall be appointed to serve upon a particular division and the Chairman subsequently appointed shall be appointed to serve in that capacity.

"(b) The Division of Public Communications shall have jurisdiction over all cases and controversies arising under the provisions of this Act and the rules and regulations of the Commission enacted pursuant to this Act relating to wire and radio communications intended to be received by the public directly, and shall make all adjudications involving the interpretation and application of those provisions of the Act and of the Commission's regulations.

"(c) The Division of Private Communications shall have jurisdiction over all cases and controversies arising under the provisions of this Act and the rules and regulations of the Commission enacted pursuant to this Act relating to wire and radio communications by a common carrier or carriers, or which are intended to be received by a designated addressee or addressees, and shall make all adjudications involving the interpretation and application of those provisions of the Act and of the Commission's regulations.

"(d) The whole Commission shall have and exercise jurisdiction over the assignment of bands of frequencies to the various radio services; over all matters arising under the provisions of part 2 of title III of this Act, as amended; over all signals and communications of an emergency nature, including distress signals by ships at sea and communications relating thereto, signals and communications by police and fire departments and other like emergent signals and messages; over all signals and communications by and between amateur stations; over the qualifications and licensing of all radio operators; over the adoption and promulgation of all rules and regulations of general application required or authorized by this Act, including procedural rules for the Commission and the Divisions thereof; over the selection and appointment of all officers and other employees of the Commission and the Divisions thereof; and generally over all matters with respect to which authority is not otherwise conferred by other provisions of this Act. In any case where a conflict arises as to the jurisdiction of the Commission or any Division thereof, such question of jurisdiction shall be determined by the whole Commission.

"(e) The Chairman of the Commission shall be the chief executive officer of the Commission. It shall be his duty to preside at all meetings and sessions of the whole Commission, to represent the Commission in all matters relating to legislation and legislative reports, to represent the Commission or any Division thereof in all matters requiring conferences or communications with representatives of the public or other governmental officers, departments, or agencies, and generally to coordinate and organize the work of the Commission and each Division thereof in such manner as to promote prompt and efficient handling of all matters within the jurisdiction of the Commission. The Chairman of the Commission shall not be a member of or serve upon either of said Divisions, except that in the case of a vacancy or the absence or inability of any Commissioner appointed to serve thereon, the Chairman may temporarily serve on either of said Divisions with full power as a member thereof until the cause or circumstances requiring said service shall have been eliminated or corrected.

"(f) Each Division of the Commission shall choose its own chairman, and, in conformity with and subject to the foregoing provisions of this section, shall organize its membership and the personnel assigned to it in such manner as will best serve the prompt and orderly conduct of its business. Each Division shall have power and authority by a majority thereof to hear and determine, order, certify, report, or otherwise act as to any of said work, business, or functions over which it has jurisdiction. Any order, decision, report made, or other action taken by either of said Divisions with respect to any matter within its jurisdiction, shall be final and conclusive, except as otherwise provided by said Communications Act of 1934 as hereby amended. The secretary and seal of the Commission shall be the secretary and seal of each Division thereof.

"(g) In the case of a vacancy in the office of the Chairman of the Commission or the absence or inability of the Chairman to serve, the Commission may temporarily designate and appoint one of its members to act as Chairman of the Commission until the cause or circumstance requiring said service shall have been eliminated or corrected. During the temporary service of any such Commissioner as Chairman of the Commission, he shall continue to exercise the other duties and responsibilities which are conferred upon him by this Act.

"(h) The term 'Commission', as used in this Act, shall be taken to mean the whole Commission or a Division thereof as required by the context and the subject matter dealt with. The term 'cases and controversies', as used herein, shall be taken to include all adversary proceedings whether judicial or quasi-judicial in nature, and whether instituted by the Commission on its own motion or otherwise, and the term 'adjudications' means the final disposition of particular cases, controversies, applications, complaints, or proceedings involving named persons or a named res.

"(i) The Commission or either Division thereof is hereby authorized by its order to assign or refer any portion of its work, business, or functions to an individual Commissioner, or to a board composed of an employee or employees of the Commission, to be designated by such order for action thereon, and by its further order at any time to amend, modify, or rescind any such order or reference: *Provided, however,* That this authority shall not extend to duties specifically and exclusively imposed upon the Commission, either Division thereof, or the Chairman of the Commission, by this or any other Act of Congress. Any order, decision, or report made or other action taken by any such individual Commissioner or board in respect of any matter so assigned or referred shall have the same force and effect and may be made, evidenced, and enforced as if made by the Commission or the appropriate Division thereof: *Provided, however,* That any person affected by any such order, decision, or report may file a petition for review by the Commission or the appropriate Division thereof, and every such petition shall be passed upon by the Commission or that Division."

SEC. 4. Amend paragraph (a) of section 308 of title III of said Act by striking out all appearing before the first proviso clause in said paragraph and by inserting in lieu thereof the following:

"The Commission may grant instruments of authorization entitling the holders thereof to construct or operate apparatus for the transmission of energy, or communications, or signals by radio only upon written application therefor received by it."

Further amend paragraph (a) of said section 308 by adding at the end of said paragraph the following: "*And provided further,* That (1) in cases of emergency found by the Commission involving danger to life or property, or (2) during the continuance of any war in which the United States is engaged and when such action is necessary for the national defense or security or otherwise in furtherance of the war effort, the Commission or either Division thereof may grant and issue authority to construct or operate apparatus for the transmission of energy or communications or signals by radio during the emergency so found by the Commission or either Division thereof or during the continuance of any such war in such manner and upon such terms and conditions as it shall by regulation prescribe, and without the filing of a formal application."

SEC. 5. Amend section 309 of said title III by striking out paragraph (a) thereof; by relettering present paragraph (b) as paragraph (d); and by inserting in lieu of paragraph (a) as deleted the following:

"(a) If upon examination of any application provided for in section 308 hereof the Commission shall determine (1) that public interest, convenience, or necessity would be served by the granting thereof, and (2) that such action would not aggrieve or adversely affect the interest of any licensee or applicant, it shall authorize the issuance of the instrument of authorization for which application is made in accordance with said findings.

"(b) If upon examination of any such application the Commission is unable to make the findings specified in paragraph (a) hereof, it shall designate the application for hearing and forthwith notify the applicant and other parties in interest of such action and the grounds or reasons therefor. Any hearing subsequently held upon such application shall be a full hearing in which the applicant and all other parties in interest, whether originally notified by the Commission or subsequently admitted as interveners, shall be permitted to participate. Such hearings shall be preceded by a notice to all such parties in interest specifying with particularity the matters and things in issue and not including issues or requirements phrased generally or in the words of the statute.

"(c) When any instrument of authorization is granted by the Commission without a hearing, as provided in paragraph (a) hereof, such grant shall remain subject to protest as hereinafter provided for a period of thirty days. During such thirty-day period, any person who would be entitled to challenge the legality or propriety of such grant under the provisions of section 402 of this Act may file a protest directed to such grant, and request a hearing on said application so granted. Any protest so filed shall contain such allegations of fact as will show the protestant to be a proper party in interest and shall specify with particularity the matters and things in issue but shall not include issues or allegations phrased generally or in the words of the statute. Upon the filing of such protest, the application involved shall be set for hearing upon the issues set forth in said protest and heard in the same manner in which applications are heard under paragraph (b) hereof. Pending hearing and decision upon said protest, the effective date of the Commission's action to which said protest is directed shall be postponed to the date of the Commission's decision after hearing unless the authorization involved in such grant is necessary to the maintenance or conduct of an existing service, in which event the Commission shall authorize the applicant to utilize the facilities or authorization in question pending the Commission's decision after hearing on said protest.

"(d) Such staton licenses as the Commission may grant shall be in such general form as it may prescribe, but each license shall contain, in addition to other provisions, a statement of the following conditions to which such license shall be subject: (1) The station license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term thereof nor in any other manner than authorized therein; (2) neither the license nor the right granted thereunder shall be assigned or otherwise transferred in violation of this Act; (3) every license issued under this Act shall be subject in terms to the right of use or control conferred by section 606 hereof."

SEC. 6. Amend paragraph (b) of section 310 of said title III striking out the whole of said paragraph and by inserting in lieu thereof the following:

"No instrument of authorization granted by the Commission entitling the holder thereof to construct or operate radio apparatus and no rights granted thereunder shall be transferred, assigned, or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation holding such instrument of authorization, to any person except upon application to the Commission and upon a finding by the Commission that the proposed transferee or assignee possesses the qualifications required of an original permittee or licensee and is capable of constructing or operating under such instrument of authorization in the public interest, convenience, and necessity. The procedure to be employed in the handling of such applications shall be that provided in section 309 of said title III, as amended."

SEC. 7. Amend section 315 of said title III by striking out the whole of said section and by inserting in lieu thereof the following:

"SEC. 315. If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcast station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcast station, and the Commission shall make rules and regulations to carry this provision into effect. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate."

SEC. 8. Amend section 326 of said title III by inserting before the first sentence thereof a new sentence so that as amended said section shall read as follows:

"Nothing in this Act shall be understood or construed to give the Commission the power to regulate the business of the licensce of any radio broadcast station and no regulation, condition, or requirement shall be promulgated, fixed, or imposed by the Commission, the effect or result of which shall be to confer upon the Commission supervisory control of station programs or program material, control of the business management of the station or control of the policies of the station or of the station licensee. Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication. No person within the jurisdiction of the United States shall utter any obscene, indecent, or profane language by means of radio communication."

SEC. 9. Add to said title III the following new section:

"SEC. 330. No licensee of any radio-broadcast station shall permit the use of such station for the discussion of any public or political question whether local, State, or National in its scope and application, unless the person or persons using such station shall, prior to such use, disclose in writing and deliver to the licensee the name or names of the person or persons or organization upon whose instance or behalf such broadcast is to be made or conducted. Upon the making of any such broadcast the name of the speaker or speakers using the station, together with the other information required by this section, shall be announced both at the beginning and at the end of such broadcast. Public officers, speaking as such, whether local, State, or National, and whether elective or appointive, shall be relieved of compliance with the foregoing provisions, but in all cases the licensee shall cause an announcement to be made both at the beginning and at the end of the broadcast, stating the name of the speaker, the office held by him, whether such office is elective or appointive, and by what political unit or public officer such power of election or appointment is exercised. Where more than one broadcasting station or a network of such stations is used as herein provided, the requirements of this section will be met by compliance therewith at the station which originates such broadcast."

SEC. 10. Add to said title III the following new section:

"SEC. 331. In all cases where public officers other than the President of the United States use a radio-broadcast station for the discussion of public or political questions, the licensee of any station so used shall afford a right of reply to any person designated by the accredited representatives of the opposition political party or parties. In all cases the right of reply herein provided shall be afforded upon the same terms and conditions as the initial discussion and the Commission shall make such rules and regulations as are necessary to carry this provision into effect."

SEC. 11. Add to said title III the following new section:

"SEC. 332. No licensee of any radio-broadcast station nor the Commission shall have the power to censor, alter, or in any way affect or control the political or partisan trend of any material broadcast under the provisions of sections 315, 330, and 331 hereof: *Provided, however*, That no licensee shall be required under the provisions of this section or otherwise to broadcast any material for or upon behalf of any person or organization which advocates the overthrow of government by force or violence, and that no licensee shall be required to broadcast any material which is slanderous or libelous or which might subject the licensee or its station to any action for damages or to a penalty or forfeiture under any local, State, or Federal law or regulation. In all such cases the licensee shall have the right to demand and receive a complete and accurate copy of the material to be broadcast a sufficient time in advance of its intended use to permit an examination thereof and the deletion therefrom of any material necessary to conform the same to the requirements of this section, and the Commission shall make rules and regulations to carry this provision into effect."

Sec. 12. Amend section 402 of title IV by striking out the whole of said section and by inserting in lieu thereof the following:

"(a) The provisions of the Act of October 22, 1913 (38 Stat. 219), as amended, relating to the enforcing or setting aside of orders of the Interstate Commerce Commission are hereby made applicable to suits to enforce, enjoin, set aside, annul, or suspend any order of the Commission under this Act (except those appealable under the provisions of paragraph (b) hereof), and such suits are hereby authorized to be brought as provided in that Act. In addition to the venues specified in that Act, suits to enjoin, set aside, annul, or suspend, but not to enforce, any such order of the Commission may also be brought in the District Court for the District of Columbia.

"(b) Appeals may be taken from decisions and orders of the Commission to the United States Court of Appeals for the District of Columbia in any of the following cases:

"(1) By an applicant for any instrument of authorization required by this Act, or the regulations of the Commission enacted pursuant to this Act, for the construction or operation of apparatus for the transmission of energy, or communications, or signals by radio whose application is denied by the Commission.

"(2) By any party to an application for authority to assign any such instrument of authorization or to transfer control of any corporation holding such instrument of authorization whose application is denied by the Commission.

"(3) By any applicant for the permit required by section 325 of this Act or any permittee under said section whose permit has been modified, revoked, or suspended by the Commission.

"(4) By any other person who is aggrieved or whose interests are adversely affected by any order of the Commission granting or denying any application described in subparagraphs (1), (2), and (3) hereof.

"(5) By the holder of any instrument of authorization required by this Act, or the regulations of the Commission enacted pursuant to this Act, for the construction or operation of apparatus for the transmission of energy, or communications, or signals by radio, which instrument has been modified, revoked, or suspended by the Commission.

"(6) By any radio operator whose license has been revoked or suspended by the Commission.

"(c) Such an appeal shall be taken by filing a notice of appeal with the court within thirty days after the entry of the order complained of. Such notice of appeal shall contain a concise statement of the nature of the proceedings as to which appeal is taken; a concise statement of the reasons on which the appellant intends to rely, separately stated and numbered; and proof of service of a true copy of said notice and statement upon the Commission. Upon the filing of such notice, the court shall have exclusive jurisdiction of the proceeding and of the questions determined therein and shall have power, by order, directed to the Commission or any other party to the appeal, to grant such temporary relief as it may deem just and proper. Orders granting temporary relief may be either affirmative or negative in their scope and application and may be such as to permit either the maintenance of the status quo in the matter in which the appeal is taken or the restitution of a position or status terminated or adversely affected by the order appealed from and shall, unless otherwise ordered by the court, be effective pending hearing and determination of said appeal and compliance by the Commission with the final judgment of the court rendered in said appeal.

"(d) Upon the filing of any such notice of appeal, the Commission shall, not later than five days after date of service upon it, notify each person shown by the records of the Commission to be interested in said appeal of the filing and pendency of the same and shall thereafter permit any such person to inspect and make copies of said notice and statement of reasons therefor at the office of the Commission in the city of Washington. Within thirty days after the filing of an appeal, the Commission shall file with the court a copy of the order complained of, a full statement in writing of the facts and grounds relied upon by it in support of the order involved upon said appeal, and the originals or certified copies of all papers and evidence presented to and considered by it in entering said order.

"(e) Within thirty days after the filing of an appeal any interested person may intervene and participate in the proceedings had upon said appeal by filing with the court a notice of intention to intervene and a verified statement showing the nature of the interest of such party, together with proof of service of true copies of said notice and statement, both upon appellant and upon the Commission. Any person who would be aggrieved or whose interests would be adversely affected by a reversal or modification of the order of the Commission complained of shall be considered an interested party.

"(f) The record upon which any such appeal shall be heard and determined by the court shall contain such information and material and shall be prepared within such time and in such manner as the court may by rule prescribe.

"(g) At the earliest convenient time the court shall hear and determine the appeal upon the record before it and shall have power upon such record to enter judgment affirming or reversing the order of the Commission. As to the findings, conclusions, and decisions of the Commission, the court shall consider and decide, so far as necessary to its decision and where raised by the parties, all relevant questions of (1) constitutional right, power, privilege, or immunity; (2) the statutory authority or jurisdiction of the Commission; (3) the lawfulness and adequacy of Commission procedure; (4) findings, inference, or conclusions of fact unsupported, upon the whole record, by substantial evidence; and (5) administrative action otherwise arbitrary or capricious.

"(h) In the event that the court shall render a decision and enter an order reversing the order of the Commission, it shall remand the case to the Commission to carry out the judgment of the court and it shall be the duty of the Commission, in the absence of proceedings to review such judgment, to forthwith give effect thereto, and unless otherwise ordered by the court, to do so upon the basis of the proceedings already had and the record upon which said appeal was heard and determined.

"(i) The court may, in its discretion, enter judgment for costs in favor of or against an appellant, or other interested parties intervening in said appeal, but not against the Commission, depending upon the nature of the issues involved upon said appeal and the outcome thereof.

"(j) The court's judgment shall be final, subject, however, to review by the Supreme Court of the United States as hereinafter provided:

"(1) An appeal may be taken direct to the Supreme Court of the United States in any case wherein the jurisdiction of the court is invoked, or sought to be invoked, for the purpose of reviewing any decision and order entered by the Commission in proceedings instituted by the Commission which have as their object and purpose the revocation, modification, or failure to renew or extend an existing license. Such appeal shall be taken by the filing of an application therefor or notice thereof within thirty days after the entry of the judgment sought to be reviewed, and in the event such an appeal is taken the record shall be made up and the case docketed in the Supreme Court of the United States within sixty days from the time such an appeal is allowed under such rules as may be prescribed. Appeals under this section shall be heard by the Supreme Court at the earliest possible time and shall take precedence over all other matters not of a like character.

"(2) In all other cases, review by the Supreme Court of the United States shall be upon writ of certiorari on petition therefor under section 240 of the Judicial Code, as amended, by the appellant, by the Commission, or by any interested party intervening in the appeal or by certification by the court pursuant to the provisions of section 239 of the Judicial Code, as amended."

Sec. 13. Amend section 405 of said title IV by striking out the whole thereof and by inserting in lieu thereof the following:

"SEC. 405. After a decision, order, or requirement has been made by the Commission or any Division thereof in any proceeding, any party thereto or any other person, aggrieved or whose interests are adversely affected thereby may petition for rehearing. When the decision, order, or requirement has been made by the whole Commission, the petition for rehearing shall be directed to the whole Commission; when the decision, order, or requirement is made by a Division of the Commission, the petition for rehearing shall be directed to that Division; petitions directed to the whole Commission requesting a rehearing in any matter determined by a Division thereof shall not be permitted or considered. Petitions for rehearing must be filed within thirty days from the entry of any decision, order, or requirement complained of and except for those cases in which the decision, order, or requirement challenged is necessary for the maintenance or conduct of an existing service, the filing of such a petition shall automatically stay the effective date thereof until after decision on said petition. The filing of a petition for rehearing shall not be a condition precedent to judicial review of any such decision, order, or requirement, except where the party seeking such review was not a party to the proceedings before the Commission resulting in such decision, order, or requirement, or where the party seeking such review relies on questions of fact or law upon which the Commission has been afforded no opportunity to pass. Rehearings shall be governed by such general rules as the Commission may establish. The time within which an appeal must be taken under section 402 (b) hereof shall be computed from the date upon which the Commission enters its order disposing of all petitions for rehearing filed in any case, but any decision, order, or requirement made after such rehearing reversing, changing, or modifying the original determination shall be subject to the same provisions as an original order."

SEC. 14. Amend paragraph (a) of section 409 of said title IV by striking out the whole of said paragraph and by inserting in lieu thereof the following:

"(a) In all cases where a hearing is required by the provisions of this Act, or by other applicable provisions of law, such hearing shall be a full and fair hearing. Hearings may be conducted by the Commission or a Division thereof having jurisdiction of the subject matter or by any member or any qualified employee of the Commission when duly designated for such purpose. The person or persons conducting any such hearing may sign and issue subpenas, administer oaths, examine witnesses, and receive evidence at any place in the United States designated by the Commission. In all cases, whether heard by a quorum of the Commission or a Division thereof or by any member or qualified employee of the Commission, the person or persons conducting such hearing shall prepare and file an intermediate report setting out in detail and with particularity all basic or evidentiary facts developed by the evidence as well as conclusions of fact and of law upon each issue submitted for hearings. In all cases the Commission, or the Division having jurisdiction thereof, shall, upon request of any party to the proceeding, hear oral argument on said intermediate report or upon such other and further issues as may be specified by the Commission or the Division and such oral argument shall precede the entry of any final decision, order, or requirement. Any final decision, order, or requirement shall be accompanied by a full statement in writing of all the relevant facts as well as conclusions of law upon those facts."

SEC. 15. Amend the Act by adding thereto as a new section 417 the following:

"SEC. 417. (a) The Commission shall have the power to issue declaratory rulings concerning the rights, status, and other legal relations of any person who is the holder of or an applicant for a construction permit or license provided for in this Act or by the rules and regulations of the Commission enacted pursuant to this Act.

"(b) Upon the petition of any such person and when necessary to terminate a controversy or to remove a substantial uncertainty as to the application of the terms of this Act or of Commission regulations enacted pursuant to this Act to such person, the Commission may hear and determine the matters and things in issue and may enter a declaratory ruling which shall, in the absence of reversal after appropriate judicial proceedings, have the same force and effect and be binding in the same manner as a final order of the Commission. When a petition for declaratory ruling is entertained by the Commission, all persons shown by the records of the Commission to have or claim any interest in the subject matter shall be ordered by the Commission to be made parties to the proceeding and no such ruling shall bind or affect the rights of persons who are not parties to such proceeding.

"(c) In all proceedings instituted by the Commission and which have as their object and purpose the revocation, modification, or failure to renew or extend an existing construction permit or license, the Commission shall be required to entertain any petition for declaratory relief which is filed within a period of ten days after the institution of any such proceedings, and such proceedings so instituted by the Commission shall be held in abeyance until all petitions for declaratory rulings involving the same parties and the same subject matter have been heard and determined and the results thereof made subject to judicial review as herein provided.

"(d) Any party to a proceeding in which the Commission has entered a declaratory ruling may appeal from such ruling and any party to a proceeding arising under paragraph (c) hereof in which the Commission is requested to issue a declaratory ruling may appeal from such ruling or from the Commission's failure to issue such ruling to the United States Court of Appeals for the District of Columbia, and that court shall have jurisdiction to hear and determine any such appeal in the same manner and to the same extent as in the case of final orders of the Commission appealable under section 402 (b) of this Act, as amended."

SEC. 16. Add to said title IV the following new section:

"SEC. 418. Penalties, denials, prohibitions, and conditions other than those expressly authorized by statute shall not be exacted, enforced, or demanded by the Commission in the exercise of its licensing function or otherwise and no sanctions not authorized by statute shall be imposed by the Commission upon any person. Rights, privileges, benefits, or licenses authorized by law shall not be denied or withheld in whole or in part where adequate right or entitlement thereto is shown. The effective date of the imposition of sanctions or withdrawal of benefits or licenses shall, so far as deemed practicable, be deferred for such reasonable time as will permit the persons affected to adjust their affairs to accord with such action or to seek administrative reconsideration or judicial review.

BATTERY MEETING TODAY

Representatives of the Department of Agriculture, the Office of War Information, War Production Board and the National Association of Broadcasters are meeting Friday. The battery situation is receiving the complete and serious consideration of NAB and the government.

Dry cell battery manufacturers are to meet with WPB on March 10.

NEW LIBEL LAW

An amendment to the North Carolina Libel Law was ratified February 25. It requires that radio and television stations be given five days notice before the commencement of either civil or criminal action for libel or slander. By broadcasting a retraction within ten days of such notice, provided the utterance was broadcast in good faith and its falsity due to an honest mistake of the facts, or without prior knowledge of the station or with reasonable grounds for believing the utterance was true, only actual damages can be recovered in a civil action and a fine of only a penny and costs can be imposed upon verdict of guilty in a criminal proceeding.

We print the Act in full below:

"AN ACT TO AMEND SECTIONS TWO THOUSAND FOUR HUNDRED TWENTY-NINE AND TWO THOUSAND FOUR HUNDRED THIRTY OF THE CONSOLIDATED STATUTES OF NORTH CAROLINA RELATING TO LIBEL AND SLANDER BY RADIO OR TELEVISION STATIONS."

SECTION 1. That Section two thousand four hundred twenty-nine of the Consolidated Statutes of 1939 be amended by adding thereto subsection (b) reading as follows: "(b) Before any action, either civil or criminal, is brought for the publishing, speaking, uttering, or conveying by words, acts or in any other manner of a libel or slander by or through any radio or television station or company, the plaintiff or prosecutor shall at least five days before instituting such action serve notice in writing on the defendant, specifying the time of and the words or acts which he or they allege to be false and defamatory."

SECTION 2. That Section two thousand four hundred thirty of the Consolidated Statutes of 1939 be amended by adding thereto subsection (b) reading as follows: "(b) If it appears upon the trial that such words or acts were conveyed and broadcast in good faith, that their falsity was due to an honest mistake of the facts, or without prior knowledge or approval of such station or company, and if with prior knowledge or approval that there were reasonable grounds for believing that the words or acts were true, and that within ten days after the service of said notice a full and fair correction, apology and retraction was conveyed or broadcast by or over such radio or television station or company at approximately the same time of day and by the same sending power so as to be as visible and audible as the original acts or words complained of, then the plaintiff in such case, if a civil action, shall recover only actual damages, and if, in a criminal proceeding, a verdict of "guilty" is rendered on such state of facts, the defendant shall be fined a penny and costs, and no more."

SECTION 3. This act shall not affect any pending litigation relative to libel and slander by any radio or television station.

SECTION 4. This act shall be in full force and effect from and after its ratification.

Ratified February 25, 1943.

PERSONNEL OWI OVERSEAS STUDIOS

Some progress has been made in the cooperative effort undertaken by NAB with the International Division of the Office of War Information to secure the necessary personnel to staff its New York studios. The appeal made in the REPORTS (February 12) to stations to make known to NAB any personnel available, has brought some response. Two of the large stations have offered the services of employees who can be spared and another station has offered to place notices on its bulletin board to see if any of its employees are interested.

Meantime the International Division is perfecting plans to institute an intensive program to train studio operators, but the immediate need is for a limited number of experienced supervisors and technical men. Since but a few of these are needed, NAB joins with the International Division in again appealing to any station having employees who may be released for this purpose, to provide that information to the International Division through NAB. Stations having applications from semi-trained men or women are urged to send in that information.

The effort to secure personnel on a voluntary basis and the training program is instituted as a means of avoiding the necessity for soliciting employees in areas and from stations where great harm might be done domestic broadcasting. In other words an attempt is being made to solve this problem through cooperation and voluntary action. Stations having personnel which can be released are urged to get in touch with NAB immediately.

TECHNICIANS AVAILABLE

The American Radio Relay League is cooperating with the NAB Engineering Department in a registration of amateur radio operators who are willing to assist in the war effort by taking technical positions in broadcast stations. Applications will not be accepted from persons now employed within the broadcast industry, as the purpose of the campaign is to recruit persons outside the industry who are not now utilizing their radio training. The March issue of QST, the official magazine of the ARRL, carried an appeal to the amateurs.

NAB is now receiving a limited number of letters from amateurs listing their radio background, age, sex, draft classification, availability for full or part time work and information as to localities in which they are willing to work. A substantial portion of the applications are from persons already holding commercial operator licenses. Those that are not licensed, in many instances, have an acceptable technical background and have some knowledge of transmitting equipment.

Stations in need of replacement technicians should first make every effort to fill vacancies locally. If it is found impossible to secure the required replacements, stations are invited to write to the NAB Engineering Department for the names of several available persons. NAB has no knowledge of the applicants other than the statements contained in the registration letter and is therefore not in a position to make employment recommendations. The usual employment references should be secured by direct correspondence with the applicants.

THANKS TO RADIO

Basil O'Conner, president of the National Foundation for Infantile Paralysis, has asked the NAB to express the institution's gratitude for the cooperation of radio during the President's Birthday Ball season.

DISTRICT 3 MEETING

Isaac D. Levy, District 3 Director, has called a District meeting at the Benjamin Franklin Hotel in Philadelphia on March 22 to elect a Director for the term starting with the next NAB Convention.

LABOR ARBITRATION

John Lapp, noted labor arbiter, has written an excellent book covering the whole subject of arbitration. It should be of interest to every employer who deals with labor unions, especially now when so many labor negotiations wind up in arbitration.

The NAB has made arrangements with the National Foremen's Institute, Inc., to supply members of the NAB with copies of the book at $2.50 each when ordered through the NAB. The regular price is $3.50.

Do not send any money with your order. The publisher will bill you when the book is sent.

COST OF LIVING

The United States Department of Labor reports that the cost of living increased 0.2% between December 15, 1942, and January 15, 1943, bringing the increase since January 15, 1942, to 7.7%.

EGOLF, DENNIS AT NAB

Willard D. Egolf, NAB assistant to the president, and Walter L. Dennis, NAB news bureau chief, both new staff members, swung into action officially at the recent NAB directors' meeting in New York City. They released stories of the meeting to trade, wire service and network news outlets. Dennis, former sales promotion manager of KVOO, Tulsa, is a veteran of 10 years' newspaper and radio experience and, on going to work in Washington, he discovered a host of former newsmen with whom he had worked in the past stationed in various government agencies, including two former "bosses."

EDUCATIONAL SERVICE

Declaring radio to be a "solemn responsibility" of the people to see that it is kept to the highest standards, Mrs. Leo A. Viano, state radio chairman of Northern California, paid tribute to the NAB educational activities recently in a talk entitled "Radio—A Public Service" before the California Federation state convention. Mrs. Viano termed radio to be "the greatest medium of communication the world has ever known and . . . (is) the basis of national unity."

DAYLIGHT TIME

In New York City last week, while attending the NAB board meeting, Neville Miller, president, released the following statement to press and radio:

"The action of some states, in abolishing national Daylight Saving Time, constitutes a threat to America's civilian communications system, now vital in wartime.

"If this confusion grows, the people will find themselves more and more isolated from the Office of War Information, whose effective use of radio depends on a uniform national time schedule."

Stations remaining on War Time, despite local action, and wishing to maintain public identification of their effort to preserve a national unified radio time pattern, may do so by announcing their time as "Eastern RADIO War Time," or "Central RADIO War Time," etc., Willard Egolf suggests. Such action may gain favor with OWL, for the correct pre-announcement of special broadcasts, it is thought.

DEAN LAMPE REPORTS ON RADIO COURSES

A report of the activities of the NAB-ESMWT radio training program in Connecticut from March to January, 1943, has been prepared by J. H. Lampe, Dean of Engineering, University of Connecticut, who is the State Coordinator.

Franklin M. Doolittle, president, WDRC, Hartford, is Industry Representative in this enterprise and works in close harmony with Dean Lampe.

Said the Dean: "While this report deals with the University of Connecticut's radio course at Hartford, it should be emphasized that very successful radio training courses have also been given or are in progress at New Haven, Waterbury, Bridgeport, Stamford and New London." All these courses have had the support of the broadcasting stations in Connecticut. This support was organized through the efforts of the National Association of Broadcasters, with Mr. Doolittle as Industry Representative. All courses were given under the ESMWT program of U. S. Office of Education.

At New Haven and Waterbury, Yale University with the New Haven Junior College, cooperating, operated the courses. At Bridgeport and Stamford, Yale University with the Bridgeport Engineering Institute, cooperating, sponsored the training work; and at New London, the University of Connecticut with the New London Junior College, cooperating, operated the radio course. In Hartford, the University of Connecticut gave the radio training courses at its Extension Center (Walter Camp School).

Section 5 of the report covers "conclusion." The opinion is that "these courses have been able successfully to train students for active participation in the field of radio, either in the armed forces, war industry, or other critical activities. A sincere effort has been made to furnish the maximum of instructional value in the class and laboratory work to make those who finish the course most useful wherever they may be assigned. The experience gained by the staff in this effort should enable them to do an even better training job in the future."

GOOD PGM IDEA FROM WROK

The format for maintaining a fine state of worker morale in Rockford, Ill., undoubtedly has application in other parts of the country. Radio is the medium, "Soldiers of Industry" the vehicle.

The 30 minute program is broadcast at 2 p. m. Sundays; 9:15 p. m. Mondays and 6:15 a. m. Tuesdays. This insures a large audience of workers on the various shifts. The program is transcribed each Friday night. Transcriptions are also available for play-back in plants each week.

Sponsors are 12 major war plants in Rockford as follows:

American Cabinet Hardware Corp.; Cotta Transmission Corp.; George D. Roper Corp.; Greenlee Bros. & Co.; Ingersoll Milling Machine Co.; National Lock Co.; Rockford Drilling Machine Co.; Rockford Machine Tool Co.; Sundstrand Machine Tool Co.; and the Woodward Governor Co.

The program was developed by John J. Dixon, commercial manager, WROK. It combines news and drama. The first quarter-hour is devoted to flash news of personnel activities in each of the plants. There are reviews of bowling and other sports activities shared by employees as well as "personal" items about individual workers. The news portion also includes letters from former employees now in service. Factory personnel managers supply the news from each plant.

The last fifteen minutes of each program is in the nature of a dramatic tribute to the workers of one of the participating factories. The story traces the use of the plant's principal product from the time it is shipped from Rockford until it is doing its duty on land, on the sea or in the air. Based on actual happenings, the drama provides a vivid answer to the factory worker's question of how his seemingly insignificant task at a machine applies to the winning of the war.

Concerning the purpose of the show Mr. Dixon said: "The average factory worker—the fellow on the machine or the girl in the office—can't realize the importance of his job. He's doing the same work today that he did in peace time and he can't see the connection between his job and the men on the battlefronts. Through the dramatic episodes on 'Soldiers of Industry' we picture the production of certain items from the machine to the finished product as it is used by our fighting men. This brings home to the worker that he is responsible for making the goods that will win the war."

The main object of the program is to impress upon each worker the importance of his job, thus building his morale.

THANK YOU, CY!

Neville Miller has received the following heart-warming letter:

DEAR NEVILLE:

I am in receipt of a bill for 1943 associate membership dues and I wish to call your attention to the fact that the damn bill is *wrong*.

You're charging me $250.00 for associate membership and *I say* it should be $500.00!

Yes. Neville. and I am delighted to hand you our check in the amount of $500.00 in payment of our membership in the swellest association it's ever been my privilege to be a member of.

Cordially yours,
LANG-WORTH FEATURE PROGRAMS INC.,
(s) "Cy"
C. O. LANGLOIS, *President*.

mp/enc.

WKIP BOND AUCTIONS SELL

According to Ned Lynch, WKIP, Poughkeepsie, N. Y., bond sales continue good. He says: "Our greatest plug for war bonds is on three weekly War Bond Auctions . . . we promote them several times daily."

EGOLF TALKS TO BOARD

In his maiden speech before the NAB board of directors, Thursday, February 25, in New York City, Willard D. Egolf, newly appointed assistant to the president, discussed the definition of public relations:

"When I told my family that one of my duties was to handle public relations for the National Association of Broadcasters, my twelve year old son said, 'Daddy, what are public relations for broadcasters?'

"Kids can ask the damndest questions!

"I said, son, that's what the broadcasters and I are going to find out!"

Egolf then stated his conception of public relations, as follows:

"The conduct of public relations, for any industry, is the science of being known favorably by the greatest number of people. I shall leave no avenue untouched to reach that goal. The affairs of this office shall be conducted with dignity and pride in the belief that the American system of broadcasting is the greatest medium the world has ever known."

DONALD STAUFFER TO OWI

Elmer Davis, Director of the Office of War Information, announced the appointment of Donald D. Stauffer as Chief of the Domestic Radio Bureau, OWI, to fill the vacancy created when William B. Lewis was appointed to the post of Assistant Director of the Domestic Branch. Mr. Stauffer, now Vice President in charge of Radio for Ruthrauff & Ryan, has been granted a leave of absence and will take office on March 15. His headquarters will be in Washington.

CHILDREN'S PROGRAMS

The prize-winning letter to the Radio Council of Greater Cleveland on the subject: "What I Consider Good Radio Listening for Children" made the following points as procedure in educating children to better radio listening: strict censorship over the child's listening when he is small to provide the proper start for later discrimination; a "bargain" agreement as the child grows older whereby for every adventure type program listened to the child would also listen to musical programs of a quality nature and to portions of important talks or lectures, and, finally, programs where good grammar and ordinary or pleasant voice tones were used in preference to programs of wide voice ranges and slang. Calm, unflurried presentation of programs were preferred to loud, emotional types.

PERSONNEL DATA

To simplify the gathering of important information desired by the Armed Forces, NAB has agreed to contact all radio stations in the country with a request for personnel data which each station should have readily accessible. By the time you read this, you should have received or shortly will receive a letter and questionnaire form on this matter and also a questionnaire form concerning news editors and commentators on your stations. Expeditious filling out and returning of these forms will be of utmost benefit.

LISTENING GUIDE

The Springfield, Mass., radio stations, WBZA, WSPR and WMAS, have issued a "Radio Guide to Good Listening" for their listeners. In pamphlet form, the guide was prepared by the Pioneer Radio Council of Springfield.

ADVERTISING DEFENDED

A sturdy defense of radio advertising, as well as advertising in other media, has been received at NAB New York headquarters by Mrs. Dorothy Lewis from Mrs. John D. Robinson, of Wallace, N. C., of the North Carolina Federation of Women's Clubs.

Mrs. Robinson, in a letter, declares that advertising has contributed directly to the nation being "better fed, better clothed, better housed" and in this advancement of living standards "radio has played a magnificent part."

48-Hour Week

Relief for radio stations which find a 48-hour week impractical must be obtained locally, although the NAB is preparing to ask for a "directive" on the subject from the War Manpower Commission to its local enforcement agents.

Administration of the 48-hour week order (see NAB REPORTS, p. 55) is being totally decentralized. The best advice the NAB can give stations in the 32 critical areas at the moment is to *get together* and talk over the situation with their local WMC directors.

The monkey is on the employer's back. In case all his employees or the employees in any department are not going to a 48-hour week before April 1, he must be prepared to justify his schedule. On the other hand, if the employer does go to a 48-hour week so that he can release one or more employees for other war work, he must get WMC approval before the employees are released.

To hire a new employee after April 1, the employer must get a WMC permit. At that time, the WMC undoubtedly will ask whether the employer's employees are on a 48-hour week. If not, the employer will have to justify his schedule before he can get the permit. Local draft boards probably will take this into consideration, too, in acting on employers' requests for employee deferments.

In instances where employees are now working less than 48 hours and the employer feels that an advance to a 48-hour schedule would work a hardship, we feel that the employer should encounter no great difficulty in justifying his present schedules. For instance, take the six-man engineering department. Theoretically, five men at 48 hours can turn out the same number of hours work as six at 40. If one of the six is released on that basis, however, and another gets sick, is drafted, or goes on vacation, the remaining four have to work a 60-hour week to get the same amount of work done. "Peak loads" for both technicians and announcers make another problem. Radio is not like a factory where vast numbers of employees are doing the same work throughout an unbroken work-day. Certain union restrictions pose other problems.

All these complexities should be considered when the station applies the two tests:

(1) If the entire station or any department goes to a 48-hour week, can manpower be released for other war work?

(2) If the entire station or any department goes to a 48-hour week, will this obviate the necessity for hiring more men?

If the answer to either of these questions is "yes," fundamentally, the answer to the 48-hour week is "yes"—unless the complexities of the situation, such as those above, stand in the way.

In preparing radio's case to present to the WMC, the NAB held conferences in Washington, D. C., Springfield, Mass., and Baltimore, three of the "critical areas."

Joseph L. Miller, director of labor relations, met with the broadcasters in Baltimore and Springfield, while Paul Peter, director of research, held the Washington meeting. Those present at the three meetings:

Springfield—C. S. Young, WBZ; Harold Randol, WBZA; Albert Marlin, WMAS; Patrick Montague, WHYN; and Thomas Humphrey, WHYN.

Baltimore—George Roeder, WCBM; H. W. Batchelder, WFBR; L. Waters Milbourne, WCAO; Thomas Tinsley, WITH, and William Good, WBAL.

Washington—Earl Gammons, WJSV; Ken Yourd, WJSV; Carleton Smith, WRC; Mr. Margraf, WRC; Ken Berkeley, WMAL; Henry Lyon, WOL; G. Bennett Larson, WWDC; and Miss Davis, WINX.

STATMENT BY WMC

Regulations issued February 28 by Chairman Paul V. McNutt of the War Manpower Commission to govern the applications of the 48-hour week called for by the President will, with some exceptions, affect all employers of eight or more persons in 32 designated areas whose production can be increased by a longer week or who can maintain their production with fewer men.

The exact boundaries of these areas, for the purpose of applying the 48-hour week, will be fixed by the regional directors of the WMC in the various localities.

In addition to applying in these areas, the 48-hour week also will be in effect in the lumbering and nonferrous mining industries on a nation-wide scale, Mr. McNutt said.

Inquiries concerning application of the regulations should be directed to the proper regional or area manpower director. Administration of the order is delegated by the Chairman to the commission's regional directors and area directors.

It is made clear that the lengthened week order will not apply to farms or to persons employed by any state or any of its political subdivisions or instrumentalities, or to youth under the age of 16, or to persons who, because of other employment, household duties, or physical disabilities, are not available for full-time work, or for business houses in which fewer than eight persons are employed regularly.

The exclusion of establishments with fewer than eight persons, it is explained in an interpretative statement issued with the regulations, is based chiefly on assumption that in smaller establishments the extension of the workweek would not result in the release of workers.

The regulations have been sent to regional and area directors and to U. S. Employment Service Offices, together with instructions for carrying out terms of the President's order.

In the regulations, it is stated that from time to time regional manpower directors may designate additional areas and activities if they find such action will reduce labor shortages which are holding back the war effort.

Regional and area directors are authorized to consider a minimum workweek of less than 48 hours when a full 48-hour week would neither increase production, release workers for other employment, nor otherwise further the war effort.

Mr. McNutt explains in the regulations that the President's Order "shall be so construed and applied as best to effectuate its fundamental purpose, which is to aid in meeting the manpower requirements of our armed forces and our expanding production program by fuller utilization of our available manpower."

Continuing, the regulations state:

"Effectuation of this purpose requires that, in situations of labor shortages, employers do not hire new workers when their manpower needs can be effectively met by a fuller utilization of their current labor force and that workers who can be released by an extension of the workweek are released under circumstances which will permit and facilitate their effective utilization elsewhere in the war effort."

The regulations provide that, if the labor requirements of an employer are such that the extension of the workweek will not permit the release of any workers but would result rather in their continued full utilization in their present employment or their transfer to other employment under his direction, the 48-hour week should be put into effect at once.

Whenever the regional or area manpower director or the designated representative of either determines that released workers can be placed promptly in suitable employment, their employer will be notified. The employer should then proceed promptly to shift to the longer week. If the representative of the War Manpower Commission has not determined and notified the employer, however, that his released workers can be placed without delay, the workweek will not be extended before April 1, 1943.

Before that the date the employer will be expected to submit to the representative of the Commission a statement as to how many workers would be released and their occupational classification, together with a proposed schedule for the timing of their release. In such cases, the regional or area manpower director or designated representative will authorize the schedule for the extension of the workweek to the 48-hour workweek and for the release of the workers in accordance with the needs of the labor market. The employer then will extend his workweek in accordance with such schedule.

An employer in any designated area or activity who is not in compliance with the regulations shall not hire any workers.

Following are the text of the regulations and two orders, one listing the areas in which the 48-hour regulations are to be effected and another extending the regulations to the lumbering and non-ferrous mining industries.

REGULATIONS NO. 3

By virtue of authority vested in me as Chairman of the War Manpower Commission by Executive Order No. 9301 establishing a minimum wartime workweek of 48 hours, and by Executive Orders Nos. 9139 and 9279, I hereby prescribe the following Regulations:

903.1 General Policy for Interpretation and Application of Executive Order

Executive Order No. 9301 shall be so construed and applied as best to effectuate its fundamental purpose, which is to aid in meeting the manpower requirements of our armed forces and our expanding war production program by a fuller utilization of our available manpower. Effectuation of this purpose requires that in situations of labor shortage employers do not hire new workers when their manpower needs can effectively be met by a fuller utilization of their current labor force and that workers who can be released by an extension of the workers are released under circumstances which will permit and facilitate their effective utilization elsewhere in the war effort.

903.2 Application to Areas and Activities

The Chairman of the War Manpower Commission will from time to time by order designate areas and activities as subject to the provisions of Executive Order No. 9301. Regional manpower directors may designate additional areas and activities within their respective regions as subject to the provisions of Executive Order No. 9301 if they find, and by appropriate public notice so declare, that such action will aid in alleviating labor shortages which are impeding the war effort. Unless and until an area or activity has been so designated, employers therein will not be required to extend their workweek.

903.3 Delegation of Authority

Regional and area manpower directors are authorized and directed to determine all questions arising within their respective regions and areas with respect to the interpretation and application of these Regulations, in conformity with such procedures and instructions as the Executive Director of the War Manpower Commission may issue in implementation thereof.

903.4 Minimum Wartime Workweek

"Minimum Wartime Workweek" as used in these Regulations means a workweek of 48 hours, except in cases where a workweek of 48 hours (a) would be impracticable in view of the nature of the operations, (b) would not contribute to the reduction of labor requirements, or (c) would conflict with any federal, state, or local law or regulation limiting hours of work. In such cases "Minimum Wartime Workweek" means the greatest number of hours (less than 48) feasible in the light of the nature of the operations, the reduction of labor requirements, or the applicable federal, state, and local law or regulation, as the case may be.

903.5 Extension of Workweek in Designated Areas and Activities

If the workweek applicable to any worker employed in any plant, factory, or other place of employment in an area or any activity designated as subject to the provisions of Executive Order No. 9301 is less than the Minimum Wartime Workweek, such workweek shall be extended to the Minimum Wartime Workweek as follows:

(a) Whenever extension of such workweek to the Minimum Wartime Workweek would not involve the release of any workers, the affected employer shall proceed promptly to extend the workweek to the Minimum Wartime Workweek.

(b) Whenever the regional or area manpower director or a designated representative of either determines that extension of such workweek to the Minimum Wartime Workweek would involve the release only of workers who can be promptly placed in suitable employment with other employers, the affected employer will be notified of such determination and thereupon shall proceed promptly to extend the workweek to the Minimum Wartime Workweek.

(c) If extension of such workweek to the Minimum Wartime Workweek would involve the release of some workers and the regional or area manpower director or designated representative has not determined and notified the employer be placed in suitable employment with other employers, the workweek shall not be extended except as authorized below. On or before April 1, 1943, the affected employer shall submit to the regional or area manpower director or the designated representative of either director a statement as to the number of workers whose release would be involved and their occupational classification, together with a proposed schedule for the timing of such releases. The regional or area manpower director or designated representative will authorize a schedule for the extension of the workweek to the Minimum Wartime Workweek and for the release of workers in terms of labor market needs, and the employer shall thereupon proceed to extend the workweek in accordance with such schedule.

903.6 Restriction Upon Hiring of Workers

No employer shall hire any worker in an area or activity designated as subject to the provisions of Executive Order No. 9301 if the employer has failed in any manner to comply with the provisions of Section 903.5 of these Regulations in the plant, factory, or other place of employment in which the worker would be employed.

903.7 Exclusions

No provision of these Regulations shall be construed or applied so as to require the extension of a workweek:

(a) in any establishment or other place of employment in which less than eight workers are regularly employed;

(b) in any establishment or place of employment principally engaged in agriculture;

(c) of persons in the employ of any State or any political subdivision thereof, or any instrumentality of any one or more of the foregoing;

(d) of youth under the age of sixteen years; or

(e) of individual who, on account of other employment, household responsibilities, or physical limitations, are not available for full-time work.

903.8 Definitions

As used in these Regulations:

(a) "Workweek" means the number of hours within a period of seven successive days, beginning with the same calendar day each week, during which workers are normally required to be on duty.

(b) "Agriculture" means those farm activities carried on by farm owners or tenants on farms in connection with the cultivation of the soil, the harvesting of crops, or the raising, feeding, or management of livestock, bees, and poultry and shall not include any packing, canning, processing, transportation, or marketing of articles produced on farms unless performed or carried on as an incident to ordinary farming operations as distinguished from manufacturing or commercial operations.

Effective date, February 22, 1943.

GENERAL ORDER NO. 5

Designation of Certain Areas as Subject to the Provisions of Executive Order No. 9301

By virtue of the authority vested in me as Chairman of the War Manpower Commission by Executive Order No. 9301, establishing a minimum wartime workweek of 48 hours, and in accordance with the provision of Section 903.2 of the Regulations prescribed by me on February 22, 1943, I hereby designate the following areas as subject to the provisions of Executive Order No. 9301:

Akron, Ohio; Baltimore, Md.; Bath, Me.; Beaumont, Tex.; Bridgeport, Conn.; Brunswick, Ga.; Buffalo, N. Y.; Charleston, S. C.; Cheyenne, Wyo.; Dayton, Ohio; Detroit, Mich.; Elkton, Md.; Hampton Roads, Va.; Hartford, Conn.; Las Vegas, Nev.; Macon, Ga.; Manitowoc, Wisc.; Mobile, Ala.; New Britain, Conn.; Ogden, Utah; Panama City, Fla.; Pascagoula, Miss.; Portland, Oreg.; Portsmouth, N. H.; San Diego, Calif.; Seattle, Wash.; Somerville, N. J.; Springfield, Mass.; Sterling, Ill.; Washington, D. C.; Waterbury, Conn.; Wichita, Kan.

Effective date: February 22, 1943.

WMC Manual of Operations

OPERATING INSTRUCTION—FIELD NO. 14

1. *Purpose*

.01 The purpose of this instruction is to establish the procedures to be followed in the field offices of the War

Manpower Commission in carrying out the provisions of Executive Order No. 9301, and the Regulations prescribed under the terms of that Order by the Chairman of the War Manpower Commission.

2. *Policy*

.01 The effectuation of the purposes of Executive Order No. 9301, hereinafter referred to as the Executive Order, shall be the responsibility of the several Regional Manpower Directors in their respective jurisdictions. The responsibilities and authorities set forth in this instruction, with the exception of the authority to designate areas and activities subject to the provisions of the Executive Order, may be delegated by Regional Manpower Directors to Area Manpower Directors, or to any other persons administratively responsible to them.

.02 Regulations No. 3 prescribed by the Chairman on February 22, 1943, for the application of the Executive Order, hereinafter referred to as the *Regulations*, which together with the *Interpretations* thereof, establishes the policies under which Regional Manpower Directors and their designated representatives will proceed to carry out their responsibilities.

3. *Procedure*

.01 General Order No. 5, approved by the Chairman on February 22, 1943, designated 32 areas as areas in which the Executive Order must be made operative. It is the responsibility of the Regional Manpower Directors to define the geographical limits of these areas. These designated areas should generally be defined so as to be identical with respect to the surrounding communities to be included, with the so-called Group I areas in the February list. However, for purposes of the Executive Order and the Regulations, the Regional Manpower Director may exclude certain of these surrounding communities if he finds that such exclusions are necessary for the purpose of properly effectuating the Executive Order. The Regional Manpower Director shall give notice as to the communities which are to be included in each of the designated areas.

.02 Regional Manpower Directors are authorized to designate additional areas or activities in the respective regions as subject to the provisions of the Executive Order. Prior to any such designation they shall make a finding that the designation of such area or activity will aid in alleviating labor shortages which are impeding the war program.

.03 The findings to be made by the Regional Manpower Director with regard to the area or activity shall be based upon such labor market information as he can obtain.

.04 The Regional Manpower Director's findings shall clearly describe the areas or activity to be designated as subject to the provisions of the Executive Order. The boundaries of designated areas shall conform as closely as is practicable to the boundaries of the "labor market areas" used in analyzing the adequacy of available manpower. The findings shall designate a date, subsequent to the time of their announcement, which date shall, for the purpose of the newly designated area or activity, serve the same purpose as the date *April 1, 1943*, in Section 903.5 (c) of the Regulations.

.05 The Regional Manpower Director or his representative shall then give public notice of these findings through newspapers, trade journals, radio, and other channels. (Because of Office of War Information regulations regarding release of public information, all public informational materials should have advance clearance by the Regional Informational Service Representative.)

.06 Regional Manpower Directors shall inform the Executive Director of all designations and definitions of areas made in accordance with provisions of subsections 3.01, 3.02, 3.03, and 3.04 of this instruction. This information shall be forwarded as far as is practicable in advance of the date referred to in subsection 3.04.

.07 In carrying out their responsibilities, Regional Manpower Directors or their authorized representatives shall review complaints from individuals or organizations regarding non-compliance. They shall make such investigations as may be necessary to determine whether the employer is complying with the Regulations.

.08 In making investigations as to the non-compliance of an employer, the Regional Manpower Director or his representative shall utilize to the extent necessary the reports, records, and personnel of the War Manpower Commission and of other Government agencies.

.09 If a Regional Manpower Director, or his authorized representative has reason to believe that in a particular plant, factory or other place of employment the Minimum Wartime Workweek could be adopted as provided in subsection (b) of Section 903.5 of the Regulations, he may require the employer to submit information as to the number of workers, classified according to occupation, who would be released as a result of the extension of the workweek.

.091 If the Regional Manpower Director or his representative determines that it should be possible to place the workers promptly in suitable employment with other employers, he shall:

(a) instruct the employer to proceed promptly to extend the workweek to the Minimum Wartime Workweek; and

(b) inform the appropriate local offices of the United States Employment Service of the number and occupational classification of workers to be released.

.092 If the demand for such workers in the locality does not make it possible for them to be placed promptly in suitable employment with other employers, the Regional Manpower Director or his representative shall notify the employer that the workweek shall be extended to the Minimum Wartime Workweek only in conformity with the provisions of subsection (c) of Section 903.5 of the Regulations.

.10 All schedules for the release of workers approved in accordance with subsection (c) of Section 903.5 of the Regulations shall be forwarded by Regional Manpower Directors or their representatives to appropriate Local Offices of the United States Employment Service.

.11 If the Regional Manpower Director or his representative determines that, with respect to any plant, factory, or other place of employment, an employer is not complying with the Regulations, he shall:

(a) notify such employer that he is not permitted to hire workers for work in such plant, factory, or other place of employment; and

(b) so inform appropriate local offices of the United States Employment Service.

.12 Regional Manpower Directors shall instruct all review units established under approved employment stabilization programs in areas and for activities designated as subject to the provisions of the Executive Order to consider the Minimum Wartime Workweek as defined in Section 903.4 of the Regulations as full time employment for the purpose of determining eligibility of a worker for a Statement of Availability.

.13 When the designated representative of a Regional Manpower Director cannot secure compliance with the Regulations through resources available to him, he shall submit a full report of the nature and extent of the violation to the Regional Manpower Director who shall take action through the appropriate Government agency.

.14 Any worker or employer, or group of workers or employers, dissatisfied with any act or failure to act pursuant to the terms of the Regulations and this instruction shall be given a fair opportunity to present his or their case through the War Manpower Commission appeals procedure.

FEDERAL LEGISLATION

SENATE

S. 814 (White, R-Maine) (For himself and Mr. Wheeler, D-Mont.) COMMUNICATIONS—To amend the Communications Act of 1934 and for other purposes. Referred to the Committee on Interstate Commerce.

STATE LEGISLATION

MISSOURI:

H. 295 (Tucker) DENTISTRY—ADVERTISING—Provides for new section 10088A relating to advertising by a person not licensed to practice dentistry or to construct dentures, etc.

H. 325 (Anderson) DENTISTRY PRACTICE—Relating to the practice of dentistry, providing for penalties and repealing conflicting laws. Referred to Committee on Medicine, Dentistry, and Pure Foods.

H. 374 (Cramer) BROADCASTING—FINANCIAL RESPONSIBILITY—Provides that the sponsor or person broadcasting shall be held financially responsible for matter broadcast. Referred to Committee on Judiciary.

S. 275 (Rosellini) BROADCASTING—SPONSOR ANNOUNCED—Provides that news reporters, analysts, and commentators, when broadcasting, must disclose the name of their sponsor. Referred to Committee on Judiciary.

WEST VIRGINIA:

H. 304 (Flint) LIQUOR—ADVERTISEMENT—Prohibiting the advertisement in any form or medium of alcoholic liquor or beer. Fixes penalties. Referred to Committee on Temperance.

FEDERAL COMMUNICATIONS COMMISSION

NEW FREQUENCY CLASSIFICATION

The FCC has announced a new classification of radio frequencies into seven major bands, effective immediately.

As a result of the Commission action, Section 2.5 of the General Rules and Regulations will read as follows:

Sec. 2.5 *Useful radio spectrum*—"Useful radio spectrum" means the total number of frequencies or wavelengths which may be used for the transmission of energy, communications or signals by radio.[3]

[3] At the present development of the art the useful radio spectrum is considered to extend from 10 kilocycles to 30000000 kilocycles or 30000 meters to 0.01 meters. These frequencies are classified into bands with designations and abbreviations as follows:

Frequency in Kilocycles					Designations	Abbreviations
	10	to	30	inclusive	Very Low	VLF
Above	30	to	300	"	Low	LF
"	300	to	3000	"	Medium	MF
"	3000	to	30000	"	High	HF
"	30000	to	300000	"	Very High	VHF
"	300000	to	3000000	"	Ultra High	UHF
"	3000000	to	30000000	"	Super High	SHF

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, March 8th. It is subject to change.

Tuesday, March 9

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of license, **700 kc.**, 50 KW night, 500 KW day, unlimited, using W8XO transmitter.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

W67B—Westinghouse Radio Stations, Inc., Boston, Mass.—Granted modification (B1-MPH-83) of construction permit (B1-PH-62) for change in transmitter and extension of commencement and completion dates. Also granted license (B1-LH-32) to cover construction permit in part, pursuant to August 4 policy. Conditions.

W49PH—Penna. Broadcasting Co., Philadelphia, Pa.—Granted modification (B2-MPH-103) of construction permit (B2-LH-69) to extend completion date to July 22, 1943. Also granted license (B2-LH-26) to cover construction permit in part, subject to condition that the licensee will take steps to comply fully with the Rules, Regulations and Standards of the Commission when materials and personnel become available or when required by the Commission to do so. **44900 kc.**, 9,300 square miles.

WEMP—Milwaukee Broadcasting Co. (a Corp.), (Assignor), and Glenn D. Roberts, et al., d/b as the Milwaukee Broadcasting Co. (Assignee), Milwaukee, Wis.—Granted voluntary assignment of license from Milwaukee Broadcasting Co. (a corporation), to Glenn D. Roberts, Melva F. Roberts, Wellwood Nesbit, Robert M. LaFollette, Jr., Evalyn H. Dolph, Hope D. Pettey, Leo T. Crowley and James T. Markham, co-partners, d/b as Milwaukee Broadcasting Co. (B4-AL-363).

KFQD—Anchorage Radio Club, Inc. (Assignor), and William J. Wagner, d/b as Alaska Broadcasting Co. (Assignee), Anchorage, Alaska.—Granted voluntary assignment of license station KFQD, from Anchorage Radio Club, Inc., to William J. Wagner, d/b as Alaska Broadcasting Co. (B-AL-347).

WKEU—Radio Station WKEU, Griffin, Ga.—Granted modification of license to use 100 watts, unlimited time on **1450 kc.**, subject to installation of a radiating system which complies with the Commission's Standards of Good Engineering Practice, and power determined by direct method in accordance with Rule 3.51. Action on application to increase power to 250 watts night, 100 watts day, and increase in hours to unlimited, held in abeyance.

WCBI—Birney Imes, Columbus, Miss.—Granted modification of license to change frequency from **1400** to **1340 kc.** (B3-ML-1150).

W73PH—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted license (B2-LH-19) to cover construction permit in part, on condition that licensee will take steps to comply fully with the Rules, Regulations, and Standards of the Commission when materials and personnel become available or when required by the Commission to do so. **47300 kc.**, 9,300 square miles.

W57PH—Westinghouse Radio Stations, Inc., Philadelphia, Pa.—Granted license (B2-LH-36) to cover construction permit in part. Conditions.

W75P—Westinghouse Radio Stations, Inc., Pittsburgh, Pa.—Granted license (B2-LH-33) to cover construction permit in part. Conditions.

MISCELLANEOUS

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Granted modification of construction permit as modified, which authorized installation of new equipment and directional antenna for day and night use, change frequency, increase in power, and move of transmitter, for extension of completion date from March 22 to June 22, 1943 (B3-MP-1696).

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted modification of construction permit, as modified, which authorized increase in power, installation of new transmitter and directional antenna for night use, and change hours of operation, for extension of completion date from March 1 to April 1, 1943 (B2-MP-1694).

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Granted license to cover construction permit as modified, for new broadcast station (B5-L-1752); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1497).

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Granted license to cover construction permit as modified, which authorized change in frequency, increase power, change hours of operation and install directional antenna for night use (B3-L-1753); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1498).

KAOY—Don Lee Broadcasting System, Portable-Mobile, area of Los Angeles, Calif.—Granted license to cover construction permit as modified, for new relay broadcast station (B5-LRE-426).

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Granted modification of construction permit as modified, which authorized change in frequency, increase in power, install new transmitter and directional antenna for night use, and move transmitter, for extension of completion date from March 5 to May 5, 1943 (B3-MP-1695).

WALB—Herald Publishing Co., Albany, Ga. (Docket Nos. 6398 and 6399); and Albany Herald Broadcasting Co., Albany, Ga. (Docket 6400).—Granted request for a continuance of the further hearing now set for February 25, 1943, on applications of WALB for renewal of license and for construction permit, and for voluntary assignment of license of Station WALB; hearing continued until March 16, 1943.

W6XDU—Don Lee Broadcasting System, Portable-Mobile, area of Los Angeles, Calif.—Granted license to cover construction permit as modified, which authorized addition of aural equipment using special emission; granted on an experimental basis only, conditionally (B5-LVB-39).

WBEZ—Board of Education, City of Chicago, Ill.—Granted modification of construction permit as modified, which authorized new non-commercial educational broadcast station, for extension of completion date from March 7 to April 7, 1943 (B4-MPED-17).

KEGW—Salt River Valley Broadcasting Co., area of Phoenix, Ariz.—Cancelled relay broadcast station license in accordance with written request of licensee (B5-RRE-76).

KGBK—Helen Townsley, area of Great Bend, Kans.—Granted further extension upon a temporary basis, of relay broadcast station license, pending determination upon application for renewal of license, not later than April 1, 1943 (B4-SRY-240).

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Granted further extension upon a temporary basis, of relay broadcast station license, pending determination upon application for renewal of license, not later than April 1, 1943 (B3-SRY-132).

WLAN—Thomas J. Watson, Endicott, N. Y.—Adopted order granting the motion of Thomas J. Watson for a continuance of the hearing set for March 2, 1943, on application for modification of construction permit; hearing continued until April 1, 1943 (Docket No. 6453).

National Broadcasting Co., Inc.—Granted in part petition for indefinite continuance of hearing on petition for rehearing filed by National Broadcasting Co., Inc. (KOA), re application of WJW, Inc. (WJW), Akron, Ohio, for modification of construction permit (Docket 6485); hearing continued until a date subsequent to Supreme Court decision in KOA case; balance of petition dismissed without prejudice.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted petition for postponement of hearing scheduled for March 9 re application for modification of license to operate on **700 kc.**, 50 KW night, 500 watts day, unlimited time, using W8XO transmitter; continued to April 9, 1943 (Docket 6341).

Chattahoochee Broadcasting Co., Columbus, Ga.—Granted withdrawal of motion for continuance of hearing set for March 4 re application for construction permit for new station; granted substitute motion to dismiss application without prejudice; hearing set for March 4, 1943 cancelled (Docket 6456).

South Florida Broadcasting, Inc., Miami, Fla.—Granted petition to dismiss without prejudice application for construction permit for new station (Docket 6153).

APPLICATIONS FILED AT FCC

790 Kilocycles

KVOS—KVOS, Inc., Bellingham, Wash.—Modification of construction permit (B5-P-3237 as modified, which authorized new transmitter, installation of directional antenna for day and night use, change in frequency, increase in power and move) for extension of completion date from 4-30-43 to 7-30-43.

990 Kilocycles

WIBG—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Modification of construction permit (B2-P-3207 as modified, which authorized new transmitter and directional antenna for day and night use, change hours, increase power and move transmitter and studio) for extension of completion date from 3-8-43 to 6-9-43.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199 as modified, which authorized change in frequency, hours, increase power, directional antenna for night use, new transmitter) for extension of completion date from 3-20-43 to 5-20-43.

1230 Kilocycles

KVOS—KVOS, Inc., Bellingham, Wash.—Special Service Authorization to operate on **790 kc.** with 250 watts power, for period ending 2-1-45.

1250 Kilocycles

KWSC—State College of Washington, Pullman, Wash.—Construction permit to change frequency from **1250 kc.** to **1030 kc.**, change power from 5 KW to 1 KW night, 5 KW day, hours of operation from share with KTW to unlimited time and make changes in antenna and ground systems. Request facilities of KOB. Amended: to request modification of license and omit request for changes in antenna and ground systems.

1380 Kilocycles

KPQ—Thomas Patrick, Inc., St. Louis, Mo.—Authority to determine operating power by direct measurement of antenna power.

1410 Kilocycles

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Extension of Special Service Authorization to operate on **560 kc.**, 500 watts night, 1 KW day, unlimited time, using transmitter authorized by B5-P-3150 as modified, for period ending 8-25-43.

TELEVISION APPLICATIONS

W3XPA—Philco Radio & Television Corp., Portable-Mobile, area of Philadelphia, Pa.—License to cover construction permit (B2-PVB-89) for new television relay broadcast station to be used with WPTZ.

W3XPC—Philco Radio & Television Corp., Philadelphia, Pa.—License to cover construction permit (B2-PVB-90) for new television relay broadcast station to be used with WPTZ.

MISCELLANEOUS APPLICATION

WPTZ—Philco Radio & Television Corp., Philadelphia, Pa.—License to cover construction permit (B2-PCT-4 as modified, which authorized new commercial television broadcast station) *in part*.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Hawkeye Sales, Inc., and Tim Lake, 615 Tenth St., Des Moines, Iowa, manufacturing and distributing a preparation for spraying poultry, designated "Blu-V-Spray", and a medicinal feed supplement for poultry, designated "Jermite," are charged in a complaint with misrepresentation. (4919)

P. Lorillard Company, Inc.—A complaint has been issued alleging misrepresentation in the advertising claims made for Old Gold cigarettes and certain other tobacco products manufactured by P. Lorillard Co., Inc., which has its principal office in Jersey City and operates plants in that city and in Louisville, Ky., Richmond and Danville, Va., Middletown, Ohio, and Lancaster, Pa. (4922)

Minneapolis-Honeywell Regulator Company—A complaint has been issued charging Minneapolis Honeywell Regulator Co., Minneapolis, with engaging in unlawful practices which tend to create a monopoly and restrain trade in the sale of automatic temperature controls used in the operation of domestic heating plants. The respondent has manufacturing plants in Minnesota, Indiana and Pennsylvania and distributing points in other States. (4920)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

American Industrial Rubber Co., 4405 South LaSalle St., Chicago, and its officers and agents have been ordered to cease and desist from falsely representing low-grade recapped automobile tires as being of superior quality and guaranteed as to durability and service. (4819)

Harlem Co., 30 Church St., New York, has been ordered to cease and desist from certain misrepresentations concerning the jewelry he sells. (4843)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Dr. V. P. English, R.R. 3, San Diego, Calif., has stipulated that she will discontinue certain misrepresentations in connection with the advertising and sale of medicinal preparations designated "Cerate," "Tissue Food Tablets A" and "Tissue Food Tablets B," a device called "Head-Hold Spine-Stretch Harness" and a booklet that purportedly contains information for use in the relief of spinal ailments. (03091)

Min-O-Ral Products Co., 1535 West Willis St., Detroit, entered into a stipulation to discontinue representing that the mineralized water they sell under the name "Min-O-Ral," when taken internally as directed, is of any therapeutic value other than in the treatment of iron deficiency or, when administered externally, has any value other than that of an inhibitory antiseptic or an astringent or styptic. (3616)

Thaxly Co., 450 Randolph St., N. W., Washington, has entered into a stipulation to cease and desist from certain misrepresentations concerning a wide variety of preparations compounded from formulas he sells. (03090)

FTC CASE CLOSED

The Federal Trade Commission has closed without prejudice the case growing out of the complaint it issued against D. K. Tuey, Los Angeles, dealer in Chinese herbs.

The complaint had charged the respondent with misrepresenting the therapeutic value of his products.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 11, March 12, 1943

NAB RADIO WAR CONFERENCE

To Be Held in Chicago April 26 - 29

As previously reported in the REPORTS (Page 97), the Board of Directors voted unanimously to abandon the 1943 convention. Instead a Radio War Conference under NAB auspices will be held April 26-29, inclusive. The Board expressed the view that both from geographic and strategic considerations, Chicago was the most logical site.

Negotiations with Chicago hotels and the Chicago Association of Commerce culminated with selection of Chicago's famed Palmer House as War Conference headquarters. A luncheon meeting of the NAB Chicago stations was had and the following were present: W. E. Hutchinson, WAAF; R. S. Peterson, WENR; Charles M. Freeman, WLS; Harry Templeton, WLS; J. L. Van Volkenburg, WBBM-CBS; Leslie C. Johnson, WHBF, Rock Island, 9th District Director-Elect; A. W. Kaney, WMAQ-NBC; Robert E. Bausman, WISH, Indianapolis, Indiana; Milton M. Blink, Standard Radio, Inc.; Howard Lane, CBS; William Knodle, Free & Peters; and Gale Blocki, John Blair & Co.

District Director Edgar Bill was unable, because of previous business engagements, to attend but will name the necessary local committees immediately. All of the stations in Chicago are enthusiastic about the forthcoming meeting.

Monday, April 26, is "Pre-Conference Day". Preliminary registration and some group meetings will be scheduled. The final meeting of the 1942-1943 Board of Directors will be held that evening at a dinner session. The Conference will officially open on Tuesday, April 27, at 10 a. m.

Next week a special War Conference bulletin will be issued in connection with the regular REPORTS. Pre-registration information, full details of hotel accommodations and prices, and other pertinent preliminary subjects will be fully covered.

Consistent with the national interest in these crowded war times, station managements are urged to consider the question of attendance at this 1943 NAB Radio War Conference. It will be strictly a working meeting—no frills, no adornments. Every meeting, whether general or special, will be dedicated to a consideration of the war and domestic radio broadcasting's relation to it. As an incident all business having to do with the internal affairs of the trade association will be transacted.

By-Law Amendments

The attention of members is called to the following provision of the By-Laws:

"Article XIII, Section 1—These By-Laws may be amended, repealed, or altered, in whole or in part, by a two-thirds vote at any annual meeting of the Association provided the proposed change is submitted by mail to the last recorded address of each member at least thirty days before the time of the meeting which is to consider the change."

The 1943 membership meeting will be held in conjunction with the Radio War Conference, April 26-29. Therefore, any proposals to change the By-Laws must be published in the NAB REPORTS

NAB RADIO WAR CONFERENCE

(Continued from page 115)

which go to press on March 25. Already three such proposals, all by the NAB Board of Directors, are on file. These, with any others submitted, will be published in the REPORTS two weeks hence.

Associate Members

The Radio War Conference will, of course, include those allied industries which are in NAB associate membership. Transcription companies, station representatives, market research organizations and manufacturers are a vital part of radio's war role.

While provision will be made for any who desire to exhibit, it is not expected from advance inquiry that many will do so. A sufficient number of rooms to care for all associate members has been reserved on the Palmer House seventh floor. A concentration of reception rooms and headquarters in one section of the hotel will contribute, it is felt, to the advantage of all. Rooms are adaptable to any use to which the individual associate member desires to put them.

STATIONS MUST STAY ON AIR TO RETAIN LICENSES

The FCC at its meeting Tuesday rejected a proposal that standard broadcast stations be permitted to cease operation for the duration of the war and retain their licenses. While making no change of its existing general policy permitting temporary suspensions to enable stations to meet and overcome current emergencies, the Commission expressed the belief that the door should not be opened for any general suspension of radio broadcast operations during the war period.

In announcing the decision, James Lawrence Fly, Chairman of the Commission, drew attention to the fact that the adoption of a policy permitting suspension generally would probably result in the elimination of radio broadcasting in many areas where the need for public service is the greatest. He pointed out that the indefinite suspension of broadcast operations might jeopardize this country's interest in the radio frequencies as provided in the North American Regional Broadcasting Agreement. Mr. Fly also said that various steps have already been taken to alleviate the difficulties of the smaller stations. For example, it is provided that stations may operate as little as six hours per day.

While the Commission declined to give the broadcasters who may be forced to suspend any preferred claims to use of the frequencies after the war, it was observed that broadcasters who have rendered an effective public service in the past and were forced to close down because of circumstances beyond their control would have certain natural advantages over other applicants at a later time when operations may become feasible. It was pointed out that presumably the business organizations and the broadcasting properties would remain intact even though actual operations are suspended. This would enable the owners of the stations to move promptly to ask for the assignment of frequencies and the resumption of operations at the end of the war.

It was also pointed out that the Commission will continue its policy of permitting temporary suspensions for short periods in order to alleviate emergency conditions. In other words, the operator may ask for a temporary suspension when he can show the necessity of closing down for a brief spell. He would be required to present a feasible plan for the alleviation of the difficulties and the return of the station to the air at an early date. The policy approved by the Commission follows:

> Insofar as relief may be needed by standard broadcast station licensees from difficulties of operation incident to the war, no general policy will be adopted, but the Commission will continue to consider on an individual basis requests for permission to temporarily suspend operations for short periods while efforts are being made to work out a means of resuming operations on a permanent basis.

Applications of the Astoria Broadcasting Company (KAST), Astoria, Oregon, and of The Petersburg Newspaper Corporation (WPID), Petersburg, Virginia, for authority to suspend operations for the duration of the war were denied.

"E" AWARD BROADCASTS

Misunderstanding of a recent letter of the Industrial Services Division, Bureau of Public Relations, War Department, relative to company expenses in connection with "E" awards was discussed and remedied at a meeting this week at which Col. A. Robert Ginsburgh, chief of the division, Neville Miller and Willard Egolf were present.

Some radio station operators had derived the impression that this division of the War Department had advised against the use of radio in connection with "E" award ceremonies. Actual text of the letter stated that "expenses related to advertising, broadcasting, etc." should be kept at a minimum. Obviously the letter was misinterpreted to mean "expenses *of* advertising, broadcasting, etc." because the intent of Colonel Ginsburgh was to advise against excessive talent costs, entertainment, etc.

In the printed release now under preparation, Colonel Ginsburgh has even gone so far as to eliminate entirely any reference to "advertising, broadcasting, etc." and uses only the word "expenses." He expressed a desire to cooperate at all times with the radio industry and advertising in general.

NAB REPORTS TEN YEARS OLD

The NAB REPORTS is ten years old this week.

President Roosevelt had been in office just one week, and Alfred J. McCosker, NAB president, had sent him a wire assuring him of the "hearty and continued cooperation of the broadcasters" throughout his administration.

That promise has been kept.

The banks were closed but the New Deal's alphabetical array of administrative agencies—including the FCC—had yet to be born. Congress, the courts and the Radio Commission were the only things in Washington the industry had to worry much about.

Phil Loucks, managing director of the NAB, in the first issue described the policy of the NAB REPORTS as follows:

"NAB REPORTS will give to members the official news of the Association, texts of important court decisions, digests of bills which would affect radio, decisions of the

Federal Radio Commission, rulings of state and federal government departments relating to radio, and other similar material. In other words, NAB REPORTS will constitute a service rather than a news bulletin."

Although Phil probably didn't dream at the time of how much the NAB REPORTS would have to cover to fullfil that policy, it was a *good* policy then, and now.

We see no need for changing it.

"C" BOOKS FOR TEMPORARY REMOTES

Radio broadcasting engineers and technicians were made eligible for C gasoline rations necessary for transporting heavy equipment to and from temporary broadcasting facilities by an order issued yesterday by the OPA.

This amendment is the result of the pleas for relief made by NAB, followed up by a hearing on January 29 before Richard C. Harrison, OPA Chief of Eligibility, Gasoline Rationing. At the hearing, network engineers and Washington, D. C. station men testified and filed supporting data and the actual equipment used on temporary remotes was exhibited. Present were: Ken Berkeley, WMAL; Burton Harkins, WOR; Clyde Hunt, WJSV; George McElrath, NBC; George Milne, Blue; and Russell P. Place, NAB Counsel.

Temporary facilities, OPA pointed out, often are set up for special broadcasts away from the radio station; for example, for special broadcasts from Army camps. The equipment must be regarded as non-portable to qualify engineers and technicians for C ration books. Applicants also must show that alternative means of transportation are inadequate.

Previous regulations made radio broadcasting engineers and technicians eligible for preferred mileage (C ration books) for travel to and from permanent broadcasting facilities, located in suburban or rural areas. The new action was taken in Amendment No. 29 to Ration Order No. 5C, effective March 17.

The amendment reads as follows:

Ration Order 5C is amended in the following respect:

§ 1394.7706 (n) is amended to read as follows:

(n) By the following persons for the following purposes:

(1) Any person, including an employer, employer's organization, or labor organization, for the transportation of farm workers, commercial fishermen, seamen, or marine workers to, from or between their places of employment; or

(2) An engineer or technician for transportation between home or lodgings and a radio broadcasting transmission station or between such station and other permanent facilities for radio broadcasting for purposes necessary to the operation of such station, but only if such station, because of its power, is located in a rural or suburban area; or

(3) An engineer or technician for the transportation or non-portable equipment to and from temporary installations for radio broadcasting, if no alternative means of transportation are adequate.

This amendment shall become effective March 17, 1943.

TIRES AND RECAPS

On the basis of information supplied by the OPA, the OWI last Tuesday released a recapitulation of eligibility rules governing the procurement of tires and recaps.

It was pointed out that the desire to have car owners recap their tires in time, so that a potentially recappable tire is not lost entirely, was the chief reason for freeing passenger car tire recapping from rationing restrictions. This step has been made possible by control of mileage of passenger cars through gasoline rationing.

NO MORE BATTERY INFO NEEDED

That a thoroughly adequate supply of dry cell batteries for farm radios will be made available continues to be NAB's firm conviction.

This belief is supported by what transpired at Wednesday's (March 10) farm battery conference in Washington.

Various government departments which have an interest in the several material stockpiles involved and in necessary production facilities came into general agreement with the thesis of maintaining rural radio with the same reliability as urban radio.

1. Passenger Cars.

There is no restriction on the recapping of passenger car tires with "passenger type camel-back." "Camel-back" is any rubber compound designed for application to a worn tire to make a new tread. "Passenger type" camel-back is made of reclaimed rubber only, using no crude.

All passenger cars are also eligible for some type of replacement tire, if their present tires aren't recappable. The grade of tire for which a car is eligible depends upon the gas mileage allowed the particular vehicle.

Thus, cars with mileage allowances up to 560 miles a month (A and B cards) are entitled to Grade III tires, which are used or recapped tires. (This is in addition to the permission to recap the car's own tires.)

Cars with mileage allowances of from 560 to 1000 miles a month (C card) are entitled to Grade II tires such as a new reclaimed-rubber tire or a prewar tire priced at 85 per cent or less of the price of new-car equipment grade.

Cars with mileage allowances of more than 1000 miles a month (C card with longer mileage) can have choice of any kind of passenger tire.

2. Trucks and Trailers.

Trucks and trailers included in the List A eligibility classification in OPA's regulations (those vehicles providing services deemed most essential by OPA) are eligible for new crude rubber tires if their present casings can't be recapped.

Trucks and trailers performing important services not on List A may apply for certificate entitling them to recapping with "truck type camel-back," which includes a certain amount of crude rubber. Truck tires cannot be made or recapped with reclaimed rubber only.

3. Taxis operating under ODT rules are eligible for truck-type recapping or for new tires if their casings are not recappable.

4. Busses.

Public busses operating regular routes and services are eligible for recapped or new tires.

Private busses performing certain necessary transportation services, including carrying persons to certain essential establishments or schools, also are eligible for recapping or for new tires.

Tire inspections are required for virtually all commercial and private vehicles, but frequency depends on type of vehicle and mileage ration.

Facilities for recapping are good throughout the country. Moulds and rubber are available.

PRIORITY FOR SUPPLIES

Under the terms of Priorities Regulation 3, as amended March 9, 1943, the P-133 preference rating cannot be applied to the following supplies: materials for maintenance or repair of buildings; printed matter, stationery and office supplies; fuel or electric power; and office machinery or office equipment. Stations unable to procure such supplies at retail or from jobbers should use WPB Form PD-1A if ordered for March 31 or prior delivery.

For delivery after March 31, priorities should be applied as specified in Controlled Material Plan Regulation No. 5, which is now being revised for early release, and will be covered in an early issue of NAB REPORTS. Under CMP Reg. No. 5 as presently worded, the following items are excluded from "operating supplies": printed matter and stationery; fuel or electric power; and office machinery or equipment. Stations unable to get these supplies at retail should now use Form PD-1A for delivery after March 31.

DISTRICT 5 MEETING

Frank King, WMBR, NAB District 5 Director, has called a meeting of the NAB member stations in that District, which embraces Florida, Georgia, Alabama and Puerto Rico. The meeting will be held on Saturday, March 20, at the George Washington Hotel in Jacksonville. The main purpose of the meeting is to elect a District Director for the 1943-45 term. Other industry matters will be discussed. All District 5 NAB members are urged to attend.

RECENT ENGINEERING ARTICLES

Many engineers will be interested in reading the following articles appearing in recent technical publications:

1. Proceedings of the IRE, January, 1943: *Contemporary Problems in Television Sound*, C. L. Townsend; *Engine Driven Emergency Power Plants*, Karl Troeglen, Station WIBW; *Selected Problems in Architectural Acoustics*, M. Rettinger; *Postwar Radio Planning*, James Lawrence Fly, Chairman FCC.
2. Electrical Communications, Volume 21, No. 1 (Technical Journal of the International Telephone and Telegraph Corporation): *WABC, Key Station of the Columbia Broadcasting System*, E. M. Ostlund.
3. QST, February, 1943: *Rejuvenating Old Meters*, W. R. Triplett.
4. Communications, February, 1943: *Report on IRE Winter Conference*, Lewis Winner; *Emergency Circuits for Level Equalization*, Donald Phillips.
5. Proceedings of the IRE, March, 1943: *Maintenance of Broadcast Operations in Wartime*, J. A. Ouimet, assistant chief engineer, CBC.

"The Future of Televsion," a recent book by Orrin Dunlap, Jr., published by Harper & Brothers, New York, is excellent non-technical reading for those interested in the past, present and future possibilities of television.

DO YOU HAVE ANY EXTRA COPIES OF "RADIO IN THE CLASSROOM"?

A number of important requests for the NAB published booklet, "How to Use Radio in the Classroom," issue of 1941, have been made to NAB headquarters and we are out of stock. Thus we request that any stations having some extra copies on hand mail them to us as soon as possible, billing us for postage and at the rate of 5¢ for each copy returned. Send to Walt Dennis, Chief, NAB News Bureau, Washington office.

48 - Hour Week

ENFORCEMENT LOCAL

The establishment of a general 48-hour week in critical labor shortage areas will be carried out by the area and regional directors of the War Manpower Commission, Executive Director Lawrence A. Appley and Deputy Chairman Fowler Harper announced at a press conference.

"It is anticipated and expected," Appley said, "that these directors will use their horse sense in dealing with questions that arise."

The directors will have the authority, subject to appeal, to decide disputes over extension of the 48-hour work week in their territories, Appley said.

"If a dispute over policy arises that involves two or three geographical areas the matter will be settled by negotiation between the directors of those areas," Appley explained. "If the dispute expands into a national matter, then it will be discussed in Washington."

Both Appley and Harper made it clear that because of the diversity of circumstances, the War Manpower Commission felt it could not give specific answers to general questions involving the 48-hour week.

"The significant feature of this regulation," Appley said, "is the manner in which it will be administered. It leaves to the local and regional people the responsibility for deciding what must be done."

The 48-hour week, Harper said, is a tool to pry needed workers from the labor market.

If the workers who would be released by the company going on a 48-hour week are not needed elsewhere, the War Manpower Commission will say: Don't go on the 48-hour week until the workers are needed, he said.

The inability of the WMC to obtain needed funds for the operation of the United States Employment Service, Government employment agency, will obviously slow the establishment of the increased work week, the WMC officials said, inasmuch as action would take place only as rapidly as the offices could handle the load.

It may be several months after the April 1 deadline, Harper said, before the commission is able to arrange employe release schedules for many employers.

"The added load will not mean a breakdown of USES," Harper said. "Merely delay."

Appley interposed that the morale of the USES Officials was "splendid" and that they were "determined to do the job."

"Accomplishment of the aims of the President's executive order will be fulfilled," Harper said. "How long it will take we do not know, but it will be fulfilled."

"We will do the job as fast as we can. But Mr. Appley is determined that we shall not crowd the USES to the point where it breaks the service's back."

In answer to a question, Harper said the lack of funds for the USES would also hinder the area management-labor committees in labor shortage areas where employment stabilization plans are in operation or in preparation.

"The USES, as you know, is the chief operating agency of the War Manpower Commission," Harper told the reporters.

The WMC's legal staff said the 48-hour directive would supersede any employer-labor agreement limiting working time but would not affect wage agreements. Nor is the War Manpower Commission to consider the effect upon costs of their actions. That, they said, is a problem for other Government agencies.

In other words, they pointed out, if the adoption by a company of a 48-hour week involved increased labor costs, that factor will not be taken into consideration by WMC officials.

Other details brought out by the press conference were:

(1) In the case of a business that operates both inside and outside of a critical labor shortage area, those employees within the area will go on a 48-hour week if by so doing production can be increased or additional labor

made available. Those outside the area will not be affected at this time.

(2) A business like a railroad or cross-country trucking company, that operates partly inside but mostly outside an area, will not immediately be affected.

(3) The 48-hour week in lumber and the non-ferrous metals industries will exist throughout the nation, as "a logical follow up of previous actions." Other special industry arrangements will be made if and when the facts justify such action.

(4) All industries will be studied, however, and the present list may be extended or revised at any time.

Some queries the officials would not answer in detail. They pointed out that full authority had been delegated to regional and area officials who had ample jurisdiction to make their rulings fit the facts.

"We are trying to make manpower a tailor-made job, custom made to fit the needs of areas and industries—not a rigid plan handed down from Washington," Appley said. "All requests by employers for details and interpretations should be directed to the regional and area offices—not to Washington."

A list of the regional offices of the War Manpower Commission follows:

War Manpower Commission Regional Offices

Region I: 10 Post Office Square, Boston, Massachusetts
Maine, New Hampshire, Vermont, Connecticut, Rhode Island, Massachusetts
Regional Director—Joseph A. Smith

Region II: 11 West 42nd Street, New York, New York
New York State
Regional Director—Mrs. Anna Rosenberg

Region III: 1634 Widener Building, Philadelphia, Pennsylvania
Pennsylvania, Delaware, New Jersey
Regional Director—L. B. F. Raycroft

Region IV: 1025 Vermont Avenue, N.W., Washington, D. C.
Maryland, Virginia, West Virginia, District of Columbia, North Carolina
Regional Director—Dillard Lasseter

Region V: 521 Union Commerce Building, Euclid Avenue & E. 9th Street, Cleveland, Ohio
Kentucky, Ohio, Michigan
Regional Director—Robert C. Goodwin

Region VI: 222 West Adams Street, Chicago, Illinois
Indiana, Illinois, Wisconsin
Regional Director—William H. Spencer

Region VII: 157 Peachtree Street, NW, Atlanta, Georgia
Alabama, Florida, Georgia, Mississippi, South Carolina, Tennessee
Regional Director—Bowman F. Ashe

Region VIII: 500 Midland Bank Building, Minneapolis, Minnesota
Minnesota, Iowa, North Dakota, South Dakota, Nebraska
Regional Director—Frank M. Rarig, Jr.

Region IX: 1600 Fidelity Building, 911 Walnut Street, Kansas City, Mo.
Missouri, Arkansas, Kansas, Oklahoma
Regional Director—Ed McDonald

Region X: New Mercantile National Bank Building, 6th Floor, Dallas, Texas
Texas, Louisiana, New Mexico
Regional Director—James H. Bond

Region XI: 221 Equitable Building, Denver, Colorado
Montana, Wyoming, Idaho, Utah, Colorado
Regional Director—John R. McCusker

Region XII: 245 Furniture Mart Building, San Francisco, California
California, Arizona, Oregon, Washington, Nevada
Regional Director—William K. Hopkins

MR. FLY DISCUSSES PROBLEM

No part of the radio industry has asked the FCC to do anything about the talent manpower problem, Chairman James Lawrence Fly said at a press conference this week. He stated that a limited number of requests have been brought to his personal attention "but I don't think there has been any general movement under way."

Mr. Fly said that the Commission has not adopted any policy or "line of action" in regard to this problem. He stated that the Commission has not considered the matter generally and "I hardly know what our policy might be if we were to look into it."

Discussing the manpower situation in the broadcast industry generally, the Chairman called attention to the fact that the Commission, even in the general manpower situation, has been merely seeking to get the classifications of jobs of each man performing essential service so that it would be identified and understood and would be recognized as essential. He called attention to the fact that that merely meant that those who were essential would be eligible for deferment.

The Chairman called the conference attention to the fact that the FCC has relaxed the rules on FM and television applications. He said that these new rules liberalized the situation regarding FM and television applications permitting them to stay on the books during the war and not be dismissed. Since the change in the rules Mr. Fly said that the Commission has had a number of requests for reinstatement of FM applications. He expressed the belief that four or five of them have already been filed.

NAB ACTIVITY

The NAB has tentatively scheduled a conference with WMC officials for next week to discuss the effect of a 48-hour week in the broadcasting industry.

This week has been spent in analyzing the returns to a questionnaire sent to stations in Washington, D. C., Springfield, Mass., and Baltimore, Md., and in preparing a memorandum to guide the WMC if that agency sees fit to send a directive order on radio to local enforcement officials.

STATE LEGISLATION

Illinois:

S. 148 (Barr & Marovitz) EMPLOYMENT AGENCIES—Relating to employment offices and agencies. Referred to Committee on Judiciary.

Indiana:

H. C. R. 18 RADIO—TELEPHONE BATTERIES—Memorializes Congress to lift priority restrictions on batteries for farm radios and telephones. Passed by House 3/6/43. Passed by Senate 3/6/43.

New York:

A. 1612 (Ehrlich) CHILDREN—EMPLOYMENT—Prohibits employment of children under 16 years in theatrical performances, circuses, motion pictures, radio broadcast performances, except church or school exhibitions or on amateur programs with written consent of education board or officials when in their opinion such performances are not harmful. Referred to Committee on Rules.

Texas:

H. 561 (Klingeman) POLITICAL RADIO ADVERTISING—Provides that no station shall broadcast matter which influences voting at any election without announcing that it is a paid political advertisement. Referred to Committee on Elections.

915 STATIONS

During the month of February 1943, the FCC issued an operating license to one station and deleted the call letters of another, which holds the count of operating stations to the same as at the close of January. The station call letter deleted does not constitute a discontinuance in operation. It is rather a consolidation of a station wherein two call letters were employed on one transmitter and the same set of studios. Commission action merely discontinued the use of one of the call letters.

A comparative table by months, follows:

	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, March 15th. They are subject to change.

Monday, March 15

WQBC—Delta Broadcasting Company, Inc., Vicksburg, Miss.—Modification of license, **1470 kc.,** 500 watts night, 1 KW day, unlimited.

Tuesday, March 16

Further Consolidated Hearing

WALB—Herald Publishing Company, Albany, Ga.—Renewal of license, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license, Station WALB, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.,** 1 KW, DA-night, unlimited.

Wednesday, March 17

WMAM—M and M Broadcasting Company, Inc., Marinette, Wis.—Modification of license, **570 kc.,** 100 watts night, 250 watts day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Granted Special Service authorization to use two F-124-A tubes, for the balance of the license period which expires April 1, 1944.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Adopted an order denying petition for a grant of application for construction permit insofar as it requests a change in frequency from **1450** to **630 kc.,** and set forth new issues upon which application will be heard. (Docket No. 6304)

W47A—Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Granted license to cover construction permit as modified, in part, for new station (B1-LH-3).

W2XEO—Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Granted construction permit for new ST station (to reinstate construction permit) (B1-PST-12), granted license to cover B1-PST-12 in part (B1-LST-4).

WMJT—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Retained in pending files pursuant to policy announced February 23, 1943, application for modification of construction permit for extension of completion date indefinitely (B4-MPCT-21).

The Commission has announced its Decision and Order (B-172) granting the application of Westchester Broadcasting Corp. (WFAS), White Plains, New York, for modification of license to change frequency from **1240** to **1230 kc.,** and increase operating time from part-time sharing with WGBB, Freeport, N. Y., to unlimited time. Commissioners Case and Craven voted "No".

MISCELLANEOUS

WAYS—Inter-City Advertising Co., Charlotte, N. C.—Granted license to cover construction permit as modified, for new broadcast station for approval of studio site (B3-L-1611); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1344).

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted license to use formerly licensed composite main transmitter of Station WAAB as an auxiliary transmitter, with power of 1 KW (B1-L-1750).

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted modification of construction permit as modified, which authorized move of transmitter, new transmitter, change in frequency, changes in directional antenna for night use. and increase in power for extension of completion date from March 13 to June 13, 1943 (B3-MP-1698).

KAST—Astoria Broadcasting Co., Astoria, Ore.—Denied request for authority to suspend operations for the duration of the war and a specified period beyond that with the provision that the license shall remain in the property of the Astoria Broadcasting Co. for the time the suspension remains in effect; deferred action on renewal of license in order that a statement may be obtained from applicant as to whether or not it will continue operation.

WPID—The Petersburg Newspaper Corp., Petersburg, Va.—Denied request for authority to suspend operations for the duration of the war.

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Modification of construction permit (B5-P-3150 as modified, which authorized new transmitter and directional antenna for night use, increase power and change frequency) for extension of completion date from 4-25-43 to 8-25-43.

590 Kilocycles

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Modification of license to change from directional antenna night use to directional antenna from 5 p. m. to 9 a. m., Central Standard Time.

1110 Kilocycles

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.—Authority to determine operating power by direct measurement of antenna power.

1130 Kilocycles

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Extension of special service authorization to operate from 7 a. m. to local sunrise during months when sunrise occurs later than 7 a. m., with power of 250 watts for the period ending 4-1-44.

1320 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Texas—Authority to determine operating power by direct measurement of antenna power for auxiliary transmitter.

1400 Kilocycles

WJHO—Yetta G. Samford, C. S. Shealy, Thomas D. Samford, Jr., J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala.—Voluntary assignment of license to Yetta G.

Samford, C. S. Shealy, Thomas D. Samford, Jr., d/b as Opelika-Auburn Broadcasting Company.

1410 Kilocycles

WEGO—Wayne M. Nelson, Concord, N. C.—License to cover construction permit (B3-P-3007) as modified, for a new broadcast station.

WEGO—Wayne M. Nelson, Concord, N. C.—Authority to determine operating power by direct measurement of antenna power.

TELEVISION APPLICATION

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Modification of construction permit (B1-PVB-40 as modified for new television station) for extension of completion date only from 3-31-43 to 5-31-43.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Auburn Die Company, Inc., et al.—Eleven New England manufacturers of steel dies, used for cutting leather in the production of shoes, are charged in a complaint with conspiring to fix uniform prices for their products.

The respondents, whose annual volume of business amounts to $750,000, which is 25 percent of the total volume of such business in the United States, are:

Auburn Die Co., Inc., and Androscoggin Die Co., Inc., both of Auburn, Maine; Joseph E. Knox & Co., Inc., John Hermanson, Stanley Leskiewicz and Joseph Toll, trading as North Shore Cutting Die Co.; Hyman Resnick, Henry April and Hyman Rosenblatt, trading as Bay State Cutting Die Co., and Vincent W. Burke, trading as Bee Machine Co., all of Lynn, Mass.; Boston Cutting Die Co., Inc., Boston; Faustyn K. Jakiel and Richard B. Friend, trading as State Die Co., and Axel Swanson and Raymond Duprey, trading as Manchester Die Co., both of Manchester, N. H.; Brockton Cutting Die & Machine Co., Inc., Avon, Mass.; and Granite Die Co., Inc., Haverhill, Mass. (4921)

Latta Cream, 505 Fifth Ave., New York, is named respondent in a complaint charging it with disseminating false advertisements concerning a cosmetic designated "Latta Cream." (4925)

McNeil Drug Company, Inc.—A complaint has been issued charging McNeil Drug Co., Inc., and Associated Advertising Agency, Inc., both of Jacksonville, Fla., with misrepresenting the therapeutic value of a medicinal preparation designated "McNeil's Magic Remedy" and with disseminating advertisements which fail to reveal the harmful potentialities that may result from use of the product under conditions prescribed in the advertisements or under such conditions as are customary or usual. The preparation also is sold under the names "Magic Remedy" and "McNeil's Magic Remedy Brand." (4923)

United Art Studios, 1615 G St., S. E., Washington, and Benjamin and Ada Kadet, trading as Kadet Art & Frame Co., 909 Fifth Ave., Pittsburgh, are charged in a complaint with entering into arrangements with each other for the use of false and deceptive practices to induce the purchase of photographic enlargements and frames sold by United Art Studios. (4924)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Albee Studio, 1426 G Street, N. W., Washington, D. C., selling and distributing photographs, enlargements and miniatures, has been ordered to cease and desist from certain deceptive acts and misrepresentations in connection with the sale of his products. (4871)

Johnson Smith & Co., 6615 East Jefferson Ave., Detroit, has been ordered to cease and desist from representing in any manner that the watches they sell are railroad watches when such is not a fact. (4778)

Kaiden-Kazanjian Studios, Inc.—A New York photographic service and its officers has been ordered to cease representing themselves and their employees as newspaper photographers or using the names of newspapers, magazines or periodicals without the consent of the publications. The Commission finds that the Kaiden-Kazanjian Studios, Inc., also trading as Keystone News & Photo Service, and Frances Kaiden and Aram Kazanjian, with offices at 21 West 46th St., New York, has induced numerous persons to pose for photographs under the representation by agents that the photographs were desired by them for immediate or future use in connection with newspaper or magazine articles. (4812)

Wisconsin DeLuxe Doll & Dress Co., trading as Wisconsin DeLuxe Corporation, 1902 North Third St., Milwaukee, has been ordered to cease and desist from the use of lottery methods in connection with the sale and distribution of its products. (4830)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Chartered University of America—A Huron, S. D., corporation and its board of directors have entered into a stipulation to cease and desist from false advertising and misrepresentation in connection with the sale to purchasers in India of so-called diplomas which purport to evidence the conferring of scholastic degrees.

The corporation is known as "Chartered University of America; Medical Council; and Board of Examinations and Management of Huron, South Dakota." The directors are W. A. Johns, Julia W. Johns and Isiah O. Hagen. (3619)

Harold Lifton Co., 100 Fifth Ave., New York, engaged in the sale of blankets, stipulated that he will discontinue using the word "satin" or any other word connoting silk as a designation for a product not composed of silk. (3620)

National Rat and Mouse Exterminator Co., 3721 West Villard Ave., Milwaukee, entered into a stipulation to cease and desist from representing that the product he sells under the name "Kil-Balm Rat and Mouse Exterminator" will "embalm" the bodies of rats and mice; that it can be depended upon to destroy all rats and mice in buildings or on premises in two or three days or any other period of time; and that the bodies of rodents killed by use of the preparation will not leave an odor. (3621)

Union Mill Ends, Monticello, N. Y., has stipulated that it will discontinue using the word "silk" to describe rayon fabric remnants it sells. The remnants are used in making dresses, window curtains, towels, quilts and like products. (3618)

HOME RADIO TUBES

The tube situation is about ready to "jell." While nothing is to be gained by the recitation of "shop talk," it may be appropriate to reiterate that Radio and Radar division of WPB is emphatic in its determination to provide required tubes for home radios. At this writing Radio and Radar awaits the concurrence of tube manufacturers on several points essential to the success of the program.

BATTERY PROBLEM SOLUTION NEARS

Actual increased production of farm radio batteries should quickly follow a meeting in Washington today, March 19. The Office of Civilian Supply has forwarded its recommendations to increase the manufacture of farm radio batteries to Consumer Durable Goods division. This division is to work out specific procedures to implement the findings of OCS.

Immediate production could begin through the release of zinc, now in stock at manufacturing establishments, but presently held for military uses. Facilities at plants to handle the production of farm radio batteries continue favorable.

Meantime, state legislatures continue an active interest in the farm battery situation. Two more state legislatures have passed resolutions memorializing Congress to make dry cell batteries available for farm use. Included with dry cell batteries for farm radios were batteries for farm telephones and fences. These last two uses, while important to many farmers, require only small amounts of material.

Iowa Resolution

A concurrent resolution memorializing the Congress of the United States to lift the priorities and restrictions on dry cell batteries for farm radio sets and telephones was passed unanimously by both the House and Senate of the Iowa State Legislature last Saturday. It was negotiated by J. O. Maland, vice president, WHO, Des Moines. The resolution follows:

House Concurrent Resolution 25

A concurrent resolution memorializing the Congress of the United States to lift the priorities and restrictions on dry cell batteries.

WHEREAS, Telephones and radios in rural and farm communities are of great convenience and of practical necessity in securing information relative to farm work, livestock marketing and community affairs necessary in the war effort and conserving rubber; and,

WHEREAS, The restrictions and priorities placed on these commodities by the federal government have resulted in great inconveniences to farms and residents of rural communities, thereby retarding the war effort; now, therefore,

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF IOWA, THE SENATE CONCURRING:

Section 1. That we respectfully urge and memorialize Congress to lift the priorities and restrictions on batteries used for rural telephones, radios and electric fences to the end that a sufficient supply of such commodities may be made available to rural communities.

Section 2. That copies of this resolution be transmitted to the President of the Senate and the Speaker of the House of Representatives, the War Production Board, and to the Iowa members of the Senate and House of Representatives in Congress.

Indiana

It was reported that the Indiana resolution passed both houses the same day. Eugene C. Pulliam, WIRE, Indianapolis, arranged for this legislation.

Mississippi

In Mississippi W. P. Harris, director WJDX, consulted with the Commissioner of Agriculture of the state on battery shortages since the State Legislature does not meet this year. The Commissioner prepared a statement which was broadcast over WJDX. This produced a number of letters which have been forwarded to interested individuals. The Commissioner said:

"A shortage that has not received the attention nor the publicity of the rubber and food shortages, but is important in its own field of service is the shortage of batteries for radio receiving sets.

"It was found, after a check of dealers and distributors, that when present batteries are exhausted, a very large percentage of the battery radios will be useless for the duration of the war or until provision is made for additional batteries.

"Families that were depending upon the change to electricity will be forced to wait until after the war as copper conductors are unavailable.

"There are many rural families that do not subscribe to a newspaper but depend solely upon the radio for news and information; they are faced with the possibility of having this service discontinued.

"The radio is a valuable and absolutely necessary part of the life of the people of the farm. Farm people are most patriotic. They have sent their sons to war. With less than the needed amount of farm help, they have produced a record-breaking amount of food. They are entering another crop year, hampered by scarcities, but ready to do everything possible to produce the tremendous amounts of food necessary. The work of the farms will be more important than ever before in the history of this nation during the coming planting season and until victory is won.

"The farm family will be the busiest people in the land. They will work from dawn until dusk.

"Now hundreds of farm families will be unable to get valuable reports which are necessary to keep the farm fully informed on conditions as they exist in our country and elsewhere, the progress of war, markets and weather conditions.

"Farmers listen carefully to the government-planned programs on drives for the sale of bonds and other matters so vital for the successful prosecution of the war. Should the radio stations lose hundreds of thousands of rural

(Continued from page 123)

listeners because they can no longer secure batteries for their radios, our government departments that depend upon radio stations to furnish that information to those listeners, will lose thousands of supporters of their programs, and in my opinion the war effort will be the loser.

"If you are a user of a battery receiving set, you cannot hope for much over six more months of life in those batteries. When they are gone, it will be virtually impossible to have them replaced.

"Do you have a neighbor whose radio cannot be used because the batteries are dead?

"Won't you write your Congressman and invite his attention to this serious matter—get your neighbor to write also. You can send your letter in care of WJDX here in Jackson and it will be forwarded to your Congressman.

"Do it today, for tomorrow your radio may be useless—"

Nebraska

John J. Gillin, Jr., president, WOW, Omaha, communicated with each member of the Nebraska Legislature and with Nebraska Congressmen in Washington.

PROGRAM DIRECTORS MEET

Initial meeting of the newly formed Program Directors' executive committee of NAB will be held at NAB Washington headquarters, March 24-25, to discuss plans for more definite participation of NAB in the radio program field.

The meeting will set up for program directors an activity paralleling the activity of the sales managers carried on by our department of broadcast advertising. This function would not supplant the work now processed by the code committee, but would be handled in close cooperation with the code and sales managers committees.

The tentative agenda, including the list of the program directors and the NAB members who will sit with them, is as follows:

William Adams, WCHS
J. Robt. DeHaven, WTCN
Harold Fair, WHO
Robert L. Kennett, WHAS
Robert Landry, CBS
Clarence Menser, NBC
Herbert C. Rice, WGR
Ray Shannon, KQV
Tod Williams, WSPD

Earl Glade, Code Committee
Roy Harlow, BMI
Neville Miller, NAB
Lewis Avery, NAB
Willard Egolf, NAB
Russell Place, NAB

WEDNESDAY

Morning Session—10:00 A. M.

1) Call to Order
2) Statement of Purpose of Meeting—Neville Miller, President, NAB
3) Work of Code Committee—Earl Glade, Chairman, NAB Code Committee
4) Work of Sales Managers Committee—Lewis H. Avery, Director, NAB Department of Broadcast Advertising
5) Report on BMI Program Directors Meeting—Roy Harlow, BMI
6) Programs and Public Relations—Willard Egolf, Assistant to the President NAB
7) General Discussion

Luncheon—1:00 P. M.—Mayflower Hotel

Afternoon Session—2:30 P. M.

1) Recent Program Trends—Willard Egolf
2) Nature of Recent Complaints—Plug Uglies, etc.
3) What can be done to help Program Directors:
    a) Commercial Programs;
    b) Sustaining Programs;
    c) War Programs.
4) Character of Information Needed
5) Value of Case Histories
6) Small Stations' Problems
7) Value of a Joint Meeting of Program Directors and Sales Managers Committee with Selected Group of Advertisers, Agencies and Station Representatives
8) Value of Column for Program Directors in NAB REPORTS
9) Value of Program Awards
10) General Discussion

THURSDAY

Morning Session—10:00 A. M.

1) Plans of Program Directors for NAB War Conference April 27-29
2) Plans of Program Directors for future NAB District Meetings
3) Plans and Scope of Permanent Program Activities of NAB
4) General Discussion

Luncheon—1:00 P. M.—Mayflower Hotel

Guests: Harold Ryan and Gene Carr, Office of Censorship
Lt. Col. Edward M. Kirby and Capt. Frank Pellegrin, Public Relations, War Department
Don Stauffer and Douglas Meservey, OWI
Earl Gammons, CBS
Frank Russell, NBC

Afternoon Session—2:30 P. M.

Unfinished Business

Adjournment

Broadcast Advertising

BARGAIN COUNTER FOR P-I OFFERS

"Step right up, ladies and gentlemen—you pays your money and you takes your choice." There is, indeed, something of the appeal of the old-fashioned medicine show in the description which the promoter of a per-inquiry deal gives to his wares. And probably just about as little value, too!

Here's an up-to-date list of current offers that deserve to be avoided as you would the plague:

Universal Audit and Account Service of Neligh, Neb., is offering the "Universal Farm Record—For Income Tax" on a highly profitable basis—to Universal Audit and Account Service. You won't have to worry about the effect on your income tax from any income that you *might* receive from the broadcast of this offer.

Huber Hoge and Sons, 699 Madison Avenue, New York, N. Y., is back in the lists with a comprehensive tabulation of publications your listeners just can't do without. This agency and the account involved do spend money at card rates over many stations. Tell the story of your station and its mail-producing power convincingly enough and you can obtain an order at card rates.

Herald Advertising Company, 610 N. Medina St., San Antonio, Texas, is now promoting Grandma's Tea to remedy the ills left untouched by its earlier magnanimous offer of Grandma's Cough Syrup. This is the "no-money-involved" deal that puts you in the laxative business in a big way. We have been tempted to buy a gross and send a package to every advertising agency and advertiser that offers a per-inquiry deal to broadcasting stations.

The Louis B. Yacht Syndicate, 220 West 42nd Street, New York, N. Y., has the solution to the gray-hair problem on a per-inquiry basis. We're willing to bet that any station manager who takes these P-I deals can grow gray hair faster than "Everglo" vitamin will restore the natural color.

Kermit-Raymond Corporation, 745 Fifth Avenue, New York, N. Y., is back again with the same mailing to which has been attached a "memo" wondering if you overlooked the earlier offer. We hope every station not only overlooked the earlier offer but will continue to overlook all offers of this type.

Progressive Circulation Company, P. O. Box 9385, Sta. S, Los Angeles, Cal., urges stations to broadcast solicitations for subscriptions to various magazines with the appeal: "Give our magazine offers a *chance*—and they will *pay!*" You bet they will! They will pay Progressive Circulation Company handsomely!

Frank R. Steel Associates, Inc., 360 N. Michigan Ave., Chicago, Ill., is offering a Princess Pat Beauty Kit on what amounts to a P-I basis. Here, too, orders can be obtained on a straight rate-card basis. It may take a little work to get it on that basis, but it can be done.

A pretty imposing list, isn't it? Do you really think every one of those offers is "the best of its kind"? It couldn't be, could it? Then let's keep plugging for business we can be proud to carry.

IOWA BROADCASTERS ELECT

Iowa broadcasters met at Des Moines March 13 to discuss problems and to reorganize the Iowa Association of Broadcasters which had not met since 1937.

J. O. Maland, WHO, Des Moines, was elected president and Earl Peak, KFJB, Marshalltown, secretary-treasurer. Most of the day was devoted to the manpower problem and Selective Service regulations resulting in the election of an Advisory Board to cooperate with Selective Service State Headquarters in determining "necessary men" required by each station to insure continued operation of all stations in the state.

Other committees selected were:

Retail Promotion Committe, Dietrich Dirks, KTRI, Sioux City, chairman
Legislative Committee, Edward Breen, KVFD, Fort Dodge, chairman
Sports Broadcasting Committee, Earl N. Peak, KFJB, Marshalltown, chairman

Resolutions urging immediate relaxation in restrictions on manufacture and distribution of dry batteries for farm radio sets were adopted and sent to Donald M. Nelson of the War Production Board, Claude Wickard, Secretary of the United States Department of Agriculture, and to Chairman Fly of the Federal Communications Commission.

In attendance were:

G. B. McDermott, KBUR, Burlington
W. B. Quarton, WMT, Cedar Rapids
Douglas B. Grant, WMT, Cedar Rapids
Buryl Lottridge, WOC, Davenport
Craig Lawrence, KSO-KRNT, Des Moines
J. O. Maland, WHO, Des Moines
Paul Loyet, WHO, Des Moines
Harold Fair, WHO, Des Moines
Ralph Evans, WHO, Des Moines
Woody Woods, WHO, Des Moines
Kirby Smith, KBUR, Burlington
K. S. Gordon, KDTH, Dubuque
Edward Breen, KVFD, Fort Dodge
E. N. Peak, KFJB, Marshalltown
J. C. Rapp, KMA, Shenandoah
E. T. Flaherty, KSCJ, Sioux City
Lt. Col. Frank B. Hallagan, Iowa Selective Service Hdqrs.
Phil Hoffman, WNAX, Yankton, S. D.

BIG RECRUITING JOB COMING UP

Somewhere down the line many broadcasters will have a special opportunity to serve the nation at war by helping in the farm-worker recruiting problem for 3,500,000 persons.

According to present plans at the Department of Agriculture the spark plug of this activity will be Wayne H. Darrow. He will work through County War Boards which are set up in most counties. Consequently the size of the job will vary from county to county depending on availability of workers and demand for them.

It is suggested that local stations, suitably situated, contact their County War Boards now, in advance of instructions from Washington to the Boards. The experience of stations will be invaluable to the Board members, who have never before faced a recruiting job of such magnitude.

NOTIFY SALVAGE COMMITTEE

An Ohio station engaged in collecting keys and old razor blades has inquired of NAB whether any franking provision is available for the delivery of such items to the proper authorities.

OWI advised on Thursday that no franking arrangements are available in this instance. On advice of the salvage people in Washington, the suggestion was made that the local salvage committee be notified of the collection of such material. This committee would handle even if the items had to be stored temporarily.

On specific question it was asserted that local salvage committees are functioning over a wide area and in probably all radio-station cities.

HIRES TO ARMY

Charles E. Hires, of WCAU's engineering staff, was inducted into the Army this week.

WAR BULLETIN MAILED TODAY

War bulletin No. 14 is being mailed all stations in the United States today.

It is concerned with the proposition of broadcast assistance for the U. S. Treasury in the forthcoming Victory bond campaign for thirteen billion dollars.

The Office of War Information and NAB are strongly in favor of station support.

NOTE TO PROFESSOR KRANZ

(Reproduction of our personal letter)

March 18, 1943.

Prof. Leon Kranz,
Physical Education Department,
Northwestern University,
Evanston, Illinois.

Dear Prof. Kranz:

On Monday of this week the Associated Press carried your statement that the rejection of more than 40 per cent of the draft registrants is a reflection of "coddling" of the nation's youth by automobiles, movies and radio.

We desire to speak generally on that subject, not especially on behalf of radio.

Selective Service headquarters in Washington state that rejections in World War I reached approximately 40 per cent also. At that time we had no radio and fewer automobiles and movies. In addition, the draft age was between 18 and 31 only.

Further Selective Service figures relative to the present war should encourage you: There have been only 33.2% rejections between 18 and 25. There have been only 34% rejections between 26 and 30. Remember also that modern methods of detecting physical and mental debilities are greatly advanced, which would influence more rejections in this war.

Most modern devices are designed for easier living. You would not advocate dispensing with them, I am sure.

If I interpret you correctly, you have no complaint against automobiles, movies and radio, as one might think after reading your statement. You simply believe that an enlightened people should recognize the need for a health-building program in everyone's life, to offset sedentary habits which tempt all of us. If that is true, radio has been a help in the past and might aid you materially in the future, with proper programming.

Cordially,

(Signed),
Willard D. Egolf,
Assistant to the President.

QUARTZ CRYSTALS

WPB Conservation Order M-146, issued March 8, 1943, restricts the production of quartz crystals used as radio oscillators. Paragraph (b) section 5 of the order reads in part as follows:

"On and after March 8, 1943, no person shall fabricate quartz crystals or blanks except in the manufacture of:

"Radio oscillators and filters and optical parts to be used in the replacement of parts which are defective, cracked, or broken, provided the equipment or instruments requiring such parts are implements of war or are needed solely in activities directly connected with defense, public health, welfare, or security."

NAB has been advised that the order is interpreted as including broadcast stations under the section quoted above. If difficulties are encountered in securing replacement crystals, the NAB Engineering Department will be glad to assist broadcast stations.

PAN-AMERICAN DAY

Originally proclaimed March 4, 1933, by President Roosevelt, the Good Neighbor policy will be formally recognized again this year on Pan-American Day, April 14th, and mayors of all cities of 10,000 population or more have been circularized by the American Municipal Association with requests to initiate Pan-American projects on that day. The radio section is quoted verbatim from a release issued by the Coordinator of Inter-American Affairs in Washington as follows for station operators' information:

> (17) *Radio* Like the newspapers, the radio stations will receive from the Radio Division of the Office of the Coordinator of Inter-American Affairs a great deal of help. There will be special programs on the networks. There will be transcribed programs for the individual stations. In addition to the above, which will require no local effort, there should be special coverage by radio stations of the various local events. By special arrangement, you can undoubtedly have the radio stations stagger their programs based on the holiday so that there will be no duplication at any particular period. The stations should also be requested to see that musical programs go on at the luncheon and dinner hours, to capitalize the many small restaurants which depend on the radio for their musical entertainment.

"RADIO MANNERS"

Angelo Patri, noted child guidance authority, wrote the following suggestions concerning "Radio Manners" in a recent column which may interest station managers and women's directors:

> 1. Let the radio rest whenever it is not actually wanted . . . a radio that goes on all day deafens the mind and in time wearies the nerves of listeners . . .
>
> 2. Don't twiddle. Once you set the dial . . . let it alone and don't go wandering all over the air calling out all the fiendish noises imaginable. Stick by the program and give it a chance to catch your interest—you have no excuse for listening otherwise.
>
> 3. Don't walk into a quiet room and reach for the button without first inquiring if it is agreeable to others in the room. This is important in dentists' and physicians' offices where there may be people suffering tortures. In private homes, ask permission and inquire about program like and dislikes.

SET PRICES

To provide a precise method of determining maximum prices on radios and phonographs assembled by retailers and distributors, the OPA will issue shortly a new regulation controlling the price ceilings for such sets.

Coming under the new regulation will be a scattered number of radio distributors, retailers and brokers who, since the summer of 1942, have become assemblers of household phonograph and radio receiving sets. By comparison with full fledged manufacturing procedures their operations are relatively simple, consisting of the mounting of the fully assembled chassis with the speaker and frequently with a phonograph pick-up mechanism into a finished cabinet.

Specifically excluded from the new regulation will be regular manufacturers of radios. They will continue under Revised Price Schedule No. 83 (radio receivers and phonographs). Manufacturers are practically removed from production of such sets, by limitation Orders L-44A and L-183 issued by the WPB. However, these WPB Orders do not prevent placing a chasis manufactured in accordance with the terms of the Orders into a cabinet.

Meetings were held by OPA with representative distributors, retailers and assemblers of radios and phonographs in New York on Thursday, March 18, and in Chicago on Friday, March 19, for the purpose of outlining the provisions of the proposed regulation and inviting discussion of them.

At the present time wholesale and retail prices of radios and phonographs are controlled by The General Maximum Price Regulation. OPA points out that it is a violation of this price regulation for assemblers of radios to make sales unless a maximum price has been specifically authorized by the OPA of Section 3(b) of the General Maximum Price Regulation in all cases except where the assembled radio is actually similar to a model sold during March 1942.

POST WAR LABOR OUTLOOK

With this copy of the NAB Reports, we are sending through the courtesy of Prentice-Hall, Inc., a copy of Section 2—"What's Happening in Washington—Post War Labor Outlook." We are sure you will find the contents of this bulletin interesting.

FLY DISCUSSES LEGISLATION

Chairman James Lawrence Fly of the FCC said at his press conference this week that the Commission has not made a study of the question of equal time for speakers on the issues of the day. In this connection he called attention to the fact that the Commission in its public statements has "tried to go along with I think pretty much the same policies that are announced in the broadcasters' code."

Mr. Fly said that the Commission has encouraged the idea of giving both sides of controversial issues. The Chairman still discussing this question said further "As you know, in one or two decisions we criticized the editorial policy or advocacy on the part of the station itself, feeling that the station ought to be there as a mechanism for the purpose of giving a complete and balanced reporting and then when giving the outstanding debatable issues to be sure, of course, that both sides were presented. The Commisison has not given consideration to the particular provisions so I don't know what it would want to say about that."

STATE LEGISLATION

Georgia:

S. R. 68 (Foster-Pittman) STORAGE BATTERIES—Memorializing Congress to release storage batteries for use in radios. Referred to Committee on General Judiciary No. 1.

New York:

A. 1635 (Crews) GROUP LIBEL—Defines group libel as malicious publication by writing, printing or other representation or by radio broadcasting, which exposes persons because of race or religion to hatred, contempt or ridicule or causes persons to be shunned or injures them in business. Referred to Committee on Rules.

A. 1891 (Hults) LIBEL—RADIO BROADCAST—Provides person who, himself or through agent, makes orally by radio broadcast a statement about another person which if published in writing would be a libel, shall be deemed to have made and published a libel and shall be punished accordingly. Referred to Committee on Rules.

S. 1600 (Duryea) (Same as A. 1891) LIBEL—RADIO BROADCAST—Provides person who, himself or through agent, makes orally by radio broadcast a statement about another person which if published in writing would be a libel shall be deemed to have made and published a libel and shall be punished accordingly. Referred to Committee on Codes.

Oklahoma:

H. 385 (Edwards) ADVERTISING—Levying a tax upon gross proceeds of political and commercial advertising carried in certain newspapers and by radio stations owned and controlled by newspapers. Referred to Committee on Revenue and Taxation.

Wisconsin:

S. 246 (Murray) MUSICAL COMPOSITIONS—COPYRIGHTS—To repeal and recreate 177.01 of the statutes, relating to copyrights and public performing rights in musical compositions; to regulate the issue of licenses with respect thereto; to prohibit discrimination; to levy a privilege tax. Referred to Committee on Judiciary.

FTC SURVEY

The Federal Trade Commission in connection with its regular continuing survey of radio and periodical advertising has made special analyses of advertisements dealing with war related subjects. The Reports which are not available for publication were made for the Office of Censorship, the WPB and the OPA.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, March 22nd. They are subject to change.

Monday, March 22

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—C. P., **1330 kc.**, 5 KW, unlimited. DA-night.

Tuesday, March 23

Further Consolidated Hearing

WALB—Herald Publishing Company, Albany, Ga.—Renewal of license, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license, Station WALB, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.**, 1 KW, DA-night, unlimited.

Wednesday, March 24

KDNT—Harwell V. Shepard, Denton, Texas.—Modification of license, **1400 kc.**, 100 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KVRS—Wyoming Broadcasting Co., Rock Springs, Wyo.—Granted consent to transfer of control of Wyoming Broadcasting Co., licensee of Station KVRS, from R. R. West (transferor) to Mrs. Marjorie Lannen McCracken (transferee) for a consideration of $18,500 for 9,996/10,000 shares of issued and outstanding capital stock (B5-TC-313).

KMAC—W. W. McAllister and Howard W. Davis, d/b as The Walmac Co. (assignors), Howard W. Davis, tr/as The Walmac Co. (assignee), San Antonio, Texas.—Granted consent to voluntary assignment of license of Station KMAC from W. W. McAllister and Howard W. Davis, d/b as The Walmac Company to Howard W. Davis, tr/as The Walmac Company, for a total consideration of $35,000 (B3-AL-362).

WASH—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted request to cancel the outstanding license issued to Station WASH and to delete the call signal.

LICENSES GRANTED

W39B—Yankee Network, Inc., Boston, Mass.—Granted license to cover construction permit, in part, for FM station, upon condition that licensee shall, when required materials are available, take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission (B1-LH-12).

W65H—WDRC, Inc., Hartford, Conn.—Granted license to cover construction permit, in part, for FM station, upon condition that licensee shall, when required materials are available, take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission (B1-LH-20).

K45LA—Don Lee Broadcasting System, Los Angeles, Calif.—Granted license to cover construction permit, in part, and change in studio location upon condition that licensee shall, when materials are available, take immediate step to comply fully with the Rules, Regulations and Standards of the Commission (B5-LH-30); dismissed and retired to closed files application for extension of completion date (B5-MPH-98).

W45CM—WBNS, Inc., Columbus, Ohio.—Granted license to cover construction permit, in part, upon condition that the licensee shall, when required materials are available, take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission (B2-LH-21); dismissed and retired to closed files application for extension of construction period (B2-MPH-94).

K49KC—Everett L. Dillard, tr/as Commercial Radio Equipment Co., Kansas City, Mo.—Granted license to cover construction permit, in part, upon condition that licensee shall, when required materials are available, take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission (B4-LH-34).

MISCELLANEOUS

WKAQ—Radio Corp. of Porto Rico, San Juan, Puerto Rico.—Granted modification of construction permit which authorized move of auxiliary transmitter, for extension of completion date from March 1, 1943, to July 26, 1943 (B-MP-1700).

William G. H. Finch, New York, N. Y. (Docket 6363); Hughes Productions, Division of Hughes Tool Co., Los Angeles, Calif. (Dockets 6370, 6371); Head of the Lakes Broadcasting Co., Duluth, Minn. (Docket 6474); Sea Board Radio Broadcasting Corp., Philadelphia, Pa. (Dockets 6479, 6480).—On the Commission's own motion ordered that the hearing dates be indefinitely continued on applications in Dockets 6363, 6370, 6371, 6474, 6479 and 6480 (to conform with the Commission's policy of February 23, 1943 regarding FM and television applications.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Granted petition to dismiss without prejudice application for construction permit (B5-P-3499).

WCOP—Mass. Broadcasting Corp., Boston, Mass.—Postponed until April 14 action on petition for order to take depositions in re application for renewal of license, and the Commission on its own motion continued to May 17 the hearing now scheduled for April 19.

KTEM—Bell Broadcasting Co., Temple, Texas.—Denied without prejudice motion to intervene in the hearing on application of KDNT for modification of license (B3-ML-1143).

APPLICATIONS FILED AT FCC

1090 Kilocycles

KTHS—Radio Broadcasting, Inc., Hot Springs National Park, Ark.—Construction permit to increase power from 5 KW night, 10 KW day to 50 KW day and night, change hours of operation from Shares equally with KRLD to Unlimited, install new transmitter and directional antenna for night use, move transmitter to Near Wrightsville, Ark. and move studio to Little Rock, Arkansas.

1150 Kilocycles

KSWO—Willard Carver & Byrne Ross, Lawton, Okla.—Special service authorization to operate unlimited time, for period ending 8-1-44.

1210 Kilocycles

WCAU—WCAU Broadcasting Company, Philadelphia, Pa.—Authority to determine operating power by direct measurement.

1230 Kilocycles

WDSM—WDSM, Incorporated, Superior, Wis.—Construction permit to make changes in transmitting equipment and increase power from 100 watts to 250 watts.

1290 Kilocycles

WTOC—Savannah Broadcasting Co., Savannah, Ga.—License to cover construction permit (B3-P-2944 as modified) for increase in power and installation of directional antenna for night use.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Authority to determine operating power by direct measurement.

1380 Kilocycles

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Transfer of control from Nelson P. Poynter to Times Publishing Company (25½ shares).

MISCELLANEOUS APPLICATIONS

KOBH—Black Hills Broadcast Co. of Rapid City, Rapid City, S. D.—Construction permit to change frequency from **1400 kc.** to **610 kc.,** increase power from 250 watts to 5 KW, install directional antenna for day and night, change transmitter and move. AMENDED to install directional antenna for night use only.

KDRO—Albert S. Drohlich & Robert A. Drohlich d/b as Drohlich Brothers, Sedalia, Mo.—Voluntary assignment of license to Milton J. Hinlein.

KWKW—Southern California Broadcasting Co., Pasadena, Calif.—Transfer of control from Marshall S. Neal and Marshall S. Neal as trustee of all other stockholders of record to L. W. Peters (100% of common stock).

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Adlerika Company, St. Paul, Minn., selling and distributing a laxative medicinal preparation designated "Adler-i-ka," is charged in a complaint with false advertising. (4927)

Blackstone College of Law, Inc.—Two Chicago correspondence schools controlled and directed by the same officers are charged in a complaint with operating a "diploma mill" by offering to sell law diplomas and degrees of various kinds merely upon the payment of stipulated sums of money and without the fulfillment of any reasonable scholastic effort or course of study.

Respondents named in the complaint are Blackstone College of Law, Inc., engaged in the sale of correspondence courses in law; Blackstone-Sprague School, Inc., offering purported courses in short story writing; and Harold L. Lister and E. Stanley Gerig, officers of the two corporations which are located at 307 North Michigan Ave., Chicago. (4929)

W. M. Meador & Co., Inc.—Violation of the brokerage section of the Robinson-Patman Act is alleged in a complaint issued against W. M. Meador & Co., Inc., Mobile, Ala., a jobber buying in its own name, for its own account, various food products, canned goods, and miscellaneous merchandise which it resells. (4928)

Nature Seed Co., 175 East Broadway, New York, selling and distributing a medicinal preparation designated "Nature Seed," is charged in a complaint with false advertising and misrepresentation of the product. (4926)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Greening Nursery Co., Monroe, Mich., selling and distributing fruit trees and other nursery products, has been ordered to cease and desist from certain misrepresentations in its advertising. (3673)

Josten Manufacturing Company—An order has been issued directing Josten Manufacturing Co., Owatonna, Minn., manufacturer of school class rings and similar jewelry, to cease and desist from misrepresentation in connection with the sale of its products. (3611)

London Tobacco Co., 132 Hanover St., Boston, manufacturing and distributing cigarettes, tobacco and other smoking supplies, has been ordered to cease and desist from misrepresentation of his products. The Commission finds the respondent manufactured and sold a brand designated by him as "London Special Cigarettes." On the top of each box appeared a pictorial representation simulating the British Royal Coat of Arms. Counter advertising cards and circulars supplied by the respondent, for the use of retail dealers, also featured the name "London Special," together with a simulated picturization of the British Royal Coat of Arms. (4126)

Parfum L'Orle, Inc., 6 East 39th St., New York, selling and distributing perfumes and related products, has been ordered to cease and desist from misrepresentation of its products. (4511)

Sally's Furs, Inc.—An order to discontinue misrepresentations in connection with the sale of fur garments has been issued against Sally's Furs, Inc., New York. (4705)

F. A. Stuart Co., Marshall, Mich., selling and distributing a medicinal preparation designated "Stuart's Laxative Compound Tablets," and Benson & Dall, Inc., 327 South La Salle St., Chicago, an advertising agency, disseminating advertising for the F. A. Stuart Co., have been ordered to cease and desist from false advertising and misrepresentation of the preparation. (4753)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 13, March 26, 1943

Program Directors Meet

Acting immediately on a resolution adopted by a temporary program directors executive committee of the National Association of Broadcasters meeting at NAB Washington headquarters March 24-25, Neville Miller announced the committee as appointed would become the official committee for the coming year.

Members are: William Adams, WCHS, Charleston, W. Va.; J. Robert DeHaven, WTCN, Minneapolis; Harold Fair, WHO, Des Moines; Robert L. Kennett, WHAS, Louisville; Robert Landry, CBS, New York; Clarence Menser, NBC, New York; Herbert C. Rice, WGR, Buffalo; Ray Shannon, KQV, Pittsburgh, and Tod Williams, WSPD, Toledo. All were present except DeHaven.

The resolution was as follows:

> "WHEREAS, Neville Miller and other officials of the National Association of Broadcasters have called this meeting of Program Managers in Washington, D. C., with the statement that 'programming is one of the most vital responsibilities of the radio industry.'
>
> "THEREFORE, BE IT RESOLVED, that a Program Managers Executive Committee be continued as one of the permanent committees of the National Association of Broadcasters.
>
> "That it be the purpose of this Committee to cooperate with and augment the work of the other National Association of Broadcasters Committees in furthering high program standards.
>
> "That we express our sincere appreciation for the admirable leadership exemplified by the Code Committee of the National Association of Broadcasters.
>
> "That time be allotted to the Program Managers at the National Association of Broadcasters War Conference for a discussion of problems arising from programming under war conditions."

Endorse Retail Plan

The committee reacted at once by planning active participation in the impending NAB War Conference and requesting that speakers be obtained to address program directors.

Whole-hearted approval and endorsement of the objectives of the Retail Promotion Committee Plan by unanimous vote was given by the committee after a report on the plan was presented by Lewis H. Avery, NAB director of broadcast advertising.

Other business of the two-day conference follows:

Miller opened the sessions stating that "the program executive committee in its field can parallel and cooperate with the work of other NAB committees."

Earl Glade, manager of KSL, Salt Lake City, and chairman of the NAB code committee, reported on his committee's work, declaring that it is "in the interest of good programming and service to the public to be conscious at all times of the goal which each program is trying to achieve."

IMPORTANT

Official notice of the proposed By-Law amendments appears on page 139. Due to paper shortage we will not this year separately mimeograph these proposals for mail distribution. *This Is Official Notice.*

Avery, reporting on the sales managers' committee, said it is "anxious to cooperate with the program managers committee to improve commercial programs, reduce mortality of ill-advised programs and develop new sustaining ideas for commercial sponsorship."

BMI Reports 'Success'

Roy Harlow, assistant to the general manager of Broadcast Music, Inc., reported on BMI program directors' meetings, commenting: "the grand success of these meetings of program managers as applied to BMI problems is significant to the plans being formulated by the program managers executive committee."

Speaking on "Programs and Public Relations," Willard D. Egolf, assistant to the president, NAB, said: "Our public relations goal is to be known favorably by the greatest number of people. This is a challenge to our own medium, because radio reaches the greatest number of people. We must not mistake the challenge, however, and use our facilities for broadcast braggadocio, pointing at ourselves with pride.

"We must realize that the general good conduct of our programming provides the best opportunity to do a fine public relations job. Be good to the people. Do good deeds. Our greatest concern must center on commercial programs, because while they undertake to be good to the people, they ask the people to be good to them, too, and buy radio-advertised products."

Following a report on program trends by Paul Peter, NAB director of research, the committee recommended that a study of program trends and influences with a thorough analyses calculated to make the information valuable as a guide be made.

'Plug-Uglies Personal'

Discussion and analysis of recent complaints against radio's programming such as so-called "plug-uglies" resulted in a decision that attacks have been personal in nature, not founded on a knowledge of the medium and not substantiated by any convincing expression from the general public.

The committee indicated it would seek a central cor-

PROGRAM DIRECTORS MEET

(Continued from page 131)

relation and distribution outlet of important program ideas and policy information.

A discussion of the value of the program directors and sales managers committees of NAB meeting with representative groups of advertisers, agencies and station representatives was predicted on establishing an approved system of close cooperation between sales managers and program directors in the individual stations.

The small stations' problem was tabled for further discussion.

At the luncheon closing the sessions Lieut-Col. Ed M. Kirby and Glade spoke briefly. Kirby, now with the war department public relations department, gave the following information regarding war interviews and policy for radio:

Kirby Talks on Policy

"Hospital interviews with ambulatory (movable) casualties may be cleared locally since March 15. Facts bearing immediately on a specific citation may be given, without clearance, together with facts about the individual's personal life, the latter on his own release. Operators desiring further information may address the war department public relations division, Washington, D. C., c/o either Kirby or Capt. Frank Pellegrin."

Glade made a plea for sympathetic, sensitive handling by announcers of all casualty interviews.

Attending the luncheon as guests in addition to those mentioned were: Pellegrin, Eugene Carr, Censorship; J. Harold Ryan, Censorship; Earl Gammons, CBS; Frank Russell, NBC; Philip Cohen, OWI; William Lewis, OWI; Douglas Meservey, OWI, and Don Stauffer, OWI.

48 - Hour Week

No blanket exemption for radio, or any other industry.

Each employer in a critical area must justify any schedule of less than 48-hours with his local War Manpower Commission officials.

WMC (national) still considering advisability of a "directive" on radio, but this doubtful.

This, in a nutshell, is the 48-hour week situation. The following letter went to all member stations in critical areas after last week's conference with the WMC.

We had a long meeting with Mr. Hollander of the War Manpower Commission this morning relative to radio and the 48-hour week. The up-shot of the meeting was:

1. It is not the War Manpower Commission's present intention to grant a blanket exemption to the radio industry (or any other industry).
2. Every station in a critical labor shortage area will have to justify every work-week of less than 48 hours to obtain WMC approval for new hiring after April 1.
3. The WMC has under consideration a "directive" to its regional directors pointing out that certain classifications of radio employees (talent and possibly announcers) cannot be put on any fixed work schedule in most cases.
4. Despite good testimony to the contrary from the NAB the WMC is of the opinion that in many cases the hours of technicians and general office help can be increased to (a) release manpower, or (b) obviate the necessity for hiring additional men or women.

Survey Your Situation

With this in view we suggest that you immediately go to work on the enclosed survey of your manpower situation and when this survey is completed, discuss your problems with your local War Manpower Commission officials. It was plainly indicated to us this morning that "I can't do anything" usually would not be regarded as a good answer. The war effort needs additional men. It is up to us to do what we can to help—without impairing radio's own great service.

Here are some of the factors that you might consider in discussing your problem with your WMC officials:

1. The comparatively small number of employees in the radio broadcasting industry is divided into a comparatively large number of employment units and is still further divided within these units into a large number of crafts.
2. Opportunities for interchange are few.
3. Because of radio's peculiarities a variable number of hours in the work week is normal rather than the exception.
4. Radio has the peculiarity of "peak loads" which makes any rigid increase in working hours impractical.
5. The peak or maximum operation fixes the irreducible minimum need.

Hardship on Talent

6. Reduction to the absolute minimum of workers at maximum hours for "normal" operation would enhance the possibilities of breakdown in service, besides making for serious overwork in the event of sickness, emergencies, staff reduction due to Selective Service, etc.
7. Radio talent such as singers, actors, news analysts and the like and the creative artists cannot be expected to be "on duty" 48 hours per week.
8. Union contract restrictions in many instances hamper the fullest utilization of manpower.
9. Many stations could dispense with their staff orchestras but are obligated by contract to continue their employment.
10. Radio broadcasting is essential to the war effort. The degree of co-operation and assistance it can continue to give to the war effort depends upon the maintenance of its service as a good program service. A rigid enforcement of the 48 hour ruling might seriously impair such service.

Please keep us advised of how you make out and do not hesitate to call on us for any additional help we can give you. We will keep after the WMC here for the directive.

Fly to Address War Conference

(This released to press associations and trade press March 20 by NAB News Bureau)

FCC Chairman James Lawrence Fly will address the NAB War Conference, Palmer House, Chicago, April 26-29.

In his letter of acceptance to Neville Miller, Fly stated that he expects "to discuss the manpower, material and small station question, as well as other aspects of wartime operation." Full text of his letter follows:

"I shall be glad to participate in the forthcoming War Conference of the National Association of Broadcasters now scheduled for the Palmer House of Chicago, April 26-29. The meeting should prove valuable, both to the Government and Industry, in providing an opportunity for joint discussion of problems confronting wartime broadcasting. In my talk, I expect to discuss the manpower, material and small station questions, as well as other aspects of wartime operation.

"More than ever before, it is essential that we have a sturdy broadcasting industry because of its important role in military and civilian morale. Both the government and the individual broadcasters are determined that broadcasting service shall be maintained unimpaired. I believe that this meeting will help us all in doing that job."

Peabody Awards

(This release issued to trade press and press associations March 22 by the NAB News Bureau)

The 1942 George Foster Peabody Radio Awards, the "Pulitzer Prizes" of radio, were given to the following:

> Charles Collingwood, Columbia Broadcasting System, "Outstanding Reporting of the News"; "The Man Behind the Gun," Columbia Broadcasting System, "Outstanding Entertainment in Drama"; The Standard Symphony, National Broadcasting Company (Pacific Coast Network), "Outstanding Entertainment in Music."
>
> "Afield with Ranger Mac," Radio Station WHA, Madison, Wisconsin, "Outstanding Educational Program"; "Our Hidden Enemy—Venereal Diseases," Radio Station KOAC, Corvallis, Oregon, "Outstanding Public Service Program by a Local Station—1,000 Watts or Under."
>
> "The Home Front," Radio Station WCHS, Charleston, West Virginia, "Outstanding Public Service Program by a Regional Station—Up to 10,000 Watts."

Based on Public Service

First awarded in 1941, the Peabody Radio Awards are administered jointly by the Henry W. Grady School of Journalism, University of Georgia, and the National Association of Broadcasters. They are designed to give educational recognition to meritorious public service by broadcasters to perpetuate the memory of George Foster Peabody, benefactor and life trustee of the university.

Today's selections were made by the national advisory board, individual members of which have made special studies of programs in the various categories. The board also had a digest, with recomendations, from a University of Georgia faculty committee, based on a sifting of hundreds of entries which were submitted by stations throughout the country.

Members of this board, a majority of whom were present today at the meeting in New York City, are: John H. Benson, president, American Association of Advertising Agencies, N. Y. C.; Dr. Ralph Casey, director, school of journalism, University of Minnesota; Jonathan Daniels, editor, Raleigh, N. C., News and Observer; Mark Ethridge, vice president and general manager, Louisville, Ky., Courier-Journal and Times; Joseph Henry Jackson, literary editor, San Francisco Chronicle; Waldemar Kaempffert, science editor, New York Times; Alfred A. Knopf, publisher, New York City; Dr. I. Keith Tyler, director of evaluation of school broadcasts, Ohio State University; Mrs. Marjorie Peabody Waite, daughter of George Foster Peabody, president, "Yaddo" (artists and writers foundation, Saratoga Springs, N. Y.); Edward Weeks, editor, Atlantic Monthly, Boston, Massachusetts; Earl Glade, chairman, NAB code compliance committee, and Dr. S. V. Sanford, chancellor, University System of Georgia.

Announced by Drewry

Also present at today's meetings was Dean John E. Drewry, of the Grady school, who officially announced the awards for the University of Georgia. Actual presentation will be made by Chancellor Sanford at the NAB War Conference in Chicago, April 26-29.

The first year of the Peabody awards, the winners were: Columbia Broadcasting System for networks; WLW, Cincinnati, for large stations, WGAR, Cleveland, for medium stations, and KRFU, Columbia, Missouri, for small stations. Elmer Davis, now OWI director, was the only individual cited the first year, and he for his "terse, incisive and impartial reporting of the news."

Last year the winners were Alfred Wallenstein and MBS for music; Chicago Roundtable of the Air and NBC for education; "Against the Storm" by Sandra Michael and John Gibbs and "The Bill of Rights" by Norman Corwin for drama; Cecil Brown and CBS for reporting, and the International Shortwave Broadcasters for public service by individual stations.

This year the Peabody board members made a deliberate effort to recognize both stations and programs. "Disinterested and meritorious public service" and outstanding excellence were the bases of selection in each case.

George Foster Peabody was born in Columbus, Georgia. He became a highly successful New York banker. He served as a trustee of a number of institutions of higher learning and was given honorary degrees by Howard, Washington and Lee, and the University of Georgia. He was once treasurer of the National Democratic Committee. Mr. Peabody was a close personal friend of Franklin D. Roosevelt and was largely responsible for interesting the president in the Georgia Warm Springs foundation, near which is located the "Little White House."

Mr. Peabody devoted much of his fortune to educational and social enterprises. His daughter, Mrs. Marjorie Peabody Waite, aided in establishing the awards and is a member of the board.

The Citations

"Awards for outstanding reporting of the year goes unanimously to Charles Collingwood of CBS who, with the tools of inference, indignation and fact, has conveyed to us through the screen of censorship an understanding of the troublesome situation in North Africa.

"Award for the outstanding entertainment in drama goes to the new program entitled "The Man Behind the Gun" of Columbia Broadcasting System, brilliantly written by Ranald R. MacDougall and authentically produced by William Northrup Robson, for a timeliness, a racy dialogue and a vivid sound effect which intensify our appreciation of what the men in action are up against.

"Award for outstanding entertainment in music goes

OFFICIAL STATEMENT ON BATTERIES

"The current farm battery shortage is to be relieved through a readjustment and re-scheduling of battery production," the Consumers Durable Goods division said yesterday.

"Such re-scheduling depends on a lag in other battery requirements which would permit a transfer of facilities and materials to the production of farm batteries."

This is an encouraging statement and one to get enthusiastic about when batteries come off the lines in needed quantities. It's quite a job to change over manufacturing lines and to collect stampings and materials which enter into the completed unit.

to The Standard Symphony, National Broadcasting Company Pacific Coast Network. This is a program now in its 15th year which has performed the double service of bringing the world's great music to adult listeners along the Pacific coast and of providing delightful programs of interpretation to 4,700 schools.

"Award for the outstanding educational program goes to Station WHA, Madison, Wisconsin, for its splendid series on natural science and conservation entitled "Afield with Ranger Mac." Originated by the Wisconsin School of the Air, able and accurately presented by Wakelin McNeel, chief of the Junior Forest Rangers, this series sets an example which should be widely followed.

"Award for outstanding public service by a local station goes to Station KOAC, Corvallis, Oregon, for the program "Our Hidden Enemy—Venereal Diseases," which, in the words of the U. S. Surgeon-General 'has made a unique and valuable contribution. . . .' These programs were prepared by Dr. Charles Baker, a leading syphologist, for the University of Kentucky. KOAC has the distinction of being the first to accept this courageous series.

"Award for outstanding public service by a regional station goes to Station WCHS, Charleston, West Virginia, on recommendation of the University of Georgia faculty committee, for the program "The Home Front"—a twice-weekly feature which was created and maintained morale by providing authoritative answers to listener questions dealing with the most perplexing of public problems in a community at war. In making this award the Peabody board has been guided by the University of Georgia faculty committee on preliminary selections."

FARMERS "TROUBLED" OVER LACK OF BATTERIES

State legislatures continue their interest in the continuation of wartime radio reception by farm families that must use battery operated receivers.

According to Leslie C. Johnson, general manager, WHBF, the joint memorial appearing below has been introduced into the Illinois State Legislature:

Such memorials have already passed both Houses of Indiana, Iowa, North Dakota and South Dakota.

Illinois House Joint Resolution

"Whereas: Telephones and radios in rural and farm communities are not only a great inconvenience, and time saver, but are absolutely necessary in securing information relating to farm work, markets, and community affairs related to the war effort; and

"Whereas: The restrictions and priorities placed on the various materials necessary to keep these utilities in repair, by the Federal government have resulted not only in a great inconvenience but an actual loss in valuable time, thereby retarding the war effort and food production; therefore, be it

"Resolved by the House of Representatives of the Sixty-third General Assembly of the State of Illinois, the Senate Concurring Herein: That we respectfully urge and memorialize the Congress of the United States to foster the change of such priorities and restrictions in so far as they relate to batteries and other necessary material in order to keep such rural radios and telephones in an operative condition, and, be it further.

"Resolved. That copies of this resolution be sent by the Secretary of State to each United States Senator and Member of Congress from the State of Illinois, and the War Production Board, at Washington, D. C."

Comments by Investigators

The following comments by investigators in several states reflect the unrest and deteriorating farmer morale in areas without batteries. It can easily become "explosive" and destructive to the war effort.

"Farmers are urgently concerned over the shortage of batteries for radio set operation. In many cases it is their only means of keeping in touch with the markets, news and requested changes in operations necessary to meet food production goals of various crops. Many farmers feel they are being deprived of a valuable service. . . ."

"Since our farmers depend very largely on their radios for the reception of news and for market information, they are very much disturbed over the radio situation. They feel they are being deprived of a vital service which might easily be remedied."

"The general feeling of the farmers is that they should be supplied, if possible, with essential radio batteries because they have become accustomed to the use of radios as their main source of information and they are unable to keep informed on everyday happenings which have a very damaging effect on morale out here in the country."

"Inasmuch as farmers depend upon the radio, in many instances solely, for news and for current market information and other information pertinent to their work, it would seem extremely important that their radios be kept operating. The increased interest in government regulation affecting farming and the marketing of farm products, at this time particularly, enhances such desirability. As one listener puts it, 'radios are an absolute necessity for farm welfare.'"

"Many farm people too busy this year to go away from their place, consequently radio more important than ever."

"We had a similarity of reports regarding farmers' feelings over the situation of shortage of batteries for radio sets. First, farmers consider radios a necessity not a luxury. Some appeared to be tolerant because of the war situation. Others were discouraged and some seemed to be disgusted."

"A great many farmers report radio their only source of news. Many others credit radio as their one source of enjoyment."

"It was indicated in one of the reports that the farmers stated they were furnishing men and food and felt that they should be entitled to have the batteries for their radios in order that they might hear reports of national food efforts and national war effort."

"Those with sons in service particularly alarmed about danger of losing radio news."

"Virtually all replies indicate radio as one of major factors in keeping up morale."

"Farm radio service—markets, news, storm warnings, etc.—is regarded highly essential to help achieve increased 1943 farm production."

"President's 'chats,' rationing information, news about war crop goals being missed."

"The farmer has given his sons, his help. He labors for longer hours than any other working class. His gas is rationed so he can't see his neighbors on a friendly visit, or attend a motion picture show because the gas must be saved to make the necessary trips. He is rationed on shoes, therefore, he is not doing any more walking than necessary. What is there for him to do—sit and twiddle his thumbs?"

Direct Quotations from Farmers

"I could get along without sugar or coffee or I could even go barefooted, but when we can't get batteries for our radio it is just terrible."

"We live off the main roads. Mail deliveries are uncertain. We depend on the radio. Storm warnings by radio have saved us much in both livestock and field crops."

"We live out in the country and don't have time to sit down and read a paper. We can work and hear the news at the same time."

"What will us farmers do without a radio? No hog market, no chicken, eggs, grains markets of any kind. And no news."

"We want to get markets and war news and to hear sermons."

"We are not fortunate enough to have the benefits of electricity, so we feel we should not be deprived of our radio."

"Radio—a necessity to a farmer's welfare."

"Have a boy in service. Are up early to hear the news. We would feel like working harder if we had use of our radio."

"I get my mail in town. We don't have any route by our farm, and due to gas rationing, there isn't much going for the mail."

THE TUBE SITUATION

News reached NAB Thursday as to facilities at various plants available for increased civilian tube production. The picture seems improved over last week. No official statement will be forthcoming until all remaining points at issue are resolved.

BROADCAST ADVERTISING

Trade Press Features Stories on Effective Broadcasting

Feature stories on the successful use of broadcast advertising by different types of business have recently appeared in several trade papers in widely divergent fields. All were reprinted from late issues of "Radio Showmanship."

Here is a list of these articles which you may want to call to the attention of your prospects in these fields: The December, 1942, issue of "National Jeweler" reprinted the story on the use of broadcast advertising by Hershberg's, Inc., of Rochester, N. Y.; the January, 1943, issue of "Modern Beauty Shop" featured the opportunity that broadcast advertising offers the beauty shop proprietor to reach and influence consumers; while the February, 1943, issue of "National Real Estate Journal" gave prominent display to the success story of the Byron Reed Co., Inc., of Omaha, Neb.

In addition, the Department of Broadcast Advertising was recently requested to furnish success stories to "National Carbonator and Bottler." Considerable material has already been provided and other information is now being compiled. The "NAB Reports" will carry a notice of the issue date of this publication in which the success stories are featured.

Institutional Value Is Great

While no one can accurately estimate the actual influence of the trade press on the businesses it represents, the frequent publication of articles on the effective use of broadcast advertising in many fields unquestionably has tremendous institutional value. Alert salesmen will capitalize on these opportunities to sell local prospects.

LETTERS FROM OVERSEAS IN PRINT AND ON THE AIR

During the last few weeks there has been an increase in the number of queries about the clearance of letters from personnel overseas for publication in their hometown newspapers and about the clearance of interviews with personnel returned from overseas. The question of the

PROGRAM MANAGERS ENDORSE RETAIL PROMOTION COMMITTEE PLAN

The Program Managers Executive Committee, during its two-day meeting in Washington, pledged its support of the Retail Promotion Committee Plan in the following resolution, which was unanimously adopted:

> "The Program Managers Executive Committee pledges its whole-hearted approval and endorsement of the objectives of the Retail Promotion Committee Plan."

clearance of these items will continue with increasing frequency.

The following practice should be followed in the clearance of letters from personnel overseas or interviews with personnel returned from overseas:

A. Press (for local release only)
   1. Letters from personnel overseas may be quoted in whole or in part after review by an Army PRO (press relations officer).
   2. Interviews with personnel returned from overseas may be published after review by an Army PRO.

B. Radio (for local broadcast only)
   1. Letters from personnel overseas may be quoted in whole or in part after review by an Army PRO.
   2. Interviews with personnel returned from overseas may be broadcast after review by an Army PRO. The reviewed script will be followed with no ad libbing.
   3. The use of letters or interviews on commercially sponsored local programs must be cleared by the War Department bureau of public relations.

C. The use of letters or interviews on network radio programs must be cleared and the material reviewed by the War Department bureau of public relations.

D. All doubtful cases should be referred to the War Department bureau of public relations for final decision.

FELIX MUNIZ

Felix Muniz, manager of WIAC, Puerto Rico, died suddenly March 9, according to a letter received at NAB headquarters from Enrique Abarca, owner of WIAC. Mr. Muniz has been succeeded by Tomas Muniz, his brother. Enrique Abarca, Jr., remains as assistant manager. Mr. Muniz, the deceased, was manager of WIAC since it was founded in 1942.

DROP ENGLISH TRANSLATION OF FOREIGN BROADCASTS

The request of the Office of Censorship that the managements of domestic radio stations broadcasting in foreign tongues require English translations of such programs was dropped today, it was announced by J. H. Ryan, Assistant Director in charge of the Broadcasting Division.

In a special notice to all stations broadcasting in languages other than English, Director Byron Price asked that suggestions in Section III of the Code of Wartime Practices for American Broadcasters (Edition of February 1) requesting English translations of foreign language script, be deleted.

"We have been studying foreign language broadcasting in the United States intensively for six months," Mr. Ryan said, "Our study has shown that the original factors which prompted us to suggest that English translations be required no longer exist.

Stations Praised

"Our original purpose was to establish a format which would make more effective the voluntary efforts of managers of these media in censoring their own operations. In the early stage of this procedure, we felt there should be some check, in English, against the foreign version. The voluntary efforts of broadcasters, pursuing the suggestions of the Code, in staffing capable linguistic censors now makes possible a relaxation."

The notice emphasized that this deletion from the Code did not detract from the importance of other suggestions in the foreign language section, Mr. Ryan added.

The statement, the tenth made to American broadcasters by the Office of Censorship, said:

> "In Section III (Foreign Language Broadcasts) of the Code of Wartime Practices for American Broadcasters (Edition of February 1, 1943), make following changes:
>
> "Paragraph (b) Scripts, line four of paragraph, delete— 'with an English translation.'
>
> "Paragraph (b) Scripts, line nine of paragraph, delete— 'with their translations.'
>
> "Paragraph (c) Submission of Scripts, line three of paragraph, delete— 'When such requests are received, it is understood that the scripts in the original language, as well as English translations thereof, will be submitted.'
>
> "All other requests in Section III of the Code still apply."

Bronson of Censorship to Visit Foreign Language Broadcasters

Edward H. Bronson, chief of the Office of Censorship, foreign language section, left March 23 to visit stations in Texas, Arizona, New Mexico and southern California where he will confer with foreign language broadcasters. New England, midwestern and northern California foreign language broadcasters soon will be visited by a representative of the OC, J. Harold Ryan, assistant director in charge of broadcasting, announced.

FLY RELEASES FIGURES ON 722 STATIONS

The FCC has received reports from 722 commercial broadcast stations for last year, Chairman James Lawrence Fly said at a press conference this week. Of this number 139 reported operating losses for 1942; 105 stations reported profits less than $2,500 and 478 stations reported profits in excess of $2,500. Mr. Fly said that the Commission yet has to hear from 180 stations.

Mr. Fly said that he believed that if 200 stations are given some additional financial aid during the year that that "would leave the industry in pretty fair shape." He called attention to the fact that he was just estimating the number roughly.

The Chairman stated that some of the stations are late in filing their returns because of the shortage of accountants. In many of the communities he said the accountants are understaffed and overworked "so I guess we have to be a little patient on that."

ENGINEERS AND THE WAR CONFERENCE

(This release issued to trade press March 24 by the NAB News Bureau)

Broadcast engineers will have an important part in the NAB War Conference in Chicago, April 26 to 29. Manpower, replacement materials and servicing of home receivers head the agenda of war problems scheduled for discussion by the engineers, and occupy a prominent position on the War Conference program. Speakers from government and industry, well qualified to talk on these topics, will address the general sessions.

Although the industry has successfully coped with these three factors, vital to effective operation, the coming year will present new difficulties as reserves are depleted. The solution of these problems is dependent upon an accurate knowledge of local conditions throughout the nation and a full exchange of individual experience among engineers. It is imperative that representative engineers from each NAB district attend the special engineering meetings.

The Director of Engineering is anxious to establish immediate contact with engineers expecting to attend the War Conference. If you cannot attend, it will be very helpful to have first hand knowledge of conditions in your area submitted by mail. Engineers who are planning the trip to Chicago and those willing to help by correspondence prior to the Chicago conference are invited to offer their cooperation to the NAB Engineering Department via air mail. Please address Howard S. Frazier, National Association of Broadcasters, 1760 N Street, N. W., Washington, D. C.

About the Draft

Chairman Fly discussed briefly the attitude taken by some local draft boards relative to action they have taken in regard to station personnel and stated he had sent a letter to Manpower Chairman McNutt on the subject to which he had not then received a reply.

On this matter Mr. Fly said: "I guess you know that the substance of the complaint was that in this station some of the local officials (draft board) were taking the view that they might distinguish between stations, that is, that while conceding that radio broadcasting service was essential, or at least taking the pronouncements of policy on that subject, they still appeared to take the view that they should decide which stations were essential or whether more than one or more than two were essential. I did pass that on to Chairman McNutt in the letter of mine, but I have not seen any response."

WEAVER SPEECH PUBLISHED

"How to Listen to the Radio" by Luther Weaver, head of Luther Weaver and Associates of Minneapolis, an address delivered before the 11th NAB district meeting November, 1942, has been published by the NAB in pamphlet form. A copy is being sent all member stations. Additional copies are being printed and are available at 5¢ each from the NAB News Bureau, Washington, D. C. This address is one of the clearest and most intelligent discourses on radio listening the NAB has reviewed. The pamphlets are ideal for distributing to listeners, schools or other civic or professional groups as a public service project and could be imprinted with member station call letters in such localities where distributed.

WPID TO QUIT

WPID, Petersburg, Va., will cease operating April 1, "because war conditions have made it impossible to continue operating and offer acceptable service." Operating on 1240 kcy and with 250 watts, WPID is owned by the Petersburg Newspaper Corp., and commenced operations June 5, 1940. Studio and transmitter will be maintained and the company said it planned to apply for renewal of license after the war.

THIRD DISTRICT MEETING

(This release issued to trade press March 24 by the NAB News Bureau)

Roy F. Thompson, general manager, WFBG, Altoona, Pa., was unanimously elected director of the 5th district (NAB), succeeding Isaac D. Levy, WCAU, Philadelphia, at the recent 5th district meeting in the Quaker City. Thompson will assume his directorship at the NAB War Conference in Chicago April 26-29.

The Pennsylvania Broadcasters Association, meeting in conjunction with the NAB district, moved to elect for the duration the 5th district NAB director as president of the PBA. This was done and Thompson was named PBA president for a one-year term.

Speakers at the meeting included: (for NAB) C. E. Arney, Jr., secretary-treasurer, on the War Conference plans; Carl Haverlin, BMI, on the progress and condition of BMI, and Lewis H. Avery, director of broadcast advertising, on the Retail Promotion Committee's plan.

Other speakers were: Commander Joseph L. Tinney, USN, 4th naval district public relations officer; Howard Browning, OWI regional director, and Lieut. Crandall, 1st Corps Area fighter command.

Following is a list of those in attendance: James Aull, KYW; H. A. Seville, WJEJ; David H. Rosenblum, WISR; George E. Joy, WRAK; Edward D. Clery, WIBG; J. C. Tully, WJAC; Roy F. Thompson, WFBG; A. C. Baltimore, WBRE; Dr. Leon Levy, WCAU; Isaac D. Levy, WCAU; Clifford M. Chafey, WEEU; Raymond A. Gaul, WRAW; Melvin Lahr, WKOK; B. A. Beck, WKOK; Charles Stahl, WDAS; Roger W. Clipp, WFIL; Clair R. McCollough, WGAL; J. Gorman Walsh, WILM-WDEL; C. G. Moss, WKBO; Benedict Gimble, WIP; Arthur Simon, WPEN; George D. Coleman, WGBI; Alexander W. Dannenbaum, WDAS; Lt. Kenneth W. Stowman, USN; Commander Joseph L. Tinney, USN; Paul Karnes, AP-Radio; Howard Browning, OWI; S. Burton Tall, OWI; C. E. Arney, Jr., NAB; Lewis H. Avery, NAB; Carl Haverlin, BMI.

FIFTH DISTRICT MEETING

The Fifth NAB District broadcasters met at Jacksonville, Florida, March 20, to elect a district director for the ensuing two year term. Director Frank King, WMBR, presided.

James W. Woodruff, WRBL, was unanimously elected as the Fifth District board member for the ensuing two year term, which begins after the annual meeting. Mr. Woodruff has served on the board for the last two years as a director-at-large for small stations. Mr. King was not a candidate for re-election.

DOROTHY LEWIS ON TOUR

(This release issued to trade press March 24 by the NAB News Bureau)

Representing both the NAB and the Office of War Information, Dorothy Lewis, NAB Coordinator of Listener Activity, left March 25 on a tour of 16 major U. S. cities.

Mrs. Lewis has been assigned by OWI to get audience reaction to a special list of war-time shows and manner of presentation of war information.

For the NAB, Mrs. Lewis will address groups on "Radio's Major Role in the War" and other related topics and will assist in the formation of Radio Councils of civic, professional and clerical representatives to further more discriminating and intelligent listening by the radio audience.

Her itinerary will include: Nashville, St. Louis, Kansas City, Tulsa, Oklahoma City, Fort Worth, Dallas, Little Rock, Memphis, Jackson, Birmingham, Atlanta, Greensboro, Winston-Salem, Richmond and Washington.

NORTHEASTERN RADIO COUNCIL ISSUES SIX MONTHS' REPORT

(This release issued to trade press March 24 by the NAB News Bureau)

A six-months' progress report dating from its inception last fall has been issued by the Northeastern Radio Council of Schenectady, New York, showing activity in several fields of education via radio. The report was released by the National Association of Broadcasters' listener activity department.

The activities from September, 1942, to the present, included: six secondary school broadcasts over WGY; preparation of monthly bulletins describing secondary school broadcasts and distribution of the bulletins to schools and individuals; five-minute broadcasts daily during education week by educational leaders, and assembly school programs once weekly over WSNY.

Children Taught by Newscasts

Direct teaching by radio in the form of a twice-weekly newscast directed at 4th, 5th and 6th grade pupils over WSNY is one of the council's prime activities, scripts being prepared by P. Schuyler Miller of the Schenectady department of education. Each school principal has charge for one week and teachers report the children follow the news with maps of the world spread before them during the programs which are aired 9:45 to 9:55 A.M. Tuesdays and Thursdays.

The council also was instrumental in organizing a council in Syracuse; it has prepared a manual entitled the "Fourth R" for teachers which is being published and distributed by the Schenectady board of education and distributed to all school boards in the state.

Radio Library Established

A radio education library has been established and books and recordings are being filed. All Schenectady and Scotia schools have been surveyed to determine number, type and condition of radios, phonographs and records with another survey on students' listening habits and listening tastes pending.

The council works and has worked closely with the Schenectady, Troy and Albany stations in publications of service and program guides and newspaper listings.

Officers of the council are: Mrs. Carolyn Tarbell, chairman; Emily Beaty, secretary, and Alice Warner, treasurer.

"LEAGUESBORO"

"Leaguesboro" is a new type of soap opera, according to the New Jersey League of Women Voters, which authored it. The show is a series of radio scripts written to show how one town meets its civic and national problems with the characters taken from the typical American scene and reacting as normal Americans do. It also demonstrates the LWV attitude of mind and technique without naming the league.

Titles and subjects of scripts, which may be obtained for 15¢ each or 13 for $1.50 from the New Jersey League of Women Voters, Kresge Dept. store, Newark, N. J., ordered by number, are as follows:

1. A Town is Born, introductory; 2. When Prices Go Up, consumer problems; 3. Milk, nutrition; 4. Rumor, idle gossip; 5. A Place to Live, housing; 6. It's a Free Country, criticism; 7. Not a Cent for Tribute, inflation; 8. Dental Health, public health; 9. This Freedom, civil liberties; 10. The Job He Likes, vocational education #1; 11. Trained for the Job, vocational education #2; 12. Overtime, wages and hours; 13. They Give Their Blood, blood bank; 14. All Men Are Created Equal, race relations; 15. Who Sent Mr. Jones to Congress, elections; 16. Eat, Drink and Be Healthy, nutrition; 17. Thy Liberty at Law, revision of state constitution; 18, Say It With Scrap, salvage; 19. Joy Ride, use of gas and tires, and 20. When Do We Get Tough, realism in thought and action.

Protect Small Newspapers

The House postoffice committee approved a bill this week sponsored by Rep. Hagen (F-L, Minn.) relieving small newspapers suspending publication because of the war from payment of another fee for secondclass mailing privileges on resumption of business. Advantage of the fee waiver could be taken only if the publication resumed operation six months after cessation of the national emergency declared by President Roosevelt June 5, 1940.

STATE LEGISLATION

Illinois:

H. 321 (Cilella) REPEALS RADIO SLANDER ACT—Provides that anyone who makes a statement by radio broadcast which, if published in writing would be a libel, guilty of libel and civilly responsible therefor the same as in other cases of libel. Radio broadcasting stations would not be held responsible for libels of which they had no advance knowledge and no opportunity to prevent. Repeals the radio Slander Act. Referred to Committee on Judiciary.

HJR 24 (Smith et al) RURAL RADIOS AND TELEPHONES—Memorializes Congress to foster a change of priority regulations insofar as they relate to batteries and other necessary material in order to keep rural radios and telephones in an operative condition. Referred to the Executive Committee.

Maryland:

H. 616 (Tingley) FRAUD IN ADVERTISING—Relating to the publication and making of false or misleading statements in advertisements. Referred to Committee on Judiciary.

H. 644 (White) ADVERTISING—To add Sec. 144A-144C to Art. 43 of the Annotated Code (1939 Ed.), prohibiting advertising by physicians and surgeons. Referred to Committee on Ways and Means.

Massachusetts:

H. 1400 (Sub. for H. 619) MUSICAL COMPOSITIONS —Requiring the filing of contracts pertaining to the sale, licensing and disposition of performing rights in copyrighted musical compositions and relative to imposing a tax on such sales and licenses.

Ohio:

S. 243 (Addison) ADULTERATION DRUGS, FOOD, CONDIMENTS—Relative to the adulteration and misbranding of drugs, food and condiments. Referred to Committee on Public Health.

PROPOSED BY-LAW AMENDMENTS

The following proposed amendments to the By-Laws are hereby officially submitted in accordance with the By-Law provision requiring the giving of 30 days notice to the membership. These amendments will be voted upon at the Annual Membership Meeting to be held in connection with the forthcoming War Conference in Chicago. The business session at which these amendments will be submitted will be held on Wednesday afternoon, April 28. All three amendments are submitted for consideration by the Board of Directors.

Amend Section 4, of Article III, under the title "District 3". Strike the whole and insert the following: "Delaware, Pennsylvania and Maryland". Under the title "District 4", strike the word "Maryland".

(NOTE: The effect of this amendment would be to remove the State of Maryland from the 4th District and place it in the 3rd District.)

Amend Section 1, of Article VI, by striking the comma (,) after the word "Association" in line 4 and inserting in lieu thereof the word "and," and by striking the words "and Executive Committee".

Amend Section 1, of Article VII, by striking therefrom the words "of twenty-six members,".

Amend Section 1, of Article VIII, by striking therefrom the following words: "and of the Executive Committee" in lines 3 and 4; and also the following words "or the Executive Committee" in line 13.

Amend Section 2, of Article VIII, by striking the words "Executive Committee" in line 8 and inserting in lieu thereof the words "Board of Directors".

Also amend the same Section in line 21 thereof by striking the words "Executive Committee" and inserting in lieu thereof the words "Board of Directors".

(NOTE: This amendment merely cures some defects in the By-Laws, removing the words "Executive Committee" where they appear. By action of the membership at the Cleveland convention, the Executive Committee was abolished.)

Amend Section 5 of Article VII, paragraph E, to read as follows:

"E. The Elections Committee shall prepare ballots in blank and in coupon booklet form with at least 4 ballots in each coupon book.

"Ballot Number 1 shall be used for the election of the Network Directors; provided, however, that at the discretion of the chairman of the Elections Committee a voice or standing vote may be substituted.

"Ballot Number 2 shall be used to vote for not more than 4 nominees in each classification for Directors-at-Large. The four nominees in each classification receiving the highest number of votes upon this ballot shall be declared eligible to participate in the final election conducted on Ballot 4.

"Ballot Number 3 may be used by writing thereon the names of the first, second and third preferences of cities for the next annual meeting, provided, however, that the use of Ballot Number 3 may be waived at the discretion of the Chairman of the Elections Committee and a voice or standing vote substituted.

"Ballot Number 4 shall be used to vote for election of 2 nominees for Director-at-Large in each classification as outlined in section 2 above. Any nominee receiving a number of votes equivalent to a majority of the ballots cast shall be declared elected. Balloting shall continue until two Directors-at-Large in each classification have been so elected."

(NOTE: The effect of this amendment would be to change the method of election of directors-at-large, by providing that the 4 nominees as a result of the first ballot (ballot number 2) should "run in the field" rather than in brackets. The by-law as it now reads requires nominees 1 and 2 to run against nominees 3 and 4 in the final balloting. If this proposed amendment is adopted, any two of the four nominees receiving a majority of the votes will be elected.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, March 29th. It is subject to change.

Thursday, April 1

WLAN—Thomas J. Watson, Endicott, N. Y.—Modification of C. P., 1450 kc., 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Granted construction permit to install new transmitter and increase power to 1 KW, subject to the condition that permittee will satisfy legitimate complaints of blanketing and also condition regarding materials. This grant is made to the Anchorage Radio Club, Inc., present licensee of station KFQD, with consent to transfer to William J. Wagner as soon as transfer has been completed (B-P-3506).

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Granted renewal of license for the period ending April 1, 1944.

WJWC—Hammond-Calumet Broadcasting Corp., Hammond, Ind. —Granted request to cancel the existing license and outstanding special service authorization, and to delete the call signal WJWC.

W41MM—Gordon Gray, Winston-Salem, N. C.—Granted modification of construction permit for extension of completion date, and granted license to cover construction permit as modified, in part; conditions (B3-LH-35; B3-MPH-114).

W45D—The Evening News Association, Detroit, Mich.—Granted license to cover construction permit as modified, in part; conditions (B2-LH-6).

W63NY—Marcus Loew Booking Agency, New York, N. Y.— Granted modification of construction permit for extension of completion date and granted license to cover construction permit as modified, in part; conditions (B1-MPH-107; B1-LH-28).

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending April 1, 1945:

KANS, Wichita, Kans.; KBIZ, Ottumwa, Iowa; KDON, Monterey, Calif.; KFBC, Cheyenne, Wyo.; KFOR, Lincoln, Neb.; KOCA, Kilgore, Texas; KPPC, Pasadena, Calif.; KROY, Sacramento, Calif.; KWAT, Watertown, S. Dak.; KWIL, Albany, Ore.; KWOS, Jefferson City, Mo.; KYUM, Yuma, Ariz.; WATN, Watertown, N. Y.; WBML, Macon, Ga.; WCRW, Chicago; WEBQ, Harrisburg, Ill.; WHAI, Greenfield, Mass.; WHBU, Anderson, Ind.; WHIZ, Zanesville, Ohio; WIBU, Poynette, Wis.; WJBY, Gadsden, Ala.; WKOK, Sunbury, Pa.; WLAG, LaGrange, Ga.; WSBC, Chicago; WTAX, Springfield, Ill.; KGBS, Harlingen, Texas; WGBB, Freeport, N. Y.

Licenses for the following stations were extended on a temporary basis only, pending determination upon application for renewal, for the period ending June 1, 1943:

KAVE, Carlsbad, N. Mex.; KDLR, Devils Lake, N. Dak.; KGY, Olympia, Wash.; KPFA, Helena, Mont.; WFOY, St. Augustine, Fla.; KICD, Spencer, Iowa; WGCM, Gulfport, Miss.; WGGA, Gainesville, Ga.; WJEJ, Hagerstown, Md.; WJMC, Rice Lake, Wis.; WJTN, Jamestown, N. Y.; WOMT, Manitowoc, Wis.; WRAL, Raleigh, N. C.; WSAY, Rochester, N. Y.; WSNJ, Bridgeton, N. J.; KALB, Alexandria, La.; KFJI, Klamath Falls, Ore.; KICA, Clovis, N. Mex.; KIUL, Garden City, Kans.; KVSO, Ardmore, Okla.; KWRC, Pendleton, Ore.; WCOV, Montgomery, Ala.; WFTM, Fort Myers, Fla.; WJW, Akron, Ohio; WMFG, Hibbing, Minn.

Licenses for the following stations were further extended upon a temporary basis, for the period ending June 1, 1943, pending determination upon application for renewal:

KCMC, Texarkana, Tex.; KCRJ, Jerome, Ariz.; KFMB, San Diego, Calif.; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Texas; KPLT, Paris, Texas; KRBC, Abilene, Texas; KRLH, Midland, Texas; KVGB, Great Bend, Kans.; KXL, Portland, Ore.; WABI, Bangor, Maine; WBBZ, Ponca City, Okla.; WBNX, New York City; KBST, Big Springs, Texas; WBRW, Welch, W. Va.; WCBT, Roanoke Rapids, N. C.; WEDC, Chicago; WFCI, Pawtucket, R. I.; WFTC, Kinston, N. C.; WHOM and auxiliary, Jersey City; WING, Dayton, Ohio; WJBW, New Orleans, La.; WNBZ, Saranac Lake, N. Y.; WOCB, near Hyannis, Mass.; WTEL, Philadelphia; WTRC, Elkhart, Ind.; WSYB, Rutland, Vt.

The following stations were granted renewals for the period ending February 1, 1945:

KWG, Stockton, Calif.; WAYX, Waycross, Ga.; WBOC, Salisbury, Md.; WOLS, Florence, N. C.

KIEM—Redwood Broadcasting Co., Inc., Eureka, Calif.—Granted renewal of license for the period ending December 1, 1944.

The following stations were granted renewal of licenses for the regular period:

KASA, Elk City, Okla.; KOVO, Provo, Utah; KWJB, E. of Globe, Ariz.; KXOX, Sweetwater, Texas; WBBL, Richmond, Va.; WBIR, Knoxville, Tenn.; WGAC, Augusta, Ga.; WCOU, Lewiston, Maine; WJIM, Lansing, Mich.; WJLS, Beckley, W. Va.; WJTN, Jamestown, N. Y.; WOMT, Manitowoc, Wis.; WPAX, Thomasville, Ga.; WSNY, Schenectady, N. Y.; WINN, Louisville, Ky.; KFXM, San Bernardino, Calif.

W8XUM—WBNS, Inc., Columbus, Ohio.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending May 1, 1943.

W9XWT—Courier-Journal and Louisville Times Co., Louisville, Ky.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending May 1, 1943.

W2XWE—WOKO, Inc., Albany, N. Y.—Present license further extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending May 1, 1943.

W9XBT—Balaban & Katz, Corp., Chicago, Ill.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending May 1, 1943.

W9XUI—State Univ. of Iowa, Iowa City, Iowa.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending May 1, 1943.

W4XGG—Gordon Gray, Winston-Salem, N. C.—Granted license (B3-LST-2) to cover construction permit (B3-PST-6 as modified) in part, for Studio-Transmitter station. **337000 kc.,** 25 watts. Dismissed and retired to the closed files application (B3-MPST-9) for modification of construction permit.

W2XBD—General Electric Co., Schenectady, N. Y.—Present license for ST station extended on a temporary basis only, for the period ending May 1, 1943, pending determination on application for renewal.

W5XUA—WKY Radiophone Co., Oklahoma City, Okla.—Present license further extended upon a temporary basis only, for the period ending May 1, 1943, pending determination on renewal application.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis only, for the period ending May 1, 1943, pending determination on renewal application.

ACTION IN DOCKET CASES

KDYL

The Commission announced adoption of its Proposed Findings (B-171), proposing to deny without prejudice the application of Intermountain Broadcasting Corp. (KDYL), Salt Lake City, Utah, for construction permit to change frequency from 1320 to 880 kilocycles, increase power from 5 to 10 kilowatts, make changes in directional antenna for both daytime and nighttime use and change transmitter.

In reaching its decision in this matter, the Commission based its conclusions upon the policy announced in the Memorandum Opinion of April 27, 1942, which specifically refers to the use and not to the acquisition of materials.

* * * * *

WGST

The Commission also announced adoption of its Proposed Findings of Fact and Conclusion (B 170), proposing to extend the present license of Station WGST, Georgia School of Technology, Atlanta, Georgia, on a temporary basis for a period of 90 days from March 23. The Commission will consider the issuance of a renewal of license for Station WGST provided the Commission is given assurance that the applicant is prepared to and will in fact assume and discharge the full responsibilities of a licensee. In its conclusions the Commission states:

> "1. The Communications Act of 1934, as amended, states that its purpose is to provide for the use of the channels of interstate and foreign radio transmission by persons for limited periods of time under licenses granted by Federal authority, and that no person shall use or operate radio transmission apparatus except with a license granted under the provisions of the Act (Section 301). The Act prescribes that the Commission shall grant licenses only upon written application setting forth such facts as the Commission may require as to citizenship, character and financial, technical and other qualifications of the applicant (Section 308). The Commission is directed to grant any applicant a station license, subject to the limitations of the Act, if public convenience, interest, or necessity will be served thereby (Sections 307, 309). The station license, the frequencies authorized to be used by the licensee and the rights granted in the license may not be transferred, assigned, or in any manner disposed of to any person unless the Commission shall, after securing full information, decide that the transfer is in the public interest and shall consent thereto in writing (Section 310).
>
> 2. The Rules and Regulations prescribe that application for consent to assignment of license or to transfer control of a corporate license shall be filed at least 60 days in advance of the contemplated effective date of the assignment or transfer, the application to contain such information as the prescribed application form calls for (Section 1.364). The forms of application call for substantially the same information about assignees and transferees as the Commission requires with reference to applicants for new facilities.
>
> 3. The Act and the Commission's rules, including but not limited to the provisions cited immediately above, firmly establish the principles that the licensee is and must be responsible for the control and operation of the station, that before becoming a licensee he must show qualifications which satisfy the Commission that as a licensee he will discharge his duties and responsibilities in the public interest, and that the licensee may not transfer to any person his responsibilities as licensee except with the Commission's written consent on written application therefor.
>
> 4. In this case, while the present operating agreement with Southern Broadcasting Stations, Inc., contains language purporting to give the licensee the right to control the operations of station WGST, the actual duties and responsibilities of the licensee with respect to this station have been assumed by Southern Broadcasting Stations, Inc., to the almost complete exclusion of the station licensee. The Georgia School of Technology as the licensee of WGST has failed to assume the responsibilities and to discharge the duties of the licensee of a radio broadcasting station as required by the Communications Act of 1934, as amended, and the Commission's Rules and Regulations. This failure to comply with the provisions of the Communications Act of 1934, as amended, and the Commission's Rules and Regulations, has been due in some measure to misunderstanding and lack of knowledge rather than to bad faith on the part of the licensee.

5. Under the present circumstances, the license cannot be renewed. However, no useful purpose would be served by refusing to renew the license under any and all conditions. Moreover, a continuation of the program service of Station WGST under proper management will serve the public interest, convenience and necessity.

6. The Commission will consider the issuance of a renewal of the license to Georgia School of Technology provided the Commission is given assurance that the applicant is prepared to and will in fact assume and discharge the full responsibilities of a licensee. Further application for renewal of license in accordance with these conclusions shall be filed with the Commission within sixty days from the date hereof, setting forth the plan of the Station for the acquisition of the necessary facilities and equipment, and for the business management, representation, and control of its future operations, together with a list of all persons to participate therein. In the meantime the Commission will permit the continued operation of Station WGST under temporary extension of license for a period of 90 days from this date."

WIBG—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Granted modification (B2-MP-1702) of construction permit (B2-P-3207) to increase power, hours of operation, etc., for extension of completion date to 6-9-43.

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted modification (B5-MP-1704) of construction permit (B5-P-3150) authorizing new transmitter, increase in power, etc., for extension of completion date to 6-25-43.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1501).

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1504).

W6XYZ—Television Productions, Inc., Los Angeles, Cal.—Granted modification (B5-MPVB-97) of construction permit for new experimental television broadcast station, for extension of completion date to Sept. 15/43.

KAID—Woodmen of the World Life Insurance Society, Portable-Mobile, area of Omaha, Neb.—Granted voluntary assignment of relay broadcast station license from Woodmen of the World Life Insurance Society to Radio Station WOW, Inc. (B4-ALRY-14).

KAIZ—Woodmen of the World Life Insurance Society, Portable-Mobile, area of Omaha, Neb.—Granted voluntary assignment of relay broadcast station license from Woodmen of the World Life Insurance Society to Radio Station WOW, Inc. (B4-ALRY-15).

W69C—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate FM station W67C commercially on **46,700 kc.**, power 10 KW, special emission for frequency modulation, using temporary antenna, with transmitter located at 1 No. LaSalle St., Chicago, for a period beginning March 18 and ending May 16, pending action on application for license to cover construction permit.

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Granted motion for continuance of hearing on application for modification of license, to May 10. Hearing now scheduled for April 8.

KMTR—KMTR Radio Corp., Los Angeles, Cal., and Gloria Dalton.—Petition to transfer hearing to Los Angeles dismissed without prejudice. Granted oral request for continuance of hearing now scheduled for April 15 to June 15, 1943.

WALB—Herald Publishing Co., Albany, Ga.—Granted applicant's motion for adjournment of hearing on applications for renewal of license, construction permit and voluntary assignment of license for station WALB; ordered that the hearing in this matter now set for March 23 be further adjourned to April 5, 1943, to take place in the Federal Building, Atlanta, Ga. At the time of the adjourned hearing, it is expected that each of the parties will present such evidence as may be necessary to a completion of its case. The Commission will not require the further attendance of the witness Tounsley if convincing evidence at that time is presented to the Examiner that Tounsley's attendance at such hearing will be seriously detrimental to his health.

APPLICATIONS FILED AT FCC

850 Kilocycles

WJW—WJW, Incorporated, Cleveland, Ohio.—Modification of construction permit (B2-P-3263 as modified which authorized change in frequency, increase power, new transmitter and directional antenna for day and night use, move transmitter and studio) to change proposed location of transmitter to On North side of N. Royalton Rd., between Ridge Rd. & State Road No. 94, Cuyahoga County, Ohio, and extend commencement and completion dates to 60 days after grant and 180 days thereafter respectively.

1090 Kilocycles

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Authority to determine operating power by direct measurement.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—Modification of construction permit (B1-P-3445 which authorized increase in power, changes in equipment, installation of directional antenna for night use) to move transmitter from Dorchester St., Quincy, Mass., to Corner Vershire St. & Harriet Ave., Quincy, Mass., make changes in directional antenna for night use and extend commencement and completion dates to 60 days after grant and 120 days thereafter respectively.

1450 Kilocycles

WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals, Ala.—License to cover construction permit (B3-P-3508) for new transmitter.

1490 Kilocycles

WKBV—Knox Radio Corporation, Richmond, Ind.—Transfer of control of licensee corporation from William O. Knox to Central Broadcasting Corporation (1000 shares). Amended: re Part III stockholders and percentage held by transferees.

MISCELLANEOUS

W2XWG—National Broadcasting Co., Inc., New York City, N. Y.—License for Temporary Class 2 Experimental Station on **45100 kc.**, 1000 watts, special emission for FM.

NEW—The Crosley Corporation, Mason, Ohio.—Construction permit for new International Broadcast Station Frequencies: **6080, 9590, 11710, 15250, 17800, 21650 kc.**, power 50 KW, emission A3. Share on all frequencies with WLWO, WLWL, WLWR, and WLWS.

W91NJ—New Jersey Broadcasting Corp., West Orange, N. J.—Construction permit for new High Frequency (FM) Broadcast Station on **49100 kc.**, coverage 6200 square miles.

W1XTG—Worcester Telegram Publishing Co., Inc., Holden, Mass.—License for Temporary Class 2 Experimental Broadcast Station on **43400 kc.**, 1KW power, special emission for FM.

W8XFM—The Crosley Corp., Cincinnati, O.—License for Temporary Class 2 Experimental Broadcast Station on **43200 kc.**, 1000 watts, special emission for FM.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an

opportunity to show cause why cease and desist orders should not be issued against them.

A & N Trading Company—A complaint alleging misbranding of various articles of wearing apparel in violation of the Wool Products Labeling Act and the Federal Trade Commission Act has been issued against Army and Navy Trading Company, trading as A & N Trading Co., A & N Trading Co., Inc., and Sport Center, with its principal place of business at 8th and D Sts., N. W., Washington, D. C. (4932)

Artra Cosmetics, Inc., Bloomfield, N. J., and its officers, Oscar C. Olin and Eugene A. Kovenko, are charged in a complaint with disseminating false advertisements concerning their cosmetic preparations designated "Irma" and "Sutra" recommended for use, respectively, as a depilatory and as protection against sunburn. (4930)

Londonderry, Ltd.—Violation of the Federal Trade Commission and Wool Products Labeling Act is alleged in a complaint issued against Herbert Ralston and Louis W. Goodkind, trading as Londonderry, Ltd., 512 Seventh Ave., New York, manufacturers of women's coats. (4931)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Charlotte Brandenburg, 804 Maverick Building, San Antonio, Tex., has been ordered to cease and desist from representing that the device she sells under the names "Electro Magnetic Nerve Vitalizer" and "Electro Magnetic Vibrator" has any therapeutic value in the treatment of any disease or condition of the body. (4614)

Castle Co., Inc., 1374 Broadway, New York, is directed to cease and desist from certain misrepresentations in connection with the sale of jewelry. (4785)

National Electrical Mfg. Association, et al.—An order to cease and desist from entering into or continuing any agreements or understandings to fix prices has been issued against five manufacturers of unpatented electrical alloy resistance wire and their trade association, the Electrical Alloy Section of the National Electrical Manufacturers Association, 155 East 44th St., New York.

The respondent manufacturers are Alloy Metal Wire Co., Inc., Prospect Park, Pa.; Hoskins Manufacturing Co., Detroit; Wilbur B. Driver Co., Newark, N. J.; C. O. Jelliff Manufacturing Corp., Southport, Conn.; and Driver-Harris Co., Harrison, N. J. (4558)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Browning King Uniform Corp., 22 West 18th St., New York, entered into a stipulation to cease and desist from certain representations in connection with the sale of military clothing and accessories. (3623)

Crosse & Blackwell Co., 6801 Eastern Ave., Baltimore, stipulated that in connection with the sale of Crosse & Blackwell Worcestershire Sauce or any other product of domestic origin it will cease and desist from representing by use of the words "London" or "English" or any other word, term or symbol indicative of British or other foreign origin that its products were made in or imported from Great Britain or other foreign country. (3622)

Grove Products, 409 First St., N. W., Washington, D. C., engaged in selling astrological forecasts, love and luck charms, a publication entitled "Success" and similar products, entered into a stipulation to cease and desist from representing:

That their astrological readings will show one how to become prosperous, protect health, overcome unhappiness and secure employment; that information in the book entitled "Success" will enable one to achieve his desires in love or in all transactions; that "Jinx-breaking Powder" will drive away evil or will break a jinx; or that any of their products will make one successful financially, prolong life, heal the sick and solve all problems. (03093)

United Automotive Manufacturing Company—A stipulation to cease and desist from misrepresentation in the sale of ignition devices intended for use on automobiles has been entered into by Pearle B. McGready, trading as United Automotive Manufacturing Co., 487 Broadway, New York. The devices, sold under the trade names "Super-Spark" and "Circuit Master," are advertised by the respondent as being capable of augmenting spark plugs and increasing motor performance. (3624)

Vitalix, Inc., Canton, S. D., has entered into a stipulation to cease and desist from disseminating any advertisement which fails to reveal that harmful effects may result from use of its weight-reducing plan and certain preparations sold in connection therewith. The reducing plan consists of two medicinal preparations designated "Mild Laxative Tablets" and "Active Laxative Tablets," two diets called "Reducing Week Diet" and "Normal Week Diet," and a list of exercises. The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 14, April 2, 1943

WAR CONFERENCE

Attendance Instructions

Wartime demands on the transportation facilities of the country are tremendous. Joseph B. Eastman, head of the Office of Defense Transportation, has emphasized the necessity for the most severe curtailment of civilian travel. He has made a plea for voluntary cooperation on the part of all.

We have discussed attendance at our NAB War Conference with officials of the ODT and have agreed to cooperate in discouraging attendance of any but absolutely essential personnel. Broadcasters, associate members and others are cautioned in planning their attendance at the conference and that of staff members, to consider the following questions:

1. Will the persons who go to Chicago contribute constructively to assist the broadcasting industry in more effectively aiding the war effort; or,
2. Will the persons who go to Chicago attend the serious sessions arranged for them and gain a clearer understanding of their responsibility and thus be able to serve more effectively the national interests through radio.

Unless anyone you send fits into one of the above classes, he should not attend. It is intended that this year's conference be limited strictly to those members of the broadcasting industry responsible for its continued functioning in the war program.

It is to be regretted no invitation can be extended to the wives nor are any plans being made for their entertainment for reasons which are most obvious.

Promotional Display Out

After discussing the subject with the Office of Defense Transportation, we have determined to abandon entirely all plans to conduct any kind of a promotion display. Stations are, therefore, requested not to send any material to Chicago and not to expect to see any display of any kind there, except such as may be of purely local origin. We ask your cooperation.

Associate Exhibits

Any Associate Member who had planned an exhibit at Chicago is asked to abandon those plans. The need for conserving transportation space, both express and mail, is so urgent as to justify us in asking you not to exhibit.

The NAB
Radio War Conference
Palmer House, Chicago
April 27-29

Definition of Peabody Awards

The industry may gain a better understanding of the Peabody Awards by reading the following letter which Willard Egolf wrote to John K. Hutchens, radio editor of the New York Times:

DEAR JOHN:

Your criticism of the Peabody Awards brought forth an issue which is worth clarifying.

You say, "Of the six programs honored, only two are heard nationally . . . one may be permitted to wonder a little about the emphasis on programs which the average listener could not possibly have heard. . . . There is not much in the Peabody Awards this year to converse about."

We must remember that the great consideration which underlies all selections of the Peabody Award Committee is radio's operation in the "public interest, convenience and necessity." Regardless of classification, each award has that unwritten suffix.

In the application of these principles, which should we consider more significant: the amusement, edification and elevation of a broad panorama of population, through network programs, or the complete salvation of some segment of humanity, perhaps a single soul, in an isolated community? I describe both ends of the pole for obvious reasons. Civilization will concentrate all its resources on the preservation of a single human life. Usually this has the aspect of an emergency, which finds radio proficient. By the same token, in my opinion, a service of radio which accomplishes the complete deliverance of a single soul or a small community will outweigh any average service to the nation at large. It might happen in a Rocky Mountain valley or far away in Alaska. Only through careful description, such as lies within your power, could the people and other radio stations be impressed with its full import. Upon those precepts the Pipes of Pan, if broadcast by a single radio station to accomplish such a purpose at a strategic moment, should be entitled to an award, although that award may say "for outstanding entertainment." In short, the multiple services of radio have such broad significance that they defy adequate description. Every attempt must be viewed through the reducing glass of "public interest, convenience and necessity."

The members of the Peabody Awards Committee deserve aid, encouragement and patience; above all, patience. They are attempting to implement the broadest possible gathering facilities, as well as a clear delineation of awards. Their task is tremendous. I should be the first to complain if they refused to realize it, but they do.

Byron Price Accepts

(This release issued by NAB News Bureau March 26)

Byron Price, director of censorship, has accepted the invitation of the NAB to address the radio war conference, April 27-29, in Chicago.

Price commented as follows: "Station and network managers and their staffs are to be congratulated on the

DEFINITION OF PEABODY AWARDS

(Continued from page 143)

splendid manner in which they are observing the Code of Wartime Practices for American broadcasters. I welcome the opportunity to address the radio industry on the subject of voluntary censorship, now in its second successful year."

Spiritual Programming

In an attempt to reach all members of the community with spiritual grace and comfort, WHBC is programming a broadcast titled "The Hour of Prayer."

Arrangements were made with a downtown church in Canton, Ohio, to open its doors every noon for the convenience of people during the lunch hour. WHBC sets up microphones and broadcasts a program which consists of playing and singing old, familiar hymns, interspersed with only two one-minute prayers and a single one-minute scripture reading. No one is identified on the show, not even the minister who offers the prayers and reads the scripture. The church is not lighted except for the cross above the pulpit. Prayers and scripture readings are made by various ministers of the community, appointed by the Ministerial Association. There is no pomp or formality, no mention of denominations.

Aimed at Non-Church Group

The announcements stress tolerance; the services are open to all. The audience is invited to "lay aside the routines of the moment and join with your neighbors and friends in a prayer to Almighty God to lead us safely through these troubled waters. . . ."

Felix Hinkle, WHBC manager, believes this idea, if expanded into other communities or even over the networks, could reach that great body of persons who do not attend church, but who have the "one common inherent religious complex in all rational human beings—sincere belief in a Supreme Power of some kind or other."

He further believes radio should in great measure provide spiritual grace in these critical times when war has caused a re-awakening to the precepts and teachings of Jesus Christ.

This philosophy, if broadcast properly, "holds the basic solution for all the world's troubles," in his opinion.

Approach Is Psychological

Reduced to barest essentials, the Canton program, Hinkle suggests, follows the "psychological line of bringing about a comfort and a softening and a change in the hearts and the minds of the people unconsciously. . . ."

He comments, however, that such an idea can achieve universal status best through broad network treatment, mentioning the drawbacks of local programming and the uncertain ability of local choirs and ministers at the microphone. Fred Waring's choir, or the golden voices of Marian Anderson and John Charles Thomas could take the "Rock of Ages" hymn and "make it a masterpiece," Hinkle declares, adding that all organizations and individuals on the program should be COMPLETELY ANONYMOUS to impress the listeners only with the artistry of what they hear.

Hinkle's regard for complete program anonymity has progressed to the point where he suggests that other stations, should they consider his idea favorably for local production, do not use a local church but originate the program from their studios.

Selective Service

NEVILLE MILLER PRAISES SELECTIVE SERVICE SYSTEM

(This release issued by NAB News Bureau March 26)

Praising the efficient operation of Selective Service, Neville Miller complimented draft officials upon their "sympathetic understanding and consideration of the manpower problems of the broadcasting industry."

The complete statement follows:

"It is my considered opinion that the Selective Service has been most efficiently operated within the statutory authority of the Selective Training and Service Act of 1940, as amended. Certainly the officials at national headquarters are to be complimented upon their sympathetic understanding and consideration of the manpower problems of the broadcasting industry.

"It must be remembered that the basic policy of the act is decentralization whereunder the local boards are virtually autonomous, subject to the right of appeal to the boards of appeal. As a consequence, the Occupational Bulletins issued for the guidance of local boards can only be advisory; under the act they cannot be mandatory. Each local board must select the registrants to be inducted, in so doing it presumably uses its best judgment in the light of all the circumstances in its locality.

"With almost 6500 local boards, it is to be expected that the quality of their judgment will not be uniform. But, by and large, I believe the system is being ably administered in accordance with the law as enacted by Congress and approved by the President. It is a democratic, grass roots system of selection. It is possible that a national service act, such as proposed in the Austin-Wadsworth bill, would provide for keener discrimination between the needs of the Armed Forces and essential industry. That is for Congress to decide.

"Meanwhile, as NAB has repeatedly advised the industry, the training wherever possible of personnel not subject to induction is the safest course for stations to follow in meeting the manpower problem."

STATION MANAGERS

"The NAB War Conference has every aspect of a military assignment," Neville Miller says. (Chicago—April 27-29)

THIS IS WAR!

From a WBIG Broadcast

Nobody enjoys war . . . there isn't one of us who can escape the tragedy and hardship and discomfort that war brings. We all have certain jobs to do . . . and if the jobs are war jobs, we can't be slackers.

You're listening right now to your radio station . . . a business enterprise erected primarily to serve you as best we can. Now, with the nation at war, our responsibility is greater by far than it ever was when we were at peace. Even then, we were charged with certain duties and obligations and we worked hard to make good. Our job is to do more than entertain . . . radio must also be educational and instructive, informative and illuminating if it is to serve the community.

Now, we are working hard to sell Bonds, to explain rationing, to find homes for war workers, to find as entertainment. We aren't pretending that we can compete with a swing band or a soap opera when it comes to pure listening pleasure. We have a job to do, and we intend to do it. We know that the man fighting with a gun and the man working all day with gun-making tools don't think it's fun . . . they too have a job to do, and they're doing it.

Well, perhaps you're wondering right now why we're rambling through all this explanation . . . we have a pretty good reason for trying to make clear to you how earnest we are about our war work. Some people have objected from time to time . . . even written letters to us . . . unsigned letters . . . full of unkind name calling like phony Bond salesmen" . . . and naturally, we resent the letters, especially since the writter hasn't the courage to sign a name. We cool off, and then we realize that perhaps some people just forget that even if all announcements and appeals mean nothing to them, even if they are already buying Bonds and doing war work and learning all about Bond buying and Point Rationing and how to train for a job in an essential industry.

If, by doing our job of helping the folks who need the information we have, we annoy someone who isn't interested, we are honestly sorry, for we dislike annoying anyone. But aren't at all apologetic . . . we are even proud that we are able to serve the listeners who do answer the appeals we make and make the most of the opportunities we advertise.

No, war isn't fun . . . it's a deadly serious business . . . and we here at your radio station are well aware that our industry and our nation and even our personal lives as free people are at stake. We are Americans in free America . . . if we weren't, you'd never hear an explanation as you are hearing now . . . an explanation as to why you hear at certain intervals certain messages from your government and its agencies. No, there isn't any compulsion about radio listening here, and there never will be . . . you listen as you like . . . but when you listen and you hear us down here hard at work trying to get the war won, just remember that we're doing our best at the most important job we'll ever have . . . and we hope you're doing yours . . . THIS IS WAR!

Labor Relations

Labor Broadcasts

Recognition of a release from Joseph L. Miller, NAB director of labor relations, pointing out the number and scope of labor broadcasts over the networks in 1942 came from the nation's two top labor leaders in letters as follows:

"Many thanks for your kind favor of March 9, and the enclosed release showing the number of labor broadcasts during 1942. I hope to have an opportunity of talking with you sometime soon.

(President, CIO) (Signed) Philip Murray"

"I thank you for your letter dated March 9th with copy of a release in which there is set forth the number of labor broadcasts which were made over the networks during 1942. You are right in your conclusion that I would be interested in this information. It is gratifying to know that more than 100 broadcasts were made by representatives of organized labor during the year 1942.

(President, AFL) (Signed) W. Green"

CBS and IBEW Sign

The National War Labor Board this week announced approval of parts of a wage agreement between the Columbia Broadcasting System and the International Brotherhood of Electrical Workers, AFL, providing for an average increase of 7¢ an hour for 268 technicians and supervisory personnel, retroactive to October 1, 1942.

The agreement establishes a new wage schedule with a starting rate of $50 weekly and automatic increases up to $85 for technicians, and rates ranging from $90 to $100 for supervisors. The wage schedule prior to the increases approved by the Board had a starting rate of $49.60 for technicians and ranged from $87.20 to $98.70 for supervisory personnel.

(1) The Board disapproved a proposal by the company and the union to eliminate three steps in the present wage progression schedule on the ground that it would create an inequity with respect to the National Broadcasting Company and the Mutual Broadcasting Company.

(2) The Board also disapproved a clause in the wage agreement providing for payment of time and a half for hours in excess of ten, instead of twelve as now provided. The Board held that since both NBC and Mutual now have a 12 hour maximum workday, approval of a 10 hour maximum for Columbia would create new inequalities between the three systems.

The approved wage schedule will correct maladjustments resulting from the rise in the cost of living, and will result in increases well within 15% of the January 1, 1941 wage level.

Wage Stabilization Notes

Escalator clauses in labor contracts, which provide for automatic wage increases in ratio to the rise in the cost of living index are regarded as valid by the National War Labor Board as long as they do not conflict with national wage stabilization policies, the Board said this week.

This was pointed out in the case of the American Home Products Company, of Jersey City, New Jersey, and the National Council of Gas, Coke and Chemical Workers, CIO, in which the Board denied the parties' request for a 2½ cent per hour increase for employees covered by a contract between the union and the company. The increase was provided for in an escalator clause in the contract.

The Board found that the increases could not be granted under the 15% cost of living formula and that no inequalities existed because wage differentials between the company and other comparable companies in the area were well established.

* * *

The National War Labor Board has issued the following statement about compliance with the wage stabilization program:

Alleged violations of the wage stabilization provisions of the Anti-Inflation Act of October 2, 1942, and of Executive Order 9250 have from time to time been brought to the attention of the National War Labor Board. In these first few months since Congress passed the Act those violations proved on investigation to have been committed rather through ignorance than through wilful disregard of the law. It was deemed appropriate, therefore, that the Board's enforcement policy in those early months be tempered by the knowledge that the national policy of wage stabilization was still imperfectly understood. . . . Obviously, wilful violations of the law must be stopped if the anti-inflation program is not to be impaired and the critical manpower situation rendered more acute. Where the Board's investigation of the facts warrant, violations will be prosecuted immediately and vigorously. Ignorance can no longer be pleaded as an excuse.

CHAIRMAN FLY COMMENTS

The manpower situation as it affects broadcast stations is still a very live subject. At a press conference this week FCC Chairman James Lawrence Fly said that he had sent another letter to Manpower Commission Chairman McNutt on the subject.

"On the manpower situation," said Fly, "I overlooked a letter to Mr. McNutt that we had some earlier correspondence that for the moment had seemingly settled that rather difficult problem, and I forwarded another letter to Mr. McNutt the other day supplementing my recent letter forwarding copies of the correspondence on the earlier case. I haven't heard from them over there which leads me to believe, as I of course would have believed, that they are giving the matter very careful consideration."

On the same subject Fly said, "We have never had any conflict or controversy at all with the War Manpower Commission and we haven't got one now and we have always had the best and most cooperative relations with them."

Security Survey Underway

Chairman Fly told the conference that the Commission is making considerable progress on the various security studies and in explanation of this he said that "you probably know that the Commission staff, that is, the field division of the engineering department, has been making for sometime a continuous survey of security measures at the various communication plants."

Fly said further that "up to March 19th they had completed the survey and reported on 256 different facilities. Of course that includes the radio communication, telephone and certain of the domestic communication systems, and the broadcasting stations which by the way would cover two locations. I think that about 380 locations have been completed and various suggestions have been made for security measures which would be adopted and I think in every case the staff has met with the full cooperation of the various owners. They have no complaints regarding this advisory service, and I think it is moving along in good shape. We have every reason to believe it will be helpful to all concerned."

FCC Simplifying Forms

Fly said the FCC is trying to simplify its many forms and questionnaires. For a number of years he said the Commission has been trying to simplify the forms. "As a matter of fact," he said, "during the past few years every form we have got out we put every effort to have it just in the simplest way possible."

Regarding the financial studies of the small stations, Fly said, "I am rather inclined to hold off as far as any

BROADCASTING "ESSENTIAL"

In the revised lists of activities, products, services and facilities certified by the War Manpower Commission since July, 1942, issued March 25, 1943, the following classification appears: "all communication services and production of communications." This includes broadcasting.

public statement on that matter is concerned. I will continue to give attention to the plight of the small stations—that in itself is a continuing matter—but I rather think that we will not make any further announcements as to the financial status of the stations until the NAB War Conference in Chicago and at that time I will try to give the industry a complete report on the financial conditions of the entire industry so far as that is reflected in our reports here."

Manpower—Materials

THE TUBE SITUATION

Frank H. McIntosh, of the Radio Division, War Production Board, today urged more even distribution of radio tubes to keep home sets in repair.

He addressed a letter to tube manufacturers urging that they exchange tubes among themselves and that they concentrate production on critical types. In making the letter public, Mr. McIntosh pointed out that the conversion of the radio industry was designed to permit tube production sufficient to maintain civilian radio. Production of radio tubes available for replacement in civilian sets is almost as high as peace times, he said.

"A careful survey of the industry," the letter said, "indicated that radio tube production, available for replacement purposes, is almost as high as in normal peace times; nevertheless, many complaints have been received, particularly from rural areas, stating that tubes are not available.

"It appears evident from the figures on production and existing inventories that production is not the sole difficulty responsible for the lack of tubes. Maldistribution, caused by the inability of manufacturers to round out their lines, and low production of certain critical types of tubes, appears to be responsible, in part, for present shortages.

"This office therefore suggests that manufacturers concentrate their civilian production on critical tube types, even though such types may be low profit items.

"It is further urged that, during this critical period, manufacturers exchange tubes freely in order to make the best use of existing distribution channels."

COMMENT

On Sunday, March 28, the New York Times carried a story which quotes an unnamed tube factory man to the effect that the country's whole tube-making industry could not produce more than 2,000,000 bulbs a month above the present huge war output.

This prophet was unmasked a few days later when Mr. McIntosh of WPB officially announced that January 1943 sales by tube manufacturers for replacement purposes were almost 2,500,000. These were all of new manufacture.

A Soldier "On the Beam"

(This release issued by NAB News Bureau March 26)

He's a private in the Army Air Forces and entitled to a free frank on his letters, but when he read of the critical need for radio tubes, he sent an air-mail letter with regular postage offering enthusiastically to donate to the war effort transmitter tubes he left at home.

His name is Private William Redpath, of Pittsburgh, Pa., and he is stationed in the Southwest. The notice he read was a request issued by the NAB through QST, the American Radio Relay League magazine, asking "hams" (amateur radio operators) to register their tubes for sale through NAB to broadcasters who might need them. "Hams" are off the air for the duration.

Redpath sent his letter to Howard Frazier, NAB director of engineering.

Canadians Not "Foreigners"

James Lawrence Fly, chairman of the Board of War Communications, has sent the following notice to all persons engaged in the wire and radio communications industry, including manufacturing:

> "Reference is made to the attached resolution of the Defense Communications Board (now the Board of War Communications), Mimeo. No. 53152, of August 21, 1941, regarding visits to communication plants and stations. In this connection, the Board of War Communications today amended its policy with respect to visits to communication plants and stations so that Canadian citizens would be treated on the same basis as American citizens.
>
> "Therefore, all persons engaged in the wire or radio communications industry may admit Canadian citizens to their plants and stations when visits by such persons are considered necessary by the management in the conduct of its business.
>
> "The foregoing does not apply to visits to manufacturing plants engaged in the execution of contracts for the Army or Navy or plants engaged in scientific research and development in collaboration with the Office of Scientific Research and Development. These departments issue their own regulations with respect to visits to such manufacturing plants."

The resolution referred to had requested that all foreign persons, representatives, associations or corporations be excluded from said plants or stations.

'WAR TIME'

The War Production Board issued the following bulletin March 24, 1943:

The Necessity for "War Time"

The observance of "War Time" throughout the United States is essential if this country is to meet its production requirements. This fact has already been proved by the experience of over a year since the enactment by the Congress in January, 1942, of the law to advance by one hour the time to be observed in each of the standard time zones. A failure to observe "War Time" will result in severe strains upon power resources and in a diversion of essential materials which will seriously hamper the production of ships, tanks, planes, ammunition, synthetic rubber and aviation gasoline.

Savings from "War Time"

Observance of "War Time" has resulted in important savings in the total amount of electricity used but even more important it has saved the materials for generators and power plants which otherwise would have been necessary to provide additional power capacity for war production.

Translating these savings into war materials, "War Time" has saved copper for 2,500,000,000 rounds of 30 caliber ammunition, and steel needed for the production of 6,000 medium size tanks or 140 destroyers of average size. The additional power facilities which would have been required to supply the power saved by "War Time" would have required these amounts of needed and scarce war materials. The electric energy saved by "War time" is equivalent to the amount required to produce aluminum for 7,500 medium size bombers or 16,000 fighters.

These figures are based not upon conjecture as to possible savings resulting from "War Time" but upon actual experience during the past year as determined by the engineering staff of the War Production Board.

How "War Time" Saves Power

The way in which the adoption of "War Time" has brought about these savings in plant capacity is not generally understood. Existing power plants are capable of producing only a certain amount of electric power at one time. The size of our power facilities must be sufficient to meet the maximum demand for power during any day. Under standard time the heaviest demand for power is in the late afternoon hours, since the greatest concentration of use by households and institutions, including office buildings, stores and shops, is during this period. "War Time" by advancing the clocks one hour enables these users to operate by daylight for an additional hour in the late afternoon. This cuts down on the total demand for electricity at the peak period for lighting and enables the increased requirements of war production to be carried by power plants that would otherwise have to be used for this lighting load. Thus "War Time" eliminates the necessity for building additional power plants in the amount of these savings. Nor does the earlier start in the morning in general have any serious consequences for power systems, since the heaviest morning demand on power is in the daylight hours even with the time advanced.

Reserve Power Essential

The saving of kilowatt capacity brought about by the observance of "War Time" for the country as a whole represents about 50 percent of the minimum reserves required to furnish adequate and reliable power service in case of accidents to power plants. This reserve, which is essential if we are to be prepared to meet emergencies, could have been maintained without "War Time" only through the expenditures of critical materials in building additional power plant capacity.

It is thus evident that the establishment of "War Time" in effect made available electric power producing capacity for load and reserves for an expanding war production effort without the expenditure of critical materials, labor, machine tools and manufacturing space.

It should be noted that there are substantial savings effected in all months of the year through a reduction in the amount of electric energy required for household, office and commercial use. Even though "War Time" causes some increase in the use of electricity in the early morning hours in the fall and winter months by providing an additional hour of daylight in the evening, it has lowered the over-all consumption of electric energy the year round. This has resulted in important savings in fuel which in turn result in a saving of critical facilities used for the transportation of oil and coal from producing centers.

Confusion from Local Changes

The failure of a state to observe "War Time," confusing in times of peace, becomes very serious in times of war. With the transportation facilities of the country already taxed to capacity, a lack of uniformity in the use of "War Time" throughout the 48 states impairs the efficient operation of these facilities and results in public confusion, causing delays and waste of manpower in the shipment of war materials.

The experience of the few states which have, in effect, abolished "War Time" has resulted in wide-spread comment in the press. In Ohio, which is now following a time which is equivalent to Eastern Standard Time, many of the cities are still following Eastern "War Time" and the interstate transportation services and post offices are required by law to operate on "War Time." The result has been serious confusion which has been pointed out in numerous editorials.

The Dayton, Ohio, *News* on February 22, 1943, commented editorially on the confusion in Ohio as follows:

"The Time Muddle

> "Ohio goes on its new time in a state of confusion. About half the people of the state now find themselves on the new time decreed by the legislature. The rest, through the independent action of cities, remain as they were.
>
> "If the division were on lines of geography, as with the western half of the state on western and the eastern half on eastern time, it would not be so bad. But the differences go by spots.
>
> "Cities remaining on eastern war time are as far apart as Cincinnati and Cleveland. The clock now changes, as one travels across the state, every half hour or so. The situation is absurd and changes, in one way or another, will have to be made. The good intentions of the legislature have done the paving job which unintelligent good intentions are noted for. We have before us a striking example of the results when legislators jump at conclusions, instead of seeking facts and using their heads."

The Lansing, Michigan, *Journal* of February 24, 1943, had the following article.

> "Lansing war industries are likely to revert to Eastern war time 'in the interest of winning the war,' spokesmen declared Wednesday after the city council voted, 11 to 3, in 'closed' session Tuesday night against changing back to 'fast' time.
>
> * * * * *
>
> "A. H. Brandel, production manager of Oldsmobile, said the slow time schedule of Lansing 'has caused utter confusion in all lines of communication with other cities in and out of the state.' He declared that four hours a day are lost by rail, truck and wire.
>
> "'We have got to win a war and we can't let personal inconveniences interfere,' Mr. Brandel added. 'You can't ignore the men who are fighting over across.'"

Readjustments Under "War Time"

The great advantages of "War Time" have obviously not been effected without inconveniences. However, all the issues which are currently being raised have been canvassed many times by the Congress, as well as by state legislatures. Experience has shown that while some groups, particularly in agricultural areas, may find that they are inconvenienced and that "War Time" is of little benefit to them or to their production, the interest of the country as a whole requires the observance of "War Time."

To offset these inconveniences, the possible readjustment of time schedules in the picking up and delivery of dairy products is a matter which should be carefully explored. The predominantly agricultural communities in many cases may observe sun time for purposes of production and still work out an adequate distribution and transportation arrangement with other communities which are on "War Time." Cooperation between farm and city dwellers in the matter of deliveries and in the harvesting of crops could greatly minimize these inconveniences. Although in England one of their most serious problems is that of food production, they have found that the saving resulting from the adoption of two hour "War Time" in the summer months and one hour "War Time" the rest of the year, has more than justified its adoption.

Federal Agencies Support "War Time"

The conclusion that "War Time" is essential to the war effort has not been hastily reached. It has been the result of a year's experience in this country and the experience of our Allies. The War and Navy Departments, the War Production Board, the Office of Defense Transportation, the Interstate Commerce Commission, the Federal Power Commission and other affected Federal agencies have repeatedly endorsed "War Time" as an essential war measure. Recently, Robert P. Patterson, Under Secretary of War, and James V. Forrestal, Under Secretary of the Navy, joined Mr. Donald Nelson in a warning that any change in the law establishing "War Time" would be a serious detriment to increased production in 1943.

Research Committee Meets

The meeting of the NAB Research Committee was held at NAB Headquarters Wednesday, March 31. The meeting was called by Chairman Roger W. Clipp of Station WFIL. Those attending were Barry T. Rumple of NBC and Dr. Frank N. Stanton of CBS. G. Bennett Larson of Station WWDC, Washington, and John C. McCormack of Stations KTBS-KWKH, Shreveport, were not able to attend. Edward F. Evans of the Blue Network attended the meeting at the invitation of the Chairman. Staff members, Lew Avery and Paul Peter also attended.

The task of preparing a recommendation on Station Coverage occupied most of the time of the committee. The Market Data Handbook for Broadcast Stations was briefly examined in copy and printers proof form.

Inasmuch as the agenda for the meeting was not entirely covered, the meeting was recessed to be continued April 14 at NAB Headquarters. The complete report of the research meeting will be given after the continued session.

LEPROSY

The NAB is in receipt of a letter from the Carville, La., Leprosarium from which the following excerpts have been taken:

"What occasions this letter is the frequent use over the radio by other than physicians and scientists of the words 'leper' and 'leprosy' in such a manner as to be not only mis-informative but most unjust to the victims of the disease.

"Dramatic playlets and comedy sketches are the chief offenders." (Here specific examples are cited; i.e.: "You avoid me as though I were a leper."

The letter further explains that the staff and inmates of the Leprosarium appreciate the task involved to change a conception that has been in the minds of people for untold centuries, but requests that on radio, where control is possible, "in place of the word 'leprosy' use the word 'plague,' and replace 'leper' with 'pariah.' This rule to be applied to programs not concerned with scientific discussion of the disease, but where the word is merely dragged in because it is colorful and connotative.

"We earnestly solicit your careful consideration. . . ."

Radio Receives Music Tribute

In an extension of remarks printed in the Congressional Record of Thursday, February 25, 1943, authored by Senator Reynolds of North Carolina, radio receives the following accolade in a letter quoted from Mrs. Margaret Banks, music director of WBIG, writing on "Music in War":

"The development of radio and the phonograph brings music to thousands of homes that it could not otherwise have reached . . . with our splendid inventions of records and transcriptions, music can now come into all sectors. . . ."

Nashville Radio Meeting Attracts Leading Citizens

Mrs. Dorothy Lewis, now touring the east and southwest for the OWI and NAB, reports a fine meeting in Nashville, at which she appeared as Coordinator of Listener Activity for NAB, sponsored by the Radio Council of Tennessee and WSM, WLAC and WSIX.

The following persons attended in addition to Mrs. Lewis and Earl Glade, chairman of the NAB code committee:

R. B. Beale, chamber of commerce secretary; Dr. Joseph E. Burke, president, Ward Belmont college; Dr. A. L. Crabbe, education professor at George Peabody college; Dr. E. H. Ijams, president, David Lipscomb college; Dr. Edward L. Turner, president, Meharry college; Dr. H. L. Swint, Vanderbilt; Frances Zeigler, Vanderbilt school of nursing dean and Altrusa president; Dr. Harold F. Smith, Dean Fisk university, and Norene Dunn, education professor at Scarritt college.

Dr. J. E. Windrow, Peabody Demonstration school principal; Father Earnest Wiley, superintendent of Catholic schools; Dr. A. L. Holt, Tennessee Education association secretary; Martha Parks and Velma Shaffer, state department of education; Carl Brockett, Davidson county schools superintendent; Julia Green, early elementary education supervisor of Davidson county; Mrs. Ora Wakefield, Nashville schools health coordinator, and Miss Leech, Nashville schools library supervisor.

Representing the radio stations were: Harry Stone and Jack Stapp, WSM; F. C. Sowell, jr., Paul Oliphant and J. T. Ward, WLAC, and Jack Wolover and Jack Draughon, WSIX.

Prominent Women Attend

Walter Gasser, American Legion N post commander; Mrs. Paul J. Dunn, Tennessee P.-T. A. congress president; Mrs. W. H. Lambeth, state DAR regent; Mrs. Rogers N. Herbert, regional state commander of Women's Field Army; Mrs. Roland C. Wolfe, National Council of Catholic Women, state treasurer; Mrs. W. H. Fessey, State Medical association women's auxiliary vice president; Mrs. J. C. Gill, state radio chairman of Tennessee Federation of Women's clubs; Mrs. Walter L. Jones, 6th district FWC secretary; Mrs. Y. M. Haley, Nashville FWC president, and Mrs. Buford Smith, Nashville P.-T. A. council president and board of education member.

Mrs. R. H. Warner, Jr., Middle Tennessee Council of Catholic Women district president; Mrs. Isadore Frank, Nashville Council of Jewish Women president; Mrs. Robert L. Green, Housewives' League president; Mrs. Robert L. Lawrence, jr., Nashville Woman's club president; Mrs. Walter Gasser, Nashville Legion Auxiliary president; Mrs. Fred Fuller, Centennial club; Mrs. Edwin Keeble, Junior League; Margaret McKenzie, Business and Professional Women's club; Mrs. A. L. Crabbe, Peabody college, and Mrs. A. K. Holmes, county ACE.

Mrs. Harold Smith, Garden club of Nashville; Lillian

Taylor, UDC chapters; Mrs. M. P. Workman, Carnegie library; Mrs. Donald Maynard, radio council vice president; Mrs. Manuel Eskind, radio council secretary; Mrs. C. J. Bush, radio council treasurer; Mrs. J. G. Bowman, radio council membership chairman; Mrs. Bradley Walker, radio council publicity chairman; Mary Sneed Jones, radio council education chairman; Mrs. Kate H. Trawick, radio council president; Alice Wilkinson, county board of education librarian, and Elizabeth Herbert.

Engineering

MORE TECHNICIANS AVAILABLE

The campaign currently being conducted by the NAB Engineering Department to recruit broadcast station technicians, not presently employed in the broadcast industry, is producing very satisfactory results. NAB has now registered available men and women from 37 states and the District of Columbia.

Stations in need of replacement technicians are again invited to write NAB if it is impossible to fill vacancies locally. The names of several available technicians will be promptly forwarded.

RULE SUSPENDED

Suspension of two operating requirements for FM radio stations and a wartime substitution of less exacting provisions have been adopted by the FCC. Sections 3.229 and 3.261, including subsections (a) and (b), of FCC Rules and Regulations were suspended until further order of the Commission. The action is in recognition of the wartime shortages in materials and particularly in necessary skilled personnel.

Section 3.229, suspended by the Commission, provided that:

> "Within 1 year of the date of first regular operation of a high-frequency broadcast station, continuous field intensity records along several radials shall be submitted to the Commission which will establish the actual field contours, and from which operating constants required to deliver service to the area specified in the license are determined. The Commission may grant extensions of time upon showing of reasonable need therefor."

This rule permitted a check of the actual service area with the predicted area at time of license issuance, as well as data upon which to base power adjustments if required. This type of survey, however, requires the considerable time and services of skilled personnel and the use of suitable measuring equipment installed in an auto or truck. No substitute provision was adopted for Section 3.229.

Section 3.261 (a) required licensees of high frequency (FM) broadcast stations to maintain a regular daily operating schedule, except Sundays, of at least 3 hours between 6 a. m. and 6 p. m. and at least 3 hours between 6 p. m. and midnight, local standard time. Subsection (b) of this rule required the licensees to broadcast during each of the daytime and nighttime scheduled periods at least one hour's program service not duplicated simultaneously in the same area by a standard broadcast station or another FM station. The suspension of today applies to both subsections. In lieu thereof, the Commission substituted a more flexible requirement, which will permit FM operators a minimum service daily, except Sunday, of 6 hours during any portion of the broadcast day, and that the transmission of 2 hours of unduplicated programs be during any part of the broadcast schedule.

ESMWT Grads Are Good Technicians Says WJTN Goldman

The Engineering, Science, Management and War Training courses of the U. S. Department of Education, given throughout the United States, have been exceedingly helpful to broadcasters, the military and industry at large.

Simon Goldman, manager WJTN, Jamestown, N. Y., took an early interest in these courses. How the station has benefited demonstrates that these courses are fertile recruiting grounds for stations technical employees.

We are printing below Mr. Goldman's observations and suggestions in the hope that they will point the way to a complete utilization of this source for broadcast technicians:

Goldman's Report

"The need for licensed technicians for transmitter work on the part of radio stations in general has been one of the big personnel problems of the industry.

"I can't help feeling, however, that some stations are passing up marvelous opportunities afforded them through the NAB-sponsored ESMWT Radio Technicians Courses. Here at WJTN we have worked out a definite plan of attack.

"At first we tried writing letters to the teachers of these courses, which told of the opportunities in the broadcasting field, and asked them to pass the information on to the students who showed aptitude and were doing a creditable job in learning the basic fundamentals. This didn't work, however. So next the chief engineer and I made specific visits to the classes from time to time, talking with the teachers and finding out which students showed natural aptitude and were grasping on to the radio fundamentals in good style.

Much Available Talent

"We then talked to these students, finding out whether they were interested in making radio a career—that is, if they were not enlisted in the Signal Corps or subject to immediate induction in the Army.

"*Believe it or not, in these classes are men who are 4-F,* some who are below the draft age, some who are above the draft age!

"We supplied ourselves with plenty of copies of the FCC Requirements for licenses and other pamphlets on this subject as furnished by the FCC. In addition, we furnished copies of Nielson & Horning's 'Radio Questions and Answers.'

"Our next step was to take the interested parties and give them the material from which to study. Then we made appointments for them to take their license examinations. Most of the fellows get their 2nd class and then go back within 8 weeks for their 1st class.

"Our records to date are as follows: three 1st class men, two 2nd class men (one of whom has already gotten his 1st class, and the other will shortly.) The group contains three 4-F's, and two under the draft age.

"We lost one of our 4-F's to the local police radio system, and both of the fellows under 18 are used in a reserve capacity since they both still go to high school. They fill in for vacations, sicknesses, etc. In addition, our staff has another licensed operator who didn't come up through the ESMWT plan.

"The reason for this letter, portions of which you may want to use, is to encourage other stations to send their Chief Engineers, or go down themselves if necessary, to the Radio Technicians Courses which are in existence throughout the country. Then, do a little selling for themselves and the industry by encouraging students to go on to get their licenses. Many of these people don't know the procedure, and a little help and discussion finds these men responsive to the idea because they usually are the type who like radio and are anxious for broadcast experience.

"It boils down to the following type of procedure: (1) Personally contact students in the ESMWT Courses; (2) provide them with proper material to study for the exam; (3) make arrangements for them to take the exam in the city where an FCC inspector holds forth; (4) provide employment to as many of those who get their license this way as is possible.

"There's a wealth of technician material in these classes, and it's only a matter of going after it.

"'Seek and ye shall find!'"

"P. S. Just now another graduate of ESMWT came in to see me and we're sending him up to take his exam. He is over 38. Brings the total to 6."

Where Courses Are Given

"Fundamentals of Radio I and II" are the names of the ESMWT-NAB courses. According to ESMWT "list of approved courses", July 1, 1942, through January 31, 1943, courses are given at the Universities listed below:

ALABAMA: Alabama Polytechnic Institute, Fundamentals of Radio I* & II*

ARKANSAS: University of Arkansas, Fundamentals of Radio I* & II*

CALIFORNIA: Stanford University, Fundamentals of Radio I* & II*
University of California, Fundamentals of Radio I* & II*
University of Southern California, Fundamentals of Radio I* & II*
University of Santa Clara, Fundamentals of Radio I

COLORADO: University of Colorado, Radio I, II*, III

CONNECTICUT:

FLORIDA: University of Florida, Fundamentals of Radio I* & II*

GEORGIA: Georgia School of Technology, Fundamentals of Radio I (For Negroes)
Fundamentals of Radio I* & II*

IDAHO: University of Idaho, Fundamentals of Radio I* & II*

ILLINOIS: Northwestern University, Fundamentals of Radio I & II
University of Chicago, Fundamentals of Radio I
University of Illinois, Fundamentals of Radio I* & II*
Fundamentals of Radio I (women)
Wheaton College, Fundamentals of Radio I & II

INDIANA: Purdue University, Fundamentals of Radio I* & II* (Ins.)
Rose Polytechnic Institute, Fundamentals of Radio I, II

IOWA: Iowa State College, Fundamentals of Radio I* & II*
State University of Iowa, Fundamentals of Radio I* & II*

KANSAS: University of Kansas, Fundamentals of Radio I* & II*

KENTUCKY: University of Kentucky, Fundamentals of Radio I*
University of Louisville, Fundamentals of Radio I*, II*

LOUISIANA: Louisiana Polytechnic Institute, Fundamentals of Radio I*, II*
Tulane University, Fundamentals of Radio I, II

MAINE: Bates College, Fundamentals of Radio I, II
University of Maine, Fundamentals of Radio I*, II

MASSACHUSETTS: Boston College, Fundamentals of Radio I
Lowell Textile Institute, Fundamentals of Radio II
Massachusetts State College, Fundamentals of Radio II
Northeastern University, Fundamentals of Radio I, II*
Smith College, Fundamentals of Radio
Wellesley College, Fundamentals of Radio II

MICHIGAN: Detroit Institute of Technology, Fundamentals of Radio I, II
Lawrence Institute of Technology, Fundamentals of Radio I, II
Michigan College of Mining & Technology, Fundamentals of Radio I, II
Michigan State College, Fundamentals of Radio I*, II*
University of Detroit, Fundamentals of Radio I, II
Wayne University, Fundamentals of Radio I, II, III

MINNESOTA: St. Olaf College, Fundamentals of Radio II
University of Minnesota, Fundamentals of Radio I*, II*

MISSISSIPPI: Mississippi State College, Fundamentals of Radio I, II (Ins.)

MISSOURI: University of Missouri, Fundamentals of Radio I*, II*
Washington University, Fundamentals of Radio I, II

NEBRASKA: University of Nebraska, Fundamentals of Radio I*, II*

NEW HAMPSHIRE: University of New Hampshire, Radio Technician I

NEW JERSEY: Rutgers University, Radio Technician Training Course I*, II*

NEW MEXICO: University of New Mexico, Fundamentals of Radio I

NEW YORK: Brooklyn College, Fundamentals of Radio I, II
Canisius College, Fundamentals of Radio I, II
The City College of the College of the City of N. Y., Fundamentals of Radio I*, II
Clarkson College of Technology, Fundamentals of Radio I* & II*
Cornell University, Fundamentals of Radio I*
Hofstra College, Fundamentals of Radio I
Hunter College, Fundamentals of Radio I, II
Long Island University, Fundamentals of Radio I, II
Manhattan College, Fundamentals of Radio I, II
New York University, Fundamentals of Radio I, II
Polytechnic Institute of Brooklyn, Fundamentals of Radio I (2 courses)
Pratt Institute, Fundamentals of Radio I, II
Rensselaer Polytechnic Institute, Fundamentals of Radio I*, II*

* *Available in more than one city.*

Syracuse University, Fundamentals of Radio I*, II*
University of Buffalo, Radio Technician Training I*, II
University of Rochester, Fundamentals of Radio I, II
Vassar College, Fundamentals of Radio I, II

NORTH DAKOTA: North Dakota Agricultural College, Fundamentals of Radio I, II
University of North Dakota, Radio Technician Training I

OHIO: Case School of Applied Science, Radio Technician Training II
Miami University, Fundamentals of Radio I
Ohio Northern University, Radio Technician Training*
Ohio State University, Fundamentals of Radio I
Ohio University, Fundamentals of Radio I*, II*
University of Dayton, Fundamentals of Radio I, II (Ins.)
University of Toledo, Radio Technician Training I, II
Western Reserve University, Fundamentals of Radio I, II

PENNSYLVANIA: Carnegie Institute of Technology, Fundamentals of Radio I*
Franklin & Marshall College, Fundamentals of Radio I
Temple University, Fundamentals of Radio I*, II*

SOUTH CAROLINA: University of South Carolina, Fundamentals of Radio I, II

Other Schools, Too

These schools are prime contractors and the names of other educational institutions which clear through these prime contractors are not listed. Names of additional schools are obtained by writing to the ESMWT Institutional Representative at any of the schools listed above. Sometimes, such schools are located nearer the particular station.

State Legislation

Illinois:

H. 344 (Same as H. 321) (Cilella) RADIO SLANDER ACT—Provides that anyone who makes a statement by radio broadcast, which if published in writing, would be a libel, is guilty of libel and civilly responsible therefor the same as in other cases of libel. Radio broadcasting stations would not be held responsible for libels of which they had no advance knowledge and no opportunity to prevent. Repeal the radio slander act. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, April 5th. They are subject to change.

Monday April 5

Further Consolidated Hearing

To Be Held in Federal Court Room 324, Old Post Office Building, Atlanta, Ga.

WALB—Herald Publishing Co., Albany, Ga.—Renewal of license, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license station WALB, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.**, 1 KW, DA-night, unlimited.

Wednesday, April 7

Oral Argument Before the Commission

REPORT No. B-168:

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—C. P., **1490 kc.**, 250 watts, unlimited.

Friday, April 9

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of license, **700 kc.**, 50 KW night, 500 KW day, unlimited, using W8XO transmitter.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Associated Broadcasters, Inc., San Francisco, Calif.—Granted construction permit for new international broadcast station using **6060, 7230, 9570, 11870, 15290, 17760** and **21610 kc.**, A3 emission, 50 KW; sharing with WBOS-KWID on **6060, 9570, 11870 kc.**; sharing with KWID on **7230, 15290, 17760** and **21610 kc.** (B5-PIB-40).

W67NY—Columbia Broadcasting System, Inc., New York City. —Granted license (B1-LH-15) to cover construction permit (B1-PH-55, as modified), in part, for new station; conditions.

W67C—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted license (B4-LH-17) to cover construction permit (B4-PH-57, as modified), in part, for new station; conditions.

WBAX—John W. Stenger, Jr., Wilkes-Barre, Pa.—Granted petition for 90-days extension of temporary license pending Commission decision in so-called Wilkes-Barre cases.

LICENSE RENEWALS

KMAC—Howard W. Davis, d/b as The Walmac Company, San Antonio, Texas.—Granted temporary extension of license for a period of two months, to June 1, 1943, pending receipt and action on application for renewal.

KWLC—Luther College—Decorah, Iowa.—Granted renewal of license for the period April 1, 1943, to April 1, 1945.

WSOC—Radio Station WSOC, Inc., Charlotte, N. C.—Granted renewal of license for the period April 1, 1943, to April 1, 1945.

WLOK—The Fort Industry Company, Lima, Ohio.—Granted renewal of license for the period April 1, 1943, to April 1, 1945.

MISCELLANEOUS

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Granted modification of construction permit, as modified, which authorized new experimental television broadcast station, for extension of completion date from March 31 to May 31, 1943 (B1-MPVB-98).

WEGO—Wayne M. Nelson, Concord, N. C.—Granted license to cover construction permit as modified, which authorized a new broadcast station (B3-L-1756); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1505).

WSAP—Portsmouth Radio Corp, Portsmouth, Va.—Granted license to cover construction permit as modified, which authorized a new broadcast station (B2-L-1754); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1499).

KGDM—E. F. Peffer, Stockton, Calif.—Granted modification of construction permit as modified, which authorized change in frequency, hours of operation, increase in power, installation of directional antenna for night use, and new transmitter, for extension of completion date from March 20 to May 20, 1943 (B5-MP-1703).

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Scheduled for oral argument on April 7, 1943, in re Docket No. 6367.

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Denied Special Service Authorization to make changes in equipment and operate on **660 kc.**, with 10 KW power, unlimited, for period ending June 1, 1944 (B-SSA-59).

WBYN—WBYN-Brooklyn, Inc., Brooklyn, N. Y.—Denied Special Service Authorization to operate with main studio in New York, N. Y., for period ending December 1, 1944 (B1-SSA-67).

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Denied petition for reconsideration of Commission's action of October 27, 1942, designating for hearing application for modification of license, and for grant of same without hearing (Docket No. 6454).

KMAC—Howard W. Davis, tr/as The Walmac Company, San Antonio, Texas.—Granted renewal of license for the period April 1, 1943, and ending not later than April 1, 1945 (B3-R-411).

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1507).

WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals, Ala.—Granted license to cover construction permit which authorized installation of a new transmitter (B3-L-1758).

KGBK—Helen Townsley, Area of Great Bend, Kansas.—Granted further extension of relay broadcast station license, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than April 1, 1943 (B4-SRY-240).

WAEA—W. A. Patterson, Area of Chattanooga, Tenn.—Granted further extension of relay broadcast station license, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than April 1, 1943 (B3-SRY-132).

WHQ—Mackinac Radio Service (E. M. Tellefson), Mackinac Island, Mich.—Granted motion for continuance of hearing now scheduled for March 30 to April 30, 1943, in re application for renewal of license.

WOKO—WOKO, Inc., Albany, N. Y.—Granted petition for continuance of hearing on application for renewal of license from April 14 to June 1, 1943.

WLAN—Thomas J. Watson, Endicott, N. Y.—Granted motion for continuance of hearing on application for modification of construction permit from April 1 to May 4, 1943.

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted motion for leave to amend application for modification of construction permit under Rule 1.73, to request frequency **1460** instead of **1050 kc.**, 5 KW, and application removed from hearing docket.

APPLICATIONS FILED AT FCC

960 Kilocycles

KMA—May Broadcasting Co., Shenandoah, Iowa.—Modification of construction permit (B4-P-2599 as modified for installation of directional antenna for night use and increase power) for extension of completion date from 4-23-43 to 6-23-43.

WELI—City Broadcasting Corp., New Haven, Conn.—Transfer of control from Patrick J. Goode to Arde Bulova (2150 shares common stock).

1410 Kilocycles

WNBC—State Broadcasting Corp., Hartford, Conn.—Transfer of control from William J. Sanders to Arde Bulova.

MISCELLANEOUS APPLICATIONS

KRED—Redwood Broadcasting Co., Inc., Portable-Mobile, Eureka, Calif.—License to cover construction permit (B5-PRY-287) for new relay broadcast station.

W9XYH—Head of the Lakes Broadcasting Co.—License for Temporary Class 2 Experimental Station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Automatic Canteen Company of America, 222 West North Bank St., Chicago, is charged in a complaint with engaging in unlawful practices which may tend to injure competition and create in the respondent corporation a monopoly in the leasing and licensing of automatic vending machines and in the sale of confections and nut products dispensed by the machines. (4933)

Celanese Corporation of America, 180 Madison Ave., New York, is charged in a complaint with failing adequately to disclose to the purchasing public that the yarns and fabrics it manufactures and sells under the name "Celanese" are acetate rayon products and are not composed of silk or wool which they resemble in texture and appearance. (4934)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Makers of Kal, Inc., 256 North New Hampshire Ave., Los Angeles, entered into a stipulation to cease and desist from misrepresenting the therapeutic properties of two medicinal preparations it sells under the names "Lak" and "Lak Plus." (03094)

Nem Company, 457 Fifth Ave., New York, engaged in the sale of a coal tar hair dye designated "Regina," stipulated that they will cease representing in their advertising matter that the product contains an ingredient which will provide the user with special or unique benefits. (03095)

Nu Yorker, entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of electrically heated scalp caps and facial masks respectively designated "The 'Nu-Yorker' Infra-Red Scalp Cap" and "The 'Nu-Yorker' Infra-Red Beauty Mask." (3425)

Pneumatic Institute Co., 103 Park Ave., New York, has entered into a stipulation to cease and desist from representing that the "Vita-Pneumatic Action" truss he sells is a new discovery and that the use of the device will cause or prevent difficulties associated with rupture or hernia or do more than afford relief from certain kinds of rupture or hernia. (3626)

J. H. Thorp & Co., Inc., 250 Park Ave., New York, engaged in the sale of textile fabrics, stipulated that it will cease and desist from advertising, labeling, or selling any product composed in whole or in part of rayon without disclosing that fact by use of the word "rayon"; and when a product is composed in part of rayon and in part of other fibers, the corporation agrees to discontinue failing to disclose each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent. (3627)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Erdley Hatcheries—An order to cease and desist from misrepresentation in the sale of baby chicks has been issued against John F. Erdley, trading as Erdley Hatcheries, Wray, Colo., and Montgomery Ward & Co., Chicago. (4969)

Walter Kidde & Co., Inc., 140 Cedar St., New York, manufacturer and distributor of fire-extinguishing apparatus, has been ordered to cease and desist from certain misrepresentations of its products and consequent disparagement of competitors' products. (3866)

Linen Supply Board of Trade of New Jersey, Newark, N. J., and its officers, directors and member companies have been ordered to cease and desist from entering into or continuing any combination or agreements under which they engage in restraint of trade practices, including price fixing. The board's member companies supply, lease and rent linen supplies such as coats, trousers, aprons, towels and tablecloths to customers in and adjacent to Newark and New York City. (4588)

Master Artists' Association, Inc.—An order to cease and desist from misrepresentation in the sale of colored photographic enlargements and frames has been issued against Eugene M. Woolard, trading as Master Artists' Association, Inc., who formerly had his principal place of business in East St. Louis, Ill. (4514)

Westville Refinery, Inc., Westville, Ind., engaged in reclaiming, processing and distributing used motor oil, has been ordered to cease and desist from certain misrepresentations concerning the nature of its business and its products. (4370)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 15, April 9, 1943

IMPORTANT NOTICE

NAB By-Laws provide for an annual meeting of the membership at which Directors-at-Large will be nominated and elected and at which any other business pertaining to the Association may be transacted. They further provide that each individual, firm or corporation admitted to active membership "and whose dues are not more than one month in arrears" shall certify one person actively engaged in the business to be its representative in the Association and vote and act for it in all NAB affairs, including the holding of office therein. One vote only is allowed for each active member.

Every member station has been sent a certification card so that it may designate its representative. **Be sure to send these cards in promptly.** Specific attention is also called to the provision regarding payment of dues. Any station whose March, 1943, dues have not been paid by the time of the Conference will be ineligible to vote and any person from that station ineligible to hold office. You are requested to give this matter prompt attention.

Selective Service

McNUTT WRITES FLY

The manpower situation insofar as it affects the broadcasting industry was clarified this week when FCC Chairman James Lawrence Fly made public a letter which he had received from Chairman McNutt of the War Manpower Commission. The letter was as follows:

"I have your communications of March 24 and 27, concerning the local determination of particular radio stations as being essential to the war effort.

"As you know, neither the *List of Essential Activities* nor the Activities and Occupational Bulletins relating to the broadcasting services give any basis for differentiation in the essentiality of one radio station as against another. Insofar as the character and content of broadcasting services are similar as between individual radio stations and such services are deemed related to the war effort, no distinction can be drawn as between particular stations. You recognize, of course, that this interpretation does not assure automatic deferment for all persons in essential occupations in broadcasting services. I have called your communications to the attention of the Bureau of Selective Service and requested that they inform their representatives in the field that no such determination shall be made. Requests for occupational deferment are made by local Selective Service Boards on an individual basis and not on the basis of particular radio stations in which an individual may be employed. Needs of the armed forces are such as to require withdrawal in some instances of persons in essential occupations in essential activities. It is possible, therefore, for individuals in essential occupations in radio stations to fail to obtain occupational deferment, but such failure, however, is not on the grounds of the lack of essentiality of the individual radio station."

Fly Commends Letter

Fly gave it as his offhand impression that the letter clarifies the manpower situation. "This (the letter)", said Chairman Fly, "I think is in line with the understanding which we have cooperatively arrived at with the War Manpower Commission. In matters of detail arising under it I am sure we will continue to have the cooperation of the Manpower Commission. I am quite happy to have this letter and I agree to give it to you for such assistance as it may render to the industry."

The Chairman said FCC had never asked the Manpower Commission to assure broadcast stations that all radio employees should be deferred. The Manpower Commission was asked, Fly said, to recognize the broadcast

(Continued on page 156)

Radio War Conference

Palmer House, Chicago, April 27-29

The War and Radio's part in the War are of vital concern to you as an American citizen and as a broadcaster. The War Conference is an assignment in the war interest as well as a civic responsibility. Your participation and attendance are necessary to successful operation of War Radio. Avail yourself of the privilege of pre-registration. Send your cards and checks to NAB.

SELECTIVE SERVICE

(Continued from page 155)

industry as an essential industry and certain of its activities as essential. That has been done.

CLASS 3-B DROPPED BY PHILADELPHIA DRAFT BOARDS

(This story was rewritten from *The Philadelphia Inquirer* of April 8, 1943. Selective Service headquarters has released nothing on this subject.)

Philadelphia draft boards Monday dropped Selective Service Classification 3-B and created a new classification, 3-D, according to a page one story in the *Philadelphia Inquirer*.

Class 3-B heretofore included married men and men with collateral dependents engaged in any one of the 35 essential industries as defined by WMC. These men will be re-classified according to their merits.

Class 3-D will include men upon whom induction would incur "extraordinary hardship," primarily financial so far as family or dependency support is concerned.

Class 3-A will consist of fathers, maintaining a home, who have children conceived prior to December 7, 1941, and born before September 14, 1942.

WMC WANTS TO AVOID NATIONAL SERVICE ACT

(Released by NAB News Bureau April 6.)

War Manpower Commission is literally "bending over backward" to procure men for the armed forces and to provide for needs of essential civilian activity without, it is hoped, having to resort to further legislation such as a National Service Act, Russell P. Place, NAB general counsel, stated last week in a release to the trade.

"During the last three months, a welter of confusing and often seemingly conflicting press releases have appeared in the papers with reference to classification and induction of registrants," Place's statement read.

"By means of legitimate pressure, permissible under the Act and Regulations, WMC is seeking to force registrants into essential activities.

"Net result is that registrants are confused and uncertain as to their status now and in the future. With about 40 million registrants concerned, impact of Selective Service on the people is second only to the war itself.

Stress "How to Stay Out"

"Effect of the publicity seems to have been to place stress on how to stay out of the Army, rather than on when induction is likely to occur. Such a major disruption of normal life as induction calls for vital rearrangements of business and personal affairs.

"The American people should be told as nearly accurately and as far in advance as possible of the imminence of induction. Uncertainty breeds fear and discontent; a measure of certainty should result in confidence and better planning by registrants and employers.

"It is common knowledge that the day when registrants with children will be inducted, and many already have been, is not far off. Reclassification into 1-A and, in many cases, determination of appeals, must precede induction. Is it not wise now to announce the date their reclassification will begin and to give a reasonably definite indication of the time when their induction will take place?"

DEFERMENT OF RADIO REPAIRMEN

Local boards have been officially informed by national headquarters of Selective Service System that Radio Repair Services are an essential activity and Radio Repairman is an essential occupation in support of the war effort. Previously included in Occupational Bulletin No. 42, this information, issued for the guidance of local boards in determining claims for occupational deferment, is now included in Activity and Occupation Bulletin No. 31, effective March 1, 1943.

When an employer has sought occupational deferment of a radio repairman by filing Form 42-A with his local board, and the local board has classified the registrant 1-A, the employer should appeal the case to the Board of Appeals. Appeal must be taken within ten days from the date of the mailing of the notice of classification, copy of which is mailed to the employer as well as to the registrant. In order to take an appeal, the employer should write a letter to the local board to that effect, or sign the appeal form on the back of the registrant's questionnaire. Employers have this right, although it has been reported to NAB that some local boards have advised employers to the contrary. If the registrant is self-employed, he himself may take appeal.

War Conference Reservations

Priorities for the NAB membership on room and suite reservations at the Palmer House will expire April 15. After that date all reservations requests will be made in the order received, whether from members, non-members or others.

TUBES TO BE STAMPED "MR"

Radio tubes currently manufactured to keep home sets in repair will carry familiar brand names instead of the general name, "Victory Line," recently considered by the industry and by the Radio Division of the War Production Board, it is announced today. WPB officials said that brand names will probably be retained for at least ninety days.

Most manufacturers have indicated that they will mark tubes made from materials alloted by the WPB for civilian use by the initials, "M.R." standing for "Maintenance and Repair."

Comment

This move is apparently designed to eliminate the indiscriminate buying of civilian tubes by government field procurement personnel. This method has previously diverted many tubes from intended civilian use.

WOMEN TECHNICIANS

The International Brotherhood of Electrical Workers has sent to all its broadcast locals a memorandum regarding the admission of women in those stations now operating under contract with the union.

In brief, the union's policy will be to admit women at a reduced initiation fee and to permit their employment as studio technicians, the number in each station not to exceed the number of male studio technicians.

HAROLD FAIR ACCEPTS PROGRAM COMMITTEE CHAIRMANSHIP

Harold Fair, program director of WHO, has accepted the appointment of chairman of the newly organized NAB program directors executive committee. Fair will begin active functioning in his new post when he presides at the program directors executive committee dinner and round table Tuesday, April 27, at the NAB War Conference in Chicago.

FLY GETS NEW SECRETARY

Appointment of Norman E. Jorgensen as secretary to Chairman James Lawrence Fly has been announced by the FCC.

Born July 23, 1908, in Chicago, Jorgensen was educated in Chicago schools, receiving from the University of Chicago his Ph.B. in 1933, and J.D. in 1943. He is married and has two children.

Before coming to the FCC, Jorgensen worked in the sales department of the Firestone Tire & Rubber Company during 1933, and through 1940 was employed by Chalmers and Co., merchandise distributors, Iron Mountain, Mich., where he became sales manager. Most recently he was the Editor-in-Chief of the University of Chicago Law Review.

STORER TO NAVY

The Navy department has confirmed appointment of George B. Storer, president of Fort Industry Co., headquarters station WSPD, Toledo, Ohio, as lieutenant-commander. Storer, whose interests embrace the steel industry, will be inspector of material stationed at Chicago, Illinois.

CONFIDENCE MEN AT LARGE

With the increasing turnover in station personnel, unreliable and shady characters are seeking to exploit some stations. Recently we received a letter from an eastern station telling of a "deadbeat" who got on the payroll, cashed several no account checks and otherwise used the station.

NAB cannot pass upon the qualifications of men seeking employment, nor upon their reliability.

We ask any station managers who have been victimized to send us the name of the individual, all of the facts about his activities and such other material as may be pertinent.

Any time a station manager desires information about persons seeking employment, inquiry may be made of NAB and we will advise if the person is listed with us as one of those not worthy of employment, and provide the facts as they have been filed with us.

STATE LEGISLATION

Illinois:

S. 259 (Madden) BEAUTY CULTURE ADVERTISING—An act relating to the practice of beauty culture by advertising the prices for services performed by any registrant. Referred to Committee on License and Miscellany.

Ohio:

H. 180 (Griffin) SALE OF APPLES—To promote the consumption and sale of apples by providing for research and an advertising sales promotion campaign to increase the consumption of Ohio grown apples; to levy and collect an assessment; to create the Ohio state apple authority and to define its powers and duties; to provide penalties for violation of this act. Reported by Sub. in House.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, April 12. It is subject to change.

Monday, April 12

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Modification of license, 1330 kc., 100 watts night, 250 watts day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted extension of Special Service Authorization for period ending August 25, 1943 (B5-SSA-70).

WJW—WJW, Inc., Akron, Ohio.—Granted modification (B2-MP-1705) of construction permit (B2-P-3263, as modified), for change of transmitter location to north side of North Royalton Rd., between Ridge Rd. and State Rd. #94, Cuyahoga County, Ohio, part (c) of conditional clause to be modified to read as follows: "The nuisance contour (0.25 mv/m) of WJW shall be determined by measurements under actual operating conditions;" and for extension of commencement and completion dates.

KVAK—Carl Latenser (Assignor), S. H. Patterson (Assignee), Atchison, Kans.—Granted consent to voluntary assignment of license (B4-AL-361) of station KVAK, from Carl Latenser to S. H. Patterson, for a total consideration of $9,500.00 (Commissioner Payne voting "No").

WKBB—Sanders Bros. Radio Station (Assignor), Dubuque Broadcasting Co. (Assignee), Dubuque, Iowa.—Granted consent to voluntary assignment of license (B4-AL-364), of station WKBB, from Sanders Bros. Broadcasting Station to Dubuque Broadcasting Co., for a total consideration of $25,000.00 (Commissioners Payne and Craven voting "No").

WOSH—Howard H. Wilson (Assignor), Oshkosh Broadcasting Co. (Assignee), Oshkosh, Wis.—Granted consent to assignment of license (B4-AL-365) of station WOSH from

Howard H. Wilson to Oshkosh Broadcasting Co., for a total consideration of $45,000.00.

DESIGNATED FOR HEARING

KWSC—State College of Washington, Pullman, Wash.—Designated for hearing application for modification of license (B5-ML-1155) to change frequency from **1250** to **1030 kc.,** power and hours of operation from 5 KW, S-KTW, to 1 KW night, 5 KW LS, unlimited. (Requests facilities of KOB.)

KFMB—Warren B. Worcester, deceased (Transferor); The First National Trust and Savings Bank of San Diego, as Trustee under Declaration of Trust for Warren B. Worcester (Transferee); Worcester Broadcasting Corp., San Diego, Calif.—Designated for hearing application for consent to voluntary transfer of control of Worcester Broadcasting Corp., licensee of station KFMB, from Warren B. Worcester, deceased, to The First National Trust & Savings Bank of San Diego, as Trustee, under Declaration of Trust for Warren B. Worcester, together with application for renewal of license to be heard in the same proceeding (B5-TC-315).

LICENSE RENEWALS

KAST—Astoria Broadcasting Co., Astoria, Ore.—Granted renewal of license for the regular period (B5-R-856).

KVAK—Carl Latenser, Atchison, Kans.—Granted renewal of license (B4-R-1006), (Commissioner Payne voting "No").

MISCELLANEOUS

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted modification of construction permit (B1-P-3455) for move of transmitter to corner of Vershire Street and Harriett Avenue, Quincy, Mass., approximately 2.4 miles southwest of the present location; make changes in directional antenna for night use, and extend commencement date to 60 days after grant and completion date to 120 days thereafter. The action taken herein is subject to the express condition that the permittee herein shall satisfy legitimate complaints of blanketing within the 250 mv/m contour, including external and cross modulation, and submission of proof that the operation of radio station WMEX is not materially affected by the operation herein proposed. Towers to be marked in accordance with specifications issued pursuant to Section 303(q) of the Communications Act of 1934 as amended (B1-MP-1706).

WALB—Herald Publishing Co., Albany, Ga. (Dockets 6398 and 6399), and Herald Publishing Co., and Albany Herald Broadcasting Co., Albany, Ga. (Docket 6400).—Granted request for a continuance of the further hearing now set for April 5, 1943, in re applications of WALB for renewal of license and for construction permit, and application of Herald Publishing Co. (WALB) and Albany Herald Broadcasting Co. for voluntary assignment of license of station WALB; further consolidated hearing continued until April 19, 1943.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted modification of construction permit as modified, which authorized increase in power, installation of new transmitter and directional antenna for night use, and change hours of operation, for extension of completion date from April 1, 1943, to June 1, 1943 (B2-MP-1708).

WASH—King-Trendle Broadcasting Corp., Grand Rapids, Mich. —Adopted Order dismissing application for modification of license (B2-ML-1142, Docket 6473), since the license of station WASH was cancelled by the Commission on March 16, 1943, after the facilities were voluntarily surrendered to WASH.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted petition to dismiss without prejudice application for modification of license to operate with 500 KW day, 50 KW night on **700 kc.,** using W8XO transmitter.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted motion to dismiss without prejudice application for modification of license to operate on **1330 kc.,** 100 watts night, 250 watts day, unlimited time.

APPLICATIONS FILED AT FCC

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Modification of construction permit (B2-P-2547, as modified, which authorized increase in power, installation of new transmitter and directional antenna for night use, and change hours of operation) for extension of completion date from 4-1-43 to 6-1-43.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—License to cover construction permit (B5-P-3199), as modified, for change in frequency and hours, increase in power, directional antenna for night and new transmitter.

KGDM—E. F. Peffer, Stockton, Calif.—Authority to determine power by direct measurement.

1170 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—License to cover construction permit (B3-P-2539), as modified, for increase in power, change hours and install new transmitter and directional antenna for night.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Authority to determine operating power by direct measurement.

1240 Kilocycles

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Modification of license to change location of main studio from 6th Street and Grand Avenue, Spencer, Iowa, to on U. S. Highways 71 and 18, 0.8 mile North of Spencer, Iowa.

1350 Kilocycles

WORK—York Broadcasting Co., York, Pa.—Modifications of construction permit (B2-P-3205, as modified, for installation of directional antenna for night use) for extension of completion date to 6-18-43.

1370 Kilocycles

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Modification of construction permit (B1-P-2924, as modified, which authorized change of frequency, increase in power, directional antenna for day and night, and new transmitter and move of transmitter), for extension of completion date from 5-1-43 to 11-1-43.

1400 Kilocycles

WCBI—Birney Imes, Columbus, Miss.—Voluntary assignment of license from Birney Imes to BIRNEY IMES, JR.

1450 Kilocycles

WHDL—WHDL, Inc., Olean, N. Y.—Modification of license to change main studio from Olean, N. Y., to 3219 W. State Road, Route 17, Town of Allegany, N. Y.

1480 Kilocycles

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Modification of license to increase power from 1 KW night and 5 KW day to 5 KW day and night, employing directional antenna night.

FM APPLICATION

W39NY—City of New York, Municipal Broadcasting System, New York, N. Y.—License to cover construction permit (B1-PH-83, as modified and which authorized new high frequency broadcast station).

MISCELLANEOUS APPLICATION

W3XO—C. M. Jansky, Jr., and Stuart L. Bailey, d/b as Jansky & Bailey, Washington, D. C.—License for Temporary Class 2 Experimental Broadcast Station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

California Lima Bean Growers Association, et al.—Violation of the brokerage section of the Robinson-Patman Act is alleged in separate complaints issued against California Lima Bean Growers Association (4939), Oxnard, Calif., and Harry Duvall Childers, trading as H. D. Childers Co. (4938), Mobile, Ala.

National Merchandising Co., and Max H. Greenberg, having their place of business at 326 Erie Building, Cleveland, Ohio, are charged, in a complaint with the use of lottery methods in the sale to ultimate purchasers of sporting goods, silverware, radios, pen and pencil sets and other merchandise. (4936)

Proctor & Gamble Company—A complaint has been issued charging Proctor and Gamble Co., Cincinnati, with misrepresentation of its liquid dentifrice designated "Teel" and with consequent unfair disparagement of tooth pastes and powders sold by competitors. Of the several ingredients contained in Teel, its principal cleansing agent is sodium alkyl sulphate, which possesses detergent qualities similar to those of soap. (4937)

Albert E. Voaden, 211 Charlervoix Building, Detroit, is charged in a complaint with misrepresentation in connection with the sale of printed questionnaire cards and forms intended for use by collection agencies and creditors in obtaining information concerning debtors. The respondent trades under various names, including "Cigarette Smoker's Survey," "Bankers and Merchants Pen Co.," and "Alvin's (No-Lose) Key Chains." (4935)

STIPULATIONS

No stipulations were entered into by the Commission last week.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Atmoray, Inc., 408 N. E. Thompson St., and Atmozone, 2140 N. E. Union Ave., both of Portland, Oreg., manufacturers and distributors of a medical device known as "Atmoray," an ozone generator intended for use in the treatment of various ailments and diseases, have been ordered to cease and desist from false advertising and misrepresentation of the product. (4630)

Gallant Trading Co., Los Angeles, is directed in an order to cease and desist from misrepresentation in connection with the sale of various articles of merchandise, including clothing, shoes, blankets, mattresses and tarpaulins. (4780)

A. & M. Karagheusian, Inc., 295 Fifth Ave., New York, manufacturer and importer of carpets and rugs, has been ordered to cease and desist from representations which tend to mislead purchasers into the erroneous belief that certain of its domestic rugs are Oriental rugs or reproductions of Orientals. The respondent has factories at Freehold and Roselle, N. J., and foreign offices in Tientsin, China, and throughout Persia. (4305)

Marshall Field & Co., Chicago, trading as Karastan Rug Mills, has been ordered to cease and desist from certain misrepresentations in the sale of rugs. (4493)

Broadcast Advertising

SMALL STATIONS WAR CONFERENCE COMMITTEE NAMED

On the Thursday morning program at the War Conference, the role of advertising in time of war will be discussed. In addition to talks by Chester LaRoche, director of the Advertising Council, and William B. Lewis, of the OWI, there will be a talk by a representative of a small station, who will outline the problems faced by small stations.

Many in the industry have expressed keen interest in the small stations problems, and many solutions have been suggested, including government payment for time. So that the views of the industry on these various subjects may be presented at this meeting, Neville Miller is requesting the following broadcasters to serve on a committee to consider these subjects and make the report.

James W. Woodruff, Jr., WGPC, Albany, Ga.—Chairman
James R. Curtis, KFRO, Longview, Tex.
John Elmer, WCBM, Baltimore, Md.
Leo Fitzpatrick, WJR, Detroit, Mich.
John J. Gillin, Jr., WOW, Omaha, Neb.
Herbert Hollister, KANS, Wichita, Kans.
Robert Hudson, Rocky Mountain Radio Council, Denver, Colo.
William F. Maag, Jr., WFMJ, Youngstown, Ohio
Marshall Pengra, KRNR, Roseburg, Ore.
Fred Schilplin, KFAM, St. Cloud, Minn.
H. E. Studebaker, KUJ, KRLC, Walla Walla, Wash.
Art Thomas, WJAG, Norfolk, Neb.

The committee will meet at 6:30 p. m., Tuesday, April 27th, to discuss the subjects and to prepare a report for the Conference. Members of the industry are urged to send to any member of this committee their views.

Woodruff, who is a NAB director-at-large representing small stations, in addition to acting as chairman of the committee will also preside at the Thursday morning War Conference session at which these subjects will be discussed.

Labor

WAGE AND SALARY FREEZING

President Roosevelt on April 8 eliminated "inequalities" from the list of reasons for increasing wages or salaries—and thus eliminated the mainstay for most recent increases.

The only remaining grounds for increases are the "Little Steel" (15 per cent) formula and "substandards." Your guess is as good as the next one as to what constitutes a "substandard" wage or salary. The War Labor Board doesn't know.

The text of the President's statement and the accompanying executive order, elsewhere in this issue of the reports.

NAB PROTESTS IBEW AWARD

The NAB has asked the San Francisco Regional War Labor Board for permission to appear and to file a brief when the board considers an arbitration award in a controversy between Station KPAS, Pasadena, and the International Brotherhood of Electrical Workers.

The board has taken the NAB request under advisement.

In setting the new wage scale for KPAS, George Cheney, a Labor Department conciliator acting as arbiter, announced two principles which the NAB contends are wholly fallacious:

(1) **That the wages of broadcast technicians and building trades technicians are comparable.**

(2) **That all broadcast technicians do the same work, no matter what the size or condition of the station; and that all should receive equal pay.**

It is probable that Executive Order 9328, printed in this issue, will forestall board approval of the award, but the

(Continued on page 162)

Radio and The War

That's the principal business of the NAB Radio War Conference to be held April 27-29 at the Palmer House in Chicago. Broadcasting is a war weapon. The War Conference will give you pointers and ask your advice on how to wield it best in the cause of freedom.

NAB PROTESTS IBEW AWARD

(Continued from page 161)

NAB intends to proceed with its contest of the principles involved.

RELIEF TAX ABOLISHED

Members of Local 802, American Federation of Musicians, New York, voted Monday at a meeting in Carnegie Hall to abolish the 3 per cent tax which the union has levied on its working members for the last seven years to aid its unemployed musicians. **Increased employment was one reason advanced why the tax should be abolished.**

Of $752,904.49 collected for last year's relief and organizational fund, the 3 per cent tax accounted for $485,911.74, according to Local 802's official journal. The other methods of raising funds for unemployment relief will continue, it was said. In another vote yesterday the musicians defeated a resolution which would have limited a member to one steady job.

AFM PULLS OUT OF CTLC

The American Federation of Musicians has resigned from the Canadian Trades and Labor Congress because delegates to a recent congress convention in Winnipeg, including two members of the musicians' union, voted to let a children's orchestra entertain them.

The story of how the Canadian labor representatives "hooted down" the A. F. M. official who sought to object to the concert by the nonunion youth group, appears in the minutes of the federation's executive board meeting on February 6. The minutes are published in the new issue of The International Musician, the union's organ.

The minutes on the matter follow:

"Report is received from Brother Arthur Dowell of Toronto of an incident which happened at the convention of the Canadian Trades and Labor Congress held in Winnipeg recently, at which he was the official representative of the A. F. M.

'Out of Order'

"During one of the sessions of the convention, a children's orchestra played and when Brother Dowell attempted to object he was hooted down and declared out of order by the chairman.

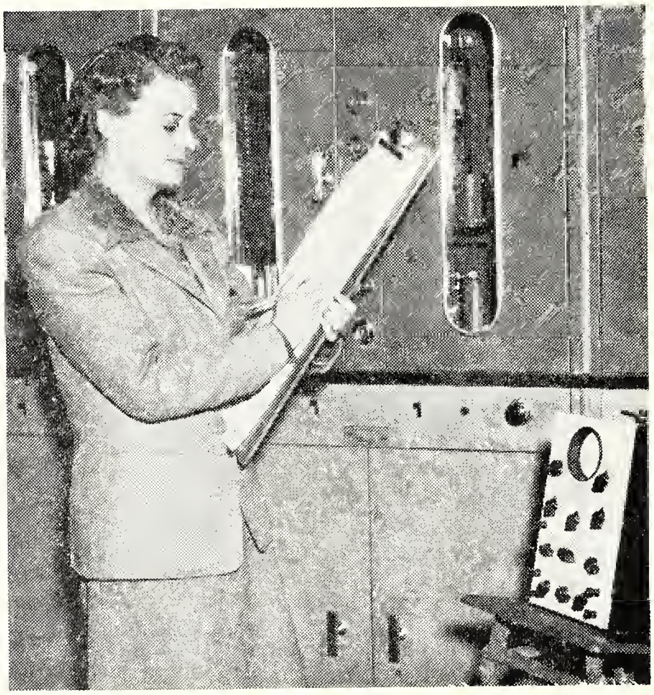
"On this occasion Brother D. Swailes of Local 190, Winnipeg, and Ed Jamieson of Local 145, Vancouver, spoke in favor of the children's orchestra and expressed disapproval of the position taken by Brother Dowell.

"In view of the treatment accorded our representative and the permitting of a non-federation orchestra to play at a trade union convention, the board, on motion, decides to resign from the Canadian Trades and Labor Congress.

"On motion, it is decided that Brothers Swailes and Jamieson be directed to show cause why charges should not be preferred against them for their attitude on this occasion."

YOU, TOO, CAN DO THIS!

Terry Teal



Mrs. Ruth Dorin

These women are full-time technicians employed by Station WRNL, Richmond, Va. Miss Teal operates the studio controls, while Mrs. Dorin takes a meter reading at the transmitter. They were trained first as part-time station personnel by the chief engineer and took the ESMWT courses at the same time. With the continually increasing war manpower needs draining technicians, station operators are urgently advised to undertake training of women. They are proving up as good as men and are turning in able performances, according to reports.

PLAUDITS GIVEN BY DAVIS

Bravery of American correspondents and enterprise of American communications and news media, including radio, were cited by Elmer Davis, director, OWI, with giving the American people "frank and complete information about the war."

In giving the roll of the correspondents killed and wounded in line of duty, Davis mentioned Don Bell, anti-Japanese radio news commentator in Manila, killed by occupying forces, and Frank Josef Cuhel, of MBS, killed in an overseas plane crash en route to cover a war assignment.

'SUBLINE FAITH'

(Reprinted from *Variety*)

Simon & Schuster, the book publisher, has discovered radio advertising produces customers with sublime faith in the advertiser. During the final lap for federal income tax returns, the publisher received filled-out tax forms with money attached, plus a note asking that the figures be checked and the contents relayed to the collector of internal revenue.

S. & S. had used spot radio to plug its $1 edition on how to make out the federal tax return, and some of the purchasers figured that the publisher wouldn't mind granting the additional service.

THE BEAM

Due to the current revision of the membership list of the Association of Women Directors of NAB, station operators who received The Beam with last week's reports are asked to pass it on to their women broadcasters as it will not be sent to the AWD list.

BMI TOP TUNES

(These songs currently are listed by Variety "sheets" as being among those most played on the air.)

BRAZIL—Southern Music Publishing Co.

DON'T CRY—National Music Co.

Listener Activity

DOROTHY LEWIS TOUR CUT SHORT BY FAMILY ILLNESS

Dorothy Lewis, on tour of southwestern and eastern cities for the Office of War Information and NAB, was forced to cut short her itinerary at Birmingham, Ala., because of the serious illness of her daughter. Mrs. Lewis missed stops at Atlanta, Winston-Salem, Richmond, Greensboro and Washington, D. C.

Following are reports of meetings Mrs. Lewis attended on the completed portion of her trip:

St. Louis

Meeting held March 29, with George Burbank, KSD, presiding. A planning committee was appointed to set up a Radio Council for the St. Louis area. The Association of Women Directors of St. Louis radio stations met during the morning and expressed the need of enlisting services of community leaders to help tell the war story and to create better local understanding of government directives.

Columbia, Mo.

Plans were made to establish a Radio Council of Columbia at a meeting at Stephens College with representatives of KFRU and Sherman Lawton, of Stephens College radio division, cooperating.

Kansas City, Mo.

On April 1 a luncheon was held at the Womens City Club with Mrs. George P. Truitt acting as chairman. A Radio Council plan was approved and Mrs. Truitt named temporary chairman, with Mrs. Marisha Pugsley as secretary. Both the Federation of Womens Clubs and the P.-T. A. Council (71 units), Mrs. R. L. Dominick, president, pledged support. Representatives from Topeka, Independence and Grand View were present. Dr. Clarence Decker, president, Kansas City University, offered cooperation. Radio station executives approved all proposed councill projects.

Tulsa, Okla.

A conference on children's programs was held with representatives of all local stations attending, followed by a luncheon at the chamber of commerce, April 2, at which Mrs. Lewis made the principal speech, "The Listeners Stake in American Radio." An afternoon meeting in KVOO's studios was held with station representatives from the three local stations voting to hold a Radio Council organization meeting later.

Oklahoma City, Okla.

Meeting was held April 3 at the YWCA with representatives from the four local stations and 12 civic and service organizations present. A Radio Council was approved with Dr. Alice Sowers of the University of Oklahoma and representatives of the Junior League and local P.-T. A. named to head a planning committee.

VICTORY VOLUNTEER WEEK

The President has proclaimed May 16 as "I Am An American Day." The program sponsored by the "I Am An American" Foundation provides for Victory Volunteer Week with days assigned as follows: Sunday, May 9, Churches; Monday, May 10, Labor; Tuesday, May 11, Management; Wednesday, May 12, Law Makers; Thursday, May 13, Schools; Friday, May 14, Organizations; Saturday, May 15, Farmers; Sunday, May 16, the climax of Victory Volunteer Week of Rededication when citizens of all ages, faiths and occupations are asked to join in the solemn pledge to give, to work, to sacrifice for victory and freedom, and to join in public "exercise designed to assist our citizens, both native-born and naturalized, to understand more fully the duties of citizenship and its special responsibilities in a nation at war."

Inquiries concerning Victory Volunteer Week should be addressed to Benjamin Neal, Taft Building, Los Angeles, California.

Materials

YOUR REPORT IS NEEDED

Information requested from stations on March 26 has been received from cities listed below. Included are several which reported after the bulletin-letter of April 14 was mailed.

It is our hope that the desired information will soon be received from all other cities not listed.

Information is reported en route from Cincinnati, Kansas City, Mo., Memphis, Philadelphia, Richmond, Southern California and Toledo.

Ohio Radio Institute

High point of NAB participation in the 14th Institute for Education by Radio, Ohio State University, April 30-May 3, at the Deshler-Wallick hotel, Columbus, will be at 8 p. m. Saturday, May 1, with Neville Miller presiding.

The Peabody awards will be presented at that time with Dr. S. V. Sanford, chancellor, University System of Georgia, making the presentations, and Earl Glade, of KSL, NAB code committee chairman, will speak on "What is the public interest, convenience and necessity?" as applied to radio.

Also participating in the various sessions from NAB will be Willard D. Egolf, assistant to the president; Lewis Avery, director of broadcast advertising; Howard S. Frazier, director of engineering, and Dorothy Lewis, coordinator of listener activity.

Under the general heading of "Radio in the War and After" the Institute breaks down into the following subsessions and meetings:

April 30

8 p.m. "Radio's Wartime Strategy," Arthur J. Klein, dean, college of education, Ohio State University, presiding.
10:15 p.m. "Meeting for Chairmen," I. Keith Tyler, director, Institute for Education by Radio, chairman.

May 1

9 a.m. "Problems of Wartime Operation," Howard L. Bevis, president, O.S.U., presiding.
10:45 a.m. "Problems of News Broadcasting," Harvey H. Davis, vice president, O.S.U., presiding.
12:15 p.m. "Religious Broadcasts Luncheon," Albert W. Palmer, president, Chicago Theological Seminary, chairman.
1:50 p.m. "Of Men and Books Demonstration," Wilfred Eberhart, assistant professor of education, O.S.U., chairman.
2 p.m. "Preparatory General Meeting."
2:30 p.m. "Agricultural and Homemaking Broadcasts," Maurice L. Du Mars, radio service, office of information, U. S. Department of Agriculture, presiding.
2:30 p.m. "Broadcasting by National Organizations," Tom Stewart, American Junior Red Cross, chairman.
2:30 p.m. "Children's Programs," Gloria Chandler, Association of Junior Leagues of America, chairman.
2:30 p.m. "Recordings for School Use," R. R. Lowdermilk, U. S. Office of Education, chairman.
2:30 p.m. "Research in Educational Broadcasting," H. B. Summers, manager, public service division, BLUE network, chairman.
2:30 p.m. "School Broadcasting," George Jennings, radio council, Chicago Public schools, chairman.
2:30 p.m. "College Courses in Radio," Albert Crews, radio department, Northwestern University, chairman.
2:30 p.m. "Music Broadcasts," Burton Paulu, manager station WLB, University of Minnesota, chairman.

5 p.m. "Documentary Reporting," T. C. Holy, bureau of educational research, O.S.U., presiding.

8 p.m. "In-School Broadcasting," Marguerite Fleming, radio workshop, South high school, Columbus, presiding.

8 p.m. "National Association of Broadcasters," Neville Miller, president.

8 p.m. "National Association of Educational Broadcasters," Gilbert D. Williams, program director, WBAA, Purdue University, presiding.

8 p.m. "National Association of Women Directors, NAB," Ruth Chilton, station WSYR, Syracuse, presiding.

8 p.m. "Teacher Education in Radio," Luella Hoskins, New York University, presiding.

8 p.m. "The Negro and Radio in Education," Walter N. Ridley, Virginia State College for Negroes, presiding.

8 p.m. "Radio Editors," Wauhilla La Hay, *Chicago Sun*, presiding.

8 p.m. "Public Health Broadcasts," David Resnick, National Society for the Prevention of Blindness, presiding.

May 2

9:30 a.m. (Saturday afternoon sessions continued.)

2:30 p.m. "Radio Interpreting a Region," W. W. Charters, War Manpower Commission, presiding.

3:30 p.m. "Radio and Manpower," Judith Waller, public service director, NBC, Chicago, presiding.

7 p.m. "Annual Institute Dinner," Sir Gerald Campbell, K.C.M.G., British minister and special assistant to the British Ambassador, speaker on topic "Developing Understanding Among the United Nations."

May 3

9:45 a.m. "Production Techniques," Kenneth W. MacGregor, program director, WGN, chairman.

9:45 a.m. "Promotion of Educational Programs," Jennings Pierce, public service manager, NBC, Hollywood, chairman.

9:45 a.m. "College Public Relations Broadcasting," Joseph F. Wright, station WILL, University of Illinois, chairman.

9:45 a.m. "Foreign Language Teaching by Radio," W. S. Hendrix, professor romance languages, O.S.U., chairman.

9:45 a.m. "Public Events Broadcasts in the War," John L. Carpenter, stations KOIN-KALE, chairman.

9:45 a.m. "Radio Writing Under War Conditions," Robert J. Landry, program writing director, CBS, chairman.

9:45 a.m. "Television and Education," Paul Thornton, educational department, RCA, chairman.

9:45 a.m. "Hate Propaganda and Its Effect Upon War and Peace," Carl Friedrich, director, Radiobroadcasting Research Project, chairman.

9:45 a.m. "Children's Program Idea Exchange," Harriet Hester, formerly with station WLS, chairman.

9:45 a.m. "Radio and Civilian Defense," B. H. Darrow, information officer, OCD, Cleveland, chairman.

9:45 a.m. "Teaching Radio Program Discrimination," Alice Sterner, Barringer high school, Newark, N. J., chairman.

2 p.m. "Radio and the Post-War World," Mr. Tyler, presiding.

Two pre-conference meetings on April 30 are:

"International Radio as a Means to Understanding," at 10 a.m. with Sterling Fisher, director, Inter-American University of the Air, presiding, and an informal tea for newcomers at 3 p.m. with Mr. Tyler, chairman.

USDA APPOINTS JARRETT

Henry Jarrett has been named assistant director of information, Department of Agriculture, in charge of press and radio. He succeeds Whitney Tharin who is resigning from the Government service to become Washington manager of the Agricultural News Service. Jarrett has served as reporter and copyreader on the *Baltimore Sun* papers. Since 1934, he has done press and radio work on the AAA and Department of Agriculture staffs. In 1941 he served as chief of press for the Department. For a time in 1942 he was on the staff of the *United States News*. He returned to the Department in 1942 as special assistant to the Secretary, from which position he returns to the Office of Information. Contacts formerly made with Tharin should be made now with Jarrett. W. K. Charles continues as chief of press and Wallace L. Kadderly as chief of radio.

STATEMENT BY THE PRESIDENT

The Executive Order I have signed today is a Hold-the-Line order.

To hold the line we cannot tolerate further increases in prices affecting the cost of living or further increases in general wage or salary rates except where clearly necessary to correct substandard living conditions. The only way to hold the line is to stop trying to find justifications for not holding it here or not holding it there.

No one straw may break a camel's back, but there is always a last straw. We cannot afford to take further chances in relaxing the line. We already have taken too many.

On the price front, the directions in the Order are clear and specific.

All items affecting the cost of living are to be brought under control. No further price increases are to be sanctioned unless imperatively required by law. Adjustments in the price relationships between different commodities will be permitted if such adjustments can be made without increasing the general cost of living. But any further inducements to maintain or increase production must not be allowed to disturb the present price levels; such further inducements whether they take the form of support prices or subsidies, must not be allowed to increase prices to consumers. Of course, the extent to which subsidies and other payments may be used to help keep down the cost of living will depend on Congressional authorization.

Some prices affecting the cost of living are already above the levels of September 15, 1942. All of these cannot be rolled back. But some of these can and should be rolled back. The Order directs the reduction of all prices which are excessively high, inequitable, or unfair. The Stabilization Act was not intended to be used as a shield to protect prices which were excessively high on September 15, 1942.

No Further Wage Increases

On the wage front the directions in the Order are equally clear and specific.

There are to be no further increases in wage rates or salary scales beyond the Little Steel Formula, except where clearly necessary to correct substandards of living. Reclassifications and promotions must not be permitted to affect the general level of production costs or to justify price increases or to forestall price reductions.

The Order also makes clear the authority of the Chairman of the War Manpower Commission to forbid the employment by an employer of any new employee except in accordance with regulations of the Chairman, the purpose being to prevent such employment at a higher wage or salary than that received by the employee in his last employment unless the change of employment will aid in the prosecution of the war.

It further calls the attention of all agencies of the federal government and of state and municipal authorities concerned with the rates of common carriers and public utilities to the stabilization program in the hope that rate increases will be disapproved and rate reductions ordered so far as may be consistent with federal and state laws.

For sometime it has been apparent that this action must be taken because of the continued pressure for increased wages and increased prices. I have heretofore refrained from acting because of the contention of the supporters of the Bankhead bill that under the Act of October 2, 1942, I had no authority to place ceiling prices on certain commodities at existing levels. My views on that question were set forth in my message of April 2, vetoing the Bankhead bill.

'Cannot Permit Upward Spiral'

The Senate did not vote upon the question of passing the bill over the veto. Its author moved to recommit the bill to the Committee on Agriculture, stating that there were not sufficient votes to override the veto.

I am advised that weeks or months from this date the bill may be reported for consideration. I am also advised that in the history of the Congress no bill vetoed by a President and recommitted to a committee has ever become law.

I cannot wait to see whether the Committee at some future date will again report the bill to the Senate. I cannot permit a continuance of the upward spiral of prices.

Some groups have been urging increased prices for farmers on the ground that wage earners have unduly profited. Other groups have been urging increased wages on the ground that farmers have unduly profited. A continuance of this conflict will not only cause inflation but will breed disunity at a time when unity is essential.

Under the Act of October 2, 1942, Congress directed that so far as is practicable, wages, salaries and prices should be stabilized as of the level of September 15. Under that direction inflation has been slowed up. Now we must stop it.

We cannot stop inflation solely by wage and price ceilings. We cannot stop it solely by rationing. To complete the job, Congress must act to reduce and hold in check the excess purchasing power. We must be prepared to tax ourselves more, to spend less and save more. The details of new fiscal legislation must be worked out by the appropriate committees of the House and the Senate. The executive departments stand ready to submit suggestions whenever the committees desire.

I am exerting every power I possess to preserve our stabilization program.

I am sure the Congress will cooperate.

EXECUTIVE ORDER

By virtue of the authority vested in me by the Constitution and the statutes, and particularly by the First War Powers Act, 1941, and the Act of October 2, 1942, entitled "An Act to Amend the Emergency Price Control Act of 1942, to Aid in Preventing Inflation, and for Other Purposes," as President of the United States and Commander in Chief of the Army and Navy, and in order to safeguard the stabilization of prices, wages and salaries, affecting the cost of living on the basis of levels existing on September 15, 1942, as authorized and directed by said Act of Congress of October 2, 1942, and Executive Order No. 9250 of October 3, 1942, and to prevent increases in wages, salaries, prices and profits, which, however, justifiable if viewed apart from their effect upon the economy, tend to undermine the basis of stabilization, and to provide such regulations with respect to the control of price, wage and salary increases as are necessary to maintain stabilization, it is hereby ordered as follows:

---

1. In the case of agricultural commodities the Price Administrator and the Administrator of Food Production and Distribution (hereinafter referred to as the Food Administrator) are directed, and in the case of other commodities the Price Administrator is directed to take immediate steps to place ceiling prices on all commodities affecting the cost of living. Each of them is directed to authorize no further increases in ceiling prices except to the minimum extent required by law. Each of them is further directed immediately to use all discretionary powers vested in them by law to prevent further price increases direct or indirect, to prevent profiteering and to reduce prices which are excessively high, unfair or inequitable. Nothing herein, however, shall be construed to prevent the Food Administrator and the Price Administrator, subject to the general policy directives of the Economic Stabilization Director, from making such readjustments in price relationships appropriate for various commodities, or classes, qualities or grades thereof or for seasonal variations or for various marketing areas, or from authorizing such support prices, subsidies or other inducements as may be authorized by law and deemed necessary to maintain or increase production, provided that such action does not increase the cost of living. The power, functions and duties conferred on the Secretary of Agriculture under section 3 of the Emergency Price Control Act of 1942 (Public Law 421, 77th Cong.) and under section 3 of the Act of October 2, 1942 (Public Law 729, 77th Cong.) are hereby transferred to, and shall be exercised by the Food Administrator.

---

2. The National War Labor Board, the Commissioner of Internal Revenue and other agencies exercising authority conferred by Executive Order No. 9250 or Executive Order 9299 and the regulations issued pursuant thereto over wage or salary increases are directed to authorize no further increase in wages or salaries except such as are clearly necessary to correct substandards of living, provided that nothing herein shall be construed to prevent such agencies from making such wage or salary readjustments as may be deemed appropriate and may not have heretofore been made to compensate, in accordance with the Little Steel Formula as heretofore defined by the National War Labor Board, for the rise in the cost of living between January 1, 1941 and May 1, 1942. Nor shall anything herein be construed to prevent such agencies, subject to the general policies and directives of the Economic Stabilization Director, from authorizing reasonable adjustments of wages and salaries in case of promotions, reclassifications, merit increases, incentive wages or the like, provided that such adjustments do not increase the level of production costs appreciably or furnish the basis either to increase prices or to resist otherwise justifiable reductions in prices.

---

3. The Chairman of the War Manpower Commission is authorized to forbid the employment by any employer of any new employee or the acceptance of employment by a new employee except as authorized in accordance with regulations which may be issued by the Chairman of the War Manpower Commission, with the approval of the Economic Stabilization Director, for the purpose of preventing such employment at a wage or salary higher than that received by such new employee in his last employment unless the change of employment would aid in the effective prosecution of the war.

---

4. The attention of all agencies of the Federal Government, and of all State and municipal authorities, concerned with the rates of common carriers or other public utilities, is directed to the stabilization program of which this order is a part so that rate increases will be disapproved and rate reductions effected, consistently with the Act of October 2, 1942, and other applicable federal, state or municipal law, in order to keep down the cost of living and effectuate the purposes of the stabilization program.

---

5. To provide for the consistent administration of this order and Executive Order No. 9250, and other orders

and regulations of similar import and for the effectuation of the purposes of the Act of October 2, 1942, the Economic Stabilization Director is authorized to exercise all powers and duties conferred upon the President by that Act, and the Economic Stabilization Director is authorized and directed to take such action and to issue such directives under the authority of that Act as he deems necessary to stabilize the national economy, to maintain and increase production and to aid in the effective prosecution of the war. Except insofar as they are inconsistent with this order or except insofar as the Director shall otherwise direct, powers and duties conferred upon the President by the said Act and heretofore devolved upon agenices or persons other than the Director shall continue to be exercised and performed by such agencies and persons.

---

6. Except insofar as they are inconsistent with this order, Executive Order 9250 and the regulations issued pursuant thereto shall remain in full force and effect.

Franklin D. Roosevelt.

The White House,
April 8, 1943.

Here Are a Couple of Roses

OFFICE OF PRICE ADMINISTRATION

Mr. Neville Miller, President,
National Association of Broadcasters,
Washington, D. C.

Dear Mr. Miller:

I wish to take this opportunity to express on behalf of the Office of Price Administration and myself the deepest appreciation for the fine public service rendered by your industry during the past few months in helping explain to the American people the essential facts concerning recent rationing programs instituted by this agency.

We in OPA have been faced recently with the problem of implementing complex rationing programs covering footwear, processed foods, and meats and fats. The task of instilling in the American people an understanding of (a) the reasons underlying these programs and (b) the mechanics of their operation has been a difficult one. In certain cases we have had to get information out to every household and to thousands of merchants with a minimum of delay. We turned, of course, to our system of free radio for aid in this important work.

The industry has responded magnificently. You have helped us in three principal ways: (a) Through your regular news broadcasts you have enabled us to get basic information out almost simultaneously; (b) through your commentators you have aided us in dissemination of explanatory material designed to secure wide understanding and acceptance of our programs; and (c) by making available time on your stations for myself and other OPA officials you have made it possible for us to make detailed explanations of OPA problems.

Your cooperation has proved to be a vital factor in the success of these "home front" measures which are related intimately to the winning of the war. For that we in OPA extend to you our grateful thanks and appreciation.

Sincerely yours,

Prentiss M. Brown.

TREASURY DEPARTMENT

April 15, 1943.

Mr. Art Stringer,
National Association of Broadcasters,
1760 N Street N. W.,
Washington, D. C.

Dear Mr. Stringer:

On behalf of the Treasury Department, we want to express to you and all associated with NAB our heartiest thanks for the invaluable cooperation given us in planning and publicizing RADIO DAY to launch the 2nd War Loan.

April 12, 1943 should go down in radio history as the greatest all-out cooperative effort ever accomplished by the industry. The Treasury Department is deeply grateful to the nation's broadcasters who gave so unsparingly of their time and effort to make Radio Day such a tremendous success. Since it is impossible personally to thank the thousands of people who contributed toward the radio launching of the 2nd War Loan, we hope that you will pass on to all your stations our sincere and heartfelt THANKS.

Sincerely

Vincent F. Callahan,
Director of Radio, Press and Advertising.

Marjorie L. Spriggs,
Chief, Radio Section, War Savings Staff.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, April 19th. They are subject to change.

Monday, April 19

Further Consolidated Hearing

To Be Held in Room 324, Old Post Office Building, Atlanta, Georgia

WALB—Herald Publishing Co., Albany, Ga.—Renewal of license, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Voluntary assignment of license, station WALB, **1590 kc.,** 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.,** 1 KW, DA-night, unlimited.

Tuesday, April 20

Further Hearing

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Renewal of license (main and auxiliary), **1520 kc.,** 50 KW, unlimited, DA-day and night.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Renewal of license (main and auxiliary), **550 kc.,** 1 KW night, 5 KW day, unlimited, DA-night.

Wednesday, April 21

WMAN—M and M Broadcasting Co., Marinette, Wis.—Modification of license, **570 kc.**, 100 watts night, 250 watts day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

LICENSE RENEWALS

WBRW—McDowell Service Company, Welch, W. Va.—Granted renewal of license for the regular period (B2-R-1086).

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.; KSFO, The Associated Broadcasters, Inc., San Francisco, Calif.—Granted renewal of license for station KQW for the period ending February 1, 1944, authorizing unlimited time operation on **740 kc.** with 5 KW, using directional antenna. The Commission also adopted Decision and Order denying without prejudice the applications for construction permits of KQW and KSFO, and ordered that Proposed Findings of Fact and Conclusions of the Commission (B-162), except for paragraph 7 thereof, be adopted as the Findings of Fact and Conclusions of the Commission.

W1XTG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted license for Class 2 Experimental Broadcast Station, the same to conform with that dated July 16, 1940, except as follows: (1) antenna supporting structure to be painted and lighted in accordance with Specification 'B' (to conform to requirements issued WTAG for the structure); and (2) transmitter to be described as General Electric Type GF-101-A (to conform to a cross index filed by the manufacturer); and (3) for the term beginning the date of grant and ending April 1, 1944.

KGDM—E. F. Peffer, Stockton, Calif.—Granted license (B5-L-1759) to cover construction permit (B5-P-3199 as modified), for change in frequency to **1140 kc.**, hours of operation to unlimited, increase in power to 5 KW, installation of directional antenna for night use, and new transmitter; also authority to determine operating power by direct measurement of antenna power (B5-Z-1510).

MISCELLANEOUS

KRED—Redwood Broadcasting Co., Inc., Portable-Mobile, area of Eureka, Calif.—Granted license to cover construction permit for new relay broadcast station (B5-LRY-290).

APPLICATIONS FILED AT FCC

1340 Kilocycles

WDAK—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen and Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—Construction permit to move transmitter and studio from General Tyler Hotel, West Point, Georgia, to 1028½ Broadway, Columbus, Georgia.

1460 Kilocycles

KINY—Edwin A. Kraft, Juneau, Alaska.—Modification of construction permit (B-P-3089, which authorized increase in power and changes in equipment and antenna) for change in frequency from **1460** to **1050 kc.**, changes in transmitting equipment, and extension of commencement and completion dates from 9-9-41 and 3-9-42 to 20 days after grant and 30 days thereafter, respectively. Amended: to install new transmitter, omit request for change in frequency, and extend commencement and completion dates from 9-9-41 and 3-9-42 to 10 days after grant and 90 days thereafter, respectively.

1470 Kilocycles

WCBA—Lehigh Valley Broadcasting Co., Allentown, Pa.—Authority to determine operating power by direct measurement of antenna power.

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Authority to determine operating power by direct measurement of antenna power.

TELEVISION APPLICATION

W8XCT—The Crosley Corporation, Cincinnati, Ohio.—Modification of construction permit (B2-PVB-23, as modified and which authorized new television station) for extension of completion date from 4-28-43 to 10-28-43.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

No complaints were issued by the Federal Trade Commission last week.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Garment Box Manufacturers Association and its members and officers, all of New York City, have been ordered to cease and desist from fixing prices and engaging in other restraint-of-trade practices in connection with the sale of garment boxes. The association members are assemblers of garment boxes, their volume of sales constituting a substantial part of all such products sold in the United States. (4777)

Grabosky Brothers, cigar manufacturers with plants at Philadelphia and Perth Amboy, N. J., have been ordered to cease and desist from violation of the Robinson-Patman Act in the sale of their products. (4740)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Bond Stores, Inc., 261 5th Ave., New York, operating manufacturing plants at Rochester, N. Y., and New Brunswick, N. J., and retail stores in various cities, has entered into a stipulation to cease and desist from certain representations in connection with the sale of men's clothing. (3632)

Boomer's Mail Order Service, 815 County St., Portsmouth, Va., engaged in the sale of a coal tar hair dye designated "Blackstone Hair Coloring," entered into a stipulation to cease and desist from representing that the product restores hair to its natural color and that it is safe and harmless. According to the stipulation, the preparation contains ingredients which may cause skin irritation on certain individuals. (03097)

Buenger Pharmacal Co., 1441 Welton St., Denver, have entered into a stipulation to cease and desist from representing that the medicinal preparation it sells under the name "Me-Ba" will relieve or cure gas pains, indigestion, heartburn or ulcers or that it goes to the cause of disorders of the stomach. (03096)

Chicago Mail Order Co., 511 South Paulina St., Chicago, engaged in selling medicinal preparations designated "Security Suppositories" and "Stillman's Suppositories," has stipulated to cease and desist from representing by use of the designation "security," or by any other means, that the preparation designated "Security Suppositories" gives security or complete protection against conception or that its preparations are non-irritating to normal vaginal tissues. (03099)

Consolidated Royal Chemical Corporation, 544 South Wells St., Chicago, selling a preparation designated "Krank's Hair Oil," and Benson & Dall, Inc., an advertising agency disseminating advertisements for the product, have stipulated to cease representing that "Krank's Hair Oil" will stop dandruff; that it is a cure or remedy for dandruff or has therapeutic value in the treatment of dandruff in excess of the removal of dandruff scales; that it will stop falling hair or early baldness; that it will promote the development of a good head of hair, or that Krank's Hair Oil will have any therapeutic value in the treatment of irritation of the scalp in excess of affording relief from minor irritation due to the presence of dandruff scales. (03098)

Cravenette Company, U. S. A., Hoboken, N. J., selling and distributing a compound or preparation designated "Cravenette" for use as a treatment for fabrics, has stipulated that, in connection with the sale of its product or of any other preparation of substantially the same ingredients, it will cease and desist from the use of representations, "SHEDS RAIN—SNOW—SLEET," "Won't Get Soggy," or from any other statement or representation of like meaning. (3630)

A. C. Horn Company, Horn Bldg., Long Island City, N. Y., selling and distributing alleged waterproofing and dampproofing materials, including products designated "Colorundum," "Dehydratine," "Ferro-Fax," "Hydratite" and "Metalon," has entered into a stipulation in which it agrees to discontinue use of the words "waterproof," "waterproofing," "watertight," "dampproofing" or other words of like meaning as descriptive of such products; provided, however, that if the product or products are effective waterproofers or dampproofers under certain conditions, then such words may be used if immediately accompanied in equally conspicuous type, by such words as will definitely and truthfully disclose the conditions or condition under which such products are effective for the purposes represented. (3628)

Jessop Steel Co., 534 Green St., Washington, Pa., stipulated that it will cease and desist from making any statement or representation which may tend to convey the impression that certain of its steel products designated "Silver-Ply Stainless-Clad Steel" are made of or are plated with silver or silver-ply. (3630)

Thomas Martindale & Co., 25 North Tenth St., Philadelphia, selling a medicinal preparation designated "Thomas Lecithin Capsules with Vitamin D." has stipulated to cease representing that the preparation will be beneficial in the treatment of nervous exhaustion, nervous headache, nervous insomnia, nervousness, or the symptoms of nervousness such as irritability or loss of temper; that it will increase "nerve energy" or is "brain food," or that the preparation, if used as directed, will furnish the average minimum daily requirement of phosphorus. (03101)

Milkmaid, Inc., 647 Fifth Ave., New York, and Lorr Laboratories, 200 Godwin Ave., Paterson, N. J., selling various cosmetics under the brand name of "Milkmaid," and The H. M. Kiesewetter Advertising Agency, Incorporated, 9 East 40th St., New York, advertising agency which disseminated advertisements for the products, have stipulated to cease representing that Milkmaid cosmetics will nourish the skin or that the cosmetics designated "Milkmaid Emulsion" contains milk or cream. The respondents also agree to cease and desist from use in the brand name of the cosmetic designated "Milkmaid Emulsion" or the word "Milkmaid" unless in direct conjunction therewith it is stated that the preparation does not contain milk. (03100)

Richman Brothers Co., Cleveland, Ohio, has been ordered to cease and desist from misrepresentation in the sale of men's clothing which it manufactures and distributes through 62 retail stores it operates in 57 cities. The respondent company also does a mail order business and employs some 600 salesmen. (4844)

United Sales Co., selling and distributing novelty jewelry stipulated that it will cease representing as the customary or regular prices of any article of jewelry, prices that are fictitious and in excess of the prices at which such products are regularly offered for sale and sold; using the words "REPLICA DIAMOND RINGS," "REPLICA GEMS" or other words of like meaning as descriptive of any ring inset or other product which is not in fact a true reproduction of the inset or gem named, that is to say, an article having the essential hardness, properties, and other characteristics of a diamond or other gem; using the terms "14 K Gold Plated," "14-KT Gold Finish" or "14-K Finish" or other term of like meaning as descriptive of a gold alloy covering which is not of actually 14 carat fineness and which is not of such substantiality as properly to be designated or described as "14 K Gold Plated"; representing that his jewelry is "high-quality," that its quality is such as to withstand tests by acid or fire or that it is acid proof; using the statement "Social leaders, millionaires and our finest people wear these . . ." or other representation of like meaning, or representing that he is directly cooperating with manufacturers in the sale of such jewelry or that he represents any jewelry manufacturer in the sale and distribution of merchandise. Elmer Davis to Address NAB War Conference

(Released by NAB News Bureau April 19)

Elmer Davis, director of the Office of War Information, will be one of four keynote speakers at the NAB War Conference at the Palmer House, Chicago, April 27-29.

In accepting the NAB invitation, Davis said: "It is a pleasure to address the War Conference of the National Association of Broadcasters. The industry has given great service to the war effort and I am confident that service will be continued."

As previously announced, James Lawrence Fly, Federal Communications Commission chairman, and Byron Price, director of the Office of Censorship, also will address the conference. The fourth speaker, a high ranking military officer, must remain anonymous until the day he speaks, for security reasons.

Supplementing these four speakers will be prominent men from civilian, government and military ranks. Included among broadcasters who will address the conference are William S. Paley, president, Columbia Broadcasting System; Dr. James R. Angell, public service counsellor, National Broadcasting Company, and Lindsay Wellington and William M. Newton, of British Broadcasting Corporation.

Doctor Angell, commenting on the conference, said: "There is no part of our national war activity to which radio has not made significant contributions, many of them invaluable. On the battle front and the home front alike, its voice is constantly heard bringing information, encouragement and good cheer to all."

AGENDA NAB Radio War Conference

Monday, April 26—Pre-Conference

9:00 A.M—Registration
10:30 A.M.—Sales Managers Committee

3:00 P.M.—Labor, Wage and Hour Committees
4:00 P.M.—BMI Board
7:00 P.M.—NAB Board of Directors (past and present) Supper

(Continued on page 172)

Job Freezing

Unless and until Paul McNutt changes his mind, radio employees cannot change jobs for higher pay without the permission of the War Manpower Commission. This permission, it is said, will be hard to get.

Mr. McNutt's order provides the answer to one of the country's greatest problems: inflationary bidding in the labor market.

Needless to say, the labor unions are against it and are making strenuous efforts to get Mr. McNutt to weaken. The unions are finding a great deal of support from those employers who would rather outbid other employers for trained men than train men themselves. Such a combination may wear Mr. McNutt down. If they do, wage and salary stabilization just won't work, and you'd better hold your hats, boys, for an inflationary ride that will make Mr. Morgenthau's "phoney dollar" seem, in retrospect, sound as the Rock of Gibraltar.

If the order sticks, it should stimulate interest in training plans to a degree that up to now has not even been dreamed of.

Here are (1) the text of Mr. McNutt's order, (2) Mr. McNutt's explanatory statement, and (3) a list of the 66 cities in which there are employment stabilization plans in effect (not to be confused with the labor shortage list). The stabilization list is important because hiring must be done in accordance with those plans in those cities. Elsewhere, the WMC must be consulted. *To play safe, consult your local WMC officials before hiring anyone* who has been working at another station or in another essential industry.

REGULATIONS OF WAR MANPOWER COMMISSION RESTRICTING TRANSFER OF WORKERS

(Official Text)

TITLE 29—LABOR

CHAPTER VII—WAR MANPOWER COMMISSION

PART 904—RESTRICTING TRANSFER OF WORKERS

(Regulation No. 4)

Pursuant to the authority vested in me as Chairman of the War Manpower Commission by Executive Order No. 9328, dated April 8, 1943, I hereby prescribe the following regulation:

904.1 *Workers Previously Engaged in Other Than Essential Activities for Work in Essential Activities.* Any employer engaged in an essential activity may hire for work in such activity any new employee who for the preceding 30 days was not engaged in an essential activity.

904.2 *Workers Previously Engaged in Essential Activities for Work in Other Than Essential Activities.* No

JOB FREEZING

(Continued from page 171)

employer shall hire for work in an activity other than an essential activity any new employee who, during the preceding 30-day period, was engaged in an essential activity if the wage or salary rate to be paid by the employer would exceed the rate most recently earned by such employee.

904.3 *Workers Previously Engaged in Essential Activities for Work in Other Essential Activities.* No employer shall hire (except as provided for in Section 904.4 of this regulation) for work in an essential activity any new employee who, during the preceding 30-day period, was engaged in an essential activity if the salary or wage rate to be paid by the employer would exceed the rate most recently received during such period by the employee.

904.4. *Workers Previously Engaged in Essential Activities for Work in Other Essential Activities in Areas or Industries Subject to War Manpower Commission Employment Stabilization Program.* (a) Any employer engaged in an essential activity may hire for work in such activity any new employee who, during the preceding 30-day period, was engaged in an essential activity, without regard to his preceding wage rate or salary scale, providing such hiring is subject to, and permitted under an employment stabilization program approved by the War Manpower Commission. (b) A statement of availability shall be issued to any worker by his last employer or by the War Manpower Commission as may be provided in such employment stabilization programs and whenever the worker:

(1) is discharged by his last employer,
(2) is laid off for an indefinite period or for a period of 7 or more days, or
(3) can establish that his present employment does not utilize him at his highest skill or that he is not being employed at full time.

No statement of availability shall be issued solely on the ground that an individual's wage or salary rate is substantially less than that prevailing in the locality for the same or substantially similar work.

Any such statement shall contain the worker's name, his social security account number, if any, the name and address of the issuing employer or War Manpower Commission officer and office, the date of issuance, and a statement to the effect that the worker may be hired elsewhere in an essential activity. The inclusion by an employer on such notice of any information other than that required by this regulation shall be deemed to be a violation of this regulation.

904.5 *Acceptance of Employment by Workers.* No individual shall accept new employment with an employer if the employer is prohibited from hiring him under this regulation.

904.6 *Penalties.* The hiring by an employer of a new employee, or the acceptance by an individual of new employment, in violation of this regulation is subject to the penal provisions of the Act of October 2, 1942 (Pub. No. 729, 77th Cong.). The provisions of Sec. 4001.10 of the Regulations of the Economic Stabilization Director, issued October 27, 1942, apply to any wages or salaries paid in violation of this regulation.

904.7 *Definitions.* (a) *Essential activity* means any activity in the War Manpower Commission List of Essential Activities (see Appendix A) and any activity approved by a Regional Manpower Director as a locally needed activity.

(b) *New employee* means any individual who has not been in the employ of the hiring employer at any time during the preceding 30-day period.

(c) *New employment* means employment with an employer by whom the individual has not been employed at any time during the 30-day period preceding such employment.

904.8 *Employee-Employer Agreements.* Nothing in this regulation shall be construed to prejudice existing rights of an employee under any agreement with his employer.

904.9 *Effective Date.* This regulation shall become effective at 12:01 a.m., Sunday, April 18, 1943.

(Signed) PAUL V. MCNUTT,
Chairman,
War Manpower Commission,
April 16, 1943.

Approved:

JAMES F. BYRNES (Signed)
Economic Stabilization Director,
April 16, 1943.

STATEMENT OF WAR MANPOWER COMMISSION CHAIRMAN EXPLAINING JOB-TRANSFER REGULATIONS

(Official Text)

Opening Statement of Mr. McNutt at Press Conference of Saturday, April 17

These regulations are a sincere attempt on my part to fulfill the intention of Section 3 of the Executive Order issued by the President on April 8. The extent of that Section, as we have interpreted it, is exactly what it says—to prohibit the transfer of workers for higher pay except as such transfers are in interest of the war effort.

For some time the War Manpower Commission has been promoting voluntary control over transfer of workers through what is known as Employment Stabilization Plans. The basic purpose of these plans is to see that workers are placed in positions which will fully utilize their skills to the best interests of the war effort.

These plans spell out those conditions of transfer which are in the interests of the war effort. In general, they say specifically that workers cannot transfer from one essential activity to another except with statements of availability issued by the employer or the local War Manpower authorities.

It is therefore natural that I should look to these stabilization plans as the means for determining that transfers involving differences in pay are in the interest of the war effort.

There are now in operation over 60 of these stabilization plans and they are increasing in number each week. At this moment several are in process of development. They are all in areas where the labor shortages are critical and by that I mean Groups I and II.

Paragraph 904.1 deals with the movement of workers from other than essential activities into essential activities. You will notice this movement is permitted without regard to wages, as it is at present. The reason for the 30-day period is to prevent workers from leaving an essential activity, working in an other than essential activity for two or three days and then moving from there back into some essential activity at a higher wage. The reason we are not restricting this movement into essential activity is because such movement is in the interest of the war effort and should be encouraged.

Paragraph 904.2 deals with workers transferring from essential activities into other than essential activity. This is not in the interest of the war effort, therefore no such transfers are permitted at an increase in pay. It should be indicated that while such transfers are not desirable, they are not prohibited at equal pay.

Paragraph 904.3 deals with movement between essential activities. Such movement is not permitted when an increase in pay is involved, except as provided in 904.4. This movement between essential activities for no other reason than to receive higher pay is one of the most serious and wasteful forms of labor turnover now prevalent.

Paragraph 904.4 is also concerned with the movement of workers from one essential activity to another. It permits transfers at higher pay when such transfers are in the interest of the war effort, provided they are made in accordance with the provisions of the local employment stabilization plans.

It should be explained that a "Statement of Availability" is synonymous with a "Certificate of Separation" which is the term used in some plans.

You will notice in the last sentence of Section 904.4 it says that the employer cannot place on the Statement of Availability any informatoin other than required. The reason for this is to protect the employee against prejudicial information that has no bearing whatever on the case.

Paragraph 904.5 makes the employee equally liable with the employer for transfer not in accordance with these regulations.

The rest of the document needs no elaboration at this time. I am perfectly willing, however, to answer any questions. I would like to point out that the reason for making it effective on Sunday morning is to give workers and employers an opportunity to read it carefully and understand it better, thereby avoiding confusion that might be created by quick headline reading on a work day morning.

We have endeavored to write these regulations in the simplest of terms. They mean exactly what they say and I am now open to any questions that you may have. (END OF OFFICIAL TEXT).

WAR MANPOWER COMMISSION EMPLOYMENT STABILIZATION PLANS NOW IN EFFECT

(Official Text)

(Following is the latest War Manpower Commission listing of areas in which employment stabilization plans are in operation.)

I. AREA PLANS

(Total: 66)

Region I

Massachusetts
- New Bedford
- Fall River
- Springfield

Connecticut
- Waterbury

New Hampshire
- Portsmouth

Region II

New York
- Albany
- Buffalo
- Rochester
- Syracuse
- Utica-Rome-Herkimer

Region III

Covered by region-wide stabilization policy. Non-piracy agreement in effect in northern New Jersey area (Newark Plan).

Region IV

Maryland
- Baltimore
- Cumberland
- Hagerstown

Virginia
- Hampton Roads

Region V

Ohio
- Akron
- Canton
- Cleveland
- Hamilton-Warren County
- Lima
- Lorain
- Mercer County
- Portage County
- Sandusky
- Sidney-Piqua-Troy
- Springfield
- Toledo
- Warren-Niles
- Youngstown

Michigan
- Battle Creek
- Bay City-Saginaw-Midland County
- Detroit
- Grand Rapids
- Muskegon
- Monroe County
- Pontiac
- Port Huron

Region VI

Illinois
- Rockford
- Springfield-Decatur

Wisconsin
- Milwaukee

Indiana
- Evansville
- Indianapolis
- South Bend-La Porte-Michigan City

Region VII

Alabama
- Mobile-Gulf Coast

Georgia
- Savannah-Brunswick

Florida
- Tampa

Region VIII

Iowa
- Des Moines

Minnesota
- Twin Cities

Nebraska
- Omaha

Region IX

Kansas
- Wichita

Missouri
- Kansas City
- St. Louis

Oklahoma
- Oklahoma City

Region X

Texas
- Beaumont

Region XI

Colorado
- State of Colorado

Wyoming
- Cheyenne Area

Utah
- Industrial Area I

Region XII

California
- Los Angeles
- San Diego

Oregon
- Portland

Nevada
- State of Nevada

Arizona
- State of Arizona

Washington
- State of Washington

INDUSTRY PLANS

(Total: 4)

Rainwear Clothing Allied Industries—Greater Boston
Thermometer Industry—New York
Non-Ferrous Metals and Lumbering—Regions X, XI, XII
Shipbuilding—Head of the Lakes Area
Bay Area, San Francisco

WHITE-WHEELER BILL HEARINGS

Hearings on the White-Wheeler Bill (S. 814) to amend the Communications Act have been scheduled to begin on Thursday, May 6. Decision was made at a meeting last Friday of the Subcommittee of the Interstate Commerce Committee, attended by Senators Wheeler, Chairman, White and Hill. [The subcommittee is composed of Burton K. Wheeler (D-Mont), Chairman, Lister Hill (D-Ala), D. Worth Clark (D-Idaho), Wallace H. White, Jr., (R-Maine) and Warren R. Austin (R-Vt).]

It is understood that the record of the hearings on the Sanders Bill will be incorporated by reference into the record of the subcommittee hearings, and that testimony on the sections of the bill corresponding to those in the Sanders Bill will be held down to the minimum necessary. The hearings will go on irrespective of the decision in the Network Cases, it is reported, there being a feeling in certain quarters that amendment of the section covering network regulation will be necessary in any event. Decision in the Network Cases is expected to be handed down when the Court reconvenes May 3.

EDGAR BILL NAMED CHAIRMAN OF PUBLIC RELATIONS COMMITTEE

(Released by NAB News Bureau, April 19th.)

Washington, D. C., April 20.—Edgar Bill, president of radio station WMBD, Peoria, Ill., co-author of the National Association of Broadcasters' code of ethics, has been named chairman of NAB's public relations committee, Neville Miller, NAB president, announced today.

Other members of the newly-appointed committee are:

Kern Tipps, manager, KPRC, Houston, Texas; Craig Lawrence, vice-president and general manager, Iowa Broadcasting Co., Des Moines; John F. Patt, general manager, WGAR, Cleveland, Ohio; Leslie Joy, general manager, KYW, Philadelphia, Pa.; Edgar H. Twamley, director, WBEN, Inc., Buffalo, N. Y.; Frank M. Russell, vice-president, NBC, and Dr. Frank Stanton, vice-president, CBS.

First meeting of the committee will be held at the NAB War Conference, Monday, April 26, at 2 p. m.

The NAB public relations plan will be discussed and implemented at this meeting as adopted by the NAB board of directors in October, 1942, under direction of Willard D. Egolf, NAB assistant to the president.

MILLER CRITICIZES FOOD CONFERENCE NEWS BAN

(Released by NAB News Bureau, April 20th.)

Criticizing the barring of radio newscasters and the press from the United Nations Food Conference at Hot Springs, May 18, Neville Miller termed the action "a serious mistake."

His statement follows:

"I believe a serious mistake has been made in barring radio newscasters and the press from the United Nations Food Conference at Hot Springs, Virginia, May 18th. This conference is of great importance to civilians and is not military in character.

"Working under voluntary censorship, radio and the press have demonstrated that they can be relied upon not to release information giving aid and comfort to the enemy. The right of the people to the remainder of the information coming out of such a conference must not be abridged."

FLY WANTS TELEVISION PATENTS AVAILABLE TO ALL

It is possible that at the end of the war some of the more valuable television patents may be in the hands of the government itself, FCC Chairman James Lawrence Fly said at a press conference early this week, discussing the television situation.

"On the whole I would hope", said the Chairman on this subject, "we will find some feasible way to make all of the patents available to everybody interested in the production of television equipment. I don't want to stick my neck out any further at this time, but that is something we hope to see in the future."

The television situation came up at the conference when one of the newsmen suggested that recently there has been considrable talk about television and that there will be a monopoly by two or three companies once television finally gets going after the war. To this question Mr. Fly said that he was not prepared to talk at any length on that subject but "when you say that patents would be controlled by two or three companies that are heaviest in the research would naturally come off with the predominant number of patents, though there will be important patents in the hands of other concerns."

WPB STOPS TUBE HOARDING

"Tube for tube" and "radio part for part" are the rules which hereafter will govern the repair of radio sets.

Limitation Order L-265, issued today by the War Production Board, requires that the owner of a radio set turn in an old part when he buys a new one or when a new one is installed by a repair man. It makes exception, however, for cases in which the return of a part is impractical.

In issuing the order, WPB officials emphasized that owners of radio sets need not secure priority ratings to replace old parts. In some localities repair men demand such unobtainable ratings in order to sell more expensive servicing.

WPB officials said that dealers should be able to supply tubes and other radio parts to their customers as old ones are turned in. Existing shortages will be remedied as manufacturers concentrate production on types most in demand and, by exchanging tubes among themselves, round out their own stocks and those of their dealers.

The order makes allowance for rural set owners who can buy only by mail and for those who have lost the part which is to be replaced. Such a buyer must "certify that the part(s) specified on this order are essential for presently needed repair of electronic equipment which I own or operate."

The radio repair man or dealer must collect a part or certificate when he sells a part to a consumer, but need not pass that part along to his supplier. Instead, he must certify that he has collected either components of the kind being ordered or certificates for them. Such certification must be made both by the repair man who sells a part to an owner of a set and by the supplier who sells to a repair man or to another jobber. Dealers must take used parts to scrap heaps or salvage stations within sixty days of receiving them.

WPB officials pointed out that the dealer is free to develop his own bookkeeping system in balancing the receipt of parts and certificates against purchases. They stated that the order will be enforced through checks made in the field. Records of sales and purchases must be kept. In most cases, this will not require changes in bookkeeping practice, officials said.

The order applies generally to electronic equipment, radios and phonographs, but exceptions are made to permit the sale of entire radio sets, phonographs and sound motion picture projectors completed before today. Hearing aid devices, electric batteries and power and light equipment are not covered by the order. L-265 supersedes L-44 and L-44a, incorporating the prohibitions of those orders against the manufacture of new radio sets, phonographs and the like.

The order also supersedes L-183, which required a minimum rating of A-3 for transfers by manufacturers of electronic equipment, and raises this rating to A-1-a. However, purchases against parts or certificates do not require ratings. L-265 prohibits the manufacture of electronic equipment, except to fill orders of the Services, orders rated AA-4 or higher, or to the extent that the manufacturer has received his materials under the Controlled Materials Plan.

NATIONAL AND INTER-AMERICAN MUSIC WEEK

Broadcasters are asked to play the national anthem at noon each day during National and Inter-American Music Week in a letter addressed to the National Association of Broadcasters by C. M. Tremaine, Secretary:

"It has been suggested that all the broadcasting stations broadcast the national anthem at noon each day of National and Inter-American Music Week, May 2-9. Our Committee feels that this would be particularly appropriate this year, when Music Week is cooperating so actively in the war effort by appealing to millions of music lovers and all the friends of music to purchase War Bonds during the seven-day celebration. The 1943 observance is also made the occasion to further the use of music in speeding up production in munitions plants, and relaxing and refreshing tired nerves, building morale among the general public, in training camps and in active service on the many battle fronts in distant lands.

"The Star-Spangled Banner is always inspiring, but when played during Music Week it emphasizes the close association between patriotism and music in uniting the spirit of the nation.

"It is my hope that all the broadcasting stations will wish to give their full cooperation in carrying out the above suggestion and that it will enlist your sympathetic interest.

"Enclosed you will find President Roosevelt's 1943 letter to our Committee. Last year 47 governors issued Music Week proclamations or gave out public statements to the press urging their citizens to participate, and we believe an equal number will do so this year."

RED CROSS THANKS RADIO

Norman H. Davis, Chairman of the American Red Cross, addressed the following letter to Neville Miller. It is released for use on the air or in industry and station publications, if desired, along with the letters from O.P.A. and the Treasury Department, released last week.

Dear Mr. Miller:

The American Red Cross has surpassed its 1943 War Fund goal of $125,000,000 and I take this opportunity to thank you and the broadcasters in your Association for the outstanding cooperation and active assistance which was a prime factor in making our campaign a success.

Despite the strain of many additional program activities made mandatory by the war, preliminary reports indicate that radio stations and networks during March gave the Red Cross War Fund Campaign the greatest support ever given a private fund-raising effort.

The splendid cooperation so spontaneously given by the broadcasters and other public service media and the way the nation as a whole rallied to our call shows beyond a doubt that the American Red Cross has the confidence and support of all the people. We hope that you will relay to your members, and through them to the public, assurance that the Red Cross will strive to merit that faith by carrying out with added zeal the humane work assigned to it by the Congress, the Armed Forces and the people.

Sincerely yours,

NORMAN H. DAVIS
Chairman

LABOR BOARD ELECTIONS

Employers who may think about talking with their employees before an NLRB election should read Judge Learned Hand's decision in NLRB v. American Tube Bending Co. (Second Circuit Court of Appeals, April 5). In this case, the employer was held to have been within his rights in both talking with and writing to his employees about the election issues because he neither threatened the employees with reprisals if the union won the election nor had any "anti-union" record into which the speech and letter would fit.

EDUCATIONAL ORGANIZATION

New York City network and station executives and educators, at a meeting Saturday, April 17, decided to form a metropolitan chapter of the Association for Education by Radio. Group met at the home of Mrs. Dorothy Lewis, NAB Coordinator of Listener Activities. Major Harold W. Kent, president of the Association, and of the Public Relations Department of the War Department, attended. Meeting appointed a planning committee which will confer Thursday, April 22, at Town Hall Club dinner, to shape policy and set up a program of activities. Association is having its annual meet, April 30-May 3 at Columbus, Ohio.

Members of the planning committee for the metropolitan area are as follows: Jane Monahan, Radio Director of the New York City Public Schools; Robert McDougal, radio director of New Jersey State Teachers College, Trenton, N. J.; Grace Johnson, Director of Women's Activities of the Blue Network; Mrs. Henriette Harrison, National Radio Director of the YMCA (sic); Leon Levine, assistant director of education at CBS; Mrs. Dorothy Lewis; Madge Dower, assistant to Miss Monahan; James McAndrew, Radio Co-ordinator for the New York School Board of Education, WNYC, New York; and Harold McCarty, OWI, New York.

NEW LIBEL LAW

The new libel law enacted by the Legislature of the State of Washington and approved March 20, 1943, appears as Chapter 229, Laws 1943. The Act:

AN ACT relating to the broadcast of defamatory matter over the facilities of radio or television broadcasting stations.

Be it enacted by the Legislature of the State of Washington:

Section 1. Where the owner, licensee, or operator of a radio or television broadcasting station, or the agents or employees thereof, has required a person speaking over said station to submit a written copy of his script prior to such broadcast and has cut such speaker off the air as soon as reasonably possible in the event such speaker deviates from such written script, said owner, licensee, or operator, or the agents or employees thereof, shall not be liable for any damages, for any defamatory statement published or uttered by such person in or as a part of such radio or television broadcast unless such defamatory statements are contained in said written script.

Section 2. Nothing herein contained shall be construed as limiting the liability of any speaker or his sponsor or sponsors for defamatory statements made by such speaker in or as a part of any such broadcast.

Section 3. This act shall not be applicable to or affect any cause of action existing at the time this act becomes effective.

STATE LEGISLATION

MASSACHUSETTS:

H. 1540 (Reported on H. 428) LIBEL—Bill prohibiting the libel of groups of persons because of race, color or religion.

ADVERTISING CAN AID GOVERNMENT PROGRAMS OF WAR INFORMATION AND INCREASE YOUR LOCAL TIME SALES

Probably you are familiar with the many, carefully planned government programs of war information. Undoubtedly you have explored the possibilities of selling time and talent in support of these programs to local manufacturers, distributors and retailers. Such efforts have the unqualified endorsement of the Office of War Information because of the evident need for more advertising and more publicity in support of these informational campaigns.

How great is the need for advertising was ably summed up by Gardner Cowles, Jr., well-known newspaper publisher and radio station operator now serving as Director of Domestic Operations for the Office of War Information, in a talk before the Annual Advertising Awards Presentation Banquet on February 5, 1943, in New York. Here are three significant paragraphs from that speech:

"Today Americans are ready to make sacrifices. If anything, they want to make more sacrifices in order to get on with winning the war. But specifically as to the details of each government program, too often they are confused and unconvinced. They are unconvinced in large part because they don't have full enough information on why a program is necessary and how it works.

"And that is where advertising should come in. In my opinion, even with the help of all the editorial and news channels open to us in OWI today, we need advertising. Advertising is the only force powerful enough to do the job. It is the only one which can put these government programs before the public in simple, exact terms *often* *enough* and with *enough power* and with *enough control* to get results.

"The war on the home front can be won, in my opinion, and should be won without giving up the traditional free character of our media and our advertising, provided the media owners, the agencies and the advertisers realize advertising can and should and must be geared to help with war problems on the home front."

In other words, the government depends on private enterprise for the advertising support needed to implement fully the programs of war information. What's more, you can co-operate in this activity to the profit of your station.

Look over the following partial list of programs of war information. Each of these is a pertinent subject in the very near future. Have you solicited advertising from every local account—whether it be a manufacturer, distributor or retailer—that can logically tie in with one or another of these programs? If you have overlooked any sources of support for the government campaigns or profit for yourself, now is a good time to call on such prospects.

Victory Gardens

No other program is more important and more vital to the success of the war on the home front than Victory Gardens and home canning as an aid to meeting food needs by producing for home use. Many stations have capitalized on this program to sell time and talent for effective advertising campaigns.

Who are the prospects for a program dealing with Victory Gardens? Here are a few:

China and glassware stores
Department stores
Feed and seed dealers
Gas and electric utilities
Hardware stores
Merchandise brokers

This promotion is now in full bloom with special emphasis planned for May. It will be continued until the first "killing" frost in your section of the country and Victory Gardners who planted early crops will be urged to replant for a second crop.

Recruitment of Farm Labor and Food Processing Labor

While it may sound unusual for a broadcasting station to run a "Help Wanted" program, such a feature, well-planned and intelligently presented, can serve both manufacturer and farmer as well as prospective employees. First tried on the West Coast, where aircraft manufacturers turned to radio in a desperate attempt to relieve the manpower shortage, such programs have proved amazingly successful.

This campaign will be launched in May to persuade the public to volunteer for peak-season work of farms and in food processing plants. Write to NAB for the campaign guide entitled, "U. S. Crop Corps."

Nutrition Program

This educational campaign will be directed to the public on the use of available food supplies for best nutrition, and to stimulate proper nutrition on the part of war workers. While this campaign is scheduled to start in June, now is the time to line up accounts to supplement the promotion you will put behind this effort as a part of the OWI Allocation Plan.

It gives you a brand-new approach to brokers, commission merchants, distributors, chain food stores and voluntary groups of stores. Take full advantage of this opportunity to convert these logical prospects to users of broadcast advertising.

Recapping in Time Saves Tires

With rubber available for recapping almost all motorists' tires, this campaign gives you a logical reason to approach the tire dealers in your community. Here are some of the prospects you should solicit:

Tires—Manufacturers
  Distributors
  Dealers
Accessory dealers
Service stations

Preliminary information indicates that some of the tire manufacturers may match advertising expenditures with distributors and dealers in this campaign. While it is not known whether this money will be ear-marked for a particular medium, the fact that it may be available should stimulate your sales approach.

Fuel Conservation and Home Heating

In May, OWI will inaugurate a concentrated campaign to the public to sell the the following objectives·

1. Order coal early.
2. Conserve fuel oil and where possible convert to coal.
3. Conserve household gas.
4. Heat-condition the home (by insulation, weather-stripping, storm sashes, etc.)

This campaign opens up a field in which radio stations can write a substantial volume of new business by careful planning. Check the following list of prospect types with the actual prospects in your community and get to work early:

Asbestos products
Boiler cleaning and repair
Chimney cleaning and repair
Cleaning compounds
Coal dealers
Concrete contractors
Floor contractors
Furnace cleaning and repair
General contractors
Hardware stores
Heating contractors
Heating engineers
Insulation manufacturers & contractors
Lumber dealers
Millwork manufacturers
Paperhangers
Plumbers
Pipe covering contractors
Roofing contractors

Fats and Grease Salvage

A new campaign to urge the collection of waste fats and greases for explosives will be conducted during July and August. While this will primarily concern the placement of national spot advertising, you should cover every possible local angle in connection with this activity.

In this connection, the Department of Broadcast Advertising will work with the advertising agency and trade association involved in an effort to obtain a larger share for broadcast advertising of the rumored $500,000 budget.

Homes for War Workers

The National Housing Agency and OWI will shortly announce a three-fold campaign to alleviate the housing shortage that exists in many war production centers. This campaign has three objectives:

1. To induce property owners to make available to war workers all the vacant space—houses, apartments and rooms—which can be utilized without any expenditure of critical materials.
2. To induce other owners, whose properties are not now suitable for use, to convert them into additional accommodations by remodeling with their own funds or with the assistance of private financial institutions.
3. To induce property owners, who are unwilling or unable to convert on their own responsibility, to lease their buildings to the government, and let the government do the job.

Here, too, is a field in which alert radio station sales executives can render a real service in the government campaign as well as build a substantial volume of new business.

Conservation

Soon a nation-wide campaign will be instituted to induce people to use less, waste less, save more. This program will be concentrated in two fields:

1. Household equipment (maintenance of electrical appliances, etc.)
2. Clothing (making clothing go further.)

Look at the list of prospect types in this field of conservation. What's more, many radio stations have already developed important customers from among these groups:

Air conditioning service
Cleaners and dyers
Clothing repair and reweaving establishments
Electrical appliance service
Laundries
Oil burner service
Refrigeration service

These government informational campaigns represent real sales opportunities if you will but translate the objectives of each activity into terms of local accounts that can and should contribute to the program.

THE SAWDUST TRAIL

Each time the Department of Broadcast Advertising receives a letter from an NAB member station, calling attention to a per-inquiry offer, a sales letter is immediately written to the advertiser or advertising agency, urging the use of broadcast advertising on an ethical basis. Now and then such letters result in conversions. Here are two recent examples:

From Arthur M. Holland of the Malcolm Howard Advertising Agency, 20 E. Jackson Blvd., Chicago, Ill.:

"May we state that at no time has this agency ever placed any advertising with ANY radio station anywhere in the United States on a 'per-inquiry' basis, and this one instance where such an attempt was made, was done without the authorization of anyone in authority.

"We hope this will clear up our position with regard to the subject in question."

From Michael F. Ellis of the Ellis Advertising Company, Buffalo, N. Y.:

"I promise never again to deviate from the straight and narrow path under pain of being deprived on my nationally known non de plume of Ethical Ellis . . .

"Seriously, thank you for bringing this to our attention. It's all over now and won't occur again."

HELLO, SUCKER!

For complete frankness on the purpose of per-inquiry offers, the following excerpt from a letter received within the last few days deserves first prize and a place in your memory:

"We did not originate the idea of making radio commitments on a per inquiry basis. As a matter of fact, we were approached by two out-of-town stations, through their representatives, who solicited contracts on that basis. Since we felt that some of the smaller stations, whose facilities we would not use on any other basis, might be willing to enter into a similar arrangement, we proceeded to suggest same in a letter to them. Frankly, we did not expect any large station to enter into the arrangement, and surely there could be nothing wrong in offering the deal to anyone who wished to take it on.

"For your information, we are also buying time for . . . in the regular way on larger stations in major cities, and shall continue to do so so long as radio pays out."

THE STATION VIEWPOINT

Having preached against per-inquiry business times without number, this column is herewith turned over to Robert T. Mason, President of WMRN, Marion, Ohio:

"We have steadfastly refused to accept any PI business. I maintain that when we go into direct mail merchandising I'll buy my own merchandise and sell it, but while I am selling radio advertising I am going to stick to that business. When radio advertising reaches the point where it can't stand on its own feet as a merchandising medium I'll give serious thought to opening up a mail order house myself.

"I don't believe that radio will ever get its share of department store advertising and retail store advertising until we have out-grown, as did the newspapers, the era of cut rates and shady deals. It can be done because we've done it and I would like to see some of the other stations likewise clean up their operation."

Thanks, Bob, that tells the story perfectly.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, April 26th. They are subject to change.

Monday, April 26

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—C. P., **630 kc.**, 1 KW, unlimited, DA-day and night.

Thursday, April 29

WJRM—Allegheny Broadcasting Corporation, Elkins, W. Va.—Mod. of C. P., **1240 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WPTZ—Philco Radio and Television Corp., Philadelphia, Pa.—Granted license (B2-LCT-5) to cover construction permit in part for commercial television broadcast station, on condition that licensee will take steps to comply fully with the rules, regulations and standards of the Commission when materials and personnel become available or when required by the Commission to do so. Also granted modification of Construction permit (B2-MPCT-20) to extend completion date to June 1, 1943.

Balaban & Katz Corp., Chicago, Ill.—Granted construction permit (B4-PVB-94) for new experimental television broadcast station using facilities of commercial television station WBKC, to operate on Channel No. 2 **(60000-66000 kc.)**, power 4 KW. (peak) visual and 2 KW. aural, A5 and special for FM (aural) emission.

LICENSE RENEWALS AND EXTENSIONS

The following stations were granted renewal of license for the period ending May 1, 1944:

W45V, Evansville on the Air, Inc.; W47NV, The National Life and Accident Ins. Co.; W47P, WWSW, Inc.; W49FW, Westinghouse Radio Stations, Inc.; W51C, Zenith Radio Corp.; W51R, Stromberg-Carlson Tel. Mfg. Co.; W53H, The Travelers Broadcasting Service Corp.; W53PH, WFIL Broadcasting Co.; W55M, The Journal Co. (The Milwaukee Journal).

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending June 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending June 1, 1943.

W45BR—Baton Rouge Broadcasting Co. Inc., Baton Rouge, La.—Present license extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending June 1, 1943.

The following stations were granted renewal of license for the period ending May 1, 1944:

WBOE, Cleveland, Ohio; WIUC, Urbana, Ill; WNYE, Brooklyn, N. Y.

KALW—Board of Education of the San Francisco Unified School Dist., San Francisco, Cal.—Present license extended upon a temporary basis only, pending action upon application for renewal of license, for the period ending June 1, 1943.

WBKY—University of Kentucky, Beattyville, Ky.—Present license extended upon a temporary basis only, pending action upon application for renewal of license, for the period ending June 1, 1943.

W10XF—National Broadcasting Co. Inc. (Portable)—Granted renewal of license for the period ending May 1, 1944.

W10XR—National Broadcasting Co. Inc. (Portable or Portable Mobile)—Granted renewal of license for the period ending May 1, 1944.

W3XDD, W3XPY—Bell Telephone Labs. Inc., Whippany, N. J.—Present licenses extended upon a temporary basis only, pending receipt of and action upon applications for renewal, for the period ending June 1, 1943.

W9XER—Midland Broadcasting Co., Kansas City, Mo.—Present license extended upon a temporary basis only, pending action upon application for renewal of license, for the period ending June 1, 1943.

W9XUI—State University of Iowa, Iowa City, Iowa.—Granted renewal of experimental television broadcast station license for the period ending February 1, 1944.

W3XO—Jansky & Bailey, Washington, D. C.—Granted license (B1-LEB-5) for Temporary Class 2 Experimental Broadcast station, for the period ending April 1, 1944, said license to conform to that of W3XO dated March 12, 1940.

W9XYH—Head of the Lakes Broadcasting Co., Duluth, Minn.—Granted license (B4-LEB-4), for temporary Class 2 Experimental station, for the period ending April 1, 1944, said license to conform to that of W9XYH dated May 6, 1940.

W8XFM—The Crosley Corp., Cincinnati, Ohio.—Granted license (B2-LEB-3) for temporary Class 2 Experimental broadcast station, for the period ending April 1, 1944, said license to conform to that of W8XFM dated November 28, 1940.

W2XWG—National Broadcasting Co. Inc., New York City.—Granted license (B1-LEB-1) for temporary Class 2 Experimental broadcast station, for the period ending April 1, 1944, said license to conform to that of W2XWG, dated January 24, 1940, except frequency **45100 kc.,** (in accordance with present operation).

W9XBT—Balaban and Katz Corp., Chicago, Ill.—Present experimental television broadcast station license further extended upon a temporary basis, for the period ending June 1, 1943, pending determination upon application for renewal of license.

W2XBD—General Electric Co., Schenectady, N. Y.—Granted renewal of license for the period ending April 1, 1944.

W8XUM—WBNS, Inc., Columbus, Ohio.—Granted renewal of license for the period ending March 1, 1944.

W9XWT—Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted renewal of license for the period ending March 1, 1944.

W2XWE—WOKO, Inc., Albany, N. Y.—Present license further extended upon a temporary basis only, pending receipt of and action on application for renewal, for the period ending June 1, 1943.

MISCELLANEOUS

WORK—York Broadcasting Co., York, Pa.—Granted modification of construction permit, as modified, which authorized installation of directional antenna for night use, for extension of completion date from March 18 to June 18, 1943 (B2-MP-1709).

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted license to cover construction permit as modified, for increase in power and installation of directional antenna for night use (B2-L-1730), granted authority to determine operating power by direct measurement of antenna power (B2-Z-1472).

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted license to cover construction permit as modified, for increase in power and installation of directional antenna for night use (B3-L-1757), granted authority to determine operating power by direct measurement of antenna power (B3-Z-1506).

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted license to cover construction permit as modified, for increase in power, change hours of operation, and install new transmitter and directional antenna for night use (B3-L-1760); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1511).

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1502).

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1509).

Upon consideration of the petition of Massachusetts Broadcasting Corp. (WCOP), Boston, Mass., for an order to take depositions in the matter of petitioner's application for renewal of license (Docket No. 6476), and the motion by petitioner for continuance of the hearing scheduled for May 17, 1943 in this matter, *granted* the motion for continuance, and *directed* that the hearing in this matter be continued to June 16, 1943. Action upon the petition to take depositions was passed over to the Motions Docket to be held on May 12, 1943.

West Allis Broadcasting Co. Inc., West Allis, Wisc.—Adopted order denying petition for reconsideration directed against the Order of the Commission of January 4, 1943, adopting as final the Proposed Findings of Fact and Conclusions (B-157), denying application for construction permit for a new station.

KOBH—Black Hills Broadcast Co., Rapid City, S. Dak.—Adopted order (1) denying applicant's motion for grant of construction permit to install new transmitting equipment, change transmitter location, install directional antenna system for night use, and change operating assignment from **1400** to **610 kc.,** and power from 250 watts to 5 KW; (2) designated application for further hearing upon additional issues, and further ordered that the petition of WDAF, Kansas City Star Company, be granted insofar as it requests leave to intervene in the hearing.

WHAM—M and M Broadcasting Company, Marinette, Wisc.—Adopted order denying petition for reconsideration of the Commission's action of December 15, 1942, designating for hearing application for modification of license to increase power to include nighttime operation with 100 watts, and to grant same without hearing.

KGNC—Plains Radio Broadcasting Co., Amarillo, Tex.—Granted motion for continuance of hearing on application for modification of license to operate on **860 kc.,** 500 watts night, 5 KW day, unlimited time, now scheduled for May 3, 1943, hearing continued for 30 days, to June 3, 1943 (Docket 6493).

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Granted petition for postponement of hearing on application for construction permit to operate on **630 kc.,** 1 KW, unlimited time, directional antenna day and night, now scheduled for April 26; continued for 60 days, to June 28, 1943 (Docket 6304).

WHKC—United Broadcasting Co., Columbus, Ohio.; KXOK—Star-Times Publishing Co., St. Louis, Mo.; WMAL—Evening Star Broadcasting Co., Washington, D. C.—Granted petitions to intervene in the hearing on WLAP (above).

WKRC—The Cincinnati Times-Star Co., Cincinnati, Ohio.—Denied petition to intervene in the hearing on WLAP (above); Attorney for applicant noted an exception to the denial.

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Modification of construction permit (B4-P-2827 as modified, for change in hours, directional antenna for night use and move of transmitter) for extension of completion date from 5-18-43 to 11-18-43.

600 Kilocycles

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—License to cover construction permit (B3-P-2814) as modified for new equipment and directional antenna for day and night use, change frequency, increase power and move of transmitter.

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Authority to determine operating power by direct measurement.

680 Kilocycles

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Involuntary transfer of control of licensee corporation from Alexander H. Rogers, deceased, to Irving E. Rogers, Harold B. Morrill & National Shawmut Bank of Boston, co-executors under the will of Alexander H. Rogers, deceased (501 shares common stock).

1010 Kilocycles

NEW—Baylor University and Carr P. Collins, Corpus Christi, Texas.—Construction permit for new station to be operated on **1010 kc.,** 50 KW power, unlimited time, employing directional antenna day and night. Amended to change name from Baylor University *to* Baylor University and Carr P. Collins, change hours from unlimited *to* Day to Sunset at Little Rock, Ark.

1290 Kilocycles

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—License to cover construction permit (B2-P-3514) for installation of new sampling loops.

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio— Authority to determine operating power by direct measurement.

1340 Kilocycles

WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Florida.—Voluntary assignment of license to Capital City Broadcasting Corporation.

1450 Kilocycles

WCHV—Charles Barham, Jr. and Emmalou W. Barham d/b as Barham & Barham, Charlottesville, Va.—Authority to determine operating power by direct measurement.

1490 Kilocycles

KRNR—News-Review Co., Roseburg, Ore.—Modification of license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

FM Application

W75C—The Moody Bible Institute of Chicago, Chicago, Ill.—License to cover construction permit (B4-PH-5 as modified for new High Frequency Broadcast Station) *in part.*

Miscellaneous Application

NEW—Roy C. Kelley, Grand Rapids, Mich.—Authority to transmit programs to Station CKLW, Windsor, Ontario, Canada, from Grand Rapids, Mich.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Basic Foods, Inc., and Curtis Howe Springer, its president, also trading as Dr. Springer and Dr. Curtis Howe Springer Foundation, Inc., 2226 North New Hampshire Ave., Hollywood, Calif., manufacturing and distributing a line of products described as health foods, are charged in a complaint with misrepresentation. (4941)

Colonial Alloys Company has been issued a complaint charging three Philadelphia individuals, engaged in the sale of "Colalloy," with various misrepresentations which have enabled them to sell substantial quantities of their products to manufacturers and contractors performing war work.

The complaint is directed against Samuel L. Cohn, also known as Pat Casey; Charles C. Cohn, also known as Charles Cahn, and Edward Engel. The Cohns are copartners trading under the fictitious names Colonial Alloys Co., Colonial Stove Co. and Base Products Co. Engel is associated with them as chief engineer and metallurgist of Colonial Alloys Co.

The respondents, whose place of business is at 2154 East Somerset St., Philadelphia, purchase aluminum and aluminum alloys from recognized fabricators or jobbers and subject it to a so-called "electron-izing" treatment which merely consists of placing it in a chemical bath through which an electric current is passed, the process requiring from three to nine minutes. The "electron-ized" product is sold under the name "Colalloy" and advertised extensively as being superior in many respects to aluminum alloys of comparable composition. (4943)

Domestic Diathermy Co., 251 West 57th St., New York, selling and distributing a device designated "Domestic Short-Wave Diathermy," is charged in a complaint with false advertising and misrepresentation. (4942)

McFadden 3 Sisters Springs, selling and distributing mineral waters under the name "McFadden 3 Sisters Springs," is charged in a complaint with misrepresentation. (4940)

Superbilt Manufacturing Company—Misrepresentation of the retail price of Superest mattresses and matching box springs is alleged in a complaint issued against Superbilt Manufacturing Co., Inc., 2511 N. E. Holladay St., Portland, Oreg. (4944)

Winterrine Manufacturing Co., 105 Wazee Market, Denver, Colo., is charged in a complaint with misrepresentation in connection with the sale of a so-called antifreeze solution designated "Antarctic," recommended for use in the cooling system of automobiles and other combustion type engines. (4945)

CEASE AND DESIST ORDERS

No cease and desist orders were issued by the Commission last week.

STIPULATIONS

The Commission issued no stipulations last week.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 18, April 30, 1943

The President

This has been an eventful year for broadcasters—a year full of uncertainties, but also, it has been a year of achievement.

In making this Report, I shall not attempt to survey the whole field of radio, but rather to report briefly upon the major activities of your Association, since our Convention in Cleveland last year. For detailed information concerning the activities of the various departments, I commend to you the reports of the members of the NAB Staff. A reading of them will not only give you an overall picture of the activities of your Association, but I am sure by so doing you will absorb much information which will be of value. Also, as you become better acquainted with the work of our Staff, you undoubtedly will make greater use of the services offered.

War Activity Our First Endeavor

Our first endeavor at all times during the past year has been to assist in the prosecution of the war. We have kept the public the best informed people in the world; we have recruited for the Army, Navy, Marine Corps, WAACS and WAVES; we have sold bonds for the Treasury; we have helped collect the scrap and save the fat; we have established schools to train radio technicians; have served on government and industry committees; in short, have served the government and the community in many and various ways—it truly has been a year of public service.

Listening has been up and, realizing the great importance of maintaining the largest possible listening audience, program policies and techniques have received constant study and attention. We have worked in close cooperation with the Office of War Information in perfecting plans for the carrying of government announcements, and with the Advertising Council to the end that broadcasting has cooperated with other media in rendering to the government the greatest possible service through advertising.

Manpower and Material Problems

Although business on the great majority of stations has continued good, radio has faced many serious problems, the manpower problem being the most serious. Due to the fact that this is a technical war, and that radio is playing an ever increasing part, trained technicians and personnel with practical broadcasting experience have been in great demand.

The industry is proud of the large number of executives it has furnished to the staffs of the radio branches of the public relations offices of the Army and Navy, and of the many government agencies and departments; proud of the technical experts furnished to carry on experimental work and the technicians supplied to perform much useful service in so many various war activities. Early realizing the need for trained personnel, the industry took the lead in setting up training courses which have furnished a large number of technicians, not only for radio, but for many other services.

Broadcasting was early declared an essential industry, and has been included on every list of essential industries published by Selective Service and the War Manpower Commission. However, broadcasting is relatively a young industry with the personnel still composed of young men and, therefore, the demands of the armed forces cut deeply into our ranks. The NAB has worked in close cooperation with Selective Service and the War Manpower Commission and is appreciative of the sympathetic and understanding treatment which our problems have received at all times. Due to the extensive training program which has been carried on and to the ever increasing use of women, many crises have been avoided, but the manpower problem continues to be our most serious problem.

Next in importance to the manpower problem has been the material problem. The NAB has worked closely with the WPB at all times and due to the especially splendid work of the WPB, tubes and other material necessary for station operation have been available. The NAB also has made extensive surveys to locate all available material, has established a "Swap Bulletin" and has tried in every way to make the best possible use of such material. It has required eternal vigilance to guard against the many threats to the maintenance of the listening audience. Recently, a serious shortage in batteries for home sets developed along with a shortage of tubes for receiving sets. In both these instances, we have received the most helpful cooperation from the WPB and solutions are being worked out.

Freedom of Radio Important

Sincerely believing that the freedom of democracy is linked to the freedom of radio, we have at all times been on our guard against attacks threatening radio's freedom. Too well do we all know that man does not lose his freedom by one act of government—that the greatest danger is from indirect and disguised attacks.

Radio to be free must be able to pay its way. Advertising has proved to be an efficient tool of business. Attacks on advertising are attacks on the freedom of radio and as such we have opposed them.

We all realize that war times require restrictions which must be endured for the successful conduct of the war. However, it has well been said: "Eternal vigilance is the price of liberty," and such has been our policy lest restrictions placed on radio under war conditions should in the end shackle radio in its great task when the present conflict ends.

Legislation

On the legislative front there has been great activity. Last summer the House of Representatives held extensive hearings on the Sanders Bill. Your President testified at this hearing, and recommended, on behalf of the industry, certain amendments to the Communications Act. A bill similar to the Sanders Bill has been introduced again in the House by Representative Holmes, and Senators Wheeler and White have introduced in the Senate a bill containing many similar provisions. Hearings on this bill have been set for May 6th.

It is my belief that a revision of the Communications Act is greatly needed, and that such a revision should be a goal towards which we should work with all diligence.

A. F. of M. Ban

As usual there has been much activity on the music front, although this time from a different direction. Without previous demands or negotiations, James Caesar Petrillo, President of the A. F. of M., placed a ban on all recordings made by members of the A. F. of M. This ban has been extremely detrimental to the war effort. Not only has it prevented a supply of newly recorded music for home use, but it has stopped the supply of music for recreational centers, for members of the armed forces and, in addition, it has prevented all recordings by symphonic orchestras and dried up the composition and supply of music from many sources.

In short, at the most critical period in our nation's history, Mr. Petrillo, merely to maintain his control in his own union, has deprived this nation of a large supply of music.

The NAB is proud that, with the united backing of the industry, it has fought this dictatorial display of power. We believe that by so doing we are rendering a real service not only to radio, but to the entire field of music, and that we shall be successful.

The Code and Programming

With the outbreak of the war, the Code Committee became actively engaged with problems created by the war. It has continued that activity. A development of interest has been the adoption of a Code by the Canadian Association of Broadcasters, many provisions of which are similar to the provisions of the NAB Code.

Believing that good programming is the basis of all broadcasting, we have appointed recently a Program Managers Committee for the purpose of developing a program of activity for the program managers. This activity has received the enthusiastic approval of the industry and we believe it will prove very beneficial.

Retail Promotion Plan

The Board of Directors, at Cleveland last year, approved in principle the Retail Promotion Plan and, under the leadership of Paul W. Morency, Director of District #1, and Lewis H. Avery, Director of the Bureau of Broadcast Advertising, this Plan has been presented to the industry and has received enthusiastic support. It is confidently expected that at this Conference, the remaining support necessary to insure the success of the Plan will be forthcoming.

The success of this Plan is of great importance to the industry. If it succeeds, other plans similar in character will follow.

Public Relations

Willard Egolf, of KVOO, Tulsa, recently was appointed Assistant to the President and will devote a large portion of his time to the public relations activities of the NAB. Associated with him is Walt Dennis, also formerly of KVOO, who has been appointed Chief of the NAB News Bureau. With these additions to our Staff, we shall have an increased tempo in our public relations activities.

Mrs. Dorothy Lewis, our Coordinator of Listener Activity, has continued her trips and her work with the Radio Councils, which have proved very beneficial.

We have also worked in close cooperation with many religious and educational groups. Your President is serving on the Federal Radio Education Committee. Other members of the Staff are taking an active part in various conferences.

District Meeting and Membership

Representatives of the Office of Censorship, OWI, OCD, WPB, WMC, Selective Service, Army, Navy, Marine Corps, Treasury, attended the series of District Meetings held last Fall and discussed with representatives of 446 stations the various problems which had arisen in connection with the war. The meetings were very successful and again proved the value of District Meetings.

The membership during the year remains about constant, there being 524 members on April 1, 1943, as compared with 525 as of May 1, 1942. As a result of the change of the By-Laws providing for network membership, CBS and NBC joined as network members. We hope that the Blue Network and Mutual will follow their example.

Committees

As is normal in trade association work, much of NAB's work was performed by industry committees. The work performed by these committees was extremely helpful and, on behalf of the entire industry, we wish to express to these committeemen our sincere appreciation for the time and energy which they so generously gave to the work of the Association. Their services were a real contribution to the industry.

NAB's New Home

For some time we have hoped that eventually the NAB could have a permanent home. Therefore, last December when the Normandy Building, where the NAB offices had been located for four years, was taken over by the government, our dream came true by the purchase of the building at 1760 N Street, N. W., which has provided very suitable offices for our Staff. Upon its walls we are hanging pictures of past Presidents, past Boards of Directors, group pictures of past Conventions and Meetings and other pictures connected with radio history. We extend to all our members a cordial invitation to make the NAB Offices your headquarters while in Washington.

The NAB Staff

There have been several changes in the Staff during the year. Frank E. Pellegrin, formerly our Director of the Department of Broadcast Advertising, last Summer was commissioned a Captain in the Army and assigned to the War Department Radio Branch, Public Relations Division, under Lieut. Col. Edward M. Kirby, who was formerly our Director of Public Relations. Lynne Smeby, formerly our Director of Engineering, accepted a position with the War Department as a civilian Consultant Engineer.

These vacancies were filled by the appointment of Lewis H. Avery as Director of the Department of Broadcast Advertising and Howard Frazier as Director of Engineering. Willard Egolf was appointed Assistant to the President, assuming the duties formerly performed by Lieut. Colonel Kirby, and Walt Dennis was appointed Chief of the NAB News Bureau. We believe the NAB has been extremely fortunate in securing the services of these men as members of our Staff.

Post War Activity

It is to be hoped that by the time we meet again next year this world conflict may be over. But with the armed conflict over, radio will face its greatest test and its most promising opportunity. For the first time in the history of the world the microphone will be at the peace table and with it there public opinion will play an even more important part than ever before. The war, which will have been fought and won by armed might on the land, on the sea and in the air, must again be fought and won in the minds of men and there the conflict will be most severe; there we must fight for a mutual understanding between ourselves and our defeated enemies—if we hope for any lasting peace. Radio more than any other force is most capable of rendering service to mankind in this conflict—a service which will be in every sense a true public service.

We in radio have a great mission, not only for ourselves, but for mankind. Another opportunity like this one will not come for many generations. May we realize it and put our faith and effort in doing the job which lies ahead of us.

Respectfully submitted,

Neville Miller,
President.

Secretary-Treasurer's Office

The eleven and one half months since the Cleveland Convention have been busy and in some respects trying ones for the executive, administrative and clerical staffs at NAB. Operating in Wartime Washington, overcrowded in both office space and living accommodations, has not made our lot an entirely pleasant one.

RESIGNATIONS

Three resignations from our Administrative Staff have occurred. Ed Kirby, Public Relations Director from 1938, who had been on loan throughout 1941 to the War Department, resigned to accept a Lieutenant Colonelcy. He continues his work as Chief of the Radio Branch of the War Department's Bureau of Public Relations. Shortly thereafter Lynne Smeby took leave to assume a highly important and confidential role in a civilian capacity with the Signal Corps. In the latter part of June Frank Pellegrin who joined the staff in April 1941 as Director of the Department of Broadcast Advertising, became Captain Pellegrin, AUS. He is now Administrative Assistant to Colonel Kirby at the War Department.

REPLACEMENT

Replacing these experienced and capable staff executives presented a problem of major proportions. We have, however, been extremely fortunate in recruiting from the ranks of the industry worthy successors for each of them. Willard Egolf, with the title of Assistant to the President, takes over the work formerly performed by Colonel Kirby with some additional duties in the fields of legislative contacts and press relations. With eleven years of practical experience as a broadcaster, a legal education and a broad background of dealing with civic and political matters, Egolf comes to his new duties well equipped. He has been provided with an experienced press relations man in the person of Walt Dennis, now Chief of NAB's Press Bureau.

To take up the task where Captain Pellegrin left off Lewis H. Avery was chosen. Seventeen years of active association with every phase of the commercial aspects of radio ably qualify him to carry on as head of the Department of Broadcast Advertising. Howard S. Frazier, named as Smeby's successor, is a veteran radio engineer whose experience spans the whole life of broadcasting. The industry is fortunate to secure the services of these men and NAB will continue to render a high quality of service through these as well as other departments.

CLERICAL STAFF LOYAL

In the face of tempting offers in government employment our clerical staff has remained 100 per cent loyal. Not a stenographer or clerk has been lured by the higher salaries offered in many of the government offices. For this we are sincerely grateful to them. One of our messengers, George Many, joined the Army in the Fall and is now serving in the Aviation Corps. Charles Dodge, who had been on the clerical staff as a messenger and a clerk in the Research Department, is now an Army Flying Cadet.

ORDERED TO MOVE

Near tragedy struck when in early November we were notified that the Reconstruction Finance Corporation had taken over the Normandy Building in which our headquarters were located. We were ordered to move within thirty days. Space in Washington office buildings, especially in the dimensions required, was non-existent. The Finance Committee, cooperating with the Secretary-Treasurer, received Board approval by a mail referendum to purchase the property at 1760 N Street, Northwest. This is a fine appearing, substantial building which lends itself admirably to our use. Some remodeling and repair work has been done; we are settled in our new home and what looked like a tragedy has really proven a blessing in disguise. Our new quarters are more efficient than our old ones and a material reduction in overhead operating expense has been accomplished.

WAR WORK

In common with the radio industry which it serves NAB has dedicated itself to an all-out war effort. The government agencies charged primarily with the many activities incident to wartime operation and civilian morale have leaned heavily upon us for consultation and advice. The managements of radio stations likewise turn to us for assistance in many of their problems. The NAB staff has kept abreast of these ever-growing demands. In the reports of the several departments will be found information as to the detail of this work. We feel that we can say with becoming modesty that the NAB staff has established and is maintaining with all of the essential war agencies contacts based upon respect and confidence. We are prepared to serve the membership in the effective discharge of their wartime responsibilities and in meeting the many operating problems which beset them.

NEW YORK OFFICE

To more effectively care for the interests of the industry in meeting the challenge presented by the A. F. of M. recording ban NAB established a branch office at 535 5th Avenue, New York. Serving primarily as headquarters for our Legal and Public Relations Counsel in the Petrillo matter it is also used as headquarters for the Retail Promotion Committee and Mrs. Dorothy Lewis, NAB Coordinator of Listener Activity.

PERSONNEL

The complete roster of NAB employees follows:

Executive Staff:

Neville Miller, President. C. E. Arney, Jr., Secretary-Treasurer.

Administrative Staff:

Lewis H. Avery, Director, Broadcast Advertising.
Walt Dennis, Chief, News Bureau.
Willard Egolf, Assistant to the President.
Howard S. Frazier, Director of Engineering.
Joseph L. Miller, Director, Labor Relations.
Paul F. Peter, Director of Research.
Russell P. Place, Counsel.
Everett E. Revercomb, Auditor.
Helen H. Schaefer, Research Assistant.
Arthur Stringer, Director, Promotion and Circulation.

Secretarial, Clerical and Part Time:

Ella P. Nelson, Secretary.
Mildred M. Ramsay, Secretary.
Geraldine Finnegan, Stenographer.
Jane A. Fry, Stenographer.
Loretta J. Kealy, Stenographer.
Hester M. Love, Stenographer.
Helen J. Morris, Stenographer.
Grace H. Walsh, Stenographer.
Cordelia O. Paquet, Typist.
Maisie Swartwout, Switchboard Operator.
Mary G. Lucas, File Clerk.
Kathryn Donahue, Bookkeeper.
George C. Stuart, Clerk and Messenger.
Elliott Irving, Clerk and Messenger.
Lynne Lamm, Reporter.
Wesley Hayes, Janitor.

New York Office:

Carl Haverlin (part time), Supervisor.
Dorothy Lewis, Coordinator, Listener Activities.
Constance Mendel, Stenographer.
Marjorie Kryske, Stenographer.

MEMBERSHIP

On April 15, 1943, the membership of the National Association of Broadcasters stands at 524, composed of 505 active members and 19 associate members. The following tables show detailed analyses of the membership:

FINANCIAL

As in past years, the books and records of NAB have been audited by independent certified public accountants and a copy of their report has been sent each NAB Director. There follows a statement of income and expense for the year ending March 31, 1943.

NATIONAL ASSOCIATION OF BROADCASTERS

Statement of Income and Expenses

For the Period, April 1, 1942, to March 31, 1943

Cash on Hand, April 1, 1942 (As reported at 1942 Convention)	$ 59,929.87	
Less: Accounts Payable, March 31, 1942	5,118.90	$ 54,810.97
Income		
Receipts from All Sources		$315,628.55
Expenses		
Advertising Council	$ 2,500.00	
Annual Convention	4,014.76	
Board of Directors Meetings	11,542.91	
Building Expense	1,041.29	
Committee Expenses	20,691.74	
Dues and Publications	1,462.05	
Furniture and Fixtures	1,974.71	
Legal and Accounting Fees	6,225.00	
Land and Building	33,554.15	
Listener Activities	6,037.43	
Miscellaneous	16,121.89	
Musicians Controversy	54,224.01	
NAB Reports	12,300.92	
Office Supplies	2,595.92	
Postage	3,231.73	
President's Expenses	1,763.36	
Printing	9,168.23	
Rent	6,846.66	
Salaries	122,548.84	
Taxes	3,432.50	
Tax Fees	7,221.33	
Telephone and Telegraph	3,629.93	
Travel	10,946.36	
		343,075.72
		27,363.80
Add: Accounts Payable, March 31, 1943		9,634.69
Cash on Hand, March 31, 1943		$ 36,998.49

Respectfully submitted,

C. E. Arney, Jr.,
Secretary Treasurer.

Assistant to the President

The office of Assistant to the President of NAB has been given a new definition. Government contacts and general administrative duties have been added to the primary responsibility of public relations. The new post was filled on March 1, 1943, by Willard D. Egolf, pursuant to the preparation of a Public Relations Plan by a special committee and its adoption by the Board.

In accordance with a resolution adopted at the July meeting of the Board, President Miller appointed a Committee consisting of himself as Chairman; Walter J. Brown, WSPA-WORD, Spartanburg, South Carolina;

Frank King, WMBR, Jacksonville, Florida; Leslie W. Joy, KYW, Philadelphia, Pennsylvania; Gilmore Nunn, WLAP, Lexington, Kentucky; Richard H. Mason, WPTF, Raleigh, North Carolina; and Edgar H. Twamley, WBEN, Buffalo, New York.

The Committee met at NAB Headquarters on September 11, 1942, with the following present: Neville Miller, Frank King, Gilmore Nunn, Richard H. Mason and Edgar H. Twamley, with C. E. Arney, Jr., acting as Secretary.

The past public relations activities of NAB were reviewed and discussed and the objects and purposes were outlined.

RECOMMENDATIONS

Detailed recommendations covering the establishment of more intimate relations with various trade groups, such as ANA, AAAA, RAM, AFA, NRDGA, ANPA, the Better Business Bureau and other organizations having many interests similar to those of NAB, were suggested.

In the field of women's groups, the work of Mrs. Dorothy Lewis, Coordinator of Listener Activity, was considered, and the Committee felt that this work should be continued and expanded. Active contacts should be established through Mrs. Lewis with the heads of all national women's organizations. Volunteer workers in various areas should be enlisted to assist in organizing councils and listener groups.

Selected broadcasters capable of interpreting radio's story and problems should be encouraged to appear before groups of various kinds at conventions and other meetings. Basic data should be furnished by NAB. This cooperation should extend to local broadcasters appearing before Rotary and other civic clubs.

The value of contacts with educational and religious groups was emphasized as highly important and worth steady development.

Labor problems should remain under the exclusive province of the Director of Labor Relations, consistent with NAB public relations policies. Preparation of material on political and legislative problems of the industry was defined as an important service to broadcasters.

METHODS

Adroit use of radio's facilities in telling its own story was recommended with both network shows and local programs, including transcriptions. Other media were given equal importance, including speeches, printed material and articles in both trade and consumer magazines.

PROJECTS

Under this heading, continuing effort was requested in compiling a statistical record of radio's service in the war and publicizing this record most effectively. This should be paralleled by a study of regular public service features such as agricultural, religious, educational and cultural.

VIGILANCE

General vigilance was urged, on behalf of radio as an instrument of public service without equal in America, frequently misunderstood, sometimes maligned and seldom given full credit for its contribution to the cause of a free people.

The Committee concluded by recommending that someone should be engaged to handle these activities and work begun at the earliest possible date.

ACTION ON REPORT

Acting upon the special Committee's report, the NAB Board of Directors, at the October 12-13 meeting in Chicago, authorized President Neville Miller to appoint a sub-committee to assist him in the selection of a proper person not only to direct public relations but to participate in the maintenance of government contacts and handle some of the general administrative problems.

A sub-committee was appointed, consisting of Edgar Bill, WMBD, Peoria, Illinois; James W. Woodruff, Jr., WRBL, Columbus, Georgia; and Engene O'Fallon, KFEL, Denver, Colorado.

This sub-committee met with President Miller for two days in Washington and later, interviewing candidates, for a day in Chicago, Illinois. Eligible men inside and outside of radio were considered. Thorough investigation and personal interviews resulted in the unanimous choice of Willard D. Egolf, then in his eleventh year as Commercial Manager of KVOO, Tulsa, Oklahoma. In addition, he was a graduate of the University of Oklahoma School of Law and member of the Oklahoma Bar Association.

Egolf joined NAB in Washington on March 1, 1943, and immediately organized the NAB News Bureau, placing at its head Walt Dennis, magazine writer and newspaper man of ten years' experience, with two and a half years' radio background as Promotion Manager at KVOO. Dennis makes the following report of News Bureau activities since March 1:

"POLICY AND OBJECTIVE: To insure radio fair and impartial treatment in the news. Vigilance is maintained over the sources of all news pertaining to the radio industry. This bureau is established to provide wire services, correspondents and radio news editors with news and statements reflecting the attitudes and policies of the broadcasting industry.

SUBSIDIARY DUTIES: Act as an information center; edit publications issued by NAB; write original articles on phases of the radio industry and NAB activities.

Since assuming the duties of this office March 1, 1943, I have made the following organization contacts through key personnel, mostly by personal calls:

1. New York and Washington staff personnel of the leading trade papers.
2. Staff executives of New York and Washington press associations, including the radio wire editors.
3. New York newspaper radio editors, including *Time* magazine.
4. Government and military press, radio and technical information personnel.
5. Radio network news editors, New York, Washington and Chicago.
6. Pertinent miscellaneous source contacts in related and other industries, news services and organizations.

This list will continue to grow as rapidly as contacts can be made.

In addition to the above, numerous services have been rendered to station and associate members. Constant relations with key personnel of news organizations and radio news personnel will be maintained, as a functional activity of this Bureau."

PROGRESS

In the thirty-day period since March 1, other Public Relations activities have embraced the following:

Survey of radio personnel now in the Armed Forces.

A thorough study of the Radio Council Plan. Cooperation with the Association of Women Directors in the furtherance of their organization, including the preparation and printing of their first bulletin, "The Beam." Collaboration with Mrs. Dorothy Lewis on "A Handbook for Radio Chairmen" and cooperation in the handling of her tour of South and Southwestern cities. Issuance of the Luther Weaver speech, "How to Listen to the Radio."

Conferences with Dr. Frank C. Goodman, Executive Secretary of the Federal Council of Churches of Christ in America, and representatives of other religious and educational organizations in Washington and New York.

Preparation of material for NAB Reports. Analysis of NAB publications.

Meetings with Officers and Directors of the Advertising Federation of America, in New York.

Meeting with the Peabody Awards Committee in New York and handling of all news releases, followed by conference on plans for coming year.

Participation in the formation of the Program Managers' Executive Committee and assumption of duties as temporary Secretary for this Committee.

Plans for attendance at ANPA Conference in New York City April 20-22.

Participation in plans for the Ohio Conference of the Institute for Education by Radio, at Ohio State University, April 20, May 1-3.

Handling all NAB news releases, as well as publicity, statements and biographies regarding the NAB War Conference, April 27-29, in Chicago.

Listener Activity

The work of Mrs. Dorothy Lewis, Coordinator of Listener Activity for NAB, falls into several categories, as follows:

1. Contact is consistently maintained with national organizations, particularly women's groups, to provide service and suggestions in the use of radio time and to educate in proper listening habits and program evaluation.
2. Supervision of the Association of Women Directors of NAB, organized at the Cleveland NAB convention in 1942. This group is proceeding toward complete national organization with only four districts yet unorganized. A quarterly bulletin is published, first issue of which was released in April, 1943.
3. The development of radio councils throughout the country continues. Mrs. Lewis has traveled extensively within the past year, strengthening existing units and organizing new councils.
4. Children's programs and audience reactions to same are now thoroughly documented by the NAB, which has built up complete files and information on the subject through the Listener Activity division. This work continues unabated through contacts with educators, agencies handling the program, listener groups, surveys in schools, networks and other radio organizations and qualified individuals.
5. An important phase of the Listener Activity program is the personal contact with civic club and organization leaders as well as radio station personnel throughout the United States and Canada.
6. Several publications are under preparation by the Listener Activity department, including a radio handbook for radio chairmen of lay groups and civic organizations. Also proposed are pamphlets offering source material for radio talks and procedures for radio councils.
7. This department has compiled a list of approximately 150 speakers on radio subjects in the 17 NAB districts. These speakers are available for any talks before civic groups, schools, etc.

Principal objective of this department for 1943 is to continue the program of education of the listening audience with principal emphasis on program evaluation, to report on audience reactions and service to all those groups or individuals wishing aid in using radio, when such use is in the public interest.

Department of Broadcast Advertising

A review of the activities of the Department of Broadcast Advertising during the past year begins properly with a deserved tribute to Frank E. Pellegrin who, prior to his appointment as a Captain in the U. S. Army, served as Director from April 1, 1941, to July 3, 1942.

Perhaps the outstanding achievement of his regime was the publication of "A Manual of Radio Advertising," which shall stand long as a token to Captain Pellegrin's abilities and contributions to the broadcast advertising field.

This publication has been widely heralded as the first authoritative work of a practical nature on the application, principles and use of broadcast advertising. It is being widely used as a text in schools and universities.

Dozens of station managers and sales managers have reported how the NAB "Manual of Radio Advertising" had been used effectively to sell radio as a basic advertising medium. They repeatedly declared that with the fundamentals thus established in the advertiser's mind, it is relatively easier to interpret the station's local story.

Many specific sales have been reported in which the Manual has been given credit. Typical of comments was this statement of one station sales manager: "I know your 'Manual of Radio Advertising' made it possible for us to get this account on the air, so again we say—many thanks for the splendid job you have done!"

Not only did Captain Pellegrin conceive and publish this valuable work, but he also produced considerable other useful material as well as maintained constant contact with individual advertisers, advertising agencies and their associations.

During the period from July 3 to October 1, 1942, the Department was without a full-time director. Its activities at that time were planned and supervised by C. E. Arney, Jr., Secretary-Treasurer, while Miss Geraldine Finnegan, who had served as secretary for Captain Pellegrin, maintained the routine correspondence with radio stations, advertisers and advertising agencies. All requests for NAB Sales Helps were promptly filled so that NAB member stations were supplied with the day-to-day assistance which the Department is established to provide.

At the NAB Annual Convention in Cleveland, two resolutions were passed unanimously: one condemned the efforts of some organizations and movements outside the government to obtain the free use of broadcasting facilities; the other urged member stations to deny the use of their facilities to advertisers and advertising agencies seeking to place business on a contingent, guaranteed or per-inquiry basis. Copies of these resolutions have been mailed to all who attempted to infringe the standards of good business practice the industry thus sought to establish.

STANDARD CONTRACT FORMS: The Annual Report for 1942 stated that a new standard contract form had been negotiated with the AAAA and awaited approval of the NAB Board of Directors. Following this approval, two forms of the recommended contract were prepared: one for advertising agencies; the other for advertisers who do not employ advertising agencies. Mats of both forms were mailed to stations for convenience and economy in local printing. During the year an ever-increasing number of radio stations adopted the standard contract form to the benefit of advertisers, advertising agencies and stations.

WHAT RADIO BUYERS WANT TO KNOW: Through the generosity of Dr. Herman S. Hettinger, Associate Professor of Marketing, Wharton School of Finance and Commerce, University of Pennsylvania, a factual study of agency and advertiser desires in station research, together with some arresting and inescapable conclusions, was released to NAB member stations on July 1, 1942. Unfortunately, circumstances made it impossible to provide the desired follow-up of this material.

In order that broadcasting executives generally might be apprised of the facts customers want to know about radio stations before spending their money, a discussion of this publication was included on the agenda for the NAB District Meetings. That the industry is now aware of the significance of this study is clearly evident from the fact that more than 1500 copies have been distributed and the demand continues little abated.

SALES MANAGERS EXECUTIVE COMMITTEE: To bring the new Director up to date on the activities of the Sales Managers, immediately prior to his association with NAB, the Chairman of the Committee called a special two-day meeting in Chicago on September 23 and 24, 1942. Special thanks are due each of the following members of that Committee for his advice and assistance during the service of the present Director in the period covered by this report:

John M. Outler, Jr., Chairman, WSB, Atlanta, Georgia
Frank R. Bowes, WBZ, Boston, Massachusetts
Donald D. Davis, WHB, Kansas City, Missouri
Dietrich Dirks, KTRI, Sioux City, Iowa
George H. Frey, NBC, New York, N. Y.
Arthur Hull Hayes, CBS, New York, N. Y.
William Malo, WDRC, Hartford, Connecticut

DISTRICT MEETINGS: In company with President Neville Miller, the Director attended 18 meetings in the 17 NAB Districts, starting in Philadelphia on October 19, 1942, and concluding in Boston on December 10, 1942. For this series of District meetings, two booklets were prepared: one contained four charts on the growth of radio ownership and broadcast advertising, and four tabulations of the distinctive advantages of radio as an advertising medium; the other contained summaries of eight topics of discussion at the sales meetings held in conjunction with these District meetings.

In some Districts these sales meetings were held as a part of the general district sessions; in others, they were conducted simultaneously with the general sessions. In each instance, the Director is sincerely indebted to the following District Chairmen of the Sales Managers Committee for their counsel and help in the organization and conduct of these meetings:

Kingsley F. Horton, WEEI, Boston, Massachusetts
Charles F. Phillips, WFBL, Syracuse, New York
John E. Surrick, WFIL, Philadelphia, Pennsylvania
J. Dudley Saumenig, WIS, Columbia, South Carolina
John M. Outler, Jr., WSB, Atlanta, Georgia
J. C. Eggleston, WMC, Memphis, Tennessee
William I. Orr, WBNS, Columbus, Ohio
J. B. Conley, WOWO, Fort Wayne, Indiana
James F. Kyler, WCLO, Janesville, Wisconsin
Sam H. Bennett, KMBC, Kansas City, Missouri
Barney J. Lavin, WDAY, Fargo, North Dakota
Clark A. Luther, KFH, Wichita, Kansas
Jack Keasler, WOAI, San Antonio, Texas
W. E. Wagstaff, KDYL, Salt Lake City, Utah
Wilt Gunzendorfer, KSRO, Santa Rosa, California
Charles A. Storke, KTMS, Santa Barbara, California
W. B. Stuht, KOMO-KJR, Seattle, Washington

CO-OPERATION WITH OTHER TRADE GROUPS: Since the conclusion of the District meeting tour, the Director has continued the efforts begun earlier to co-operate with and enlist the active support of various trade associations and groups in the interests of broadcast advertising. These contacts have included the American Association of Advertising Agencies, the Association of National Advertisers, the Advertising Federation of America, the National Retail Dry Goods Association, the Radio Executives Club of New York, the Chicago Radio Management Club, the New York State Bankers Association, etc.

Included in this co-operation has been the preparation of a digest on broadcast advertising for incorporation in a Public Relations Manual now being prepared by the New York State Bankers Association for distribution to its 850 members; talks before a regional convention of the AFA and the Indianapolis Advertising Club, etc.

Through the provision of sales promotion material and success stories, the Department has assisted various trade papers in other fields to present up-to-date stories on the use of broadcast advertising by many types of accounts.

CO-OPERATION WITH GOVERNMENT AGENCIES: Where such co-operation would further the war effort, and in the interests of broadcast advertising, the Department has maintained close relations with the Office of War Information, Office of Censorship, Department of Commerce, Federal Trade Commission, etc.

COVERAGE MAPS: Just prior to the start of the NAB District meeting tour, Paul F. Peter, NAB Director of Research, released the "Recommended Standards for the Determination of Coverage Maps" tentatively approved by the Research Committee. At each of the meetings, these standards were presented for an extended discussion, culminating in a show of hands on the acceptability of the recommendations.

Since this project originated with the Time Buyers Committee of the AAAA and the President of the Radio Executives Club of New York, the Director, following the District meetings, informed this group of the approval of these standards by an overwhelming majority of the station executives to whom they had been submitted. As a result of this meeting, the AAAA agreed to provide a seal or stamp of approval of this method of determining coverage maps.

Meanwhile, the project was referred to Howard S. Frazier, NAB Director of Engineering, and the NAB Engineering Committee. This group recommended certain changes which were incorporated in the final draft submitted to the Sales Managers Executive Committee at its meeting in New York on March 9, 1943, and to the Research Committee at its meeting in Washington on March 31, 1943. From the latter meeting came a further slight modification and final approval of the standards. The Research Committee also authorized the preparation of sample coverage maps (day and night) based on these standards and the issuance of a booklet outlining the method of compiling and computing such maps. It is hoped that this material will be available for distribution at the NAB War Conference.

Industry-wide recognition should be given the following members of the group through which this project was initiated, in appreciation of their co-operation and counsel in the establishment of these standards:

John Hymes, Foote, Cone & Belding, Chairman
Miss Linnea Nelson, J. Walter Thompson Company
Charles Ayers, Ruthrauff & Ryan, Inc.
William Maillefert, Compton Advertising, Inc.
Carlos Franco, Young & Rubicam, Inc.

Thomas H. Lynch, William Esty Company, President, Radio Executives Club of New York and representative of the non-AAAA agencies

SALES CONTACTS: Utilizing contacts already established, the Director continued the campaign to gain greater recognition of broadcast advertising in fields in which the medium is used to a limited extent. Some of these efforts were of a confidential nature and can not now be disclosed, although it is hoped and believed that they will prove increasingly productive in the near future. Full details will be released in the "NAB Reports" when the time is expedient.

TALKS: The present Director spoke on various phases of broadcast advertising before the Regional Convention of the AFA in Boston, the Indianapolis Advertising Club and the Retail Advertising class at Ohio State University. In addition, he presented a luncheon talk on "Good Taste in Radio Advertising" at several of the District meetings.

PER-INQUIRY AND FREE TIME: When an analysis disclosed that the number of per-inquiry offers and free time requests received by radio stations during a six-month period in 1942 was substantially above the number of such unethical approaches in the same period of 1941, a somewhat different attack was decided upon. In the "NAB Reports" all such offers and requests were treated facetiously and sarcastically.

The immediate result was a doubling and quadrupling of the number of such attempts reported to the department and, favorably, the conversion of several such efforts to standard trade practice.

SALES MANUAL FOR LOCAL ACCOUNTS: Recognizing the special and serious problems faced by radio stations dependent for the most part on local business, the Sales Managers Executive Committee, at its meeting in New York on March 9 and 10, 1943, instructed the Director to prepare as rapidly as possible a Sales Manual for Local Accounts. This is now in production and a final draft is planned for submission to the Committee at its meeting preceding the NAB War Conference. The finished publication should be available within a short time.

RETAIL PROMOTION COMMITTEE PLAN: Acting on a resolution of the Sales Managers Committee, passed at the NAB Annual Convention in 1942, the NAB Board of Directors authorized the appointment of a Retail Promotion Committee (originally termed Department Store Clinic Committee) to investigate the present use of broadcast advertising by department stores and leading retail establishments, and to recommend ways and means of increasing the acceptance of radio in this field.

The Committee (which was later augmented to bring in non-member representatives) includes:

Paul W. Morency, WTIC, Hartford, Connecticut, Chairman
Robert E. Bausman, WISH, Indianapolis, Indiana
Gene L. Cagle, KFJZ, Fort Worth, Texas
William Crawford, WOR, New York, N. Y.
Dietrich Dirks, KTRI, Sioux City, Iowa
John Esau, KTUL, Tulsa, Oklahoma
Sherman D. Gregory, WEAF, New York, N. Y.
Kenneth K. Hackathorn, WHK-WCLE, Cleveland, Ohio
Arthur Hull Hayes, CBS, New York, N. Y.
Walter C. Johnson, WTIC, Hartford, Connecticut
C. L. McCarthy, KQW, San Francisco, California
John M. Outler, Jr., WSB, Atlanta, Georgia
Oliver Runchey, KOL, Seattle, Washington

After a preliminary investigation, the Committee selected Sheldon R. Coons, distinguished business counsel, to make the study and prepare the presentation. An outline of the project and a schedule of the proposed cost of participation for radio stations was submitted to the NAB Board of Directors at a meeting in Chicago on September 24, 1942, and approved unanimously. The campaign to raise funds was launched on October 30, 1942.

In essence, the Retail Promotion Committee Plan is designed to finance and present a study into the problems of retail selling, retail distribution and the part radio advertising may play in their solution.

It will be presented as a dramatic, four-hour Master Showing employing:

motion slide films
animation
sound motion pictures
transcriptions
charts
supplementary exhibits
printed material for distribution

It will be shown at joint meetings of the owners and managers of retail establishments and the executives and salesmen of participating radio stations.

Where it is not feasible to present the Master Showing, complete presentations in Jumbo Easel form will be available for similar meetings. Every participating station will receive a desk presentation which will be an exact photographic reduction of the Jumbo Easel form.

In both the study and the presentation, Mr. Coons will draw upon sources of unquestioned stature—men known to all in advertising, business, government, labor, management, retailing and broadcasting. All to the end that there shall be presented to the retail industry and broadcasters alike a sweeping compilation of such authoritative opinion and verifiable facts as to show conclusively how the broadcasting industry may serve the retailer.

Many leaders in the industry have termed this project the most constructive activity ever undertaken by broadcasters. Certainly it is the first industry-wide effort to sell the medium on a thoroughly sound and constructive basis.

For the tremendous energy and unlimited time that Chairman Morency has devoted to the development of this project, broadcasters will long be indebted. With the goal in sight, the entire committee hopes to raise, at the NAB War Conference, the additional funds required to complete the study and presentation.

To assist Chairman Morency in the campaign for funds, the Director has devoted more than a majority of his time since the conclusion of the District meetings. To those who are closely associated with the project, no other activity in the commercial phase of broadcasting has ever possessed either the appeal or the possibilities of the Retail Promotion Committee Plan.

THE NECESSITY FOR SALES: Elsewhere in this Annual Report you will find ample evidence of the all-out effort of broadcasting stations to help in every way possible in the successful prosecution of the war. But such efforts are necessarily contingent upon sufficient income to insure continued operation of each and every radio station.

Today, more than ever before, radio stations need continued and, if possible, increased income. The Department of Broadcast Advertising is dedicated to this task as its contribution to the war effort. To that end, individual radio stations have co-operated unstintingly. For such co-operation, the Director hereby extends his sincere thanks.

The report of this Department would be incomplete without an expression of appreciation for the complete co-operation of the entire NAB staff. Particularly helpful to the new Director was the special assistance given him by President Neville Miller, Secretary-Treasurer C. E. Arney, Jr., and Director of Research Paul F. Peter.

Respectfully submitted,

Lewis H. Avery,
Director of Broadcast Advertising.

Engineering Department

The NAB Engineering Department is now devoted almost exclusively to industry problems of a technical nature created by the war. These activities include the conservation of tubes, spare parts and other materials essential for operation; the recruiting of competent technical personnel from sources outside the industry, the maintenance of home receivers and direct assistance to stations with materiel and personnel problems. The normal work of the Department has been continued along with the wartime problems.

BOARD OF WAR COMMUNICATIONS

Neville Miller is chairman of the Domestic Broadcasting, Committee IV and a member of the International Broadcasting, Committee VI and Communications Liaison Committee for Civilian Defense, Committee XII. The Director of Engineering serves as alternate and technical advisor for the NAB president on these three committees. The work of all Board of War Communications' committees is confidential; therefore, this phase of the Engineering Department's activities cannot be reported. However, it can be said that much work has been done for the benefit of the nation and the broadcast industry.

TECHNICAL MANPOWER

It is anticipated that losses of the industry's technical manpower will be one of the most serious problems to be faced by the industry in the near future.

For many months this Department has been preaching the wisdom of training women and men, who because of age or physical fitness are not subject to military service, as replacement technicians and operators. The Executive Engineering Committee has not considered it advisable to undertake an industry operator training program as the operating practices of individual stations vary widely. Assistance and advice concerning the training problems of individual stations are always available from NAB.

The British Broadcasting Corporation has been extremely cooperative by informing NAB of their experience with technical personnel problems under wartime conditions. Recently the NAB Engineering Department, with the cooperation of the American Radio Relay League, inaugurated a campaign to recruit men and women possessing radio operator licenses or other qualifying experience for technical positions in broadcast stations. Applicants have already been registered from 37 states and the District of Columbia. Upon request, the names of registered persons are forwarded to stations. NAB makes no investigation of the registrants nor does it act as an employment agency. This function is merely that of an intermediary to bring the employer and the volunteer replacement technician together.

PRIORITIES AND MATERIALS

Conservation measures instituted by cooperative action of WPB, FCC and BWC together with the exchange of surplus materials, as implemented by the FCC catalog of surplus equipment and the NAB Swap Bulletin, have made possible the continued operation of the industry with a minimum drain upon the nation's stock pile of vital materials. So far as is known by NAB, no station has been off the air for longer than a brief period due to a lack of replacement tubes or parts.

The NAB Swap Bulletin is mailed to all standard broadcast stations regardless of NAB membership. Likewise, the columns of the Swap Bulletin are available to all broadcasters. Thirty-three issues of the Swap Bulletin have been published and some of the statistics are interesting. A total of 449 items wanted by 279 stations were listed. The "For Sale" columns offered 1,560 items from 272 sellers. Through the joint NAB-ARRL appeal to amateurs for the sale of their transmitting tubes to broadcasters, 1,111 transmitting tubes were made available to the industry.

The delivery of necessary replacement materials to broadcasters has been expedited by the granting of the preference rating AA-2X which is comparable with the priorities accorded military requirements.

MAINTENANCE OF HOME RECEIVERS

There is a growing realization that the effectiveness of broadcast station operation is dependent upon the continued maintenance of home receiving sets. Although not serious at the present time, this problem has been aggravated by the loss of substantial numbers of radio service mechanics to the armed services and other industries, as well as the temporary shortage of some replacement parts and tubes. The Engineering Department has devoted much of its efforts during recent months to this phase of the industry's wartime technical problems. This work is being carried on in close cooperation with governmental agencies involved and other NAB departments.

RECORDING STANDARDS

The work of the Recording and Reproducing Standards Committee has been suspended for the duration of the war. However, sixteen of the most important items of standardization have been approved by the NAB Board of Directors in accordance with the Committee's recommendations. The Engineering Department is constantly encouraging the wide-spread use of the standards which have already been adopted by many recording organizations, governmental agencies and broadcasters.

GENERAL

Among the varied activities of the Engineering Department, the following are worthy of special mention. Publication of a directory of tube repairing facilities, priority instructions to broadcasters, the purchase by broadcasters of transmitting tubes from amateurs, relaxation of FCC operator requirements, a continuous review of technical publications with reading recommendations for broadcast engineers and executives, selective service problems and the investigation of new broadcast equipment developments.

EXECUTIVE ENGINEERING COMMITTEE

John V. L. Hogan, Chairman, WQXR
Franklin M. Doolittle, WDRC
G. Porter Houston, WCBM
E. K. Cohan, CBS
O. B. Hanson, NBC
Howard S. Frazier, NAB, ex-officio

Respectfully submitted,

HOWARD S. FRAZIER,
Director of Engineering.

Labor Relations

Since we last met, we have seen the most drastic changes in labor relations since the right to strike was established a hundred years ago.

The whole field of relations between men and management is now under the control of the federal government.

Collective bargaining is only a sham. Either side in labor negotiations can end them at will, knowing that compulsory arbitration must follow. And even if a bona fide collective agreement is arrived at, it must be submitted to the federal government for approval.

Wages and salaries have been "stabilized". That means "frozen", with some little leeway.

Labor is forbidden to strike.

Not only does the government now fix maximum hours of employment (without penalty) but also tells management just how long its men shall work.

Some headway has been made toward "freezing" men in their jobs if essential to the war effort, and labor conscription within the coming year is the probable development which will complete the governmental grip on this field.

All this is for the best. To fight a regimented economy effectively, we must regiment ours. If we want to be free men in the world of the future, however, we must be ready to rid ourselves of this regimentation once the war is won.

In so doing, if management is wise, it will seek the support and cooperation of organized labor. Most labor unions, like management, are chafing under virtual bureaucratic dictatorship. They will be ready and willing to help management restore economic freedom—if management does not try to define economic freedom as unbridled freedom for management and serfdom for labor.

II

The past year, likewise, has been of unprecedented importance in radio's own labor relations. A start was made toward determining whether radio was responsible for the permanent maintenance of those members of the American Federation of Musicians who could not make a living with their instruments.

James C. Petrillo, president of the musicians union, started the ball rolling when, in June, 1942, he announced to his convention that A. F. of M. members would make no recordings after August 1. In calling this strike, Mr. Petrillo defied the President of the United States and broke labor's pledge of no strikes for the war's duration. That apparently troubled Mr. Petrillo not at all. Nor did it bother him to turn down the pleas of Army, Navy and Marines for records for our soldiers abroad. Until forced to do so by a Senate committee in February, Mr. Petrillo would not even say what he wanted the recording companies to do, to permit the resumption of recording. Under the committee's pressure, he finally stated that he wanted the recording companies to contribute cash to a union-managed "unemployment fund". This they refused to do.

Sooner or later, the issue will be decided, and recording will be resumed.

Whatever the decision, it likely will determine in the long run whether the private WPA for musicians which is now maintained in many radio stations must be continued. The sooner this question is decided, the better for all concerned.

III

I have done my usual chores during the past year to the apparent satisfaction of most of the members. These have included:

(1) Keeping the entire membership advised of pertinent developments in the field of labor relations.

(2) Assisting the industry and individual stations in applying the multiplicity of labor laws, rules and regulations to their operations.

(3) Helping individual stations in their dealings with labor unions.

(4) Keeping both labor union officials and governmental officials dealing with labor advised of radio's labor problems and obtaining their help in solving them.

(5) Dealing with the still troublesome problems which arise from labor's desire to reach the American people by radio.

Along with this routine work (if labor relations work can ever be called routine), I have spent much of my time on the A. F. of M. problem. The balance has been devoted to the war effort. Last August Robert Patterson, Assistant Secretary of War, asked me to handle the labor relations in a Boston munitions plant for several weeks. This assignment was successfully completed. I have also been working with the employers' group at the National War Labor Board with the thought that, in so doing, I could be of assistance to radio both directly and indirectly in helping to effectuate the national wage stabilization program. I wish to thank the Association for permitting me to undertake these governmental assignments.

IV

The Labor and Wage and Hour Committees of the Association have been extremely helpful during the past year. I could not close this report without a special note of appreciation for the advice and guidance I have received from their good Chairmen, Ralph Brunton and C. T. Lucy.

Respectfully submitted,

JOSEPH L. MILLER,
Director of Labor Relations.

April 10, 1943.

Legal Department

I

Following the Cleveland Convention, hearings on the Sanders Bill to amend the Communications Act were resumed May 19, 1942. The reported testimony, comprising 1058 pages, should be of great value to the Interstate and Foreign Commerce Committee in future deliberations. In January, 1943, Representative Holmes (R-Mass.) introduced in the 78th Congress a bill virtually identical with the Sanders Bill, and in March Senators White and Wheeler jointly introduced a bill which also included the recommendations of the Federal Communications Bar Association, but went even further and included, among other provisions, the three proposals advanced by NAB at the hearings on the Sanders Bill last year. NAB had endorsed in principle the Bar Association's recommendations. There is a distinct possibility, it is generally believed, that the present Congress will amend the Act.

Also on the Congressional front are three bills which would prohibit the advertising of alcoholic beverages. The Johnson and Capper Bills in the Senate, and the Culkin Bill in the House, were referred respectively to the Senate Interstate Commerce Committee and the House Interstate and Foreign Commerce Committee, where they now remain. Hearings have not been scheduled, and appear unlikely to be. NAB, as in the past, is opposed to these measures.

Executive Resolution "E", the adoption of which by the Senate would make the United States party to the International Copyright Convention without prior revision of our domestic copyright law, remains dormant in the

Senate Foreign Affairs Committee. A continuing threat to broadcasting, its chances of being reported out at this session are believed to be slim.

Forty-three state legislatures have been in session during 1943 to date, and Alabama will meet in May. Twenty-one have adjourned sine die. In nine states bills to bar liquor advertising on the radio were introduced, of which seven were killed or died, and two are still in committee. North Carolina and Washington enacted libel laws favorable to broadcasting. Several bills objectionable to radio are buried in committee or have died with the close of the session. Broadcasters appointed by NAB to serve as legislative contacts in the various states have been most helpful.

II

Preparation of the NAB Selective Service Handbook and Supplements, correspondence with stations relative to occupational deferment of key men, and contact with National Headquarters of the Selective Service System, have consumed considerable time and effort. Activity and Occupation Bulletins issued by headquarters for the guidance of local boards have not prevented induction of many key employees in broadcasting, although the industry as a whole, it is believed, has been accorded reasonably fair treatment. The training of women, men over 45 and men in 4-F remains, as NAB has repeatedly stated, the safest course to pursue in order to insure sufficient manpower for continued operation. With the drafting of fathers imminent, the picture daily looms more grim. Under the law the local boards, subject to the right of appeal to the Boards of Appeal, have the power to determine all claims and questions relative to occupational deferment. Under the Selective Service System's basic policy of decentralization, the power of State Directors seems to be increasing with corresponding reluctance on the part of the Director of Selective Service to intervene in occupational cases. Employers have no right under the law to appeal to the President in occupational cases. General Hershey and the State Directors have the authority in their discretion to take such appeals, an authority they exercise only infrequently. The local boards, at the grassroots, are virtually all-powerful, and are seldom reversed if they have observed procedural regulations. Counsel has been of some help in a number of cases where stations requested investigation by headquarters; but the prospects for the future appear less bright.

III

The principal task performed by the Code Committee was the clearing up of a misunderstanding between the Cooperative League of the U. S. A. and certain stations with respect to the purchase of time by the League. The committee has met twice since the last report.

In November, the Federal statutory three-judge court in New York dismissed the network suits against the Government to enjoin operation of the FCC's network regulations. The cases were dismissed on the merits without taking evidence. The Supreme Court's decision on the networks' appeals is expected shortly.

Contacts with OPA, WPB, WMC, Selective Service, and other Government agencies have been maintained. Relaxation of the gasoline regulations to make engineers and technicians eligible for Class C coupon books for driving necessary to the installation and servicing of temporary remote-control pickups was secured. Efforts to secure similar relaxation for other workers in the industry were unsuccessful. Correspondence with stations and their attorneys on various and sundry matters, and consultation with members of the staff have consumed considerable time.

Russell P. Place,
Counsel.

April 10, 1943.

Promotion and Circulation

This department continues to be almost wholly concerned with government departments. It operates in the belief that broadcasting is the medium of mass communication which can do most to inform, instruct, persuade, inspire and bring a moment of relief through entertainment to all those millions who are holding the home front. If the home front is breached, the war front collapses.

By their actions broadcasters signify that they realize this nation is fighting for its very existence and that it needs every help within their power to give.

The industry provides a tremendous amount of support to the nation's war effort. As calculated by the NAB research department it amounted to 5,556,000 announcements and 601,000 programs of local origination in 1942.

Elmer Davis, director of the Office of War Information, officially reported radio's contribution another way. On March 26, 1943, he stated that $86,900,000, divided, $71,570,000 for time and $15,330,000 for talent, was the dollars and cents value of the over-all radio effort of bringing war information to the public.

To continue to do so much in the future will necessitate both courage, aggressiveness and ingenuity on the part of the industry. Ability will depend on three factors—men, materials and money.

MANPOWER

Stations which have not yet safeguarded their operation by placing women, over-age men and 4-Fs in key spots are faced with sizable difficulties now, larger ones in a few months. Paul McNutt said it all last January 4: "Employers must accustom themselves to the fact that, as the war goes on, the armed services will almost certainly claim every replaceable male employee of military age and fitness in every industry, regardless of essentiality."

By acting promptly stations have one last chance to secure dependable replacements for the duration. It is our feeling that some measure of relief may be afforded by checking lists of nearby students who have been enrolled in the ESMWT-NAB "Fundamentals of Radio" courses. Not all have entered the armed forces because men and women of all ages and physical fitness were and are among the students. Chief engineers and managers report that graduates make excellent technicians. For institutions to contact, consult NAB REPORTS of April 2, 1943 and the Annual Report issue of NAB REPORTS, May, 1942.

For the next fiscal year the ESMWT program has received the blessing of the Bureau of the Budget. Officials believe it will receive Congressional approval. To get a course repeated or started consult the ESMWT Institutional Director at nearest school. Conditions demand that students should be women and men not required by the military. Ignore any prejudice about employing women. They are doing an excellent job for BBC and an ever increasing number of American stations. Signal Corps schools are full of them; they will work on sets more intricate than standard band transmitters.

MATERIEL

Frank McIntosh, assistant director, Radio & Radar Division, WPB, is coming to the Chicago War Conference to tell the industry about transmitter and receiver tubes and parts, what he expects to happen during the forthcoming twelve months and what he invisions for post war radio.

The March-April tube survey undertaken by NAB for Radio & Radar was reported "excellent and most helpful" by WPB.

After the War Conference another check will be made as to the supply of radio repairmen. They have been declared essential to the war effort in Selective Service Occupational Bulletin No. 42, December 22, 1942, and again in Activity and Occupation Bulletin No. 31, effective March 1, 1943.

Over ten thousand copies of a folio dealing with this matter were distributed by NAB with the help of broadcast stations, jobber and service associations and set manufacturers. At this writing it would seem that the radio service operation must be streamlined in areas where a sufficient flow of work would permit a breakdown of the service job. Radio repair will also receive study at the War Conference.

Already "coverage" conscious, broadcasters apparently must go all the way and become "circulation" conscious. Unless individual sets (circulation) are maintained in repair, the war effort will suffer. Specifically we mean that Mr. Morgenthau's continuous bond sales will flop, that Chester Davis' food program will suffer, that home front morale will deteriorate.

WITHOUT RADIO, MORALE SUFFERS

What actually happens to the morale of families, deprived of accustomed news and other broadcast services, was demonstrated this spring when many farm families were unable to buy radio batteries. Large numbers became resentful, uncooperative and disgusted. The state legislatures of North Dakota, South Dakota, Nebraska, Minnesota, Iowa and Indiana were "up in arms" and memorialized the Congress of the United States to lift restrictions on the manufacture of radio batteries. The Illinois House unanimously adopted the battery resolution on March 31 and it has been referred to the Senate Executive Committee. There were speeches in Congress.

One investigator summed up the farmer's feeling as follows:

"Inasmuch as farmers depend upon the radio, in many instances solely, for news and for current market information and other information pertinent to their work, it would seem extremely important that their radios be kept operating. The increased interest in government regulation affecting farming and the marketing of farm products, at this time particularly, enhances such desirability. As one listener puts it, 'radios are an absolute necessity for farm welfare.'"

Another said: "We had a similarity of reports regarding farmers' feelings over the situation of shortage of batteries for radio sets. First, farmers consider radios a necessity not a luxury. Some appeared to be tolerant because of the war situation. Others were discouraged and some seemed to be disgusted."

Another reported: "Virtually all replies indicate radio as one of the major factors in keeping up morale."

Direct statements by farmers were more pungent. Said one: "I could get along without sugar or coffee, I could even go barefooted, but when we can't get batteries for our radio, it is just terrible."

Another stated: "Have a boy in service. Are up early to hear the news. We would feel like working harder if we had the use of our radio."

And another: "What will us farmers do without a radio? No hog market, no chicken, egg, grain markets of any kind. And no news."

It is unfortunate that farmers were the unwilling guinea pigs whose reactions, when deprived of broadcast service, aroused such public indignation. But this experience has clearly demonstrated to all the importance of maintaining a radio in every American home throughout the emergency.

Respectfully submitted,

Arthur Stringer.

Research

There is considerable progress to report on the research activity of the NAB since the Cleveland Convention in May 1942. The NAB Research Department, under the direction of the NAB Research Committee, has completed its study of Station Coverage and is preparing a publication of its recommendation on the subject. This will be mailed to the membership as soon as it is printed. The title of the publication will be "How to Determine Station Coverage".

The Research Department has also completed its tabulations and calculations of Census data to be included in the "NAB Market Data Handbook for Broadcasters". Copy for the book is in the hands of the printer and will be sent to NAB members as soon as the printing is completed.

The Research Department has held to a minimum the number of questionnaires addressed to stations from the Association consistent with the handling of the problems facing the industry. Also, NAB has exerted its efforts to dissuade outside organizations from conducting surveys addressed to broadcast stations. Recent conferences have been held with FCC and Bureau of the Budget personnel on the subject of questionnaires addressed to stations and forms required by FCC from stations. The FCC has recently announced that it is now in the process of revising its forms. It is hoped that the FCC efforts along this line will result in material savings of employee time and station expense in keeping records, preparing applications, and answering questionnaires.

There were two surveys addressed to broadcast stations during the past year by the NAB Research Department which were of particular importance. These were the questionnaires on use of musicians by broadcast stations and a survey of the manpower situation in the industry.

In the following paragraphs, the principal or time consuming tasks handled by the NAB Research Committee and the Research Department are discussed by subject matter.

STATION COVERAGE

Station Coverage has been a topic for discussion in the ranks of broadcasters, advertising agencies, and advertisers for almost as many years as there has been advertising use of radio. There has been a growing dissatisfaction on the part of agencies and advertisers with the coverage claims stations have been making because there has been no consistent definition as to just what station coverage means and there has been no uniformity in arriving at coverage claims. Also, there has been a failure in most cases to clearly set forth how coverage claims were arrived at to give some clear indication as to the value of the claims.

The Radio Executives Club of New York in conference with the NAB Sales Managers Executive Committee suggested that NAB prepare a standard coverage specification. The Time Buyer members of the REC stated their complete satisfaction with a coverage method defined as a physical determination of area served by stations, measured through the use of audience mail analyses and signal strength surveys, and accompanied by market data to evaluate the service area.

The NAB Sales Managers Executive Committee asked the NAB Research Committee to undertake a study of the Time Buyers proposal and prepare a recommendation which could be sent to all stations setting forth the need for standardized coverage claims, the definition of Station Coverage most desired in the field of radio advertising, and, the methods recommended with suggestions to aid stations in applying methods.

The NAB Research Committee participated in a survey conducted by Herman S. Hettinger of the Wharton School of Finance of the University of Pennsylvania, addressed to advertising agency and advertiser executives. The summary of the findings of the results of this survey was published in July 1942 by the NAB under the title, "What Radio Buyers Want To Know". The interest of the Research Committee in the survey was to determine the attitude of agencies and advertisers on the specific question of Station Coverage. Dr. Hettinger's survey demonstrated that the views of the Time Buyer members of the Radio Executives Club of New York were in perfect agreement with the views held by agency and advertiser executives across the country. Findings indicated that coverage ranked high in the list of information desired, figured strongly in the factors listed as important in the purchase of station time and, in answer to the question as to the type of coverage preferred, audience mail ranked first and field intensity studies ranked second. It should not be overlooked that in answer to the question on type of coverage preferred, a substantial number answered such, as "conservative and uniform coverage data", "standardized data", and, "accurate factual data".

The characteristic view within the advertising fraternity seems to be one of reasonable tolerance in the matter of definition of station coverage and method employed to determine coverage so long as the objective of standardization is attained. NAB is anxious to contribute to this end because the broadcast advertising industry will gain materially if the purchase of station time can be simplified and the reasonable requests of the advertisers and agencies met.

The NAB recommendation on Station Coverage is now in the hands of the printer and will be distributed to member stations and advertiser and agency organization executives in the very near future. The booklet will contain a recommendation on method of determining the station coverage area, and the manner of handling the calculation of the market data used to interpret the coverage area. Also included will be a sample station coverage presentation including a demonstration of maps, titling, and copy. The Time Buyers Committee of the American Association of Advertising Agencies has agreed to work with the NAB on the Station Coverage presentation and authorized the use of the 4A Stamp of Approval on the presentation format. The recommendation will also include a discussion of procedure on method, handling of figures, printers specifications, etc., designed to aid the station in using the recommendation.

The essence of the recommendation as to method is as follows: Station Coverage is defined as the physical limits of the area served as demonstrated by actual listening. The half millivolt signal strength contour is used to give evidence of the deliverance of signal to show where the station can be heard to the extent of one-half millivolt signal. Audience mail is used to establish the actual coverage area since audience mail reflects the location of actual listeners. The coverage interpreted from audience mail analysis by county is in terms of market data consisting of population, number of families, number of radio families and selected retail sales data. Under this definition, the physical area of a station's coverage is determined without reference to audience competition. The measurement represents a potential in service in that it assumes that under ideal conditions the station is capable of serving all radio families within its primary area. In other words, the method produces only the physical limitations of station service without reflecting audience competition. (NAB is currently studying the problem of audience measurement and will prepare a recommendation on that subject later on.)

METHOD

SIGNAL STRENGTH: The NAB Engineering Committee prepared a recommendation on the subject in 1940 under the title, "National Association of Broadcasters Recommendation for Field Intensity for the Purpose of Estimating Field Contours of a Broadcast Station in the Regular Broadcast Band."

In the introduction of the report an objective of the recommendation is stated, "that the interpretation and presentation of such measurements might be such that the work of one engineer might readily be compared with that of another, and the claims of one station compared with those of another, it is desirable to have a uniform practice of procedure for doing this work". It is recommended here that the engineering procedure for measuring field strength, as set forth in the report mentioned above, be followed. It is highly desirable that the station complete a signal strength survey report as prescribed because of its engineering value and also its value to management in effectively gauging the efficiency of physical equipment used in radiating a signal. Such a report will also serve as substantiating material for the signal strength data drawn from it in this coverage method.

For the purpose of the recommendation, signal strength measurements are used to show where the station may be heard within a standard of signal intensity. The signal strength data used will not be directly related to audience mail analysis, but will serve as an orienting factor.

The signal strength measurement findings employed in this coverage recommendation are confined to the .5 millivolts per meter contour ground wave. Such measurements are made in the daytime and therefore the half millivolt contour will be presented on the daytime coverage map and will not appear on the night-time map. It is fully realized that the arbitrary standard of .5 millivolts per meter is not a true criterion of effective coverage. However, the uniform information for all stations will be valuable for the advertising fraternity on the physical radiation of signals. And, more important in this recommendation, the half millivolt contour will enable better understanding of the commercial coverage claim as produced by audience mail.

The descriptive material to be used in conjunction with signal strength should include: date of the survey, name of the engineer and his qualifications, description of the method used, setting forth what portions of the data were obtained through actual measurement and which were arrived at by calculation, and the total number of field strength readings taken.

AUDIENCE MAIL: Audience mail analysis is used to introduce the factor of actual listening. Interpretation of audience mail is confined to a geographic examination of its distribution by county. Audience mail analysis is capable of showing the where of listening audience but is not offered to indicate, to any degree, the amount of listening or the relative popularity among stations. The number of pieces of mail analyzed will have no significance beyond the specification that a sufficient amount of mail be used to insure an adequate statistical sample. Mail will be analyzed as to the county from which it is sent. Mail which cannot be identified positively as to the location of the writer will not be used in coverage calculation. Similarly, mail for coverage calculation will be confined to that which can be identified to specific programs.

Audience mail analysis will be confined to that which is drawn in response to programs originated by stations. This specification is made because the recommendation aspires to produce coverage claims of individual stations. It has been clearly demonstrated in network research that there exists differences in the coverage of individual stations when carrying network programs as compared to their coverage for locally produced programs. It is obvious, therefore, that there must be separate calculations for the two. This recommendation is confined to individual station coverage and will, therefore, have its commercial value confined to matters of national spot business and local business claims.

Separate analyses of audience mail addressed to day programs and night programs are to be made to produce separate day and night coverage maps. It is obvious therefore that the identification of the program producing the mail response must be positive. The segregation of day and night will be based on the hour of average sunset as set forth in the FCC Standards of Good Engineering Practice.

Audience mail used for coverage calculation may fall into one of two broad classifications. An identification of the type used is to be presented on the face of the coverage map. The two types of mail are: 1. Cumulative Mail—that received over a period of time to all locally produced programs during the day (or night) which can be definitely identified to programs; and, 2. Mail Produced by Special Offers—a concerted drive for mail by offering an object of no intrinsic value through announcements spotted at various times during the day (or the night).

Coverage maps produced by the two methods, under ideal conditions, will not differ materially so long as there is a sufficient volume of mail to constitute an adequate sample and the appeals to the audience contain no bias which would cause a higher degree of response from any segment of population.

The use of Cumulative Mail should minimize the effect of any bias because of the averaging influence of response to all programs over a period of time.

Special Offer Mail has the advantage of ease in handling since each response is quickly identified, contains a return mail address, can be tailored in the spotting of announcements to insure a representative sample of the time period measured (before or after sunset). The sample can be developed in a relatively short time by a concerted station campaign. Disadvantages of the Special Offer analysis lie in the possibility of producing bias if great care is not exercised in the matter of selecting the object offered and the volume of mail may not be as large as could be expected in response to all programs over a period of time.

If Special Offer Mail is to be used, particular care must be taken in setting up the entire campaign for audience mail. The two items to be offered must be selected for clear differentiation since one will be offered during the daytime (before sunset) and the other during night-time operation (after sunset). In this way, separate samples will be accumulated for calculating day and night maps. In the spotting of the announcements of the offers, care must be taken to distribute the announcements as evenly as possible over the full period measured. Care must also be taken to avoid use of network program adjacencies since this will tend to restrict the area measured.

ANALYSIS OF COVERAGE: Coverage is analyzed by relating the count of mail received from each county to the 1940 Census figures of radio families within each county. The number of letters received is divided by the number of radio families and pointed off decimally to reflect mail per thousand radio families. As an illustration, if 625 letters are received from a given county having 5,000 radio families, the calculation takes the form of dividing 625 by 5,000, producing a .125 result. By moving the decimal point three places, the index of response becomes 125 letters per thousand radio families.

The home county, or specifically the county in which the station's principal studios are located, will be used as the base for evaluating the response of all other counties from which mail is received. The evaluation takes the form of calculating the percentage relationship of each county to the home county; that is, by dividing the response index of each county by the response index of the home county.

The degree of coverage of each county is gauged on the percentage relationship each county bears to the home county. Primary coverage of a station may be defined as that area or those counties in which the station has a strong signal and a substantial audience at all times. The radio time buyers have indicated their desire for a three group classification of the degree of coverage; the first group to consist of those counties having an index relationship 50% or greater than the home county; the second classification—those counties having 25 to 50%; and, the third, 10 to 25%. These will be termed "Intense", "Excellent", and "Good", respectively.

Experience in the industry indicates that primary coverage extends to those counties having 25% or greater relationship to the home county. Primary coverage, therefore, is divided into two parts—"Intense" and "Excellent". Secondary coverage is that mentioned above as "Good"—counties having 10 to 25% relationship to the home county.

The classifications of coverage, then, are as follows:

Primary—Intense	50% or greater
Primary—Excellent	25% to 50%
Secondary—Good	10% to 25%

A substantial volume of letters should be used for the audience mail coverage analysis. No minimum count of mail can be prescribed, since there are too many factors involed which would control the amount of mail received by stations. Among these factors are the classifications of stations; the population of the area served; and the responsiveness of the audience, which is coupled with the appeal for mail the station has made in the past to develop responsiveness, etc.

The safest test of sample adequacy which can be offered at this time is that point in audience mail analysis when additional quantity of mail does not alter the coverage classification of individual counties. This procedure can be followed without undue hardship by progressive analysis—analyzing the mail at intervals during the period selected for accumulating the sample.

MARKET DATA

In conjunction with the Station Coverage Recommendation, NAB is preparing a Market Data Book for Broadcast Stations which will contain basic information for station use. Prior to the Cleveland Convention, the Research Department presented in the NAB Reports, the Census figures of 1940 count of families, percent radio ownership, and radio families for several states which had been completed by the Bureau of the Census by that time. Following the Convention, this work was completed for all states and presentation in the REPORTS included such information for each state, by county and by cities of 25,000 or more population. It was necessary for the Research Department at the direction of the Research Committee to calculate projections of the radio family figures since the Census was not complete in coverage of all families.

The Market Data Book will contain the radio family figures for each state and county with separate figures for urban, rural non-farm and rural farm families. Also, for each state will be presented a complete list of all urban places having population of 2,500 or more. Census figures of population by county and city will be included. In the same detail, figures from the Retail Census of 1939 will be given showing the number of stores and sales in dollars for total retail trade, with separate figures for the food group, the general merchandise group, the apparel group and drug stores. These four classifications on retail business are included in the Market Data Book because of their commercial significance in broadcast advertising.

Information in summary form will be presented in the book to show the growth of radio families since 1923 and a discussion of the relationship of radio families to total receiving sets in use. There will also be a summary section presented on the change in civilian population from the Census date, April 1940 to May 1942. This will be given in detail by state and metropolitan districts. There will also be a section devoted to metropolitan districts giving the complete information of radio family population and retail trade figures.

Copy for the Market Data Book is now in the hands of the printer and every effort is being made to distribute it to the membership and to advertiser and agency executives as soon as possible.

MANPOWER

The importance of the problem of manpower to operate the industry compelled NAB to address a questionnaire to all stations in September of 1942. A similar questionnaire had been sent to all stations on the subject of selective service in May 1941 but was confined to technical personnel. The drains of manpower from all departments of radio operation necessitated our having available information on all classes of employees.

The manpower questionnaire was sent to 919 broadcast stations. Replies were received from 667 stations, representing a 73% response.

The survey shows that on October 19, 1940, the average station employed 22.5 persons. On September 15, 1942, the station average had dropped to 21.1. The employment of men by stations dropped from the average of 18 to 16. Employment of women rose from 4.4 to 5.0. In the two-year period, all station employment decreased 6.2%, with a 10.9% decrease for men and a 12.9% increase for women.

In the two-year period, 26.2% of the number of men employed by stations were lost to the armed services. Roughly, two-thirds of those going into the armed services enlisted or were ordered to active duty in reserve capacities. About 35% were drafted.

Considerable concern has been expressed over the migration of employees within the industry to other stations, other civilian employment, as well as to the armed services. The survey shows that the number of persons leaving stations between October 19, 1940, and September 15, 1942, represented 69.5% of the personnel employed at October 19, 1940.

On September 15, 1942, 64.4% of all persons employed by stations were in draft ages 20 to 45 years. In addition, boys of ages 18 and 19 constituted 4.3% of all employees, bringing the present percentage within draft age to 68.7%. A selective service classification of those within ages 20 to 45 years on September 15th as expressed in percentages shows men classified in 1A or 1B to be 9.0%; those in 2A or 2B, 2.3%; those holding reserve commissions or awaiting call, 1.3%; classification 3A, 67.6%; classification 3B, 1.5%; classification 4, 9.5%; and not yet classified, 8.8%.

Stations classified as essential men to their operation only 19% of their employees. In terms of average employment per station, only 4 of 21 were listed as essential. In terms of actual figures as reported in the survey, 608 stations showed total employment of 12,821 and listed as "necessary men", 2,464. Of this number, 150 were in Selective Service classification 1A, 116 were in 2A or 2B and 1,958 in 3A or 3B. Approximately 67% of the men in 3A and 3B have dependent children. Thus it can be readily seen that a request of the industry to National Selective Service for deferment of essential employees involves an exceedingly small number of registrants.

A subsequent analysis of the questionnaire made to reflect the number of persons between the ages 37 to 45 showed that 20.5% of "key people" in radio stations were affected by the Selective Service order restricting the drafting of men in that group.

The Research Department is currently preparing a simplified questionnaire to revise the information since manpower is probably the most acute problem facing the industry today. A minimum of information will be required of stations to reduce the burden placed on them. However, it is imperative that full cooperation be given NAB in this matter.

MUSICIANS

The Research Department has devoted much time to the collection of information needed in treating the problem of the musicians' ban on music recording. A questionnaire on employment of musicians in the industry was sent to all stations July 13, 1942. The survey produced valuable information, some of the results of which have been presented in the NAB REPORTS. No complete report has been made, since the developments in the musicians' problem have been such as not to warrant such use of the information.

The Research Director attended the Congressional Hearings of the A. F. of M. and has made studies of the factual claims set forth in testimony by Mr. Petrillo and Mr. Padway. Advisability of some consumer research was indicated in the testimony and the Research Department has undertaken surveys to develop the actual facts on the subjects.

WAR EFFORT

The NAB Research Department has cooperated in developing information on the extent of radio's contribution to the War Effort. An average of better than 500 radio stations have consistently submitted reports on the programs and announcements carried on behalf of the War Effort each month since the Fall of 1941. The Research Department has made the analyses of the reports. The results of these analyses have been published in the NAB REPORTS. A projection of industry totals from the tabulations of nine months of 1942 shows that stations broadcast approximately 5,556,000 announcements and 600,000 programs for the entire year as their contribution to the War Effort. This represents station contributions only and does not reflect the contributions by networks and individual advertisers.

The Research Department has worked closely with the Office of War Information in matters of research on War Effort broadcasting.

EXCESS PROFITS TAX

The Research Department undertook to assemble as much information as could be made available for the use of stations in calculating excess profits taxes. Information developed has been of value although it was found that there was serious limitation of possibilities in the absence of any information for the year 1936 from any official source. The tabulation of Broadcast Service Income (net profit before Federal Tax) was presented in the NAB REPORTS, page 59 of the February 12, 1943 issue and in the separately printed NAB Tax Bulletin of the same date.

Also in conjunction with tax problems, the NAB Research Department has cooperated with the firm Alvord and Alvord, Tax Lawyers, retained by NAB, in the matter of collecting information required for Congressional Hearings and the like.

48 HOUR WEEK

The Research Department assisted in the preparation of a Data Sheet and Instructions for its use to assist stations in critical labor areas in observing the 48-hour week to conform with the Executive Order of the President. This matter has been handled by the Labor Relations Department.

MISCELLANEOUS

The Research Department assisted the National Retail Dry Goods Association in preparing a questionnaire to its membership on the subject of retail advertising. In tabulating the results of this survey, the Research Department supervised an outside organization and cooperated with NRDGA and the Retail Promotion Committee in interpreting the results.

The Research Department cooperated with the Director of Engineering and the Director of Industry Promotion in collecting information on the problems of keeping radio stations in operation during the war period. Considerable time was spent in collecting data on battery sets in use in the United States and requirements of radio tubes and repair parts.

The Research Department assisted in the preparation of graphic charts of basic radio information for the use of the Director of Broadcast Advertising.

In addition to the work outlined briefly above, the Research Department has devoted increasing time to the furnishing of information to member stations and outside organizations on the subject of radio.

From the basic records maintained by the Research Department, there appears at the conclusion of this report, analyses of standard broadcast stations in operation April 1, 1943, showing the number of stations by operating classifications and by city size with membership in NAB for each.

The Association has advanced in matters of research during the past year and is planning now the research requirements of the Association for the coming year. It appears that there are areas of broadcast operation which demand special attention from the standpoint of information which has been brought about because of the war.

Respectfully submitted,

NAB RESEARCH COMMITTEE

War Conference

NEVILLE MILLER

"The NAB War Conference made a direct contribution to the war effort. A large number of broadcasters registered and attended all the sessions and by their very earnestness indicated that they are serious in their determination to do their utmost in assisting government representatives in every way possible. Their one thought was and will be "Let's get on with the war!" The position of the radio industry in the war has been strengthened by the Conference."

C. E. ARNEY, JR.

"There is an almost universal feeling on the part of those who attended the NAB War Conference that it was a thoroughly worthwhile meeting. The total absence of entertainment features, which have high-lighted past NAB meetings, added to, rather than subtracted from the interest.

An atmosphere of seriousness surrounded the entire proceedings. Most remarkable was the fact that more than 400 broadcasters attended the several breakfast sessions held on Wednesday and Thursday mornings. The total registration of broadcasters, well over a thousand, eclipses all previous attendance figures.

The many government officials representative of the war agencies who were present, expressed gratification at the opportunities afforded to discuss mutual problems with broadcasters. Those from the industry are unanimous in their statements that the Conference was highly beneficial in bringing them a clearer understanding of their relations to the war."

BY-LAW AND CODE AMENDMENTS

Three amendments to the NAB By-Laws were adopted at the annual meeting held in connection with the recent War Conference.

There was also an amendment made to the NAB Code. (See Resolution No. 11 on subsequent page of this report.) These By-Law and Code amendments are now being incorporated in a reprint of these two documents which will be sent to the members within the next few days.

Resolutions

Following are the resolutions passed at the recent NAB War Conference in Chicago:

1. The National Association of Broadcasters expresses its appreciation to the various government agencies which have cooperated with the Association and the radio broadcasting industry in the solution of the numerous problems which have confronted the industry during the past year. The Association is particularly indebted to their representatives who have attended and taken part in the Association's 1943 War Conference.

WAR CONFERENCE TRANSCRIPTS

A complete transcript of all pertinent and valuable material taken at breakfast meetings and general sessions of the War Conference will be available soon for NAB members and will be sent in printed form. Please withhold any requests for this material or portions of it until you have seen the transcripts.

---

2. The National Association of Broadcasters expresses its deep appreciation to the representatives of our armed forces, government agencies and others appearing on the program of the 1943 War Conference, for the recognition they have accorded our industry for the role it is playing in the common interest of victory, and the Association pledges its continued efforts in this our primary task.

The Association also expresses its appreciation to the federal agencies here represented which have so materially contributed by their counsel and aid, to make possible these accomplishments of service.

---

3. The assistance rendered by Edgar Bill, retiring Director of the 9th NAB District, and by Leslie Johnson, incoming Director, in assisting in the arrangement of the many details incident to the Conference, is deeply appreciated.

---

4. To the management and personnel of the Chicago NAB member stations is due an expression of special commendation. They have fulfilled their role as hosts in a most creditable manner and at no little sacrifice of time and energy. We thank and congratulate them.

---

5. To Edward T. Lawless, Vice President and Managing Director, Richard L. Collison, Director of Sales, and the entire Palmer House staff, we extend an expression of our sincere appreciation. The uniform courtesy which has marked their contacts and the efficient manner in which their part in all of our meetings and luncheons has been handled has made this one of our outstanding meetings.

---

6. To the Chicago Association of Commerce and particularly to William J. Hennessy, Manager of the Bureau

RESOLUTIONS

(Continued from page 201)

of Conventions, a word of thanks for all the assistance given in arranging the many details incident to setting up the conference.

---

7. The National Association of Broadcasters extends sincere thanks to Gene Carr, author Lang-Worth Feature Programs, Inc., Wendell Corey, narrator and the Columbia Recording Corporation for the script, production, and recording of the MEMORIAL TO RADIO'S WAR DEAD.

---

8. The 21st Annual Meeting of the National Association of Broadcasters hereby approves the official acts performed since the last annual meeting by its duly qualified officers.

---

9. WHEREAS, Brand names and trademarks, possess established values of benefit to consumers and producers alike in the marketing of commodities, and

WHEREAS, There appears to be no valid reason why such established values in brand names need to be destroyed or in any degree impaired in order to control the sale of commodities during wartime;

BE IT RESOLVED: That the National Association of Broadcasters is unalterably opposed to any and all measures, governmental or otherwise, looking to the abolition of brand names and trademarks in the marketing of commodities.

BE IT FURTHER RESOLVED: That the National Association of Broadcasters heartily endorses the proposed study of this question authorized under the Halleck resolution, H. Res. 98, confident that a thorough study will completely sustain our position.

---

10. RESOLVED: That the President appoint a committee of the Association to study and report to the Board of Directors with respect to the establishment of an NAB Bureau of Audience Measurement.

---

11. RESOLVED: That the Code of the National Association of Broadcasters be amended by adding at the end thereof the following new section:

"Solicitation of Memberships"

"Solicitations of memberships in organizations, except where such memberships are incidental to the rendering of commercial services such as an insurance plan either in respect to casualty to life or property, or for membership in the American Red Cross or like organizations engaged in charitable work, are deemed to be unacceptable under the basic theory of the Code and therefore time should be neither given nor sold for this purpose."

---

12. WHEREAS, James C. Petrillo, on behalf of the American Federation of Musicians, has demanded of electrical transcription companies that they pay to the American Federation of Musicians a percentage of the gross receipts received by such companies from the broadcasting industry for library transcriptions, and

WHEREAS, the electrical transcription industry has denounced such demands as inherently unsound, destructive of technical progress, in conflict with wartime manpower policy, an attempted evasion of the president's wage freeze regulations and otherwise violative of law, and

WHEREAS, the electrical transcription industry is now engaged in negotiation with Mr. Petrillo and his union;

NOW THEREFORE,

BE IT RESOLVED by the National Association of Broadcasters, that the broadcasting industry endorses the position of the electrical transcription industry as defined in its letter of February 23, 1943, addressed to Mr. Petrillo, and

BE IT FURTHER RESOLVED, that the broadcasting industry, in convention assembled, calls upon the electrical transcription companies, in their present negotiations with Mr. Petrillo, to stand firm by the position so taken by them so that they will not give tacit or implicit recognition to Mr. Petrillo's false and insincere claim of widespread unemployment in his union, or to his equally false claim that the industry owes an obligation to members of his union not employed by it, and

BE IT FURTHER RESOLVED: that the broadcasting industry calls upon the electrical transcription industry promptly to take such measures under the law as shall be necessary to end Mr. Petrillo's ban against musical recordings, which, in violation of labor's pledge to the nation, has injured wartime morale, deprived the civilian population and the armed forces of recorded entertainment, and inflicted grievous and unjustified injuries upon the broadcasting and transcription industries.

Adopted by the Board of Directors, April 26, 1943.

MEMBERSHIP CAMPAIGN

About a month prior to the War Conference, NAB launched a campaign to add to the membership. With the cooperation of the 17 District Directors and state and area chairmen appointed by them, 28 new stations have been enrolled. While these results are most gratifying and we plan at least one more mailing in the formal campaign, we appeal to every member station to aid in bringing outsiders into the fold.

We have plenty of ammunition at NAB headquarters to be used in presenting the value of membership to stations of any size or location. If you feel that we can assist in showing a non-member how NAB membership would be of value, please call upon us.

FTC and FCC

FORTUNE MAGAZINE DISCUSSES THE FCC IN THE MAY ISSUE

Broadcasters will be interested in reading "Government by Commission"—an article concerning the present FCC-Network controversy in the May, 1943, issue of *Fortune Magazine*, page 86.

GAREY ASKS—DURR DEMURS

Herewith is printed for your information the exchange of correspondence between Eugene L. Garey, general counsel, House committee investigating the FCC, and Commissioner C. J. Durr:

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES

Select Committee to Investigate
Federal Communications Commission

Washington, D. C., April 20, 1943.

My dear Mr. Commissioner:

Will you be good enough to advise me for the information of the Committee:

1. The name(s) and address(es) of all banks, trust companies or other depositaries employed by you since January 1, 1937, for the deposit of funds and the name(s) in which such account(s) was carried.
2. The source of all funds received by you during such period and whether such funds constituted income or return of capital.
3. In the event any portion of such funds constituted a return of capital please submit in respect thereof a brief statement of all facts connected therewith.
4. Whether at any time during the period stated you carried funds belonging to you or in which you had or claimed an interest (direct, beneficial or otherwise), with any person, firm, association or corporation, banking or otherwise, other than those institutions named by you in answer to paragraph 1, supra, and whether carried in your own name or otherwise.
5. Whether, during the period stated, you have had any safety deposit box(es) and, if so, state the name(s) and address(es) of the institution from which the same was rented.
6. Whether, during the period stated, you have acquired by purchase or otherwise, any real property, and, if so, state the details thereof.
7. Whether, during the period stated, you have any investment(s) of any kind, and, if so, state the details of such investment(s).
8. Whether, during the period stated, you had acquired or sold any stocks, bonds, or other securities, and, if so, state the details of each such acquisition or sale.

Very truly yours,

(Signed) E. L. Garey,
Eugene L. Garey,
General Counsel.

Honorable C. J. Durr,
Commissioner,
Federal Communications Commission,
Washington, D. C.

FEDERAL COMMUNICATIONS COMMISSION

Washington, D. C.

April 23, 1943.

Mr. Eugene L. Garey,
General Counsel,
Select Committee to Investigate
Federal Communications Commission,
House of Representatives,
Washington, D. C.

My dear Mr. Garey:

Receipt is acknowledged of your letter of April 20, 1943, in which you ask for the names of all banks in which I may have carried deposits or had safety deposit boxes since January 1, 1937, and the sources of all funds and the nature and circumstances of all investments I may have made during such period.

While I have absolutely nothing to conceal from the Committee, it seems to me that the information you are requesting is of an entirely personal nature unless it is for the purpose of ascertaining whether or not I have been guilty of accepting bribes or of similar misconduct in the performance of my official duties. If you have any information which would lead you to feel that further inquiry along this line is warranted, it is suggested that you refer the matter to the Department of Justice.

Very truly yours,

(Signed) C. J. Durr,
C. J. Durr,
Commissioner.

FTC RADIO ADVERTISING SURVEYS

The FTC has advised NAB that it would be neither practicable nor consistent with certain war-related duties which the FTC is performing to reduce the annual rate of rendering copies of continuity returns below the present average rate of four times yearly per station, covering specified 15-day broadcast periods. Suggestions for simplification of clerical work in assembling commercial continuity returns for submission to the FTC were also made in the following letter to NAB:

April 22, 1943.

Attention: *Mr. Russell P. Place, Counsel.*

In re: Radio Advertising Surveys—War-Related Matters, etc.

Gentlemen:

In compliance with your telephoned request to this office, of this morning, I am pleased to summarize herein, the phases concerning both this Commission's normal advertising work, and war-related matters, whereby your organization and its broadcaster members may be enabled to cooperate more understandingly with our current duties.

* * *

Owing to contributing elements, which I will amplify hereinafter for your information, I do not consider that it would be either practicable or consistent with certain war-related duties which this Commission is performing to reduce the annual rate of rendering copies of continuity returns for broadcasters below the present average rate of four times yearly per station, covering specified 15-day broadcast periods, as requested from time to time in general letters addressed to groups of stations by this Commission.

* * *

While individually, the omission or temporary deferment of commercial continuity returns of broadcasters might not, temporarily, materially affect the objective of our normal Commission work, it is necessary for me to keep in mind and provide adequate cooperation and compliance with certain existing projects which this Commission is carrying on in conjunction with the specific emergency war agencies indicated below.

* * *

More specifically, our continuous survey of both published and radio advertising includes a search for data respecting such matters as: Troop concentrations and movements, unit identities; war plant locations, their research, developments, etc.

* * *

This Commission is also assembling and reporting from available published and radio script certain matters of interest to the Office of Price Administration pertaining to rationing and price control subjects. Also for several months past, this Commission has been reporting analyses of advertising script examined, to the War Production Board pertaining to selected commodities and products in connection with the policy and planning objectives of that organization.

From the above, I feel sure that you will appreciate that our work, as currently scheduled and performed in connection with advertising, has its concurrent, useful place in the national war effort, and that any curtailment of the present representative coverage might materially affect the value of this Commission's war-related efforts.

Further, I suggest consideration of the following typical items which may serve to simplify some of the clerical steps in assembling commercial continuity returns submitted to the Federal Trade Commission pursuant to our regular station coverage: (A) script is needed only on commercial announcements, or commercial portions of programs, designed directly or indirectly to promote the interest of products and commodities in commerce; (b) in the specified broadcast periods, where commercial announcements are repeated substantially, in similar words of like meaning, a single representative copy of the announcement is sufficient for our purpose, provided that the dates upon which the announcements were repeated are noted clearly on the face of the copy; and (c) where recourse is made to a form of ad lib announcements, using published advertisements or circulars as a basis for such announcements, (and the stations are handicapped for typing service) marked portions of such advertisements or circulars, with announcement dates noted thereon, may be submitted for our advertising scrutiny.

I trust that the information given above may serve to answer more satisfactorily the questions raised in your telephonic inquiry, in addition to providing answers to questions on war-related policy and effort as raised in inquiries from your broadcaster members, insofar as this Commission is concerned. We have appreciated, indeed, the cooperative responses thus far received from the radio broadcasters generally, and from your organization specifically.

Very truly yours,

(Signed) P. B. MOREHOUSE,
Director.

FCC APPOINTS NEW ASSISTANT CHIEF ENGINEER

The FCC has announced the appointment of Manfred K. Toeppen of Detroit, Michigan, as assistant chief engineer and chief of the common carrier division, succeeding Lieut.-Comm. Gerald C. Gross, NSNR, now on active duty. Toeppen has been with the Commission since May 1, 1935, when he was appointed principal engineer on the special investigation of the American Telephone and Telegraph company. On January 1, 1937, he was appointed chief of the communications property section. In October, 1941, he was designated assistant chief, and in January, 1943, he was named acting chief of the common carrier division.

7 STATES MEMORALIZE CONGRESS

Illinois is the seventh state to pass a resolution memorializing Congress to lift restrictions on the manufacture of batteries for farm radios.

Broadcasters are appreciative of the work of Leslie C. Johnson, general manager, WHBF, Rock Island, and NAB 9th District Director, for his effective leadership.

Other states which have adopted similar resolutions are: Indiana, Iowa, Minnesota, Nebraska, North Dakota and South Dakota.

NAB WELL REPRESENTED AT OHIO RADIO INSTITUTE

Participating in a special session presided over by Neville Miller, NAB was well represented at the Ohio Institute for Education by Radio, Deshler-Wallick Hotel, Columbus, Ohio, April 30-May 3.

NAB conducted its portion of the program, beginning at 8 P. M. Saturday, May 1, at which Dr. John Drewry, Dean of the School of Journalism, University of Georgia, made the official presentation of 1943 Peabody Awards to their recipients. Certificates and medals went into the hands of those who heard once more the praise of the Peabody Committee.

Earl Glade, vice-pres., KSL and chairman of the NAB Code Committee followed with an address on "What is Public Interest, Convenience and Necessity?" Glade divided the obligation of station operators into "constants" and "variables," the former being strict requirements laid down by the Federal Communications Commission, the latter being a broad field of public service and allegiance to the principles of Americanism which serves as a perpetual challenge to every broadcaster. The audience response to Glade's speech elicited the promise from Willard Egolf, NAB Assistant to the President, that it would be printed for distribution.

Religious Broadcasts Discussed

The meeting was concluded with a round-table discussion which saw religious broadcasts claiming most attention, general conclusions being that the radio industry and religious organizations must collaborate in finding a satisfactory policy to which all may adhere.

Members of the NAB headquarters staff, in addition to Miller and Egolf, who were seen attending the numerous sessions of the four day conference, were Lewis Avery, director of the department of broadcast advertising, who spoke before the Association of Women Directors of NAB, at their session; Howard Frazier, director of engineering, who appeared on the Manpower and Materials panel; and Dorothy Lewis, co-ordinator listener activity, who prepared the agenda and supervised the Conference activities of the Association of Women Directors of NAB.

HELPFUL INFORMATION

For the benefit of any station management contemplating the employment of either Ray Edward, sometimes known as Edward Ray Pifer, or John Van Cronkhite, NAB has information from a member station which it will be glad to make available upon inquiry.

Public Relations

OUTSTANDING STATION PROMOTIONS TO BE GIVEN INDUSTRY PUBLICITY

The NAB public relations committee, meeting at Chicago during the War Conference, expressed a desire to circulate among the industry reports of outstanding station promotions. Here are some excellent examples from WMRN and KWIL. We have received complete details of these promotions from these stations. When these reports reach us in sufficient quantity we will publish special promotion releases:

WMRN

In promoting the beginning of the second War Loan Drive, April 12, WMRN lengthened its broadcasting day 2½ hours and presented special events, including several business area remotes, from the city.

State, city and county officials, school children, churches, and even participants in a Rollarena skating show all added their portions to the drive, including many shows featuring the station's talent and staff members. Bond and stamp sales in the county at midnight that day totaled $1,231,537.

KWIL

Every spot on April 12 was a war bond spot as KWIL went all out to begin the second War Loan Drive with a bang. Every program contained nothing but bond appeals.

City, county, state and regional entertainers all helped. A pig was auctioned off for $2000 worth of war bonds, clubs, organizations, "Miss Oregon" (Carol Worth), corporations, farm groups, the American Legion, schools, banks and many other individuals and groups contributed during the day to make the accounting at the final minute total $1,303,750, or almost half of the entire total for the county for the campaign.

RETURN GOVERNMENT TRANSCRIPTIONS

Richard F. Connor, chief, station relations division, OWI, recently sent to all stations a communication outlining procedure for return of government transcriptions. Stations are urged in the interest of the conservation of essential materials to heed this request promptly.

In the bulletin sent out by OWI, stations are advised to reduce the weight of mailing to the minimum. It is suggested that all discs be removed from envelopes and that they be placed, without extra pads, in the original shipping container to keep the maximum weight to four pounds to comply with postal regulations. Do not send by air express or special delivery and see that all markings of this nature are removed from the outside of the package.

It is suggested that all packages be sealed or tied with string. Be sure that the self-addressed government frank is affixed and mail only one package at a time. Stations are specifically warned to use the government frank a not to send by express. The cooperation of all broadcasters is urged.

WHITE-WHEELER BILL

Hearings on the White-Wheeler bill (S. 814) to amend the Communications Act have been postponed to Tuesday, May 25. Prior thereto there will be a meeting of the NAB Legislative Committee to consider policy and procedure relative to the bill and hearings. The committee: Don Elias, WMNC; Clair McCollough, WGAL; Joseph H. Ream, CBS; Frank M. Russell, NBC; and James D. Shouse, WLW. Neville Miller is chairman ex officio.

RADIO SALARY INCREASES GRANTED BY WAR LABOR BOARD

Salary increases of 4½% to 10% for actors, singers, announcers and sound effect technicians of 7 broadcasting companies have been unanimously approved by the National War Labor Board. The increases were granted under the Board's 15% cost of living formula.

The American Federation of Radio Artists, A. F. of L., represents the employees. Companies involved are the Columbia Broadcasting System, National Broadcasting Company, Blue Network Company, Inc., Don Lee Broadcasting System, WGN, Inc., Agricultural Broadcasting System and WOR Program Service, Inc.

The 10% increase which the parties agreed upon for eleven classifications was approved by the Board except in the case of WGN sound effects technicians in Chicago and NBC staff announcers in Cleveland. These two groups were found to have received increases since January, 1941, in excess of the 15% allowable under the "Little Steel" formula. They now receive weekly minima of $40.00 and $47.00 respectively. The other groups had received no increase since January, 1941.

Affects Only New Employees

Instead of the 6% increase requested for CBS employees in Los Angeles, the Board approved an increase of 4½%, the amount allowable under the "Little Steel" formula.

A 10% increase in the minimum rates paid to sound effects technicians, staff producers and announcers by the Don Lee Broadcasting System in Hollywood and San Francisco was approved. This increase will affect only new employees because all present employees are already paid at least 10% above the current minima.

Increases for NBC and CBS sound effects technicians in Chicago were made retroactive to January 1 and January 17, 1943, respectively; all other increases are retroactive to December 15, 1943.

The WLB reconsidered and changed its decision disapproving certain parts of the new CBS-IBEW contract (NAB REPORTS, p. 145). The entire contract is now approved.

MORSE SALISBURY PROMOTED

War Food Administrator Chester C. Davis has named Morse Salisbury as deputy administrator in charge of information, department of agriculture. W. K. Charles, as press service chief, and Wallace Kadderly, as radio service chief, will continue their respective functions.

Broadcast Advertising

THE IMPACT OF THE WAR ON AMERICAN BUSINESS

Mushroom expansion occurred in some areas; depressing contraction took place in others during the transition to a war economy. Some regions were cushioned by the diversification of their industries. Others were swept headlong into a boom that threatens even more complex problems when the war is over.

Agriculture is plagued by the war economy. Wholesalers are trying to keep trade channels open on the home front. Retailers are approaching a difficult situation with restricted supplies of merchandise, increased consumer demands and sharply reduced services and personnel.

Many of these problems have been reviewed on a national basis in business trade papers. The first comprehensive analysis of these problems on a regional basis has just appeared in a series of quarterly reports by the United States Department of Commerce. Prepared by the Regional Business Consultants, these reports cover the first three months of 1943. Here are the titles and numbers of each report:

War Problems Reports

2-10446 The Impact of the War Effort upon New England Business.
2-10829 The Impact of the War on the New York Region.
2-10411 War Molds the Business Front in Penn-Del-Jersey.
2-10376 The Effect of the War on the Richmond Region.
2-10816 The Southeastern States in a War Economy.
2-10642 The Impact of the War Effort upon Business In Cleveland Region.
2-10718 The Chicago-Detroit Region Goes to War with a Vengeance.
2-10663 The Impact of the War Effort upon Business in the St. Louis Region.

2-10852 The Effect of the War on Business in the Minneapolis Region.

2-10710 The Kansas City Region Takes Its Place in World War II.

2-11161 Current Conditions and Potential Trends of Southwestern Business and Industry under War Economy.

2-10779 War Booms and Twists the Far West.

Information Is Helpful

Copies of these quarterly reports may be obtained by title or number from the Regional Business Consultants in the District Offices or from Dr. Wilford L. White, Chief, Regional Research Unit, Department of Commerce, Washington, C. C.

You will find the information contained in these publications genuinely helpful in analyzing business prospects and possibilities in the area served by your station. If you would like to receive these reports quarterly as issued, the Department of Commerce will place your name on a permanent mailing list for such information.

PER INQUIRY PARADE

Topping the list this week is the Airplane Model Kit offer of that perennial per-inquiry promoter, N. J. McMahon of United Advertising Companies, Chicago, Ill. You sell the kit for $1.49, keep 50¢ less 15% agency commission. Better leave the blue sky to the airplanes and sell where you are paid fairly and in full.

Hahn-Rodenburg Co.

"Good News from Home" may be all that the title implies, but it isn't good news to any radio station on a per-inquiry basis from the Hahn-Rodenburg Co., of Springfield, Ill. Sell the book for a dollar and keep 50¢—but don't count on buying very many war bonds with the half dollars.

Herald Publishing Co.

The women in your audience are just waiting to hear about a new book on charm entitled, "Better than Beauty." At least, that's what the Herald Publishing Co., of New York, N. Y., thinks. In the letter to stations this publisher graciously states: "we have just launched a $50,000 magazine advertising campaign . . ." We have reminded him that broadcast advertising would do an outstanding job for this book with $50,000 on a rate-card basis.

Service Life Insurance Co.

The Service Life Insurance Company of Omaha through France and Duff Advertising Agency, also of Omaha, is offering their "6-Bell Combination Policy" on a contingent basis. Such business is not only unethical but may be dangerous for the station that carries it on such a basis. Before you contract for such advertising, ask yourself these questions: Is the company authorized to write insurance in the state in which I am doing business? Would I be acting as agent in the solicitation of inquiries for such insurance on a per-inquiry basis?

The Scott 'P-I' Formula

Not long ago an advertising agency offered to keep the details of its per-inquiry arrangement with radio stations strictly confidential. The best reply to that offer came from Clyde Scott of KFI-KECA, who wrote:

> "You may be sure that we will keep the offer outlined in your letter very confidential. In fact the only one who will know about it will be the janitor when he digs it out of the waste basket."

That should be the answer of every radio station.

MIEHLE WARTIME LIBRARY

Although this library is an example of printed co-operation of advertisers with the government's war activities, broadcasters will derive much information and inspiration from it, in the opinion of Neville Miller and Willard Egolf, who attended a meeting of the War Activities Council in New York recently, at which the library was exhibited and explained.

The Miehle Wartime Library consists of twelve volumes of hand-mounted samples of printed material put out by advertisers to promote the war. Some of it has been used in connection with radio programs. There are several editions of the library now being routed throughout the country. Broadcasters may have the opportunity to view the material through local advertising clubs, industrial concerns or trade associations. Watch for its appearance in your city.

WROK RENEWS WAR SHOW

Cpl. Barney Ross, Marine hero of Guadalcanal, is to address war workers of Rockford, Ill., via the "Soldiers of Industry" program over station WROK. Ross recently transcribed the talk especially for the factory morale show. Sponsors are twelve war plants in Rockford and the program has just been renewed for 39 weeks. Station joins Blue network, May 17.

GAS RATIONING

Provisions for lifting the ceiling on mileage which may be allowed for in-course-of-work driving outside the eastern shortage area from 470 miles a month to 720 miles a month were announced Monday by the Office of Price Administration with the Office of Rubber Director making sufficient increased quotas available to cover the additional tire requirements.

This action, supplementing a previous order permitting additional home-to-work mileage in hardship cases, is intended to help car owners who need more mileage in the course of their work than they have been able to get. It does not change the mileage that now may be allowed for driving between home and work. But it brings all motorists who need to drive in the course of their work, and who were eligible in the past for "B" ration books only, up to the mileage level of essential salesmen who were granted additional rations last January.

To qualify for the additional rations an applicant must:

1. Show that he needs it entirely for course-of-work travel.
2. Meet regular car-sharing requirements. This means that he arranges to carry three or more persons in his car if this is possible.
3. Show that he is not already allowed as much as 720 miles a month for home-to-work travel as provided in an earlier order of February 24. (Amendment No. 23.)

Order Applies to Fleets Also

This order provided additional mileage to any car owner who showed that he could not get to his job any other way and that even the maximum "B" ration book would not give him enough mileage.

However, a driver who has thus broken the "B" ceiling for driving to and from work, for an amount less than 720 miles, may obtain an additional amount up to 720 miles for driving strictly in the course of work.

The new order also applies to fleet cars, and since these automobiles, presumably, are all used for in-the-course-of-work driving, all of them may now get up to 720 miles a month.

Any preferred mileage to which any driver is entitled may be obtained in addition to the mileage allowed in the new amendment, it was pointed out.

War Price and Rationing Boards will be instructed to issue "C" books and stickers to applicants who are allowed rations exceeding 470 miles a month.

Persons who can qualify for increased rations under the new provisions should not go to boards immediately for their new rations, but should use the rations which they now hold, as long as possible. This will avoid confusion which would arise from having a large number of applications flow into the boards at once.

This action was taken in Amendment No. 45 to Ration Order 50, effective May 1. Boards may act on applications for the additional mileage beginning that date.

HERE'S NEW LIST OF CITIES COMPLETING REPAIR SURVEYS

The cities listed below have supplied information last requested in bulletin-letter of April 14.

All this is in addition to the information received from cities listed in NAB REPORTS of April 16. It is greatly appreciated and has been placed in channels where it will do the most good.

Cities which have not yet reported are earnestly urged to do so.

Cities Reporting Since April 16

ALASKA—Juneau.
HAWAII—Honolulu.
ARIZONA—Phoenix.
CALIFORNIA—Modesto, Riverside, San Francisco, San Luis Obispo, Santa Rosa.
CONNECTICUT—Darien, Greenwich, Hartford, New Canaan, New Haven, Norwalk, Stamford.
COLORADO—Colorado Springs, Grand Junction.
FLORIDA—Jacksonville, Orlando, Panama City, Pensacola, St. Petersburg.
GEORGIA—Columbus, Hot Springs, Tocoa.
IDAHO—Lewiston.
ILLINOIS—Bloomington & McLean County, Harrisburg, Rock Island.
INDIANA—Fort Wayne.
IOWA—Ames, Cedar Rapids, Davenport, Dubuque, Fort Dodge, Ottumwa, Waterloo.
KANSAS—Coffeyville, Kansas City, Lawrence, Topeka.
KENTUCKY—Hopkinsville, Lexington, Louisville.
MARYLAND—Laurel.
MASSACHUSETTS—Greenfield, New Bedford, Worcester.
MICHIGAN—Battle Creek, Bay City, Calumet, Detroit, Flint, Grand Rapids, Lansing, Pontiac, Royal Oak.
MINNESOTA—Mankato, Minneapolis, St. Paul.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, May 10th. They are subject to change.

Monday, May 10

WKBZ—Ashbacker Radio Corporation, Muskegon, Mich.—Modification of license, **1450 kc.**, 250 watts, unlimited.

Wednesday, May 12

Oral Argument Before the Commission

Report No. B-171:

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah. —C. P., **880 kc.**, 10 KW, unlimited, DA-day and night.

Friday, May 14

WLAN—Thomas J. Watson, Endicott, N. Y.—Modification of C. P., **1450 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WQXR—Interstate Broadcasting Co., Inc., New York City.—Granted modification of license to operate non-directionally on **1560 kc.** with 10 KW power; and dismissed application (B1-MP-1689) for modification of construction permit to extend completion date. The grant of modification of license is made subject to condition that it may be cancelled or modified by the Commission without hearing, in event Cuba signifies its intention of establishing a Class I-B station on **1560 kc.** and the licensee fails to take necessary steps in time to prevent the causing of electrical interference thereto, in accordance with requirements of NARBA.

WOWO—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Granted application for modification of license (B4-ML-1148) to operate on **1190 kc.** with 10 KW power, unlimited time, subject to the condition that it may be cancelled or modified by the Commission, without a hearing, in the event it becomes necessary for the licensee to protect the services of other stations operating on the **1190 kc.** frequency, in accordance with the Commission's Rules and Regulations and with provisions of NARBA.

WPID—Petersburg Newspaper Corp., Petersburg, Va.—Granted authority to delete call signal close the record of this station and dismiss pending application for renewal of license. On March 22, 1943, the licensee advised the Commission that in view of the denial of its petition to suspend operation for the duration, it would be necessary to cease operation of the station April 1, 1943, the expiration date of its outstanding license.

W59C—WGN, Inc., Chicago, Ill.—Granted license (B4-LH-23) to cover construction permit (B4-PH-7) in part for new station, subject to requirements concerning Order No. 79.

W71SB—South Bend Tribune, South Bend, Ind.—Granted license (B4-LH-24) to cover construction permit (B4-PH-54, as modified) in part, for new station, subject to requirements concerning Order No. 79.

DESIGNATED FOR HEARING

KFXM—J. C. & E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Designated for hearing application (B5-ML-1147) for modification of license to operate unlimited time, simultaneously with KPPC.

DOCKET CASE ACTION

The FCC has announced its Proposed Findings of Fact and Conclusions (B-178), proposing to issue temporary licenses for a period of six months for the operation of Stations WDSU, New Orleans, La., WMIS, Natchez, Miss., and WGRM, Greenwood, Miss.

The proceedings arose upon the applications of WDSU, Inc. (WDSU), Natchez Broadcasting Co. (WMIS), and P. K. Ewing (WGRM), for renewal of licenses, and upon the application of WDSU for reinstatement of construction permit, as modified, which authorized an increase of day and night power of Station WDSU from 1 KW to 5 KW, the installation of a new transmitter, changes in transmitter location, and the employment of a directional antenna for both day and night operation. (Dockets 6331 through 6334.)

The Commission took cognizance of various and numerous—and on occasions repeated—violations of the Rules and Regulations of the Commission, but concluded:

"It appears that public interest would best be served by the issuance of temporary license for a period of six months for the operation of these stations and, if during that period no violations of the law or the Rules and Regulations of the Commission are disclosed, that license on a regular basis should then be issued to them. However, if further violations should be disclosed, the matter should be opened for introduction of evidence on such violations and the cases then finally determined upon the enlarged record.

"The application of WDSU, Docket No. 6331, to reinstate its construction permit, should be held in abeyance until the expiration of the temporary license period, herein proposed, and then granted if the application for renewal of license (Docket No. 6332) is finally issued for the operation of Station WDSU."

* * *

Based upon the policy announced in the Commission's Memorandum Opinion of April 27, 1942 (which policy specifically refers to the use and not the acquisition of materials), the Commission announces its Proposed Findings of Fact and Conclusions, proposing to deny without prejudice the following:

Application of Massachusetts Broadcasting Corp. (WCOP), Boston, Mass., for construction permit to make changes in the directional antenna for nighttime use, to make changes in transmitting equipment, and to increase power from 500 watts to 1 KW. (Docket No. 6336; B-169.)

Application of J. C. Kaynor for construction permit for a new local broadcast station at Ellensburg, Wash., to operate on **1340 kc.,** 250 watts power, unlimited time. (Docket No. 5965; B-173.)

Application of Beauford H. Jester, Individually, and as Trustee for W. W. Callan, DeWitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert E. Levy, Ross M. Sams, and Davis Stribling, for construction permit for a new standard broadcast station at Waco, Tex., to operate on the frequency **1230 kc.,** 250 watts power, unlimited hours of operation. (Docket No. 6218; B-176.)

MISCELLANEOUS

KGBK—Helen Townsley, area of Great Bend, Kans.—Granted further extension of relay broadcast station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than June 1, 1943. (B4-SRY-240)

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Granted further extension of relay broadcast station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than June 1, 1943. (B3-SRY-132)

KXYZ—Harris County Broadcast Co., Houston, Tex.—Granted license to cover construction permit as modified, for change in frequency, increase in power, move of transmitter, and install new transmitter and directional antenna for night use; and granted authority to determine operating power by direct measurement of antenna power. (B3-L-1740; B3-Z-1482)

KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted license to cover construction permit as modified, for installation of new transmitter and directional antenna for day and night use, increase power, change frequency, and move of transmitter; granted authority to determine operating power by direct measurement of antenna power. (B3-L-1739; B3-Z-1481)

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Scheduled for oral argument on May 12, 1943, in re application for construction permit to change frequency from **1320** to **880 kc.,** increase power from 5 KW to 10 KW, make changes in directional antenna system for both daytime and nighttime use and change transmitter. (Proposed Findings of Fact and Conclusions No. B-171; Docket 6351)

KMA—May Broadcasting Co., Shenandoah, Iowa.—Granted modification of construction permit as modified, which authorized installation of directional antenna for night use, and increase in power, for extension of completion date from April 23, 1943, to June 23, 1943. (B4-MP-1707)

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1512)

WCBA—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1513)

WWL—Loyola University, New Orleans, La.—Dismissed without prejudice petition to intervene in re application of Plains Radio Broadcasting Co. (KGNC), Amarillo, Texas, for modification of license to operate on **860 kc.,** 500 watts night, 5 KW day, unlimited. (Docket 6493)

W3XPA—Philco Radio & Television Corp., Portable-Mobile (area of Philadelphia, Pa.).—Granted license to cover construction permit which authorized new experimental television relay broadcast station. (B2-LVB-40)

W3XPC—Philco Radio & Television Corp., Portable-Mobile (area of Philadelphia, Pa.).—Granted license to cover construction permit which authorized new experimental television relay broadcast station. (B2-LVB-41)

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Granted license to cover construction permit for installation of new sampling loops (B2-L-1160); granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1516)

WCHV—Barham & Barham, Charlottesville, Va.—Granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1508)

W8XO—The Crosley Corp., Cincinnati, Ohio.—Denied petition for rehearing directed against an Order of the Commission adopted December 29, 1942, dismissing application for renewal of license of station W8XO; and denied petition to dismiss without prejudice application for renewal of license for station W8XO.

W59NY—Interstate Broadcasting Co., Inc., New York City.—Granted license (B1-LH-16) to cover construction permit (B1-PH-109, as modified) in part.

W6XLA—Television Productions, Inc., Los Angeles, Calif.—Granted modification (B5-MPVB-95) of construction permit (B5-PVB-87) to make changes in equipment, reduce maximum power output from 800 watts to 25 watts (100 watts peak), and extension of commencement and completion dates.

WJHO—Yetta G. Samford, C. S. Shealey, Thomas D. Samford, Jr., and J. H. Orr, d/b as Opelika-Auburn Broadcasting Co. (Assignor), Yetta G. Samford, C. S. Shealy, and Thos. D. Samford, Jr., d/b as Opelika-Auburn Broadcasting Co. (Assignee), Opelika, Ala.—Granted consent to voluntary assignment of license (B3-AL-366) of station WJHO from Yetta G. Samford, C. S. Shealy, Thos. D. Samford, Jr., and J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., to Yetta G. Samford, C. S. Shealy, and Thomas D. Samford, Jr., d/b as Opelika-Auburn Broadcasting Co. This is a newly formed partnership doing business under the same name as the assignor and present licensee. The assignee proposes to pay J. H. Orr the retiring partner, $3,150.00, for his 25% interest in the licensee partnership.

APPLICATIONS FILED AT FCC

820 Kilocycles

WAIT—WAIT, Inc., Chicago, Ill.—Voluntary assignment of license to Gene T. Dyer, Evelyn M. Ringwald, Elizabeth Hinzman, Adele Moulds, Vivian Christoph, Wm. F. Moss, d/b as Radio Station WAIT.

1230 Kilocycles

WDLP—Panama City Broadcasting Co., Panama City, Fla.—Modification of license to increase power from 100 watt night, 250 watts day to 250 watts day and night.

1450 Kilocycles

WCHV—Charles Barham, Jr., and Emmalou W. Barham, d/b as Barham and Barham, Charlottesville, Va.—Modification of license to change frequency from **1450 kc.** to **1240 kc.**

1480 Kilocycles

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—License to cover construction permit (B3-P-3520) to move main transmitter.

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATIONS

NEW—King-Trendle Broadcasting Corp., Detroit, Mich.—Construction permit for new High Frequency Broadcast Station to operate on **47300 kc.**, coverage 6750 square miles. (Formerly W73D)

NEW—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Construction permit for new High Frequency Broadcast Station to operate on **46900 kc.**, coverage 5300 square miles. (Formerly W69GR)

NEW—Edwin H. Armstrong, Alpine, N. J.—License for new High Frequency Broadcast Station. Frequency **43100 kc.**, coverage not to exceed 15,610 square miles. (Formerly licensed as Experimental High Frequency Broadcast Station W2XMN)

MISCELLANEOUS

W9XMB—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PST-4 as modified for new ST station), for extension of completion date from 5-16-43 to 8-16-43.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Associated Laboratories—Milton Irwin, Dr. Walter G. Berg and Dr. David W. Miles, trading as Associated Laboratories, 4609 Nicollet Ave., Minneapolis, have been ordered to cease and desist from disseminating false advertisements in connection with the sale of their "Gordon Detoxifier," a medicinal device recommended by them for use in cleansing the intestines. (4722)

Lawrence Blanket Company, et al.—Misbranding of blankets in violation of the Wool Products Labeling Act and the Federal Trade Commission Act is alleged in a complaint against Lawrence Blanket Co., Worcester, Mass.; Thomas B. Keen and Marian C. Keen, trading as Thomas B. Keen Co., 40 Worth St., New York, and Robert Mars, 401 First St., S. E., Washington, D. C. (4946)

Northwest Studios, Inc., 6013A Phinney Ave., Seattle, trading as Interstate Sales Co., and formerly trading as Pacific Studios; Charles H. Van Scoy, Mrs. Charles H. Van Scoy and Mrs. E. S. Holm, individually and as executives of the corporation and engaged in the sale and distribution of tinted or colored enlargements of photographs and of frames therefor, are charged in the complaint with misrepresentation. (4951)

F. Ad. Richter & Co., Inc., located at Berry and South Fifth Sts., Brooklyn, manufacturer and distributor of Anchor Pain Expeller, and its advertising representative, H. W. Kastor & Sons Advertising Co., 360 North Michigan Ave., Chicago, are charged in a complaint with disseminating false advertisements concerning the preparation. (4955)

United Diathermy, Inc., 1537 Chestnut St., Philadelphia, is charged in a complaint with the dissemination of false advertisements concerning the device designated "United Short Wave Diathermy" which it sells in interstate commerce. (4952)

Welch Grape Juice Company—A complaint has been issued charging Welch Grape Juice Co., Westfield, N. Y., with misrepresentation in connection with the advertising and sale of Welch's Grape Juice, recommended by the respondent corporation as being a cure for obesity. The complaint also is directed against H. W. Kastor & Sons Advertising Co., Chicago, advertising representative of Welch Grape Juice Co. (4953)

White Laboratories, Inc.—A complaint charging misrepresentation in the sale of a medicinal preparation designated "Feen-a-mint" has been issued against White Laboratories, Inc., 113 North 13th St., Newark, N. J., and its advertising agency, William Esty & Co., 100 East 42nd St., New York. (4950)

Zo-Ak Company, Inc.—Misrepresentation on the sale of a medicinal preparation designated "Orotune Ear Drops" and failure to reveal the harmful potentialities that may result from its use are alleged in a complaint against Zo-Ak Co., Inc., and its advertising agency, Jasper, Lynch & Fishel, Inc., both of 22 West 48th St., New York. The complaint also is directed against Alfred P. Zabin and Juliette Zabin, officers of Zo-Ak Co., Inc., who also trade as Harvin Co. (4954)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

American Chemical Company—Misrepresentation of the quality and effectiveness of Flexo, a so-called antifreeze solution recommended for use in the cooling system of automobiles and other combustion type engines, is alleged in a complaint issued against the manufacturer of the product, American Chemical Co., 229 Bradberry St., S. E., Atlanta, Ga. (4956)

Bureau of Research and Reclassification Department, 215 West 5th St., Los Angeles, and William Edgar Spicer, 302 Bond Bldg., Washington, D. C., have been ordered to cease and desist from the use of unfair and deceptive acts and practices in connection with the sale of mailing cards which are used by collection agencies and creditors to procure information of the whereabouts and employment of debtors. The Commission finds that the respondent Greenberg represents by implication that his business is connected with the United States Government and that the information is sought on behalf of the Government. (4810)

Milton Goldenberg, Natalie Goldenberg and Leonard Goldenberg, 2857 Sedgwick Ave., New York, have been ordered to cease and desist from misrepresentation in connection with the sale of post cards containing questionnaires designed for the use of collection agencies and creditors in obtaining information concerning delinquent debtors. The respondents Goldenberg, also known as Golden, engaged in the business from April, 1941, to August, 1942, trading under the names The Golden Skip Tracing Agency, Golden Sales Agency and Golden Distributors. (4907)

Pow-A-Tan Medicine Co., Huntington, W. Va., has been ordered to cease and desist from certain misrepresentations in connection with the sale of a medicinal preparation it designates as "Powatan Herb Tonic." (4817)

Jacob Siegel Co., 317 North Broad St., Philadelphia, has been ordered to cease and desist from misrepresenting the fiber content of men's overcoats and topcoats it sells under the trade name "Alpacuna." (3403)

A. Stransky Manufacturing Co., Pukwana, S. Dak., has been ordered to cease and desist from certain misrepresentations in connection with the sale of a mechanical device described as a vaporizer and decarbonizer for use on automobiles. (1612)

Terminal Messenger Service and Pioneer Inheritance Service, Stuart Bldg., Lincoln, Nebr., have been ordered to cease and desist from misrepresentation in connection with the sale of questionnaire letters and envelopes intended for use in obtaining information concerning debtors. (4897)

John F. Trommer, Inc., operating breweries in Brooklyn and Orange, N. J., has been ordered to cease and desist from certain misrepresentations made concerning a brand of beer designated "White Label." (4689)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Emile Bernat & Sons Co., Jamaica Plain, Mass., entered into a stipulation to discontinue misrepresenting the fiber content of knitting yarns it sells. (3634)

Dr. W. B. Caldwell, Inc., Monticello, Ill., and an advertising agency, Sherman & Marquette, Inc., Chicago, have stipulated that in connection with the advertising and sale of the preparation designated "Dr. Caldwell's Laxative Senna combined with Syrup Pepsin" they will cease and desist from representing that any therapeutic properties possessed by the product are enhanced by its pepsin content. (03102)

Hairtone Laboratories, 381 Fulton St., Brooklyn, agrees that in the sale of preparations for use on the scalp and hair, variously designated as "Quinine Hairtone," "Quinine Hair Marvel," "Hairtone Scalp Formula" and "Hairtone Hair Straightener," it will cease and desist from representing that any of the products will promote the growth of hair or constitute an effective treatment for falling hair; is an effective treatment or competent remedy for dandruff; is indicated for itching or sore scalp or will result in a healthy condition of the scalp; or that they are new discoveries, vegetable compounds or herbal formulas. (3633)

Heinrichson's Natural Food Company—A stipulation to discontinue misrepresenting the therapeutic value of medicinal preparations designated "Needee Acidophilus Culture" and "Needee Lactone" has been entered into by John T. Heinrichson, trading as Heinrichson's Natural Food Co., 3455 Lawrence Ave., Chicago. (03104)

Knomark Manufacturing Co., Inc., 214 Taaffe Place, Brooklyn, has entered into a stipulation to discontinue representing in advertising that its product designated "Spick White Shoe Cleaner" and "Knomark White Shoe Dressing" will not rub off. (03103)

George H. Lee Co., 1115 Harney Street, Omaha, engaged in the sale of poultry remedies, has entered into a stipulation to discontinue representing that the preparation known as "Germozone" will prevent or cure diarrhea or crop or intestinal troubles in poultry, or that either of the preparations designated "Acidox" or "Germozone," whether administered alone or in conjunction with each other, is of value in preventing coccidiosis, or that either of them will check death losses or avoid bad after-effects of such disease. (03105)

Republic Manufacturing & Supply Co., 154 Nassau St., New York, engaged in the business of exporting steel products, entered into a stipulation to cease and desist from certain practices. (3638)

Suey Chee Herb Co., 644 Kearny St., San Francisco, engaged in the sale and distribution of Chinese medicinal preparations, entered into a stipulation to cease and desist from representing that his pills strengthen the heart or that their use is indicated for strengthening the heart. (3637)

FTC COMPLAINT DISMISSED

The Federal Trade Commission has dismissed its complaint against General Electric Co., New York, which had been charged with misrepresentation in connection with the sale of electric light bulbs.

NAB In Action

OPA RECOGNIZES RADIO'S PART IN PRICE NEWS COVERAGE

When a news story was recently released which quoted Prentiss Brown, OPA administrator, as asking newspapers to cooperate in releasing new price ceiling information and indicating newspapers only would receive that information, NAB through Neville Miller swung into action.

The same story, released to International News Service by Cranston Williams, ANPA general manager, quoted Williams to the effect that radio would be able to get the price information from the newspapers.

After conferring with OPA officials, Miller authorized release by the NAB of the two following stories, first to the general and trade press, the second to INS only. Also listed below is Brown's telegram sent NAB after the price ceiling information was issued last week-end:

(Released by NAB News Bureau)

Washington, D. C., May 7—Radio will again play a vital part in acquainting the public with government regulations when the Office of Price Administration announces the community area maximum food price ceilings this week-end in 150 cities throughout the country, Neville Miller, National Association of Broadcasters president, announced today.

Miller released the following telegram received from Prentiss Brown, OPA administrator:

"Our field offices in the various cities in which the new OPA community top price program will be effective on Monday are reporting the splendid cooperation which the radio stations and networks are giving us. I am sure this aid in our fight against inflation will continue through the entire life of the program."

Radio news wires and editors will receive the same price releases as issued to newspapers at 8 p.m., Saturday, May 8, Miller said.

Network broadcasts are being arranged for OPA for Sunday night. Station managers in cities where there are OPA district directors may get full information and plan local broadcasts accordingly. Other stations may play up the news angles of the new regulations if OPA offices are not available, Miller said.

(Released by NAB News Bureau to INS)

Washington, D. C., May 7—The Office of Price Administration joined Neville Miller, president, National Association of Broadcasters, in denying discrimination would be shown against radio stations in release of the new price regulations as reported by Cranston Williams, general manager, American Newspapers Association, in a statement to International News Service May 6.

"Radio will play fully as vital a part in the release and handling of the price ceiling regulations this week-end as will the newspapers," Miller said.

OPA officials backed Miller up by stating that radio stations will receive the same releases in the 150 cities affected, at 8 p.m., Saturday, May 8, as will newspapers.

Williams' statement to INS was to the effect that "There will be no release locally to radio stations . . . but of course it is to be expected that local radio stations will make broadcasts as soon as the radio stations see the newspapers . . ."

In answer to this Prentiss Brown, OPA administrator, released the following telegram to Miller:

"Our field offices in the various cities in which the new OPA community top price program will be effective on Monday are reporting the splendid cooperation which the radio stations and networks are giving us. I am sure this aid in our fight against inflation will continue through the entire life of the program."

NEVILLE MILLER
NATIONAL ASSOCIATION OF BROADCASTERS

ALL OF RADIO STATIONS NETWORK AND SPONSORS CONTRIBUTED GREATLY TO THE SPLENDID COVERAGE GIVEN THE NEW OFFICE OF PRICE ADMINISTRATION FOOD TOP PRICE PROGRAM. ALTHOUGH THE PLAN BECAME EFFECTIVE ONLY THIS MORNING WE KNOW IT WILL BE SUCCESSFUL AND RADIO SHOULD TAKE WELL-EARNED PRIDE IN ITS SHARE OF THIS SUCCESS.

PRENTISS M. BROWN, ADMINISTRATOR

Supreme Court

FCC AUTHORITY UPHELD

The Supreme Court May 10 upheld the FCC's authority under the Communications Act to promulgate the Network regulations. In an opinion of sweeping import written by Justice Frankfurter, the court held that the Act gave the Commission power to regulate the contractual relations of stations with networks under the phrase "public interest, convenience or necessity" as read in conjunction with other sections of the Act. Chief Justice Stone and Justices Reed, Jackson and Douglas concurred. Justice Murphy wrote a vigorous dissent in which Justice Roberts joined. Justices Black and Rutledge did not participate.

The network regulations will become effective 10 days after receipt by the District Court in New York of the mandate from the Supreme Court. Although the date of

SUPREME COURT

(Continued from page 213)

receipt of the mandate by the lower court cannot be predicted with certainty, in normal course, it would be between June 14 and 17.

Complete text of the majority and dissenting opinions will be found on pages 221 to 233 of this issue of the REPORTS.

Neville Miller's stand on the decision, which followed the expressed action of the NAB in convention in 1941, is embodied in a statement released by the NAB following the court's decision to all the trade and general press. It follows:

"Hearings on the White-Wheeler Bill to review the present Communications Act are set to commence May 25th. Today's decision of the Supreme Court once more emphasizes the necessity for prompt Congressional review of the radio law in the light of present development of the broadcasting art."

The White-Wheeler bill seeks to re-define the operation and regulation of the broadcasting industry.

In today's decision, the Supreme Court upheld the right of the Federal Communications Commission to regulate certain business practices of the networks.

It will be recalled that at the 1941 NAB convention the following resolution was passed:

"Be it resolved that the National Association of Broadcasters urge the United States Senate to give prompt and favorable consideration to a resolution introduced by Senator Wallace White of Maine, which would result in a thorough investigation of the whole radio structure with a view to the enactment of a new radio law; and would request the Federal Communications Commission to suspend operation of the new network rules pending completion of the Senate investigation."

CHAIRMAN FLY COMMENTS

In response to a question from the press concerning reports to the effect that the broadcasting industry is under the impression that the FCC has decided to postpone its chain broadcasting regulations until September, or possibly later, Chairman James Lawrence Fly stated:

> "I want to correct any such misapprehension. The enforcement of the chain broadcasting regulations has already, as a result of litigation, been postponed over a year and a half since they were promulgated in their present form. The effective date of the regulations is now stayed by Supreme Court order for ten days after its mandate goes to the lower court, or in normal course, until June 14. The Commission has no intention of delaying their effective date further. A full month thus remains for stations and networks to make necessary adjustments of contracts."

COMMISSIONER DURR FILES A PETITION AND WRITES A LETTER

TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES:

Petition That the Honorable E. E. Cox be Disqualified as a Member of the Select Committee to Investigate The Federal Communications Commission

I, Clifford J. Durr, a citizen of the United States and a duly qualified member of the Federal Communications Commission (hereinafter sometimes referred to as the "Commission"), respectfully petition the House of Representatives of the Congress of the United States that the Honorable E. E. Cox be disqualified by said House as a member of its Select Committee appointed pursuant to House Resolution 21, 78th Congress, 1st Session, to investigate the organization, personnel and activities of the Federal Communications Commission, for the following reasons:

1. That said E. E. Cox has a personal interest in the investigation authorized by such resolution in that:

> (a) Such resolution was introduced by the said E. E. Cox and he was at the time of the introduction of such resolution and at the time of the adoption thereof the record owner of $2,500 aggregate par value of stock of Albany Herald Broadcasting Company and, so far as petitioner has been able to ascertain, is still the record owner of such stock; proceedings are now pending before the Commission to determine whether or not the renewal of a license heretofore issued by the Commission to Herald Publishing Company, an affiliate of Albany Herald Broadcasting Company, for the operation of the broadcasting station in Albany, Georgia, and the transfer of such license to Albany Herald Broadcasting Company will be in the public interest; the facts indicate that the said E. E. Cox, in introducing such resolution, was motivated to a large degree, if not wholly, by the Commission's activities in connection with the ownership of Station WALB.
>
> (b) The $2,500 of stock above referred to was purchased by the said E. E. Cox with the proceeds of a check in the amount of $2,500 issued by Albany Herald Broadcasting Company to the said E. E. Cox accompanied by a voucher stating that said check was in payment of "legal expenses"; the Commission being of the opinion that such information should be submitted to the Department of Justice for a determination as to whether or not such payment was made for services rendered by the said E. E. Cox in an endeavor to secure favorable action in connection with applications filed with the Commission with respect to said broadcasting station and was therefore in violation of Section 113 of the Criminal Code of the United States, the matter was, pursuant to unanimous action of the Commission, duly reported to the Attorney General of the United States for appropriate action; so far as petitioner is advised such matter is still under consideration by the Attorney General.

In his remarks in support of House Resolution 31 Congressman Cox stated on the floor of the House on January 19, 1943:

> "Mr. Speaker: I am this morning bringing to you a matter in which I have the deepest possible personal interest."

2. That the said E. E. Cox, prior to this appointment to the Select Committee had already prejudged and con-

demned the Commission, its personnel and activities and has shown himself to be biased, prejudiced, and lacking in the objectivity of mind requisite for a member of such Committee in that he, in a speech on the floor of the House on January 19, 1943, in support of Resolution 21, accused the Commission of being "the nastiest nest of rats to be found in this entire country" and "a nest of Reds"; and has otherwise on numerous occasions publicly denounced in violent and intemperate language, the Commission, its personnel and activities.

Respectfully submitted,

Clifford J. Durr

May 13, 1943.

May 13, 1943

Honorable E. E. Cox
Honorable Richard B. Wigglesworth
Honorable Warren B. Magnuson
Honorable Edward J. Hart
Honorable Louis E. Miller,
House of Representatives,
Washington, D. C.

Gentlemen:

Attached hereto is a copy of a Petition and Memorandum which I have today handed the Speaker of the House of Representatives, asking that Congressman E. E. Cox be disqualified from serving as a member of the Select Committee to Investigate the Federal Communications Commission.

As you are aware from copies of letters which I have forwarded to you from time to time, I have on several occasions raised objections to procedures being followed by the Committee's staff in obtaining information. I have stated that these procedures were unnecessarily hampering this Commission in the performance of its duties, that they did not afford assurance that the members of the Committee, or of Congress, would receive all the information they should have, and that certain specific inquiries from the Committee's staff seemed to call for information of an entirely personal nature, in which I assumed the members of the Committee were not interested. In addition to these objections to inquiries addressed to me individually, I have also opposed the action of my fellow Commissioners in permitting the carting away by truck of Commission files when time was not allowed even to list what was taken or to see to it that irreplaceable Government records were properly receipted for.

A further incident has now arisen. On May 10, 1943, Dr. Robert D. Leigh, Director of our Foreign Broadcast Intelligence Service, was called by Eugene L. Garey, the General Counsel of the Select Committee, and was asked to testify, with no member of the Committee present. Dr. Leigh asked that a transcript of what was taken down be made available to him and was told that no copy would be made available. He then expressed his unwillingness to testify under oath in closed session, with no member of the Committee present and with no transcript made available to him.

A subpoena was thereupon served upon him, and he was ordered to testify forthwith in a closed hearing at which the only member of the Committee present was Congressman Cox. Dr. Leigh asked again whether he would be given a copy of the transcript, to make certain that his testimony was correctly recorded, and was again told that no copy would be furnished him. This incident, and particularly the requirement that witnesses testify behind closed doors before Congressman Cox alone, raises an issue even more fundamental than the procedures previously adopted, and intensifies a concern which I have felt for some time.

I would like to make it clear that I recognize the right of Congress to full and complete information with respect to the activities of any agency created by it. This is essential to the proper functioning of a government responsible to the people, and that is the only kind of government I want to live under. I recognize, too, that Congress must, as a practical matter, act through its committees in obtaining the information it desires or should have with respect to the agencies of the Government. If, therefore, Congress is to be fully and accurately informed, it is not only necessary that the agencies and their officials be cooperative in furnishing the basic information needed, but it is of equal importance that the Committees of Congress which are charged with the responsibility for receiving and analyzing such information and for reporting to Congress on the basis thereof, be motivated only by a desire to obtain and present the facts fairly and fully. If the Committee, or any member thereof, has any purpose other than this, or if any member enters upon his duties with either a predilection or a prejudice so strong as to impair or destroy his objectivity, the best interests of neither the public nor the Congress itself will be served.

It is because of my strong belief in the importance of Congressional committees to the successful functioning of our democratic form of government that I feel I should call to the attention of the Congress certain facts which raise a serious question as to whether or not Congressman Cox has the disinterest and objectivity requisite for the chairman or member of a Committee charged with a duty to investigate and to report upon its investigation to the House of Representatives. The facts indicate that Congressman Cox was inspired to a large degree, if not wholly, by prejudice, animosity, and personal interest in introducing the resolution pursuant to which this investigation is being conducted, in pressing for its adoption, and in conducting the investigation since its passage.

In the opening remarks made by Congressman Cox in his speech on the floor of Congress on January 19, 1943, in support of the resolution pursuant to which this investigation is being conducted, he stated:

> "Mr. Speaker: I am this morning bringing to you a matter in which I have the deepest possible personal interest."

The matter to which he then referred was Station WALB in Albany, Georgia, which Congressman Cox served as legal counsel, from which he received a $2,500 fee for "legal services", and in which he is a stockholder.

Because of his personal interest and because of the prejudice and bias which he has already shown, both of which are fully set forth in the Petition and Memorandum, I do not think that Congressman Cox is an appropriate person to conduct an inquiry into my activities as a member of the Federal Communications Commission or into my personal affairs. Nor, in the light of long-standing precedents of the House of Representatives, do I believe that, having the full information before it, the House of Representatives will deem it appropriate for him to conduct an inquiry into the activities of the Federal Communications Commission.

In view of the above I am unwilling to testify before the Committee—and certainly not before Congressman Cox or Mr. Garey in closed session—or to furnish its staff with any further information unless and until the House of Representatives, with full knowledge of the facts which I have herein outlined, indicates its desire that the Committee, as now constituted, should continue with the investigation or indicates that it does not deem such facts of sufficient importance to warrant its attention. If the House of Representatives so indicates, I will appear before the Committee at any time it may request my attendance and answer to the best of my ability any question that the Committee may address to me concerning the Commission or my activities as a member of the Commission, including any questions the Committee may deem it appropriate to ask with respect to my personal financial affairs, whether or not these questions relate to periods prior to or during my tenure of office as a member of the Commission.

The attached petition has been filed because I know of no other way of bringing the matter formally to the attention of the House of Representatives.

Very truly yours,

C. J. Durr,
Commissioner.

IN THE PUBLIC INTEREST

Recently Sterling Drug Co. Inc., manufacturers of Fletchers Castoria, was confronted with the serious problem of warning the consuming public that due to certain mysterious causes, their product contained some elements which made it unusable. Their object was to warn distributors to remove all stock from their shelves and to try to get in from customers all Fletchers Castoria sold within the last few months.

Harold B. Thomas, Vice President of Sterling Drug, Inc., has made the following signed statement to the National Association of Broadcasters:

"The speedy and sympathetic cooperation given to the manufacturer of Fletchers Castoria in broadcasting a nationwide warning against the sale and use of this product is a dramatic demonstration of the effectiveness with which the broadcasting industry serves the public interest. As the manufacturer of Fletchers Castoria, the Centaur Company Division of Sterling Drug, Inc., brought this matter to the attention of the major networks in order that its warning to consumers and retailers might be speedily disseminated. Networks pointed out that they could not carry such an announcement on a commercial basis, but NBC, CBS, Blue and MBS offered to, and did, carry the announcement a number of times on Tuesday, May 4, on a public service basis. We understand that many independent stations also carried this announcement. The manufacturer deeply appreciates this cooperation."

The record speaks for itself.

Selective Service

Employers engaged in war production or in activities essential to support of the war effort should file with Selective Service local boards written evidence of their employment of registrants who maintain bona fide homes with children less than 18 years of age, born on or before September 14, 1942, the Selective Service Bureau of the War Manpower Commission emphasized last week. Selective Service form No. 42B, which is available at local board offices, should be used for this purpose. (See Supplement No. 10 to NAB Selective Service Handbook, dated May 8, 1943.)

The local board, it was pointed out, thus will be advised of the registrant's employment in an essential activity, and the employer will receive notice of reopening of the registrant's classification any time it is undertaken by the local board. The employer, after receiving such notification, will have opportunity to submit additional evidence of the essentiality of necessary men in his employ.

Urge Filing of 42B

The only fathers now being inducted under the Selective Service Act are those engaged in activities or occupations on the War Manpower Commission's non-deferrable list; farm workers who, without permission of their local board, leave essential agriculture pursuits for which they have been deferred, and fathers whose children were born on or after September 15, 1942. Submission of Form 42B is urged, however, for men who have a child, or children, with whom they maintain a bona fide family relationship in their homes, to assure the employer that if the time comes when such registrants are needed in the armed forces he would receive notice of his employees' Selective Service status.

Heretofore, form 42B was used by employers to indicate men with dependents engaged in an activity essential to war production or in support of the war effort for whom a Class III-B deferment was requested. However, now that Class III-B, for the designation of such men, has been eliminated, form 42B will be filed only for men with children who are in Class III-A.

Coincident with these suggestions to employers, Selective Service also announced an interpretation of its previously issued memorandum relating to filling calls. On April 12, 1943, in a memorandum to local boards Selective Service said:

"Insofar as possible, men who are finally classified in Class I-A, men fit for military service; Class I-A-O, men fit for noncombatant service in the armed forces; or Class IV-E, men fit for work of national importance, who are available for induction or assignment to work of national importance, should be called for induction or assignment to work of national importance from the following groups in the order listed: (1) single men with no dependents, (2) single men with collateral dependents, (3) married men with wives only, and (4) men with children."

WEATHER LEAKS

The Office of Censorship requests the active cooperation of all station managers to prevent leaks which disclose weather conditions. Unwittingly information which reflects weather conditions creeps into many reports such as those emanating from state highway departments or state conservation or fishing commissions. All such releases should be carefully scrutinized by some responsible person in every radio station.

No paragraph in any such release which reflects "unseasonable", "recent rainy" or similar weather conditions as effecting fishing or hunting should be given on the air. These are quite apparently violations of the Wartime Code of Censorship.

Broadcasters' Responsibility

The duty of enforcing this Code is a solemn responsibility on the part of every broadcaster. If steps can be taken to eliminate incidental reference to weather in these official reports by contact at the source. this should be done. Where stations feature a sportsman's program care should be exercised so that no reference is made to the effect of changing weather upon fishing conditions.

Station managers are urged to advise the Office of Censorship of the contents of any pamphlets or releases gotten out by such authorities as above mentioned which make reference to weather conditions. This is in order that the Office may take the necessary steps to prevent recurrence of this practice.

Labor

SALARIES AND MANPOWER

A low cloud of administrative confusion still hangs over both the salary and manpower "freeze" programs, making exact answers to many questions still impossible.

On the salary side, there are signs that the cloud will soon lift. On Wednesday of this week, the freeze order of April 8 (Executive Order 9328) was modified. The War Labor Board is now permitted to allow salary increases under the "Little Steel" formula; in cases of "gross inequities," to promote "effective prosecution of the war." A "gross inequity" was defined as a salary under the lowest salary in the prevailing bracket for the same job in the same area.

For instance, if a substantial majority of the technicians in the stations in Podunk receive between $40 and $50, the WLB can now on the application of an employer permit any technician receiving less than $40 to be raised to that amount.

How the WLB will define "effective prosecution of the war" remains to be seen.

In connection with the "Little Steel" formula, it should be remembered that this *cannot* be applied to individuals. Here is how it works:

Take the average, hourly, straight time earnings of the *group* involved as of January, 1941. Say this is $1. Under the "Little Steel" formula, this group is entitled to an *average* increase of 15 cents an hour unless there have been increases since January, 1941. If they have, the average of these increases must be deducted from the 15 cents. The total increase allowable may be apportioned among individuals in any way the employer (or the employer and a union) sees fit.

On the manpower front, the best bet for broadcasters still is to consult their local War Manpower Commission officials or the local United States Employment Service before hiring. The administration of the job freeze program is being decentralized, and the rules and regulations may vary from place to place. It apparently is necessary for an employee to swap jobs at a higher rate of pay without a "certificate of availability," but the conditions for obtaining these may vary from place to place.

ANOTHER MANPOWER SOURCE

Stations are advised that investigation at WMC and Selective Service headquarters discloses that men in substantial numbers are now being discharged from the armed services, and that many of these men have specialized training in radio. It is suggested that stations interested in employing such men communicate their needs to their state director of Selective Service and their state director of the USES.

Men who are service casualties are granted a Certificate of Disability Discharge, and their names are reported to the Reemployment committeemen at their local draft boards by Selective Service, and to their local USES offices. Other disability cases are reported by WMC to their local USES offices. Both sources may afford excellent opportunities for securing replacement technicians.

Consideration should be given to the individual's acceptability as a permanent employee, both from the standpoint of the reemployment requirements of the Selective Training and Service Act and the public relations problems to be encountered in the possible discharge of a wounded veteran.

AFRA BLOCKS CBS USE OF "THIS IS THE ARMY"

AFRA this week turned thumbs down on a new CBS commercial which was to have used the cast of "This Is The Army."

Mrs. Emily Holt, AFRA's executive secretary, said that the decision had been a difficult one for the union's board to make lest it be thought that the actors were interfering with Army relief needs, even though the performers of the country had helped raise a total of $2,120,212.60, by official accounting, for Army and Navy relief during 1942.

The deciding factor in the board's decision, she said, was the realization that the cast of "This Is the Army," working for regular Army pay, would be promoting a venture that would mean substantial profits for the Columbia network and its affiliated stations and national advertising for the sponsor's product.

"We feel that soldiers and sailors ought not to be asked to sell soap or any other product," Mrs. Holt said.

Since the show was commercial, she said, the technical issue raised was whether A. F. R. A. members, some of whom are in "This Is the Army," should be asked to work with non-union performers. Of equal importance, she said, was the fact that the sponsor, with a proved program on its hands, would have a tremendous competitive advantage over the sponsors who paid the usual union wages and met all other commercial working conditions.

Engineering

WARTIME RECOMMENDATION FOR FIELD INTENSITY SURVEYS

During wartime, it is recognized that facilities for making a sufficient number of field intensity measurements to determine average daytime contours may not be available. The NAB executive engineering committee has therefore recommended an alternate wartime method for calculating these contours.

The new recommendation has been issued as a supplement page of the NAB Engineering Handbook, and will be mailed to all NAB member stations with the May 14 issue of the Swap Bulletin.

NOTICE

WANTED:	For publication in a profusely illustrated brochure, to be published by NAB, 8 x 10 gloss print of your women radio technicians.
PURPOSE:	To show that womanpower is relieving manpower. By "proof of the pudding" technique, to assist stations, not now employing women technicians, to recruit them.
COMPOSITION:	Show the girls at work. Photo should tell the story—women handling equipment in studio or at transmitter.
COPY:	Write your own story. Say whether training was given under supervision of your chief engineer or whether girls were formally trained, say in an ESMWT radio course . . . or combination. Comment on ability as proven in practice. What grade license, if any, do they hold? Full information will permit us to conform your copy to format.
DEADLINE:	Photo and copy should reach NAB by June 7, 1943. Send to Arthur Stringer.
THANK YOU:	If you are now employing women operators or technicians, you will help the industry by participating in this promotion. Thanks for your help.

WSJS WILL TRAIN TECHNICIANS OVER 45

In an effort to help relieve the shortage of trained technical personnel for radio, WSJS will inaugurate a radio technician training school to train women and men over 45 as transmitter and control operators.

Phil Hedrick, technical supervisor of WSJS, will teach the school, which will be tuition-free to students who are accepted for enrollment. Hedrick has had ample previous experience in such work, having been on the faculty of two previous radio technical school terms in Winston-Salem, conducted under the supervision of the extension division of North Carolina State College.

"The school," says station director Harold Essex, "was planned to be of benefit to other stations in our area, as well as to our own. Each student accepted understands that he or she is under no obligation to accept employment at WSJS after successful completion of the course, nor is the station to be under any obligation to provide or obtain employment for a student. Naturally, we expect to pick up one or two good ones for ourselves, but we expect also to turn out many students who will find connections with other stations as well."

From six to eight weeks, with classes two evenings each week, will be required for the course it is estimated. Plans are to "graduate" a group of students in time to have them take the F.C.C. examination the first Saturday in August, the next date on which the examination will be given in Winston-Salem.

NAB COVERS SCHENECTADY RADIO COUNCIL MEETINGS

The Northeastern Radio Council of New York will meet this week-end at Union College, Schenectady, to hold its first regional conference on radio in education.

Dorothy Lewis, NAB coordinator of listener activity, is scheduled to speak on "What A Council Can Mean." Walt Dennis, NAB news bureau chief, will be on hand to cover the meeting and to renew acquaintance with P. Schuyler Miller, of the Schenectady Board of Education, and discuss news broadcasts for children.

Miller is author of the children's news broadcast scripts over stations in that area as well as publicity director of the radio council.

Kenneth Bartlett, director of Syracuse university's radio workshop and Dr. James Rowland Angell, NBC public service counsel, also are scheduled speakers.

Leon Levine, assistant director of education for CBS, and Grace Johnson, director of women's and children's programs for the BLUE, will also speak. Kolin Hager, WGY manager, will preside at the Saturday luncheon. Mrs. Carolyn G. Tarbell is council president.

BMI TOP TUNES

(These songs currently are listed by Variety "sheets" as being among those most played on the air.)

DON'T CRY—National Music Co.
BRAZIL—Southern Music Publishing Co.
CANTEEN BOUNCE—Edward B. Marks Music Corp.
DO I KNOW WHAT I'M DOIN'?—Melody Lane.
I HEARD YOU CRIED LAST NIGHT—Campbell, Loft and Porgie.
I DON'T BELIEVE IN RUMORS—BMI.
IT STARTED ALL OVER AGAIN—Embassy.
I'M THINKING TONIGHT OF MY BLUE EYES—Peer.
GOODNIGHT LITTLE ANGEL—Wells.
SH! DON'T LOOK NOW—Top Music.

PEABODY "LISTENING POSTS"

To aid the George Foster Peabody Radio Awards Board in its annual selections, listening post committees are being set up in institutions of higher learning throughout the United States, according to Dean John E. Drewry, Henry W. Grady School of Journalism, The University of Georgia, which, with the National Association of Broadcasters administers these "Pulitzer prizes of the air."

Institutions that have already set up such committees, which will function through the office of the dean of the Grady School, are the state universities of California, Colorado, Georgia, Idaho, Illinois, Iowa, Kentucky, Louisiana, Minnesota, New Jersey (Rutgers), Montana, North Carolina, North Dakota, Ohio, Pennsylvania, South Carolina, South Dakota, Washington, West Virginia, and Wisconsin.

Under the direction of Dorothy Lewis (NAB), coordinator of listener activity, New York City, similar listening post committees are being established through the groups with which she works.

At least twice, and possibly three times, each year, members of these listening post committees will make reports as to significant broadcasting activities within their respective areas.

Adella A. Spence

Adella A. Spence, wife of Edwin M. Spence, former secretary-treasurer of NAB and manager of WWDC, died Wednesday, May 12, in Stuart, Florida. Mrs. Spence had been ill for more than a year and had been moved from her native city of Atlantic City to Florida to recuperate. Funeral services will be held from the Jeffries and Keates funeral home in Atlantic City with interment at Pleasantville cemetery.

AWD ANALYZES ACTIVITIES

An analysis and crystalization of the wartime activities of the members of the Association of Women Directors was made during the recent NAB and Ohio Institute sessions.

Plans to extend these projects were incorporated into the following statement of policy: "The Association of Women Directors of the National Association of Broadcasters pledge their wholehearted support and talents to the promotion of essential war projects. Believing that the enlistment of woman power for the services, for industry and for civilian wartime activities presents an immediate and serious problem, the steering committee recommends that the members carefully consider the needs in their locality, and as their current major responsibility offer their services and talents to the solution of the problem."

The following members attended the sessions:

Ruth Chilton, president, WSYR, Syracuse, N. Y.; Mildred Bailey, secretary, WTAG, Worcester, Mass.; Rhea McCarty, treasurer, WCOL, Columbus, Ohio; Dorothy Lewis, NAB, New York City; Mary Mason, district chairman, WRC, Washington, D. C.; Ann Ginn, district chairman, WTCN, Minneapolis, Minn.; Ruth Crane, district chairman, WJR, Detroit, Mich., and Peggy Cave, district chairman, KSD, St. Louis, Mo.

Others included: Florence Shugars, district chairman, WROK, Rockford, Ill.; Victoria Corey, district chairman, KDKA, Pittsburgh, Pa.; Marvel Campbell, district chairman, WAIR, Winston-Salem, N. C.; Frances Wilder, state district chairman, KNX, Hollywood, Cal.; Jane Weaver, WTAM, Cleveland, Ohio: Duffy Schwartz, WBBM, Chicago, Ill.; Marjorie A. Wever, WHIZ, Zanesville, Ohio; Gladys Borne, WISR, Butler, Pa.; Virginia Pierson, WTAD, Quincy, Ill.; Judith Waller, WMAQ, Chicago, Ill., and Madge L. Cooper, WMRN, Marion, Ohio.

Also: Hilda C. Wothrmeyer, WOWO-WGL, Fort Wayne, Ind.; Verda Mae Zeigler, Fort Wayne Public School, Fort Wayne, Ind.; Grace E. Ingledue, WFIN, Findlay, Ohio: Gertrude Broderick, FREC, Washington, D. C.; Lt. Hazel Markel, U. S. Navy, Washington, D. C.; Capt. Ruth Morton, WAAC, Washington, D. C.; Linnea Nelson, J. Walter Thompson, New York City; Dorothy Spicer, Chicago, Ill.; Hayle Cavenor, Regional Director, OWI, Minneapolis, Minn., and Madeline Johnson, WCOL, Columbus, Ohio.

Also: J. A. Barber, representing Ruth Schleber, KGVO, Missoula, Mont.; Lillian Gold, Chicago, Ill.; Kirt Cuff, Variety, Chicago, Ill.; Mrs. Oscar A. Ahlgren, president, Indiana Federation Women's Clubs; Mrs. R. F. Grosskopf, 7th District, Indiana Federation of Women's Clubs; Mrs. Esther Cook, state radio chairman, Wisconsin Federation of Women's Clubs; Mrs. Clarence A. Muth, Children's Theater, WTMJ, Milwaukee, Wis.; Mrs. George B. Palmer, national radio chairman, General Federation of Women's Clubs and regional director of listener activity for NAB; Mrs. R. K. Stoddard, regional director of listener activity of NAB in Iowa; Mrs. W. F. Ottmann, regional director of listener activity in Nebraska; Mrs. Robert Sterling, Illinois Federation of Women's Clubs, and Willard Egolf, NAB, Washington, N. C.

MORE REPORTS RECEIVED

Additional reports on the repairs to materials survey launched on March 26, 1943, have been received and are acknowledged with thanks.

Reporting cities are listed below. These are in addition to the cities reported in NAB Reports of April 16 and May 7.

Charleston, W. Va., Cincinnati, Ohio, Dixon, Ill. (and surrounding territory), Fairmont, W. Va., Harrisburg, Pa., Huntington, W. Va., Parkersburg, W. Va., Redding, Calif.

EXCESS PROFITS TAX

The Bureau of Internal Revenue this week issued regulations covering the excess profits tax relief provisions contained in Sec. 222 of the Revenue Act of 1942, Title II. Regulation 109 as thus amended may be procured from the Bureau of Internal Revenue, Washington, D. C., or from the nearest Collector of Internal Revenue.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, May 17th. It is subject to change.

Monday, May 17

Further Hearing

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Modification of C. P., under C. P. **1240 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WPTZ—Philco Radio & Television Corp., Wyndmoor, Pa.—Granted permission for licensee to use the announcement "WPTZ, Philadelphia", at its transmitter-studio when desirable for program correlation, until such time as national defense restrictions permit the use of the Tioga and C Streets studio in Philadelphia, or a new studio is acquired elsewhere within the city limits of Philadelphia.

KYA—Palo Alto Radio Station, Inc., San Francisco, Calif.—Granted special service authorization to permit broadcast of calls directed to Longshoremen, in accordance with request of the Pacific Coast Maritime Industry Board service to be rendered without charge. These announcements will be of 5 minutes duration in the a. m. and 5 minutes duration in the p. m.

LICENSE RENEWALS

Renewal of licenses for the following stations were granted for the period ending April 1, 1945:

KALB, Alexandria, La.; KDLR, Devils Lake, N. Dak.; KFJI, Klamath Falls, Ore.; KGY, Olympia, Wash.; KPFA, Helena, Mont.; KVSO, Ardmore, Okla.; WFOY, St. Augustine, Fla.; WGCM, Gulfport, Miss.; WJEJ, Hagerstown, Md.; WMFG, Hibbing, Minn.; WSNJ, Bridgeton, N. J.

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Granted renewal of license for the period ending June 1, 1945.

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Granted renewal of license for the period ending June 1, 1945.

WFTC—Jonas Weiland, Kinston, N. C.—Granted renewal of license for the period ending February 1, 1945.

Renewal of licenses for the following stations were granted for the period ending June 1, 1945:

KBND, Bend, Ore.; KOCY, Oklahoma City, Okla.; KVIC, Victoria, Texas; KVOL, Lafayette, La.; KWOC, Poplar Bluff, Mo.; KXRO, Aberdeen, Wash.; WAIR, Winston-Salem, N. C.; WBRK, Pittsfield, Mass.; WCLS, Joliet, Ill.; WFBG, Altoona, Pa.; WGTM, Wilson, N. C.

W9XBT—Balaban & Katz Corp., Portable-Mobile, area of Chicago, Ill.—Granted renewal of license for the period ending February 1, 1944.

KALW—Board of Education of the San Francisco Unified School Dist., San Francisco, Calif.—Granted renewal of license for the period ending May 1, 1944.

WBRY—University of Kentucky, Beattyville, Ky.—Granted renewal of license for the period ending May 1, 1944.

W75NY—Metropolitan Television, Inc., New York City.—Granted renewal of license for the period ending June 1, 1944.

W9XER—Midland Broadcasting Co., Kansas City, Mo.—Granted renewal of license for the period ending May 1, 1944.

ORDER ADOPTED

The FCC has adopted an Order, pursuant to its Proposed Findings of Fact and Conclusions (B-170) entered on March 23, 1943, denying without prejudice the application of Georgia School of Technology, Atlanta, Ga., for renewal of license of Station WGST. The application was denied without prejudice to the filing of a further application for renewal of license in accordance with the conclusions reached in these proceedings, such further application to be filed within 60 days from March 23, 1943, and to set forth the plan of the applicant for the acquisition of the necessary facilities and equipment, and for the business management, representation, and control of its future operations, together with a list of all persons to participate therein.

The Commission further ordered that the outstanding temporary license for the operation of Station WGST be extended for a period of 90 days from March 23, 1943, or until June 21, 1943. (Docket No. 5903)

MISCELLANEOUS

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Granted license to cover construction permit as modified, for installation of new equipment and directional antenna for day and night use, change frequency, increase power, and move of transmitter (B2-L-1762); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1517).

W9XMB—The Moody Bible Institute of Chicago, Ill.—Granted modification of construction permit as modified, which authorized new ST broadcast station, for extension of completion date from May 16 to August 16, 1943 (B4-MPST-14).

WSAY—Brown Radio Service and Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Granted modification of construction permit as modified, which authorized change of frequency, increase in power, installation of directional antenna for day and night use and new transmitter, and move of transmitter, for extension of completion date from May 1 to November 1, 1943 (B1-MP-1710).

WWPG—Lake Worth Broadcasting Corp., Lake Worth, Fla.—Granted modification of license (B3-ML-1154) to change designation of station from Lake Worth to Palm Beach, Florida.

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Action on petition for order to take depositions in re application for renewal of license, was passed over until June 16. (Docket No. 6476)

WLAN—Thomas J. Watson, Endicott, N. Y.—Granted petition for leave to dismiss without prejudice application for modification of construction permit to operate on **1450 kc.**, 250 watts, unlimited time. (Docket No. 6453)

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Granted motion for continuance of hearing on application for construction permit; hearing continued to June 7, 1943. (Docket No. 6488)

Transradio Press Service, Inc. (Complainant).—Granted motion for extension of time in which to file proposed findings of facts and conclusions in the matter of Trans-radio Press Service, Inc., complainant, vs. American Telephone and Telegraph Co., et al., defendants (Docket No. 5993), and in the matter of investigation of the rates, charges, classifications, regulations, practices and services of American Telephone and Telegraph Co., et al., in the rendition of press private line teletypewriter service (Docket No. 6202); time extended to August 2, 1943.

APPLICATIONS FILED AT FCC

550 Kilocycles

KTSA—Sunshine Broadcasting Co., San Antonio, Tex.—Authority to determine operating power by direct measurement of antenna power.

920 Kilocycles

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—License to cover construction permit (B2-P-2913) as modified, for changes in directional antenna for night use, and increase in power.

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Authority to determine operating power by direct measurement of antenna power.

1010 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—License to cover construction permit (B3-P-3049) as modified, which authorized move of transmitter, new transmitter, change in frequency, changes in directional antenna for night use, and increase in power; also for approval of new type transmitter.

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Authority to determine operating power by direct measurement of antenna power.

1330 Kilocycles

WHAZ—Rensselaer Polytechnic Institute, Troy, N. Y.—Authority to determine operating power by direct measurement of antenna power.

TELEVISION APPLICATION

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Modification of construction permit (B1-PVB-40 as modified, for new experimental television station) for extension of completion date from 5-31-43 to 12-31-43.

MISCELLANEOUS APPLICATION

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Transfer of control from Beatrice L. Devaney, Executrix of Estate of John P. Devaney, David J. Winton and Charles J. Winton, Jr., to Ralph Atlass (972 shares common stock).

NEW—Blue Network Co., Inc., New York, N. Y.—Extension of authority to transmit programs to Stations CFCF and CBL and the Canadian Broadcasting Corp.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Atlantic City Wholesale Drug Company, Atlantic City, N. J., and Roy H. Cochran and Rodney S. Pullen, Jr., president and sales manager of the corporation, are charged in a complaint with violation of the Robinson-Patman Act. (4957)

Carter Products, Inc., 53 Park Place, New York, engaged in the sale of a cosmetic and deodorant designated "Arrid," is charged in a complaint with disseminating advertisements containing false representations concerning the preparation. The complaint also is directed against Small & Seiffer, Inc., advertising agency at 24 West 40th St., New York, which prepares and places advertising copy to promote the sale of the preparation. (4960)

Sculler Safety Corp.—A complaint charges that the Sculler Safety Corporation, 116-122 Broad Street, New York, engaged in the sale and distribution of marine signal equipment and supplies has sold and distributed in commerce certain old and obsolete signal pistol cartridges bearing fictitious dates and which are worthless and ineffective, thus placing in jeopardy the lives of passengers and crew and the safety of the vessels in which the undated cartridges have been used. (4958)

Willys-Overland Motors, Inc.—Misrepresentation in the advertising of Willys-Overland Motors, Inc., as to the creation and perfection of the U. S. Army "Jeep," is charged in a complaint. The complaint alleges that the idea of creating a "Jeep" was originated by the American Bantam Car Company, of Butler, Pa., in collaboration with certain officers of the United States Army. (4959)

ORDER

National Administrators. An order to cease and desist from misrepresentation in connection with the sale of questionnaire forms used by creditors and collection agencies in obtaining information concerning delinquent debtors has been issued against Dan Trainor, trading as National Administrators, Winona, Minn.; John A. Janssen and Lloyd L. Hill, operating a collection agency known as Consumer Distribution Consultants, 520 North Michigan Ave., Chicago; and Chicago Mail Order Co. and Spiegel, Inc., Chicago corporations operating mail order businesses for the sale of merchandise at retail. (4870)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

G. S. Dowdy Sales Co., 602 North Walnut St., Florence, Ala., stipulated that in connection with the sale or distribution of his candy products he will cease and desist from the use of any sales plan involving a lottery scheme, gaming device or gift enterprise. (3641)

Elfco Service, 440 North Wells St., Chicago, stipulated that it will cease and desist from certain misrepresentations in connection with the sale of publications containing formulas recommended for various ailments and conditions of the body. The titles of the publications are "Formula Book" and "Brains Boiled Down." (03106)

J. E. Hanger, Inc.—Two corporations engaged in the manufacture of artificial limbs, and the advertising representative of one of them, have entered into stipulations to cease and desist from certain misrepresentations in connection with the sale of their products. Entering into the stipulations were J. E. Hanger, Inc., of Texas, located at 1914 Olive St., St. Louis, Mo.; and J. E. Hanger, Inc., of Delaware, located at 221 G St., N. W., Washington, D. C., and its advertising representative, R. Loran Langsdale, Inc., Baltimore. (3639-3640)

Kovac Laboratories, Inc., 6219 South Main St., Los Angeles, has entered into a stipulation to discontinue certain misrepresentations it has made concerning the therapeutic properties of food preparations sold under the names "Kovac," "Chikovac," "Papaya Dyjestin" and "Kovac Type Acidophilus Culture." (3642)

Kroehler Manufacturing Co., Naperville, Ill., stipulated that in connection with the sale and distribution of its furniture, it will cease and desist from representing that any comparative figures or data pertaining to volume of sale, turnover, gross margin or cost of merchandise of Kroehler dealers, as compared with furniture dealers generally, is based upon reports by any number of Kroehler dealers in excess of the number actually reporting on each and every item concerning which representations are made. (3643)

Si-Oze Co., 116 South Michigan Ave., Chicago, engaged in selling a medicinal preparation designated "Si-Oze," entered into a stipulation to cease and desist from disseminating any advertisement which fails to reveal that excessive use of the preparation may be dangerous and that it should not be administered to infants and younger children except on competent advice nor used by individuals suffering from high blood pressure, heart disease, diabetes or thyroid trouble except on competent advice, and, further, that frequent or continued use may cause nervousness, restlessness or sleeplessness; provided, however, that such advertisement need only contain the statement, "CAUTION: Use only as directed," if and when the directions for use, wherever they appear on the label or in the labeling, contain a warning to the same effect. (03109)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bristol-Myers Co., Hillside, N. J., has been ordered to cease and desist from certain misrepresentations concerning the therapeutic and curative properties of the laxative designated "Sal Hepatica." The representations prohibited were made by the respondent corporation in advertisements in newspapers and magazines and in radio continuities. (3645)

Franklin Sales Co., 212 South Franklin St., Chicago, has been ordered to cease and desist from selling or otherwise disposing of any merchandise by means of a lottery scheme. The respondent deals in various articles of merchandise, including glassware, silverware, pen and pencil sets, radios, luggage and electrical appliances, which are sold to ultimate purchasers by means of push cards furnished by the respondent to his distributors. (4782)

Howe & Company—An order to cease and desist from certain misrepresentations in connection with the sale of cosmetics has been issued against Phil Howe, David A. Howe, and Joanne B. Howe, trading as Howe & Co., 1535 11th Ave., Seattle, Wash. (4729)

McNeil Drug Company, Inc., and Associated Advertising Agency, Inc., both of Jacksonville, Fla., have been ordered to cease and desist from certain misrepresentations and false advertising in connection with the sale and distribution of a medicinal preparation variously designated as "Magic Remedy," "McNeil's Magic Remedy," and "McNeil's Magic Remedy Brand." The advertising corporation is engaged in the preparation, editing and dissemination of advertising material for the McNeil Corporation. (4923)

Samuel H. Moss, Inc., 36 East 23rd Street, New York, a manufacturer, processor and distributor of "made to order rubber stamps," has been ordered to cease and desist from certain price discriminations in the sale of its products. (4405)

Nash Brothers Drug Co., Jonesboro, Ark., compounding, selling and distributing a medicinal preparation formerly designated "Nash's C & L Tonic," now designated "Nash's C & L Malaria Chill Tonic and Laxative," has been ordered to cease and desist from misrepresentation and false advertising in connection with the sale of the preparation. (3775)

Stetson Felt Mills, 223 East Fourth St., St. Paul, Minn., has been ordered to cease and desist from the use of false representations and fraudulent schemes to promote the sale of the felt rugs they manufacture. (4234)

FTC CLOSES PART OF CASE

The Federal Trade Commission has closed without prejudice a portion of its case involving alleged misrepresentation in connection with the sale of Nucoa Oleomargarine, manufactured and distributed by The Best Foods, Inc., New York.

The effect of the order is to strike out those portions of the complaint in which the Commission alleged as misleading and deceptive the representations that oleomargarine "is a fit food for children" and that "wholesome margarine and butter are equally delicious and nutritious (both yield 3400 calories—food-energy units—to the pound)." The allegation that such representations are untrue unless vitamin A is added to the product in sufficient quantity also is stricken from the complaint.

Remaining in force are those portions of the complaint which allege that the respondent's representations concerning the whole milk content of its product and its method of manufacture are misleading and deceptive.

Full Text of FCC Opinion

May 10, 1943

Nos. 554-555.—OCTOBER TERM, 1942.

National Broadcasting Company, Inc., Woodmen of the World Life Insurance Society, and Stromberg-Carlson Telephone Manufacturing Company, Appellants,
554 *vs.*
The United States of America, Federal Communications Commission, and Mutual Broadcasting System, Inc.

Columbia Broadcasting System, Inc., Appellant,
555 *vs.*
The United States of America, Federal Communications Commission, and Mutual Broadcasting System, Inc.

Appeals from the District Court of the United States for the Southern District of New York.

[May 10, 1943.]

Mr. Justice FRANKFURTER delivered the opinion of the Court.

In view of our dependence upon regulated private enterprise in discharging the far-reaching role which radio plays in our society, a somewhat detailed exposition of the history of the present controversy and the issues which it raises is appropriate.

These suits were brought on October 30, 1941, to enjoin the enforcement of the Chain Broadcasting Regulations promulgated by the Federal Communications Commission on May 2, 1941, and amended on October 11, 1941. We held last Term in *Columbia System* v. *U. S.*, 316 U. S. 407, and *Nat. Broadcasting Co.* v. *U. S.*, 316 U. S. 447, that the suits could be maintained under § 402(a) of the Communications Act of 1934, 48 Stat. 1093, 47 U. S. C. § 402(a) (incorporating by reference the Urgent Deficiencies Act of October 22, 1913, 38 Stat. 219, 28 U. S. C. § 47), and that the decrees of the District Court dismissing the suits for want of jurisdiction should therefore be reversed. On remand the District Court granted the Government's motions for summary judgment and dismissed the suits on the merits. 47 F. Supp. 940. The cases are now here on appeal. 28 U. S. C. § 47. Since they raise substantially the same issues and were argued together, we shall deal with both cases in a single opinion.

On March 18, 1938, the Commission undertook a comprehensive investigation to determine whether special regulations applicable to radio stations engaged in chain broadcasting[1] were required in the "public interest, convenience, or necessity". The Commission's order directed that inquiry be made, *inter alia*, in the following specific matters: the number of stations licensed to or affiliated with networks, and the amount of station time used or controlled by networks; the contractual rights and obligations of stations under their agreements with networks; the scope of network agreements containing exclusive affiliation provisions and restricting the network from affiliating with other stations in the same area; the rights and obligations of stations with respect to network advertisers; the nature of the program service rendered by stations licensed to networks; the policies of networks with respect to character of programs, diversification, and accommodation to the particular requirements of the areas served by the affiliated stations; the extent to which affiliated stations exercise control over programs, advertising contracts, and related matters; the nature and extent of network program duplication by stations serving the same area; the extent to which particular networks have exclusive coverage in some areas; the competitive practices of stations engaged in chain broadcasting; the effect of chain broadcasting upon stations not licensed to or affiliated with networks; practices or agreements in restraint of trade, or in furtherance of monopoly, in connection with chain broadcasting; and the scope of concentration of control over stations, locally, regionally, or nationally, through contracts, common ownership, or other means.

On April 6, 1938, a committee of three Commissioners was designated to hold hearings and make recommendations to the full Commission. This committee held public hearings for 73 days over a period of six months, from November 14, 1938, to May 19, 1939. Order No. 37, announcing the investigation and specifying the particular matters which would be explored at the hearings, was published in the Federal Register, 3 Fed. Reg. 637, and copies were sent to every station licensee and network organization. Notices of the hearings were also sent to these parties. Station licensees, national and regional networks, and transcription and recording companies were invited to appear and give evidence. Other persons who sought to appear were afforded an opportunity to testify. 96 witnesses were heard by the committee, 45 of whom were called by the national networks. The evidence covers 27 volumes, including over 8,000 pages of transcript and more than 700 exhibits. The testimony of the witnesses called by the national networks fills more than 6,000 pages, the equivalent of 46 hearing days.

The committee submitted a report to the Commission on June 12, 1940, stating its findings and recommendations. Thereafter, briefs on behalf of the networks and other interested parties were filed before the full Commission, and on November 28, 1940, the Commission issued proposed regulations which the parties were requested to consider in the oral arguments held on December 2 and 3, 1940. These proposed regulations dealt with the same matters as those covered by the regulations eventually adopted by the Commission. On January 2, 1941, each of the national networks filed a supplementary brief discussing at length the questions raised by the committee report and the proposed regulations.

On May 2, 1941, the Commission issued its Report on Chain Broadcasting, setting forth its findings and conclusions upon the matters explored in the investigation, together with an order adopting the Regulations here assailed. Two of the seven members of the Commission dissented from this action. The effective date of the Regulations was deferred for 90 days with respect to existing contracts and arrangements of network-operated stations, and subsequently the effective date was thrice again postponed. On August 14, 1941, the Mutual Broadcasting Company petitioned the Commission to amend two of the Regulations. In considering this petition the Commission invited interested parties to submit their views. Briefs were filed on behalf of all of the national networks, and oral argument was had before the Commission on September 12, 1941. And on October 11, 1941, the Commission (again with two members dissenting) issued a Supplemental Report, together with an order amending three Regulations. Simultaneously, the effective date of the Regulations was postponed until November 15, 1941, and provision was made for further postponements from time to time if necessary to permit the orderly adjustment of existing arrangements. Since October 30, 1941, when the present suits were filed, the enforcement of the Regulations has been stayed either voluntarily by the Commission or by order of court.

Such is the history of the Chain Broadcasting Regulations. We turn now to the Regulations themselves, illumined by the practices in the radio industry disclosed by the Commission's investigation. The Regulations, which the Commission characterized in its Report as "the expression of the general policy we will follow in exercising our licensing power", are addressed in terms to station licensees and applicants for station licenses. They provide, in general, that no licenses shall be granted to stations or applicants having specified relationships with networks. Each Regulation is directed at a particular practice found by the Commission to be detrimental to the "public interest", and we shall consider them *seriatim*. In doing so, however, we do not overlook the admonition of the Commission, that the Regulations as well as the network practices at which they are aimed are interrelated: "In considering above the network practices which necessitate the regulations we are adopting, we have taken each practice singly, and have shown that even in isolation each warrants the regulation addressed to it. But the various practices we have considered do not operate in isolation; they form a compact bundle or pattern, and the effect of their joint impact upon licensees necessitates the regulations even more urgently than the effect of each taken singly." (Report, p. 75.)

The Commission found that at the end of 1938 there were 660 commercial stations in the United States, and that 341 of these were affiliated with national networks. 135 stations were affiliated exclusively with the National Broadcasting Company, Inc., known in the industry as NBC, which operated two national networks, the "Red" and the "Blue". NBC was also the licensee of 10 stations, including 7 which operated on so-called clear channels with the maximum power available, 50 kilowatts; in addition, NBC operated 5 other stations, 4 of which had power of 50 kilowatts, under management contracts with their licensees. 102 stations were affiliated exclusively with the Columbia Broadcasting System, Inc., which was also the licensee of 8 stations, 7 of which were clear-channel stations operating with power of 50 kilowatts, 74 stations were under exclusive affiliation with the Mutual Broadcasting System, Inc. In addition, 25 stations were affiliated with both NBC and Mutual, and 5 with both CBS and Mutual. These figures, the Commission noted, did not accurately reflect the relative prominence of the three companies, since the stations affiliated with Mutual were, generally speaking, less desirable in frequency, power, and coverage. It pointed out that the stations affiliated with the national networks utilized more than 97% of the total nighttime broadcasting power of all the stations in the country. NBC and CBS together controlled more than 85% of the total nighttime wattage, and the broadcast business handled by the three national network companies amounted to almost half of the total business of all stations in the United States.

---

[1] Chain broadcasting is defined in § 3(p) of the Communications Act of 1934 as the "simultaneous broadcasting of an identical program by two or more connected stations." In actual practice, programs are transmitted by wire, usually leased telephone lines, from their point of origination to each station in the network for simultaneous broadcast over the air.

The Commission recognized that network broadcasting had played and was continuing to play an important part in the development of radio. "The growth and development of chain broadcasting", it stated, "found its impetus in the desire to give widespread coverage to programs which otherwise would not be heard beyond the reception area of a single station. Chain broadcasting makes possible a wider reception for expensive entertainment and cultural programs and also for programs of national or regional significance which would otherwise have coverage only in the locality of origin. Furthermore, the access to greatly enlarged audiences made possible by chain broadcasting has been a strong incentive to advertisers to finance the production of expensive programs. . . . But the fact that the chain broadcasting method brings benefits and advantages to both the listening public and to broadcast station licensees does not mean that the prevailing practices and policies of the networks and their outlets are sound in all respects, or that they should not be altered. The Commission's duty under the Communications Act of 1934 is not only to see that the public receives the advantages and benefits of chain broadcasting, but also, as far as its powers enable it, to see that practices which adversely affect the ability of licensees to operate in the public interest are eliminated." (Report, p. 4.)

The Commission found that eight network abuses were amenable to correction within the powers granted it by Congress:

Regulation 3.101—Exclusive affiliation of station. The Commission found that the network affiliation agreements of NBC and CBS customarily contained a provision which prevented the station from broadcasting the programs of any other network. The effect of this provision was to hinder the growth of new networks, to deprive the listening public in many areas of service to which they were entitled, and to prevent station licensees from exercising their statutory duty of determining which programs would best serve the needs of their community. The Commission observed that in areas where all the stations were under exclusive contract to either NBC or CBS, the public was deprived of the opportunity to hear programs presented by Mutual. To take a case cited in the Report: In the fall of 1939 Mutual obtained the exclusive right to broadcast the World Series baseball games. It offered this program of outstanding national interest to stations throughout the country, including NBC and CBS affiliates in communities having no other stations. CBS and NBC immediately invoked the "exclusive affiliation" clauses of their agreements with these stations, and as a result thousands of persons in many sections of the country were unable to hear the broadcasts of the games.

"Restraints having this effect", the Commission observed, "are to be condemned as contrary to the public interest irrespective of whether it be assumed that Mutual programs are of equal, superior or inferior quality. The important consideration is that station licensees are denied freedom to choose the programs which they believe best suited to their needs; in this manner the duty of a station licensee to operate in the public interest is defeated. . . . Our conclusion is that the disadvantages resulting from these exclusive arrangements far outweigh any advantages. A licensee station does not operate in the public interest when it enters into exclusive arrangements which prevent it from giving the public the best service of which it is capable, and which, by closing the door of opportunity in the network field, adversely affect the program structure of the entire industry." (Report, pp. 52-57.) Accordingly, the Commission adopted Regulation 3.101, providing as follows: "No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization."

Regulation 3.102—Territorial exclusivity. The Commission found another type of "exclusivity" provision in network affiliation agreements whereby the network bound itself not to sell programs to any other station in the same area. The effect of this provision, designed to protect the affiliate from the competition of other stations serving the same territory, was to deprive the listening public of many programs that might otherwise be available. If an affiliated station rejected a network program, the "territorial exclusivity" clause of its affiliation agreement prevented the network from offering the program to other stations in the area. For example, Mutual presented a popular program, known as "The American Forum of the Air", in which prominent persons discussed topics of general interest. None of the Mutual stations in the Buffalo area decided to carry the program, and a Buffalo station not affiliated with Mutual attempted to obtain the program for its listeners. These efforts failed, however, on account of the "territorial exclusivity" provision in Mutual's agreements with its outlets. The result was that this program was not available to the people of Buffalo.

The Commission concluded that "It is not in the public interest for the listening audience in an area to be deprived of network programs not carried by one station where other stations in that area are ready and willing to broadcast the programs. It is as much against the public interest for a network affiliate to enter into a contractual arrangement which prevents another station from carrying a network program as it would be for it to drown out that program by electrical interference." (Report, p. 59.)

Recognizing that the "territorial exclusivity" clause was unobjectionable in so far as it sought to prevent duplication of programs in the same area, the Commission limited itself to the situations in which the clause impaired the ability of the licensee to broadcast programs otherwise available. Regulation 3.102, promulgated to remedy this particular evil, provides as follows: "No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary service area upon the programs of the network organization."

Regulation 3.103—Term of affiliation. The standard NBC and CBS affiliation contracts bound the station for a period of five years, with the network having the exclusive right to terminate the contracts upon one year's notice. The Commission, relying upon § 307(d) of the Communications Act of 1934, under which no license to operate a broadcast station can be granted for a longer term than three years, found the five-year affiliation term to be contrary to the policy of the Act: "Regardless of any changes that may occur in the economic, political, or social life of the Nation or of the community in which the station is located, CBS and NBC affiliates are bound by contract to continue broadcasting the network programs of only one network for 5 years. The licensee is so bound even though the policy and caliber of programs of the network may deteriorate greatly. The future necessities of the station and of the community are not considered. The station licensee is unable to follow his conception of the public interest until the end of the 5-year contract." (Report, p. 61.) The Commission concluded that under contracts binding the affiliates for five years, "stations become parties to arrangements which deprive the public of the improved service it might otherwise derive from competition in the network field; and that a station is not operating in the public interest when it so limits its freedom of action." (Report, p. 62.) Accordingly, the Commission adopted Regulation 3.103: "No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years:[2] *Provided*, That a contract, arrangement, or understanding for a period up to two years, may be entered into within 120 days prior to the commencement of such period."

Regulation 3.104—Option time. The Commission found that network affiliation contracts usually contained so-called network optional time clauses. Under these provisions the network could upon 28 days' notice call upon its affiliates to carry a commercial program during any of the hours specified in the agreement as "network optional time". For CBS affiliates "network optional time" meant the entire broadcast day. For 29 outlets of NBC on the Pacific Coast, it also covered the entire broadcast day; for substantially all of the other NBC affiliates, it included 8½ hours on weekdays and 8 hours on Sundays. Mutual's contracts with about half of its affiliates contained such a provision, giving the network optional time for 3 or 4 hours on weekdays and 6 hours on Sundays.

In the Commission's judgment these optional time provisions, in addition to imposing serious obstacles in the path of new networks, hindered stations in developing a local program service. The exercise by the networks of their options over the station's time tended to prevent regular scheduling of local programs at desirable hours. The Commission found that "shifting a local commercial program may seriously interfere with the efforts of a [local] sponsor to build up a regular listening audience at a definite hour, and the long-term advertising contract becomes a highly dubious project. This hampers the efforts of the station to develop local commercial programs and affects adversely its ability to give the public good program service. . . . A station licensee must retain sufficient freedom of action to supply the program and advertising needs of the local community. Local program service is a vital part of community life. A station should be ready, able, and willing to serve the needs of the local community by broadcasting such outstanding local events as community concerts, civic meetings, local sports events, and other programs of local consumer and social interest. We conclude that national network time options have restricted the freedom of station licensees and hampered their efforts to broadcast local commercial programs, the programs of other national networks, and national spot transcriptions. We believe that these considerations far outweigh any supposed advantages from 'stability' of network operations under time options. We find that the optioning of time by licensee stations has operated against the public interest." (Report, pp. 63, 65.)

The Commission undertook to preserve the advantages of option time, as a device for "stabilizing" the industry, without unduly impairing the ability of local stations to develop local program service. Regulation 3.104 called for the modification of the option-time provision in three respects: the minimum notice period for exercise of the option could not be less than 56 days; the number of hours which could be optioned was limited; and specific restrictions were placed upon exercise of the option to the disadvantage of other networks. The text of the Regulation follows: "No license shall be granted to a standard broadcast station which options for network programs any time subject to call on less than 56 days' notice, or more time than a total of three hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into 4 segments, as follows: 8:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m.; 11:00 p.m. to 8:00 a.m. Such options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations."

Regulation 3.105—Right to reject programs. The Commission found that most network affiliation contracts contained a clause defining the right of the station to reject network commercial programs. The NBC contracts provided simply that the station "may reject a network program the broadcasting of which would not be in the public interest, convenience, and necessity." NBC required a licensee who rejected a program to "be able to support his contention that what he has done has been more in the public interest than had he carried on the network program". Similarly, the CBS contracts provided that if the station had "reasonable objection to any sponsored program or the product advertised thereon as not being in the public interest, the station may, on 3 weeks prior notice thereof to Columbia, refuse to broadcast such program unless during such notice period such reasonable objection of the station shall be satisfied."

While seeming in the abstract to be fair, these provisions, according to the Commission's finding, did not sufficiently protect the "public interest". As a practical matter, the licensee could not determine in advance whether the broadcasting of any particular network program would or would not be in the public interest. "It is obvious that from such skeletal information [as the networks submitted to the stations prior to the broadcasts] the station cannot determine in advance whether the program is in the public interest, nor can it ascertain whether or not parts of the program are in one way or another offensive. In practice, if not in theory, stations affiliated with networks have delegated to the networks a large part of their programming functions. In many instances, moreover, the network further delegates the actual production of programs to advertising agencies. These agencies are far more than mere brokers or intermediaries between the network and the advertiser. To an ever-increasing extent, these agencies actually exercise the function of program production. Thus it is frequently neither the station nor the network, but rather the advertising agency, which determines what broadcast programs shall contain. Under such circumstances, it is especially important that individual stations, if they are to operate in the public interest, should have the practical opportunity as well as the contractual right to reject network programs. . . .

---

[2] Station licenses issued by the Commission normally last two years. Section 3.34 of the Commission's Rules and Regulations governing Standard and High-Frequency Broadcast Stations, as amended October 14, 1941.

"It is the station, not the network, which is licensed to serve the public interest. The licensee has the duty of determining what programs shall be broadcast over his station's facilities, and cannot lawfully delegate this duty or transfer the control of his station directly to the network or indirectly to an advertising agency. He cannot lawfully bind himself to accept programs in every case where he cannot sustain the burden of proof that he has a better program. The licensee is obliged to reserve to himself the final decision as to what programs will best serve the public interest. We conclude that a licensee is not fulfilling his obligations to operate in the public interest, and is not operating in accordance with the express requirements of the Communications Act, if he agrees to accept programs on any basis other than his own reasonable decision that the programs are satisfactory." (Report, pp. 39, 66.)

The Commission undertook in Regulation 3.105 to formulate the obligations of licensees with respect to supervision over programs: "No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a), with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b), with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance."

Regulation 3.106—Network ownership of stations. The Commission found that NBC, in addition to its network operations, was the licensee of 10 stations, 2 each in New York, Chicago, Washington, and San Francisco, 1 in Denver, and 1 in Cleveland. CBS was the licensee of 8 stations, 1 in each of these cities: New York, Chicago, Washington, Boston, Minneapolis, St. Louis, Charlotte, and Los Angeles. These 18 stations owned by NBC and CBS, the Commission observed, were among the most powerful and desirable in the country, and were permanently inaccessible to competing networks. "Competition among networks for these facilities is nonexistent, as they are completely removed from the network-station market. It gives the network complete control over its policies. This 'bottling-up' of the best facilities has undoubtedly had a discouraging effect upon the creation and growth of new networks. Furthermore, common ownership of network and station places the network in a position where its interest as the owner of certain stations may conflict with its interest as a network organization serving affiliated stations. In dealings with advertisers, the network represents its own stations in a proprietary capacity and the affiliated stations in something akin to an agency capacity. The danger is present that the network organization will give preference to its own stations at the expense of its affiliates." (Report, p. 67.)

The Commission stated that if the question had arisen as an original matter, it might well have concluded that the public interest required severance of the business of station ownership from that of network operation. But since substantial business interests have been formed on the basis of the Commission's continued tolerance of the situation, it was found inadvisable to take such a drastic step. The Commission concluded, however, that "the licensing of two stations in the same area to a single network organization is basically unsound and contrary to the public interest", and that it was also against the "public interest" for network organizations to own stations in areas where the available facilities were so few or of such unequal coverage that competition would thereby be substantially restricted. Recognizing that these considerations called for flexibility in their application to particular situations, the Commission provided that "networks will be given full opportunity, on proper application for new facilities or renewal of existing licenses, to call to our attention any reasons why the principle should be modified or held inapplicable." (Report, p. 68.) Regulation 3.106 reads as follows: "No licensee shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing."

Regulation 3.107—Dual network operation. This regulation provides that: "No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network: *Provided*, That this regulation shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network." In its Supplemental Report of October 11, 1941, the Commission announced the indefinite suspension of this regulation. There is no occasion here to consider the validity of Regulation 3.107, since there is no immediate threat of its enforcement by the Commission.

Regulation 3.108—Control by networks of station rates. The Commission found that NBC's affiliation contracts contained a provision empowering the network to reduce the station's network rate, and thereby to reduce the compensation received by the station, if the station set a lower rate for non-network national advertising than the rate established by the contract for the network programs. Under this provision the station could not sell time to a national advertiser for less than it would cost the advertiser if he bought the time from NBC. In the words of NBC's vice-president, "This means simply that a national advertiser should pay the same price for the station whether he buys it through one source or another source. It means that we do not believe that our stations should go into competition with ourselves." (Report, p. 73.)

The Commission concluded that "it is against the public interest for a station licensee to enter into a contract with a network which has the effect of decreasing its ability to compete for national business. We believe that the public interest will best be served and listeners supplied with the best programs if stations bargain freely with national advertisers." (Report, p. 75.) Accordingly, the Commission adopted Regulation 3.108, which provides as follows: "No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs."

The appellants attack the validity of these Regulations along many fronts. They contend that the Commission went beyond the regulatory powers conferred upon it by the Communications Act of 1934; that even if the Commission were authorized by the Act to deal with the matters comprehended by the Regulations, its action is nevertheless invalid because the Commission misconceived the scope of the Act, particularly § 313 which deals with the application of the anti-trust laws to the radio industry; that the Regulations are arbitrary and capricious; that if the Communications Act of 1934 were construed to authorize the promulgation of the Regulations, it would be an unconstitutional delegation of legislative power; and that, in any event, the Regulations abridge the appellants' right of free speech in violation of the First Amendment. We are thus called upon to determine whether Congress has authorized the Commission to exercise the power asserted by the Chain Broadcasting Regulations, and if it has, whether the Constitution forbids the exercise of such authority.

Federal regulation of radio[3] begins with the Wireless Ship Act of June 24, 1910, 36 Stat. 629, which forbade any steamer carrying or licensed to carry fifty or more persons to leave any American port unless equipped with efficient apparatus for radio communication, in charge of a skilled operator. The enforcement of this legislation was entrusted to the Secretary of Commerce and Labor, who was in charge of the administration of the marine navigation laws. But it was not until 1912, when the United States ratified the first international radio treaty, 37 Stat. 1565, that the need for general regulation of radio communication became urgent. In order to fulfill our obligations under the treaty, Congress enacted the Radio Act of August 13, 1912, 37 Stat. 302. This statute forbade the operation of radio apparatus without a license from the Secretary of Commerce and Labor; it also allocated certain frequencies for the use of the Government, and imposed restrictions upon the character of wave emissions, the transmission of distress signals, and the like.

The enforcement of the Radio Act of 1912 presented no serious problems prior to the World War. Questions of interference arose only rarely because there were more than enough frequencies for all the stations then in existence. The war accelerated the development of the art, however, and in 1921 the first standard broadcast stations were established. They grew rapidly in number, and by 1923 there were several hundred such stations throughout the country. The Act of 1912 had not set aside any particular frequencies for the use of private broadcast stations; consequently, the Secretary of Commerce selected two frequencies, 750 and 833 kilocycles, and licensed all stations to operate upon one or the other of these channels. The number of stations increased so rapidly, however, and the situation became so chaotic, that the Secretary, upon the recommendation of the National Radio Conference which met in Washington in 1923 and 1924, established a policy of assigning specified frequencies to particular stations. The entire radio spectrum was divided into numerous bands, each allocated to a particular kind of service. The frequencies ranging from 550 to 1500 kilocycles (96 channels in all, since the channels were separated from each other by 10 kilocycles) were assigned to the standard broadcast stations. But the problems created by the enormously rapid development of radio were far from solved. The increase in the number of channels was not enough to take care of the constantly growing number of stations. Since there were more stations than available frequencies, the Secretary of Commerce attempted to find room for everybody by limiting the power and hours of operation of stations in order that several stations might use the same channel. The number of stations multiplied so rapidly, however, that by November, 1925, there were almost 600 stations in the country, and there were 175 applications for new stations. Every channel in the standard broadcast band was, by that time, already occupied by at least one station, and many by several. The new stations could be accommodated only by extending the standard broadcast band, at the expense of the other types of service, or by imposing still greater limitations upon time and power. The National Radio Conference which met in November, 1925, opposed both of these methods and called upon Congress to remedy the situation through legislation.

The Secretary of Commerce was powerless to deal with the situation. It had been held that he could not deny a license to an otherwise legally qualified applicant on the ground that the proposed station would interfere with existing private or Government stations. *Hoover* v. *Intercity Radio Co.*, 286 Fed. 1003. And on April 16, 1926, an Illinois district court held that the Secretary had no power to impose restrictions as to frequency, power, and hours of operation, and that a station's use of a frequency not assigned to it was not a violation of the Radio Act of 1912. *United States* v. *Zenith Radio Corp.*, 12 F. 2d 614. This was followed on July 8, 1926, by an opinion of Acting Attorney General Donovan that the Secretary of Commerce had no power, under the Radio Act of 1912, to regulate the power, frequency or hours of operation of stations. 35 Ops. Atty. Gen. 126. The next day the Secretary of Commerce issued a statement abandoning all his efforts to regulate radio and urging that the stations undertake self-regulation.

But the plea of the Secretary went unheeded. From July, 1926, to February 23, 1927, when Congress enacted the Radio Act of 1927, 44 Stat. 1162, almost 200 new stations went on the air. These new stations used any frequencies they desired, regardless of the interference thereby caused to others. Existing stations changed to other frequencies and increased their power and hours of operation at will. The result was confusion and chaos. With everybody on the air, nobody could be heard. The situation became so intolerable that the President in his message of December 7, 1926, appealed to Congress to enact a comprehensive radio law:

> "Due to the decisions of the courts, the authority of the department [of Commerce] under the law of 1912 has broken down; many more stations have been operating than can be accommodated within the limited number of wave lengths available; further stations are in course of construction; many stations have departed from the scheme of allocations set down by the department, and the whole service of this most important public function has drifted into such chaos as seems likely, if not remedied, to destroy its great value. I most urgently recommend that this legislation should be speedily enacted." (H. Doc. 483, 69th Cong., 2d Sess., p. 10.)

The plight into which radio fell prior to 1927 was attributable to certain basic facts about radio as a means of communication—its facilities are limited; they are not available to all who may wish to use them; the radio spectrum simply is not large enough to accommodate everybody. There is a fixed natural limitation upon the number of stations that can operate without interfering with one another.[4] Regulation of radio was therefore as vital to its development as traffic control was to the development of the automobile. In enacting the Radio Act of 1927, the first comprehensive scheme of control over radio communication, Congress acted upon the knowledge that if the potentialities of radio were not to be wasted, regulation was essential.

---

[3] The history of federal regulation of radio communication is summarized in Herring and Gross, Telecommunications (1936) 239-86; Administrative Procedure in Government Agencies, Monograph of the Attorney General's Committee on Administrative Procedure, Sen. Doc. No. 186, 76th Cong., 3d Sess., Part 3, dealing with the Federal Communications Commission, pp. 82-84; 1 Socolaw, Law of Radio Broadcasting (1939) 38-61; Donovan, Origin and Development of Radio Law (1930).

[4] See Morecroft, Principles of Radio Communication (3d ed. 1933) 355-402; Terman, Radio Engineering (2d ed. 1937) 593-645.

The Radio Act of 1927 created the Federal Radio Commission, composed of five members, and endowed the Commission with wide licensing and regulatory powers. We do not pause here to enumerate the scope of the Radio Act of 1927 and of the authority entrusted to the Radio Commission, for the basic provisions of that Act are incorporated in the Communications Act of 1934, 48 Stat. 1064, 47 U. S. C. § 151 *et seq.*, the legislation immediately before us. As we noted in *Federal Communications Comm'n* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 137, "In its essentials the Communications Act of 1934 [so far as its provisions relating to radio are concerned] derives from the Federal Radio Act of 1927. . . . By this Act of Congress, in order to protect the national interest involved in the new and far-reaching science of broadcasting, formulated a unified and comprehensive regulatory system for the industry. The common factors in the administration of the various statutes by which Congress had supervised the different modes of communication led to the creation, in the Act of 1934, of the Communications Commission. But the objectives of the legislation have remained substantially unaltered since 1927."

Section 1 of the Communications Act states its "purpose of regulating interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges". Section 301 particularizes this general purpose with respect to radio: "It is the purpose of this Act, among other things, to maintain the control of the United States over all the channels of interstate and foreign radio transmission; and to provide for the use of such channels, but not the ownership thereof, by persons for limited periods of time, under licenses granted by Federal authority, and no such license shall be construed to create any right, beyond the terms, conditions, and periods of the license." To that end a Commission composed of seven members was created, with broad licensing and regulatory powers.

Section 303 provides:

> "Except as otherwise provided in this Act, the Commission from time to time, as public convenience, interest, or necessity requires, shall—
>
> (a) Classify radio stations;
>
> (b) Prescribe the nature of the service to be rendered by each class of licensed stations and each station within any class;
>
> * * * * * * *
>
> (f) Make such regulations not inconsistent with law as it may deem necessary to prevent interference between stations and to carry out the provisions of this Act . . . ;
>
> (g) Study new uses for radio, provide for experimental uses of frequencies, and generally encourage the larger and more effective use of radio in the public interest;
>
> * * * * * * *
>
> (i) Have authority to make special regulations applicable to radio stations engaged in chain broadcasting;
>
> * * * * * * *
>
> (r) Make such rules and regulations and prescribe such restrictions and conditions, not inconsistent with law, as may be necessary to carry out the provisions of this Act. . . ."

The criterion governing the exercise of the Commission's licensing power is the "public interest, convenience, or necessity". §§ 307(a)(d), 309(a), 310, 312. In addition, § 307(b) directs the Commission that "In considering applications for licenses and modifications and renewals thereof, when and insofar as there is demand for the same the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient, and equitable distribution of radio service to each of the same."

The Act itself establishes that the Commission's powers are not limited to the engineering and technical aspects of regulation of radio communication. Yet we are asked to regard the Commission as a kind of traffic officer, policing the wave lengths to prevent stations from interfering with each other. But the Act does not restrict the Commission merely to supervision of the traffic. It puts upon the Commission the burden of determining the composition of that traffic. The facilities of radio are not large enough to accommodate all who wish to use them. Methods must be devised for choosing from among the many who apply. And since Congress itself could not do this, it committed the task to the Commission.

The Commission was, however, not left at large in performing this duty. The touchstone provided by Congress was the "public interest, convenience, or necessity", a criterion which "is as concrete as the complicated factors for judgment in such a field of delegated authority permit". *Federal Communications Comm'n.* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 138. "This criterion is not to be interpreted as setting up a standard so indefinite as to confer an unlimited power. Compare *N. Y. Central Securities Co.* v. *United States*, 287 U. S. 12, 24. The requirement is to be interpreted by its context, by the nature of radio transmission and reception, by the scope, character, and quality of services . . . ." *Radio Comm'n.* v. *Nelson Bros. Co.*, 289 U. S. 266, 285.

The "public interest" to be served under the Communications Act is thus the interest of the listening public in "the larger and more effective use of radio". § 303(g). The facilities of radio are limited and therefore precious; they cannot be left to wasteful use without detriment to the public interest. "An important element of public interest and convenience affecting the issue of a license is the ability of the licensee to render the best practicable service to the community reached by his broadcasts." *Federal Communications Comm'n.* v. *Sanders Radio Station*, 309 U. S. 470, 475. The Commission's licensing function cannot be discharged, therefore, merely by finding that there are no technological objections to the granting of a license. If the criterion of "public interest" were limited to such matters, how could the Commission choose between two applicants for the same facilities, each of whom is financially and technically qualified to operate a station? Since the very inception of federal regulation by radio, comparative considerations as to the services to be rendered have governed the application of the standard of "public interest, convenience, or necessity". See *Federal Communications Comm'n.* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 138 n. 2.

The avowed aim of the Communications Act of 1934 was to secure the maximum benefits of radio to all the people of the United States. To that end Congress endowed the Communications Commission with comprehensive powers to promote and realize the vast potentialities of radio. Section 303(g) provides that the Commission shall "generally encourage the larger and more effective use of radio in the public interest"; subsection (i) gives the Commission specific "authority to make special regulations applicable to radio stations engaged in chain broadcasting"; and subsection (r) empowers it to adopt "such rules and regulations and prescribe such restrictions and conditions not inconsistent with law as may be necessary to carry out the provisions of this Act".

These provisions, individually and in the aggregate, preclude the notion that the Commission is empowered to deal only with technical and engineering impediments to the "larger and more effective use of radio in the public interest". We cannot find in the Act any such restriction of the Commission's authority. Suppose. for example, that a community can. because of physical limitations, be assigned only two stations. That community might be deprived of effective service in any one of several ways. More powerful stations in nearby cities might blanket out the signals of the local stations so that they could not be heard at all. The stations might interfere with each other so that neither could be clearly heard. One station might dominate the other with the power of its signal. But the community could be deprived of good radio service in ways less crude. One man. financially and technically qualified, might apply for and obtain the licenses of both stations and present a single service over the two stations. thus wasting a frequency otherwise available to the area. The language of the Act does not withdraw such a situation from the licensing and regulatory powers of the Commission, and there is no evidence that Congress did not mean its broad language to carry the authority it expresses.

In essence, the Chain Broadcasting Regulations represent a particularization of the Commission's conception of the "public interest" sought to be safeguarded by Congress in enacting the Communications Act of 1934. The basic consideration of policy underlying the Regulations is succinctly stated in its Report: "With the number of radio channels limited by natural factors, the public interest demands that those who are entrusted with the available channels shall make the fullest and most effective use of them. If a licensee enters into a contract with a network organization which limits his ability to make the best use of the radio facility assigned him, he is not serving the public interest. . . . The net effect [of the practices disclosed by the investigation] has been that broadcasting service has been maintained at a level below that possible under a system of free competition. Having so found, we would be remiss in our statutory duty of encouraging 'the larger and more effective use of radio in the public interest' if we were to grant licenses to persons who persist in these practices." (REPORT, pp. 81, 82.)

We would be asserting our personal views regarding the effective utilization of radio were we to deny that the Commission was entitled to find that the large public aims of the Communications Act of 1934 comprehend the considerations which moved the Commission in promulgating the Chain Broadcasting Regulations. True enough, the Act does not explicitly say that the Commission shall have power to deal with network practices found inimical to the public interest. But Congress was acting in a field of regulation which was both new and dynamic. "Congress moved under the spur of a widespread fear that in the absence of governmental control the public interest might be subordinated to monopolistic domination in the broadcasting field." *Federal Communications Comm'n* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 137. In the context of the developing problems to which it was directed, the Act gave the Commission not niggardly but expansive powers. It was given a comprehensive mandate to "encourage the larger and more effective use of radio in the public interest", if need be, by making "special regulations applicable to radio stations engaged in chain broadcasting". § 303(g)(i).

Generalities unrelated to the living problems of radio communication of course cannot justify exercises of power by the Commission. Equally so, generalities empty of all concrete considerations of the actual bearing of regulations promulgated by the Commission to the subject-matter entrusted to it, cannot strike down exercises of power by the Commission. While Congress did not give the Commission unfettered discretion to regulate all phases of the radio industry, it did not frustrate the purposes for which the Communications Act of 1934 was brought into being by attempting an itemized catalogue of the specific manifestations of the general problems for the solution of which it was establishing a regulatory agency. That would have stereotyped the powers of the Commission to specific details in regulating a field of enterprise the dominant characteristic of which was the rapid pace of its unfolding. And so Congress did what experience had taught it in similar attempts at regulation, even in fields where the subject-matter of regulation was far less fluid and dynamic than radio. The essence of that experience was to define broad areas for regulation and to establish standards for judgment adequately related in their application to the problems to be solved.

For the cramping construction of the Act pressed upon us, support cannot be found in its legislative history. The principal argument is that § 303(i), empowering the Commission "to make special regulations applicable to radio stations engaged in chain broadcasting", intended to restrict the scope of the Commission's powers to the technical and engineering aspects of chain broadcasting. This provision comes from § 4(h) of the Radio Act of 1927. It was introduced into the legislation as a Senate committee amendment to the House bill (H. R. 9971, 69th Cong., 1st Sess.) This amendment originally read as follows:

> "(C) The commission, from time to time. as public convenience, interest, or necessity requires, shall—
>
> * * * * * * *
>
> (j) When stations are connected by wire for chain broadcasting, determine the power each station shall use and the wave lengths to be used during the time stations are so connected and so operated, and make all other regulations necessary in the interest of equitable radio service to the listeners in the communities or areas affected by chain broadcasting."

The report of the Senate Committee on Interstate Commerce, which submitted this amendment, stated that under the bill the Commission was given "complete authority . . . to control chain broadcasting." Sen. Rep. No. 772, 69th Cong., 1st Sess., p. 3. The bill as thus amended was passed by the Senate, and then sent to conference. The bill that emerged from the conference committee, and which became the Radio Act of 1927, phrased the amendment in the general terms now contained in § 303(i) of the 1934 Act: the Commission was authorized "to make special regulations applicable to radio stations engaged in chain broadcasting". The conference reports do not give any explanation of this particular change in phrasing. but they do state that the jurisdiction conferred upon the Commission by the conference bill was substantially identical with that conferred by the bill passed by the Senate. See Sen. Doc. No. 200, 69th Cong., 2d Sess., p. 17: H. Rep. 1886, 69th Cong., 2d Sess., p. 17. We agree with the District Court that in view of this legislative history, § 303(i) cannot be construed as no broader than the first clause of the Senate amendment, which limited the Commission's authority to the technical and engineering phases of chain broadcasting. There is no basis for assuming that the conference intended to preserve the first clause, which was of limited scope, and abandon the second clause, which was of general scope, by agreeing upon a provision which was broader and more comprehensive than those it supplanted.[5]

---

[5] In the course of the Senate debates on the conference report upon the bill that became the Radio Act of 1927. Senator Dill, who was in charge of the bill, said: "While the commission would have the power under the general terms of the bill, the bill specifically sets out as one

A totally different source of attack upon the Regulations is found in § 311 of the Act, which authorizes the Commission to withhold licenses from persons convicted of having violated the anti-trust laws. Two contentions are made —first, that this provision puts considerations relating to competition outside the Commission's concern before an applicant has been convicted of monopoly or other restraints of trade, and second, that in any event, the Commission misconceived the scope of its powers under § 311 in issuing the Regulations. Both of these contentions are unfounded. Section 311 derives from § 13 of the Radio Act of 1927, which expressly commanded, rather than merely authorized, the Commission to refuse a license to any person judicially found guilty of having violated the anti-trust laws. The change in the 1934 Act was made, in the words of Senator Dill, the manager of the legislation in the Senate, because "it seemed fair to the committee to do that". 78 Cong. Rec. 8825. The Commission was thus permitted to exercise its judgment as to whether violation of the anti-trust laws disqualified an applicant from operating a station in the "public interest". We agree with the District Court that "The necessary implication from this [amendment in 1934] was that the Commission might infer from the fact that the applicant had in the past tried to monopolize radio, or had engaged in unfair methods of competition, that the disposition so manifested would continue and that if it did it would make him an unfit licensee." 47 F. Supp. 940, 944.

That the Commission may refuse to grant a license to persons adjudged guilty in a court of law of conduct in violation of the anti-trust laws certainly does not render irrelevant consideration by the Commission of the effect of such conduct upon the "public interest, convenience, or necessity". A licensee charged with practices in contravention of this standard cannot continue to hold his license merely because his conduct is also in violation of the anti-trust laws and he has not yet been proceeded against and convicted. By clarifying in § 311 the scope of the Commission's authority in dealing with persons convicted of violating the anti-trust laws, Congress can hardly be deemed to have limited the concept of "public interest" so as to exclude all considerations relating to monopoly and unreasonable restraints upon commerce. Nothing in the provisions or history of the Act lends support to the inference that the Commission was denied the power to refuse a license to a station not operating in the "public interest", merely because its misconduct happened to be an unconvicted violation of the anti-trust laws.

Alternatively, it is urged that the Regulations constitute an *ultra vires* attempt by the Commission to enforce the anti-trust laws, and that the enforcement of the anti-trust laws is the province not of the Commission but of the Attorney General and the courts. This contention misconceives the basis of the Commission's action. The Commission's Report indicates plainly enough that the Commission was not attempting to administer the anti-trust laws:

"The prohibitions of the Sherman Act apply to broadcasting. This Commission, although not charged with the duty of enforcing that law, should administer its regulatory powers with respect to broadcasting in the light of the purposes which the Sherman Act was designed to achieve. . . . While many of the network practices raise serious questions under the antitrust laws, our jurisdiction does not depend on a showing that they do in fact constitute a violation of the antitrust laws. It is not our function to apply the antitrust laws as such. It is our duty, however, to refuse licenses or renewals to any person who engages or proposes to engage in practices which will prevent either himself or other licensees or both from making the fullest use of radio facilities. This is the standard of public interest, convenience or necessity which we must apply to all applications for licenses and renewals. . . . We do not predicate our jurisdiction to issue the regulations on the ground that the network practices violate the antitrust laws. We are issuing these regulations because we have found that the network practices prevent the maximum utilization of radio facilities in the public interest." (Report, pp. 46, 83, 83n. 3.)

We conclude, therefore, that the Communications Act of 1934 authorized the Commission to promulgate regulations designed to correct the abuses disclosed by its investigation of chain broadcasting. There remains for consideration the claim that the Commission's exercise of such authority was unlawful.

The Regulations are assailed as "arbitrary and capricious". If this contention means that the Regulations are unwise, that they are not likely to succeed in accomplishing what the Commission intended, we can say only that the appellants have selected the wrong forum for such a plea. What was said in *Board of Trade* v. *United States*, 314 U. S. 534, 548, is relevant here: "We certainly have neither technical competence nor legal authority to pronounce upon the wisdom of the course taken by the Commission." Our duty is at an end when we find that the action of the Commission was based upon findings supported by evidence, and was made pursuant to authority granted by Congress. It is not for us to say that the "public interest" will be furthered or retarded by the Chain Broadcasting Regulations. The responsibility belongs to the Congress for the grant of valid legislative authority, and to the Commission for its exercise.

It would be sheer dogmatism to say that the Commission made out no case for its allowable discretion in formulating these Regulations. Its long investigation disclosed the existences of practices which it regarded as contrary to the "public interest". The Commission knew that the wisdom of any action it took would have to be tested by experience: "We are under no illusion that the regulations we are adopting will solve all questions of public interest with respect to the network system of program distribution. . . . The problems in the network field are interdependent, and the steps now taken may perhaps operate as a partial solution of problems not directly dealt with at this time. Such problems may be examined again at some future time after the regulations here adopted have been given a fair trial." (Report, p. 88.) The problems with which the Commission attempted to deal could not be solved at once and for all time by rigid rules-of-thumb. The Commission therefore did not bind itself inflexibly to the licensing policies expressed in the Regulations. In each case that comes before it the Commission must still exercise an ultimate judgment whether the grant of a license would serve the "public interest, convenience, or necessity." If time and changing circumstances reveal that the "public interest" is not served by application of the Regulations, it must be assumed that the Commission will act in accordance with its statutory obligations.

Since there is no basis for any claim that the Commission did not fail to observe procedural safeguards required by law, we reach the contention that the Regulations should be denied enforcement on constitutional grounds. Here, as in *N. Y. Central Securities Co.* v. *United States*, 287 U. S.

---

of the special powers of the commission the right to make specific regulations for governing chain broadcasting. As to creating a monopoly of radio in this country, let me say that this bill absolutely protects the public, so far as it can protect them, by giving the commission full power to refuse a license to anyone who it believes will not serve the public interest, convenience, or necessity. It specifically provides that any corporation guilty of monopoly shall not only not receive a license but that its license may be revoked; and if after a corporation has received its license for a period of three years it is then discovered and found to be guilty of monopoly, its license will be revoked. . . . In addition to that, the bill contains a provision that no license may be transferred from one owner to another without the written consent of the commission, and the commission, of course, having the power to protect against a monopoly, must give such protection. I wish to state further that the only way by which monopolies in the radio business can secure control of radio here, even for a limited period of time, will be by the commission becoming servile to them. Power must be lodged somewhere, and I myself am unwilling to assume in advance that the commission proposed to be created will be servile to the desires and demands of great corporations of this country." 68 Cong. Rec. 2881.

12, 24-25, the claim is made that the standard of "public interest" governing the exercise of the powers delegated to the Commission by Congress is so vague and indefinite that, if it be construed as comprehensively as the words alone permit, the delegation of legislative authority is unconstitutional. But, as we held in that case, "It is a mistaken assumption that this is a mere general reference to public welfare without any standard to guide determinations. The purpose of the Act, the requirements it imposes, and the context of the provision in question show the contrary." *Ibid.* See *Radio Comm'n* v. *Nelson Bros. Co.*, 289 U. S. 266, 285; *Federal Communications Comm'n* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 137-38. Compare *Panama Refining Co.* v. *Ryan*, 293 U. S. 388, 428; *Intermountain Rate Cases*, 234 U. S. 476, 486-89; *United States* v. *Lowden*, 308 U. S. 225.

We come, finally, to an appeal to the First Amendment. The Regulations, even if valid in all other respects, must fall because they abridge, say the appellants, their right of free speech. If that be so, it would follow that every person whose application for a license to operate a station is denied by the Commission is thereby denied his constitutional right of free speech. Freedom of utterance is abridged to many who wish to use the limited facilities of radio. Unlike other modes of expression, radio inherently is not available to all. That is its unique characteristic, and that is why, unlike other modes of expression, it is subject to governmental regulation. Because it cannot be used by all, some who wish to use it must be denied. But Congress did not authorize the Commission to choose among applicants upon the basis of their political, economic, or social views, or upon any other capricious basis. If it did, or if the Commission by these Regulations proposed a choice among applicants upon some such basis, the issue before us would be wholly different. The question here is simply whether the Commission, by announcing that it will refuse licenses to persons who engage in specified network practices (a basis for choice which we hold is comprehended within the statutory criterion of "public interest"), is thereby denying such persons the constitutional right of free speech. The right of free speech does not include, however, the right to use the facilities of radio without a license. The licensing system established by Congress in the Communications Act of 1934 was a proper exercise of its power over commerce. The standard it provided for the licensing of stations was the "public interest, convenience, or necessity". Denial of a station license on that ground, if valid under the Act, is not a denial of free speech.

A procedural point calls for just a word. The District Court, by granting the Government's motion for summary judgment, disposed of the case upon the pleadings and upon the record made before the Commission. The court below correctly held that its inquiry was limited to review of the evidence before the Commission. Trial *de novo* of the matters heard by the Commission and dealt with in its Report would have been improper. See *Tagg Bros.* v. *United States*, 280 U. S. 420; *Acker* v. *United States*, 298 U. S. 426.

Affirmed.

Mr. Justice BLACK and Mr. Justice RUTLEDGE took no part in the consideration or decision of these cases.

Mr. Justice MURPHY, dissenting.

I do not question the objectives of the proposed regulations, and it is not my desire by narrow statutory interpretation to weaken the authority of government agencies to deal efficiently with matters committed to their jurisdiction by the Congress. Statutes of this kind should be construed so that the agency concerned may be able to cope effectively with problems which the Congress intended to correct, or may otherwise perform the functions given to it. But we exceed our competence when we gratuitously bestow upon an agency power which the Congress has not granted. Since that is what the Court in substance does today, I dissent.

In the present case we are dealing with a subject of extreme importance in the life of the nation. Although radio broadcasting, like the press, is generally conducted on a commercial basis, it is not an ordinary business activity, like the selling of securities or the marketing of electrical power. In the dissemination of information and opinion radio has assumed a position of commanding importance, rivalling the press and the pulpit. Owing to its physical characteristics radio, unlike the other methods of conveying information, must be regulated and rationed by the government. Otherwise there would be chaos, and radio's usefulness would be largely destroyed. But because of its vast potentialities as a medium of communication, discussion and propaganda, the character and extent of control that should be exercised over it by the government is a matter of deep and vital concern. Events in Europe show that radio may readily be a weapon of authority and misrepresentation, instead of a means of entertainment and enlightenment. It may even be an instrument of oppression. In pointing out these possibilities I do not mean to intimate in the slightest that they are imminent or probable in this country, but they do suggest that the construction of the instant statute should be approached with more than ordinary restraint and caution, to avoid an interpretation that is not clearly justified by the conditions that brought about its enactment, or that would give the Commission greater powers than the Congress intended to confer.

The Communications Act of 1934 does not in terms give the Commission power to regulate the contractual relations between the stations and the networks. *Columbia System* v. *United States*, 316 U. S. 407, 416. It is only as an incident of the power to grant or withhold licenses to individual stations under §§ 307, 308, 309 and 310 that this authority is claimed,[1] except as it may have been provided by subdivisions (g), (i) and (r) of § 303, and by §§ 311 and 313. But nowhere in these sections, taken singly or collectively, is there to be found by reasonable construction or necessary inference, authority to regulate the broadcasting industry as such, or to control the complex operations of the national networks.

In providing for regulation of the radio the Congress was under the necessity of vesting a considerable amount of discretionary authority in the Commission. The task of choosing between various claimants for the privilege of using the air waves is essentially an administrative one. Nevertheless, in specifying with some degree of particularity the kind of information to be included in an application for a license, the Congress has indicated what general conditions and considerations are to govern the granting and withholding of station licenses. Thus an applicant is required by § 308(b) to submit information bearing upon his citizenship, character, and technical, financial and other qualifications to operate the proposed station, as well as data relating to the ownership and location of the proposed station, the power and frequencies desired, operating periods, intended use, and such other information as the Commission may require. Licenses, frequencies, hours of operation and power are to be fairly distributed among the several States and communities to provide efficient service to each. § 307(b). Explicit provision is made for dealing with applicants and licensees who are found guilty, or who are under the control of persons found guilty of violating the federal anti-trust laws. §§ 311 and 313. Subject to the limitations defined in the Act, the Commission is required to grant a station license to any applicant "if public convenience, interest or necessity will be served thereby". § 307(a). Nothing is said, in any of these sections, about network contracts, affiliations, or business arrangements.

---

[1] The regulations as first proposed were not connected with denial of applications for initial or renewal station licenses but provided instead that: "No licensee of a standard broadcast station shall enter into any contractual arrangement, express or implied, with a network organization", which contained any of the disapproved provisions. After a short time, however, the regulations were cast in their present form, making station licensing depend upon conformity with the regulations.

The power to control network contracts and affiliations by means of the Commission's licensing powers cannot be derived from implication out of the standard of "public convenience, interest or necessity". We have held that: "the Act does not essay to regulate the business of the licensee. The Commission is given no supervisory control of the programs, of business management or of policy. In short, the broadcasting field is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the assigned channel." *Commission* v. *Sanders Radio Station*, 309 U. S. 470, 475. The criterion of "public convenience, interest or necessity" is not an indefinite standard, but one to be "interpreted by its context, by the nature of radio transmission and reception, by the scope, character and quality of services", . . . *Radio Comm'n* v. *Nelson Bros. Co.*, 289 U. S. 266, 285. Nothing in the context of which the standard is a part refers to network contracts. It is evident from the record that the Commission is making its determination of whether the public interest would be served by renewal of an existing license or licenses, not upon an examination of written applications presented to it, as required by §§ 308 and 309, but upon an investigation of the broadcasting industry as a whole, and general findings made in pursuance thereof which relate to the business methods of the network companies rather than the characteristics of the individual stations and the peculiar needs of the areas served by them. If it had been the intention of the Congress to invest the Commission with the responsibility, through its licensing authority, of exercising far-reaching control—as exemplified by the proposed regulations—over the business operations of chain broadcasting and radio networks as they were then or are now organized and established, it is not likely that the Congress would have left it to mere inference or implication from the test of "public convenience, interest or necessity", or that Congress would have neglected to include it among the considerations expressly made relevant to license applications by § 308(b). The subject is one of such scope and importance as to warrant explicit mention. To construe the licensing sections (§§ 307, 308, 309, 310) as granting authority to require fundamental and revolutionary changes in the business methods of the broadcasting networks—methods which have been in existence for several years and which have not been adjudged unlawful—would inflate and distort their true meaning and extend them beyond the limited purposes which they were intended to serve.

It is quite possible, of course, that maximum utilization of the radio as an instrument of culture, entertainment, and the diffusion of ideas is inhibited by existing network arrangements. Some of the conditions imposed by the broadcasting chains are possibly not conducive to a freer use of radio facilities, however essential they may be to the maintenance of sustaining programs and the operation of the chain broadcasting business as it is now conducted. But I am unable to agree that it is within the present authority of the Commission to prescribe the remedy for such conditions. It is evident that a correction of these conditions in the manner proposed by the regulations will involve drastic changes in the business of radio broadcasting which the Congress has not clearly and definitely empowered the Commission to undertake.

If this were a case in which a station license had been withheld from an individual applicant or licensee because of special relations or commitments that would seriously compromise or limit his ability to provide adequate service to the listening public, I should be less inclined to make any objection. As an incident of its authority to determine the eligibility of an individual applicant in an isolated case, the Commission might possibly consider such factors. In the present case, however, the Commission has reversed the order of things. Its real objective is to regulate the business practices of the major networks, thus bringing within the range of its regulatory power the chain broadcasting industry as a whole. By means of these regulations and the enforcement program, the Commission would not only extend its authority over business activities which represent interests and investments of a very substantial character, which have not been put under its jurisdiction by the Act, but would greatly enlarge its control over an institution that has now become a rival of the press and pulpit as a purveyor of news and entertainment and a medium of public discussion. To assume a function and responsibility of such wide reach and importance in the life of the nation, as a mere incident of its duty to pass on individual applications for permission to operate a radio station and use a specific wave length, is an assumption of authority to which I am not willing to lend my assent.

Again I do not question the need of regulation in this field, or the authority of the Congress to enact legislation that would vest in the Commission such power as it requires to deal with the problem, which it has defined and analyzed in its report with admirable lucidity. It is possible that the remedy indicated by the proposed regulations is the appropriate one, whatever its effect may be on the sustaining programs, advertising contracts, and other characteristics of chain broadcasting as it is now conducted in this country. I do not believe, however, that the Commission was justified in claiming the responsibility and authority it has assumed to exercise without a clear mandate from the Congress.

An examination of the history of this legislation convinces me that the Congress did not intend by anything in § 303, or any other provision of the Act to confer on the Commission the authority it has assumed to exercise by the issuance of these regulations. Section 303 is concerned primarily with technical matters, and the subjects of regulation authorized by most of its subdivisions are exceedingly specific—so specific in fact that it is reasonable to infer that, if Congress had intended to cover the subject of network contracts and affiliations, it would not have left it to dubious implications from general clauses, lifted out of context, in subdivisions (g), (i) and (r). I am unable to agree that in authorizing the Commission in § 303(g) to study new uses for radio, provide for experimental use of frequencies, and "generally encourage the larger and more effective use of radio in the public interest", it was the intention or the purpose of the Congress to confer on the Commission the regulatory powers now being asserted. Manifestly that subdivision dealt with experimental and development work—technical and scientific matters, and the construction of its concluding clause should be accordingly limited to those considerations. Nothing in its legislative history suggests that it had any broader purpose.

It was clearly not the intention of the Congress by the enactment of § 303(i), authorizing the Commission "to make special regulations applicable to radio stations engaged in chain broadcasting", to invest the Commission with the authority now claimed over network contracts. This section is a verbatim re-enactment of § 4(h) of the Radio Act of 1927, and had its origin in a Senate amendment to the bill which became that Act. In its original form it provided that the Commission, from time to time, as public convenience, interest, or necessity required, should:

"When stations are connected by wire for chain broadcasting, [the Commission should] determine the power each station shall use and the wave lengths to be used during the time stations are so connected and so operated, and make all other regulations necessary in the interest of equitable radio service to the listeners in the communities or areas affected by chain broadcasting."

It was evidently the purpose of this provision to remedy a situation that was described as follows by Senator Dill (who was in charge of the bill in the Senate) in questioning a witness at the hearings of the Senate Committee on Interstate Commerce:

". . . During the past few months there has grown up a system of chain broadcasting, extending over the United States a great deal of the time. I say a great deal of the time—many nights a month—and the stations that are connected are of such widely varying meter lengths that the ordinary radio set that reaches out any distance is unable to get anything but that one program, and so, in effect, that one program monopolizes the air. I realize it is somewhat of a technical engineering problem, but it has seemed to many people, at least many who have written to me, that when stations are carrying on chain programs that they might be limited to the use of wave lengths adjoining or near enough to one another that they would not cover the entire dial. I do not know whether legislation ought to restrict that or whether it had better be done by regulations of the department. I want to get your opinion as to the advisability in some way protecting people who want to hear some other program than the one being broadcasted by chain broadcast." (Report of Hearings Before Senate Committee on Interstate Commerce on S. 1 and S. 1754, 69th Cong., 1st Sess. (1926) p. 123.

In other words, when the same program was simultaneously broadcast by chain stations, the weaker independent stations were drowned out because of the high power of the chain stations. With the receiving sets then commonly in use, listeners were unable to get any program except the chain program. It was essentially an interference problem. In addition to determining power and wave length for chain stations, it would have been the duty of the Commission, under the amendment, to make other regulations necessary for "equitable radio service to the listeners in the communities or areas affected by chain broadcasting." The last clause should not be interpreted out of context and without relation to the problem at which the amendment was aimed. It is reasonably construed as simply as authorizing the Commission to remedy other technical problems of interference involved in chain broadcasting in addition to power and wave length by requiring special types of equipment, controlling locations, etc. The statement in the Senate Committee Report that this provision gave the Commission "complete authority . . . to control chain broadcasting" (R. Rep. No. 772, 69th Cong., 1st Sess., p. 3) must be taken as meaning that the provision gave complete authority with respect to the specific problem which the Senate intended to meet, a problem of technical interference.

While the form of the amendment was simplified in the Conference Committee so as to authorize the Commission "to make special regulations applicable to radio stations engaged in chain broadcasting", both Houses were assured in the report of the Conference Committee that "the jurisdiction conferred in this paragraph is substantially the same as the jurisdiction conferred upon the Commission by . . . the Senate amendment." (Sen. Doc. No. 200, 69th Cong., 2d Sess., p. 17; H. Rep. No. 1886, 69th Cong., 2d Sess., p. 17). This is further borne out by a statement of Senator Dill in discussing the conference report on the Senate floor:

"What is happening to-day is that the National Broadcasting Co., which is a part of the great Radio Trust, to say the least, if not a monopoly, is hooking up stations in every community on their various wave lengths with high powered stations and sending one program out, and they are forcing the little stations off the board so that the people cannot hear anything except the one program.

"There is no power to-day in the hands of the Department of Commerce to stop that practice. The radio commission will have the power to regulate and prevent it and give the independents a chance." (68 Cong. Rec. 3031.)

Section 303(r) is certainly no basis for inferring that the Commission is empowered to issue the challenged regulations. This subdivision is not an independent grant of power, but only an authorization to: "Make such rules and regulations and prescribe such restrictions and conditions, not inconsistent with law, as may be necessary to carry out the provisions of this Act." There is no provision in the Act for the control of network contractual arrangements by the Commission, and consequently § 303 (r) is of no consequence here.

To the extent that existing network practices may have run counter to the anti-trust laws, the Congress has expressly provided the means of dealing with the problem. The enforcement of those laws has been committed to the courts and other law enforcement agencies. In addition to the usual penalties prescribed by statute for their violation, however, the Commission has been expressly authorized by § 311 to refuse a station license to any person "finally adjudged guilty by a Federal court" of attempting unlawfully to monopolize radio communication. Anyone under the control of such a person may also be refused a license. And whenever a court has ordered the revocation of an existing license, as expressly provided in § 313, a new license may not be granted by the Commission to the guilty party or to any person under his control. In my opinion these provisions (§§ 311 and 313) clearly do not and were not intended to confer independent authority on the Commission to supervise network contracts or to enforce competition between radio networks by withholding licenses from stations, and do not justify the Commission in refusing a license to an applicant otherwise qualified, because of business arrangements that may constitute an unlawful restraint of trade, when the applicant has not been finally adjudged guilty of violating the anti-trust laws, and is not controlled by one so adjudged.

The conditions disclosed by the Commission's investigation, if they require correction, should be met, not by the invention of authority where none is available or by diverting existing powers out of their true channels and using them for purposes to which they were not addressed, but by invoking the aid of the Congress or the services of agencies that have been entrusted with the enforcement of the anti-trust laws. In other fields of regulation the Congress has made clear its intentions. It has not left to mere inference and guess-work the existence of authority to order broad changes and reforms in the national economy or the structure of business arrangements in the Public Utility Holding Company Act, 49 Stat. 803, the Securities Act of 1933, 48 Stat. 74, the Federal Power Act, 49 Stat. 838, and other measures of similar character. Indeed the Communications Act itself contains cogent internal evidence that Congress did not intend to grant power over network contractual arrangements to the Commission. In § 215(e) of Title II, dealing with common carriers by wire and radio, Congress provided:

"The Commission shall examine all contracts of common carriers subject to this Act which prevent the other party thereto from dealing with another common carrier subject to this Act, and shall report its findings to Congress, together with its recommendations as to whether additional legislation on this subject is desirable."

Congress had no difficulty here in expressing the possible desirability of regulating a type of contract roughly similiar to the ones with which we are now concerned, and in reserving to itself the ultimate decision upon the matters of policy involved. Insofar as the Congress deemed it necessary in this legislation to safeguard radio broadcasting against arrangements that are offensive to the anti-trust laws or monopolistic in nature, it made specific provision in §§ 311 and 313. If the existing network contracts are deemed objectionable because of monopolistic or other features, and no remedy is presently available under these provisions, the proper course is to seek amendatory legislation from the Congress, not to fabricate authority by ingenious reasoning based upon provisions that have no true relations to the specific problem.

Mr. Justice ROBERTS agrees with these views.

JOHN T. CAHILL (JAMES D. WISE, A. L. ASHBY, HAROLD S. GLENDENING, and JOHN W. NIELDS with him on the brief) for appellant, National Broadcasting Co., Inc.; E. WILLOUGHBY MIDDLETON (THOMAS H. MIDDLETON with him on the brief) for appellant Stromberg-Carlson Telephone Mfg. Co.; CHARLES E. HUGHES, Jr. (ALLEN S. HUBBARD, HAROLD L. SMITH, and WRIGHT TISDALE with him on the brief) for appellant, Columbia Broadcasting System, Inc.; CHARLES FAHY, Solicitor General (VICTOR BRUDNEY, RICHARD S. SALANT, CHARLES R. DENNY, General Counsel, Federation Communications Commission, HARRY M. PLOTKIN, DANIEL W. MEYER, and MAX GOLDMAN with him on the brief) for appellees, United States and Federal Communications Commission; LOUIS G. CALDWELL (LEON LAUTERSTEIN, EMANUEL DANNETT, and PERCY H. RUSSELL, JR. with him on the brief) for appellee, Mutual Broadcasting System, Inc.; ISAAC W. Music

PETRILLO EXECUTES ANOTHER "ABOUT FACE"

James Caesar Petrillo, president of the American Federation of Musicians, again shifted his ground at a meeting with the transcription companies held on May 13th. It will be recollected that Petrillo's written demands served upon the transcription companies were for the payment directly to the union of a percentage of the gross revenue derived by transcription companies from library services. Apparently, no demands were made with respect to commercial transcriptions, but Petrillo consistently refused to permit commercial transcriptions to be made until his demands with respect to library transcriptions were met.

On April 13th, Petrillo withdrew the written demands which he had served on the transcription companies and demanded instead that the transcription companies agree that they would not permit either library or commercial recordings to be used by any stations which the Federation might from time to time characterize as "unfair." Petrillo made it clear that the test of "unfairness" would be whether the broadcasting station employed a number of musicians satisfactory to the Federation.

Demand Is Rejected

The transcription companies rejected this demand and on May 14th released the following statement:

> "Representatives of a number of electrical transcription companies have been meeting with the Executive Board of the American Federation of Musicians since Feb. 11th in an effort to effect a solution of the problems concerned in the strike of musicians against the electrical transcription industry which has been continued since August 1st of last year, a period of more than 9 months.
>
> "These meetings which started some weeks ago were concluded tonight (May 13) with both sides agreeing that an impasse had been reached.
>
> "In a meeting last month a proposal was made to the union by the electrical transcription manufacturers that musicians be permitted to resume work on commercial advertising transcriptions with no further restrictions except that they be limited to one use for a single broadcast on a station.
>
> "For libraries it was proposed that they resume work on the basis of an increase in the pay of the musicians. This proposal first met with a favorable response from the Federation but they subsequently decided that the possible additional compensation was not a sufficient inducement for them to return to work.
>
> "It appears that there is no dispute between the Union and the employers on the general subjects of wages, hours and working conditions but the only basis on which the Federation is presently prepared to return to work is with the limitation in that the recordings made be withheld from broadcast by stations deemed at any time unfair by the American Federation of Musicians. This boycott demand was rejected by the transcription companies because of their station and customer relations and its doubtful legality.
>
> "The meeting was concluded with the understanding that the electrical transcription companies would be available to meet at any time the Federation had new proposals to make which did not involve the boycott principle.
>
> "The above statement was made by the following companies—Associated Music Publishers, Inc.; Empire Broadcasting Corp.; Lang-Worth Feature Programs, Inc.; MUZAK Transcriptions, Incorporated; Radio Recording Division of National Broadcasting Co.; Standard Radio; WOR Recording Studios; and, World Broadcasting System, Inc."

Petrillo's present demands therefore are that the transcription companies agree to an illegal boycott against their customers in aid of a plan to create forced employment. It is understood that the transcription companies are meeting to consider what course of action they will take in view of the new demands which to some extent change the hitherto existing situation.

FCC OVERRULED

Dividing 4 to 2, the Supreme Court May 17 held that KOA had the right, under Section 312 (b) of the Communications Act, to be made a party to the proceedings on WHDH's application for unlimited operation on KOA's frequency, and that KOA was entitled under Section 402(b) of the Act to appeal from the Commission's action in excluding it from participation in the proceeding and from the order made by the Commission. The majority opinion was written by Justice Roberts, in which Chief Justice Stone and Justices Reed and Jackson concurred. Justice Frankfurter and Justice Douglas wrote dissenting opinions. Justices Black, Murphy and Rutledge took no part in the consideration or decision of the case.

"These rules (Secs. 3.21 and 3.25 of the Commission's Rules defining a 'clear channel' and designating frequencies and power) were incorporated into the terms of KOA's license which granted it a frequency of 850 kilocycles and a power of 50 kilowatts", the court stated, "To alter the rules so as to deprive KOA of what had been assigned to it, and to grant an application which would create interference on the channel given to it, was in fact and in substance to modify KOA's license."

"This being so," the court declared, "Sec. 312(b) requires that it be made a party to the proceedings."

(The opinion of the court is printed in full on p. 240.)

"NO STALLING" FLY SAYS

At his weekly press conference, Chairman Fly of the FCC said the networks to date haven't requested any more time to act on the new regulations after June 14, date on which the regulations take effect.

Fly said he would give the networks extra time if necessary, but added: "I would imagine that would give the stations ample time (June 14). Of course we will give them whatever time is necessary, but offhand I don't see that further time is necessary. I will say this; that there will be no more dilatory tactics."

IMPORTANT NOTICE

In compliance with the recent system of zoning established by the post office, covering deliveries in metropolitan centers, all mail to NAB should hereafter be addressed as follows:

NATIONAL ASSOCIATION OF BROADCASTERS
1760 N Street, N. W.
Washington 6, D. C.

Compliance with this suggestion will assure prompt handling of mail.

EMPLOYEES VACATIONS

Joseph B. Eastman, Director of the Office of Defense Transportation, has asked the cooperation of trade associations in appealing to employers to begin and end all employees' vacations on Tuesday, Wednesday or Thursday. It is also suggested by ODT that vacations be scheduled throughout the year rather than confined to the summer months.

The transportation situation makes it imperative to start vacation schedules now and extend them through the year in such a way as to avoid travel at holiday periods. Eastman said that railroads and bus lines could not handle vacation travel this year if it is concentrated in July and August.

Adoption by employers of the recommended vacation policy is necessary, Eastman said, to even out the usual midsummer and week-end travel concentration.

"We are strongly urging persons who can take vacations this year," he said, "to spend them at home or as near home as possible. We are urging them, if they go away from home, to limit their travel on public carriers to a single round-trip to the place where the vacation is spent. And we are urging them to do any vacation traveling only on days other than Fridays, Saturdays or Sundays so as to avoid the week-end travel peaks."

RADIO EXECUTIVES CLUB OF N. Y. HOLDS PROGRAM PANEL

Sponsored by SESAC, the Radio Executives Club of New York held a panel on "Radio Programs and Radio's Future" May 19 at which Leonard Callahan, SESAC treasurer and counsel, was moderator.

Participating were: Ben Gross, New York Daily News radio editor; Jerry Franken, PM radio editor; Linnea Nelson, J. Walter Thompson, time buyer; Herb Pettey, WHN manager, and Clarence Menser, NBC program vice-president.

Principal topic was spot announcements with the newspaper boys decrying overuse of same, while the radio panel members and Miss Nelson defended use of spots as being vital to radio's revenue and, hence, continuance.

High points from each panel participant's remarks are quoted as follows:

"Radio is spineless in defending its rights to free speech as compared to daily newspapers." **(Gross)**

"We will sell that for which there is a demand." **(Pettey)**

"Ad agencies will put out the types of appeals (defending spots) which are producing results." **(Nelson)**

"Spot announcements and the wohle structure of programming depend on the thinking of the industry as governed by conditions. We've got to make money to spend it (for better programming)." **(Menser)**

"The independent stations should devote more time and money to improving local programming (instead of depending wholly on spots to carry the financial load)." **(Franken)**

Walt Dennis, NAB news chief, attended the panel for NAB.

WANTED: WOMEN TECHNICIAN PHOTOS

Request for photos and stories of women technicians employed at member stations for inclusion in a brochure, has already procured excellent material from:

WBAL, Baltimore; WEIM, Fitchburg; WMBD, Peoria; WRNL, Richmond; and WWDC, Washington.

If you are employing women technicians be sure to forward material as outlined on Page 217 of the May 14, NAB Reports. This is an industry promotion and this material from your station will help.

NEW BATTERY ORDER EXPECTED

According to information received from battery manufacturers, a revised order affecting the production of farm radio batteries is expected to be released by WPB this week, perhaps Friday.

Without any further increase in production it is believed that 1,300,000 packs will be produced during the present quarter ending June 30. It is believed that production will be materially increased during the third and fourth quarters.

FLAG WEEK—JUNE 8-14

Sale of an additional 100 million dollars worth of war bonds and stamps is this year's goal of the United States Flag Association during the Fifth Annual National Celebration of Flag Week, June 8-14.

Flag Week committees, appointed by mayors throughout the United States, will add their efforts to those of other local war bond committees, in order to reach the extra 100 million dollar goal. Heads of business, civic, religious, patriotic and other groups have been asked to serve on Flag Week committees.

On the National Council are Henry L. Stimson, secretary of war; Henry Morgenthau, Jr., secretary of the treasury; Frank Knox, secretary of the navy, and Walter D. Fuller, president, Curtis Publishing Company.

According to word from William F. Seals, Flag association director, material for press and radio is to be distributed direct.

The Association asks that our flag be displayed in homes and places of business during the week.

SCORE A SWELL IDEA FOR WLS

Staff members of WLS are in Washington implementing a plan which they believe is necessary to secure the maximum cooperation from farmers in the "Food for Freedom" campaign.

According to Glen Snyder, WLS general manager, and Harry Templeton, program manager, all the government-released material for radio failed to explain adequately why vast amounts of additional food must be produced. The farmers understood it well enough when they were called upon to feed the fighting forces. But they had not been told about the conditions affecting agriculture in all of the United Nations.

So, asked Messrs. Snyder and Templeton, who can tell that story and tell it most effectively? They believed the information would be found in the respective Washington embassies of the United Nations governments. Acting on that hunch they came to Washington, met with OWI, and discovered there were agricultural experts of most all of the United Nations who were quartered at the embassies. With the cooperation of OWI, portable recording equipment was moved in and the agricultural expert of the nation involved explained conditions in his country which made it necessary to obtain food elsewhere. Fortunately, all of these men speak excellent English.

As of the first part of this week, 17 quarter hours have been cut.

OWI plans to release the transcriptions to all stations in the surplus food production belts of the United States.

NORTHEASTERN RADIO COUNCIL HOLDS FIRST CONFERENCE

(This conference was covered for NAB by Walt Dennis, NAB news bureau chief, and the story is presented for your information.)

Leading broadcasters, educators, and civic leaders of the Tri-Cities (Albany, Troy and Schenectady, N. Y.) gathered May 14-15 in "Old Chapel", Union College, Schenectady, to hold the first regional conference of the Northeastern Radio Council, which was organized in September, 1942.

Topic of the conference was "Broadening Our Horizons Through Radio and Other Audio Materials."

The conference opened Friday evening with a radio broadcast over WGY at 7:30 p. m., which featured Colonel Carlos Romulo, author of "I Saw the Fall of the Philippines", and a panel of critics in a discussion of Romulo's book. Conference delegates made up the "studio" audience and participated in an open forum following the broadcast.

Principal speech of the evening was made by Kenneth Bartlett, Syracuse university workshop director, on "Education by Radio.'

Bartlett pointed out that "four inventions have changed man's life most—the wheel, the printing press, airplane and radio tube."

He urged expansion of use of radio in the schools including assigned "homework" of radio listening, adding that although radio has changed American society, it had scarcely made an impression in the schools. Citing figures, Bartlett said only "one school in twenty uses radio in the curriculum."

Council Awards Citations

A series of citations was awarded outstanding local radio programs and program series by the council with first award going to P. Schuyler Miller's series of newscasts for children presented over WSNY. Miller is a staff member of the Schenectady board of adult education.

The Saturday morning session was opened by Mrs. Dorothy Lewis, NAB coordinator of listener activity, who spoke on "What a Council Can Mean."

"Freedom of the air and its preservation is one vital function a radio council can perform," Mrs. Lewis said. "The recent Supreme Court decision has made a football of radio—the decision is a blow to freedom of the air. It is up to our radio councils to lead the way in restoring freedom of the air to radio by exercising unceasing vigilance to see that the government stays in line and does not usurp the powers vested in the people to whom the air belongs."

Mrs. Lewis told the delegates one of their first duties was to understand radio and then to act as "editors" of the air by making their wishes as listeners known to radio managers via mail or telephone and to exchange opinions among themselves on radio programs.

Council Is 'Liaison'

"This council and the many others now organized and being organized in America provide the mediums whereby the listeners can exercise the privileges of democracy to the highest plane. Its very civic makeup of people representing all types of organizations allows it to become a medium of transmission of ideas—a perfect liaison group between the people and radio managers," Mrs. Lewis declared.

She said that more than 2,000,000 persons were now enrolled in radio councils over the nation.

Grace Johnsen, director of women's and children's programs for the BLUE network, was the next speaker and pointed out how the network served the public in point rationing, home economics and other home front efforts by programming. Miss Johnsen also listed the many other public service and educational programs carried by the BLUE.

Asks Record Library

Max U. Bildersee, radio supervisor, New York State department of education, spoke on "Education by Recordings" and urged that a record library be established in schools to afford complete and controlled access to the fine programs now being broadcast. He also asked for establishment of "audio" workshops in teachers colleges where prospective teachers could be taught how to use radio and recordings in schools.

A message to the conference was sent by Arch Oboler, radio writer, in which he wrote:

"The devil is getting a place in hell ready for radio executives, advertising agency executives, manufacturers of products advertised over the air and radio writers for their part of the responsibility for the national indifference that led to Pearl Harbor."

Oboler wrote that "the appalling lack of qualified radio writers is responsible for the lack of adult and intelligent acquainting of the world with the vital issues of today."

He made a plea for the networks to establish a fund to train radio dramatic writers to fill this lack.

Two-Headed Monster

Writing of the Hooper and Crossley audience survey systems, Oboler declared: "Hooper-Crossley is a two-headed monster fostering the idea that unless a program has a Jack Benny rating it doesn't exist."

Speaking on the subject "Radio Plans for the Future," Leon Levine, assistant education director, CBS, said: "Radio has made it possible for the world's leaders to explain immediately and to answer the questions of the people.

"Radio is a great neutral instrument which provides a channel for all opinions and allows the people to listen and to make up their own minds. There may be confusion, yes, but out of confusion comes decision and when it is made, it is the person's own decision not the thought someone else has tried to force on him."

Levine expressed concern over the future of radio in the light of the recent network-FCC decision and told the delegates that little planning for the future can be done until the FCC reveals what it will do with the power granted it by the court.

He gave warning about overdoing postwar talk on the air without careful planning "else the boys will come marching home looking for the ice cream sodas and will forget all about postwar problems."

Levine said "the soldier is going to come home and he is going to want the world he left, but he will be changed, his country will be changed and the place from which he came will be changed. He must be educated in this change gradually and carefully."

He then gave a complete explanation of the CBS postwar planning department and said the department was fully staffed by full time people working on postwar programming and other radio problems.

Dr. Angell Speaks

The conference meetings closed with a luncheon at which Kolin Hager, WGY manager, presided and at which Dr. James R. Angell, NBC public service counsellor, was the principal speaker.

Doctor Angell stressed the complexity of radio and took a look into the future where he saw numerous and widespread results accruing from the use of television "the standard form of radio of the future."

Not overlooking short-wave, Doctor Angell said: "shortwave is giving us a contact with the peoples of the world—and it is inconceivable this contact will not have considerable effect on international relations, principally in languages, arts, education and politics. It will give us a broad tolerance of view in our dealings with our neighbors."

He said councils can familiarize themselves with the inside of radio—the "who, what and why" and pass this information on to the people. Doctor Angell concluded by praising the great work of radio in furthering the war.

Saturday afternoon was devoted to field trips to WGY, WSNY, W47A and WGY's television studios where a demonstration was given. Mrs. Carolyn Tarbell is council chairman, and was general chairman of the conference.

NEW PREFERENCE RATING IS "AA-2"

Radio broadcasting now has AA-2 rating instead of AA-2X rating assigned last February 14, under P-133.

All other terms of P-133 still apply with one possible exception. This concerns the quantity of material you are now using for maintenance, repair and operating supplies. Quantity cannot be more than that used in 1942. This is covered in paragraph (f) of CMP Reg. 5, reproduced below.

In buying materials your new AA-2 preference rating is applied by use of the following certification appearing on order and properly signed:

> "Preference rating AA-2—MRO. The undersigned certifies, subject to the criminal penalties for misrepresentation contained in section 35(A) of the United States Criminal Code, that the items covered by this order are required for essential maintenance, repair or operating supplies; that this order is rated and placed in compliance with CMP Regulation No. 5; and that the delivery requested will not result in a violation of the quantity restrictions contained in paragraph (f) of said regulation."

Use form PD-1A for material not obtainable with AA-2. No change in this procedure.

The above is an interpretation of the new regulations obtained from WPB.

Paragraph (f) covering quantity restrictions follows:

(f) *Quantity restrictions.* (1) No person *who uses* the allotment symbol of preference ratings assigned by this regulation to obtain *any* maintenance, repair or operating supplies *shall order for delivery* during any calendar quarter *maintenance, repair or operating supplies* in an aggregate amount exceeding one-fourth of his aggregate expenditures for maintenance, repair and operating supplies during the calendar year 1942 (or his fiscal year ending nearest to December 31, 1942), except that a person engaged in a seasonal business may use such allotment symbol or preference ratings *to order for delivery* during any calendar quarter, up to, but not in excess of, his aggregate expenditures for maintenance, repair and operating supplies during the corresponding quarter of 1942 (or of such fiscal year). In neither case, however, shall any person use such allotment symbol or preference ratings to obtain maintenance, repair and operating supplies during the 12 months ending March 31, 1944, in an amount exceeding his aggregate expenditures for maintenance, repair and operating supplies during the calendar year 1942 (or such fiscal year). *In determining the dollar amount of expenditures for maintenance, repair and operating supplies permitted under this paragraph (f) there shall be included not only expenditures for supplies obtained by use of the allotment symbol or preference ratings hereby assigned, but also expenditures for supplies which are obtained without the use of such symbol or rating plus amounts expended in acquiring minor capital additions under paragraph (b) (3) of this regulation. Expenditures during the base period shall be computed in the same way, except that amounts expended in acquiring minor capital additions during the base period shall not be included.*

(2) A person who has several plants or other operating units which maintain separate records of maintenance, repair and operating supplies shall treat each of them separately for purposes of complying with the provisions of subparagraph (1) of this paragraph (f).

(3) In the case of a plant or other operating unit which was not in operation during the base period specified in subparagraph (1) of this paragraph (f), the person operating the same may take, as a base, his expenditures for maintenance, repair and operating supplies during the first quarter of 1943, or during the portion thereof when the plant or unit was in operation, reasonably adjusted for seasonal or other variable factors; *Provided,* That he first notifies the War Production Board in writing of the base which he is taking, the reasons therefor, and the nature of any adjustments made. In the case of a plant starting operations after February 28, 1943, maintenance, repair and operating supplies may be acquired pursuant to this regulation in the minimum amounts necessary for operation, without other restrictions, up to $5,000 per quarter. If more than this amount is required, application *should* be made to the War Production Board for a specific quota. In any case where the base provided in subparagraph (1) or by this subparagraph (3) is deemed too low for necessary operations, application may be made for modification thereof *by filing a letter in triplicate with the War Production Board stating the relevant facts.*

(4) The restrictions contained in this paragraph (f) shall apply in addition to any quantitative restrictions contained in any order in the "P" series, unless the particular P order expressly provides that the restrictions of this regulation shall be inapplicable.

(5) The quantity restrictions in this paragraph (f) shall not apply to persons whose aggregate requirements

of maintenance, repair and operating supplies do not exceed $5,000 per year.

(6) The War Production Board may, by further regulations or orders, require specified persons or classes of persons to file applications or reports regarding their requirements of maintenance, repair and operating supplies and may prescribe specific quantitative limits for the same, either larger or smaller than the limits provided above in this paragraph (f).

NOTE: Paragraph (6) redesignated May 13, 1943.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, May 24th. They are subject to change.

Tuesday, May 25

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-partners, d/b as Red Lands Broadcasting Ass'n, Lufkin, Texas—Renewal of license, **1340 kc.**, 250 watts, unlimited.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-partners, d/b as Red Lands Broadcasting Ass'n (Assignor); Darrell E. Yates (Assignee), Lufkin, Texas—Voluntary assignment of license, **1340 kc.**, 250 watts, unlimited.

Wednesday, May 26

Further Hearing

KOBH—Black Hills Broadcast Co. of Rapid City, Rapid City, South Dakota—C. P., **610 kc.**, 5 KW, DA night, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KRNR—News-Review Company, Roseburg, Ore.—Granted modification of license to increase power from 100 watts night, 250 watts LS, to 250 watts day and night, subject to the provision that the applicant shall erect an antenna which complies with the Commission's standards when materials again become available (B5-ML-1160).

Roy C. Kelley, Grand Rapids, Mich.—Granted authority to transmit programs to station CKLW, Windsor, Ontario, Canada (B2-FP-108).

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted consent to transfer of control of Station KEVR from Walter L. Wyckoff and Fred Bianco (transferors) to A. W. Talbot (transferee), by transfer of 950 shares (or 72%) of issued and outstanding capital stock of licensee corporation. The consideration proposed to be paid is $17,515 (B5-TC-320).

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, d/b as Red Lands Broadcasting Assn., Lufkin, Texas—Adopted an order continuing the hearing now set for May 25 until June 14, 1943, in re application for renewal of license and for voluntary assignment of license. The Commission also ordered that the hearing be transferred to Lufkin, Tex. (Dockets 6491 and 6492).

WEMV—The WGAR Broadcasting Co., Cleveland, Ohio—Granted application for construction permit for changes in equipment, frequencies and in type of emission from A3 to special emission for frequency modulation of relay station WEMV (B2-PRE-425).

LICENSE RENEWALS

Granted renewal of licenses for the following stations for the period beginning June 1, 1943, and ending in no event later than June 1, 1945:

KCKN, Kansas City, Kans.; KFRE, Fresno, Calif.; KFYO, Lubbock, Tex.; KMYR, Denver, Colo.; KRJF, near Miles City, Mont.; KRMD, Shreveport, La.; KROS, Clinton, Iowa; WDMJ, Marquette, Mich.; WEBR and auxiliary, Buffalo, N. Y.; WFHR, Wisconsin Rapids, Wisc.; WJPF, near Herrin, Ill.; WLBC, South of Muncie, Ind.; WHFF, Plattsburgh, N. Y.; WRAW, Reading, Pa.; WSAJ, Grove City, Pa.; WSOY, Decatur, Ill.; KHMO, Hannibal, Mo.; WLAV, Grand Rapids, Mich.; WLNH, Laconia, N. H.

MISCELLANEOUS

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Adopted an order granting petition for leave to dismiss without prejudice application for modification of license to change frequency from **1490 kc.** to **1450 kc.** (Docket 6454)

W8XCT—The Crosley Corp., Cincinnati, Ohio—Granted modification of construction permit as modified, which authorized new experimental television broadcast station, for extension of completion date only from April 28 to October 28, 1943. (B2-MPVB-99)

APPLICATIONS FILED AT FCC

1140 Kilocycles

WFTL—Ralph A. Horton, Ft. Lauderdale, Fla.—Voluntary assignment of license and construction permit to The Fort Industry Company.

1490 Kilocycles

KXO—Valradio, Incorporated, El Centro, Calif.—Authority to determine operating power by direct measurement.

MISCELLANEOUS APPLICATIONS

WRET—Ralph A. Horton, Portable-Mobile, area Ft. Lauderdale, Fla.—Voluntary assignment of license to The Fort Industry Company.

WAAD—Ralph A. Horton, Portable-Mobile, area Ft. Lauderdale, Fla.—Voluntary assignment of license to The Fort Industry Company.

WFTL—The Fort Industry Co., Ft. Lauderdale, Fla.—Modification of license to move main studio from Ft. Lauderdale to Miami, Fla. (contingent upon the granting of B3-APL-15 above).

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an

opportunity to show cause why cease and desist orders should not be issued against them.

Bortz & Co., Trust Service Co., and Susquehanna Pen Co., is charged in a complaint with misrepresentation in connection with the sale of postcards and form letters for use by collection agencies and attorneys in obtaining information concerning delinquent debtors. (4961)

Ever-Flo Company—Misrepresentation in the sale of a so-called antifreeze solution designated "Ever-Flo," recommended for use in the cooling systems of automobile and other combustion type engines, is alleged in a complaint issued against the manufacturer of the product, The Ever-Flo Co., 1701 Rockwell Ave., Cleveland, Ohio. (4965)

Home Service Co., Deerfield, Ill., selling a so-called mothproofing preparation designated "H-S-C Immunizing Solution" and a cleaning solution called "Nu Life Foam," is charged with misrepresentation in a complaint. (4964)

Dr. F. A. Newcomb—A complaint has been issued charging Fay A. Newcomb, trading as Dr. F. A. Newcomb, 927½ Massachusetts St., Lawrence, Kans., with misrepresentation in connection with the sale of a home treatment for various diseases and ailments, particularly cataract of the eye. (4962)

Paul, Rice & Levy, Inc., 501 Poydras St., New Orleans, distributors of marine supplies, is charged in a complaint with violating section 5 of the Federal Trade Commission Act by selling quantities of obsolete signal pistol cartridges as new, thereby endangering the lives of passengers and crews and the safety of vessels equipped with such outdated cartridges. The signal flare cartridges sold by the respondent corporation are designed and intended to be used by ships in distress or under conditions of emergency at sea where it is necessary to obtain assistance from other vessels. (4963)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Ace Fastener Corp., 3415 North Ashland Ave., Chicago, engaged in the manufacture of stapling machines and staples, entered into a stipulation to discontinue representing that its machines will give perfect stapling satisfaction for ten years or for any indicated period of time; that they will never jam or clog, or that they are proof against or immune to jamming or clogging. (3647)

Electrovox Co., 169 Maplewood Ave., Maplewood, N. J., has entered into a stipulation to discontinue certain misrepresentations in connection with the sale of Walco phonograph needles made of duraluminum and equipped with a sapphire tip. (3644)

A. Freedman & Sons, Inc., shoe manufacturer of New Bedford, Mass., stipulated that in connection with the sale and distribution of its products it will cease and desist from the use of the words "a solid steel arch" or other words of similar import as a mark, stamp, brand or label for those of its shoes which are not provided with an arch or shank of the type indicated. (3645)

International Products Co., Inc., 1441 Lamar Ave., Memphis, Tenn., engaged in reprocessing feathers which it sells to manufacturers of pillows, mattresses and like products, stipulated that it will cease and desist from representing that such feathers are new when actually they are, either in whole or in part, old or second-hand or have been previously used; and from failing to disclose clearly that they are composed, in whole or in part, of second-hand materials. (3646)

Troy Chemical Co., 115 Montgomery St., Binghamton, N. Y., engaged in selling a stock remedy designated "Savoss," has entered into a stipulation to cease and desist from representing that the preparation is a cure or remedy for any disease or ailment of horses or has any therapeutic properties except to the extent that it may act as a counter-irritant and vesicant, and from using the word "guarantee" or the term "guarantee contract" in connection with certain conditions of horses to represent that Savoss is a cure or remedy for such conditions. (03108)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Charlotte Novelty Co., 2631 Pennsylvania Ave., Baltimore, has been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a lottery scheme and from placing in the hands of his agents or the public pull cards or other devices which are to be used or may be used in the sale or distribution of merchandise to the public by means of a game of chance, gift enterprise or lottery scheme. (3457)

Duo-Tint Bulb & Battery Co., Inc., 4431 North Racine Ave., Chicago, selling and distributing small glass incandescent electric light bulbs and batteries, and Carrie Riggs, Helen Corts and Dalton W. Riggs, officials of the corporation, have been ordered to cease and desist from misrepresentation in the sale of their products. (4814)

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice the case growing out of its complaint against Scott Products Co., trading as America-Chiffon Co., Chicago, which had been charged with misrepresentation in connection with the sale of hosiery.

KOA DECISION TEXT

No. 585.—October Term, 1942.

Federal Communications Commission, Petitioner,
vs.
National Broadcasting Company, Inc., (KOA), et al.

On Writ of Certiorari to the United States Court of Appeals, District of Columbia.

[May 17, 1943.]

Mr. Justice Roberts delivered the opinion of the Court.

This case presents important questions of procedure arising under Title III of the Communications Act of 1934.[1]

The respondent is licensed to operate station KOA at Denver, Colorado, on a frequency of 850 kilocycles. Station WHDH, of Boston, Massachusetts, had a license to operate, daytime only, on the same frequency. October 25, 1938, WHDH applied to the Communications Commission for an increase in power and for operation unlimited in time. The Commission set down the application and designated certain issues for hearing, of which the following are pertinent: To determine whether the interests of any other stations may be adversely affected by reason of interference, particularly KOA and other named stations; to determine whether public interest, convenience or necessity would be served by modifying the rules governing standard broadcast stations to authorize the proposed operation of WHDH.

The Commission's rules precluded the operation of a second station at night on KOA's frequency;[2] provided that an application not filed in accordance with its regulations would be deemed defective, would not be considered, and

[1] Act of June 19, 1934, c. 652, 48 Stat. 1064, 1081; 47 U. S. C. Sec. 301 ff.

[2] Secs. 3.22 and 3.25.

would be returned to the applicant;[3] and also that if an applicant desired to challenge the validity or wisdom of any rule or regulation he must submit a petition setting forth the desired change and the reasons in support thereof.[4]

The respondent petitioned to intervene. Its petition was denied. It then moved to dismiss WHDH's application for failure to conform to the rules and regulations. The motion was denied. Meantime the Commission evidently believing that, in view of the possible alteration of the rules concerning standard broadcast stations, questions of policy might be involved and that, consequently, under Sec. 409(a), the hearing would have to be conducted by a member of the Commission,[5] designated Commissioner Case to conduct the hearing.

No hearing was held under the original notice. A new notice was issued which indicated that the Commission did not then contemplate modification of its substantive rules but intended merely to afford the applicant an opportunity to urge that they be construed in the applicant's favor. Issues specified in the second notice were "to determine whether or not the Commission's Rules Governing Standard Broadcast Stations, particularly Sections 3.22 and 3.25 (Part III) properly interpreted and applied preclude the granting of the application" and to determine the nature, extent, and effect of any interference which would result from a grant of the application, particularly with Station KOA and others named. The inquiry thus limited could be heard before an examiner under Sec. 409(a) and, accordingly, the Commission withdrew the designation of Commissioner Case and assigned an examiner.

A hearing was held January 29 and 30, 1940, but the respondent was not permitted to appear or participate. December 9, 1940, the Commission promulgated proposed findings of fact and conclusions. Two commissioners dissented. All agreed that Secs. 3.22 and 3.25 of the regulations precluded a grant of WHDH's application. Three voted to modify those regulations and to grant the application. Respondent then filed its second petition to intervene, which was denied. The Commission subsequently, on its own motion, permitted respondent to file briefs and present an oral argument *amicus curiae*. April 7, 1941, the Commission adopted a final order amending Sec. 3.25 of the rules and granting the WHDH application, two commissioners dissenting.

Respondent filed a petition for rehearing pursuant to Sec. 405 of the Act.[6] This was denied. Thereupon respondent gave notice of appeal to the Court of Appeals of the District of Columbia,[7] which concluded that the Commission's action effected a modification of respondent's license and consequently the statute entitled the respondent to be made a party and to participate in the hearing. The court below therefore reversed the Commission's order and remanded the case for further proceedings.[8]

The respondent contends that it was entitled, as a matter of right, to participate in the hearing before the Commission on the question of the granting of WHDH's application and that its rights in this respect were not satisfied by permitting it to file a brief and present argument. It further insists that the Commission's proceeding was invalid due to the provisions of Sec. 409(a) of the statute, the failure to comply with the rules then in force, and the arbitrary and capricious action taken. Finally, the respondent asserts § 405 entitled it to a rehearing and § 402(b)(2) granted it an appeal.

The petitioner urges the grant of WHDH's application did not amount to a substantial modification of KOA's license or so affect KOA's rights as to require that KOA be permitted to intervene and that, in any event, KOA was not denied any substantial right of participation in the proceeding.

First. We are of the opinion that respondent was entitled to be made a party.

Section 312(b) of the Act provides:

> "Any station license hereafter granted . . . may be modified by the Commission . . . if in the judgment of the Commission such action will promote the public interest, convenience, and necessity. . . . *Provided, however*, That no such order of modification shall become final until the holder of such outstanding license . . . shall have been notified in writing of the proposed action and the grounds or reasons therefor and shall have been given reasonable opportunity to show cause why such an order of modification should not issue."

The Commission found that there would be interference with KOA's broadcast in the eastern part of the United States if WHDH's application were granted. The Commission's own reports to Congress show that at night a small proportion of the urban population and a much larger proportion of the rural population of the country enjoy only such broadcasting service as is afforded by clear channel stations. KOA, one of the stations upon which this service depends, has operated continuously at Denver since 1924 and has used a clear channel upon which only one station is permitted to operate during the night. Under the Commission's regulations (§§ 3.22 and 3.25) KOA had, therefore, little or no channel interference from any station located within the United States. In addition, its signals throughout the United States were free, and entitled to remain free, of channel interference from any station in Canada, Mexico or Cuba, pursuant to the provisions of the North American Regional Broadcasting Agreement.[9] The Commission's order deprives KOA of freedom from interference in its night service over a large area lying east of the Mississippi River. Furthermore, the order opens the way for Canada, Mexico, and Cuba, signatories to the broadcasting agreement, to acquire the right to operate stations which may cause channel interference at night on KOA's frequency within the United States.

The respondent urges that it can be shown that the service of WHDH, while interfering at night with that of KOA, would not be a service equally useful, and that the grant to WHDH adds a new primary service to an area already heavily supplied with such service. In its petitions to intervene, the respondent called attention to the terms of its existing license, asserting that the grant of WHDH's application would cause interference in areas where KOA's signal was interference free; that respondent would be aggrieved and its interests adversely affected by a grant of the application and that the operation proposed by WHDH would not be in the interest of public convenience and necessity; that a grant of the application would result in a modification of respondent's license in violation of § 312(b) and would result in a modification of the Commission's regulations without such a hearing as is required by § 303(f) of the Act. In its petition for rehearing the respondent elaborated and reiterated the reasons embodied in its motions for dismissal of the petition and its petitions to intervene.

The Commission says that the section has no application to this case. It asserts that the proceeding was an application by WHDH for modification of its station license and that, under § 309(a) of the Act, the Commission might have acted on the application without any hearing. So much may be conceded, if nothing more were involved. But the grant of WHDH's application, in the circumstances, necessarily involved the modification of KOA's outstanding license. This petitioner denies, saying KOA's license granted no more than the privilege of operating its station in a prescribed manner and that the grant of WHDH's application in nowise altered the terms of KOA's license. This contention stems from the circumstance that KOA's license authorizes it to operate a transmitter of 50 kilowatts on the frequency 850 kilocycles at Denver. The petitioner says that the grant of WHDH's application affects none of these terms. But we think this too narrow a view. When KOA's license was granted the Commission's rules §§ 3.21 and 3.25 embodied these provisions:

---

[3] Sec. 1.72.

[4] Sec. 1.71.

[5] Sec. 409(a), 47 U. S. C. § 409(a) provides that, in the administration of Tit. III, an examiner may not hold hearings with respect to a matter involving a change of policy by the Commission or a new kind of use of frequencies.

[6] 47 U. S. C. Sec. 405.

[7] Pursuant to Sec. 402(b) (2); 47 U. S. C. Sec. 402(b) (2).

[8] 132 F. 2d 545.

[9] 55 Stat., Part 2, 1005.

> "A 'clear channel' is one on which the dominant station or stations render service over wide areas and which are cleared of objectionable interference within their primary service areas and over all or a substantial portion of their secondary service areas."
>
> "The frequencies in the following tabulation are designated as clear channels and assigned for use by the classes of stations are given:
>
> (a) To each of the channels below there will be assigned one class I station and there may be assigned one or more class II stations operating limited time or daytime only: . . . The power of the class I stations on these channels shall not be less than 50 kilowatts."

850 kilocycles was one of the frequencies appearing on the schedule forming part of the rule.

These rules were incorporated into the terms of KOA's license which granted it a frequency of 850 kilocycles and a power of 50 kilowatts. To alter the rules so as to deprive KOA of what had been assigned to it, and to grant an application which would create interference on the channel given it, was in fact and in substance to modify KOA's license. This being so, § 312(b) requires that it be made a party to the proceeding. We can accord no other meaning to the language of the proviso which requires that the holder of the license which is to be modified must have notice in writing of the proposed action and the grounds therefor and must be given a reasonable opportunity to show cause why an order of modification should not issue. Certainly one who is to be notified of a hearing and to have the right to show cause is not to be considered a stranger to the proceeding but is, by the very provisions of the statute, to be made a party. The very notices issued by the Commission show that that body knew there would probably be an interference with KOA's signals if the pending application of WHDH were granted; and that the Commission also realized there was a serious question whether the application could be granted under its existing rules. It is not necessary to discuss at any length the sufficiency of the petitions to intervene if, as we have held, the Act itself provided that, in such an instance as the present, KOA was entitled to be brought in as a party. A licensee cannot show cause unless it is afforded opportunity to participate in the hearing, to offer evidence, and to exercise the other rights of a party.

Much is said to the effect that KOA was not in fact injured, because the Commission permitted it to file a brief *amicus curiae* and to present oral argument. It is beside the point to discuss the Commission's rules as to intervention and the privileges accorded by the Commission to one denied intervention since we are of opinion, as already stated, that, under the terms of the Act, the respondent was entitled to participate in the proceedings.

Second. While the Commission did not urge before the court below, and did not advance as a reason for the grant of certiorari, that respondent was not entitled to appeal to the Court of Appeals, this matter was argued here and, as it raises a question of jurisdiction, we shall consider it.

It would be anomalous if one entitled to be heard before the Commission should be denied the right of appeal from an order made without hearing. We think the Act does not preclude such an appeal. Section 402(b) (2) permits an appeal to the Court of Appeals of the District of Columbia by "any . . . person aggrieved or whose interests are adversely affected by any decision of the Commission granting or refusing" any application for modification of an existing station license. If, within the intent of the statute, the interests of KOA would be adversely affected, or if KOA would be aggrieved by granting the application of WHDH, then the statute grants KOA a right of appeal.

In *Federal Communications Commission* v. *Sanders Bros. Radio Station*, 309 U. S. 470, we dealt with a similar situation. There the question was whether a rival station, which would suffer economic injury by the grant of a license to another station, had standing to appeal under the terms of the Act. We held that it had. We pointed out that while a station license was not a property right, and while the Commission was not bound to give controlling weight to economic injury to an existing station consequent upon the issuance of a license to another station, yet economic injury gave the existing station standing to present questions of public interest and convenience by appeal from the order of the Commission. Here KOA, while not alleging economic injury, does allege that its license ought not to be modified because such action would cause electrical interference which would be detrimental to the public interest.

In view of the fact that § 312(b) grants KOA the right to become a party to the proceedings, we think it plain that it is a party aggrieved, or a party whose interests will be adversely affected by the grant of WHDH's application, as, indeed the Commission seems to have thought when it first noticed WHDH's application for hearing. We, therefore, hold KOA was entitled to appeal from the Commission's action in excluding it from participation in the proceeding and from the order made by the Commission.

The judgment is affirmed.

Mr. Justice BLACK, Mr. Justice MURPHY and Mr. Justice RUTLEDGE took no part in the consideration or decision of this case.

Mr. Justice FRANKFURTER, dissenting.

Unlike courts, which are concerned primarily with the enforcement of private rights although public interests may thereby be implicated, administrative agencies are predominantly concerned with enforcing public rights although private interests may thereby be affected. To no small degree administrative agencies for the enforcement of public rights were established by Congress because more flexible and less traditional procedures were called for than those evolved by the courts. It is therefore essential to the vitality of the administrative process that the procedural powers given to these administrative agencies not be confined within the conventional modes by which business is done in courts.

In my judgment the decision of the Court in this case imposes a hampering restriction upon the functioning of the administrative process. This is the aspect that lends this case importance and leads me to express the reasons for my dissent.

The Communications Act of 1934, 48 Stat. 1064, 47 U. S. C. § 151 *et seq.*, directs the Federal Communications Commission to "classify radio stations", "prescribe the nature of the service to be rendered by each class of licensed stations and each station within any class", and "assign bands of frequencies to the various classes of stations, and assign frequencies for each individual station and determine the power which each station shall use and the time during which it may operate". § 303(a) (b) (c). Accordingly, the Commission has established a plan for allocating the available radio facilities among the stations of the country. Under its Rules there are three classes of standard broadcast channels: "clear channels", on which dominant stations render service over extensive areas and which are cleared of objectionable interference within their primary service areas and over all or a substantial part of their secondary service areas; "regional channels", on which several stations serving smaller areas operate simultaneously with powers not in excess of 5 kilowatts; and "local channels", on which many stations serving local areas operate simultaneously with powers not in excess of 250 watts. § 3.21. Similarly, standard broadcast stations are classified into four groups: "class I stations"—dominant stations operating on clear channels and designed to render primary and secondary service over large areas and at relatively long distances; "class II stations"—operating on clear channels and designed to render service over a primary service area which is limited by and subject to such interference as may be received from class I stations; "class III stations"—operating on regional channels and designed to render service primarily to metropolitan districts and the rural areas contiguous thereto; and "class IV stations"—operating on local channels and designed to render service primarily to cities or towns and the suburban and rural areas contiguous thereto. § 3.22. Section 3.25 divides clear channels into two further groups: I-A channels, to which only one class I station is assigned, with one or more class II stations operating limited time or daytime only, and I-B channels, to which both class I and class II stations may be assigned, with more than one station operating at night.

On October 25, 1938, Station WHDH in Boston, Massachusetts, a class II station licensed to operate during the daytime only on the frequency 830 kilocycles (a class I-A channel) with power of 1 kilowatt, applied to the Commission for modification of its license so that it could operate both night and day on that frequency with increased power of 5 kilowatts. At that time Station KOA in Denver, Colorado, was the dominant class I station on the frequency 830 kilocycles, operating unlimited time with power of 50 kilowatts. Since the Commission's Rules provided for the assignment of only one station to operate at night on the frequency 830 kilocycles, the WHDH application could not be granted without amendment of § 3.25.

Section 309(a) of the Act specifies the procedure which the Commission must follow in passing upon applications for modification of licenses, such as that of WHDH: "If upon examination of any application for . . . modification of a station license the Commission shall determine that public interest, convenience, or necessity would be served by the granting thereof, it shall authorize . . . modification thereof in accordance with said finding. In the event the Commission upon examination of any such application does not reach such decision with respect thereto, it shall notify the applicant thereof, shall fix and give notice of a time and place for hearing thereon, and shall afford such applicant an opportunity to be heard under such rules and regulations as it may prescribe." The Commission, upon its examination of the WHDH application, was unable to find that a grant would serve the public interest, convenience, or necessity. The application was therefore, on September 2, 1939, designated for hearing. Three weeks later, on September 23, 1939, KOA filed a petition to intervene. Its petition, in substance, alleged only that the proposed operation of WHDH would "cause interference to station KOA in areas where KOA's signal is not interference free", that KOA "would be aggrieved and its interests adversely affected" by the proposed operation, and that a grant of the WHDH application would not be in the public interest, convenience or necessity.

The Court holds that the Commission was required as a matter of law to grant KOA's petition to intervene in the hearing upon the WHDH application. In my judgment the Act precludes such a construction. Section 4(j) provides that the Commission "may conduct its proceedings in such manner as will best conduce to the proper dispatch of business and to the ends of justice"; § 303(r) authorizes it to make "such rules and regulations and prescribe such restrictions and conditions, not inconsistent with law, as may be necessary to carry out the provisions of this Act". We have held that by force of these provisions "the subordinate questions of procedure in ascertaining the public interest, when the Commission's licensing authority is invoked—the scope of the inquiry, whether applications should be heard contemporaneously or successively, whether parties should be allowed to intervene in one another's proceedings, and similar questions—were explicitly and by implication left to the Commission's own devising, so long, of course, as it observes the basic requirements designed for the protection of private as well as public interest." *Federal Communications Comm'n* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 138.

The breadth of discretion entrusted to the Commission is limited, however, by §§ 303(f) and 312(b). The former provides that "changes in the frequencies, authorized power, or in the times of operation of any station, shall not be made without the consent of the station licensee unless, after a public hearing, the Commission shall determine that such changes will promote public convenience or interest or will serve public necessity, or the provisions of this Act will be more fully complied with". Section 312(b) authorizes the Commission to modify outstanding station licenses "if in the judgment of the Commission such action will promote the public interest, convenience, and necessity, or the provisions of this Act or of any treaty ratified by the United States will be more fully complied with: *Provided, however*, That no such order of modification shall become final until the holder of such outstanding license or permit shall have been notified in writing of the proposed action and the grounds or reasons therefor and shall have been given reasonable opportunity to show cause why such an order of modification should not issue."

The procedural scheme established by the statute is thus clear: if application is made for a station license, or for modification or renewal of a license, the Commission may grant such application without a hearing if it finds, upon examination of the application, that a grant would be in the public interest. If it is unable to reach such a determination from its study of the application, it must afford the applicant a "hearing". § 309(a). If a Commission order involves a change in the frequency, authorized power, or hours of operation of an existing station without its consent, such licensee is entitled to a "public hearing". § 303(f). If a Commission order involves "modification" of an outstanding license, presumably something other than a change in frequency, power, or hours of operation, the modification order cannot become effective until the licensee is given notice in writing and a "reasonable opportunity to show cause why such an order of modification should not issue". § 313(b). It is relevant here, also, that under § 312(a) a Commission order revoking a station license cannot take effect "until fifteen days' notice in writing thereof, stating the cause for the proposed revocation, has been given to the licensee. Such licensee may make written application to the Commission at any time within said fifteen days for a hearing upon such order, and upon the filing of such written application said order of revocation shall stand suspended until the conclusion of the hearing conducted under such rules as the Commission may prescribe. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of revocation." The Act explicitly provides for a "hearing", therefore, when the Commission proposes to deny an application for a license, or to revoke a license, or to change the frequency, power, or hours of operation of a station licensee. But when a Commission order merely involves "modification" of the license of an existing station, the latter is entitled only to notice in writing and a "reasonable opportunity to show cause" why the order should not issue.

The Commission has exercised the authority given it by Congress to formulate its administrative procedure. Section 1.102 of its Rules, relating to intervention in Commission proceedings by interested parties, provides as follows:

"Petitions for intervention must set forth the grounds of the proposed intervention, the position and interest of the petitioner in the proceeding, the facts on which the petitioner bases his claim that his intervention will be in the public interest, and must be subscribed or verified in accordance with section 1.122. The granting of a petition to intervene shall have the effect of permitting intervention before the Commission but shall not be considered as any recognition of any legal or equitable right or interest in the proceeding. The granting of such petition shall not have the effect of changing or enlarging the issues which shall be those specified in the Commission's notice of hearing unless on motion the Commission shall amend the same."

Under an earlier rule any person could intervene in a Commission proceeding if his petition disclosed "a substantial interest in the subject matter". § 105.19, Commission's Rules and Regulations (1935). The reasons for the change in the Commission's intervention rule were thus stated by the Attorney General's Committee on Administrative Procedure, Sen. Doc. No. 186, 76th Cong., 3d Sess., Pt. 3, pp. 16-17: "The effects of this complete freedom of intervention [available under the old rule] upon the Commission's activities were very marked. Not only was the record unnecessarily prolonged by the discussion of non-controversial issues, but the evidence relevant to each issue was increased manyfold by virtue of the extended cross-examination of witnesses by each intervener. More often than not the interveners presented no affirmative evidence on the issues at hand. The major functions served by them were apparently to impede the progress of the hearing, to increase the size of the record, and to obfuscate the issues by prolonged and confusing cross-examination. Nor were these dilatory and destructive tactics restricted to the hearing itself. Each intervener would customarily avail himself of his rights to take exceptions to the examiner's report, to oral argument before the Commission, and, in many cases, to appeal from the Commission's order to the District of Columbia Court of Appeals. . . . If this [new] provision is enforced intelligently and forcefully, an important step will have been taken both toward the protection of applicants and the increase of the Commission's prestige." Compare *In re Hazelwood, Inc.*, 7 F. C. C. 443.

KOA's petition for intervention was denied, presumably because the showing required by §1.102 had not been made. And on January 29 and 30, 1940, a hearing upon the WHDH application was held before an examiner of the Commission. Although KOA was denied the right to intervene, it could, under § 1.195 of the Commission's Rules, have appeared and given evidence. That rule provides that the Secretary of the Commission shall maintain "a record of all communications received by the Commission relating to the merits of any application pending before the Commission", and if the application is designated for hearing, the Secretary must notify all persons who have communicated with the Commission regarding the application "in order that such persons will have an opportunity to appear and give evidence at such hearing." Under this rule if KOA had appeared at the hearing upon the WHDH application, it would have been entitled to present evidence relating to the matters raised in its petition for intervention. But, so far as the record before us shows, it made no effort to take advantage of the right of participation afforded it by § 1.195.

On December 9, 1940, the Commission issued proposed findings and conclusions. Under these the Commission found that the proposed operation of WHDH, with use of a directional antenna, "would not cause any interference to the primary service of Station KOA, Denver, Colorado, and that such interference as the proposed operation of WHDH might reasonably be expected to cause to reception of KOA would be limited to receivers in the eastern half of the United States"; that the operation of WHDH as proposed in its application would "enable it to deliver service of primary signal quality to an area having a population of 3,093,000 or to 621,000 more people than are now included within the primary service area of the station"; that by extending WHDH's hours of operation "a new primary service to 94.9% of the Boston metropolitan area, including a population of 2,185,000", would be provided; that, in addition to the improved service to listeners in the Boston area, there would be "an improvement and extension of service which applicant station [WHDH] now endeavors to render over the fishing banks situated off the New England coast"; and that the public interest would be served by amending §3.25 of the Rules so as to make the frequency 830 kilocycles a I-B channel, upon which more than one station could operate at night, thereby permitting "more efficient use of the frequency."

On December 16, 1940, KOA again petitioned to intervene. Its petition alleged only that the proposed action, if adopted, would result in "interference to Station KOA in areas where KOA's signals are now interference free", would constitute a modification of KOA's license without affording it an opportunity to be heard, and would result in "a degradation of service on 830 kc which will be prejudicial to the priority rights in the United States on this channel, will discriminate against service to rural listeners in order to furnish additional service to the City of Boston which is already well served". KOA made no offer to contradict or add to the evidence adduced at the hearing, nor did it dispute the Commission's conclusions as to the extent of the interference which KOA would suffer from the proposed operation of WHDH. Accordingly, on January 7, 1941, the Commission denied KOA's second petition to intervene, but it permitted KOA, as well as other "clear channel" stations interested in the proceeding, to participate in the oral argument before the Commission, and to file briefs *amicus*, in order to determine whether the proposed findings should be made final.

Meanwhile, on January 23, 1941, the President proclaimed the North American Regional Broadcasting Agreement, 55 Stat. 1005. The purpose of this Agreement, which was concluded at Havana on December 13, 1937, among Canada, Cuba, Dominican Republic, Haiti, Mexico, and United States, was to "regulate and establish principles covering the use of the standard broadcast band in the North American Region so that each country may make the most effective use thereof with the minimum technical interference between broadcast stations". The signatory Governments recognized that "until technical developments reach a state permitting the elimination of radio interference of international character, a regional arrangement between them is ncessary in order to promote standardization and to minimize interference." The Agreement established priorities in the use of specified clear channels, sixty-three of which were assigned to the United States, and provided that each such channel "shall be used in a manner conforming to the best engineering practice with due regard to the service to be rendered by the dominant stations operating thereon".

In order to carry out the provisions of the Agreement, the United States was obliged to make extensive adjustments in the assignments of its existing stations. As part of the accommodations required, stations assigned to the frequency of 830 kilocycles were to be moved to 850 kilocycles. This change affected both WHDH and KOA. The license of KOA, like that of all other standard broadcast stations, would have expired on August 1, 1940, while the WHDH application was pending. The licenses of all stations, including KOA and WHDH, were successively extended by the Commission, first to October 1, 1940, and then to March 29, 1941, the effective date of the Agreement. KOA had filed an application for renewal of its license to operate on 830 kilocycles, 50 kilowatts, unlimited time. On February 4, 1941, the Commission advised all applicants for renewals, including KOA, that under the Agreement, their operating assignments were to be changed and that their applications for renewals would be regarded as applications to operate upon the new frequencies, unless the applicant wished to operate upon some other frequency, in which event its application would be designed for hearing. So far as appears, KOA did not notify the Commission that it had any objection to its renewal application being regarded as an application to operate on the frequency 850 kilocycles. Accordingly, when its license to operate on 830 kilocycles expired on March 29, 1941, its license was renewed on the frequency 850 kilocycles. In no sense, therefore, did the action of the Commission changing KOA's frequency assignment pursuant to the North American Regional Broadcasting Agreement constitute a modification of KOA's license. And, indeed, KOA makes no such contention here, for review of Commission orders modifying station licenses, upon the Commission's own motion, can be reviewed only in a suit brought in a district court under § 402(a). See *Scripps-Howard Radio, Inc.* v. *Federal Communications Comm'n*, 316 U. S. 4, 8-9, note 3.

On March 26, 1941, three days before the Agreement was to become effective, the Commission issued an order adopting the proposed findings and conclusions upon the WHDH application, granting WHDH authority to operate on 850 kilocycles, with power of 5 kilowatts, day and night, and amending § 3.25 of its Rules so as to make the frequency 850 kilocycles a I-B channel upon which more than one station could operate at night. This order was made effective April 7, 1941.

On April 25, 1941, KOA filed a petition for rehearing before the Commission, repeating in substance the allegations contained in its earlier petitions to intervene. And on May 20, 1941, the Commission, in an opinion that considered in detail each of the allegations in the petition for rehearing, denied the petition. The Commission stated that, "in view of the importance of the matters involved in this proceeding, we shall re-examine our findings and conclusions and the record upon which they are based." In summary, it found that a grant of the WHDH application "would not result in interference to the primary service of Station KOA, Denver, Colorado, and that such interference to the reception of Station KOA as might reasonably be expected to result from a grant of the Matheson [WHDH] application would occur in its secondary service area and would be limited to receivers in the eastern half of the United States, remote from the KOA transmitter; that such secondary service as KOA could render in this area would be of uncertain character because of its dependence upon the characteristics of the individual receiver, the signal intensity and the signal to interference ratio involved in each individual case"; and "that although petitioner [KOA] contends it is entitled to serve the rural areas in which it is claimed interference will occur, it fails to allege either that it has been providing a useful service in such areas or point out, in terms of population, the nature and extent of the claimed interference."

On June 7, 1941, KOA filed an appeal from the Commission's order in the Court of Appeals for the District of Columbia under § 402(b)(2) of the Communications Act of 1934. Section 402(b) provides for appeals to the Court from decisions of the Commission "in any of the following cases: (1) By any applicant for a construction permit for a radio station, or for a radio station license, or for renewal of an existing radio station license, or for modification of an existing radio station license, whose application is refused by the Commission. (2) By any other person aggrieved or whose interests are adversely affected by any decision of the Commission granting or refusing any such application."

The court below could not take jurisdiction of the suit unless KOA had a right to appeal under § 402(b)(2), in other words, unless it was "aggrieved" or its "interests were adversely affected" by the granting of the WHDH application. Since the Commission in exercising its licensing function must be governed by the public interest and not the private interest of existing licensees, an appellant under § 402(b)(2) appears only to vindicate the public interest and not his own. *Federal Communications Comm'n* v. *Sanders Radio Station*, 309 U. S. 470; *Scripps-Howard Radio, Inc.* v. *Federal Communications Comm'n*, 316 U. S. 4. That the Commission's order may impair the value of an existing station's license is in itself no ground for invalidating the order; it merely may create standing to attack the validity of the order on other grounds. Whatever doubts may have existed as to whether the ingredients of "case" or "controversy", as defined, for example, in *Muskrat* v. *United States*, 219 U. S. 346, are present in this situation were dispelled by our ruling in the *Sanders* case that the legality of a Commission order can be challenged by one "aggrieved" or "whose interests are adversely affected" thereby, even though the source of his grievance is not what is claimed to make the order unlawful. But from this it must not be concluded that anyone who claims to be "aggrieved" or who is in any way adversely affected by Commission action has a right to appeal. As the prevailing opinion in the Court of Appeals pointed out: "In the present stage of radio, very few changes, either in frequency or in power, can be made without creating some degree of electrical interference. This may range from minute and practically harmless interruption with remote and very occasional listeners in secondary service areas to total obliteration in the primary field. . . . It seems not unreasonable to read the [*Sanders*] opinion as requiring by implication that there be probable injury of a substantial character. So much by way of limitation seems necessary to prevent vindication of the public interest from turning into mass appeals by the industry at large, with resulting hopeless clogging of the administrative process by judicial review. Likewise, with electrical interference, it is hardly necessary to secure appellate championship by every broadcaster who may be affected in only a remote and insubstantial manner." 132 F. 2d 545, 548.

In order to establish its right to appeal, therefore, KOA had to make a showing that its interests were substantially impaired by a grant of the WHDH application. This, the record makes clear, it failed to do. In its notice of appeal to the court below, KOA made only a general allegation, what courts normally regard as a conclusion of law, that the Commission's action resulted in a "substantial modification" of its license. No supporting allegations of fact were tendered. There was no claim that KOA's economic position was in any way impaired, or that the proposed operation of WHDH would cause substantial interference with KOA, or that such operation would result in a substantial loss of listeners to KOA, or that any areas of substantial size would no longer be able to receive satisfactory service from KOA. Neither in its petitions for intervention, nor in its petition for rehearing before the Commission, nor in its notice of appeal to the court below, did KOA specifically challenge the correctness of the Commission's findings.

The record affords no basis, therefore, for finding that KOA had standing to appeal from the grant of the WHDH application. But even if it had, I do not believe that KOA was afforded less opportunity to participate in the proceedings before the Commission than the statute requires. Assuming that the grant of the WHDH application constituted a "modification" of KOA's license in the sense that the scope of the operations authorized by KOA's license was thereby limited, only § 312(b) would come into operation. Section 303(f) is inapplicable because the grant of the WHDH application unquestionably did not change KOA's frequency, power, or hours of operation. Both before and after the Commission's action, KOA's operating assignment was precisely the same: 850 kilocycles, 50 kilowatts, unlimited time. And so the only question on this phase of the case is—was KOA afforded such opportunity of participation in the WHDH proceeding as § 312(b) requires? That section provides that no order modifying the license of any existing station "shall become final until the holder of such outstanding license or permit shall have been notified in writing of the proposed action and the grounds or reasons therefor and shall have been given reasonable opportunity to show cause why such an order of modification should not issue.

KOA does not claim that it did not have sufficient notice, formal and otherwise, of the proceedings upon the WHDH application. Nor can there be any doubt that it had ample and "reasonable opportunity to show cause" why WHDH's application should not be granted. Under § 1.195 of the Commission's Rules it could have appeared and given evidence at the hearing upon the WHDH application. That it did not take advantage of such an opportunity is certainly no reason for saying that it had none. KOA was permitted to argue before the Commission that the proposed grant of the WHDH application should not be made final. It submitted a petition for rehearing which the Commission considered on its merits and which the Commission denied only after a detailed review of all the contentions made by KOA.

The Court holds, nevertheless, that the Commission was required to afford KOA more than all these opportunities to show cause. Section 312(b) is construed to require a hearing in which the licensee whose interests may be affected is entitled to intervene as a formal party. Such a construction appears to me to disregard the structure and language of the legislative scheme. Congress might have been explicit and provided in § 312(b) that every licensee whose interests may be affected by Commission action shall be entitled to a hearing as an intervenor in the proceeding. As has been noted, the draftsmen of the Communications Act of 1934 knew how to use apt words when they wished to afford parties before the Commission the right of "hearing." Section 309(a) requires the Commission to afford an applicant for a license a "hearing", not notice and an opportunity to show cause, before the application can be denied. Section 313(a) gives a licensee a "hearing", not notice and an opportunity to show cause, before its license can be revoked. Section 303(f) provides that the Commission cannot change the frequency, authorized power, or times of operation of a licensee unless it affords such licensee a "public hearing", not merely notice and an opportunity to show cause. But, for reasons which it deemed sufficient, Congress did not choose to make this technical requirement of a "hearing" in specifying the procedure for the protection of licensees who might be affected by Commission action. Congress may well have desired to avoid the litigious waste so abundantly established by the voluminous cases to which the claim of intervention in courts has given rise. The requirement of notice and an opportunity to show cause is not equivalent of the requirement of a "hearing." By imposing this requirement for the adequate protection of substantial interests Congress charged the Commission with the duty of devising appropriate procedure which would "best conduce to the proper dispatch of business and to the ends of justice." § 4(j). The Commission's response was §§ 1.102 and 1.195 of its Rules.

Can it seriously be claimed that the Commission acted beyond its authority in providing that before a licensee can intervene in another proceeding he must indicate some solid ground by setting forth "the facts on which the petitioner bases his claim that his intervention will be in the public interest"? Otherwise anyone who asserts generally that the grant of another's application will affect his license may become a party to a proceeding before the Commission and may, to the extent to which a party can shape and distort the direction of a proceeding, gain all the opportunities that a party has to affect a litigation although he has not made even a preliminary showing that his intervention will be in the public interest. I cannot read the requirement for "reasonable opportunity to show cause why such an order of modification should not issue" as a denial to the Commission of power to make such a reasonable rule for sifting the responsibility of potential intervenors. And if the Commission's rule for intervention was within its discretionary authority in formulating appropriate rules of procedure for the conduct of its proceedings, it is equally clear that the Commission, in the circumstances of this particular case, was justified in finding that KOA made no substantial claim that the grant of the WHDH application would impair KOA's economic interests or entail a substantial loss of listeners or make any appreciable inroads upon any areas served by KOA or otherwise substantially affect its interest or that of the public.

To deny to the Commission the right to require a preliminary showing, such as was found wanting here, before admitting a petitioner to the full rights of a party litigant is to fasten upon the Commission's administrative process the technical requirements evolved by courts for the adjudication of controversies over private interests. See *Federal Communications Comm'n* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 142-44. It is to assume that the modes familiar to courts for the protection of substantial interests are the only permissible modes, regardless of the nature of the subject matter and the tribunals charged with administration of the law. This is to read the discretion given to the Federal Communications Commission to fashion a procedure relevant to the interests for the adjustment of which the Commission was established through the distorting spectacles of what has been found appropriate for courts. We must assume that an agency which Congress has trusted is worthy of the trust. And especially when sitting in judgment upon procedure devised by the Commission for the fair protection of both public and private interests, we must view what the Commission has done with a generous and not a jealous eye.

Mr. Justice DOUGLAS dissenting.

While I am in substantial agreement with the views expressed by Mr. Justice FRANKFURTER, there are a few words I desire to add on one phase of the case.

I agree with the Court that if as we held in the *Sanders* case (309 U. S. 470) a person financially injured by the grant of a license has a standing to appeal, so does one whose station will suffer from electrical interference if the license is issued. I expressed my doubts, however, in *Scripps-Howard Radio, Inc.* v. *Federal Communications Commission*, 316 U. S. 4, 20-21, whether Congress endowed private litigants with the power to vindicate the public interest when it gave the right of appeal under § 402(b) to a person "aggrieved or whose interests are adversely affected" by a decision of the Commission. I also expressed my concern in that case with the constitutionality of a statutory scheme which allowed one who showed no invasion of a private right to call on the courts to review an order of the Commission. See *Muskrat* v. *United States*, 219 U. S. 346. But if we accept as constitutionally valid a system of judicial review invoked by a private person who has no individual substantive right to protect but who has standing only as a representative of the public interest,[1] then I think we must be exceedingly scrupulous to see to it that his interest in the matter is substantial and immediate. Otherwise we will not only permit the administrative process to be clogged by judicial review; we will most assuredly run afoul of the constitutional requirement of case or controversy. *Federal Radio Commission* v. *General Electric Co.*, 281 U. S. 464.

Any actual controversy which may now be present in this case is between KOA and the Commission. Any controversy which existed between WHDH and the Commission has come to an end. *United States* v. *Alaska S. S. Co.*, 253 U. S. 113, 116. The interest, if any, of the appellant KOA is the interest of a private person and accordingly must be measured in terms of private injury. That interest must be substantial and immediate if the standard of the statute and if the constitutional requirements of case or controversy, as interpreted by the *Sanders* and the *Scripps-Howard* cases, are to be satisfied. It is necessary to show in effect that KOA has sustained or is about to sustain some direct and substantial injury (see *Massachusetts* v. *Mellon*, 262 U. S. 447, 488)—an injury which for the purpose of this case must result from electrical interference. The *Sanders* case and the *Scripps-Howard* case do not dispense with that requirement. They merely hold that an appellant has his case decided in light of the standards of the public interest, not by the criteria which give him a standing to appeal.

I do not understand that the opinion of the Court takes a contrary view. It only holds on this phase of the case that KOA made an adequate showing under § 402(b). I disagree with that conclusion.

PAUL A. FREUND (CHARLES FAHY, Solicitor General, HARRY M. PLOTKIN, and DANIEL W. MEYER with him on the brief) for petitioner; PHILIP J. HENNESSEY, JR. (LESTER COHEN, KARL SMITH, A. L. ASHBY, and HENRY LADNER with him on the brief) for respondent.

FCC Decision

WHITE-WHEELER HEARINGS POSTPONED; BOARD MEETING CALLED; EDITORIAL COMMENT REPRINTED

Postponing the Interstate Commerce Committee hearings on the White-Wheeler bill from May 25, Senator Wheeler has advised NAB that he will set another date for the hearings on or before June 15.

Meanwhile, Neville Miller has called a meeting of the NAB board of directors for June 3-4 at the Hotel Statler in Washington to consider the Supreme Court FCC decision and other problems.

Attacking the FCC decision as a major step toward infringement of freedom of speech, David Lawrence, Washington columnist and editor of the United States News, in his column of May 25 suggested an amendment to the first article of the Bill of Rights to protect freedom of speech against misuse of the commerce clause of the Constitution.

Lawrence wrote:

"One suggestion for a constitutional change would amend the first article of the Bill of Rights, namely, the First Amendment of the Constitution, so that the following section would be added. . . .

" 'The grant, sale or lease of any facilities by the United States to the press, to radio broadcasting, to television, or to any other medium of public expression shall not vest in the Congress or in any executive agency or in the several states the power to limit, restrict or regulate the contents of any printed publication, radio program or creative work emanating from any medium of public expression except as any of these media may offend against the common law governing fraud, obscenity or libel or as they disclose military information in time of war in contravention of the laws passed by Congress. . . .'

"The decision in the case of radio broadcasting issued recently shows particularly a trend toward governmental control of that means of communication which, taken together with the prosecution of the member newspapers of the Associated Press, reveals a prejudice and a political policy against which the people cannot be protected by the judiciary's whims."

Broadcasting

Broadcasters are also referred to the editorial entitled "Paging Congress" in the May 24 issue of BROADCASTING magazine, from which we quote the following paragraphs:

"The Supreme Court has spoken twice within a fortnight on the subject of radio. It has acted in both directions. . . .

"In its momentous May 10 opinion in the network cases, the court set up the FCC as a sort of Lord High Executioner of all it surveyed, with that ephemeral, indefinable phrase 'public interest, convenience or necessity' its sharp-edged sword. . . .

"Last Monday, May 17, the highest tribunal decided in the NBC-KOA case against the FCC. . . .

"The two recent opinions make . . . more imperative than ever . . . the need for new legislation. The industry must be courageous. It should not be bludgeoned into submission by threats."

NOTICE

Additional copies of the release "What The May 10th Supreme Court Decision Means—to American Broadcasting—to the American People" and of the text of the decision itself are available at NAB Washington headquarters for those desiring them.

Other editorial comment from newspapers follows:

George Rothwell Brown in the Baltimore News-Post:

"The country now has a pretty well-rounded picture of long-entrenched bureaucracy fighting back at Congress, with its back to the wall. Currently the incident centers around the Federal Communications Commission, whose vast powers over radio, confirmed by the Supreme Court, threaten freedom of speech and of thought as guaranteed by the Bill of Rights."

Eureka, Cal., Times editorial:

"The gist of the Supreme Court's ruling yesterday on the assumption of certain powers by the Federal Communications Commission is that a Washington Bureau can do no wrong . . . using a law which was designed to prevent the intolerable confusion if two or more stations in one community should use the same broadcast band, the FCC has steadily extended its power over every detail of the radio business. Stations and networks fight its decrees at their peril, for the FCC can pronounce a sentence of death upon them by withholding licenses."

Greenfield, Ind., Reporter editorial:

"Some months ago we wrote more than once in this column, and at considerable length and detail, concerning the constant cramping of the rights of free expression, and the growing tendency among those entrusted with public powers and responsibility to handle adverse criticism by coercion and control . . . we know that some of our readers thought we were unduly exercised and 'hollering down the rain barrel' just to hear the echo, or were making ghosts and demons out of fence posts. But, this recent decision of the Supreme Court, sustaining the right of the Federal Communications Commission to revoke the license of a radio station if it is, in the opinion of the members of the commission 'for the public good,' is ample

BROADCASTING

(Continued from page 249)

proof of all the potential truth of what we have said, and more. . . .

"The thrill about it all is that a similar licensing for newspapers was openly advocated some time ago in Washington and missed enactment by only a fairly narrow margin, only because the press is both better acquainted with governmental trends than (sic) most sections of America, and is more vigilant and vocal."

Identical editorials in Moline, Ill., Dispatch and Dixon, Ill., Telegraph:

"A recent decision of the United States Supreme Court, in which a radio station's contract with the network was involved, seems to raise a question of freedom of expression and to be a threat to freedom of the press as well."

Identical editorials in Honesdale, Pa., Citizen and Ambridge, Pa., Citizen:

"The decision is held as another danger to the freedom of the press.

"Radio is in a strait jacket, and the chains and stations as they now exist are held to constitute monopolies. The theory of the radio case is very much like the case against the Associated Press. New socialistic theories are challenging freedom of all forms of communication."

Indianapolis, Ind., News editorial:

"There can be no doubt that the decision did recognize the power of Congress to regulate the broadcasting companies' method of doing business. And there is also no doubt that when the regulation of broadcasting was taken in hand by the federal government there was no mention of any regulation beyond the necessary awarding of wave lengths. Congress merely intended in the beginning of radio broadcasting that wave lengths should be allotted to prevent general confusion and to serve the best interests of the people.

"But it (FCC) has displayed both by attitude and by specific order, an inclination to use its licensing power to inflict regulations which many believe to go far beyond the authority which Congress granted. In the recent decision, the majority opinion upheld the FCC's interpretation of its authority and ruled that the remedy was with Congress.

"These extensions of authority are in the direction of infringement of the right of freedom of speech and freedom of the press as set out in the first article of the Bill of Rights. But no invasion of these rights has taken place which cannot be quickly and decisively repelled by act of Congress. The Supreme Court has recognized the power of Congress, and with this go sign, Congress should revise the FCC act to establish protective limitations."

NEBRASKA BROADCASTERS URGE RADIO'S RECOGNITION

Two resolutions of the Nebraska Broadcasters Association, meeting at Lincoln, April 19, have been received at NAB Headquarters and are presented herewith in extended recognition of their aptitude:

> **"That John Gillin, NAB representative for the State of Nebraska, request the National Association of Broadcasters to suggest to all government script writers that they include the words, 'and heard over the radio,' when they speak of things read in the newspapers; and that Nebraska stations edit their teletype services to use the words, 'press and radio', instead of 'press' alone, in referring to matter disseminated by both media."**
>
> **"That Mr. Gillin be requested to ask the National Association of Broadcasters to appoint a committee to consult with the Federal Trade Commission, and suggest that some scientific sampling procedure be adopted during the war emergency period which will lessen the burden on stations with regard to furnishing copies of advertising scripts."**

OWI

WOMEN'S AUXILIARY RECRUITING

Donald D. Stauffer, chief of the domestic radio bureau of the Office of War Information, recently sent to all regional and branch offices a memorandum designed to clarify the policy on women's auxiliary recruiting for the Army and Navy, such as the WAVES, WAACS, SPARS, etc.

The memorandum pointed out that recruitment of women auxiliaries to the armed services may be handled on radio "at the discretion of the Regional OWI Director." It pointed out that if the quotas in any particular area are falling short, public relations officers of the Army and Navy will contact the OWI field men for help. The final decision as to whether or not these recruitment drives should be given radio coverage in any particular area rests with the OWI Regional Officers.

It is further pointed out that whenever WAVE, WAAC or SPAR recruitment material is carried in the network allocation plan or included in the national packet of spot announcements it is not necessary to give additional radio cooperation. Information as to whether or not such material is included in the allocation plan or the national packet is furnished the OWI regional office sufficiently in advance to keep the office fully advised.

Recruitment Must Clear WMC

A further point made in the memorandum has to do with the recruitment for women's auxiliary services in critical labor shortage areas. It is made quite clear that without clearance of the regional information officer of the War Manpower Commission, no recruitment activity is permitted.

The attention of NAB recently has been called to instances in which WAVES, WAACS or SPARS in uniform have accompanied solicitors of advertising media, other than radio, to importune prospective advertisers to buy space in aid of recruitment drives for both the Army and Navy recruiting offices. We are advised that such activity on the part of women in uniform is strictly prohibited by service rules and regulations.

Radio station operators who have knowledge that such practices are being followed in any community should give full information, including the names of the persons in service, the advertising solicitor, the name of the advertising medium and the names of any persons solicited. With this information available, proper steps may be taken both to discipline infractions and to prevent recurrence.

OWI TIGHTENS RULE

Elaine Ewing, assistant chief of station relations, Office of War Information, recently communicated to all regional and branch offices a memorandum dealing with OWI regulation No. 2. In this regulation, originally issued on September 9, 1942, Elmer Davis set forth procedure to be followed in clearance of radio material by the several government agencies through the domestic radio bureau, OWI.

At the time of issuance of the original regulation, the regional offices in every case were not ready to service all the radio stations and government agencies throughout the country. Special exceptions and interpretations therefore were made.

The memorandum just issued directs the OWI regional information officer, where he deems it advisable, to require that all radio material prepared by any government agency be cleared through the proper regional office. Regional information officers are further instructed to re-examine programs that have been running on local stations prior to or since the issuance of regulation No. 2, to determine if those programs are fulfilling the purposes for which they were established.

If in the judgment of the OWI regional officers, a change or discontinuance of the program is required, the regional office is instructed to notify the proper government agency. This memorandum will undoubtedly serve to clarify some cases and misunderstandings.

CONCERNING FLAG DAY

Two releases have been mailed all stations by OWI in the interest of Flag Day, June 14.

Regarding the observance of Flag Day, OWI says:

"It is important at this time that the American people be fully informed concerning the facts about the United Nations and the observance of Flag Day provides an excellent opportunity to bring this material to the attention of the people."

Public Service

WHAS GIFT TO THE UNIVERSITY OF KENTUCKY SETS UP MOUNTAIN RADIO LISTENING CENTERS

The University of Kentucky executive committee of the board of trustees has acknowledged "with gratitude" a financial gift to the university from WHAS which makes it possible for the university to double the number of mountain radio listening centers, a total of 80 to be realized when the work is completed.

Impact of the war with attendant gasoline rationing and curtailment of travel in the Kentucky mountain regions has placed more responsibility on radio for contact with the outside world, increasing the importance of these "listening centers." This situation is further embellished by the current lack of radio batteries, but "listening center" radios get preference for batteries because they serve many families instead of one.

The present WHAS gift supplements a previous contribution of 40 sets made two years ago. Listening centers are now located in Breathitt, Morgan, Magoffin, Floyd, Leslie, Letcher, Knott, Estill, Clay and Martin counties with the new grants to provide additional centers in Leslie and Knott counties. Every resident of these two counties, except in areas contiguous to towns and state roads, will thus be provided a listening center within a three-mile reach.

RADIO GREATEST DONOR TO SECOND WAR LOAN CAMPAIGN

Radio time and talent contributed to the Second War Loan Campaign, April 12 to May 1, reached the grand total of $7,095,500.00, revised figures indicate. This total establishes radio as top donor by more than two million dollars and exceeds the contributions of all other media combined. Radio's preliminary figure of $6,262,350.00, announced Saturday, May 22, also enjoyed the latter distinction.

Both figures embrace the 118,000 radio announcements and 8,000 programs of fifteen minutes or more credited to radio by Henry Morgenthau, Jr., Secretary of the Treasury, in his release of May 22.

Radio's final figure of $7,095,500.00 is a joint computation of the Office of War Information and the NAB. The OWI computation, released to NAB, totals $6,170,000.00 and is based solely on definite OWI commitments under the Network Allocation Plan, the National Spot Allocation Plan and the Station Announcement Plan. It is significant that even this figure for radio exceeds the contributions of all other media combined. OWI, however, called attention to the fact that this computation did not include the value of local station time and talent, both commercial and sustaining, which was devoted to the Second War Loan Campaign.

It will be remembered that a great number of stations devoted their entire broadcast day to the Second War Loan Campaign, April 12. As estimated at NAB headquarters, the value of this time was approximately $925,500.00, or a conservative 15 per cent above and beyond definite OWI commitments. This figure is thought to be exceptionally low but must stand as an estimate in the absence of what would be a burdensome and next to impossible survey of all stations, particularly objectionable in wartime.

TREASURY STREAMLINES WAR BOND ORGANIZATION

The Treasury Department's organization of volunteer war bond salesmen is being streamlined and amplified, Secretary Morgenthau announced Thursday. The Secretary said the War Savings Staffs and Victory Fund Committees of the Treasury Department would be merged into a single organization to take charge of War Loan drives and the continuing campaign to sell War Bonds.

This consolidation is the result, he explained, of the amazing success of the second war loan drive which raised eighteen and one-half billion dollars for the war effort in three weeks.

The new and merged organization will be directed by state chairmen who will report to Secretary Morgenthau.

CBS REPORTS ON ITS POSTWAR RESEARCH AND PROGRAMMING

After a year and a half of research on problems of the post-war world, CBS is ready to translate these findings into terms of actual radio production, according to Douglas Coulter, CBS Director of Broadcasts.

Robert Lewis Shayon, CBS producer-director, has been selected to produce these programs, designed to give the average American a clearer understanding of the kind of world in which he can expect to live after the war. Shayon will work in close conjunction with Lyman Bryson, CBS Director of Education and head of the "Post-War Division."

Columbia's "Post-War Division" was established December 1, 1941, six days before Pearl Harbor.

"We realized then that whether or not the United States was drawn into war, we would inevitably have to take part in the tremendous rehabilitation program which would follow World War II," Bryson stated.

"The vital role which radio will play in world-wide reconstruction was apparent, since for the first time in the history of wars and peace treaties, such a means of mass communication has been available."

The research staff of CBS' post-war division has made digests from hundreds of important books, pamphlets and articles which represent the opinions of a wide cross-section of writers.

They also have prepared five elaborate charts of post-war issues which have been placed at the disposal of public officials, experts on foreign affairs and others active in post-war planning.

Research of CBS' post-war division includes study of the work being done by more than 300 organizations already in the field, representing every shade of political and economic thought.

It is Shayon's intention to translate this vast amount of research material into programs that listeners will understand and enjoy.

Presentation of this material will not be limited to the discussion or lecture form. To reach the widest possible audience, Shayon plans to make use of the full scope of radio. Daytime serials, an outstanding evening show combining dramatic and documentary techniques, interviews—any of these media may be used. More than fifteen program ideas submitted in weekly conferences of CBS producers and executives are under consideration. Final selection will be made on the basis of educational value combined with entertaining and effective radio.

The importance of such programs was stated by Coulter when he declared:

"The people of the United States by the exercise of their right to vote will be called upon to decide many issues of the post-war world. Radio can perform a valuable public service by thoughtful presentation of the problems the people must solve in the future."

INTER-AMERICAN RELATIONS

It is universally agreed that the broadcasting industry has done a magnificent job in the war effort. Not only have the stations carried thousands of announcements and programs, but they have voluntarily censored broadcasts in accordance with the Code of Wartime Practice issued by the Office of Censorship.

Inevitably, however, some things occur which are harmful to the successful prosecution of the war and to the maintenance of cordial relations with our allies. Those stations whose signals may be heard in neighboring countries, such as Central and South America and Canada, are charged with an even greater responsibility than those whose signals are not so heard. The delicacy of relations with South American countries and our Canadian neighbors is well known.

Sensitiveness, and in some cases over-sensitiveness, is an equation which must always be taken into account. Stations broadcasting programs in English or a foreign language which reach these countries are charged with an exceptional responsibility, and management must discharge that responsibility faithfully and make sure that nothing is broadcast that might in the least upset or impair maintenance of friendly relations.

An illustration of what can unwittingly occur was called to our attention recently by Mexican authorities.

In an ad lib sports interview over a southwestern station with a prize fighter, the program m.c. asked a question to which the fighter remarked ad lib that he saw three Mexicans in the studio audience and "I would like to kill them all. I remember the Alamo."

Statements such as these are highly offensive to the Mexicans and should at all costs be avoided.

FIRST RADIO RESCUE OF TORPEDOED SEAMEN REPORTED

An Associated Press story has reported the first rescue of torpedoed seamen credited to radio.

The skipper and radio operator of an American ship sunk off South America said 84 crewmen were rescued due to the new-type radio equipment installed in their life-boats.

Adrift in two life-boats for two days, the men kept communication with each other and contacted four potential rescue vessels before they were picked up.

The radio equipment consists of a combination radio-telegraph-telephone unit powered by a hand-cranked generator.

Broadcast Advertising

GET ON THE COAL 'WAGON'

In connection with the OWI national "Order Coal Now" Campaign, the radio section of the Solid Fuels Administration For War division of the Department of the Interior has prepared transcriptions for use by Retail Coal Dealers over their local radio stations on the commercially sponsored basis.

The NAB broadcast advertising department urges station commercial managers to get on the coal "wagon" and to contact their local coal dealers to see if they have received the transcriptions. Some 300 localities have been covered to date in shipments of the records.

Below is reprinted the letter from H. A. Gray, Deputy Solid Fuels Administrator, to coal dealers, which explains the program. Further information may be obtained by writing Lew Avery of the NAB department of broadcast advertising or to Mr. Gray's office direct:

UNITED STATES
DEPARTMENT OF THE INTERIOR

Solid Fuels Administration for War
Washington

MESSAGE TO RETAIL COAL DEALERS:

The Solid Fuels Administration for War has prepared two double-faced radio records which are available for use by Retail Coal Dealers in connection with the ORDER COAL NOW campaign.

These recordings contain a series of 20 or more brief spot announcements, three 4-minute dramatized announcements and a 15-minute musical show.

Retail dealers and others interested in the ORDER COAL NOW campaign may obtain the recordings without charge by writing to Howard A. Gray, Deputy Director, Office of Solid Fuels Administration for War, Department of the Interior, Washington, D. C.

These records were prepared with the idea of affording retail coal dealers an opportunity to use them in any local ORDER COAL NOW advertising campaigns. The messages do a direct selling job with the dealer's role in the war effort emphasized. Each message is cut so that dealers' or association names, addresses and telephone numbers can be inserted to conform with regular radio advertising practices.

A limited number of records will be available for distribution on May 17. In order to conserve time, money and effort, persons desiring to secure the records are urged to order promptly.

It should be understood that these records are separate and distinct from transcriptions prepared by the Office of War Information which have been distributed to 850 radio stations for use during the campaign.

The Office of War Information radio material is being used by radio stations without charge as a patriotic contribution to the ORDER COAL NOW campaign.

In view of the contribution of free time which the radio industry is making toward the ORDER COAL NOW campaign, we have a distinct understanding with OWI that free time will not be requested for the records offered to the industry by this circular. OWI is advising the radio industry of this understanding.

Assurances from radio chains and independent stations of cooperation on the use of the free OWI material is most encouraging. It is difficult to measure in dollars and cents the value of the time, talent and over-all cooperation we have secured from the radio industry in this campaign. However, we cannot expect radio stations and OWI to keep the campaign on the air continuously this summer, and with this in view, we believe the recordings described here will take up when the OWI schedule pauses in mid-June and their use will permit retailers to tie in with the national campaign most effectively.

Retailers who plan to sponsor radio advertising are urged to notify us immediately so that these records can be furnished them. Dealers who desire these recordings to use in connection with their advertising activities are advised to write us immediately.

Sincerely yours,

H. A. Gray,
Deputy Solid Fuels Administrator for War.

SPECIAL SECTION FOR WROK

Front page, in two colors, and four following pages of the second section of the Rockford Register-Republic, of May 17, publicized affiliation of WROK, Rockford, with the Blue Network.

Illinois' Governor Dwight H. Green participated in the dedicatory broadcast. The section carried the welcome of the Blue Network to the Rockford area by Ruth Hanna Simms, WROK owner.

FCC INVESTIGATES DODD

The FCC has ordered an investigation of alleged misleading and conflicting reports said to have been made by W. E. Dodd of the FCC foreign broadcast intelligence division, as suggested by Representative Anderson on the floor of the House recently, Chairman James Lawrence Fly said at a press conference early this week.

The Commission has taken no action, he stated, in connection with Goodwin Watson of the same division, and none is planned, he said. The Chairman said that Dodd has been given substantial time to respond to the charges made by the Congressman. Dodd also asked for a hearing and it is understood this will be granted.

Representative Anderson said in his speech on the floor of the House that there was a conflict between the reports made by Dodd to the Commission and those made to the FBI, and the FCC in turn made the same report to the House Committee on Appropriations. Representative Anderson charged that these reports which were originated by Dodd were in conflict with his testimony. Chairman Fly said that the investigation by the Commission involves largely a study of the documents and their comparison. Fly made it plain at the conference that the FCC investigation of Dodd does not involve the question of whether or not Dodd belonged to any association, or made any special speech, or what his political ideas might be.

Chairman Fly said neither Dodd nor Watson have resigned their positions with the Commission. He was questioned as to his attitude toward Congress cutting anyone off government payrolls. He said that he thought there is a serious doubt of the validity of any such provision. He also said he believed it would be helpful to everyone if some way were found to get authoritative tests on the adjudication of that issue.

GEORGIA ASSOCIATION OF BROADCASTERS HOLDS MEETING

The Georgia Association of Broadcasters met in Macon, Georgia, May 22 with Frank Crowther (Red Cross) presiding and Lew Avery, NAB director of broadcast advertising, representing NAB and acting as secretary.

A panel discussion on advertising problems, concerning the small stations problems, was addressed by James W. Woodruff, jr., of WRLB, and also director of NAB 5th district and member of NAB small stations problems steering committee. Avery spoke on advertising developments since the NAB War Conference.

Wilton E. Cobb moved that the Georgia association telegraph all Georgia members of Congress pointing out the discrimination against radio by the government in the preparation of mats and other services by the government for newspaper advertising while radio advertising receives no such help.

Oppose Paid Government Ads

Sentiment of the association was overwhelmingly opposed to use of paid radio advertising by the government.

Willett Kempton, OWI regional director at Atlanta, described OWI functions. Hervey Allen, noted author and WMC regional director at Atlanta, spoke and emphasized seriousness of the manpower shortage and urged broadcasters present to prepare "manning tables" or "replacement schedules" for all their personnel within draft age limits (see Selective Service Handbook supplement issued with this week's NAB "Reports").

Ray Ringson moved for appointment of a committee on training programs and replacement schedules to work with the Atlanta office of WMC.

A discussion ensued concerning the effectiveness of women as announcers and enthusiasm was expressed for a plan to train wives of drafted announcers to replace them.

Army air base officials present at the luncheon were thanked publicly for their cooperation in assisting various Georgia stations to present programs from Army air corps centers.

Eugene Carr, Office of Censorship, addressed the meeting following the luncheon on the importance of closer adherence to the voluntary censorship Code of Wartime Practice.

Kempton and Allen also spoke again on their respective topics of OWI and manpower.

Avery Talks on FCC Decision

Avery took over at the beginning of the afternoon session and presented Neville Miller's greetings on behalf of NAB. Avery spoke on the FCC Supreme Court decision, read the statement issued by the NAB legislative committee issued in Washington May 19, and urged broadcasters present to consult their attorneys on the implications and potentialities of the decision.

He reported on the battery situation and the distribution of radio tubes.

John M. Outler, jr., of WSB, talked on the NAB sales managers committee, and its work from its formation down to the inauguration of the Retail Promotion Committee Plan in 1942.

Outler and Avery outlined the plan's purpose and asked support of those Georgia stations not yet signed up.

The Georgia association then elected officers and directors for 1943-44 as follows:

Jack Williams, WAYX, president; John Tobola, WAYX, secretary-treasurer, and Ray Ringson, WRDW, vice-president; and directors: Hoyt Wimpy, WPAX; Frank Crowther, WMAZ, and John M. Outler, Jr., WSB.

A rising vote of appreciation for Crowther was then given after which Williams assumed the chair and appointed Crowther program director for future meetings and adjourned the session.

Sixty-three members and guests attended the meeting.

Engineering

NEED TECHNICIANS?

The NAB engineering department has now been recruiting technicians, not presently employed in the broadcast industry, for several months. Several methods of recruiting both men and women for replacement technical positions are now being used. Currently, we are receiving more applications for positions than requests for assistance from broadcast stations.

It is important that these applicants be placed as soon as possible after registering with NAB or they will find employment elsewhere and be lost to the broadcast industry. In order to expedite the placing of these candidiates, a few applicants are being selected from the NAB files to be placed on regional availability lists. These lists will be mailed with the current issue of the *Swap Bulletin* addressed to chief engineers.

Stations in need of replacement technicians should first make every effort to fill vacancies locally. If it is found impossible to obtain the required replacements, stations are invited to write to the NAB Engineering Department for the names of several available persons. NAB has no knowledge of the applicants other than the statements contained in the registration letter and is therefore not in a position to make employment recommendations. The usual employment references should be obtained by direct correspondence with the applicants.

TUBES REPAIRED WITHOUT PREFERENCE RATING

The radio and radar division of WPB has just released the following interpretation of preference rating order P-133 and general limitation order L-265, insofar as the orders apply to the repairing of vacuum tubes:

"From time to time the question has arisen as to the restrictions of preference rating order P-133 with regard to the repair of vacuum tubes. The limitations and restrictions of P-133 apply only to the extension of ratings under that order.

"Order P-133 prohibits an operator from applying a rating to obtain a new tube as long as he has one spare

RMA TRANSMITTING TUBE CONSERVATION RECOMMENDATIONS

Percentages of rated normal filament voltages to be used under various operating and stand-by conditions to give maximum filament life.

Tube Type by Kind of Filament or Cathode	Operating Conditions		Recommended Stand-by Conditions (% of Normal Operating Voltage)				Typical Tube Types
	Normal Load Operation	Light Load; May Increase Life	Under 15 Minutes	15 Min. to 2 Hours	2 to 12 Hours	Over 12 Hours	
1. Pure Tungsten filament............ (small and medium types)	100*	Reduce	80	80	off	off	207, 891R
2. Pure Tungsten filament............ (large types)	100*	Reduce	80	80	80	off	895, 899A, 898
3. Thoriated Tungsten filament........ (small and medium types)	100	95–100	80	off	off	off	211, 803, 851
4. Thoriated-Tungsten filament........ (large types)	100	95–100	80	80	off	off	827R, 861
5. Oxide-coated filament.............. (small and medium-gas, vapor)	100	100	100	100	off	off	866A, 872A
6. Oxide-coated filaments or cathodes... (large-gas, vapor)	100	100	100	100	100	off	857B, 870A
7. Oxide-coated cathodes.............. (high vacuum)	100	95–100	100	off	off	off	807, 837
8. Oxide-coated filaments.............. (high vacuum, quick heating)	100	95–100	80	off	off	off	1616, 1619, 1624

* Normal load operation may be less than 100% as recommended in instructions.

NOTE: Recently the NAB Engineering Department asked vacuum tube manufacturers to submit recommendations covering the stand-by operating conditions that would assure the maximum life from transmitting tubes. It was found that differences of opinion existed among the manufacturers and that the problem was further complicated by the variety of tube types to be considered. The manufacturers coordinating through the RMA Transmitting Tube Committee have now released the above standard recommendations.

tube for each active tube socket. *However,* there is no limitation on the number of tubes which may be repaired, or the number of repaired tubes which may be held as spares. It is permissible to repair any tube without the extension of a preference rating. It is also to be noted that if a burned-out tube is to be repaired, it is not necessary, under P-133, to return the old tube to the manufacturer in order to obtain a new tube.

"General limitation order L-265 specifically exempts from its provisions the transfer of electronic equipment for repair, as well as exempting any operations involved in the repair of a specific piece of electronic equipment. Thus, any number of tubes can be repaired without the extension of a preference rating. However, a preference rating under P-133 cannot be extended for the purchase of a new tube unless an operator has in his inventory less than one spare tube per socket."

80,000 TRAINED IN RADIO

"Fundamentals of radio", promoted and prepared by the NAB War Committee, is the most popular course with trainees enrolled in all Engineering, Science, and Management war training courses.

A total of 80,000 men and women have been trained for radio work in the ESMWT course since October, 1940, according to an announcement Thursday by Paul V. McNutt, chairman, War Manpower Commission. Another 18,000, he said, have been enrolled in Electronics courses.

Dr. W. W. Charters, chief of the commission's bureau of training, explained that "radio" and "pre-radar and ultra-high frequency techniques" share the popularity of fundamentals of radio. However, it is known from the records possessed by NAB, that "fundamentals of radio" stands at the top of the heap. This course has been offered in every state.

McNutt said that more and more women have registered for the radio courses in the last six months as a result of the increasing demand for women with radio and electronics training. The Aircraft Radio Laboratory at Wright Field alone, he added, has more than 200 women registered in courses preparing for radio jobs.

DEADLINE FOR PIX

Deadline to receive photos and copy of your women technicians is June 7. [See page 217, NAB REPORTS, May 14.]

Since last week material has been received from:

KTSW—Emporia, WBEN—Buffalo, WCCO—Minneapolis, WDBJ—Roanoke, WDRC—Hartford, WIBW—Topeka, WISH—Indianapolis, WMBS—Uniontown, WOC—Davenport, WSUN—St. Petersburg.

FAVOR BATTERY ORDER

(General Limitation Order L-71 as Amended May 21, 1943).

The new dry cell battery order was issued last Friday as predicted in last week's NAB REPORTS.

Its provisions are generally regarded with favor by the manufacturers. It reflects the desire of Consumers Durable Goods, of WPB, to get larger production from available facilities.

6 MORE CITIES REPORT

Six more materiel reports are acknowledged with thanks from the following cities:

Cumberland, Md.; Fargo, N. D.; Fitchburg, Mass.; Moorehead, Minn.; Norfolk, Neb.; Parkersburg, W. Va., and Rochester, Minn.

Reports from cities now total 231. All have been deposited with the radio and radar Division of WPB for its guidance.

State Legislation

H. 367 FOOD-DRUGS AND COSMETICS—Providing for regulation commerce in foods, drugs devices and cosmetics in the interest of consumers and users and eliminating certain of these from commerce. To Public Health.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, May 31st. It is subject to change.

Thursday, June 3

KGNC—Plains Radio Broadcasting Co., Amarillo, Texas—Modification of license, **860 kc.**, 500 watts night, 5 KW day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATION GRANTED

WDLP—Panama City Broadcasting Co., Panama City, Fla.—Granted modification (B3-ML-1161) of license to increase night power from 100 to 250 watts.

LICENSE RENEWALS

WINX—WINX Broadcasting Co., Washington, D. C.—Granted renewal (B1-R-1104) of license for synchronous amplifier, with waiver of Rules 2.53 and 13.61 subject to same conditions contained in previous grant.

The following stations were granted renewal of licenses for the period ending June 1, 1945:

KGEZ, Kalispell, Mont.; KOME, Tulsa, Okla.; KUIN, Grants Pass, Ore.; KVOX, Moorhead, Minn.; KWLM, Willmar, Minn.; WEIM, Fitchburg, Mass.; WGAU, Athens, Ga.; WHAT, Philadelphia; WINX, Washington, D. C.; WIZE, Springfield, Ohio; WALL, Middletown, N. Y.; WMBO, Auburn, N. Y.; WNBH, New Bedford, Mass.; WSTV, Steubenville, Ohio; WBRE, Wilkes-Barre, Pa.; WCMI, Ashland, Ky.; WSAV, Savannah, Ga.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon application for renewal. for the period ending August 1, 1943:

KAND, Corsicana, Texas; KGFW, Kearney, Nebr.; KPDN, Pampa, Texas; KROC, Rochester, Minn.; KWFC, Hot Springs, Ark.; WCBI, Columbus, Miss.; WDAK, West Point, Ga.; WGH, Newport News, Va.; WJPR, Greenville, Miss.; WLAK, Lakeland, Fla.; WLBJ, Near Bowling Green, Ky.; WWPG, Palm Beach, Fla.; KHUB, Near Watsonville, Calif.; KSUB, Cedar City, Utah; KVSF, Santa Fe, N. Mex.; WFIG, Sumter, S. C.; WGAA, Cedartown, Ga.; WJMA, Covington, Va.; WAML, Laurell, Miss.; WEXL, Royal Oak, Mich.; WEMP and auxiliary, Milwaukee, Wis.

Licenses for the following stations were further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending August 1, 1943:

KAVE, Carlsbad, N. Mex.; KBST, Big Springs, Texas; KCMC, Texarkana, Texas; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Texas; KICA, Clovis, N. Mex.; KIUL, Garden City, Kans.; KPLT, Paris, Texas; KRBC, Abilene, Texas; KRLH, Midland, Texas; KVGB, Great Bend, Kans.; KXL, Portland, Ore.; WABI, Bangor, Maine; WBBZ, Ponca City, Okla.; WBNX, New York City; WCBT, Roanoke Rapids, N. C.; WCOV, Montgomery, Ala.; WEDC, Chicago; WFCI, Pawtucket; WGGA, Gainesville, Ga.; WHOM and auxiliary, Jersey City; WING, Dayton. Ohio; WJBW, New Orleans; WJW, Akron; WNBZ, Saranac Lake, N. Y.; WOCB, Near Hyannis, Mass.; WRAL, Raleigh; WSAY, Rochester, N. Y.; WSYB, Rutland, Vt.; WTEL, Philadelphia.

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa—Granted renewal of license for the period ending April 1, 1945.

WAAC—Fort Meyers Broadcasting Co., Fort Meyers, Fla.—Granted renewal of license for the period ending April 1, 1945.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted renewal of license for the period ending April 1, 1945.

KWRC—Western Radio Corp., Pendleton, Ore.—Granted renewal of license for the period ending April 1, 1945.

W2XWE—WOKO, Inc., Albany, N. Y.—Present license further extended upon a temporary basis to July 1, 1943, pending determination upon application for renewal.

W75C—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted license (B4-LH-39) to cover construction permit (B4-PH-5, as modified) in part.

W85A—General Electric Co., Schenectady, N. Y.—Granted renewal of license for the period ending June 1, 1944.

W71NY—Bamberger Broadcasting Service, Inc., New York City—Granted renewal of license for the period ending June 1, 1944.

W45BR—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted renewal of license for period ending May 1, 1944.

W69PH—WCAU Broadcasting Co., Philadelphia, Pa.—Present license extended on a temporary basis only, to July 1, 1943, pending determination upon application for renewal.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present license further extended upon a temporary basis only, pending determination on application for renewal, for the period ending July 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis only, pending determination on application for renewal, for the period ending July 1, 1943.

MISCELLANEOUS

KWSC—State College of Washington, Pullman, Wash.—Motions to strike and amend notice of hearing and to strike Issues 6 and 7 of "Notice of Hearing" in re application for construction permit were dismissed without prejudice to the filing of a petition before the full Commission with permission to other parties to file opposition thereto. (Docket No. 6499)

WOKO—WOKO, Inc., Albany, N. Y.—Granted petition for continuance of hearing on renewal of license to operate on **1460 kc.**, 500 watts night, 1 KW day; hearing continued to July 1, 1943 (Docket No. 6486)

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Granted modification of construction permit as modified, which authorized new experimental television broadcast station, for extension of completion date from May 31 to December 31, 1943. (B1-MPVB-100)

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozark Broadcasting Co., Springfield, Mo.—Authority to determine operating power by direct measurement of 310′ vertical antenna power. (Contingent upon the granting of B4-ML-1153.)

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—License to cover construction permit (B2-P-2547) as modified, for increase in power, installation of new transmitter and directional antenna for night use, and change hours of operation.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Authority to determine operating power by direct measurement of antenna power.

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Modification of construction permit (B4-P-3288, as modified, which authorized increase in power and directional antenna for night use) for extension of completion date from 6-7-43 to 9-7-43.

590 Kilocycles

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Voluntary assignment of license to John E. Fetzer, tr/as Fetzer Broadcasting Company.

990 Kilocycles

WIBG—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—License to cover construction permit (B2-P-3207) as modified for installation of new transmitter and directional antenna for day and night, change hours, increase power and move.

WIBG—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Authority to determine operating power by direct measurement.

1230 Kilocycles

WLVA—Lynchburg Broadcasting Corp., Lynchburg, Va.—Modification of license to change frequency from **1230** to **1240 kc.**

WBBZ—Adelaide Lillian Carrell, Executrix of Estate of Charles Lewis Carrell, Deceased, Ponca City, Okla.—Voluntary assignment of license to Adelaide Lillian Carrell.

1310 Kilocycles

WTNJ—WOAX, Incorporated, Trenton, N. J.—Special Service Authorization to operate hours formerly used by WCAP pending repairs to WCAP's transmitter, which was destroyed by fire.

1450 Kilocycles

WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Transfer of control of licensee corporation from Richard E. Coon to Poughkeepsie Newspapers, Inc. (480 shares of common and 80 shares preferred).

1490 Kilocycles

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Modification of license to change frequency from **1490** to **1230 kc.**

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why cease and desist orders should not be issued against it.

L. R. Kallman & Company—Misrepresentation in the sale of two cosmetic preparations designated "Chin-Up" and "Digitite" is alleged in a complaint issued against L. R. Kallman, trading as L. R. Kallman & Co., 43 East Ohio St., Chicago. (4966)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Associated Distributors, Inc.—An order to cease and desist from misrepresentations concerning the origin and properties of a cosmetic designated "Chen Yu Nail Lacquer" has been issued against Associated Distributors, Inc., and J. L. Younghusband, Paul Rowatt and Howard A. Younghusband, trading as Associated Distributors, all of 30 West Hubbard St., Chicago.

Findings of the Commission are that the respondents, through the use of the trade name "Chen Yu" accompanied by Chinese letters or symbols or by depictions of Chinese art, and by means of various representations in their advertising matter, have represented their nail lacquer as being of Chinese origin and incapable of chipping or flaking, when such are not the facts. (4749)

Neo Gravure Printing Co., Inc., et al.—An order to cease and desist from unfair and deceptive acts and practices in connection with the sale of manufacturers' advertising displays for use in export catalogs has been issued against three corporations and an individual found to have been associated in a cooperative arrangement to induce American manufacturers to purchase substantial quantities of the displays as a means of increasing their business in foreign countries.

The order is directed against Neo Gravure Printing Co., Inc., New York; Eggers & Heinlein, Inc., and Middleton & Co., Ltd., export commission firms with headquarters in New York, and Marcus A. Crews, Lawrenceburg, Tenn., trading as M. A. Crews Co. and as Pioneer Exporters, associated with the other respondents in the sale of the displays and the publication of export catalogs. The Commission previously had dismissed the complaint as to Cuneo Press, Inc., Chicago. (4781)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Associated Laboratories, Inc., 21st St. at Borden Ave., Long Island City, N. Y., engaged in the sale of multi-vitamin concentrates, in capsule form, under the trade name "Vitamin-Quota," stipulated that it will cease and desist from representing in advertising matter that it is impossible or extremely difficult to obtain an adequate intake of vitamins from ordinary foods; that conditions such as vague aches and pains, fatigue, lack of resistance to colds, nervousness, poor appetite, poor digestion, or lack of energy are necessarily symptomatic of vitamin deficiencies; and that the ingestion of Vitamin-Quota capsules will relieve, remedy or correct such conditions or result in a superior state of health. (3648)

A. Freedman & Sons, Inc., New Bedford, Mass., engaged in the manufacture of shoes, stipulated that it will cease and desist from marking, labeling or otherwise advertising its products through use of the word "Lloyd" or the words "London Boot Shop," or any word or picturization customarily associated with the British Isles or any foreign country, so as to imply that the shoes so described are of British or other foreign origin. (3649)

Kay Preparations Co., Inc., 511 Fifth Ave., New York, has entered into a stipulation to cease and desist from certain representations in connection with the sale of cosmetics designated "Formula 301" and "Formula 301A," the latter formerly known as "Kay Special Sulphur Skin Soap." (3650)

Modern Cosmetics, Inc., 176 West Adams St., Chicago, has entered into a stipulation to cease and desist from representing that its cosmetic preparation designated "Modern Eyes Mascara" is the fastest selling brand of mascara and, when applied with the spiral brush which accompanies it, will coat all sides of the eyelashes rather than the under side only. (03109)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON, D. C. Vol. 11, No. 23, June 4, 1943

BOARD MEETING

Washington, D. C.

When this issue of NAB REPORTS went to press, the Board of Directors was in the midst of its opening session, Thursday afternoon, June 3. At the conclusion of the meeting a Special Bulletin will be issued to all member stations.

CHAIN BROADCASTINGS REGULATION AMENDED BY FCC

The chain broadcasting regulations will become effective as of June 15 the FCC has decided, having refused to make any change in its ruling in that regard. The Commission made public the following amended chain broadcasting regulations:

The Commission having under further consideration its order, entered in Docket No. 5060, as amended, promulgated regulations applicable to radio stations engaged in chain broadcasting.

IT IS ORDERED, That the Commission order, entered in Docket No. 5060, as amended, BE, AND THE SAME IS HEREBY, FURTHER AMENDED in the following particulars:

Section 3.103 of the regulations set forth in said order, as amended, is hereby further amended to read as follows:

> 3.103. *Term of affiliation*—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years: *Provided*, That a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

The last paragraph of said order is hereby amended to read as follows:

> "It is further ordered, that these regulations shall become effective 12:01 a. m., Eastern War Time, June 15, 1943, unless otherwise required by court order: *Provided*, That the effective date of Regulation 3.106 with respect to any station may be extended from time to time in order to permit the orderly disposition of properties: *Provided further*, that the effective date of Regulation 3.106 shall be suspended indefinitely with respect to regional network organizations; and *Provided further*, that the effective date of Regulation 3.107 shall be suspended indefinitely and any further order of the Commission placing said Regulation 3.107 in effect shall provide for not less than six months' notice and for further extension of the effective date from time to time in order to permit the orderly disposition of properties."

OCR OK's FARM BATTERIES

WPB, on June 1, put into operation a program worked out by the Office of Civilian Requirements to provide farmers with supplies required to increase food production.

Radio batteries were included in the list of 66 items.

This is a case in which action to provide farmers with radio batteries preceded by many weeks the inauguration of a broader farm program. Increased production of farm radio batteries began last March after NAB conferred with the Office of Civilian Supply and Consumers Durable Goods.

Push Production to Limit

Consumers Durable Goods, where implementation of the farm radio battery program is placed, stated yesterday that it is diligently watching the situation to make sure that all battery manufacturers produced farm batteries to the very limit of capacity, commensurate with the needs of the military.

Reasons for maximum production are known and appreciated by all manufacturers.

CODE COMMITTEE TO MEET IN NEW YORK

(Released by NAB News Bureau)

The Code Compliance Committee will meet at the Roosevelt Hotel in New York, Wednesday and Thursday, June 16 and 17. Principal item on the agenda is consideration of questions raised by the Radio Committee of the Na-

(Continued on page 260)

IMPORTANT NOTICE!

CHANGE OF MAIL ADDRESS

In compliance with the recent system of zoning established by the Post Office, covering deliveries in metropolitan centers, all mail to NAB should hereafter be addressed as follows:

National Association of Broadcasters
1760 N Street, N. W.
Washington 6, D. C.

The numeral 6 is enlarged herein so as not to escape your notice.

Compliance with this suggestion will assure prompt handling of mail.

If you are located in a city which has been zoned by the Post Office, please notify NAB of your zone number.

CODE COMMITTEE TO MEET IN NEW YORK

(Continued from page 259)

tional Council on Freedom from Censorship with reference to Labor on the air.

The Radio Committee, made up of Thomas R. Karskadon, chairman, Morris S. Novik, Paul F. Lazarsfeld and Norman Thomas, will meet with the Code Committee to discuss these questions: 1) Should trade unions have the right to buy time for entertainment programs with incidental reference to auspices? 2) Should trade unions have the right to buy time to explain the philosophy and purposes of trade union organization, and with the right to solicit membership? 3) What additional facilities should be extended to labor spokesmen in connection with programs on sustaining time? 4) How can a viewpoint more acceptable to labor interests be included in general commercial entertainment features? 5) How can trade unions take greater advantage of the radio as a medium for getting their claims and interests before the public?

The Code Committee for 1943-44: William B. Quarton, WMT, chairman; Neville Miller, NAB, ex officio; Grant F. Ashbacker, WKBZ; William S. Hedges, NBC; Felix Hinkle, WHBC; Herbert R. Kendrick, WJLS; Eugene O'Fallon, KFEL; Arden X. Pangborn, KEX; Jan Schimek, CBS; Lee B. Wailes, KYW, and Russell P. Place, NAB, secretary.

WJW HEARING SET

In connection with the recent KOA Supreme Court decision the FCC has set the case of WJW, Akron, Ohio, for hearing on its application for modification of construction permit. The hearing is to be held June 30 before Commissioner Durr. In connection with its formal order the Commission states that the hearing will be on the following issues:

1. To determine the extent of any interference which would result from the simultaneous operation of Station WJW as proposed in its application for modification of construction permit (B2-MP-1662) and Station KOA, Denver, Colorado;

2. To determine the areas and populations which would be expected to lose primary or secondary service particularly from Station KOA should Station WJW operate as proposed and what other broadcast services (primary or secondary) are available to these areas and populations;

3. To determine the areas and populations which would be expected to gain primary service should Station WJW operate as proposed and what other broadcast service is available to these areas and populations;

4. To determine the areas and populations now receiving primary service from WJW which may be expected to lose such service should this application be granted and what other broadcast service is available to these areas and populations;

5. To determine the extent of any interference which would result from the simultaneous operation of Stations WJW as proposed in its application for modification of construction permit (B2-MP-1662), KOA, Denver, Colorado, and WHDH, Boston, Massachusetts, as proposed in its application for construction permit (B1-P-2201);

6. To determine the areas and populations which may be expected to lose primary or secondary service particularly from Station KOA as a result of the proposed operation of Stations WJW and WHDH, and what other services are available to these areas and populations;

7. To determine whether Station WJW should be authorized to operate unlimited time on the frequency of 850 kc. as proposed;

8. To determine whether in view of the evidence adduced under the foregoing issues, public interest, convenience or necessity would be served through the granting of this application;

IT IS FURTHER ORDERED, That the hearing in the above-entitled matter be consolidated with the hearing on the application of Matheson Radio Company, Inc. (WHDH), Docket No. 5453.

Labor

48-HOUR WEEK

The War Manpower Commission has added nine cities to its critical labor shortage list where a 48-hour week is obligatory unless an exemption (complete or partial) is obtained.

The nine cities:

Akron, Ohio; Chambersburg, Pa.; Pine Bluff, Ark.; Salt Lake City, Utah; San Francisco, Cal.; Sturgeon Bay, Wis.; Trenton, N. J.; Wilmington, Del., and Jacksonville, Fla.

In cities on the critical area list, radio stations must put all employees on a 48-hour week (with time and one-half for overtime for those covered by the Wage and Hour Act) unless the Area WMC Director sanctions a shorter work week for all or part of the employees.

The NAB has forms for the use of those stations seeking exemptions. Newly affected stations are also advised to read the *NAB Reports*, pp. 67, 68, 118.

NEWSPAPER JOB CLASSIFICATION

The Wage and Hour Division has issued a pamphlet classifying newspaper jobs as to Wage and Hour coverage. Since some of the jobs are similar to those of radio newsmen, stations may be interested. Copies are obtainable at the NAB or at your nearest Wage and Hour office.

INDIVIDUAL SALARY ADJUSTMENTS

The War Labor Board by General Order No. 31 has amended its General Orders No. 5 and No. 9 dealing with individual salary adjustments which need no Board approval. Since most salary adjustments in radio stations, other than those covered by union contracts, are made on an individual basis, this new order is of great importance to the industry.

Individual increases can be given without Board approval if they are made as a result of:

(a) Individual promotions or reclassifications,

(b) Individual merit increases within established rate ranges,

(c) Operation of established plan of wage increases based upon length of service within established rate ranges,

(d) Increased productivity under piece work or incentive plans,

(e) Operation of an apprentice or a trainee system.

Paragraph (a) as applied to a radio station would mean that an announcer, for instance, could be promoted to a program director and receive an increase without Board approval. It *does not mean* that an announcer, without any change in duties, can be "promoted" or "reclassified" with just a change in title and be given an increase without Board approval.

Paragraphs (b) and (c) hinge upon the establishment of definite salary increase plans, in writing and followed without deviation. Such plans may provide for an automatic increase based on length of service or for merit increases at specified intervals (usually not more than every six months) with a minimum and maximum for each classification.

Stations would do well to consider the advisability of instituting such a plan. It can be instituted and adjustments made under it without any Board approval if the top figure in the plan does not exceed the top figure paid today. However, if institution of a plan means extension of the current rate range, WLB approval of the plan must be obtained.

Any station desiring the assistance of NAB in setting up an individual salary schedule should communicate with the Director of Labor Relations.

Engineering

FCC-NAB TECHNICIAN SURVEY

The FCC and NAB are jointly exploring the possibility of uncovering available technical personnel from the FCC list of licensed operators not presently employed in the communications field. It will be remembered that Chairman James Lawrence Fly first mentioned this activity at the NAB War Conference in Chicago. Since that time, the Economic Unit of the FCC and NAB staff members have conferred for the purpose of determining sampling techniques.

The FCC is now mailing a double postal card to licensed operators. A few simple questions concerning the eligibility of the licensee for employment is on the return portion of the card. The NAB questionnaire places particular emphasis on the requirements of the broadcast industry and is mailed together with a self-addressed stamped envelope for return.

The FCC mailing list has been divided in order to avoid duplication. After returns have been received from both surveys, another joint conference will be held in order to compare results and to determine the final method of surveying the remaining portion of the FCC operator lists. Already NAB has received several applications for placement in the broadcast industry as a direct result of this new recruiting method.

These surveys are for the purpose of bringing new technical personnel into the communications field.

WHK-WCLE ENGINEERS START RADIO SCHOOL

Cleveland broadcasters and other radio interests will look for at least a part of their licensed technical personnel in the months ahead to the recently organized Broadcast Technical Institute.

While Broadcast Technical Institute is operated under the supervision of the engineering staff of WHK-WCLE, United Broadcasting Company has no direct concern or interest in the Institute.

A fee of $48 is charged for the sixteen weeks primary course. Intermediate and advanced courses will be available for those who already have a fundamental knowledge of radio.

Fifty students met for the first class on May 26 in WHK-WCLE studios where all classes will be held—3 evenings per week.

Instructors have been recruited from WHK-WCLE engineering staff. Many have had experience in teaching "Fundamentals of Radio," the ESMWT course prepared and promoted by NAB.

FINAL CALL FOR PHOTOS

Seventeen more member stations have forwarded photographs of women technicians and appropriate copy for inclusion in the forthcoming NAB brochure on technical womanpower. They are:

WGAR—Cleveland; WFAA-KGKO—Dallas; WDAY—Fargo; WTIC—Hartford; WKBH—LaCrosse; WAVE—Louisville; WGRC—Louisville-New Albany; WLVA—Lynchburg; WHBQ—Memphis; WRAL—Raleigh; WRVA—Richmond; WSYR—Syracuse; KTUL—Tulsa; WDZ—Tuscola; KXEL—Waterloo; WKBN—Youngstown.

Deadline for receiving material is June 7.

SUPPLEMENTAL GAS FOR TRUCKS IN EASTERN SHORTAGE AREA

A priority system has been established for the Eastern gasoline shortage area to assure the continuance of essential automotive transportation, the Office of Defense Transportation announced Sunday.

The system, based on a list of essential services which includes Radio Broadcasting, will be used in granting supplemental gasoline allotments to commercial motor vehicles in the shortage area.

Additional gasoline will be allotted only for essential commercial services which could not be continued under the 40 per cent gasoline ration "stretch-out" announced by ODT last week.

WGAR GOES 'ALL OUT' FOR ITS PERSONNEL IN THE NATION'S ARMED FORCES

Many stations are engaged in numerous activities associated with their men and women in the Armed Forces and station managers are interested in keeping these fine and worthy endeavors in high gear and in amplifying and extending them.

In the spirit of cooperation, NAB is asking for reports from stations as to what they are doing in this line and one of the first and most complete has come from Carl George, director of operations at WGAR.

Enclosed with his report, Carl sent NAB two copies of the WGAR monthly service bulletin, "Home News", which is sent to the station's people in the services.

This bulletin is a thorough job, almost magazine-complete in its scope. It has everything from WGAR staff news to a crossword puzzle and from news about Cleveland to reprints of letters from the boys and girls in uniform. It also has real photographs of staff members at work in the studios, to give a real, homey touch. The front cover is attractively mimeoscoped in seasonal style.

That's not all—but let Carl tell you in his own words:

> "Aside from the monthly bulletin, we encourage our people to write to as many of the men in service as they can. When they leave us, we always have a luncheon and give them some kind of remembrance which is purchased from a fund which we have established for this purpose. We collect 40 cents each month from each staff member to avoid having to solicit our organization

each time someone leaves. A committee supervises the payments from this fund, so there is seldom any hesitation to buy a little remembrance for a man in one of the armed services.

"We have a bulletin board on which most of the letters we receive from our men are posted. Last Christmas, we sent each of our men a Christmas package which contained shaving necessities, fruit cake, candy, books, records, stationery, etc. We got some wonderful letters back telling how a whole gang of fellows gathered round the Christmas tree to help open the package, and how all of them envied the fellow who had been associated with an organization which remembered its employees.

"At Christmas last year, we invited the wives and children of each of our Honor Roll men to our annual staff Christmas party, and gave them an afternoon of movies, games, gifts, etc. These men's wives know that our doors are always open here to help them when any problem comes up which they have not anticipated. If there is an accident in the family, or some unfortunate circumstance develops, we want them to let us know right away and we will do anything we can to help them out, whether it be in a financial way or taking time off to talk to their insurance man or lawyer, or other contact."

Such is WGAR's contribution to the morale of its people in the services. NAB wants more stories like this for inclusion in NAB REPORTS and for a permanent file. Send along your station's story on what it is doing for its people in uniform to Willard Egolf, assistant to the president, NAB.

As another example of how radio people are contacting the people in service, "On The Beam," written and published by the student members of the Central Radio Workshop of the Radio Council (WBEZ) of the Chicago Public Schools, is mentioned. This newsy, entertaining little mimeographed pamphlet is sent to former members of the workshop now in the Armed Forces. George Jennings, acting director of the council, is supervisor of the publication and Hilly Rose is editor.

NEVILLE MILLER ELECTED TRUSTEE OF PRINCETON

(Released by NAB News Bureau)

Neville Miller was elected alumni trustee at large of Princeton University at the recent National Alumni Association's annual meeting held in connection with Princeton's 197th commencement. Miller formerly was assistant to Princeton president Harold W. Dodds.

ANDRE MAUROIS PAYS TRIBUTE TO RADIO IN ARTICLE

(Andre Maurois, famous French writer and biographer, in the June, 1943, Reader's Digest, *in an article entitled "Why I Love America", reprinted from* Common Sense *magazine, paid the following tribute to American broadcasting)*

> "I never fail to be impressed by the American talent for self-government, and by your ability to thrash out a problem in debate. America was born in a town meeting; today through its enormous networks it has become one immense town hall. It sometimes seems to me that the whole nation turns every night into a gigantic radio forum. 'For God's sake, let us hear both sides of the question', cried Thomas Jefferson, while the Constitution was being framed. Today *all* sides of the question are being canvassed by fervent champions. This unceasing discussion creates a highly charged current of public opinion, so vigorous and healthy that encrustations of error are scoured away. . . ."

REPLACEMENT SCHEDULES

Announcing that available manpower of military age will permit only about 1,500,000 industrial deferments at the end of this year, Chairman Paul V. McNutt of the War Manpower Commission on Tuesday urged employers of the approximately 3,000,000 men now deferred for occupational reasons to cooperate for their orderly induction by promptly filing out manning tables and replacement schedules.

When an employer files a manning table and a replacement schedule, Chairman McNutt pointed out, he gives the War Manpower Commission a picture of his personal requirements that is helpful to its entire program, together with a time table by which the Selective Service Bureau can plan its inductions. The manning table, he said, presents the over all picture, while the replacement schedule implements orderly induction.

Stressing the need for prompt filing of manning tables and replacement schedules, Chairman McNutt also stated that the estimate of 1,500,000 men who can be deferred in industry as of next December 31 takes into consideration those who will become 18 before that date and also men with dependents who had been classified in former Class 3-B.

Three Million 2A or 2B

"On May 1," he said, "there were aproximately 1,000,000 Selective Service registrants 18 to 38 years old in Class 2-A, as necessary men in essential civilian activities, or in Class 2-B, as key men in war production other than agriculture. There also were around 2,000,000 men with dependents who are engaged in essential activities many of whom will be reclassified into Class 2-A or Class 2-B from former Class 3-B. In addition, there will be deferments during the remainder of the year of registrants who become 18 each month, such as students who are completing scientific or professional courses.

"On the other hand, on May 1 our pool of physically fit men between 18 and 38, including those becoming 18 each month until the end of the year, was about 6,000,000, of whom around 900,000 must be deferred during the year as necessary men in agriculture. This leaves 5,100,000 from whom approximately 2,700,000 must be inducted into the armed forces by the end of this year, if their goal of around 11,000,000 men is to be reached. There then remains about 2,400,000 of whom it is estimated approximately 900,000 will be men deferred for dependency reasons, leaving 1,500,000 as the maximum number of men who can be deferred for occupational reasons, other than agricultural at the end of this year."

6,000 Employers Cooperating

Already, Chairman McNutt said, approximately 6,000 employers throughout the United States are cooperating with the War Manpower Commission through manning tables and replacement schedules. However, he emphasized that the foregoing statistics make it urgent that employers, and particularly those who are engaged in activities essential to the war effort, get in touch with their WMC Regional or Area Directors and arrange to provide this data.

A manning table is a plant or industry analysis made up from a complete and detailed survey of the personnel requirements of an employer. It is filed with the WMC director of the region or area in which the plant or activity is located.

> **A replacement schedule lists employees liable for military service with regard to their Selective Service status and states definitely when each can be replaced. Normally this schedule is based upon data developed in preparing a manning table, but a State Service Director may accept a replacement schedule for immediate operation without a manning table.**

When accepted by a state Selective Service director, a replacement schedule is used to guide local boards having jursidiction over the individual registrants so that they may be called for induction with a minimum of interference to the war effort. Each schedule is in effect, unless revised, for six months. At the end of each six months period, the employer must file a new schedule projecting the replacement of registrants into the next succeeding six months period.

DOROTHY LEWIS IS NOW A GRANDMOTHER

(Released by NAB News Bureau)

Having traveled 80,000 miles, visited hundreds of cities in 47 states and Canada, and not having missed or been late to an appointment or conference in the last three years, Dorothy Lewis, NAB coordinator of listener activity, was on time this week as her first grandchild was born in Ithaca, N. Y. Dorothy arrived in Ithaca May 16 and a few hours later Thomas Lewis Gage was born to her daughter.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, June 7th. It is subject to change.

Monday, June 7

Further Hearing

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Modification of C. P., under C. P.; **1240 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WCCO—Columbia Broadcasting System, Minneapolis, Minn.—Adopted orders granting petition for rehearing directed against the grant of special service authorization to station WNYC for increase in nighttime operation on **830 kc.;** set aside the grant to WNYC, and designated application for special service authorization (B1-SSA-52) for hearing on issues to be specified, WCCO to be made a party to the hearing, and denied petition of Clear Channel Group for rehearing and intervention directed against the WNYC grant.

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Adopted orders granting petition for rehearing directed against action of the Commission April 14, 1942, granting without hearing the application of KSJB, Jamestown Broadcasting Co., Inc., Jamestown, N. Dak., for modification of license to change frequency from **1400** to **600 kc.,** and power from 250 watts day and night to 100 watts night, 250 watts day, unlimited time; set aside the grant to KSJB, and designated application for hearing upon specified issues, WMT to be made a party to the hearing. On its own motion the Commission granted a special service authorization to KSJB so as to permit operation of that station on **600 kc.** with 100 watts night, 250 watts day, pending hearing and determination by the Commission on KSJB's application for modification of license.

WAML—The New Laurel Radio Station, Inc., Laurel, Miss.—Granted application for renewal of license on a regular basis (B3-R-709).

WJMA—Earl M. Key, Covington, Va.—Granted request to change call letters of station from WJMA to WKEY.

DESIGNATED FOR HEARING

WPAT—Frank Falkner and Rex Schepp (Transferors), Donald Flamm (Transferee), North Jersey Broadcasting Co., Inc. (Licensee), Paterson, N. J.—Designated for hearing application for consent to transfer of control of North Jersey Broadcasting Co., Inc., licensee of station WPAT, from Frank Falkner and Rex Schepp to Donald Flamm (B1-TC-318).

MISCELLANEOUS

KGNC—Plains Radio Broadcasting Co., Amarillo, Texas.—Granted motion to dismiss without prejudice application for modification of license to operate on **860 kc.,** 500 watts night, 5 KW day, unlimited time. (Docket No. 6493)

Incorporated Village of Rockville Center, N. Y.—Granted motion to dismiss without prejudice application for construction permits for new police radio system. (Docket No. 6515)

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Granted motion for continuance of hearing in re application for modification of construction permit to extend construction and completion dates; hearing continued to June 28. (Docket No. 6488)

KFMB—The First National Trust and Savings Bank of San Diego, Executor of the last Will and testament of Warren B. Worcester, deceased, Transferor; and The First National Trust and Savings Bank of San Diego, as Trustee under Declaration of Trust for Warren B. Worcester, Deceased, Transferee, San Diego, Calif.; KFMB, Worcester Broadcasting Corp., San Diego, Calif.—Granted motion for authority to amend application and remove from hearing docket the application for voluntary transfer of control of Worcester Broadcasting Corp., and application for renewal of license.

WWL—Loyola University, New Orleans, La.—Granted amended petition to intervene in the hearing on application of KGNC, Plains Radio Broadcasting Co., Amarillo, Texas, for modification of license to operate on **860 kc.,** 500 watts night, 5 KW day, unlimited time.

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Granted license to cover construction permit as modified, for changes in directional antenna for night use, and increase in power (B2-L-1765); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1520).

WHAZ—Renssalaer Polytechnic Institute, Troy, N. Y.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1521).

KGBK—Helen Townsley, area of Great Bend, Kans.—Granted further extension of relay broadcast station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than July 1, 1943 (B4-SRY-240).

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Granted further extension of relay broadcasting station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than July 1, 1943 (B3-SRY-132).

The Baltimore Radio Show, Inc.; WEGI, area of Baltimore, Md.; WEGJ, area of Baltimore, Md.—Cancelled relay broadcast station licenses in accordance with written request (B1-RRE-143; B1-RRE-144).

APPLICATIONS FILED AT FCC

830 Kilocycles

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Authority to determine operating power by direct measurement of antenna power for auxiliary transmitter.

1300 Kilocycles

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich. —Construction permit to move formerly licensed 500-watt main transmitter from Walker Township, Grand Rapids, Michigan, to on Town Road between Division Street and Eastern Avenue, South of Grand Rapids, Michigan (site of new main transmitter), and use same as an auxiliary transmitter with power of 500 watts, employing directional antenna night.

1400 Kilocycles

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Construction permit to install a new transmitter.

FM APPLICATION

W47R—WHEC, Inc., Rochester, N. Y.—License to cover construction permit (B1-PH-96) for a new high frequency (FM) broadcast station.

TELEVISION APPLICATION

NEW—The Journal Company (The Milwaukee Journal), Milwaukee, Wisc.—Construction permit for new experimental television relay broadcast station to be operated on frequency **300000-312000 kc.**, 25 watts power, A5 emission. (Formerly W9XCV)

MISCELLANEOUS APPLICATIONS

WBEZ—Board of Education, City of Chicago, Chicago, Ill.—Construction permit for reinstatement of construction permit (B4-PED-22, as modified) for new non-commercial educational broadcast station.

NEW—Stanley G. Boynton, Detroit, Mich.—Authority to transmit programs to CKLW, Windsor, Ontario, Canada, from Highland Park Baptist Church, Highland Park, Michigan, each Sunday evening from 8 to 8:45 p. m., EST.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Carter Products, Inc., 53 Park Place, New York, selling and distributing a medicinal preparation designated "Carter's Little Liver Pills," and Street & Finney, New York, advertising agency preparing, editing and placing all advertising material for the corporate respondent, are charged in a complaint with false advertising and misrepresentation. The respondents are further charged with making disparaging statements and representations concerning the drug calomel and other laxative preparations. (4970)

Clark's Drugs & Sundries, Clark's Drugs, and Clark's, 426 South Spring St., Los Angeles, selling and distributing drugs and sundries, including male and female sex hormone preparations, is charged in a complaint with false advertising and misrepresentation. (4968)

Gladstone Brothers, 110 Fifth Ave., New York, and also doing business as Aaron Leonard Company, at the same address, are charged in complaint with misrepresentation in the sale of clothing, in violation of the Wool Products Labeling Act of 1939 and the Federal Trade Commission Act. (4969)

Helena Volay Cosmetics, Needles, Calif., selling and distributing a cosmetic preparation designated Helena Volay Face Oil, and Chicago Union Advertising Agency, Inc., 20 West Jackson Blvd., Chicago, are charged in complaint with misrepresentation. (4967)

U. S. Rubber Company, et al.—Two leading manufacturers of rubber and canvas footwear, United States Rubber Co., New York City, and Hood Rubber Co., Inc., Watertown, Massachusetts, are charged in separate complaints with violation of the Robinson-Patman Act by discriminating in price between different purchasers of their products. (4972-4971)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Flamingo Sales Co., Hollywood, Calif., engaged in the sale of a nail lacquer designated "Seal-Cote," stipulated that it will cease and desist from disseminating any advertisement which represents that use of the preparation will cause nails to grow longer, will aid their natural growth, or will correct or prevent splitting or breaking of the nails. (3652)

Hicks Rubber Co., trading as Star Rubber Co., Waco, Tex., and Milt Goldbacher, Brown Mills, N. J., sales agent of the corporation, have entered into a stipulation to cease and desist from certain representations in connection with the sale of automobile tires. They agree to discontinue the use of any comparative statement or other representation, the effect of which tends to convey the belief that the service to be obtained from their tires is in excess of the service they actually will render, that the cord contained therein is any tougher or stronger than is actually a fact or that the rubber on the sidewalls or tread is any deeper or thicker than it actually is. (3651)

Paebar Co., Inc., and Alan F. Pater, 220 West 42nd St., N. Y., have entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of books, including a so-called year book of public opinion called "We, the People," a title known to the public as the name of a radio program sponsored by national advertisers. (3657)

Pitegoff Bros., Inc., 320 Van Buren St., Brooklyn, manufacturer of paint brushes sold under the brand name "Sumner," stipulated that it will cease and desist from use of the words "bristle and horse hair" as descriptive of the brushing part of its products and from use of such words to imply that the brushing part is composed wholly of the materials named. (3655)

A. Schreter & Sons, Inc., 16 South Eutaw St., Baltimore, distributor of men's neckwear, has entered into a stipulation to cease and desist from advertising, labeling, invoicing or selling any neckwear made in whole or in part of rayon without clearly disclosing the fact by use of the word "rayon"; and, when a product is composed in part of rayon and in part of other fibers or materials, from failing to disclose each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, in immediate connection with and in type equally conspicuous as the word "rayon." (3653)

Western Medical Corp.—A stipulation to cease and desist from certain misrepresentations in the mail-order sale and distribution of medicinal preparations offered as treatments for epilepsy has been entered into by Western Medical Corp., 415 West 39th St., Chicago. (3656)

Willens Co., Inc., trading as Patriotic Stamp Co., 2130 Gladys Ave., Chicago, stipulated that it will cease and desist from misrepresenting the quality and origin of certain pens and billfolds it offers as premiums in connection with the sale of its so-called patriotic stamps. (3654)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Conway Tailors, 434 Elm St., Cincinnati, has been ordered to cease and desist from the use of lottery methods in the sale of men's clothing. (4910)

John F. Eberhard, Walter J. Keavney and Edmund Diaz, executives and officials formerly connected with Cyclopedia Corporation of America, Professional Circulation Co., Inc., and Professional Sales Corporation, located at 11 West 42nd St., and 55 West 42nd St., New York, engaged in the sale of combination or club offers of scientific books and magazine subscriptions, have been ordered to cease and desist from misrepresentation in connection with the offering for sale or distribution of such merchandise. (4639)

Hecht Company, also trading as Hecht Bros., Baltimore, operating department stores in Baltimore, Washington and New York, has been ordered to cease and desist from misrepresentation in the sale of mattresses. (4840)

Modernistic Candies, Inc., and Sol S. Leaf and Harry Leaf, officers of the corporation, 1734 West Hubbard St., Chicago, have been ordered to cease and desist from the use of lottery methods in the sale and distribution of their merchandise. (4605)

WHITE-WHEELER BILL HEARINGS HELD UP UNTIL SEPTEMBER

Senator Wheeler has advised NAB that due to the impending Congressional recess July 1 and because of lengthy hearings current on railroad matters, the White-Wheeler bill hearings will not be held until after the Congressional recess. The senator offered September 1 as a probable date for the hearings.

Senator Wheeler's full statement follows:

"It was stated today, in view of the recess of the Congress expected to begin on July 1 or soon thereafter, and because of the anticipated continuance of pending hearings upon railroad legislation for two weeks or more, it seems unwise to proceed at this time with hearings upon the Radio Bill S. 814, introduced by myself and Senator White.

"I am therefore, after conference with Senator White and with his complete concurrence, postponing the radio hearings until the re-assembling of the Senate after the planned recess. It is my purpose to begin these hearings in the early days of September and to proceed with them uninterruptedly with the hope that the committee may speedily come to a definite conclusion as to the recommendations it should make to the Senate with respect to radio legislation."

SENATOR FERGUSON APPEALS FOR FREEDOM OF SPEECH

In an address over WJR, May 29, Senator Homer Ferguson (Rep. Mich.) made the following remarks concerning freedom of speech:

> **"Let us beware of those who would destroy or restrict freedom of speech and of the press.**
>
> **"Freedom of speech is more important to us than ever before because of the radio. To think as free men and women, we must be able to speak as free men and women. Our courts must guard this freedom of speech and not allow a decision to enlarge on what Congress has said by law.**
>
> **"Congress must be ever alert and will protect and defend the Constitution which provided for freedom of the press, and freedom of speech.**
>
> **"Mothers and fathers, you must insist on a Free Press and a Free Radio, or you will lose your liberty, for which your boys fight and die this very hour."**

NAB TO PARTICIPATE IN AFA WAR CONFERENCE

Panel discussions on "What the New FCC Regulations Mean to Advertisers" and "The Wartime Radio Audience" will highlight the meeting on radio, sponsored by NAB, Wednesday morning, June 30, at the Advertising Federation of America War Conference, Waldorf-Astoria Hotel, June 28-30.

Lewis H. Avery, director of broadcast advertising, NAB, will preside at the sessions, which will feature officials of radio stations, advertising agencies and networks. Participants will be announced in a future issue of the REPORTS.

HÉBERT DEMANDS ACTION

Rept. F. Edward Hébert [D-La.] yesterday urged Congress to "rewrite the Radio Act to define the Commissions' hours definitely."

In a speech [full text of which will be mailed to all stations early next week] Mr. Hébert declared that the Supreme Court decision [of May 10] "gave the FCC absolute authority to tell any radio station what it may and may not put on the air."

BROADCASTING IS A-1

A complete revision, on the basis of the degree of essentiality, has been made in the list of industries to be accorded preferential treatment in the eastern gasoline shortage area, the Office of Defense Transportation announced Monday. Essential industries are divided into four groups: AA-1 (Most Critical); A-1 (Very Critical); A-2 (Critical); and A-3 (Important). **Radio broadcasting is listed in A-1.**

As long as the supply of gasoline in the east remains critical, lesser amounts may be allocated to commercial vehicles operated by the lower rated industries than to the higher.

The present commercial vehicle ration period has been extended by 25 days and operators should now be "stretching out" their gasoline allotment through reduced operations to insure being able to operate during the additional period.

NEW SLANT ON RADIO CRITICISM

The following letter was sent by Neville Miller to Mary Haworth of the *Washington Post*, whose column, "Mary Haworth's Mail," recently has been devoted to letters criticizing daytime radio.

Note how the whole issue of public criticism of radio is brought into prominence by the Supreme Court decision of May 10.

Station managers are requested to air-mail to NAB headquarters, attention of Willard Egolf, any clippings of newspaper columns which feature the public discussion of radio, especially from a critical angle. Similar letters will be mailed to those columnists.

"Recently you have published letters from your readers which criticize the content and character of daytime radio programs. I have read these letters with interest and I can assure you that they have been read also by station managers and network officials wherever your paper has circulation. It is the first obligation of radio management to pay attention to the wishes of radio listeners. Upon that formula the American system of broadcasting has

NEW SLANT ON RADIO CRITICISM

(Continued from page 267)

been built into the greatest medium of communication the world has ever known.

The people who wrote those letters acted in good faith. They believe, as good Americans, that the expression of their views should result in changes being made. It has always been a privilege of citizenship to criticize the radio and ask for something different. Station managers have received thousands of letters and made thousands of changes in radio programs to meet the public demand.

I am wondering, however, if your readers realize the effect of the Supreme Court Decision of May 10th which places in the hands of the Federal Communications Commission, a body of seven men located in Washington, D. C., supreme authority to determine, whenever they wish, what shall and shall not be broadcast to the American people. They may say, at their discretion, what the people shall hear over the radio, whether it be news, drama, music, comedy or politics.

Under the law, as now interpreted by the Court, your effort to carry to radio management the genuine criticisms of American citizens, through the columns of your newspaper, is in a fair way to become an empty gesture, a relic of bygone days.

Unless the Congress enacts new legislation, the stage is set for the American public's loss of free radio."

Research

RESEARCH COMMITTEE MEETS

The NAB research committee met in Washington, Wednesday, June 9, 1943. Members present were: J. Harold Ryan, chairman, WSPD, Toledo; Edward F. Evans, WJZ, New York; G. Bennett Larson, WWDC, Washington; John C. McCormack, KTBS-KWKH, Shreveport; Barry T. Rumple, NBC, New York; Frank N. Stanton, CBS, New York; Jack Williams, WAYX, Waycross; and, Paul F. Peter, secretary of the committee. Guests attending were: John Churchill, CBS, New York; and, C. E. Arney, secretary-treasurer of NAB. Absent was: Roger W. Clipp, WFIL, Philadelphia.

The committee reviewed the Market Data Handbook for Broadcast Stations in its final paged form and determined policy in the matter of its distribution to members, advertising agencies and advertisers. It was decided that a complimentary copy will be sent to each NAB member and a selected list of advertisers and advertising agencies placing business or prospects for national advertising in radio. Additional copies are to be sold at printing cost which will probably be $1.50 per copy. The printing schedule of the book is delayed due to difficulties in obtaining paper stock. However, some assurance is given that mailing can start about July 15.

The NAB recommendation—"How to Determine Station Coverage" was reviewed and plans were made for discussions with the American Association of Advertising Agencies to obtain their final approval as to method and presentation format.

A long discussion was held on research plans of the association. The secretary was instructed to gather and analyze all survey material available which contributes to the store of information on radio during the war period. Also some exploratory work is to be done to assist the committee in reaching decision as to the advisability of fresh research on the subject.

Another meeting of the research committee will probably be held in the late summer or early fall.

REPORT OF BROADCASTERS QUESTIONNAIRES COMMITTEE

The broadcast sub-committee of the Advisory Committee on Government Questionnaires met June 8, 1943 in Washington. Those attending the meeting were: Roger W. Clipp, WFIL, Philadelphia; Edward F. Evans, WJZ, New York; John C. McCormack, KTBS-KWKH, Shreveport; Herbert Pettey, WHN, New York; Barry T. Rumple, NBC, New York; J. Harold Ryan, WSPD, Toledo; Jack Williams, WAYX, Waycross; John Churchill, CBS, New York, attending for Frank N. Stanton; and, Paul F. Peter, secretary of the committee. Guests attending the meeting were: David Cohn, Bureau of the Budget; Russell Schneider, secretary of the Advisory Committee; Neville Miller, president of NAB; and Newbold C. Going of Pittsburgh, secretary of another ACGQ sub-committee. Those absent were: Theodore C. Streibert, WOR, New York; and, G. Bennett Larson, WWDC, Washington.

Neville Miller opened the meeting with a greeting to the Committee and a talk outlining the developments which led to the appointment of the Broadcast Sub-committee. Miller introduced Russell Schneider who discussed the formation of the Advisory Committee on Government Questionnaires, its organization and functions. David Cohn, who is in the division of statistical standards, Bureau of the Budget, spoke on the problems of the Budget Bureau in examining questionnaires and forms. He explained the functions of the division of statistical standards and power given it in the Federal Reports Act of 1942 (Public Law 831, 77th Congress, approved, December 24, 1942). Subjects covered in his talk included a discussion of the call of the Budget Bureau to industry for counsel, the place of the broadcast sub-committee in the Advisory Committee set-up, and the assignments of the broadcast sub-committee.

Ryan Elected Chairman

Following Mr. Cohn's talk, Neville Miller, acting as temporary chairman, conducted an election in which J. Harold Ryan of WSPD was elected permanent chairman. The committee laid plans for its operation and an executive committee composed of Messrs. Larson, Pettey, and Peter was appointed. It was the thought of the committee that these members were most available to carry on discussions with the Budget Bureau and Washington government agencies and should, therefore, be empowered to act for the sub-committee between meetings of the entire group.

Mr. Cohn and Mr. Peter were called upon to review two broadcast sub-committee problems which, due to the pressure of time, were handled prior to the first meeting. Both, concerned survey requests, one from the Treasury Department and the other from the Federal Communications Commission.

The first of these, from the Treasury Department, involved a survey of all broadcast stations to determine the value of their contribution of broadcast time and talent devoted to aiding the Treasury in its Second War

Bond and Stamp Drive. This request to the Budget Bureau was denied and the information obtained through the cooperation of the Office of War Information and the NAB.

FCC Survey Approved

The FCC survey request involved a test questionnaire to be sent to 1,000 holders of first and second class radiotelephone licenses to determine the practicability of a complete survey in an attempt to obtain radio operators for the Armed Services and the Broadcast Industry. The Bureau of the Budget granted the request and NAB joined with the FCC in the test.

Messrs. Ryan, Cohn and Peter reviewed the current problem of the Committee—the FCC renewal application form for Standard Broadcast Stations—Number 303. The Committee then carefully examined the form, question by question, and submitted specific recommendations as to wording of questions, arrangement, and the burden of work involved in supplying answers to each by broadcast stations.

In addition to the renewal application form, the FCC had applied for approval of two engineering forms asking for quite complete engineering data. These are alternate forms, one to be completed by stations having directional antennas, the other to be used if the responding station utilizes a non-directional antenna. Howard Frazier, director of engineering of NAB, was called in to report the recommendation of the NAB engineering executive committee on the form and the broadcast sub-committee adopted the recommendation. The recommendation was one of approval of the form without change, provided its use will be confined to one-time execution by each station. Attention, however, was called to the fact that one item of engineering importance was not included in the questionnaire.

Preliminary Information Asked

The secretary cited a number of letters received from broadcast stations concerning FCC forms and the need for having some preliminary information as to the questions to be asked which involved bookkeeping or the keeping of records by the stations. An example discussed was that of the annual financial and employee data forms submitted by the FCC each year. In that connection, if the station does not have some preliminary information as to the questions to be asked, the station might encounter considerable work because the bookkeeping system employed may not readily produce the information desired. Station experience in the past has, in many cases, involved costly special studies.

Joseph L. Miller, labor relations director of NAB, was called in to speak of the industry need for labor statistics developed from the employee forms of the FCC. He appealed to the sub-committee to do what it could to assist in the matter of obtaining the information and having it made available quickly while the information is of real value to the industry.

The sub-committee decided that its executive committee should call upon the Commission to discuss these matters. Such conferences will anticipate the concern of the Budget Bureau with forms and questionnaires. However, Cohn expressed his approval of such procedure.

FCC

POST WAR PLAN NOT WORKING WELL, FLY SAYS

The post war committee plan is not working well, FCC Chairman James Lawrence Fly told a press conference early this week. He said there has been some divergence of opinion among the different branches of radio and the FCC is just sitting on the sidelines waiting for the radio industry to reach an agreement. Fly said that as far as the Commission is concerned it will cooperate in any feasible plan in undertaking the studies for post war service. The chairman said he feels it is a very essential thing to do.

SMALL MARKET STATIONS

The committee appointed to follow through on matters relating to small station operations in wartime is meeting in Washington. At the press time, the committee was yet in session. A full report of their deliberations and conclusions will be issued shortly.

Fly told the newsmen that the planning should not be done by the FCC though it should sit in on the committee, must not vote but must keep informed and render any service that it can. He said that the study must be industry controlled.

RULES AMENDED ON WAR EMERGENCY SERVICE

The FCC en banc has amended section 15.75 of its Rules Governing All Stations in the War Emergency Radio Service, to provide a two-hour test period on Mondays, Wednesdays and Sundays, and to eliminate the provision which restricts the Wednesday test period to the three-month period following the date on which the respective station license was first granted. This action was taken in order to facilitate the necessarily meticulous adjustment of equipment and antenna.

The amended section reads as follows:

> "Sec. 15.75 *Tests*—The licensees of civilian defense stations are permitted to make such tests as are necessary for the purpose of maintaining equipment, making adjustments to insure that the apparatus is in operating condition, training personnel, and perfecting methods of operating procedure, *Provided*, that such tests shall be conducted only during the following periods:

Time Zone	*Eastern*	*Central*	*Mountain*	*Pacific*
Mondays	10 p.m.-12 mid.	9-11 p.m.	8-10 p.m.	7-9 p.m.
Wednesdays	10-p.m.-12 mid.	9-11 p.m.	8-10 p.m.	7-9 p.m.
Sundays	5 p.m.- 7 p.m.	4- 6 p.m.	3- 5 p.m.	2-4 p.m.

All times given are local standard (war) time."

COMMISSIONER DURR WRITES ANOTHER LETTER

Requesting that the House Judiciary committee conduct hearings on his petition of May 13, which urged the disqualification of Rep. E. E. Cox (Dem. Ga.) as chairman of the select committee to investigate the Federal Communications Commission, Commissioner Clifford J. Durr made public a letter to Rep. Hatton W. Sumners (Dem. Texas), chairman of the judiciary committee of the House of Representatives. (Commissioner Durr's petition questioning the fitness of Representative Cox to conduct an inquiry into Commission activities, along with supporting documents, was filed with the Speaker of the House May 13 and referred to the House Judiciary Committee for consideration on May 14.)

Commissioner Durr addressed identical letters to each member of the House Judiciary Committee.

"On May 13, 1943, I filed with the Speaker of the House of Representatives a petition requesting that the House disqualify Congressman Cox as a member of the Select Committee to Investigate the Federal Communications Commission, because of his bias and personal interest. This petition was referred to the Judiciary Committee on May 14, 1943.

At the time the petition was filed I addressed a letter to each member of the Select Committee in which I called attention to certain procedures being followed by its staff which seemed to me to be highly improper, and expressed my unwillingness to testify before the Select Committee until such time as the House of Representatives, with full knowledge of the facts set forth in my petition and the supporting memorandum, should indicate its desires with reference to continuance of the investigation of the Federal Communications Commission by the Select Committee as now constituted. A copy of this letter is enclosed for your information.

There has been no substantial change in the Committee staff's procedure since the date of my petition, and examination of witnesses continues to take place behind closed doors with only Congressman Cox and members of the staff present.

I have the highest respect for Congress and its duly constituted committees and recognize that it is essential to the successful functioning of our form of government that Congress have full and complete information concerning all departments and agencies of the government. This is particularly important in time of war when the cloak of military secrecy may so easily be used to conceal activities about which Congress should be informed.

Feeling as strongly as I do about the importance of the investigatory power of Congress, I would regret being placed in a position which could be construed as one of hostility to the exercise of that power or as an indication that I have something to hide from Congress. However, I am equally strong in my reluctance to testify before the Select Committee as now constituted because I am convinced that its chairman and staff have purposes to serve which are inconsistent with a fair and impartial determination of the facts.

I believe that the facts set forth in my petition and the accompanying memorandum clearly show that Congressman Cox is not a suitable person to conduct an investigation of the Federal Communications Commission. I stand ready to prove these facts at any time, and I respectfully request that your Committee hold hearings on the petition at an early date at which I may be allowed to appear and present witnesses and documentary evidence."

EGOLF TO PRESIDE AT AFA WAR CONFERENCE

Willard D. Egolf, NAB assistant to the president and Advertising Federation of America vice-president, will preside over the conference of advertising clubs at the AFA War Conference, Waldorf-Astoria hotel, New York City, June 28-30.

This is an all-day council on local advertising club war activities which will occupy Tuesday, June 29. Egolf has served during the past year as chairman of the AFA committee on awards for club achievement.

Government and industry representatives who will speak to club representatives during this session are:

William B. Lewis, OWI; Chester LaRoche, chairman, War Advertising Council; Paul H. Bolton, chief, campaign section, ODT; Edwin A. Sheridan, special adviser to James M. Landis, OCD; Ralph Allum, associate director, War Advertising Council; and Frank Tripp, general manager, Gannett Newspapers, and chairman of the bureau of advertising, ANPA. Past club activities and closer tie-in with government campaigns will be emphasized.

NAB REPORTS TO NATIONAL ENTERTAINMENT CONFERENCE ON RADIO'S WAR SERVICE

Representing NAB, Walt Dennis, news bureau chief, attended the two-day National Conference of the Entertainment Industry for War Activities in New York, June 3-4, and reported on "What Radio Is Doing in the War."

Some 300 delegates, representing more than 35 organizations directly or indirectly connected with the entertainment field, met in three sessions at New York Times Hall and agreed on a two-fold program.

One aim is to assemble a national talent pool of actors, writers, cameramen, stagehands, radio talent both technical and performing, stagehands, composers, directors, producers, scenic artists, etc., out of which individuals could be "drafted" as needed and reimbursed from a central

We Want Local Station Promotion Material on Radio in the War!

NAB has a booth at the Advertising Federation of America War Advertising Conference, Waldorf-Astoria Hotel, New York City, June 28-30. A large display piece entitled "Radio in the War" is being prepared, picturing the information contained in the recent Special Information Bulletin sent out from NAB headquarters under the same title. Help us amplify this display. Send us at once your local brochures and promotion pieces covering your local activities for the war. Send at least a dozen copies of each piece, if possible, for give-away purposes. Address them to Arthur Stringer, director of promotion and circulation, NAB 1760 N Street, N. W., Washington 6, D. C. RUSH.

fund—all efforts to be voluntary so far as registration in the pool is concerned.

The other was to establish a national conference board with permanent control over the entertainment program. Staff work would be administered by a small, salaried unit in charge of routine.

The NAB participation received tribute from Jean Hersholt, who also reported on radio's place in the war entertainment and information picture. Dennis' report covered all phases of radio work, including technical, government, home front and shortwave overseas in the information and entertainment fields and the radar and other sonic fields of military action.

Neville Miller was named to a "continuations committee" to formulate and carry on the program until the conference board was chosen. Miller designated Dennis to act for him in the conference meetings and the NAB news chief was named to a subcommittee of seven persons to draw up plans to be submitted to the continuations committee Thursday, June 10.

"What Radio Is Doing in the War" is enclosed as a special bulletin with these REPORTS.

RADIO NEWS STYLE BOOK

A handy little "Radio News Style Book" for radio news editors and rewrite men has been published by the United Press Associations. Written by Phil Newsome, U.P. radio news manager, the booklet is not a textbook, but assumes the reader is already experienced in writing "newspaper" news and carries the material a step further to writing the news for radio. Copies may be obtained from any U.P. bureau for 75 cents.

Labor

Within the next week NAB will mail to all members a new publication of the labor relations department entitled "Decisions of the National Labor Relations Board Affecting Radio Broadcasting Stations."

Describing the booklet, Joseph L. Miller, director of labor relations, said:

"The National Labor Relations Board, charged with enforcement of the Wagner Act, issues two types of decisions:

"(1) Those involving determination of the 'appropriate unit' for collective bargaining, elections and certifications.

"(2) Those involving charges that employers have violated the 'unfair labor practice' provisions of the Act.

"Frequently NAB receives requests for copies of decisions of the first type. They are often invaluable when an issue arises as to an 'appropriate unit' for collective bargaining. Separate copies of these decisions are becoming rare. Radio broadcasting cases, along with those affecting other industries, are bound together in a series of volumes now numbering forty-eight, on sale by the government printing office. To meet the requests it receives, the NAB has collected the *texts* of all 'representation' cases affecting radio into part one of this volume. Part two contains a *list* of all radio broadcasting decisions involving alleged unfair labor practices."

ADVERTISING COUNCIL BECOMES 'WAR ADVERTISING COUNCIL'

To describe more accurately the nature of its work the Advertising Council will hereafter be known as the War Advertising Council, Chester J. LaRoche, Young & Rubicain, chairman, has announced.

In reviewing the first year's work of the council, LaRoche said that advertisers and media contributed better than $250,000,000 worth of time, space, etc., in the interest of public information. He said the job is getting bigger and that by the end of 1943 the annual contribution should be at the rate of half a billion dollars.

The council shortly will launch a concerted drive with the slogan "A War Message in Every Ad," LaRoche said.

LaRoche has been re-elected WAC chairman for the coming year. Other officers are: Harold B. Thomas, Centaur Co., and Paul B. West, ANA, vice chairmen; Mason Britton, McGraw-Hill Publishing Co., treasurer; Frederic R. Gamble, AAAA, secretary, and the following directors: A. L. Billingsley, Fuller & Smith & Ross; Thomas D'A Brophy, Kenyon & Eckhardt; A. O. Buckingham, Cluett, Peabody Co.; Richard Compton, Compton Advertising; Edwin S. Friendly, New York Sun, and Kerwin H. Funton, Outdoor Advertising, Inc.

Other directors are: Kolin Hager, WGY; Carleton Healy, Hiram Walker, Inc.; Paul Kesten, CBS; Charles G. Mortimer, Jr., General Foods Corp.; Stuart Peabody, Borden Company; William Reydel, Newell-Emmett Co.; H. W. Roden, Harold H. Clapp, Inc.; A. E. Winger, Crowell-Collier Publishing Co., and James W. Young, J. Walter Thompson Co.

LaRoche, West, Thomas, Britton and Gamble also are directors.

WEEI SOUND EFFECTS EXPERT IS 'NOISIEST BOSTON GIRL'

After several newspapers, including the *Christian Science Monitor*, have given her a build-up, the NAB REPORTS takes this opportunity to put in a word about radio's only girl sound effects manager—Marjorie Ochs of WEEI.

In addition to her noisy duties (*The Boston Herald* calls her the "noisiest girl in Boston") Marjorie is chief of the transcription department and sound consultant for the Arlington Civilian Defense Corps.

WEEI's sound effects expert is—ah—21, blue-eyed and weighs only 98 pounds. She got her first radio job by out-cussing a station manager who bumped into her in a hotel corridor and got her present job by bumping into WEEI's Lloyd G. del Castillo during a hobby-horse race in a Springfield, Mass., night spot.

Engineering

'MR' TUBES FOR CIVILIAN USE EXCLUSIVELY

To insure that radio tubes for home sets actually reach radio repairmen and home set owners, the War Production Board has amended limitation order L-265.

Tubes made from materials allocated to civilian production have frequently been purchased by the Armed Services on rated orders, thus depleting the supply available for home sets. Tube manufacturers have been requested to stamp civilian tubes "MR," meaning "maintenance and repair." The amendment prohibits domestic transfer of such tubes to orders of the Armed Services carrying preference ratings. Civilian orders which need no ratings are filed by manufacturers on certification that the tubes being purchased replace worn out tubes in home sets.

This order should tend to alleviate the present shortage of receiver tubes if MR tubes are produced in sufficient quantities. WPB cautioned that current production of civilian tubes is low and that requirements for some types are not being met by present production schedules.

G.E. ON POST-WAR RADIO

"Will secret war developments in radio and radar bring revolutionary changes in broadcast transmitters after the war?" is a question frequently heard. Concerning this question one manufacturer of broadcast equipment, General Electric Company, has this to say in a recent release.

"Our answer is, 'definitely no!' War developments undoubtedly will bring improvements in broadcast transmitters, FM, AM, and television, but we foresee no RADICAL changes that will prematurely render present equipment obsolete.

"What we do anticipate in the field of post-war broadcasting is the replacement by FM stations of many low-powered AM stations which are now handicapped by interference and inadequate signal strength. This probably will mean higher power and more clear channels for the remaining AM stations.

"We expect television broadcasting to develop rapidly after the war, along with FM radio broadcasting. Manufacturing experience gained in the production of electronic equipment for war will undoubtedly result in lower-priced television receivers after the war and this, plus public demand, should accelerate the expansion of television service.

"After the war, we expect to continue to build all types of transmitters—FM, AM, television—together with auxiliary equipment and such devices as the magnetic wire recorder which you may have seen at the Chicago meeting."

Post-war developments are of vital concern to all broadcasters. Expressions of opinion on this subject are invited from other manufacturers.

IRE IS OPPOSED TO KILGORE-PATMAN BILLS

The board of directors of the Institute of Radio Engineers has taken a position against the enactment of the Kilgore-Patman bills (S. 702 and H. R. 2100) for the socialization of engineering. At its meeting June 2 the board adopted a resolution condemning, as dangerous to the War, the proposed creation of a federal office of Scientific and Technical Mobilization to mobilize the scientific and technical resources of the nation.

"The enactment of these bills," the board said, "would establish a post-war bureaucracy inimical to the best interests of scientific and technical progress and thus also to these United States."

ELECTRICAL INDICATING INSTRUMENT STANDARDIZATION MAY UP OUTPUT BY 10%

The standardization of electrical indicating instruments used primarily in military radio and radar is encouraged by a WPB amendment to limitation order L-203. The amended order is expected to raise output 10%.

The amendment permits manufacturers to accept without preliminary WPB approval purchase orders for less than 500 instruments which conform to standards published by the American Standards Association or to specifications of the armed forces. Automatic approval also is given on orders for less than 500 instruments any dimension of which exceeds 3½ inches and on orders for any number of polarized van non-jeweled instruments, the most familiar of which is the ammeter on an automobile dashboard.

Instruments governed by L-203 are re-defined to exclude portable instruments which measure more than one electrical quantity. The definition thereby differentiates between "meters" administered under L-203 and "test equipment" covered by general scheduling order M-293. Before it was amended, L-203 gave automatic approval based upon end use in the war program to standard purchase orders. The effect was to require specific approval of orders calling for small numbers of instruments and to approve automatically those calling for large quantities. The amendment shifts control to large orders and to orders for non-standard instruments.

The control of orders for large quantities is expected to facilitate balancing of the flow of orders with productive capacity. On the other hand, the release of small orders from such supervision will make it easier to fill those that are urgently required, since these are generally for small amounts.

60 STATIONS LISTED BY NAB AS EMPLOYING WOMEN TECHNICIANS

At least 60 stations located in 29 states and Alaska employ women technicians.

These are statistics resulting from the count of material received to date for inclusion in the forthcoming NAB brochure on woman-power in radio technical fields.

Material from stations, received since last week's NAB REPORTS, is acknowledged with thanks from the following:

KINY—Juneau; KARK—Little Rock; KIEM—Eureka; WRUF—Gainesville; WMBR—Jacksonville; WRBL—Columbus; WMBI—Chicago; KICD—Spencer; WAVE—Louisville; WTAG—Worcester; KGNF—North Platt; WAGE—Syracuse; WWNC—Asheville; WBIG—Greensboro; WSJS—Winston-Salem; WHBC—Canton; WGAR—Cleveland; KOCY—Oklahoma City; KTOK—Oklahoma City; KWIL—Albany; KOOS—Marshfield; WNAX—Yankton; WKPT—Kingsport; KRIS—Corpus Christi; WBAP-KGKO—Fort Worth; WLVA—Lynchburg; WTAR—Norfolk; WCHS—Charleston; KFBC—Cheyenne.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 14th. They are subject to change.

Monday, June 14

To Be Held in County Court House, Lufkin, Texas

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-Partners, d/b as Red Lands Broadcasting Ass'n, Lufkin, Texas.—Renewal of license, **1340 kc.,** 250 watts, unlimited.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-Partners, d/b as Red Lands Broadcasting Ass'n, (Assignor).—Voluntary assignment of license, **1340 kc.,** 250 watts, unlimited.

Tuesday, June 15

KMTR—KMTR Radio Corporation, Los Angeles, Calif.—Renewal of license, **570 kc.**, 1 KW, unlimited.

Wednesday, June 16

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Renewal of license, **1150 kc.**, 500 watts, DA-night, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted license (B2-L-1767) to cover construction permit (B2-P-2547) as modified, provided licensee make such alterations in the antenna and ground system when materials become available as may be necessary to produce a minimum effective field of 175 mv/m, together with other engineering requirements. Also granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1525)

WKZO—WKZO, Inc., Kalamazoo, Mich.—Granted modification of license (B2-ML-1156) to change time when directional antenna is used to: from 5 p. m. to 9 a. m., CST, instead of local sunset to local sunrise.

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Granted renewal of license for the regular period (B1-R-1119); Blue Network Company, Inc.—Granted extension of authority to transmit programs to Stations CFCF and CBL and Canadian Broadcasting Corp. (B1-FP-109)

ACTION IN DOCKET CASES

The Commission has adopted an order making final its Proposed Findings of Fact and Conclusions (B-178), extending for a period of six months from April 21, 1943, or until October 21, 1943, the outstanding temporary licenses for the operation of Stations WDSU, New Orleans, La., WMIS, Natchez, Miss., and WGRM, Greenwood, Miss.

MISCELLANEOUS

WSAZ—WSAZ, Inc.—Granted license to cover construction permit as modified for new transmitter, directional antenna for night use, change in frequency, hours and move of transmitter (B2-L-1590); granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1327)

KXO—Valradio, Inc., El Centro, Calif.—Granted authority to determine operating power by direct measurement of antenna power. (B5-Z-1522)

WNAX—WNAX Broadcasting Co., Yankton, S. D.—Granted modification of construction permit as modified, for increase in power and directional antenna for night use, for extension of completion date from June 7 to September 7, 1943. (B4-MP-1713)

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted modification of construction permit as modified, for change in hours, installation of directional antenna for night use and move of transmitter, for extension of completion date from May 18 to November 18, 1943. (B4-MP-1711)

Beauford H. Jester, Trustee, et al., Waco, Texas.—Scheduled for oral argument on June 23, 1943, in re application for construction permit for a new standard broadcast station. (Docket No. 6218; B-176)

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Scheduled for oral argument on June 23, 1943, in re application for construction permit to make changes in directional antenna for nighttime use, to make changes in transmitting equipment, and to increase power from 500 watts to 1 KW. (Docket No. 6366; B-169)

KOA—National Broadcasting Co., Inc., Denver, Colo.—Denied petition of KOA for postponement of hearing and the motion of WJW, Inc., to dismiss petition for rehearing, upon the application of WHDH, Boston, for construction permit, and WJW, Akron, Ohio, for modification of construction permit, until cessation of hostilities.

W8XO—The Crosley Corp., Cincinnati, Ohio.—Denied petition for rehearing directed against the action of the Commission May 4, 1943, denying the Crosley petition to dismiss without prejudice its application for renewal of license for station W8XO.

APPLICATIONS FILED AT FCC

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Modification of construction permit (B1-P-2868, as modified, which authorized increase in power, installation of new equipment and directional antenna for day and night use) for extension of completion date from 6-11-43 to 8-11-43.

1450 Kilocycles

KFMB—Worcester Broadcasting Corp., San Diego, Calif.—Voluntary transfer of control of licensee corporation from Warren B. Worcester, Deceased, to The First National Trust & Savings Bank of San Diego, as Trustee under Declaration of Trust for Warren B. Worcester. Amended: re trust agreement.

1490 Kilocycles

WKBV—Knox Radio Corporation, Richmond, Ind.—Transfer of control of licensee corporation from William O. Knox to Central Broadcasting Corporation (1000 shares). Amended: re stockholders of transferee corporation.

FM APPLICATION

W49D—John Lord Booth, Detroit, Mich.—License to cover construction permit (B2-PH-20, as modified, which authorized new high frequency broadcast station) in part.

TELEVISION APPLICATIONS

W2XCB—Columbia Broadcasting System, Inc., Area of New York, N. Y.—Modification of construction permit (B1-PVB-46, as modified, which authorized a new television relay station) for extension of completion date from 7-7-43 to 1-7-44.

W9XBK—Balaban & Katz Corp., Chicago, Ill.—License to cover construction permit (B4-PVB-94) for new experimental television broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Anti-Hydro Waterproofing Co., 265 Badger Ave., Newark, N. J., is charged in a complaint with misrepresentation in the sale of compounds used for treating stone, brick and cement structures so as to make them more resistant to water. Two of the compounds involved are manufactured by the respondent and are designated "Anti-Hydro" and "Aridclear." The respondent sells other compounds known as "Aridtite" and "Amurseal," which are manufactured for it. (4975)

Belt Oil & Chemical Corp., 1265 Broadway, New York, and Overman & Co., a copartnership at 9 Rockefeller Plaza, New York, are charged in a complaint with falsely representing that the product they sell under the name "Rubber-Life" is capable of prolonging the life of automobile tires. (4973)

Ben Kalish, 330 Seventh Avenue, New York, manufacturer of furs and fur garments, is charged in a complaint with misrepresentation in connection with the sale of his products. (4974)

Kenite Laboratory, Inc., 83 Murray St., New York, is charged in a complaint with misrepresentation in the sale of a product called "Kek," recommended as a boiler cleaner and steam conditioner. (4976)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

National Association of Sanitary Milk Bottle Closure Manufacturers, Philadelphia, its officers and six member manufacturers have been ordered to cease and desist from entering into or carrying out any combinations or agreements to fix prices or to otherwise restrict competition in the sale of closure milk bottle caps direct to dairies or through jobbers.

Manufacturers named in the order are: American Seal-Kap Corp., Long Island City, N. Y.; Cowdrey Products Co., Inc., Fitchburg, Mass.; Mid-West Bottle Cap Co., Belvidere, Ill.; Sealright Co., Inc., Fulton, N. Y.; Smith-Lee Co., Inc., Oneida, N. Y., and Standard Cap & Seal Corp., Chicago.

Respondent officers of the Association are: Stanley Dennis, chairman; George J. Lincoln, Jr., manager; and Daniel A. Mackin, Harvey M. Smith and Jarvis Williams, Jr., members of the executive committee. (4565)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Cleanette Products Co., French and Winter Sts., N. W., Cleveland, Ohio, and National Solvent Corp., 3751 Jennings Road, Cleveland, Ohio, have entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of a cleaning preparation designated "Cleanette." The preparation is alleged to be a petroleum distillate of a naphtha compound prepared for Frantz by National Solvent Corp. (3663)

Crawford Mfg. Co., Inc., et al.—Three corporations and two copartnerships engaged in the sale and distribution of canvas goods have entered into stipulations to discontinue misbranding tarpaulins as to size.

The respective agreements to cease and desist were entered into by Crawford Manufacturing Co., Inc., 3rd and Decatur Sts., Richmond, Va.; Crawford-Austin Manufacturing Co., 3rd and Jackson Sts., Waco, Tex.; V. M. Goldberg, R. P. Goldberg, B. P. Goldberg, F. D. Goldberg, and W. H. Goldberg, copartners, trading as Hoosier Tarpaulin & Canvas Goods Co., 1302 W. Washington St., Indianapolis; Fulton Bag & Cotton Mills, Atlanta, Ga.; and A. T. Clifton and A. L. Clifton, copartners trading as Clifton Manufacturing Co., Waco, Tex. (3658-3662, inc.)

Gly-Cas Medicine Co., 537 Johnson Block, Muncie, Ind., engaged in selling a laxative designated "Gly-Cas," stipulated that she will cease and desist from disseminating any advertisements which fail to reveal that the products should not be used when abdominal pains, nausea or other symptoms of appendicitis are present, provided, however, that such advertisements need only contain the statement, "CAUTION: USE ONLY AS DIRECTED," if and when the directions for use on the label or in the labeling contain a warning statement to the same effect. (03113)

Peter Grey's Laboratories and as Peter Grey, Inc., 2029 13th Ave., Oakland, Calif., engaged in the sale and distribution of phonograph needles designated "Kacti," stipulated that it will cease and desist from the use of any representation that its phonograph needles will cause records to last forever, cause records to improve each month of their use, or cause a restoration of records whose sound-vibration mechanism has become damaged through the use of metallic or other needles. (3664)

Harvest House, 50 West 17th St., New York, selling and distributing a book designated "Complete Guide for the Deafened," has entered into a stipulation in which it agrees to cease representing that the book contains directions of such nature that merely by following them the sense of hearing will be improved, saved or restored; or that it contains directions of such nature that they can be followed without assistance or direction by a person in the treatment of defective voice or speech. (03112)

Hershey Mfg. Co., 135 South La Salle St., Chicago, selling and distributing an electrically driven device for use on the hair and scalp, designated "Vita-brush," and George J. Kirkgasser and Leslie A. Drew, trading as Kirkgasser-Drew, 400 North Michigan Ave., Chicago, advertising agents who disseminated advertisements for Hershey Mfg. Co., have stipulated to cease and desist representing that the device will check or prevent falling hair or baldness; that its use will restore life to dead hair; that it will serve to prevent or ward off dandruff; that it is the secret of healthy hair or the answer to hair worries; that it will be of value in the treatment of headaches which have a circulatory origin; or that it possesses any value in the treatment or prevention of head colds or congestion, will relieve nervous insomnia, insure a good night's sleep, or cause the hair to grow thicker. (03111)

United Textile & Silk Co., 509 Fifth Ave., New York, engaged in the sale of men's ready-made shirts, has stipulated to cease and desist from the use of the words "custom made" to describe its products, and to discontinue making any representation which may tend to convey the belief that such shirts are custom made, made to order or to measure, or that they are other than ready-made shirts. (3665)

FTC COMPLAINT DISMISSED

The Federal Trade Commission has dismissed without prejudice its complaint against Pacific Coast Paper Mills, Inc., Bellingham, Wash., which had been charged with misrepresentation in connection with the sale of toilet tissues and paper napkins.

Music

REFER PETRILLO RECORD BAN TO CONCILIATION SERVICE

The electrical transcription companies have referred to the conciliation service of the Department of Labor James C. Petrillo's demand that the electrical transcription companies prevent use of both commercial and library transcriptions by stations which were not deemed, by the A. F. of M., to be hiring a quota of union musicians satisfactory to the union. The statements to the press of the transcription companies and the NAB are printed as part of this bulletin.

Petrillo's demand is one which has implications of the first importance. If the manufacturers of machines are to be made responsible by labor unions for preventing their use by anyone who does not maintain a quota of unneeded hand labor, our American progress, which has been based on science and invention, will be permanently frustrated. It goes without saying that the NAB approves the reference of this demand by the transcription companies to the agency set up by our government for handling such disputes.

If conciliation does not result promptly in clearing up the matter (and there has thus far been no indication that it will), it is to be hoped there will be a prompt certification of the dispute to the War Labor Board so that union musicians can be returned to work in the national interest.

TRANSCRIPTION GROUP STATEMENT

A. Walter Socolow, 580 Fifth Avenue, Bryant 9-7966, Attorney, speaking on behalf of the following companies:

ASSOCIATED MUSIC PUBLISHERS, INC.
EMPIRE BROADCASTING CORPORATION
LANG-WORTH FEATURE PROGRAMS, INC.
C. P. MacGREGOR
RADIO RECORDING DIVISION OF NATIONAL BROADCASTING COMPANY, INC.
STANDARD RADIO
WORLD BROADCASTING SYSTEM, INC.

"Dr. John R. Steelman, director of the conciliation service of the Department of Labor, has been requested to mediate the American Federation of Musicians' strike against music transcription companies. (These companies produce electrical transcriptions which are recordings made specially for broadcasting and are completely different from ordinary phonograph records sold to the public.)

"The strike was called by James C. Petrillo, President of the Musicians' Union, on August 1st last, but the union did not submit any demands until February, 1943, and then only at the request of a special Senate committee headed by Senator D. Worth Clark of Idaho. Dr. Steelman designated a member of his staff, James William Fitzpatrick, of New York City, an expert in theatrical matters, as his representative to mediate this strike.

"The union first asked the transcription companies to pay into the union treasury an unspecified percentage of their total gross receipts in addition to the musicians' regular wage scale, which demand was rejected. Negotiations continued until May 11th, when the union made a new demand that the electrical transcription companies agree not to furnish transcriptions to broadcasting stations which the union in its sole discretion branded as "unfair". This demand was rejected by the employers because it is impossible for them to control the use of their transcriptions by advertisers and radio stations and the fulfillment of the demands would give the union veto power over the use of transcriptions, resulting in secondary boycotts against the broadcasters.

"The transcription companies point out that the union wants to prevent the use of transcriptions unless it can force the hiring of an additional quota of musicians by the stations. Electrical transcriptions are used by all stations and constitute an economic necessity to many of the independent and smaller broadcasting stations in the country to enable them to offer programs of high quality in their service of the public interest. Commercial transcriptions are recorded programs and furnish the stations with advertising revenue. Library transcriptions are recordings of music by outstanding artists syndicated amongst radio stations throughout the country.

"The breakdown of negotiations with the union made it imperative for the transcription companies to refer their dispute to the Federal Government for prompt disposition in the hope that governmental intervention would bring about a resumption of their service to the hundreds of broadcasting stations which are dependent upon transcriptions as the source of supply for music to which their audiences are entitled and have become accustomed."

NEVILLE MILLER'S STATEMENT

Neville Miller, president of the National Association of Broadcasters, today issued the following statement with respect to the action of the electrical transcription companies in referring the latest demands of James C. Petrillo to the conciliation service of the Department of Labor:

"Mr. Petrillo's latest demand upon the manufacturers of electrical transcriptions is the most startling in a long series of unjustified demands. In seeking to require the manufacturer of a long established and necessary invention to forbid its use by anyone who does not employ an artificial allotment of union members, Mr. Petrillo is attempting to establish a principle which conflicts with all progress and invention.

"The electrical transcription renders an indispensable service in bringing entertainment to radio listeners, especially listeners to local broadcasting stations not affiliated with networks. The National Association of Broadcasters, therefore, welcomes the action of the electrical transcription companies in referring Mr. Petrillo's demands to the conciliation service of the Department of Labor.

"Mr. Petrillo's claim would, of course, be equally unwarranted if, for instance, it called upon the manufacturers of ready made clothing to require their customers to hire a quota of custom tailors, or demanded that the

NEVILLE MILLER'S STATEMENT

(Continued from page 275)

telephone company require businesses which use telephones to maintain a quota of messengers, or was applied to any other business or group of union members. It is worth pointing out, nevertheless, that electrical transcriptions, which are used exclusively by broadcasting stations, do not interfere with the employment of musicians by broadcasters. Musicians earn from radio approximately twenty million dollars a year, more than any other class of employees, and broadcasters pay to musicians an average wage of $67.90 a week for an average work-week of approximately twenty hours. Moreover, there is virtually no unemployment in Mr. Petrillo's union and Mr. Petrillo, himself, has admitted that there is such a shortage of musicians that his union cannot fill even the normal needs of broadcasting stations.

"The broadcasting industry, so vitally necessary to wartime communications and morale, has not, due to Mr. Petrillo's action, been able to obtain freshly recorded music since last August. Mr. Petrillo has, therefore, deprived radio listeners of the legitimate benefits of a well established invention at a time when musical entertainment is most needed both by our armed forces and our civilian population, and he is trying to compel broadcasters to hire men they do not need at a time when serious manpower shortages exist in war industry."

Broadcast Advertising

SMALL STATIONS COMMITTEE GIVES OWI SOME ADVICE

(Released by NAB News Bureau)

"Radio stations in general and small market stations in particular have given more free time and talent, in proportion to their available facilities, than any other medium in furtherance of war information campaigns," Marshall H. Pengra, KRNR, chairman of the NAB small market stations committee, declared following a two-day meeting at the Mayflower Hotel.

"We feel that it is time," Pengra added, "for the Office of War Information to cease its discrimination against radio and for private industry to bear its fair share of distributing essential information to the public on a paid advertising basis."

Radio stations repeatedly have carried campaigns urging the public "don't telephone," "don't ride on busses," "buy coal new," "eat more oranges, lemons and tangerines," "turn in your bottle caps," "save tin cans," "take your shotguns and rifles to Western Auto Stores," etc., Pengra pointed out. At the same time, private industries that stood to benefit most from these campaigns have used large quantities of paid space in other media, he said.

NAB Loses Two Staff Veterans

Two veteran members of the NAB administrative staff have left as of today to enter the armed services.

Everett E. Revercomb, auditor, who came to NAB in September, 1935, and who was the staff's senior member in point of length of service, has received a commission as ensign in the Naval Communications Division.

Russell P. Place, NAB counsel since November, 1939, enters the Office of Strategic Services.

No replacements have been obtained to date.

The committee, while recognizing that all these objectives are a part of the "all-out" war effort, expressed the belief that OWI should make certain that the private industries involved in future campaigns shall have made reasonable and widespread use of radio station facilities on a paid basis before the government requests free time.

Manpower Situation Is Acute

Before attending the meeting, committee members had queried other small station managers in their areas and urged them to report on their problems. Without exception, both committee members and station men queried, agreed that the manpower situation is most acute at the small market stations, principally because the three or four key personnel often "double in brass" to the extent of holding down several jobs simultaneously.

Committeeman William B. Smullin, KIEM, urged a resolution requesting the War Manpower Commission to recognize the vital war service of small stations by permitting that such stations be allowed to keep key personnel to continue operation without interruption.

Smullin said many small stations have had more than 100 percent personnel turnover within the last year to the armed forces. He declared that small stations long have served as preparatory schools for larger stations and network personnel, but added that the source of new material had dried up under operation of Selective Service. Every small station of which the committee has knowledge is now employing women technicians and announcers as well as in other office capacities.

Urge OWI "Investigate"

Aware that OWI and other agencies and departments of the government have and are continuing to prepare newspaper advertisements in mat form, utilizing well-known artists and typographers, the committee called on the government and emphasized this discrimination against radio by pointing out that the announcements and programs prepared by OWI were not available for sponsorship by local or other advertisers. The committee urged OWI to investigate this situation and take necessary steps quickly to make such government messages available for sale to advertisers anxious to contribute to programs of war information.

As an exception to this indictment of government agencies and departments for discrimination against radio, the Department of the Interior was commended in an expression of sincere thanks by the committee for preparation of announcements and programs in connection with the "buy coal now campaign", which asked fuel merchants to sponsor paid radio time.

Following an extended discussion of the Bankhead bill (S. 1073), which would establish an advertising fund of about $30,000,000 for newspapers in support of war bond and stamp sales and for other purposes, the committee objected to use of government funds for paid advertising and deplored this further evidence of discrimination against radio. The committee felt that should the bill pass, funds proposed should be distributed among all mass communications media in proportion to use of such media by private industry. Moreover, the committee suggested appointment of an advisory committee to work with the Secretary of the Treasury in allocation of advertising funds.

Three Basic Difficulties Cited

It recommends that such committee consist of a representative of each of the leading media associations, such as NAB, bureau of advertising of ANPA, Outdoor Advertising Association of America, Inc., etc.

After examining the many problems reported by the small market stations, the committee reported three basic difficulties existing: 1. Lack of new revenue, 2. Lack of manpower, and 3. Full exploitation of small market potentials. On the first point the committee has authorized a study of the possibility of group selling of all small market stations. In this study the committee tentatively is grouping all stations in communities of 50,000 or less population. The second point must be worked out in relation with the WMC. Thirdly, the committee concluded that all small market stations should work harder to keep their programming keyed to their community tempo and to avoid any reduction of program standards. It urged small stations to utilize the services of NAB more fully than they have in the past and to investigate all fixed operating costs in order that they may serve the public more effectively.

Other committee members attending in addition to those named were: James R. Curtis, KFRO; Robert T. Mason, WMRN; and Lewis H. Avery, NAB, secretary of the committee. Government and military officials were guests at the second day luncheon session.

(Please note change of committee name from "small stations problems steering" to name as in story.)

C. E. HOOPER WILL SPEAK AT AFA WAR CONFERENCE

A definite acceptance has been received from C. E. Hooper, of "Hooperatings" fame, to deliver a talk at the radio meeting, to be held in conjunction with the AFA War Conference at the Waldorf-Astoria in New York on Wednesday, June 30, 1943. Hooper will discuss "How People Listen During Wartime," using charts and graphs, delineating trends in listening during the 18 months of war.

Much of the factual information in the talk will be of especial interest to radio station operators, advertising agencies and advertisers. It will point a trend in which broadcasters can take real pride and one which they should take every means at their command to protect. The increased importance of broadcasting as a means of mass communication will be demonstrated graphically.

Education

SUMMER BRINGS NEWS OF RADIO WORKSHOPS

NBC-Northwestern University

June 21–July 31

Second annual summer radio institute to be offered by NBC and Northwestern University will be held on the university campus and at NBC's Chicago studios with emphasis on training women as well as men for replacement on small station staffs, where the broadcasting manpower shortage is most acute.

Albert Crews, institute director and chairman of the Northwestern school of speech radio department, heads the faculty, which is composed of six NBC staff members and two university faculty members.

Crews will teach continuity and advanced dramatic writing, while Lois Crews, also of the school of speech, will instruct in announcing together with William Kephart, chief of the NBC central division announcing staff.

Other NBC instructors and their courses are: Arthur Jacobson, radio acting; Martin Magner, problems in radio acting; Charles C. Urquhart, directing techniques; Judith Waller (institute co-director), public service programs, and Beverly F. Fredendall, control room techniques.

Six seminars will be held in connection with the institute and the following speakers will address them: Clarence L. Menser, NBC program vice-president; Philip H. Cohen, Office of War Information; John J. Louis, Needham, Louis and Brorby, Inc., vice-president; Herbert Hollister, KANS owner; Wynn Wright, NBC eastern production director, and Clifton Utley, news commentator.

Nine guest instructors will supplement Miss Waller's teaching in the public service program class sessions. They are: Joseph A. McDonald, NBC central division counsel; William Weddell, NBC central division sales; Sherman Dryer, University of Chicago radio director; Everett Mitchell, NBC farm commentator; William Ray, NBC central division news manager; Harriet Hester; Emmons C. Carlson, NBC central division advertising and sales promotion manager; John F. Ryan, NBC central division publicity manager, and A. W. Kaney, NBC central division stations relations manager.

New York University

July 6–Aug. 13

Robert J. Landry, CBS program writing director, has been appointed director of the annual New York University summer radio workshop, which will be devoted principally to problems of radio broadcasting in wartime.

The faculty will include: Earle L. McGill, CBS casting director; A. Murray Dyer, CBS script writer; Leon Goldstein, WMCA war program director; Luella Hoskins, workshop assistant director, and Burton Paulu, WLB manager.

Courses, to be supplemented by field trips to studios and lectures by outstanding radio personalities, will include: the American system of broadcasting, principles of direction, script writing, radio in wartime, radio in schools, planning and executing musical broadcasts, radio station news and publicity management and studio production.

Hofstra College
July 6-23

Max U. Bildersee, radio supervisor, bureau of radio and visual aids, New York state education department, will conduct a workshop in "Audio Education" at Hofstra college as part of the annual summer sessions at Hempstead, Long Island, N. Y. The course consists of "organization, preparation and administration of a program of audio-education in the elementary and secondary schools of the college's service area; coordination of community and public school facilities."

SPRINGFIELD RADIO COUNCIL ELECTS 1943-44 OFFICERS

The Pioneer Radio Council of Springfield, Mass., has named Mrs. Raymond E. Kilty, club woman, as president for the coming year. Other officers are: Margaret Taylor, teacher, first vice-president; Mrs. Frank O. Fehm, PTA member, second vice-president; Lindsay H. Chilson, YMCA secretary, treasurer; Mrs. Harry A. Oltach, musician, corresponding secretary, and Mrs. Ralph T. Williams, teacher and club woman, recording secretary.

MAJOR AMERICAN PROPAGANDA OUTLET TO BE CROSLEY WLWO

Transmitters with a total of 750,000 watts are being installed by the Crosley Corporation at Cincinnati to operate through WLWO as the most powerful instrument of propaganda in the world, Crosley officials have revealed.

Larger than the present Moscow station, the expanded WLWO will continue to channel material piped in from the overseas branch of the Office of War Information in New York. News is now given at 15-minute intervals in all major languages.

When other major transmitters now planned augment WLWO enough power will be generated by American short-wave stations to "knock a radio set off the shelf in Italy, Germany or Japan."

Operating under an experimental license permitting 500 kilowatts, WLWO smothered the Moscow station's offerings as close as 50 miles to the Russian capital, Crosley officials said.

CODE MEETING

The NAB code compliance committee meeting is in session in New York as this issue of the Reports goes to press. A complete report will be issued NAB members in a special bulletin next week.

KFPW RECEIVES ACCLAIM FOR SERVICE DURING FLOOD

In recognition of the part KFPW, Fort Smith, Ark., played in saving life and property during the recent Mississippi flood, General Manager J. E. Garner has received letters of appreciation from the Red Cross and the weather bureau of the U. S. Department of Commerce.

Wrote Tom Wolff, head, radio section, midwestern area, Red Cross, St. Louis:

"May I take this opportunity to express the appreciation of the Red Cross for the excellent job your station did on the flood. Normal Durfree, who directed relief operations there, told me that without the assistance of your station, without the CAP and the Army, the loss of life in the flood would have been 'unbelievable.' Nearly every evacuee I talked with had time to get off his land before the waters reached it because he had heard directions from your station.

"One worker told me the story of Arbuckle Island in which the people there were informed by your station when to expect food, clothing, etc. Another Red Cross worker told me of the splendid job you did in gathering clothing for the evacuees. At 10:00 o'clock in the morning your station announced that the Red Cross would need clothing. At 11:00 o'clock it was announced where the clothing could be taken. Immediately bundles of clothing began pouring in and before 1:00 p. m. evacuees were being issued complete clean outfits.

"The humanitarian job, the public service your station has done in this flood is one which deserves national recognition, one which, to my knowledge, is among the best in the entire history of radio."

Said A. E. Osborn, meteorologist, U. S. Department of Commerce, weather bureau, Fort Smith, Ark.: "Your facilities and your untiring work and wholehearted interest in flood warnings saved this community many thousands of dollars and possibly many lives."

KOA WAR PROMOTION PIECE

James R. MacPherson, KOA, Denver, has just released a piece which illustrates and describes how that station is fulfilling its wartime obligations.

The pamphlet is newspaper size and contains pictures, front and back. The inside is printed in red and black and contains reproductions of newspaper clippings and photos dealing with promotions, including: recruitment of nurses and nurses' aides for the Red Cross, Colorado's Second War Loan drive and the KOA music center for enlisted men.

FEDERAL COMMUNICATIONS COMMISSION

FLY SAYS NETWORK RULES REACH "HAPPY RESULT"

The rough spots of the new network regulations of the FCC have been ironed out and Chairman James Lawrence Fly predicted at his press conference last Monday that the new rules will operate smoothly. He expressed the regulations as reaching a "happy result."

Fly told the news men that the FCC does not contemplate any further network rules. He said, however, that the Commission will not oppose any healthy competition in the broadcast industry and no effort will be made to hamper any competition under the rules. He said that these regulations were not designed for a sporadic raid on the industry. He expressed surprise that there should be talk of any super-network set up. While he said there is nothing in the rules to prevent such a combination, he did not see how it could be worked out on any feasible operating basis.

Fly referred to the scare campaigns which have been carried on by the networks and he said it was impossible to appraise any court decision by picking out 10 words here or there. He said that the feeding out of information on the Supreme Court decision by the networks did nothing but cause confusion in the radio industry.

He said that while he has no doubt there are listeners in the United States to Axis broadcasts, they are few and they don't believe what they hear.

Fly told the conference that NBC had informed the Commission that it does not care to have any hearings in connection with the recent KOA Supreme Court decision.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, June 21st. It is subject to change.

Wednesday, June 23

Oral Argument Before the Commission

Report No. B-176:

NEW—Beauford H. Jester, et al., Waco, Texas.—C. P., 1230 kc., 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WHDL—WHDL, Inc., Olean, N. Y.—Granted modification of license (B1-ML-1159) to change location of main studio from the present address to the present transmitter building.

WGST—Georgia School of Technology, Atlanta, Ga.—Granted petition of applicant for extension of temporary license for a period of 30 days from June 21.

W81SP—Westinghouse Radio Stations, Inc., Springfield, Mass.—Granted license for new station (B1-LH-40) to use frequency 48100 kc. Licensee shall, when required materials are available, take immediate steps to comply fully with the rules and regulations and standards of the Commission.

DESIGNATED FOR HEARING

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Designated for hearing application for modification of license (B4-ML-1157) to increase night power from 1 to 5 KW.

MISCELLANEOUS

KMTR—KMTR Radio Corp., Los Angeles, Calif.—Adopted an order continuing until July 7, 1943, the hearing in re renewal of license of Station KMTR now set for June 15, 1943. (Docket No. 6437)

WCOP—Massachusetts Broadcasting Co., Boston, Mass.—Adopted an order continuing until July 14, 1943, the hearing in re renewal of license of Station WCOP now set for June 16, 1943. (Docket No. 6476)

WNYC—City of New York Municipal Broadcasting System, New York, N. Y.—Adopted an order granting petition for leave to amend the application of WNYC for special service authorization. (Docket No. 6518)

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Granted modification of construction permit as modified, which authorized increase in power, installation of new equipment and directional antenna for day and night use, for extension of completion date from June 11 to August 11, 1943. (B1-MP-1712)

The Commission approved Power of Attorney executed by John L. Booth appointing Meril A. Lindbloom and Hugh M. Gray as attorneys in fact, insofar as it relates to FM Station W49D licensed to John L. Booth, and Broadcast Station WJLB, Detroit, Mich., of which Booth is the president, a director, and owner of all the outstanding stock.

APPLICATIONS FILED AT FCC

770 Kilocycles

WJZ—Blue Network Company, Inc., New York, N. Y.—Construction permit to move main transmitter from No. 1 River Road, Bound Brook, N. J., to Lodi, N. J.

WJZ—Blue Network Company, Inc., New York, N. Y.—Construction permit to change transmitter location of auxiliary transmitter to Lodi, N. J. (same as proposed for main transmitter), install new transmitter and antenna, change power from 25 KW to 10 KW.

1000 Kilocycles

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3511, which authorized increase in power, change in hours of operation, installation of new transmitter and directional antenna for day and night use, and move of transmitter) for extension of completion date from 6-6-43 to 12-6-43.

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3512, which authorized increase in power, change in hours of operation, installation of new transmitter and directional antenna for day and night use, and move of transmitter) for extension of completion date from 6-6-43 to 12-6-43.

1150 Kilocycles

WAPO—W. A. Patterson, Chattanooga, Tenn.—Involuntary assignment of license to Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased.

WAPO—Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased, Chattanooga, Tenn.—Voluntary assignment of license to Joda Patterson, Ramon G. Patterson, and Louise Patterson Pursley, d/b as WAPO Broadcasting Service.

1230 Kilocycles

WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. C.—Voluntary assignment of license to WCBT, Inc.

1240 Kilocycles

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Modification of license to change frequency from 1490 kc. to 1230 kc. Amended to change requested frequency from 1230 kc. to 1240 kc.

KWJB—Bartley T. Sims, tr. as Sims Broadcasting Co., South of Globe, Ariz.—Voluntary assignment of license to Gila Broadcasting Company.

1310 Kilocycles

WCAM—City of Camden, Camden, N. J.—Special service authorization to operate hours formerly used by WCAP pending repairs to WCAP's transmitter which was destroyed by fire.

MISCELLANEOUS

WAEA—W. A. Patterson, Area of Chattanooga, Tenn.—Involuntary assignment of license to Joda Patterson, Executrix of the Estate of W. A. Patterson Deceased.

WAEA—Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased, Area of Chattanooga, Tenn.—Voluntary assignment of license to Joda Patterson, Ramon G. Patterson, and Louise Patterson Pursley, d/b as WAPO Broadcasting Service.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an

opportunity to show cause why cease and desist orders should not be issued against them.

Browning King & Company, Inc., 227 North Broad St., Philadelphia, a Pennsylvania corporation engaged in the sale of men's clothing, and its officers, A. Benjamin Wilkes and Joseph Wilkes, are charged in a complaint with various misrepresentations which mislead the purchasing public into the belief that their business is connected with or operated by the original Browning King clothing firm, established in New York City in the early part of the nineteenth century, or its successor, Browning King & Company of New York, Inc. (4977)

Prime Mfg. Company—A complaint has been issued charging The Prime Manufacturing Co., 1669 South First St., Milwaukee, with misrepresentation in the sale of its Prime Electric Fence Controller, a device recommended for use in confining livestock. (4978)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Fratelli Branca & Co., Inc., 12 Desbrosses St., New York, has been ordered to cease and desist from disseminating advertisements which misrepresent the therapeutic value of a medicinal preparation designated "Fernet-Branca" and which fail to reveal the harmful potentialities that may result from use of the product. (4828)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Bloomingdale Brothers, Inc., New York department store, have entered into a stipulation to cease and desist from use of the words "Persian lamb" or "Persian" as a designation for fur coats manufactured from the peltries of Shiraz lambs or from any peltries other than those of true Persian lambs; and from advertising, selling, branding or otherwise representing a fur as the product of a true species or breed of animals unless it actually has been obtained from a true species or breed. (3666)

Funk & Wagnalls Co., New York publishing firm, entered into a stipulation to cease and desist from exaggerating the efficiency of its "Languagephone" method of teaching foreign languages or the results to be obtained by the average student using the method. (3668)

Kumfy Products, Inc., 259 Strader Ave., Cincinnati, stipulated that, in the sale of crystal radio sets designated "Handy Radio," it will cease and desist from representing, through use of the term "Built-in Speaker," or in any other manner, that the set will provide sound sufficient in volume for an ordinary room as do built-in speakers in modern radios or that the reception it provides is in excess of what is actually the fact; that it will enable all standard broadcast programs to be tuned in easily or accurately, or to be received from distant stations or from all local stations; that it will operate or function everywhere; or that it is of any designated size contrary to facts. (3667)

PETRILLO COMES OUT OF HIDING

James C. Petrillo dropped out of the clouds into his New York office on Wednesday after he had ducked a U. S. Labor Department conciliator for nearly two weeks.

He announced that his attorneys would be glad to see the conciliator (James W. Fitzpatrick) on Thursday.

The conciliator is attempting to settle the dispute between the A. F. of M. and the transcription companies. If unsuccessful, he will likely recommend certification of the dispute to the National War Labor Board for disposition.

Certification within a few hours was slated when Petrillo suddenly appeared. The *New York Times* carried the following account of a press conference he held:

James C. Petrillo, the head man of the musicians' union who used to play a trumpet, took up character acting yesterday afternoon. With words and gestures he pooh-poohed John L. Lewis as "a guy" calling strikes "every two weeks" and not having anything to show for it.

Mr. Petrillo's dramaturgic outburst took place in his office at 570 Lexington Avenue and was occasioned by a charge by the makers of radio transcriptions that he was "ducking" a Department of Labor conciliator assigned to mediate the ten-month-old dispute over the manufacture of disks.

Attired in a blue shirt on which his initials were inscribed, Mr. Petrillo disposed of the charge by announcing that his attorneys would consult with the conciliator, James W. Fitzpatrick, today.

Then Mr. Petrillo, whom the record makers and broadcasters have frequently called a "dictator," rose from his desk. He raised his moderately bushy eyebrows, humped his shoulders, drew in his chin and crossed his arms.

"We don't pull any John Lewis stuff here," he said, with an appropriate growl. "When we call a strike, we call a strike. He calls a strike every two weeks and where's he got. He's busy trying to be President, the Secretary of Labor or something."

Mr. Petrillo quickly warmed to his role. He envisioned Mr. Lewis attending a labor convention, noting with some emphasis that the leader of the United Mine Workers would be "in the gallery."

"When he wants to talk everybody can go out and get a drink of water because John walks very slowly to the platform," added Mr. Petrillo.

He next noted that Mr. Lewis was given to mild talk. By way of illustration he offered an imaginary quotation:

"Yes, sir. William Green is a rat. Philip Murray is a double rat. And that Petrillo he's a three-triple rat."

Labor

LABOR ON THE AIR

Outcome of the NAB Code Compliance Committee meeting in New York, June 16-17, with respect to the industry's attitude toward broadcasts of organized labor groups, is best expressed in the story released by the NAB News Bureau:

> "New York, June 17: Labor has ample opportunity for the use of broadcasting facilities in this country, it was stated today by Thomas R. Carskadon, Chairman of the Radio Committee of the Council on Freedom from Censorship, after a two-day session with the Code Compliance Committee of the National Association of Broadcasters. Concurring was Roger Baldwin, Director of the American Civil Liberties Union, who participated in the discussions.
>
> " 'The NAB Code, as now written, provides ample opportunity for labor and other organized groups to get on the air. No changes are recommended,' Carskadon said. 'The basic principles of broadcasting are adequate to insure labor's representation. The application of these principles presents the only difficulty, for it involves the definition of controversial subjects and acceptance of program material by local station managements.
>
> " 'Our Committee intends to advise labor and other organizations of their opportunities for broadcast privileges and how to take better advantage of them. At the same time we shall continue to cooperate with NAB, particularly through the Program Managers' Executive Committee, to improve understanding.' "

"Members of the Council's Radio Committee, in addition to Carskadon, are Dr. Paul Lazarsfeld, Head of the Office of Radio Research, Columbia University; Mr. Morris S. Novik, Manager of WNYC, and Norman Thomas. Others attending the discussions, in addition to Roger Baldwin, were Thomas Stix, talent agent; Morris L. Ernst, Attorney and Author, and Mrs. Harriet F. Pilpel, Attorney."

Additional clarification, from the standpoint of the radio industry, may be helpful to station management.

Radio does not regard labor as "controversial." In other words, the mere expressed wish of a labor union to have time on the air does not immediately invoke the "controversial issues" provision of the Code. Neither does it immediately invoke the "membership" provision. Labor may therefore be sold time under the same well-defined conditions that govern sale of time to others; namely:

1. **Controversial issues will not be presented.**
2. **Memberships will not be solicited.**
3. **Material for broadcast will meet station program standards.**

Determination of what satisfies 1, 2, and 3 resides with station management, the same as in all other cases, being dependent on local conditions.

When a labor union wishes to present a controversial issue on the air, then the "controversial issues" provision of the Code applies, which recommends that free time be provided both sides of the question, with due regard to the degree of public interest involved. This provision should be read in full as found in your copy of the Code Manual.

INDIVIDUAL PAY INCREASES

Stations have expressed so much interest in War Labor Board General Orders 5, 9 and 31, regarding individual pay increases, that we are printing the texts. Any station wishing to set up a salary "plan" might well communicate with the NAB Labor Relations Department.

TITLE 29—LABOR

CHAPTER VI—NATIONAL WAR LABOR BOARD

PART 803—GENERAL ORDERS

§ *803.5—General Order No. 5.* General Order No. 5 as adopted on October 14, 1942, is hereby amended to read as follows:

Subject to the requirements of General Order No. 31, wage adjustments may be made in wage rates of individual employees, without approval of the National War Labor Board, if they are incident to the application of the terms of a wage agreement which existed previous to or has been approved since October 3, 1942, or incident to an established or approved wage rate schedule covering the work assignments of employees and are made as a result of:

(a) individual promotions or reclassifications
(b) individual merit increases within established rate ranges
(c) operation of an established plan of wage increases based upon length of service within established rate ranges
(d) increased productivity under piece-work or incentive plans
(e) operation of an apprentice or trainee system

Wage adjustments made under this Order shall not result in any appreciable increase of the level of production costs and shall not furnish a basis either to increase prices or to resist otherwise justifiable reductions in prices.

(Adopted May 26, 1943)
(E. O. 9250, 7 F.R. 7871) 787

TITLE 29—LABOR

CHAPTER VI—NATIONAL WAR LABOR BOARD

PART 803—GENERAL ORDERS

§ *803.6—General Order No. 6.* General Order No. 6, as adopted on October 20, 1942, is hereby amended to read as follows:

(a) The hiring of an individual at a wage rate in excess of the rate previously established in the plant for employees of similar skill and productive ability within the classification in which the individual is employed is a "wage increase" within the meaning of Executive Order No. 9250.

(b) If a wage rate or range of rates for a job classification has not theretofore been established by the employer for the plant involved, the rate or rate range should bear the same relation to rates of ranges or rates for similar classifications in the area as the existing rates or rate ranges in the plant bear to comparable rates or rate ranges in the area: provided, however, that schedules covering new establishments or new departments within existing establishments must be submitted for approval as provided in General Order No. 31.

(Adopted May 26, 1943)
(E. O. 9250, 7 F.N. 7871) 787

TITLE 29—LABOR

CHAPTER VI—NATIONAL WAR LABOR BOARD

PART 803—GENERAL ORDERS

§ *803.9—General Order No. 9.* General Order No. 9, as adopted on October 30, 1942, hereby amended so that Section III shall read as follows:

III. *Salary Increases Which Do Not Require Board Approval*

Subject to the requirements of General Order No. 31, salary adjustments may be made in salary rates of individual employees over which the Board has jurisdiction without the approval of the Board, if they are incident to the application of the terms of a salary agreement which existed previous to or has been approved since October 27, 1942, or incident to an established or approved salary rate schedule and are made as a result of:

(a) individual promotions or reclassifications
(b) individual merit increases within established rate ranges
(c) operation of an established plan of salary increases based on length of service within established rate ranges
(d) increased productivity under incentive plans
(e) operation of an apprentice or trainee system, or
(f) such other reasons, or circumstances as may be prescribed in orders, rulings, or regulations, promulgated under the authority of these regulations.

Salary adjustments made under this order shall not result in any appreciable increase of the level of production costs and shall not furnish a basis either to increase prices or to resist otherwise justifiable reductions in prices.

(Adopted May 26, 1943)
(E. O. 9250, 7 F.R. 7871) 787

TITLE 29—LABOR

CHAPTER VI—NATIONAL WAR LABOR BOARD

PART 803—GENERAL ORDERS

§ *803.31—General Order No. 31.* The following regulations supplementary to General Orders 5, 6 and 9 relating to wage and salary schedules and to plans for making individual wage and salary adjustments under such schedules are hereby adopted.

I. *Established Schedules within the meaning of General Orders 5 and 9*

A. *Definitions and criteria*

1. *Specific criteria for all established schedules*
A "schedule" involves job-classification *rates* or *rate ranges* and a *plan* for making individual adjustments within and between such rates or rate ranges.

a. Job-classification rates or rate ranges in existence on May 31, 1943, do not require approval of the National War Labor Board.

(1) Rate ranges consist of clearly designated minimum and maximum rates in existence as of May 31, 1943, for jobs of similar skill and responsibility. (Such minimum and maximum rates are not necessarily the rates actually being paid on May 31, 1943, for particular job clas-

sifications. Thus, individual minimum or maximum or within grade rates may be "vacant" at any given time. Nor are the established minimum and maximum rates for any given job classification necessarily determined by the fact that for special reasons particular employees may be receiving less than the minimum or more than the maximum rate. Save as exceptional cases may be brought to the Board's attention, no rate range exists (a) where the employer customarily pays single rates for particular job classifications, or (b) where jobs are remunerated on a piece-rate method of wage payment.)

b. A *plan* for making individual adjustments within and between rate ranges which was in existence on May 31, 1943, does not require Board approval if

  (1) It is contained in a collective bargaining agreement in existence on May 31, 1943; or

  (2) It conforms to the employer's practice prior to October 27, 1942, as demonstrated by (a) a plan formally communicated to the employees; or (b) the employer's payroll records; or

  (3) It was specifically approved by the National War Labor Board or any of its authorized agents or agencies, or

  (4) It includes one or more of the following methods and conforms to the appropriate standards set forth under each:

    (a) *Merit increases* (These increases may be made only within rate ranges)

      i. These are individual wage or salary rate adjustments made as a reward for superior quantity and/or quality of work or service.

      ii. No employee may receive more than two merit increases during any calendar year.

      iii. Except in cases where there have been substantial fluctuations in employment, no more than 50 per cent of the average number of employees in a job classification may receive merit increases during any calendar year.

      iv. No merit increase may exceed 33⅓ per cent of the difference between the minimum and maximum rates of the appropriate range.

    (b) *Automatic length of service increases* (These increases may be made only within rate ranges)

      i. These are individual adjustments usually made automatically at the end of specified periods of satisfactory service.

      ii. Frequency of adjustment may not exceed four times in any calendar year.

      iii. Amount of adjustment may not exceed 25 per cent of the difference between the minimum and maximum rates of the appropriate range.

    (c) *Promotions or reclassifications* (These adjustments may be made between single-rate jobs as well as between jobs which bear rate ranges)

      i. These are individual adjustments which result from moving an employee into a different job classification.

      ii. When promoted or reclassified to a higher-rated job, an employee may receive a rate not in excess of 15 per cent above his rate on his former job or the minimum rate for the new job, whichever is higher; provided, however, that where an employee has special ability and experience, he may be paid a rate within the appropriate range corresponding to such ability and experience.

    (d) *Apprentice or trainee system* (Under these systems, adjustments may be made with respect to jobs which bear single rates as well as with respect to jobs which bear rate ranges.)

      i. These are individual rate adjustments resulting from improvement, over specified periods of time, in the productive abilities of apprentices or trainee who are employed under a bona-fide apprentice or trainee plan as defined below.

      ii. Apprenticeship plans—with respect to length of apprenticeship period; proportion of number of apprentices to number of journeymen; and relation of apprentice wage rate at various periods to journey men wage rate—should conform to the standards set forth in a collective bargaining agreement or in the regulations of federal or state agencies.

      iii. Learner or trainee plans—with respect to length of learning period; proportion of number of learners to number of experienced workmen in a given job classification; and relation of learner or beginner rate to the rate paid experienced workmen—should conform to the standards set forth in a collective bargaining agreement or in the regulations of federal or state agencies.

      iv. Nothing in this section precludes the re-examination or modification of existing apprentice or trainee programs in the interests of greater production for the war effort.

2. *General criteria for all established schedules*

  a. Each job classification must be clearly defined and described.

  b. Except where there has been a substantial fluctuation in employment, proportionate distribution of employees within and among rate ranges must remain substantially the same from quarter-year to quarter-year.

  c. No appreciable increase in the level of production costs may result from individual rate adjustments.

B. *Records*

Any employer who makes individual wage or salary rate adjustments pursuant to an established schedule must hereafter keep the following records available in his establishment(s) for a period of two years:

1. The rate or range of rates for each job classification.
2. The description of each job classification.
3. A statement of the plan of making adjustments within the rate ranges and between the rates or rate ranges.
4. The date when the schedule was established.
5. For each job classification in which merit increases have been made, the number of employees in each such job classification during the payroll period when adjustments were made.
6. With respect to each employee who received an adjustment:
   a. Name of employee
   b. Date on which employee was hired
   c. For each adjustment given to the employees:
      (1) Date of adjustment
      (2) Job classification prior to and after the adjustment
      (3) Rate of pay prior to and after the adjustment
      (4) Reason for adjustment

No particular order or form is prescribed for these records, provided that the information required is easily obtainable.

II. *New Schedules*

A. All wage or salary rate schedules which are not exempt from the requirement of Board approval under (I) above must be submitted for approval to the appropriate Regional War Labor Board. Pending final action by the Board, individual rate adjustments may be made in accordance with the criteria set forth under (I) above.

B. *Requirements for obtaining approval*

1. *Rate ranges* (where ranges are desired for the purpose of making individual merit or length-of-service increases)
   a. *Existing establishments*
      (1) The minimum rate for each job classification shall be fixed at (a) the minimum rate prevailing in the plant or establishment for each job classification or (b) at a level not exceeding the minimum of the bracket of sound and tested rates which prevails for similar job classifications in the same labor market, whichever is higher; provided, however, that in rare and unusual cases where the critical needs of war production require, a higher minimum rate may be set.
      (2) The spread between the minimum and maximum rates for each job classification shall wherever possible be in accordance with the standards prevailing in the industry and area.
   b. *New establishments or new departments in existing establishments*
      (1) Except in rare and unusual cases where the critical needs of war production require or except as may be necessary, in the case of new departments, to maintain internal balance of the rate structure, the minimum rate for each job classification shall be fixed at a level not exceeding the minimum rate of the bracket of sound and tested rates which prevails for similar job classifications in the same labor market.
      (2) The spread between the minimum and maximum rates for each job classification shall wherever possible be in accordance with the standards prevailing in the industry and area.
2. *Single rates* (where single rates are desired for making promotions or reclassifications or for making individual rate adjustments under apprentice or trainee plans)
   a. *Existing establishments*
      (1) A reclassification of single rates for existing establishments may, if designed to bring about a more harmonious and appropriate relationship of rates within an establishment, be approved where it will not appreciably affect the level of production costs or furnish the basis either to increase prices or to resist otherwise justifiable reductions in prices.
   b. *New establishments or new departments in existing establishments*
      (1) Except in rare and unusual cases where the critical needs of war production require or except as may be necessary in the case of new departments, to maintain internal balance of the rate structure, the rate for each job classification shall be fixed at a level not exceeding the minimum rate of the bracket of sound and tested rates which prevails for similar job classifications in the same labor market.
3. *Plans for making adjustments between rates or within and between rates ranges* (existing establishments or new establishments and departments)

   A proposed plan for making individual adjustments within and between rate ranges should contain the following information with respect to one or more of the methods outlined below. The plan should also indicate to what extent the adjustments to be made thereunder will affect the proportionate distribution of employees within and among the rates or rate ranges, and to what extent production costs will be increased thereby. The plans so submitted need not necessarily conform to the criteria set forth in (I) above.

   a. *Merit increases*
      (1) The number of increases within the appropriate range to be given to any employee during the calendar year.
      (2) The percentage of the number of employees in each job classification who will receive increases during the calendar year.
      (3) The maximum amount (in terms of the percentage of the difference between the minimum and maximum rates of the range) of the individual increases to be given in each job classification.
   b. *Automatic length of service increases*
      (1) How frequently such increases are to given during the calendar year.
      (2) The maximum amount (in terms of the percentage of the difference between the minimum and maximum rates of the range) of the individual increases which are to be given in each job classification.
   c. *Promotions or reclassifications*
      (1) The rate to be paid upon promotion or reclassification to a higher-rated job (whether the minimum rate called for by the new job, or a rate in excess of such minimum).
      (2) If a rate in excess of the minimum called for by the new job is to be paid, the criteria that will determine the rate should be described (i.e., special skill and experience, other unusual qualifications, etc.).
   d. *Apprentice or trainee systems*
      (1) How does the plan conform to the standards set forth in appropriate collective

bargaining agreements or in appropriate regulations of federal or state agencies with respect to the following items: length of apprenticeship or learner period; proportion of number of apprentices or learners to number of experienced workmen in a given job classification; relation of apprentice or learner rate at various periods to the rate paid experienced workmen?

C. Any employer who makes individual wage or salary adjustments pursuant to an approved schedule must keep in his establishment(s) for a period of two years the records listed in (I).

III. Any employer who wishes to change one or more provisions of his established or approved wage or salary rate schedule may obtain consideration of such proposed change from the appropriate Regional War Labor Board without the necessity of having his entire schedule approved or re-approved.

IV. If there is a duly recognized or certified labor organization which represents any or all of the employees included in a proposed schedule or in a proposed change in an existing schedule, approval must be jointly requested by the employer and such labor organization. But if agreement on any point can not be reached, the parties may jointly submit the issues to the appropriate Regional War Labor Board for determination or may ask the Regional Board to refer the matter to the National War Labor Board for determination. Failing joint submissions, the matter will be treated as a dispute case.

V. Where an application includes more than one establishment, it shall set forth separately a schedule for each establishment, or for groups of similar establishments.

VI. Companies having establishments in more than one Region may apply for approval of schedules, where approval is necessary, in each of the Regions where the establishments are located or in the Region in which is located the company office at which the schedules are determined. In the latter case, the Regional Board may, if it considers that the application warrants national consideration, refer it to the National War Labor Board.

(Adopted May 26, 1943)
(E. O. 9250, 7 F. R. 7871) 787

STRIKE AT WTOP

Technicians at Station WTOP walked out without notice at noon June 19 and returned at 4:49 p. m. the same day.

The technicians are covered by a contract between CBS and the I.B.E.W. The contract provides for no strikes and for machinery, including arbitration, to settle grievances. A minor grievance led to the strike. After a three-hour conference, the union agreed to submit the dispute to an arbiter to be appointed by the War Labor Board.

Joseph L. Miller, NAB labor relations director, sat in on the conference.

Engineering

FIRST RETURNS ON FCC MANPOWER SURVEY

As part of its program to ease the present shortage of skilled technicians in the communications industry, the Federal Communications Commission today will mail to the War Manpower Commission and interested groups in the industry the first series of names of first- and second-class radiotelephone licensees who have reported themselves available for immediate employment in essential communications jobs. The list was prepared from responses to the commission's postcard survey of a sample of 1,000 of the nation's 20,000 licensed radiotelephone operators in these classifications.

To date over 550 holders of first- and second-class radiotelephone licenses have answered the FCC's query. Information obtained from the questionnaire related to the licensee's present employment, his draft status, whether or not he was using his license in his present job, and his availability for either full or part-time employment in the communications field.

The commission, of course, does not certify as to the experience or availability of any person listed, but merely sets forth the information recorded on the questionnaire. It is intended that further lists will be released from time to time as returns come in.

NAB REQUESTS CONTINUANCE OF FCC-NAB TECHNICIAN RECRUITING ACTIVITIES

In connection with the FCC survey Neville Miller has sent the following letter to Chairman Fly:

"Pursuant to my letter of May 12 I am informed that the test surveys addressed to the holders of radiotelephone licenses have produced results which seem to warrant a continuance of this activity.

"Mr. Dallas Smythe and his staff have been most cooperative in working with our engineering and research directors. The form used in the FCC test survey of one thousand operator licensees was well conceived and effective in producing a list of possible candidates for broadcast technical positions.

"The NAB survey of one hundred radiotelephone license holders brought in seventeen actual applications for employment in the broadcast industry on our regular registration forms. These forms furnish the personal information required by prospective employers.

"In a joint meeting on June 15, agreement was reached that both survey methods produced valuable results. However, the FCC technique is inexpensive and provides an excellent screening. The NAB method, costly because of first-class mail and personalized letters, should be sent to only those showing promise in the FCC survey.

"I therefore urge that this cooperative activity be continued on the basis outlined above as there is every indication that a substantial number of applications for employment will result. The shortage of broadcast station technical personnel is becoming increasingly acute as indicated by the increase of the number of requests from broadcast stations for replacement personnel now coming to NAB. We have been, for the last several months, registering qualified technical personnel and furnishing suitable applicants to all stations requesting assistance. The need at this point is for a larger list of applicants in order that the undertaking can be of maximum broadcast industry benefit."

UNIVERSITY OF WISCONSIN HAS LARGE ESMWT CLASSES

Approximately 330 persons will be enrolled by the University of Wisconsin in the NAB-ESMWT "Fundamentals of Radio."

This was made known by Edwin C. Allen, general manager, WIBA, Madison, Wis., who is industry representative in Wisconsin for the training program. Figures were prepared by H. E. Pulver, of the university, who is state coordinator.

Eighty students will be enrolled in five classes of Part II of the course; while 250 or more will make up ten classes in Part I of "Fundamentals of Radio."

Approximately 535 persons are enrolled in 19 classes of "Fundamentals of Radio" Part I, about to be completed. Twenty-five per cent of the students are women. This is almost double the number of women who were among 1,141 students who previously completed Part I.

There are also 205 men and women who are about to complete "Fundamentals of Radio" Part II. Seven per cent of these are women, whereas only two per cent were women of the 127 who completed course II some time ago.

Broadcast Advertising

DEPARTMENT STORES CAN MAKE RADIO PAY

Nearly 150 sales-minded station executives heard an intensely interesting talk, encouragingly titled: "Department Stores Can Make Radio Pay," at the Sales Managers meeting, held in conjunction with the NAB War Conference at the Palmer House in Chicago, Ill., on Wednesday evening, April 28, 1943. The speaker was John A. Garber, Advertising Manager of Strawbridge & Clothier, Philadelphia, Pa., one of the leading department stores of the United States.

Perhaps the importance of this talk can be best summed up in the comments of an able station executive, well-known for this heckling of department store speakers at previous meetings. He said: "That is the first talk I have ever heard by a department store executive on the use of broadcast advertising that made sense. Garber really knows what he is talking about. There is solid, substantial meat in what he said."

Even prior to the meeting, NAB had made arrangements to reprint the talk for distribution to all members. After hearing Garber, Sol Taishoff of *Broadcasting* magazine expressed a desire to reprint the talk in his publication. Garber then offered to amplify his remarks in certain respects. The revised version appeared in the May 31, 1943 issue of *Broadcasting* magazine, from which the enclosed reprint was prepared through the courtesy of that publication.

Believing, and hoping, that many of you are making daily use of "A Manual of Radio Advertising," the enclosed reprint has been prepared on 8½ x 11 inch paper, with three-hole punching, so that it can be incorporated in the Manual. If you can use additional copies, there are plenty of them available. A penny post card will bring as many as you want.

Retail Promotion Plan

The talk by John A. Garber is one more reason why every radio station should participate in the Retail Promotion Plan. As Garber stated, department stores are more interested than ever in the possibilities of broadcast advertising—they want to know how and where and when it can be profitably used. The answer to that question is the one major objective of the project now in full production.

Whether or not you are actively participating, you can help very materially in the development of the presentation if you will fill out and return the Statistical Questionnaire sent you recently, and if you will write a letter to Sheldon R. Coons, using the outline in the same mailing. Won't you please do that today to help in this industry-wide movement?

Standard Program Schedule Forms

The steadily increasing use of the Standard Program Schedule Form is a source of real pleasure to all who worked on the development of this material. This convenient, simplified program and announcement listing should be used by every radio station.

But, when you order or reorder, won't you please try to anticipate your needs? A check-up has revealed that express and freight shipments are appreciably slower than a year ago. Deliveries, that formerly took four days, now often take eight or ten days. While we try to maintain a minimum stock of 25,000 copies at all times, and ship immediately upon receipt of your order, unavoidable delays will sometimes occur. Please try to reorder before your supply is actually exhausted.

We Bow Our Bloody Head

Down around our ears for the past ten days has come a snowstorm of letters from member stations, enclosing copies of the letter from Jeffrey A. Abel, Radio Director of Henry J. Kaufman Advertising, Homer Building, Washington, D. C., offering one of the most brazen contingent deals we have ever seen. Just as soon as this copy goes to the printer, we'll clamp on our sun helmet, stalk down the street and do our best to convince Mr. Abel of the error of his ways.

Of course, these are the "dog days" in Washington, as the news commentators have latterly observed.

Non-Permanent Permanent

From Lou Sterling and Associates, North Hollywood, California, many member stations have received contingent contracts for a "Hollywood Permanent"—a home permanent wave produced by a new cold process. There—in the cold process—is the treatment this offer deserves. Leave it cold, except on a rate-card basis. Otherwise you'll be building some non-permanent business with a permanent.

Be Precipiate with This Colloidal

Several other member stations have sent in the letter from Hal A. Salzman Associates, 6 E. 45th Street, New York, N. Y., offering a contingent contract for SUL-RAY Colloidal Sulphur Mineral Baths. Be precipiate with the offer on that basis. Say: "yes, on a rate-card basis, with no strings attached." Then proceed to sell the facilities of your station on that basis. Salzman leaves the door open for such a solicitation in the third paragraph of his letter.

"SHARE THE RADIO" PLAN HITS MISSISSIPPI

At McComb, Mississippi, Station WSKB carries a show called the "Listening Post." Listeners are invited to share their radios with others. A poster is given away to be put in the front windows of homes to indicate members of the Listening Post Club. Discussion of programs follows.

WBIG ISSUES RATION BOOK COVERS

WBIG, Greensboro, North Carolina, is issuing covers for household ration books. They are red and blue on heavy green colored stock.

Major Edney Ridge, managing director, says they are extremely popular with the women shoppers.

State Legislation

FLORIDA:

S. 672 COPYRIGHTED MUSICAL COMPOSITIONS—Relating to public performing rights in copyrighted musical compositions and dramatico-musical compositions; defining same, and to regulate licensing of same. Vetoed June 14 by Governor Holland.

MILES LOSES FTC SUIT

Suit for a declaratory judgment by Miles Laboratories, Inc., of Elkhart, Ind., in which the corporation sought to have the court pass upon the jurisdiction of the Federal Trade Commission to issue a complaint charging the corporation with engaging in certain practices in violation of the Federal Trade Commission Act, has been dismissed by Justice Luhring, of the U. S. District Court for the District of Columbia, where the judgment was sought.

Miles Laboratories, Inc., is engaged in the manufacture and sale of "Dr. Miles' Nervine," "Dr. Miles' Nervine Tablets" and "Dr. Miles' Anti-Pain Pills," with annual sales in excess of $900,000. After an investigation the Commission notified the corporation that its packages, labels and labeling failed adequately to reveal the potential danger of its products and submitted a stipulation for its signature in which it would agree to cease and desist from disseminating any advertisements of the products which failed to reveal that excessive use of the Nervine remedies might cause mental derangement or skin eruptions, while excessive use of the Anti-Pain Pills might cause collapse or dependence upon the drug. The proposed stipulation gave the corporation the option to include such warnings and cautions on its labels, in which case the advertising need only contain the statement: "Caution: Use Only as Directed."

Miles Laboratories, Inc., refused to sign the proposed stipulation and filed suit in the District Court for a declaration that the Commission was acting outside the scope of its jurisdiction and had no authority to determine the legality of the language used on the labeling of the plaintiff's products or authority to force it to vary such language. It was alleged that the Commission intended to issue a complaint against the plaintiff, and that this would cause injury to the plaintiff's business and compel it to spend large sums of money in defense.

In his opinion, dismissing the case, Justice Luhring said in part:

"It is well settled that the Declaratory Judgment Act is not, in itself, a source of federal jurisdiction and did not enlarge the pre-existing jurisdiction of the federal courts.

"The question of the Commission's jurisdiction to proceed will be passed on by the Commission. The plaintiff may raise the question in the proceeding before the Commission and obtain a ruling. If the Commission erroneously assumes jurisdiction and issues an order to cease and desist, such an order and the proceedings upon which it is based are subject to review by and only by a Circuit Court of Appeals of the United States. The jurisdiction of that court 'to affirm, enforce, modify or set aside orders of the Commission shall be exclusive.'

"The plaintiff stresses the inconvenience and cost of requiring it to engage in the trial of a complaint before the Commission. Such an objection is not new and the courts have invariably held that inconvenience and expense of litigation is 'part of the social burden of living under Government.'"

NAM PRESIDENT CRITICIZES FCC-NETWORK COURT DECISION

In a speech before the Wartime Conference of the National Editorial Association at Cincinnati recently, Kenneth Crawford, president, National Association of Manufacturers, criticized the May 10th Supreme Court decision on the FCC-Network case by implying that when government enters private industry as in radio and the newspapers it marks the beginning of the end for freedom of speech and the press.

"Will it be a licensing system next for the newspapers of this country?" he asked, commenting on the fact that the Supreme Court had imposed conditions on individual broadcasting stations, including limitations of contracts, in return for federal licenses.

"With the end of freedom of the press there will come sooner or later the end of our free competitive system," he added.

GIRL SCOUTS SEND TO ALL HEADQUARTERS INFORMATION ON BROADCASTING RELATIONS

A report on the findings of the work study group on broadcasting by national organizations held at the recent Institute for Education by Radio at Ohio State University was sent to all headquarters branches by the Girl Scouts of America. The section as sent is reprinted below for your information.

Mrs. Dorothy Lewis, NAB coordinator of listener activities, was a participant in this work study panel.

The Institute for Education by Radio was established in 1930 at Ohio State University and has been held at Columbus each spring since then. Its purpose is to bring broadcasters—network officials and local station personnel—educators, and civic leaders together to discuss the problems of educational broadcasting, particularly techniques and policies. This year there were more than 700 radio people from all over the United States and Canada registered, and as a member of our Public Relations Division attended you may be interested in a very brief report on the findings of one Work Study Group on Broadcasting by National Organizations as this is of importance to the Girl Scouts as a youth-serving agency.

The chairman of this group was Tom Stewart of the American Junior Red Cross, and a few of the radio representatives of other organizations which participated were: Dr. Iago Daldston, New York Academy of Medicine; Jesse Butcher, National War Fund; Henriette Harrison, Y. M. C. A.; David Resnick, National Society for Prevention of Blindness; Leslie Stratton, Boy Scouts; and Lucille Clarke, Girl Scouts.

In order that you may know the consensus of opinion as to what should be the relationship between organizations and the radio industry, the following is a summary of the report which was prepared at the close of the meetings:

1. That it is the responsibility of all organizations to see that they do not use radio except to further the war effort at this time.

2. That it is a joint responsibility of the organization and the station management to judge the above.

3. That the purpose of all broadcasts by organizations should be—"to be of service to the public" and mention of the organization, its "commercial," should be of secondary consideration.

4. That only the best in radio material should go out over the air under the sponsorship of an organization.

5. The editorial policy of a radio program rests, as far as content is concerned, with the organization, subject to the approval of the station, but as far as quality is concerned it is up to the station to refuse time to an organization whose program does not meet the highest standards.

6. That in "asking for time" the organization should be sure it has something of equal value to offer the station in program or idea that will be of service to the listening public and that will aid in building an additional audience for the station.

7. That organizations of like aims—such as the youth serving agencies—should work on a cooperative basis, producing joint radio programs for instance, for in this way a better quality program will probably result from the pool of ideas and funds and the station will be assured of a larger potential audience and thus be more generous with its time.

8. That if the radio industry would show more interest in the over-all program and broadcasting activities of national organizations, many of these organizations would then more fully realize their responsibility and in consequence appropriate sufficient radio budgets to carry out these responsibilities.

912 STATIONS

There were no additions or deletions during the month of April, 1943. During May, one station having a construction permit only was deleted. A comparative table by months follows:

	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1
Operating	906	906	905	906	908	910	909	910	910	910	911	911	911
Construction	18	19	16	14	11	9	9	7	6	5	2	2	1
	924	925	921	920	919	919	918	917	916	915	913	913	912

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 28. They are subject to change.

Monday, June 28

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Modification of C. P., under C. P.; **1240 kc.**, 250 watts, unlimited.

Wednesday, June 30

WHDH—Matheson Radio Co., Inc., Boston, Mass.—C. P., **850 kc.**, 5 KW, unlimited, DA-night.

WJW, Incorporated, Akron, Ohio.—Modification of C. P., under C. P.; **850 kc.**, 5 KW, unlimited, DA-day and night.

Thursday, July 1

WOKO, Incorporated, Albany, N. Y.—Renewal of license (main and auxiliary), **1460 kc.**, main: 500 watts night, 1 KW day; auxiliary: 500 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MISCELLANEOUS

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Granted license (B3-L-1763) to cover construction permit (B3-P-3520) to move main transmitter from RFD No. 1, Dixie Gardens, near Shreveport, to Harte Island Road, near Shreveport; also authority to determine operating power by direct measurement of antenna power (B3-Z-1518).

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted license (B3-L-1726) to cover construction permit (B3-P-3259) as modified, covering installation of new transmitter and DA for night use, increase in power to 5 KW-LS, and move transmitter; also authority to determine operating power by direct measurement of antenna power (B3-Z-1464).

KTW—The First Presbyterian Church of Seattle, Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1515).

WALB—Herald Publishing Co., Albany, Ga.—Granted motion for extension of time to July 6, for correction of testimony of C. C. Tounsley, in re applications of WALB for renewal of license, construction permit, and voluntary assignment of license.

WALB—Herald Publishing Co., Albany, Ga.—Granted extension of time to July 17 for filing proposed findings of fact and conclusions in re above applications.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Granted petition to dismiss application (B2-P-3254) without prejudice.

WCOP—Mass. Broadcasting Corp., Boston, Mass.—Continued action on petition for order to take depositions to July 14.

APPLICATIONS FILED AT FCC

W3XWT—Allen B. DuMont Laboratories, Inc., Washington, D. C.—Modification of construction permit (B1-PVB-31, as modified, which authorized new experimental television station) for extension of commencement and completion dates from 12-26-42 and 6-26-43 to 6-26-43 and 12-26-43, respectively.

1350 Kilocycles

WORK—York Broadcasting Co., York, Pa.—License to cover construction permit (B2-P-3205, as modified) for installation of new directional antenna system for night use only.

WORK—York Broadcasting Co., York, Pa.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

WJW—WJW, Incorporated, Akron, Ohio.—Modification of license to change name of licensee to The Akron Broadcasting Company.

850 Kilocycles

WJW—The Akron Broadcasting Co., Akron, Ohio.—Voluntary assignment of construction permit (B2-P-3263, as modified for new transmitter, change in frequency, increase in power, directional antenna day and night, and move), from The Akron Broadcasting Company to The WJW Company.

First Baptist Church, Pontiac, Mich.—Extension of authority to transmit programs from First Baptist Church at Pontiac, Michigan, to Radio Station CKLW, Windsor, Ontario, Canada, for period beginning 8-13-43.

960 Kilocycles

KMA—May Broadcasting Co., Shenandoah, Iowa.—License to cover construction permit (B4-P-2599, as modified) for installation of directional antenna for night use and increase in power.

KMA—May Broadcasting Co., Shenandoah, Iowa.—Authority to determine operating power by direct measurement of antenna power.

KRLH—Clarence Scharbauer, Midland, Texas.—Involuntary assignment of license to Millard Eidson, Independent Executor of the Estate of Clarence Scharbauer, Deceased. (Item 12, Part I; Items 15(a), 16, 17, 23 and 24, Part II.)

RENEWAL APPLICATIONS FOR STANDARD BROADCAST STATIONS RECEIVED

WJZM—William Kleeman, Clarksville, Tennessee.
WMGA—Frank R. Pidcock, Sr., Moultrie, Georgia.

RENEWAL APPLICATIONS FOR STANDARD BROADCAST STATIONS RESUBMITTED

KELD—Radio Enterprises, Incorporated, El Dorado, Arkansas.
WGRC—Northside Broadcasting Corporation, New Albany, Indiana.
WLLH—Merrimac Broadcasting Co., Inc., Lowell, Massachusetts. (main and synchr. ampl.)

RENEWAL APPLICATIONS FOR STANDARD BROADCAST STATIONS RETURNED

KTSW—Emporia Broadcasting Company, Inc., Emporia, Kansas.
WJZM—William Kleeman, Clarksville, Tennessee.

1150 Kilocycles

WTAW—Agricultural and Mechanical College of Texas, College Station, Texas.—Modificaton of license to change hours of operation from specified hours to daytime (requesting facilities of KTBC).

1240 Kilocycles

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebraska.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

WTMC—Ocala Broadcasting Co., Inc., Ocala, Florida.—Construction permit to make changes in transmittng equipment and increase power from 100 watts to 250 watts.

1340 Kilocycles

KWFC—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Company, Hot Springs, Arkansas.—Involuntary assignment of license to Clyde E. Wilson.

RENEWAL APPLICATIONS FOR STANDARD BROADCAST STATIONS RECEIVED

WFOR—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.
KTSW—Emporia Broadcasting Company, Inc., Emporia, Kans.

RENEWAL APPLICATIONS FOR STANDARD BROADCAST STATIONS RETURNED

KBPS—Benson Polytechnic School, R. T. Stephens, Agent, Portland, Oregon.
WGRC—Northside Broadcasting Corporation, New Albany, Indiana.
WLLH—Merrimac Broadcasting Company, Inc., Lowell, Massachusetts.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bernard Engineering Co.—Misrepresentation in the sale of a preparation designated "Wonder Solv Anti-Freeze," recommended for use in the cooling system of automobile and other combustion type engines, is alleged in a complaint issued by the Federal Trade Commission against Bernard Engineering Co., 709 Market St., Camden, N. J., and its president, Lionel Bernard, and William I. Miller, trading as Miller Manufacturing Co., 1100 32nd St., Camden, N. J. (4979)

Milwaukee Importing Co.—Pleading inability to supply customers with products ordered and paid for, because of alleged government restrictions, Henry P. Kinneke, trading as Milwaukee Importing Company, 2039 North 34th St., Milwaukee, Wis., is charged in a complaint issued by the Federal Trade Commission, with the use of unfair and deceptive acts and practices in commerce. (4980)

R. L. Swain Tobacco Co., Inc., Danville, Va., is charged in a complaint issued by the Federal Trade Commission with misrepresentation in the sale of Pinehurst Cigarettes by falsely advertising that they are "The Cigarette the Doctor Smokes" and are devoid of irritating properties. (4981)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Latta Cream—M. L. Kay and Humbert O'Camp, trading as Latta Cream, 505 Fifth Ave., New York, have been ordered by the Federal Trade Commission to discontinue certain misrepresentations concerning the effectiveness of a cosmetic designated as "Latta Cream." Since December, 1942, the business has been conducted under the sole proprietorship of the respondent Kay. (4925)

Alma's Home Made Candies—Alma Loughran and Lee R. Loughran, trading as Alma's Home Made Candies, 2737 West Madison St., Chicago, have been ordered by the Federal Trade Commission to cease and desist from selling or otherwise disposing of candy by means of a game of chance, gift enterprise or lottery scheme. (4409)

Domestic Diathermy—Max E. Heyman and Maude S. Jaret, trading as Domestic Diathermy Co., 251 West 57th St., New York, to cease and desist from disseminating advertisements which misrepresent the therapeutic properties of a device designated "Domestic Short-Wave Diathermy" and which fail to reveal that the device is not safe under certain conditions of use. (4942)

An order to cease and desist from misrepresentation in connection with the sale of **Dorothy Gray Cosmetics** has been issued by the Federal Trade Commission against Lehn & Fink Products Corp., and its subsidiary, Dorothy Gray, Ltd., both of Bloomfield, N. J. (3447)

FTC COMPLAINT

In a joint answer to a Federal Trade Commission complaint, **Carter Products, Inc.**, 53 Park Place, New York, distributor of a cosmetic and dedorant designated "Arrid," and Small & Seiffer, Inc., advertising agency at 24 West 40th St., New York, deny they have disseminated advertisements misrepresenting the properties and effectiveness of the preparation. Small & Seiffer, Inc., prepared and placed the advertising copy objected to in the Commission complaint. (4960)

COX HEARINGS BEGIN

NAB has been notified that the Cox hearings on the investigation of the FCC begin today (July 2) in the caucus room of the old house office building. It has been reported from reliable sources that Dr. Robert Lee, of the FCC Foreign Broadcast Intelligence Service, will appear at the opening session.

NEW RADIO LEGISLATION URGED BY AFA

The Advertising Federation of America at its War Advertising Conference at the Waldorf-Astoria, New York City, Tuesday, June 29, passed the following resolution expressing "profound concern" over the Supreme Court-FCC Decision of May 10th and urging Congress to consider new legislation.

> **"The Advertising Federation of America notes with profound concern the recent supreme judicial interpretation that the Communications Act not only confers upon the Federal Communications Commission the power to supervise the traffic of radio broadcasting but also 'puts upon the Commission the burden of determining the composition of that traffic.'**
>
> **"The serious implications of the legislation thus interpreted go far beyond the field of radio. Freedom of the press, and in fact, freedom of all forms of communication are apparently placed in jeopardy. All advertising media and the content of advertising itself could be embraced in this line of reasoning.**
>
> **"We respectfully urge the members of Congress to weigh the need for new legislation to clarify and make secure the freedom of communications against the necessity of capricious regulation."**

OUTSTANDING WAR PROGRAM

Chester La Roche, Chairman of the War Advertising Council, advises that the Council in cooperation with the Office of War Information has made tentative plans for a nationwide network broadcast to the business men over the facilities and through the courtesy of the National Broadcasting Company. One Hundred thirty-eight stations will carry the program.

As presently planned the broadcast will, according to Mr. La Roche, take place on July 14 at 1:30 p.m. Eastern War Time. The broadcast will tell the story of the part *all* citizens can play in total war, with particular emphasis on the leading role that business men can take through their advertising. This broadcast will make clear that business through its advertising can do much more to organize and unify our people.

The goal, according to the Council, is two-fold: One-third of all advertising devoted to public war information; and, a war message in every ad.

NBC will notify the broadcasting industry of the proposed program on July 6 at 1:15-1:30 p.m. EWT in a "closed circuit" broadcast. It is highly desirable that NBC station managers invite other broadcasters in the community to listen in to this closed circuit talk in order that complete coordination of the July 14 program may be achieved.

STATEMENT OF NEVILLE MILLER ON H. R. 2968 BEFORE SENATE COMMITTEE

OWI Is Supported

My name is Neville Miller. I am President of the National Association of Broadcasters, which is the trade association of the broadcasting industry, with offices in Washington, D. C. The Association is a non-profit membership corporation, organized twenty years ago, with approximately 540 members representing all classes of stations and networks.

I have communicated with our Board of Directors, and, based on their replies and other information, I can state that broadcasters are practically unanimously of the opinion that the Radio Bureau of the Office of War Information has done an exceedingly good job in program coordination and clearance activities and has produced a condition which is vastly superior to the chaotic condition which existed prior to the commencement of these activities.

Broadcasters and advertisers early offered their cooperation to the government and over the last several years have contributed radio time valued at millions of dollars to assist in campaigns and other activities in connection with the war program. It early became evident that to make the most effective use of the radio time available it was necessary that some agency be empowered to coordinate the requests and needs of the various government agencies and to determine the relative importance of the various campaigns and other activities.

The Radio Bureau of the Office of War Information assumed that task and by the creation of the Program Allocation Plan and in other ways has rendered a service of the greatest value to the government, to advertising sponsors, to broadcasters and to the listening audience. We have worked in close cooperation with the Radio Bureau, and I am glad to state that in our opinion this work of coordination and program clearance has been carried on in an able, intelligent and satisfactory manner.

Broadcasters are unanimously of the opinion that this work has been very helpful and express the hope that funds for its continuation will be provided. They believe that failure to continue this work would produce a chaotic

condition similar to the one which existed prior to the creation of the Radio Bureau, and the result would be very detrimental to the war program.

BROADCASTING INDUSTRY HONORED BY U. S. FLAG ASSOCIATION

The Cross of Honor of the United States Flag Association and an accompanying scroll were presented to the American Broadcasting Industry at a luncheon meeting at the National Press Club, June 28, 1943, Washington, D. C., by Walter D. Fuller, president, Curtis Publishing Co., and executive chairman of the association.

Neville Miller, NAB president, received the awards on behalf of the industry.

> *(A reproduction of the scroll, which bears a picture of the medal on it, is being reproduced in form suitable for framing and will be sent to all stations next week.)*

The awards were made in recognition of "distinguished service" during the observance of Flag Week during which 100 million dollars worth of war bonds were sold.

Citation accompanying the awards reads:

> **"In recognition of distinguished service by this agency of public information, education and entertainment whose high ethical standards and conduct give to the American people further reason to be proud of the efficacy of our Constitutional guarantee of freedom of speech as exercised by a private industry under our democratic system of free enterprise. The contribution of America's radio broadcasting stations to the success of the Flag Week War Bond Campaign of 1943 is an additional compliment to their magnificent record of unselfish service to the ideals and institutions symbolized by the Flag of the United States."**

PAYNE NOMINATION WITHDRAWN

President Roosevelt on Wednesday nominated George Henry Payne to succeed himself on the Federal Communications Commission, for a period of 7 years, effective June 30. On Thursday, the President withdrew that nomination and no explanation is made for its withdrawal.

NAB FILES BRIEF IN TECHNICIAN CASE

(Released by NAB News Bureau)

NAB has urged the San Francisco regional War Labor Board to reject an arbiter's award which stated that the job of a radio technician was the same no matter where he worked.

Award was made by George Cheney of the U. S. Conciliation Service, sitting as an arbiter in a wage dispute between station KPAS, Pasadena, California, and the International Brotherhood of Electrical Workers, local 40. It was subject to review under executive orders 9250 and 9328 by the War Labor Board.

The NAB brief was filed at a board hearing in Los Angeles. The text follows:

In the Matter of Arbitration
between
Pacific Coast Broadcasting Company of Pasadena, California,
and
Studio Electricians, Sound and Broadcast Technicians Local No. 40, of Hollywood, California, affiliated with the International Brotherhood of Electrical Workers

Case No. 10-3726

BRIEF
of
The National Association of Broadcasters

1. The National Association of Broadcasters is a trade association representing 500 of the country's 900 radio broadcasting stations. Its membership comprises a cross section of the industry, including networks, large stations, medium sized stations, and small stations. Station KPAS is not a member of the Association. The NAB's interest in the proceeding is due to principles important to all smaller radio broadcasting stations. The NAB is interested in any wage adjustment at station KPAS only as it might affect these principles.

2. The arbiter apparently based his award on the difference between the salaries paid at Station KPAS and those paid at the larger stations in the Los Angeles area, claiming that this difference constituted an inequality and/or gross inequity under the terms of Executive Order 9250. Although Executive Order 9328 eliminated inequalities and/or gross inequities as a basis for wage or salary increases (6, Wage and Hour Reporter, 353), the NAB maintains that even under Executive Order 9250 a differential between the wages paid at a smaller station and those paid at larger stations did not and does not constitute an inequality and/or gross inequity.

3. Latest available statistics from the Federal Communications Commission (for the week of October 12, 1941) show that the average compensation of operating technicians throughout the United States in 67 clear channel stations was $61.06; in 315 regional stations, $43.31; in 435 local stations, $29.13. These differentials between large and medium, and medium and small stations have been a part of radio broadcasting's wage structure since the industry's birth. They are in some measure due to the differences in ability to pay on the part of the employer (the larger stations, by and large, being the more prosperous). But they are mainly due to the differences in the services rendered by the technicians and by the differences in requirements.

When the arbiter said that, "evidence discloses that the work of regular technicians is substantially the same in all stations", and that, "these intra-industry differentials cannot be rationalized on any basis whatever," he displayed only a superficial knowledge of the work of the craft. Saying that the work of a technician in a small station was the same as that of a technician in a large station would be the same as saying that the work of a streetcar motorman was the same as that of the engineer on the Pennsylvania's electrified "Congressional Limited" because both operated an electrically driven conveyance.

For many years it has been the practice of larger stations to recruit their technical personnel from smaller stations. Smaller stations have served as training schools for the larger. The usual radio technician, after a brief study course, gets a job in a smaller station to gain the experience he knows is necessary for work in a larger station. While at the smaller station he frequently continues outside study to supplement this experience. In many larger stations a degree in electrical engineering, as well as experience in a smaller station, is frequently required. The work in a smaller station is not so exacting. Frequency deviations, or even brief shut-downs, owing to technical failures, are not regarded as of nearly the same importance in a smaller station as in a larger one. In a smaller station technicians ordinarily are not required to be able to meet any technical problem which may arise, while in larger stations each technician on the staff is ordinarily supposed to be able to meet any emergency. In other words, although "radio technician" is used to describe certain duties in both large and small stations, the jobs are usually different and usually require different classification when salaries are fixed. For these and other similar reasons, the differentials between the salaries of technicians in various sizes of stations have grown up. They are part of the wage structure of the radio broadcasting industry.

The NAB is of the opinion that your Board would be exceeding its authority even under Executive Order 9250 if it should adopt the principles stated by the arbiter that, "to grant continued existence will most certainly injure morale and militate against the effective prosecution of the war by a most important industry." To the contrary a great many smaller stations are now operating at a deficit, while many others are on the verge of writing their balance with red ink.

Local advertising is off in many places. The Federal Communications Commission and the Office of War Information are concerned lest the end of this year finds a great many smaller stations, vital to the war effort, off the air because of financial difficulty. Establishing the principle that all technicians should be paid the same salary no matter where they work would hasten the financial collapse of many smaller stations.

4. It may be assumed that your Board in considering this award will now see whether it is in line with the wage bracket policy enunciated by the Director of Economic Stabilization under Executive Order 9328 (6, Wage and Hour Reporter, 441). If your Board does consider whether the salaries fixed by the arbiter are in line with this policy, the NAB is of the opinion that the salaries of technicians only in stations of similar size and condition * in the Los Angeles area should be considered in determining the brackets. The reasons for this are the same as those stated in paragraph 3 above Otherwise the so-called "bracket policy", if loosely applied, might be used to destroy the principles enunciated above. Figures for proper brackets could be obtained through the National Association of Broadcasters, the Southern California Broadcasters Association, or the Federal Communications Commission.

5. In his discussion of the case, the arbiter hinted that there might be some justification for basing the salaries of radio broadcast technicians on the wages of ordinary electricians. Although the arbiter discarded this principle in his "decision", the NAB wishes to point out that this principle is wholly fallacious. One of the principal factors in determining the hourly wages of journeyman electricians was the irregularity of employment. By and large, there is no irregularity of employment in radio broadcasting. The vast majority of technicians are employed on a weekly basis and work the year around. There is also little or no comparability between the work of a radio technician and an ordinary journeyman electrician.

Joseph L. Miller,
Director of Labor Relations,
National Association of Broadcasters.

Washington, D. C.
June 28, 1943.

TEST AIR RAID CONFUSION IN PHILADELPHIA'S 6 STATIONS AGAINST GIVING "ALL-CLEAR"

Recent discrepancies between the radio "all-clear" and the audible sirens, said to be the result of errors in the offices of the authorities, charged with furnishing the information to radio stations, have caused six Philadelphia stations to discontinue the "all-clear" signal.

Stations KYW, WCAU, WFIL, WIBG, WIP and WPEN are the stations involved. They issued the following joint statement:

"In order to eliminate confusion to the public caused by the failure of the military and the civilian defense authorities to furnish the radio stations with prompt and dependable contemporaneous advices for giving the "all-clear" signal at the termination of test blackouts in this area, the Philadelphia radio stations have notified the Army Service Commands and the Philadelphia Office of Civilian Defense that from now on the radio stations will not attempt to give the "all-clear" signal, but are willing to report the occurrence of the signal as a news item as soon as practicable after it has been heard."

The radio stations believe it is unfair both to themselves and to the public for the present unsatisfactory method to be continued. The stations believe that the public should, therefore, concentrate on the audible sirens for the "all-clear" instead of looking to the radio for it until the Army and Civilian Defense can get together and work out a plan that is practicable.

Statement by Director Landis

Regarding the Philadelphia situation OCD Director Landis stated to NAB yesterday:

"The authority for issuance of the "all-clear" signal and the timing of such signals rests entirely with the Army Service Command under Air Raid Protection Regulation No. 1, issued by Lieutenant General Hugh A. Drum, Commanding General, Eastern Defense Command and First Army. The Third Service Command, with headquarters in Baltimore, Maryland, has full jurisdiction over all air raid signals in tests conducted in Pennsylvania. New Jersey is under jurisdiction of the Second Service Command, with headquarters in New York. This is because only the military can determine with authority when a raid is imminent and when all danger has passed.

"Since this is true, Civilian Defense cannot accept responsibility for any failure to synchronize the various radio stations in connection with the announcement of an "all-clear." The problem the Army has in this connection is in some respects technically difficult, but I do not believe it would help matters for Civilian Defense to inject itself into the matter."

More Information from Broadcasters

Following receipt of the Landis statement, NAB located a Philadelphia station manager who has maintained an accurate and complete file on the long series of unfortunate incidents in connection with practice air raids. It develops that the June 23 series of incidents were the straws that broke the camel's back.

---

* Such as network affiliation, power, volume of business and card rate.

How Public Was Confused

As an example of what happened during the last blackout, the Philadelphia informant said that two of the six stations that issued the joint statement, printed above, were not included in the 10:51 p. m. conference call. The four other stations were advised by call from the office of Major Elderdice that they should broadcast the all clear at 10:55 p. m. This was done by some stations. As it turned out these announcements were four minutes ahead of the downtown audible. Others, because of past experience, played safe and waited until the siren was heard in the downtown section at 10:59. Accordingly these signals coincided with the audible in the downtown section.

Adding to the confusion was the fact that the audible "all-clear" was given in the suburbs at 11:03, eight minutes after some radio listeners heard the "all-clear" on their radios at 10:55.

Such people acted in good faith, turned on their lights and immediately had arguments with block wardens, who, of course, did not hear the "all-clear" until 11:03. Accuracy of the broadcast "all-clear" was brought into question.

One station received a call from the Army at 11:00 p. m. stating that the "all-clear" was to be given at 10:55.

Adding more fuel to the fire, the Philadelphia broadcaster said, was a statement by the local OCD to Philadelphia papers that radio stations had sounded the "all-clear" too soon.

Confusion Must End

The Philadelphia story is only one of other similar stories.

But there need be no divided authority. Responsibility is indicated in FCC Restricted Order No. 2 now in the hands of broadcasters. However, if those in authority fail to make workable plans and then implement them properly, broadcasters are correct in attempting a remedy with vigorous protests. Such a serious condition should not be permitted to continue, because it is contrary to the public safety and to the winning of the war.

It is reported that a number of Philadelphia conferences with the Army, OCD and broadcasters have failed to produce a solution up to the present time.

PUBLIC RELATIONS COMMITTEE CHICAGO MEETING REPORT

(Released by NAB News Bureau)

"The public relations work of the radio industry is largely a responsibility of local stations in local communities," stated Edgar Bill, of WMBD, Peoria, Illinois, chairman of the NAB public relations committee, following a two-day meeting in Chicago at which the committee adopted a "grassroots" policy and outlined a complete field of operation to be incorporated into a working plan.

Acting in an advisory capacity to the industry, the committee adopted a resolution outlining the importance of news and requesting the NAB board of directors to appoint a radio news committee, consisting of station managers and news editors whose objective shall be the advancement of radio as a medium of news transmission.

The appointment of district public relations chairmen in the seventeen NAB districts, now under way by the board of directors, was discussed and applauded. Local station management will also be requested to place someone in charge of public relations for the station, if this has not already been done. All will cooperate with national headquarters.

It was pointed out that a co-ordinated unit of this type will enable headquarters to speak more readily for the industry as a whole on national issues and will be of great mutual benefit in shaping local activities.

Editorial 'Silence' Discussed

Discussion of the Supreme Court decision of May 10th and new legislation brought up the matter of radio's editorial silence. The committee decided that the best policy, in its opinion, was the aggressive promotion of public forums and individual speakers offering the right of reply. "This," said Bill, "while conforming to the Code, will still accomplish as much as a declared editorial policy, perhaps even more."

Members of the public relations committee attending the two day session, in addition to Bill, were: Lawrence W. McDowell, KFOX; Craig Lawrence, KSO; Leslie W. Joy, KYW; John Patt, WGAR; Edgar H. Twamley, WBEN; Dr. Frank Stanton, CBS; and Judith Waller, NBC, Chicago, appearing for Frank M. Russell, NBC, Washington. Representatives of NAB in attendance were C. E. Arney, Jr., secretary-treasurer; Willard D. Egolf, assistant to the president, and Walt Dennis, chief of the NAB news bureau. Kern Tips, KPRC, was unable to attend.

Another meeting of the committee was voted for early fall.

Broadcast Advertising

NEVILLE MILLER ADDRESSES AFA WAR ADVERTISING CONFERENCE

Egolf Re-elected Vice-President

With station men, Neville Miller and staff personnel present, NAB was well represented at the Advertising Federation of America War Advertising Conference, New York City, June 28-30.

Miller addressed delegates on the subject of the powers now residing with the FCC as result of the Supreme Court decision of May 10, 1943. (Full text of this address will be sent to members as a special bulletin within a few days.) Temper of the federation was expressed in a resolution indicating "profound concern" over the line of reasoning revealed in the decision and urging Congress to consider new legislation. Full text of the resolution appears elsewhere in this issue of the "Reports."

Willard D. Egolf, assistant to the president, NAB, was re-elected vice-president of the Federation Tuesday afternoon. Egolf presided over the Advertising Club Conference on War Activities, presenting Chester LaRoche, chairman of the War Advertising Council; Herman Wolf, War Production Drive; E. A. Sheridan, special OCD representative, and Paul Bolton, former ODT campaign sections chief.

Lewis H. Avery, director of the department of broadcast advertising, NAB, presided over the Wednesday session addressed by Miller. Avery also presented Fred H. Kenkel, C. E. Hooper, Inc., vice-president, who used charts and statistics gathered by his organization in showing "How We Listen to Radio in Wartime." 1943 reveals an all-time audience high. Avery closed the session by giving comparative figures on the distribution of the national advertiser's dollar in all media, showing radio's tremendous gains in the last ten years.

NAB Display

The NAB display at the AFA Conference, was devoted to "Radio in the War."

WGAR, Cleveland, WTAD, Quincy, WSYR, Syracuse, and WBAL, Baltimore, took advantage of the invitation, printed in NAB Reports of June 11, to display promotion pieces which tied in with the central theme of the display.

COLUMBIA PICTURES LAUDS RADIO ADVERTISING RESULTS

An eight-week radio campaign for Columbia Pictures' production of "The More the Merrier" on a budget of $100,000 was considered a prime factor by the picture company for the picture's rolling up of larger first week grosses than any other photoplay produced by that studio. Variety reported the above in its June 30 issue.

CBS AFFILIATES KNOCK 'HITCH-HIKE' ANNOUNCEMENTS

The following resolution was adopted at the First District CBS Affiliates' Meeting at the Hotel Statler, Boston, June 23, 1943:

WHEREAS the so-called hitch-hike and cow-catcher announcements presently used on network programs tend to lower the standards of good broadcasting, and,

WHEREAS, such announcements are considered to be a violation of the responsibility placed upon radio station licensees to operate in the "public interest, convenience and necessity," and,

WHEREAS, the use of such announcements was permitted without consent of their affiliates,

Now, therefore, be it resolved, that Franklin Doolittle, 1st District Representative of the CBS Advisory Committee, is instructed to convey to the proper officials of the Columbia Broadcasting System a request that immediate steps be taken to eliminate from network programs the use of hitch-hike, cow-catcher or other similar announcements as soon as may be practicable.

KFXJ RENDERS NOTABLE PUBLIC SERVICE

(Released by NAB News Bureau)

(The following account of the part Radio Station KFXJ and its manager, Rex Howell, played in the recent Grand Junction, Colorado, explosion story is passed on for your information and use as you see fit.)

At 2:00 A.M. Monday, June 28, two carloads of munitions caught fire in the Grand Junction, Colorado, railroad yards, touching off a series of explosions lasting more than two hours.

Shrapnel and shells rained over a wide area. City residents, unaware of the cause and taking fire equipment sirens as an air-raid alarm, were thrown into state of near panic. Police and the Offices of Civilian Defense headquarters were swamped with telephone calls and the telephone company reported a hopeless jam within a few minutes.

Rex Howell, manager of the city's radio station, KFXJ, warmed up his transmitter, contacted the military authorities and obtained permission to broadcast complete story of explosion and to afford facilities to police to explain the situation to the people.

Repeated explanations and bulletins were broadcast urging the people to remain under shelter and not to telephone unnecessarily. Within a few minutes after the first broadcasts the telephone company reported a 75 per cent drop in traffic.

Throughout the day and evening the station continued to air bulletins warning people to say away from danger areas and cautioned people against picking up unexploded shells for souvenirs, and advised listeners to report locations of all shells they found.

Military authorities and police in the area have publicly cited Howell and his station for outstanding public service. A note of interest is that United Press scored a clean beat on the story—KFXJ is a UP client.

NLRB ANSWERS QUESTIONS ON INDIVIDUAL PAY RAISES

The National War Labor Board this week answered some of the questions that have arisen about individual pay increases under General Order 31 (NAB REPORTS, p. 282).

The text of the clarifying order:

In order to dispose of any doubts with respect to the intent of General Order No. 31, the National War Labor Board states as follows:

(1) Job classification *rates* or rate *ranges* presuppose more than mere descriptive titles of positions. The job classification must be clearly defined and described as to content. When different skills and responsibilities are necessary, there must be different job classifications bearing their own rates or rate ranges. A mere descriptive job title and a poorly defined or extremely wide rate range is not a job classification rate range.

(2) Job classification *rates* of *rate ranges* must have been in existence properly on May 31, 1943. They must be those which were in existence prior to October 3, 1942, or those resulting from permitted adjustments subsequent to that date, or rates set for new jobs under either the former or the revised General Order No. 6. Improper adjustments of rates for job classifications or for individual employees are not a basis for determining a job classification rate or rate range.

(3) Where proper job classification rate ranges existed on May 31, 1943, but no plan, as defined in Subparagraphs 1, 2, or 3 of Section I-A-1-b, individual adjustments may be made within and between the job classification rate ranges in accordance with Subparagraph 4 without Board approval. But an employer may not substitute for an existing plan (as defined in subparagraphs 1, 2, or 3 of Section I-A-1-b) any new plan (including a plan embodying the methods set forth in Subparagraph 4 of Section I-A-1-b) without first obtaining Board approval.

(4) In adopting a plan of making individual adjustment in accordance with the criteria set worth in Subparagraph 4 of Section I-A-1-b, an employer may not use both merit increases and automatic length-of-service increases for individual adjustments with respect to a given job classification. This does not preclude Board approval of any plant which provides for both merit and automatic length-of-service adjustments.

(5) Modifications of existing plans of making individual adjustments (including apprentice or trainee programs) require Board approval.

(6) Where no proper job classification rates or rate ranges existed on May 31, 1943, individual adjustments may not be made without Board approval until a schedule, as defined, is approved by the Board.

OVERCHARGING ON BATTERIES BELIEVED NOT TOO WIDESPREAD

An AP story dated June 29, quotes OPA as reporting the receipt of "complaints that farmers in various sections are being charged $10 to $14 for farm radio battery packs which normally retailed for $5 to $7."

OPA asked farmers to report any overcharge to their nearest rationing board.

Because most farm radio battery packs are sold by well established dealers, well known throughout their community, or are obtained from the mail order houses, NAB believes that the "black market" instances are not numerous.

However, OPA is probably justified in issuing such a statement to guard purchasers against the possibility of overcharge. Any buyers who are asked to pay more than the ceiling price should certainly follow OPA's advice and report the fact to their nearest rationing board.

WBT GRADUATES 20 WOMEN

Grant Carey, WBT engineer-instructor, reports that more than twenty women have graduated from his classes in Radio Operations and Maintenance. The streamlined course is of two and one-half hours' duration, three nights per week, for thirteen weeks.

RADIO TECHNICAL PLANNING AGENCY

Authorized representatives of the Radio Manufacturers' Association and The Institute of Radio Engineers met on June 25, 1943, in Washington, to consider the organization of the proposed Radio Technical Planning Agency.

Encouraging progress was made and agreement was reached on the general principles underlying the plan.

It is expected that final agreement on the details of the proposed plan will shortly result, as indicated in the statement issued by Haraden Pratt, chairman of the I. R. E. Committee on the Radio Technical Planning Agency.

WCAU ENGINEER IS NAVY LIEUT.

Charles W. Robinson, WCAU master control engineer for the last seven years, has been commissioned a lieutenant in the U. S. Navy and has reported for indoctrination in the middle-west. Lieutenant Robinson is 38 years old, married and the father of two children. He is a graduate of the University of Pennsylvania and has served several "hitches" as a ship-going radio officer.

FEDERAL COMMUNICATIONS COMMISSION

FLY SAYS FCC HAS 'NO DESIRE' TO SUCCEED OWI

Domestic operations of OWI is doing a very essential job and doing it in a very splendid manner, FCC Chairman James Lawrence Fly told a news conference early this week.

He made this remark in connection with rumors to the effect that the FCC might take over some of these operations in connection with radio. Fly said that insofar as he knows the FCC does not have the slightest desire to enter into this work in any way. He said that it is his opinion that it would be an inappropriate line of work for the Commission.

Chairman Fly told the conference that this would be a particularly bad time for the FCC to enter into the picture when there are so many false and malicious rumors and statements about the Commission's undertaking to run the programs of the radio stations and he said he thinks that it should be made doubly clear that it has not done anything of that sort and does not plan anything of that sort, in view of the importance of not merely keeping radio free, but also of having everybody understand that it is completely free so far as the licensing power is concerned. Fly said he felt that such suggestions came from those who want to make trouble for the Commission and perhaps for the OWI. The Chairman said that he thinks that the suggestions came from somebody in the radio industry and "some of those parasites."

PAYNE RENOMINATED

President Roosevelt on Wednesday sent the name of George Henry Payne to the Senate to succeed himself as a mmber of the Federal Communications Commission. His name has been referred to the Senate Committee on Interstate Commerce. The reappointment is for a seven year term as of June 30.

DODD CHARGES DROPPED

The FCC held a full hearing on the administrative charges made against William E. Dodd, Jr. on May 19, 1943 and May 24, 1943, to the effect that he had made false, misleading or conflicting statements to government officials in the course of recent inquiries. On the basis of all of the pertinent documents, the records of other hearings and upon the testimony given in the hearing, the Commission found that none of the charges is substantiated. It accordingly directs that the said charges be dismissed.

FCC TO PERMIT OCD TO OPERATE WERS AS NEEDED

To provide for the rapid mobilization of the nation's protective facilities in meeting "emergencies endangering life, public safety, or important property," the FCC has amended Part 15 of its Rules, effective immediately, to permit Civilian Defense stations in the War Emergency Radio Service to operate in any emergency which might adversely affect the war effort.

Under the amended rules, Civilian Defense licensees in the WERS may now use their stations to provide essential communications over limited distances in the event of emergencies such as floods, explosions in munitions plants, hurricanes, fire and other emergency situations affecting the nation's security. Prior to this amendment, these stations were authorized to be on the air only "for essential communication relating to civilian defense and only during or immediately following actual air raids, impending air raids," and other enemy operations, or for purposes of testing and drill.

To implement the "mutual aid" program inaugurated by the Office of Civilian Defense, the amended rules also provide for the designation of one or more of the licensed WERS stations as "control units." So that fire-fighting and other facilities to be used in "mutual aid" programs may always be in readiness, Civilian Defense licensees in this service may use their station units, under the supervision of such "control units," during the first 15 minutes of each hour, for the exclusive purpose of handling essential communications preparatory to any anticipated emergency.

The use of Civilian Defense Stations in connection with "mutual aid" programs is under the jurisdiction of the station licensee and radio aide for the purpose of providing emergency communication relating directly to the activities of the United States Citizens Defense Corps or other officially recognized organizations.

It is anticipated that this change in the Rules will provide increased opportunities for amateur radio operators as well as other qualified radio operators, technical men, and engineers to contribute their time, energy and talent to the war effort. At the present time, there are in the War Emergency Radio Service 192 Civilian Defense, eight State Guard, and two Civil Air Patrol station licensees, as well as many more licensed operators. Each station licensee may use from two to 100 or more radio station units, whose operation is coordinated to form a comprehensive local communications system.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, July 5th. It is subject to change.

Wednesday, July 7

KMTR—KMTR Radio Corp., Los Angeles, Calif.—Renewal of license, **570 kc.**, 1 KW, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted construction permit (B4-P-3522) to move main studio and transmitter from New Albany, Ind., to Louisville, Ky.

WDAK—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—Granted construction permit (B3-P-3529) to move transmitter and studio from West Point, Ga., to Columbus, Ga.

WWDC—Capital Broadcasting Co., Washington, D. C.—Granted petition for waiver of Sections 2.53 and 13.61 of the Commission's Rules so as to permit operation of WWDC's synchronous amplifier by remote control from the main transmitter location for the duration of the war emergency.

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—Granted renewal of license for regular period.

KSJB—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Adopted an Order granting petition for postponement of effective date of the Commission's Order of June 23, 1943, cancelling, effective June 26, the special service authorization issued on June 1 to Jamestown Broadcasting Co., Inc., to operate Station KSJB on **600 kc.**; changed effective date of the Order of cancellation from June 26 to July 7, 1943. (Docket No. 6519)

DOCKET CASE ACTION

The Commission has announced adoption of an Order granting the application of Port Arthur College (KPAC), Port Arthur, Texas (B-179), to increase power on 1250 kilocycles from 500 watts using directional antenna at night, to 1 kilowatt unlimited time, and to make changes in the directional antenna for nighttime operation, subject to the condition that no interference will be caused in contravention of the terms of the North American Regional Broadcasting Agreement.

MISCELLANEOUS

WOKO—WOKO, Inc., Albany, N. Y.—Denied petition to continue from July 1, 1943, hearing on application for renewal of license of Station WOKO. (Docket No. 6486)

KSJB—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Adopted Order, effective 12:01 a. m., June 26, 1943, cancelling the special service authorization issued KSJB on June 1, 1943. The special service authorization granted authority to KSJB to operate on **600 kc.** for the period pending hearing on and until determination by the Commission of application of KSJB for modification of license to decrease nighttime power and change frequency from **1400 kc.** to **600 kc.** It now appears that Station KSJB has retained in its possession the crystals for operation on **1400 kc.** and that, therefore, the grounds given by the Commission as to why in its opinion public interest, convenience or necessity would be served by a grant of the special service authorization no longer exist. (B4-ML-1115)

WINS—Hearst Radio, Inc., New York, N. Y.—Granted modification of construction permit which authorized increase in power, change in hours of operation, installation of new transmitter and directional antenna for day and night use, and move of transmitter, for extension of completion date from June 6 to December 6, 1943. (B1-MP-1714)

WINS—Hearst Radio, Inc., New York, N. Y.—Granted modification of construction permit which authorized increase in power, change in hours of operation, installation of new transmitter and directional antenna for day and night use, and move of transmitter, for extension of completion date from June 6 to December 6, 1943. (B1-MP-1715)

KGBK—Helen Townsley, area of Great Bend, Kans.—Granted further extension of license upon a temporary basis only, pending determination upon application for renewal of relay broadcast station license, in no event later than August 1, 1943. (B4-SRY-240)

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Granted further extension of license upon a temporary basis only, pending determination upon application for renewal of relay broadcast station license, in no event later than August 1, 1943. (B3-SRY-132)

Beauford H. Jester, Individually and as Trustee for W. W. Callan, DeWitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert E. Levy, Ross M. Sams, and Davis Stribling.—Adopted an order granting petition for a continuance of the oral argument on the application for construction permit for new standard broadcast station; continued oral argument until October 6, 1943. (Docket No. 6218)

APPLICATIONS FILED AT FCC

810 Kilocycles

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Special service authorization to operate unlimited time, with power of 500 watts night, 1 KW day, for period ending 2-1-44.

930 Kilocycles

KTKN—Edwin A. Kraft, Ketchikan, Alaska.—Authority to install new automatic frequency control.

990 Kilocycles

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Construction permit to make changes in equipment.

1090 Kilocycles

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Special service authorization to install new transmitter and operate with power of 1 KW, for period ending 4-1-44.

1240 Kilocycles

KFXM—J. C. Lee & E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.).—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

KYOS—Merced Broadcasting Co., Merced, Calif.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

W43B—The Yankee Network, Inc., Boston, Mass.—License to cover construction permit (B1-PH-51) for new high frequency (FM) broadcast station, *in part*.

TELEVISION APPLICATION

W6XYZ—Television Productions, Inc., Los Angeles, Calif.—License to cover construction permit (B5-PVB-33) as modified for new experimental television broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Hillyard Optical Company.—Misrepresentation in the sale of eye glasses, lenses and frames is alleged in a complaint issued against Francis R. Hillyard, Sr., Bernard B. Hillyard, Francis R. Hillyard, Jr., and Frederick C. Hillyard, who operate optical stores in Washington, D. C., under the firm names Hillyard Optical Co., Hillyard's Optical Service, Dr. F. Hillyard & Son, and F. R. Hillyard & Son. John Giddings, who was an employee of the Hillyards prior to February 1, 1943, also is named a respondent in the complaint. (4984)

Preferred Havana Tobacco Co., which has its principal office at 257 Fourth Ave., New York, is charged in a complaint with falsely representing that the cigars it manufactures at its Tampa, Florida, factory are made in Cuba and imported into the United States. The respondent company trades under the names Bustillo Bros. & Diaz, Inc., Calixto Lopez & Co., Lopez Hermanos and Bances Y. Lopez. (4983)

H. D. Shipp Co., Inc., 12 S. Capitol Ave., Indianapolis, and its president, H. D. Shipp, are charged in a complaint with misrepresentation in the sale of a drinking glass designated "Sneaker," which is designed to eliminate the objectionable tastes of liquids drunk from it. (4986)

United Art Studios, 1615 G St., S. E., Washington, D. C., and Benjamin Kadet and Ada Kadet, trading as Kadet Art and Frame Company, 909 Fifth Avenue, Pittsburgh, have been ordered to cease and desist from the use of false and deceptive practices in the sale and distribution of photographic enlargements and frames produced by the Kadet Company and sold by the respondent Klein. (4924)

United States Forwarding System, Prudential Building, Buffalo, and Samuel Rosenthal, manager of the business, are charged in a complaint with misrepresentation in connection with the sale of postal card questionnaires used in obtaining information concerning alleged debtors of the firms and individuals who purchase the cards from the respondents. (4985)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Clear Springs Hatchery, McAlisterville, Pa., entered into a stipulation to cease and desist from the use in advertising matter of any statement or representation which tends to convey the belief that the chicks he sells are hatched from eggs produced at his hatchery when actually they are hatched from eggs obtained from supplying farmers or poultry raisers, or which tends to create the impression that breeder stock of the Hanson or any other U.S.R.O.P. strain has been placed in the flocks of all supplying farmers; that all chicks sold by his hatchery reflect the strain of U.S.R.O.P. poultry; or that chicks sold under any specific trade designation as, for example, "Clear Spring Hanson Strain Leghorn Big Type," are procured from J. A. Hanson or any other U.S.R.O.P. breeder. (3674)

National Academic Publications, 22 South St., Catherine Place, Atlantic City, N. J., engaged in the sale of yearbooks and school annuals, stipulated that he will discontinue representing that he operates a printing, engraving, lithographing or binding business or that he owns and operates or directly controls an establishment in which yearbooks or other publications are printed or produced. (3673)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Empire Peat Soil Sponge Company, 1781 Riverside Drive, New York, has stipulated to cease and desist from using the words "peat moss" or "moss peat" to designate any peat not derived from Sphagnum moss, or otherwise representing that any of the peat he sells is moss peat when it is not derived from Sphagnum moss. (4641)

Motion Picture Advertising Service Co., Inc., et al.—Five corporations engaged in the production and distribution of commercial motion picture films used by national advertisers, and two booking agencies and a trade association they organized, have been ordered to cease and desist from entering into, carrying out or continuing any planned common course of action or conspiracy which has the effect of unduly restraining trade or creating in the respondents a monopoly in the sale, lease, rental and distribution of such films.

Respondent distributors named in the order, who are said to control more than 90 percent of the business done in their industry, are Motion Picture Advertising Service Co., Inc., 1032 Carondelet St., New Orleans; United Film Ad Service, Inc., 2449 Charlotte St., Kansas City, Mo.; Ray-Bell Films, Inc., 2269 Ford Parkway, St. Paul; Alexander Film Co., Colorado Springs, Colo.; and A. V. Cauger Service, Inc., 109 Winner Rd., Independence, Mo. Their trade association is the respondent Association of Advertising Film Companies. (4736)

More Details on the War Advertising Council Broadcast

Preliminary information regarding the nation-wide broadcast under the auspices of the War Advertising Council and OWI was given in last week's NAB REPORTS (page 291). Chester La Roche, chairman of the War Advertising Council, advises that James F. Byrnes, director of war mobilization; Judge Marvin Jones, food administrator; Elmer Davis, OWI director; and Donald Nelson, WPB head, will appear in addition to La Roche himself on this outstanding program.

Time of the broadcast has been lengthened and will start at 1:15 p. m., eastern war time, over the complete facilities of the NBC, and will continue to 2:00 p. m., giving ample time for all speakers to present fully their views.

The purpose of this program is to enlist the cooperation of the important business elements in every community in aiding the war effort by judicious placement and use of advertising budgets. This subject is one of deep interest to all advertising media and particularly to radio broadcasters.

In many communities large luncheon meetings are being arranged so that the community business leaders may be gathered in one place to listen to the broadcast. These luncheons are the joint undertaking of all of the advertising media. In other communities leading business organizations are being urged to hold meetings of their key executives in board rooms to listen to the broadcast. Some radio stations advise that they have invited a list of outstanding business and community leaders to gather in the studio to hear the broadcast.

It is unnecessary to point out to all broadcasters the tremendous importance of this program. It marks the beginning of new phases of the War Advertising Council's activity. In fact it might be termed the culmination of much of the activity which has gone before. Broadcasting more than any other medium, is now in a position to cash in on this plea to business men and advertisers to assist in the campaign of advertising the war. We should make the most of the opportunity.

SENATOR WHEELER AGAIN SAYS HE WILL HOLD FCC HEARINGS

Senator Burton K. Wheeler, chairman of the Interstate Commerce Commission, reaffirmed his intention to give regulation of radio broadcasting by the Federal Communications Commission a "thorough airing" when members of Congress return from summer recess in an interview reported July 8 by the Associated Press.

Senator Wheeler made this statement in connection with comments he gave AP on Senator Robert Taft's speech (see Special Legislative Bulletin No. 8 enclosed with this issue of the REPORTS) in Congress July 8.

WAR LABOR BOARD HOLDS HEARING ON PETRILLO CASE

The National War Labor Board is holding a public hearing today (Friday) to determine whether the controversy between the music transcription companies and James Caeser Petrillo and his union is a labor dispute over which the Board should take jurisdiction.

On July 5, the Secretary of Labor certified the strike of the musicians to the Board. Four days earlier, the U. S. conciliation service of the Department of Labor, to whom the transcription companies had submitted the dispute, saw negotiations between them and Petrillo break down completely.

At that itme, Petrillo said his union would not make transcriptions any more at any price, observing that if the transcription companies gave his union their entire gross receipts of $4,000,000 a year, "it's still small peanuts to the Federation." He also said it was the broadcasting stations that he was after.

At the public hearing Friday, A. Walter Socolow, attorney for the transcription companies, will ask the Board to exercise its jurisdiction and order the striking musi-

WAR LABOR BOARD HOLDS HEARING ON PETRILLO CASE

(Continued from page 301)

cians back to work at once. It is reported that Petrillo is prepared to argue, in order that he may escape the jurisdiction of the National War Labor Board, that his ban does not constitute a strike. It will be recalled, however, that he has repeatedly maintained that his ban is a strike, and that his union, in fighting the Department of Justice's anti-trust suit last winter, successfully argued that the controversy was a typical labor dispute and thus not subject to the jurisdiction of the Federal Court. The Court upheld the union's contention, which was thereafter sustained by the United States Supreme Court.

After the National War Labor Board makes its decision in respect to the jurisdictional question, NAB will issue a Special Bulletin reviewing all recent developments and bringing the situation up to date.

COMMISSIONER CRAVENS DISSENTS

In an interview he granted a Washington *Times-Herald* reporter on July 6, 1943, Commissioner T. A. M. Cravens of the FCC is quoted as saying:

"I got in a row recently with some of the other Commissioners about some new regulations which I thought were interfering with the freedom of speech and private initiative. According to the Supreme Court vote on the matter, I was two-fifths right."

FTC ALLOWS MORE TIME ON ADVERTISING SURVEYS

The following statement was issued today by the Federal Trade Commission:

"At the direction of the Commission the Radio and Periodical Division has placed into operation a new schedule, wherein the usual typed copies of radio advertising script will be procured from individual radio stations, representing commercial announcements originating in their respective studios as individual broadcasters, at an average rate of twice yearly per station, starting with the opening of the new fiscal year on July 1, 1943.

"The actual calls for the commercial script covering station broadcasts in the interest of products moving in commerce, will continue to be issued for 15-day broadcast periods, as specified in advance notices sent out by the Federal Trade Commission, which allow adequate time for preparation of extra carbon copies as occasion may require. Also, the Commission will continue the issuance of its requests on a staggered monthly basis to groups of individual radio stations, selected both as to geographic location and proportionately as to transmittal power.

"The sampling of individual station commercial broadcasts covering the 15-day specified periods, should be considered as entirely separate from the weekly rendering by certain individual stations of commercial network announcements which may have originated in their respective studios, as originating key outlets of nation-wide and regional networks. Such commercial network script should be forwarded as in the past, on a weekly basis, to the Federal Trade Commission, through the head offices of the networks (or direct by the key stations, where centralized head offices are not maintained by certain cooperative regional network groups)."

Broadcast Advertising

DIETRICH DIRKS OF KTRI HEADS SALES MANAGERS COMMITTEE

Last Saturday, Neville Miller announced the appointment of Dietrich Dirks of KTRI-Sioux City, Ia., as Chairman of the Sales Managers and Sales Managers Executive committees. At the same time, he released the following names of the personnel of the Sales Managers Executive committee for the coming year:

C. K. Beaver, KARK, Little Rock, Ark.
Sam H. Bennett, KMBC, Kansas City, Mo.
Arthur Hull Hayes, CBS, New York, N. Y.
James V. McConnell, NBC, New York, N. Y.
John M. Outler, Jr., WSB, Atlanta, Ga.
W. B. Stuht, KOMO-KJR, Seattle, Wash.
John E. Surrick, WFIL, Philadelphia, Pa.

NEW COMMITTEE TO MEET IN NEW YORK JULY 14-15

The newly appointed Sales Managers Executive committee will hold its first meeting at the NAB New York office on Wednesday and Thursday, July 14 and 15, 1943. The meeting on the first day has been called for 10:30 A. M. and will be devoted to a discussion of industry sales problems arising in part from the war and its effects on advertising.

On the second day, the committee will hold a joint morning meeting with the Retail Promotion committee to see a preview of the widely-heralded Retail Promotion Plan.

WE NEED YOUR HELP

Much of the down-to-earth selling power of the Retail Promotion Plan depends upon an analysis of the present use of broadcast advertising by department stores and leading retail establishments. To help the Committee and Sheldon R. Coons to include the most complete analysis possible, won't you please do *two* things today:

1. **Fill out and return the Statistical Questionnaire on page two of the folder mailed you on May 27, 1943.**
2. **Write a letter immediately, telling in your own words and in your own way, some of your recent experiences with retail advertising.**

Your co-operation will be of genuine benefit in the preparation of the presentation.

COMMITTEE TO SEE PREVIEW OF RETAIL PROMOTION PLAN

Paul W. Morency of WTIC-Hartford, Chairman of the Retail Promotion committee, has called a two-day meeting of that group in New York on Thursday and Friday, July 15 and 16, 1943. The opening day will be devoted to a preview of the Retail Promotion Plan and to a discussion of the itinerary of the presentation that will be made from coast to coast.

"This is the most important meeting the committee has ever held," declared Mr. Morency in announcing the two-day session. "With sufficient funds assured to complete the project," he added, "we are now ready to review the work of the eminent counsel, Sheldon R. Coons, the specialists employed at the direction of the committee and the Jam Handy Organization which has been entrusted with the physical production of the presentation."

Although sufficient funds have been made available, Mr. Morency urged all stations which have not yet subscribed to this movement to do so at once, in order to insure showings of the presentation in as many communities as possible. At the same time, he urged all stations to fill out and return the Statistical Questionnaire and to write the letter requested by the committee in its mailing on May 27, 1943.

He has also invited the Sales Managers Executive committee to witness the preview of the Retail Promotion Plan on Thursday morning, July 15, 1943, since the project originated with a recommendation of that group to the Board of Directors following the NAB Convention in Cleveland in May, 1942.

Soon after the meeting, it is expected that the definite itinerary for the presentation will be announced to participating radio stations.

In addition to Chairman Morency, the personnel of the Retail Promotion Committee includes:

Robert E. Bausman, WISH, Indianapolis, Ind.
Gene L. Cagle, KFJZ, Fort Worth, Tex.
William Crawford, WOR, New York, N. Y.
Dietrich Dirks, KTRI, Sioux City, Ia.
John Esau, KTUL, Tulsa, Okla.
Kenneth K. Hackathorn, WHK-WCLE, Cleveland, O.
Arthur Hull Hayes, CBS, New York, N. Y.
Walter C. Johnson, WTIC, Hartford, Conn.
C. L. McCarthy, KQW, San Francisco, Calif.
James V. McConnell, NBC, New York, N. Y.
John M. Outler, Jr., WSB, Atlanta, Ga.
Oliver Runchey, KOL, Seattle, Wash.

Engineering

WPB PROMISES TUBES FOR THIRD QUARTER

A promise of radio tubes for civilian use was made to Honorable James F. Byrnes, director, Office of War Mobilization, by Ray C. Ellis, director, radio and radar division, War Production Board, on June 28, it was announced today by the NAB war committee.

The promise was given Director Byrnes after he had acted on the suggestion of Neville Miller to investigate the tube situation.

Since the seriousness of the tube situation is now officially recognized with relief promised by the government agency responsible for all tube production in the United States, opinion is widespread that Ellis will make good his promise.

The exchange of correspondence covering tubes appears below:

Letter to Director Byrnes from Neville Miller Dated June 17, 1943

"Lack of radio tubes for home sets has created an alarming problem. It has already seriously endangered the delivery of vital war messages from various government agencies and departments into the homes of citizens.

"It is our belief that the continued operation of mass communication throughout this nation is of the utmost importance and depends upon the immediate implementation of a balanced program which recognizes the needs of both the military and the civilian economy.

"National minimum requirements call for between two million and three million tubes per month. This is based on the maintenance of one set per radio home and excludes from consideration all automobile and portable receivers.

"Practically all dealer and jobber civilian tube stocks are exhausted. Only a limited quantity of tubes have reached civilians during the past eighteen months.

"The recently issued Order L-265 may control distribution. However, no directive is in effect to insure production of tubes in the quantity and of the type required to satisfy now critical needs. A program exists in WPB which should solve the tube problem if put into operation immediately.

FREE

"ABC of Radio"

Approximately 50,000 copies of the ABC of Radio remain at NAB Headquarters.

These should be distributed to schools, churches, educational and civic organizations, as well as interested private individuals.

NAB member stations who can make such use of the booklet will be supplied quantities desired upon request without charge.

Please try to file your request immediately.

"Concerning farm radio batteries, production and delivery to farmers for the quarter ending June 30th show improvement, but farm battery production continues insufficient to balance consumption, let alone overtake the accumulated deficit.

"It is my hope that in the national interest you will investigate these matters and take steps to insure the continued operation of civilian radio, without which no domestic government war program can succeed."

Letter to Director Byrnes from Ray C. Ellis Dated June 28, 1943

"Referring to your memorandum of June 18, 1943, regarding a letter of June 17, 1943, addressed to you by Mr. Neville Miller, President, National Association of Broadcasters, pertaining to radio receiving tubes.

"We recognize that there is a serious situation concerning radio receiving tubes for home receivers. We know that some tubes are being made available for civilian use and that material has been allocated and production has been authorized for civilian tubes, but due to the needs of the Military the production and distribution has not been effective in adequately providing for civilian radio needs.

"WPB Limitation Order L-265 should control distribution. Steps are now being taken to review all tube requirements, both civilian and military, and in the light of this review to work out schedules of production. This Division will see to it that the minimum civilian requirements are provided in the production during the third quarter.

"We recognize the need for the maintenance of civilian radio and we also appreciate that conservation is necessary to keep civilian radio requirements to a minimum in the light of Military radio requirements. This having been accomplished, we feel justified in insisting on the production of some civilian tubes.

"The Radio and Radar Division does not handle dry batteries for powering farm and portable radio receivers. We are turning your letter over to the Consumers Durable Goods Division, Mr. Dudley P. Felt, Director, in order that you may receive an answer concerning that portion of the National Association of Broadcasters letter dealing with batteries.

"We trust the foregoing information will be of assistance to you but if this office can be of any additional help, please feel free to call on us."

Mr. Ellis' letter was attached to Director Byrnes' reply to Mr. Miller.

STATION WHIO WORKS WITH HOME CITY WAR COMMITTEE

Officials of WHIO and the Dayton "Emergency Committee" are working together to increase the city's output of war goods. Additional war contracts are awaiting local industries as soon as it can be demonstrated to the local WMC area director, Marion Gregg, that capacity, manpower, and housing facilities exist for the purpose.

Appointment of the "emergency committee" was the first step in the campaign. This group immediately met with Robert Moody, WHIO general manager, Lester Spencer, assistant manager, and Bill Hamilton, production manager, all of WHIO. They agreed that the first job was to get housewives and other women, who had never before worked, into war production in the factories. To this end WHIO scheduled nine 5 minute programs weekly, urging the women to join the battle on the home front. Each broadcast originated in a Dayton war plant where women who are working the factories for the first time are interviewed by Mr. Hamilton.

While the programs are in progress the committee is engaged in easing the housing problem.

At the end of the first two weeks of combined effort, Gregg stated that he was already able to detect a large increase of housewives and other women who had responded to the call as result of the radio interview.

TO STATION MANAGERS:

If any of your capable and experienced former engineers or technicians, now in service, write you that they are not using their radio training, NAB may be able to help, providing such men desire to work in radio.

Send complete details of the man's former experience to Arthur Stringer, together with his present military address. He will bring the matter to the attention of the appropriate armed service.

Though two men were reassigned to radio this week, no promise of results are implied or intended by this offer. It is made solely in an effort to assist in the war effort.

ORCHIDS TO NAB FROM BSA

The following message was sent to Neville Miller by Elbert K. Fretwell, chief scout executive, Boy Scouts of America:

"At the thirty-third annual meeting of the National Council of the Boy Scouts of America held in this city on May 20, the delegates representing our five hundred and forty-one councils passed a resolution extending its greetings and appreciation to the many agencies and organizations which have cooperated and contributed to the effectiveness of the Boy Scouts of America during the past year.

"It gives me pleasure to convey on behalf of these delegates the appreciation and cordial good wishes of the Boy Scouts of America to you, representing the National Association of Broadcasters. All of us in Scouting feel that we could not accomplish our objects of character building and citizenship training without the intelligent support you and your associates so cheerfully give."

GIRL SCOUT LEADER REPORTS ON NATIONAL RADIO POLICY

Mrs. Lucille Clarke, head of the radio programs division of the Girl Scouts public relations division, wrote the following report after a recent trip which took in several NAB stations, to Dorothy Lewis, NAB coordinator of listener activities:

"First of all, I wish to say that without exception the station managers and other personnel with whom I talked were cordial to me and generous with their time. I think I'm not distorting the picture when I say also that after I had explained our official viewpoint on the use of radio by our members, they were pleased, and in some cases, surprised.

"Briefly, the points I touched on were: first, our desire to develop an intelligent and discriminating radio audience among the Girl Scouts, particularly by setting up local radio workshops through which the girls would have an opportunity to learn what makes radio tick. Second, our radio policy (emphasizing) quality not quantity broadcasts. Third, our need for assistance from the local radio station, as consultants for the workshop, and as the responsible agent who would audition all broadcasts before they went on the air. In this connection I said that we at National would back up any station which advised a Girl Scout group that it was not ready to put on a particular broadcast, but had better work on it further and come back later for another audition.

"I was very frank in telling these station men that I felt we were doing a public relations job for the (radio) industry. I explained that my reasons for undertaking this program were because I, and my organization, of course.

felt so strongly about radio being such a powerful medium for molding opinion that as a youth organization we were under obligation to see that it was used to the advantage of our members, and because radio is a vocation which should be opened up as one of the Girl Scout activity fields.

"I hope that when the occasion arises you will express my appreciation again for the cooperative attitude of your member stations."

DES MOINES RADIO COUNCIL IS FORMALLY ORGANIZED

The Des Moines Radio Council was formally organized in June at a meeting at which civic, club, government and broadcasting leaders from 40 Iowa cities attended. Mrs. Cyrus B. Hillis, appointed director of the council by Mrs. R. K. Stoddard, of Cedar Rapids, regional director of listener activities, NAB, presided.

Speakers presented were: Mrs. Stoddard; Ralph Evans, Davenport, public relations director of the Central Broadcasting Co. (WHO); Craig Lawrence, vice-president, Iowa Broadcasting Co.; Peral B. Broxam, Iowa City, WSUI program director, and W. I. Griffith, Ames, WOI manager.

Selected to form the council advisory council were:

Mrs. Bourke Hickenlooper, wife of Iowa's governor; Mrs. F. R. Kenison, Iowa PTA Congress president; Dr. Bruce E. Mahan, Iowa State University extension division director and radio committee chairman, National University Extension Association, Griffith; Mrs. S. E. Lincoln, Iowa PTA Congress; Newell McComb, Des Moines public schools superintendent; Mrs. Fred W. Weitz, editor, *Iowa Clubwoman*, IFWC organ; George Haskell, Iowa manpower commission; Jessie Parker, state superintendent of public instruction, and Forrest Spaulding, Des Moines librarian.

Others are: Mrs. E. D. Strong, president, Iowa League of Women Voters; Mrs. Gardner Cowles, Sr., Iowa Broadcasting Co.; Edwin Barrett, Drake University radio department superintendent, Evans; Agnes Samuelson, executive secretary, Iowa State Teachers Association; Mrs. Nyrton Skelley, Iowa American Legion Auxiliary department executive secretary; Dan O'Brien, Iowa American Legion commander; Rabbi Louis J. Cachdan, B'nai B'rith and Conference of Christians and Jews; Bishop Gerald T. Bergan; Bishop J. Ralph Magee; Mrs. Carl Weeks, Des Moines DAR radio chairman; Verner Haldene, community theater director, and Dr. Guy Wagner, Iowa PTA Congress radio chairman.

Committees and chairmen named were: allocation, Mrs. R. J. Laird; continuity, Mrs. W. P. Keasbye; talent and production, Mrs. Wesley C. Darby; survey and program evaluation, Mrs. Reuel H. Sylvester; promotion, Mrs. L. H. Bunce, and public relations, Mary Little.

CEDAR RAPIDS COUNCIL ELECTS

Mrs. J. C. Milner has been elected president of the Cedar Rapids Radio Council, of Cedar Rapids, Iowa. Mrs. Margaret Stoddard, regional director of listener activity for Iowa and chairman of the local Peabody awards committee, founded the Cedar Rapids council.

RADIO COUNCIL OF GREATER KANSAS CITY IS ORGANIZED

Representatives of 40 organizations, including broadcasting leaders, met in Kansas City, Mo., in June and formed the Radio Council of Greater Kansas City with Mrs. R. O. Baker, radio chairman of the local PTA, as president. A constitution and by-laws have been adopted.

Other officers are: vice-president, Mrs. J. H. Stales, State Federation of Womens Clubs; recording secretary-treasurer, Grace Franens, Kansas City University and Altrusa Club; corresponding secretary, Mariska Pugsley, Junior League, and executive board members, Edwin Browne, station KMBC; Dr. J. C. MacDonald, Council of Churches; Mrs. George P. Truitt, National New England Women, and Mrs. Charles Coplin, Council of Jewish Women.

Mrs. Truitt is chairman of the Peabody awards committee for the Kansas City area.

Rev. M. D. Garrett

NAB has received from one of its member stations, word of the activities of Rev. M. D. Garrett, styling himself an Evangelist. Should any station desire information regarding this person, NAB will be very glad to refer the request to the proper party.

FOREIGN PRONUNCIATIONS TIP FOR NEWS EDITORS

Jim Aull, news editor of KYW, has an angle on the foreign pronunciations problem which has worked out nicely in his shop.

Many months ago Aull began to work up a series of large panels, each panel representing a country. As foreign pronunciations information came in on his wire association machines, Jim would paste them up on the panel of the respective country in which the person or town whose name was involved existed.

As the war spread and the world became involved, proper foreign name pronunciations became a major broadcasting headache, but not at KYW's news room. All newscasters there have to do is check the panels and mark their copy accordingly.

Jim also pasted up pronunciations he and his staff culled out of dictionaries and from other sources when the press wires didn't come through.

Edward F. McKay

Edward F. McKay, legal assistant to Paul Walker, Federal Communications Commissioner, died here Sunday, after an illness of two weeks.

Mr. McKay was well known in newspaper and utility circles in Oklahoma where he formerly managed the Oklahoma Utilities Association. He had been assistant to Walker for five years.

912 Stations

There were no additions or deletions reported by the FCC during the month of June, 1943. A comparative table by months follows:

	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1

to succeed himself as a member of the Commission. On Wednesday of last week the President nominated Payne to succeed himself and the following day he withdrew the nomination without explanation. There had been some talk that Fly had asked the President to make this withdrawal.

At the conference Chairman Fly said he had been called to the White House to discuss another communication matter with the President and that it was not until he arrived at the White House that he knew the name was to be withdrawn or the reason for it. While he did not specifically say so Fly intimated that he now knows the reason for the withdrawal but he would not discuss it. During the course of discussing this matter he called attention to the fact that Payne had voted in most cases as he voted and supported the same policies that he did.

Fly, in answer to a question, refused to say what attitude the Commission will take regarding Messrs. Watson and Dodd in recommending that they be reappointed. He called attention to the fact however that up to this time the Commission had upheld them, leaving the inference that the Commission would in the future.

The chairman told newsmen that the army and the Commission had got along very well since the war began in Communication matters and he expressed the belief that it was not the army who had given the service letters to the Cox committee. He deliberately said nothing about the navy.

Fly said he thought he knew who had given the letters to the Cox committee and that that matter would be developed in the future.

Answering a question, Fly stated that the Commission has never received a reply from Representative Sumner, chairman of the House judiciary committee, in which it was asked that Cox be removed from the chairmanship of the special committee investigating the FCC.

The chairman told the conference the Cox investigation has impeded the work of the Commission and has taken up a lot of time of the Commission and its employees. He also said the Commission has never been notified of any of the hearings of the Cox committee except recently when he personally was called before the committee on an hour's notice. He stated that the Commission will meet all of the Cox charges in a convincing way at the proper time.

FCC TO CONTINUE TECHNICIAN SURVEY

In answer to a letter to Chairman James Lawrence Fly sent by Neville Miller (REPORTS, June 25, 1943, page 285), the FCC has notified NAB it will continue its postcard test survey of radio telephone operators.

All operators indicating interest in a professional career or change of position will have their names forwarded to NAB by FCC and, in turn, NAB will send these persons regular application forms for enrollment in the NAB technician pool.

Howard Frazier, NAB director of engineering, reports more than 300 names of technicians on hand available for employment.

He also urged station managers who employ technicians obtained through the NAB pool to advise NAB so names may be cleared from our files, else NAB will continue to issue their names and this may lead to a person being hired "away" from a station which itself had obtained the person's name through the pool.

CARLSON AND ROBERTSON NEW FCC APPOINTEES

Appointment of RICHARD CARLSON as director of personnel and WILLIAM B. ROBERTSON as director of budget and planning was announced by the Federal Communications Commission. Both men have had a wide and varied experience in government service.

Carlson comes to the commission with 28 years' diversified administrative and personnel experience in industry and government. Before his appointment to the FCC, Carlson was technical director of the supervision improvement program of the U. S. Civil Service Commission. From 1939 to 1942 he served as director of personnel for the Civil Aeronautics Administration and from 1935 to 1937 directed the personnel activities of the Farm Credit Administration. He was for eight years director of the personnel research bureau of San Francisco, Calif., a private consulting service in industrial relations.

Born in Nebraska, March 27, 1893, Carlson attended the University of Nebraska and graduated from Heald College in San Francisco. His publications include numerous books and articles on employee training and personnel management.

* * * *

Born in Charlotte County, Virginia, August 17, 1900, Robertson grew up in West Virginia, attending grade school and high school in Charleston. He was graduated from Harvard College in 1923 and from the graduate school of business administration of New York University in 1928.

Robertson was employed by the Columbia Gas & Electric Corporation from early in 1924 until November 1, 1934, when he accepted a position as fiscal officer in charge of the finance division of the Federal Surplus Commodities Corporation, later becoming treasurer of that Corporation. He was connected with the Federal Surplus Commodities Corporation and affiliated bureaus of the Department of Agriculture until his transfer to the FCC.

FM RULES MODIFIED

Because the demands of the military have greatly decreased the supply of trained personnel available for broadcast station operation, the FCC en banc has adopted order No. 111-A which further relaxes Section 3.261 of its Rules with respect to minimum operating requirements of high frequency (FM) stations. Order 111-A continues the requirement that each FM station shall render at least 6 hours program service each day, except Sunday, between 6 a. m. and midnight, but suspends the requirement that two hours of this service shall be devoted to programs not duplicated simultaneously as primary service in the same area by any standard or any high frequency broadcast station.

It is noted, however, the Commission did not suspend that section of its Rule 3.261 which places upon each FM licensee the duty to develop, insofar as possible, a distinct and separate broadcast service from that otherwise available in the service area.

At the same time, the Commission announced that it will authorize technical changes in the operation of high frequency (FM), television and noncommercial educational broadcast stations during the war period, where desirable to conserve equipment, particularly vacuum tubes, or where necessary to permit continued operation of a station, provided such changes are consistent with the maintenance of a substantial public service. Under this arrangement, licensees may file with the FCC informal requests to reduce operating power or to make other changes in the operation of authorized equipment. In view of the difficulty of obtaining replacement tubes and equipment and the shortage of skilled personnel needed in effecting repairs, the Commission feels this simplified procedure will aid in maintaining continuous FM and television service during the war.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 12th. They are subject to change.

Monday, July 12

WNYC—City of New York Municipal Broadcasting System, New York, N. Y.—For special service authorization; **830 kc.**, 1 KW; 6:00 a. m. to 10:00 p. m.; Dir. Antenna.

Wednesday, July 14

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Renewal of license, **1150 kc.**, 500 watts, DA-night, unlimited.

Thursday, July 15

KSJB—Jamestown Broadcasting Co., Jamestown, N. Dak.—Modification of license, **600 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Adopted an order granting petition to reconsider and grant without hearing the application for renewal of license of Station WCOP; cancelled hearing set for July 14, 1943. (Docket No. 6476)

WEDC—Emil Denemark, Inc., Chicago, Ill.—Granted renewal of license on a regular basis. (B4-R-551)

Stanley G. Boynton, Detroit, Mich.—Granted authority to transmit religious programs from Highland Park Baptist Church of Detroit to Canadian Station CKLW, Windsor, Ontario, from 8:00 to 8:45 p. m., EWT, on Sundays only for 52-week period. Applicant has no interest in any domestic or foreign radio broadcast station. (B2-FP-110)

WEMP—Glenn D. Roberts, Melva F. Roberts, Wellwood Nesbit, Robert M. LaFollette, Jr., Evalyn H. Dolph, Hope D. Pettey, Leo T. Crowley and James E. Markham, d/b as Milwaukee Broadcasting Co., Milwaukee, Wis.—Granted renewal of license to Station WEMP (and auxiliary) on a regular basis. Applicant has been operating on a temporary license since June 1, 1943. (B4-R-868)

WKBV—Knox Radio Corp., Richmond, Ind.—Granted authority to transfer of control of Knox Radio Corp., licensee of Station WKBV, from William O. Knox (transferor) to Central Broadcasting Corp. (transferee), a newly organized corporation, for a total consideration of $30,000. (B4-TC-317)

MISCELLANEOUS

WEEU—Berks Broadcasting Co., Reading, Pa.—Dismissed without prejudice petition of WEEU to broaden issues and continue the hearing on application of Matheson Radio Co. (WHDH), Boston, Mass., for construction permit to operate on **850 kc.**, 5 KW, unlimited, directional antenna night. (Docket No. 5453)

WOKO—WOKO, Inc., Albany, N. Y.—Denied petition to amend and enlarge issues in re application for renewal of license. (Docket No. 6486)

Iowa Broadcasting Co., Cedar Rapids, Iowa—Denied motion to enlarge issues and to designate a Commissioner to conduct hearings in re application of Jamestown Broadcasting Co., Inc. (KSJB), Jamestown, N. Dak., for modification of license to change frequency to **600 kc.** on 250 watts, unlimited time. (Docket No. 6519) Exceptions noted by petitioner's attorney.

Worcester Telegram Publishing Co., Worcester, Mass.—Granted petition to amend application for new FM station and remove from hearing docket. (Docket No. 5980)

KFXM—J. C. and E. W. Lee, d/b as Lee Brothers Broadcasting Co., San Bernardino, Calif.—Granted motion for leave to take depositions in re application for modification of license. (Docket No. 6432)

KMTR—KMTR Radio Corp., Los Angeles, Calif.—On the Commission's own motion, continued the hearing now set for July 7 until July 28, 1943, in re application for renewal of license. (Docket No. 6437)

WNYC—City of New York Municipal Broadcasting System, New York City, N. Y.—Granted authority to determine operating power by direct measurement of antenna power for auxiliary transmitter. (B1-Z-1526)

APPLICATIONS FILED AT FCC

620 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Modification of construction permit (B4-P-3489 as modified which authorized move of transmitter and studio) for extension of completion date from 7-26-43 to 1-26-44.

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Modification of construction permit (B-P-3501 as modified for move of auxiliary) for extension of completion date from 7-26-43 to 1-26-44.

FM APPLICATION

NEW—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Construction permit for a new high frequency broadcast station to be operated on **46100 kc.**, coverage 10,000 square miles, amended to change coverage to 4,465 square miles, make changes in transmitting equipment and changes in antenna system.

MISCELLANEOUS APPLICATIONS

NEW—Savannah Broadcasting Co., Area of Chatham County, Ga.—Construction permit for a new relay broadcast station to be operated on **30820, 33740, 35820** and **37980 kc.**, 2 watts power, A3 emission, and to be used with Station WTOC.

NEW—World Wide Broadcasting Corp., Scituate, Mass.—Construction permit for a new international broadcast station to be operated on **6040, 9700, 11730, 15350, 17750** and **21460 kc.**, 50 KW power, unlimited hours of operation.

NEW—Mutual Broadcasting System, Inc., Chicago, Ill.—Extension of authority to transmit programs to CKLW, stations owned and operated by Canadian Broadcasting Corporation and stations licensed by the Canadian Minister of Transport for period ending 9-1-43.

WRUS—World Wide Broadcasting Corporation, Scituate, Mass.—Modification of construction permit (B1-PIB-33 for new international station) for change in frequencies to **6040, 9700, 11730, 15350, 17750** and **21460 kc.**, power 50 KW, and changes in equipment.

WLWK—The Crosley Corporation, Cincinnati, Ohio.—License to cover construction permit (B2-PIB-43) which authorized construction of a new international broadcast station.

WEOC—South Carolina Broadcasting Co., Inc., Area of Charleston, S. C.—Voluntary assignment of relay broadcast station license to John M. Rivers.

WEOY—South Carolina Broadcasting Co., Inc., Area of Charleston, S. C.—Voluntary assignment of relay broadcast station license to John M. Rivers.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Colorado Mattress Manufacturing Company et al.—Twenty-three manufacturers of mattresses, bed springs and related products, and Sealy, Inc., 316 Broadway, New York, a nonprofit corporation organized to promote the manufacturers' mutual interests, are charged in a complaint with maintaining a combination to restrain competition in the sale of that portion of their merchandise which they designate as Sealy Products.

The complaint alleges among other things that the respondents, by agreement, adhere to prices promulgated by Sealy, Inc., for Sealy Products.

Respondent manufacturers named in the complaint, who constitute all of the stockholders of Sealy, Inc., are:

Morris Stein and Morris Nierenberg, trading as Colorado Mattress Manufacturing Co., Denver; Willford R. and Sidney Southerland, trading as Dixie Mattress Co., Richmond, Va.; Eagle Mattress Co., Inc., Alleton, Mass.; Fort Pitt Bedding Co., Pittsburgh; Gordon Sleeprite Corp., Baltimore; J. L. and T. O. Metcalfe, trading as Graham Mattress Co., Bluefield, W. Va.; F. G. Hodges Bedding Co., Reading, Pa.; Long Island Mattress Co., Inc., Brooklyn; Samuel Hertz and Morris Lewis, trading as Made-Well Bedding Co., Passaic, N. J.; The Charles A. Maish Co., Cincinnati; Osiason, Inc., Fall River, Mass.; The Ohio Mattress Co., Cleveland; Arthur H. and Blanche C. Rasch, trading as Pettit Bedding Co., Portland, Oreg.; Rogers Manufacturing Co., Houston, Tex.; Schmitt & Henry Manufacturing Co., Des Moines; Sealy Mattress Co., Chicago; The Sealy Mattress Co., Dallas, Tex.; Sealy Mattress Company of Kansas City, Kansas City, Mo.; Sealy Mattress Company of Milwaukee, Milwaukee; Lucille Willens and Helen Solomon, trading as Sealy Mattress Company of Northern California, Oakland, Calif.; Seniel Ostrow, trading as Sealy Mattress Company of Southern California, Los Angeles; U. S. Bedding Co., Memphis, Tenn., and Zimmerman Manufacturing Co., East Point, Ga.

Also named as respondents are the executives of Sealy, Inc., including Jacob R. Haas, president, and John M. Brody, executive vice president. (4987)

Dean Studios, 118 North Fifteenth St., Omaha, and its officers are charged in a complaint with misrepresenting the quality, price and terms of sale of the colored photographic enlargements and frames they sell in interstate commerce. The respondents maintain a branch studio at 211 Seventh Street, Des Moines. (4991)

MacDougal Brothers—A complaint has been issued charging MacDougal Brothers, Avoca, N. Y., with falsely representing that potatoes grown in the State of New York, and which they sell in interstate commerce, are Maine potatoes. (4990)

Sorbtex Foundation, Inc., 210 East Franklin St., Richmond, Va., is charged in a complaint with misrepresenting the effectiveness of Sorbtex, a solution it advertises as being capable of improving the qualities and lengthening the life of towels and other fabrics. (4979)

Tracer System, and Earl H. Wilson, both of 330 South Wells St., Chicago, are charged in a complaint with employing false and deceptive practices in the operation of a scheme to obtain, by subterfuge, information concerning debtors. (4988)

CEASE AND DESIST ORDERS

No cease and desist orders were issued by the Commission last week.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Hugo Gernsback, 25 West Broadway, New York, who, in addition to his business as a publisher, engaged in the sale of various electrical and mechanical devices, which included so-called ultraviolet sun lamps, under the trade name "Hudson Specialties Company," has stipulated to cease and desist from certain representations concerning the products. (3676)

Hale Drug Company, 112 South Main Street, Memphis, Tennessee; Krohn Sales Company, an Ohio corporation, each corporation having the same stockholders and officers; M. H. Krohn, Vice President; B. G. Krohn, Secretary-Treasurer, both directors of each corporation, and Milton E. Yales, an employee of the Krohn Sales Company who buys for its retail outlets and prepares advertising copy used by the Hale Drug Company, in connection with the offering for sale, sale or distribution of their merchandise, have stipulated to cease and desist from certain unfair methods of competition in connection with the sale and distribution of drugs, cosmetics and other articles of merchandise. (3677)

King Fig Plantation, 1095 Kansas St., San Francisco, selling and distributing fig trees under the trade name "King Fig," has stipulated to discontinue representing that his products are not affected by cold climatic conditions or that they will produce ripe fruit regardless of such climatic conditions; that they can be depended upon to produce perfect fruit in northern California, Oregon or Washington or consistently to produce ripe fruit in such an area; that the trees can be depended upon to produce ripe fruit within five months after planting or to bear ripe fruit twice a year; that they will produce ripe fruit where no other fig will ripen; are the only trees that produce ripe fruit in northern California, Oregon or Washington; that such an area is no fig land or that the tree is miraculous, marvelous or amazing, a freak of nature, a modern plant miracle or a horticultural phenomenon. (3675)

Osco Motors Corporation, 3627 North Lawrence Street, Philadelphia, Pa., engaged in converting automobile motors into marine engines and the sale of engine parts to be used as means to increase the horse-power of motors of the Ford V8 type, and George L. Callery, its vice president and secretary, also trading as Power Associates, have stipulated to cease and desist from representing as "simple" the "instructions" offered for use as means to accomplish an increase or transformation in the horse-power of a motor; and from use of the word "simple" in referring to such "instructions" so as to convey the belief or impression that, with the aid of such instructions, the power capacity of a motor can be increased or transformed easily or readily by one who does not have the necessary skill, or that the increase or transformation in motor power can be accomplished without the use of extra equipment and its attendant cost. The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 29, July 16, 1943

"BUSINESS AT WAR"

Donald Nelson, Elmer Davis, Judge Fred M. Vinson, Marvin Jones and Chester LaRoche Appeal for Advertising's Support of War—Laud Radio

REQUEST WAR MESSAGE IN EVERY ADVERTISEMENT

In a special broadcast to the business leaders and advertising executives of every state, city and community in the nation, prominent government officials, speaking from Washington, D. C., over the facilities of the National Broadcasting Company, 1:15 to 2:00 P. M., EWT, Wednesday, July 14, praised the part business and advertising are playing in the war and pleaded for even greater support with "A War Message in Every Ad."

Preceded by a closed circuit talk on July 6, this broadcast was directed at specially called meetings of luncheon clubs, business groups of all kinds and thousands of individuals, to mobilize advertising as never before on the war front.

Scripts of both the closed circuit talk and the special broadcast are reproduced in full, as follows:

NBC Closed Circuit Talk, July 6, Opened by Frank Mullen, Vice-Pres., National Broadcasting Company

Mr. Mullen: We in radio have long been proud of our public service record. We have recognized that radio, as a democratic institution, can count its progress only in direct proportion to the service it renders to the people of the nation. Throughout the years, we have expanded our program structure in terms of entertainment, education and information. These are the ingredients in our public service formula.

In arranging this closed circuit hookup, the National Broadcasting Company is motivated by a desire to acquaint you with a new opportunity for public service. We have a special message for you today. It is a vital message, not only because it concerns a critical phase of the war effort, but also because it concerns everybody who hears these words, whether he be station manager, salesman, production man or announcer.

We have asked you to gather in this studio today to tell you about a special program that will be broadcast next week—at 1:30 P. M. EWT, Wednesday, July 14. This program may well prove to be a milestone in the organization of our home front. It will also be a milestone in the relationship between government and business. For both of these segments of our democratic system will join forces to help all the citizens on the home front understand better the meaning of total war.

(Continued on page 312)

COX COMMITTEE TO RESUME

The Cox FCC Investigating Committee plans to resume hearings beginning Monday, July 19, it was announced Wednesday. It is expected that the hearings will continue during the week but names of the witnesses to be heard have not been announced.

With this issue of the Reports you will find a Special Legislative Bulletin containing news of developments following the hearing of Friday, July 9, together with statements issued by Chairman Fly and the Cox Committee.

Notice!

The postal zone of the NAB is Washington, 6, D. C. Won't you please send a memo to your staff to advise them to use this zone number on all mail addressed to NAB? Also have them change any addressograph plates necessary. Thanks!

OREGON-WASHINGTON ASK REMEDIAL LEGISLATION

Resolution Passed at Joint Meeting of
Oregon Broadcasters Association and Washington Broadcasting Association
Held in Portland, Oregon
July 2, 1943

THE RADIO BROADCASTERS OF WASHINGTON AND OREGON

In joint session, have recognized a grave danger to the radio industry in existing legislation governing radio, and in its interpretation.

IT IS THE DESIRE OF THIS GROUP

that the Congress of the United States be urged to democratically review this legislation in light of free

"BUSINESS AT WAR"

(Continued from page 311)

American business, which has already performed production miracles, is rapidly undertaking its second great conversion job—the job of converting its advertising to war needs. The focal point of this contribution to the war program is the War Advertising Council. This was set up immediately after Pearl Harbor to act as liaison between government and business in the development of home front information campaigns. Time does not permit a complete resume of the achievements of this organization, which represents all phases of advertising activity—Advertisers, agencies and the four great media, radio, newspapers, magazines and outdoor. But standing beside me is the man who has been the motivating force in this farsighted activity. He is Chester J. LaRoche, chairman of the War Advertising Council, whose energy and leadership have contributed so much to the Council's success. Mr. LaRoche will give you the details of next week's broadcast and will explain why it is so essential for every advertiser and media representative to participate in this program. Mr. LaRoche:

NAB, through the cooperation of NBC, ordered master recordings made of the broadcast, *"Business at War."* Pressings are available of the complete 45 minute program at a total cost of only $3.00, express collect.

A complete set includes one double-face record and one single-face record, 16", 33 1/3 R.P.M.

$3.00 brings you the complete set, express collect, which you may use locally before civic clubs, for private auditions in your studios, etc. The recordings are not to be re-broadcast.

Order your set today!

CLOSED CIRCUIT TALK
July 6, 1943

Mr. Chester La Roche: Thank you, Frank Mullen, for your generous cooperation in making these facilities available and for your desire to make this a cooperative, united effort of all media, rather than of radio alone.

The purpose of this closed circuit broadcast is to ask those who are listening to *organize* meetings of advertisers—national and local—and agency executives, to listen to a nationwide live broadcast over 138 stations of this network at 1:30 Eastern War Time on Wednesday, July 14th.

The subject of the broadcast will be "The Role of Business in Furnishing the People with Essential War Information." The speakers from the government will be Elmer Davis, Judge Marvin Jones, Donald Nelson and Justice Byrnes.

This broadcast may well be a milestone in the relationship between business and government. Certainly it will represent one of the most important gatherings of business leaders since the outbreak of war.

Why has this July 14th broadcast been arranged?

It is clear that our armed forces can do their job. The momentum of their might increases daily. It is also increasingly clear that our Home Front is sagging. The *certainty* of victory and its *nearness* is threatened, unless we act promptly.

What are we to do? Are we helpless? Must we wait until Washington has settled every policy, has every detail worked out? *No.* Fortunately, there is a greater power than any in Washington. That is the resourcefulness, initiative and will of the people.

Of course, it is important what Washington does about subsidies, inflation and food. The laws and directives that are issued are vital. But no matter what our leaders do, unless the people *understand* and *act*, Democracy cannot go all out in total war. But given understanding, our Democracy can be more efficient than any political organization known.

Tell our people the scope of a problem—the result expected and why—and soon unusual, ingenious solutions come along and the best solution of one is passed along until it often becomes the common method of us all.

What will bring about this understanding?

The speeches of our leaders and the news columns will play their part. But the part advertising can play,—its great responsibility and opportunity,—is not so clearly understood.

Now advertising does not seek to do the complete information job on its own. It should be coordinated with the news. *Both* news and advertising must be used in planned information programs.

But it is the function of the news columns to report. It is the function of advertising to get action; to clarify and interpret; to make readable to masses of people how large social, economic and military problems scale down and touch their daily lives;—to repeat and repeat and inspire until desired actions are taken.

What an opportunity we have to arouse this nation to a mighty wrath, and to finish this war with *amazing speed* and the *minimum loss* of our lives.

Not to understand the part advertising can play in this war job is the equivalent of a military error.

Through the individual actions of many, and through the War Advertising Council, advertising has already done much.

The War Advertising Council is composed of the owners and principals of magazines, radio, outdoor, the country's advertising agencies, and national advertisers. It is sponsored and financed by the following organizations, whose representatives also serve on its board.

Association of National Advertisers
American Association of Advertising Agencies
National (Magazine) Publishers
American Newspaper Publishers
Outdoor Advertising Association
National Association of Broadcasters

It should be made very clear that the War Advertising Council represents no political party, no pressure group, no special interest, no selfish axe-grinders, and it is not concerned with increasing appropriations. Anyone who thinks it seeks to make money for this business is MILLIONS OF DOLLARS WRONG as what follows will show.

The Council renders all services to government *gratis.* With the exception of a staff of ten principals, the work is done by volunteer experts, who donate their time. The council asks nothing and wants nothing except a chance to serve the nation in a field it knows best.

It may be fairly said that the War Advertising Council has placed at the disposal of the Federal Government since the outset of the war the creative talents of the entire advertising field. The government wisely saw that the huge machine advertising had built to serve the ways of *peace* was best qualified to do the *war* information job. The government, in this case, decided not to raise billions and create departments to spend these billions, if the advertising industry would do the job. Let's see what Advertising has done.

Since the start of the war, the public has over-subscribed two great War Loans, has turned in so much scrap metal as to create a huge national stockpile, has planted 2 million Victory gardens, saved and turned over to munition plants 57 million pounds of fats and grease, has volunteered by the hundreds of thousands for part-time work as civilian defense workers, as ration board members, as auxiliary helpers on farms and in food processing plants.

These things have not just happened. They are the result of an enormous amount of hard, tough fact-finding, opinion study and planning. Let me cite a few examples of this planning.

The entire mechanism by which the nation is given war messages over commercial radio programs was worked out by the War Advertising Council in close cooperation with the Office of War Information.

Every line of Washington-released Advertising supporting the Second War Loan was prepared by the War Advertising Council, without its costing the taxpayers a penny either for the creation of the material or the space and time.

To give you a quick idea of how much advertising is already being contributed at no cost to the government, I think you should know that since April 27, 1942, 120 advertisers have contributed time on 202 coast-to-coast network programs every week. On these shows 115 messages are delivered weekly to an average audience of 300,000,000 listeners a week.

On 85 *spot* programs 38 messages are delivered to 9,000,000 listeners weekly.

70 advertisers have contributed, at various times, their *entire shows* to war information projects and without any mention of their own products.

In addition to this national effort, 891 stations broadcast 8,000 messages locally per day.

Combined with the networks' contribution of time and talent for shows, like the Army Hours, This Is Our Enemy, business has made a total *contribution* of $100,000,000 through radio to the government's Information Program.

National Magazines, too, have contributed generously. 444 of them have given one page a month to inspirational messages concerning total war. These 444 magazines will continue to contribute a page a month to the *new campaign* on *inflation* worked out with Justice Byrnes and Judge Vinson, starting in August. Those anti-inflation ads will reach a circulation of 90,000 monthly.

The Newspapers of the country not only helped organize the scrap drive, but have been instrumental in organizing local and national advertisers to contribute toward the Treasury advertising. As an example of the type of support the government is getting, on the recent Second War Loan Drive, the newspapers through their soliciting efforts, secured from advertisers the equivalent of 36,000 full-page ads which ran during a period of three weeks. This was the largest newspaper campaign in the history of our business.

In 1943 it is estimated that 63% of all outdoor posters will be devoted to wartime advertising. Outdoor will contribute 100,000 wall panels and 30,000 twenty-four sheets to the Third War Loan Drive which starts September 9th, at no cost for space to the government, and has a soliciting quota of 20,000 twenty-four sheets to be secured from business firms.

More than 450 advertising agencies have contributed $4,000,000 of the only thing they have to sell—time and skill.

National and local advertisers have devoted more than $100,000,000 in the past year in magazine and newspaper space to war themes. The drug industry alone devoted $2,000,000 to the sale of war bonds.

The total contribution of all advertising in the past twelve months was at least $250,000,000.

And now twice that amount is needed,—$500,000,000 or one-third of the total of all advertising; twice as much because the job this Fall is easily twice as big.

To help reach this goal, the War Advertising Council is launching a campaign which starts with asking your help to make the July 14th broadcast a well organized, resultful event.

The slogan of this campaign is "A War Message in Every Ad."

In order to make clear exactly what subjects advertising can deal with, our nation's leaders have agreed to participate in the special program on Wednesday, July 14th. These leaders will explain to business men the vital part their advertising can play in creating a better informed army of civilian fighters.

The keynote of next Wednesday's broadcast will be sounded by Justice Byrnes, Director of the Office of War Mobilization, who will tell the business men of this nation and the public at large how important the Home Front is to a successful and quicker completion of the war. Justice Byrnes will explain what the government's responsibilities are and what the people's responsibilities are. He is accustomed to speaking frankly and convincingly. I believe that he will adhere to this pattern next Wednesday.

Elmer Davis, Director of the Office of War Information, will discuss the many new problems that have arisen in connection with his office. He is both aware and appreciative of the help OWI has had from business.

Donald Nelson, Chairman of the War Production Board, whose support and suggestions helped organize the War Advertising Council, will give us the latest news on production, and his plans to keep our economy vital through production of needed things.

Marvin Jones, newly appointed War Administrator, will discuss the subject that directly affects more citizens than any other—food.

All these government spokesmen will make clear that they cannot do their jobs without understanding and help from the public. War advertising can bring that understanding.

What is war advertising? It is not brag advertising—not advertising which simply shows pictures of tanks, ships, planes. War advertising is advertising which interests people through information, understanding or persuasion to take certain action necessary to speedy winning of the war. It is this type of war advertising with which the July 14 broadcast will concern itself.

The July broadcast will obviously be more successful if in the listening audience there is a high percentage of *top management executives* as well as sales and advertising executives. For the most part advertising people are better acquainted with the role of advertising in wartime than are management people. But the story must be impressed upon both, if business is to discharge this public service.

For this reason, it is essential that every ounce of energy be exerted on the part of all media representatives to be certain that the top business men of the nation sit before the loud speakers at 1:30 P. M. Eastern War Time on Wednesday, July 14th.

I strongly urge everyone within the sound of my voice to constitute himself a committee of one to turn out the listenership that we must have if the objectives of this program are to be achieved.

The way to organize listening meetings is a matter for individual or company decision. In the smaller cities possibly the media will get together and arrange joint meetings of their own to which advertisers and agency men will be asked.

In the larger cities, *numbers* will make joint meetings difficult, so it is suggested that each media and each company work out its own method of separate meetings, preferably at luncheon time. There will be overlapping invitations, to be sure. But the advertiser is used to being approached by the different media for a share in his business, so he won't be confused or mind if he gets several invitations to lunch. In the West, the meetings can either be a *late* breakfast or an *early* luncheon. In all cases time should be allowed for discussion as to what follow-up action is suggested by the talks.

You, the members of the Radio Industry and all advertising men, carry a heavy responsibility to see it goes well. You have helped to create this great information machine. In effect, you are the West Pointers and Annapolis men of our information army. The importance and size of the audience of this broadcast is very largely in your hands. On its success depends the first organized attempt to create the fighting Home Front we must have to back up our invading armies.

"BUSINESS AT WAR"

WEDNESDAY, JULY 14, 1943

NATIONAL BROADCASTING COMPANY

1:15–2:00 P.M. EWT

ANNOUNCER: "Business At War" . . . the National Broadcasting Company, in association with the War Advertising Council, invites you to participate in one of the most important business meetings held since the beginning of the war. Gathered before radios and speakers in conference rooms all over the nation, in radio studios, and at special luncheon meetings, are the business leaders of America. In hundreds of communities management, sales, and advertising executives have met to hear this broadcast during which the leading government officials will speak to American business. Elmer Davis, Director of the Office of War Information will open the meeting and introduce the speakers . . . Mr. Davis.

DAVIS: The purpose of this broadcast meeting is to complete the mobilization of American advertising to help win this war. Each of the speakers to be heard on this program is in charge of one or more aspects of the home-front war effort that affect the lives of every citizen. Justice James F. Byrnes, Director of the Office of War Mobilization, who had hoped to be with us, is detained by unavoidable commitments; but you will hear from Judge Fred M. Vinson, the head of the Office of Economic Stabilization; from Donald Nelson, Chairman of the War Production Board; from Marvin Jones, War Food Administrator, and finally from Chester J. La Roche, Chairman of the War Advertising Council.

Now, these operations are very satisfactory beginnings; but the liberation of Europe, the Pacific Islands, and southeast Asia will not be briefly or easily accomplished. We can expect our offensive action to grow swifter and heavier, which means that we shall have to expend larger and larger amounts of material, and suffer heavier casualties. And that means that we need a better organized, more efficient home front.

Our Army and Navy have the tough part of the job, and they are doing all right. But it is up to the rest of us to help them just as much as we can. What the supporting cast of civilian fighters on the home front may do can either hasten the victory, or delay it; but the difference between an earlier and a later victory is worth working for just as hard as we can. Every twenty-four hours the government of the United States spends three hundred million dollars on the war. Shorten the war by one day, you save three hundred million dollars; also, almost certainly, you will save hundreds or thousands of American lives. Every man, woman and child in this country ought to be doing everything we can to shorten the road to victory.

To help attain this objective, some of our war leaders on the civilian front are today outlining some of the urgent problems they face. They are asking that business, through its advertising, help create the public understanding that is essential to whole-hearted cooperation by the people. We know from experience that if the people know what is expected of them, and why, and believe that it makes sense, they will rspond magnificently. But the job of bringing them essential war information, in a war so complex as this, is gigantic. It calls for the use of all the channels of communication—the news and editorial columns of newspapers and magazines; radio broadcasting—and the radio industry has done an immensely valuable job of transmitting war information to the public; the job needs also books, and posters; and it needs the technique that is the voice of American business—advertising.

The Office of War Information is fully aware and deeply appreciative of the help that business has already given us, by contributing advertising space and time for war messages. This would not have been possible without the help of the War Advertising Council—the voluntary, nonprofit organization representing all branches of advertising, which has served so ably and effectively since Pearl Harbor. We in the Office of War Information, who have worked with the Advertising Council ever since our organization was established, can testify to the work it has accomplished; for we have seen the results—results that can be measured.

In telling the people about every one of these home-front projects, the War Advertising Council, the Office of War Information, and the Federal agency or agencies involved have worked as a team; and this team work has resulted in advertising space and time contributions estimated at more than a quarter of a billion dollars during the past year. Yet all this, like our military offensive operations, is just a start. It is clear that our men on the fighting fronts can do their jobs; that is being made plain every day. What is not yet quite so clear is our ability to organize a home front which in energy, morale and fighting power is worthy to be compared with them. In the months ahead, the need for people to do and not to do certain things having a direct bearing on the war will multiply enormously. Every move by every citizen is a factor that will help determine the speed of the victory. The government leaders gathered at this microphone want to explain to the business men of the nation how urgent is this job of getting people to do what must be done, and how business can help enormously, by contributing even more space and time for war messages than heretofore.

Your government has adopted a policy on the use of advertising for war needs that seems to be sound and practicable. We have recognized the need for harnessing this great American force to do the job that all citizens, as well as the government that serves them all, want to get done. Two alternatives presented themselves: the government could either appropriate a huge advertising budget—hundreds of millions of dollars, perhaps a billion, would be necessary to do the job; *or* government could turn to the people who are experts in using the advertising mechanism that already exists, and ask them to assume this responsibility.

We decided against huge government advertising appropriations. We decided in favor of asking business to assume the responsibility of converting its advertising to war themes. And in view of the magnitude of the job ahead, we believe it is important that business should support the War Advertising Council's campaign—"A War Message in Every Ad"—of which you will hear more later.

Now here is Judge Fred M. Vinson, the new director of the Office of Economic Stabilization.

VINSON: On the home front, our deadliest and most insidious enemy is inflation. Inflation threatens the security of the people's savings. It is the mortal foe of every bank deposit, every insurance policy and every war bond.

To the average man and woman, inflation reveals itself in a soaring cost of living. You may rest assured that those associated with me and I will exercise all the powers which we possess to hold this line. If we allow prices and wages to rise, the cost of war will be materially increased. The resulting economic confusion and the bitter struggle among pressure groups which would follow from it, would reduce the effectiveness of our productive effort and cost needless thousands of American lives. Rising prices now mean falling prices later. Inflation in wartime means deflation after the war; and with deflation come panic, bankruptcy, unemployment and financial ruin. To speed the day of victory and to build a solid foundation for a prosperous peace, we must hold the line against inflation.

Here is the situation we face: Total war demands that we strain every nerve to produce the munitions of war. We can meet our production goals only by converting all our available resources to the production of military goods. In order to produce more of the things which the fighting forces need, we must produce less of the goods which we at home are accustomed to use. At the same time, we must put every available man and woman to useful work at longer hours.

The job of stopping inflation is almost unbelievably difficult. In all frankness I must tell you that, up to now, we have not entirely succeeded. Neither have we failed. Between May, 1941, and May, 1942, when the first General Maximum Price Regulation was imposed, the cost of living rose 12%. In the next twelve months, between May, 1942, and May, 1943, the cost of living rose only 7.8%. We did not lost as much ground during the second year as we lost during the first.

But we lost too much, and we cannot afford to lose more. Indeed, we must regain some of the ground we have lost, and that is the purpose of the so-called "rollback" program about which you have heard so much.

Most of the ground we have lost has been in the field of food costs, and we are fighting hard to hold this line. Simpler and more easily enforced ceilings have been placed upon food prices—ceilings which every housewife can understand. These new dollars and cent ceilings, along with the limited use of subsidies, should enable us more nearly to achieve our goal of stabilizing food prices at the level directed by the Congress last October.

In other fields, we have been more successful. Between May, 1942, and May, 1943, the level of rents was actually reduced by 1.7%. Clothing prices, during the same period, rose only 1.3%, despite the fact that during the previous year they had gone up 23%.

The battle is not won, but I believe that the tide is turning. To win, the Government must offer firm and vigorous leadership. You, the people, must also take firm and vigorous action. Those who are fighting inflation can act more firmly and more vigorously if they know that you are backing them in their fight against inflation.

In my job as Economic Stabilization Director, I must lead the fight against inflation. I cannot win without the energetic support of an informed public opinion. For our country's sake, I ask you business men who are listening to me now to make full use of Advertising—that powerful information machine which serves you so well in peacetime—to help secure for us the support which we now must have.

There is not a single battlefront in this struggle against inflation where the support, the understanding and the informed opinion of the American people are not more important than any law or regulation.

There are some who doubt the willingness of our people to accept the hardships and restrictions that total war requires. On this score I have no doubts. But I am not so certain that all of our people have yet been given sufficient information to understand the specific needs and the specific requirements of total war on the home front. I realize that it is difficult, at best, to determine how far a free Government can go in guiding the opinions and the habits of a free people. I realize also that there are many who honestly and sincerely disagree with the Government's anti-inflation policy.

But, regardless of what we do in Washington, it is essential that we have the understanding cooperation of you, the business leaders of this nation.

Perhaps I am a special pleader, but I shall run the risk of being called a special pleader to suggest that, in considering controversial economic questions, we must take special account of the other fellow's difficulties. To hold the cost of living, we must hold wages, prices and profits, and we must impose a heavier burden of taxation. Naturally, therefore, each of us is likely to be slightly more eager to hold down the other fellow's prices, wages or profits, and to raise the other fellow's taxes. Each of us will feel the squeeze of total war, each of us is only human, and each of us will be looking for the moat in the other fellow's eye. Yet, unless we all stand together, there will be little or nothing for any of us. If the American people understand exactly what we are doing and why we are doing it, I am convinced that they will stand together. Our people need to know why they should buy and hold war bonds, why they should pay higher taxes and save more money, why they should abominate black markets and chiselers, buy only what they need, at only ceiling prices, and only, in the case of rationed goods, with ration stamps, and why they should not demand higher prices, higher wages or greater profits.

In large measure, this is an advertising job. Advertising is not a charitable institution—it is the handmaiden of business. And there is no business in this nation so strong that inflation will not work havoc and ruin upon it.

That is why the War Advertising Council has seen the issue so clearly. Cooperating with that Council, almost 450 magazines are going to contribute a full-page advertisement every month. These advertisements will spread information as to what every American citizen can do to help hold the line. It will not cost the Federal Government a single cent.

I am also informed that the insurance companies of the nation are considering a similar major advertising effort. I hope that others will join in the procession. I am making a special plea that you business men everywhere work with the War Advertising Council and the Office of War Information to inform every individual in America how he can help fight inflation. As advertisers, each one of you can, like Paul Revere, warn that inflation is coming unless the American people take up arms against it.

DAVIS: Thank you, Judge Vinson. The Office of War Information is, of course doing all it can to help in this campaign, but the job is so enormous that it needs the help of everyone in a position, as advertisers are, to reach the public eye and ear. Judge Vinson, do you think the job of holding down the cost of living can be done successfully?

VINSON: It can, Mr. Davis—but we can't do the job without the help of every citizen. And we'll get that help to the degree that the people understand the importance of fighting rises in the cost of living, and how they can join in the fight. Advertising can give them that understanding.

DAVIS: Our next speaker is a man who is an expert on the relationship between government and business. He was one of the nation's leading management and merchandising executives when he came to Washington to tackle one of the biggest of all war jobs. As head of the War Production Board, he is perhaps in closer touch with business men than any other leader in Washington. From the outset Mr. Nelson recognized the tremendous importance of war information. He played an important role in the creation of the War Advertising Council.

Mr. Nelson. . . .

NELSON: One of the questions which every American should ask himself these days is this:

"How are we getting on with war production?"

It is about the answer to this question that I want to talk for a few minutes.

Let me make it clear at once that there is no one, quick, glib, easy answer. When talking about a program so complex and so vast as ours, oversimplification is full of hazards, and it is easy to select a few random figures and produce a series of different answers.

Here, for example, are two facts:

> First, we are still behind schedule in our production effort, and we face a really staggering job in the months immediately ahead if we are to meet those schedules.
>
> Second, production in May, as I reported, was not so good, and the preliminary figures for last month, though better, did not show enough improvement to satisfy me.

These are the kinds of facts which give daily, hourly concern to those of us in Washington who are engaged in the production effort. But now, let me give you two other facts that sound a little different:

First, we produced over 7,000 airplanes last month, according to preliminary figures, and that means about 270 every working day, or about ten very hour, around the clock. Compare this 7,000 plane figure for June with the production of 5,000 planes back in January, at the start of the year. The increase in the January-June period for planes is about 40 percent.

Second, our munitions and construction program for last month ran over the $6,000,000,000 mark, compared with an output of only $5,293,000,000 during the first month of the year. And remember that the construction part of this figure is declining according to plan. The munitions figure alone increased about 25 percent during the first half of the year.

Such figures, you see, when considered alone, are likely to give only part of the picture. For the real fact of the matter is that the picture is mixed—production has risen greatly this year; some important items are *on* schedule; other items are *behind* schedule. I might sum up with a paradox and say that, although American industry has done a job which in part is amazing, it is just not nearly amazing enough to suit me, or to suit the high goals we have set. We must do better—a lot better. I cannot say with too much vigor that we have not done enough.

It is true that some problems have been solved and are behind us, such as building the basic plants and factories for war production. But these problems give way to new ones, and we must still struggle over such tough problems as steel production, and airplane building, and petroleum questions, and the job of adequately engineering some of our newer devices of war. Perhaps it will serve to clarify the distinction between the rather creditable job we have done and the harder task that lies ahead if I remind you of what I said last week in an address I gave in Toronto. At that time, I said that the United Nations output this year will probably be nearly three times as high as total Axis production and that some of our production figures for certain important items are almost astronomical. But in that same speech, I went on to say—and I must emphasize it again today:

> "We can clearly see that the hardest part of our job remains ahead, both for our fighting men and for the producers of the home front . . . this is no time to speak of easing up in our efforts. . . . Our production schedules for this year and the next will tax us to the utmost."

All of you who are listening to these figures may wonder what they have to do with the subject of this especially arranged broadcast—advertising and the war. Well, the connection is simple, for advertising is one of the instruments that can be used to get more facts before the people and thereby help the people cooperate on the home front in getting the production job done.

Let me show you why this is true. The War Production Board does not produce airplanes with a magician's wand, nor by waving the big stick of legal power. We get planes, in the final analysis, by the cooperation of the men and women who make them. And the same thing is true all along the line. In case after case, war production succeeds because of the cooperation of *all* the people—not just the people on the production line, but also the people who quietly save tin cans and metal and who join car pools and who insulate their homes to make precious oil go farther and who save waste fats.

I need not list all the many campaigns in which the War Production Board is interested, but I must emphasize that the programs just mentioned, together with such other efforts as industrial safety and the correction of absenteeism, are all extremely important to the winning of the war.

Moreover, every one of these campaigns is a job that cannot be done merely by rules and regulations; every one is a task that can only be done on the basis of willing cooperation—a cooperation given willingly, because the facts have been made clear, and because the cooperators are well informed.

Since the fulfillment of our goals in these fields depends on a free flow of accurate and clear information, it is fitting during this special broadcast to point out that industry's own special medium—advertising—can benefit both the people and the Government by the inclusion of war messages. I have no hesitation in saying that, in my opinion, the well coordinated use of advertising to give the people more facts about the war will mean an earlier victory, faster solutions for our production problems, less bloodshed, and less red tape for industry.

It has already been demonstrated that the American people, once they know what is needed, and why, will do a tremendous job. Think back, for example, to the newspaper scrap salvage campaign, in which the War Advertising Council had a part, when more than 6,000,000 tons of metal were collected. Or recall that just last month, despite the rationing of meats, housewives turned in an estimated 8,000,000 pounds of waste fats and grease. These things came about not by accident, but because the people were informed of the need—and in my opinion no request that we make can be effective unless that request is made clear to the people who must answer the call.

So far on the information front, as in the case of war production, a mixed job has been done. And, frankly speaking, I think that there is also a much bigger job still to be done here in informing the people about the progress of the war and in letting them know *concretely*, how they can help. Industry has converted its tools and machines to war production—yes; but now there is an opportunity for industry to convert its *advertising* to the same goal.

I have a special interest in this kind of conversion—not only because of the immediate help it can give us in solving some of the problems I spoke of, but also because I have been interested in the War Advertising Council since it was created in those days when advertisers and advertising men and magazine and newspaper owners and others came together to make their facilities available to the war effort. Now, because of the continuing and growing problems we face, this kind of cooperation is more important than ever, and we all have an opportunity to make the cooperative effort more effective.

One final note: During the next twenty-four hours, by the middle of the tomorrow, this nation will turn out 270 more airplanes to hurl at the Axis. That is not enough. If everyone in America knew all the issues, knew exactly *what* to do and *how* and *when* to do it, and knew *why*, we might be making 300 or 350 planes a day. We could use them. And one quick way of boosting that production total higher and higher is to complete the conversion of advertising—by putting "A War Message In Every Ad."

DAVIS: One question, Mr. Nelson. Are your WPB problems such that they can best be handled in the so-called mass-media, which carry messages to the general public?

NELSON: Not at all. *Some* of our campaigns require the help of everybody—like car-sharing—but others, like conservation of cutting tools, and the absenteeism, and industrial safety, are particularly good for handling in the business press and trade journals.

DAVIS: Among all our war problems, none strikes home to the average citizen so intimately as does the question of food. Whereas many a war problem may seem remote and abstract, the subject of when, where, and how much do we eat is as personal as breathing. We have had 100 years of thinking in this country behind the point of view that our food supply was inexhaustible. Now, in our first total war, we find that there is a bottom to our food basket just as there is a bottom to everything else.

The men charged with the responsibility of shaping the country's food program is War Food Administrator Marvin Jones. No one knows better than Judge Jones that he faces an educational job of enormous scope, that he must adjust the food producing and eating habits of 130 million Americans to war conditions. Judge Jones, in his first radio broadcast since taking office, will tell you how he sees the picture.

JONES: Today we are announcing the allocations of canned fruits and vegetables for the coming 12 months. Because of increased war demands, civilians will get considerable less canned fruits and somewhat less canned vegetables than average. On Monday we announced allocations of dairy products. Civilians will get less than average of several products including butter, cheese and condensed milk.

Is this because farmers are turning out less? No, far from it! Farm Production is on the increase and new high records have been set in each of the past six years. But war is a very hearty eater. As it increases in size and overseas strength the armed forces require greater quantities of canned fruits and vegetables. Our armed forces and our allies require large amounts of dairy products. To make food fight most effectively civilians are limiting their consumption of foods like these so that these other claims may be met. We are going to try to push production even higher than in the past. The July crop report indicated that farmers have increased their crop acreage by 7 million acres more than in 1942. They have done this in the face of adverse Spring weather and shortages of labor and equipment. Yesterday, we announced a food production program for 1944 that calls for planting the largest acreage of crops ever put in by American farmers.

But great as is our accomplishment in production, we could not last year, we cannot this year or next year produce enough to supply all claimants with all the kinds of food they want. This year, our food stocks are called on to supply the people at home, our armed forces on 60 fighting fronts, our fighting Allies, and the liberated peoples. Still, of our total food supply, three-quarters will be consumed on our home front. All remaining claimants will get one-fourth of our output.

Every group would like to have more than can be apportioned to it. If we can provide more, we can help shorten the war. Therefore, the management of food is a wartime job of top importance. It is a front for all of us. Every one of America's 40 million families has a battle station on the food front.

For example, in peacetime the average American wastes some 380 pounds of food each year. Multiplied by 130 million, this represents almost 50 billion pounds of food thrown out into American garbage pails—enough to supply a large part of our Army and Navy and our Lend-Lease commitments as well. This waste is criminal in wartime and must stop.

As we study the wartime food problem we find there are four pillars upon which our program must be built. First, we must secure maximum production of the needed crops and livestock; second, we must conserve food and use it wisely; third, we must share—share with our armed forces and allies, share fairly among civilians; and fourth, we must change food buying and eating habits as required by wartime circumstances.

We must see to it that our citizens understand the facts about how our food is being used to fight this war. We must engender a new respect for food as a crucial weapon of war and establish a wartime code of food conduct so that every American—whether he be a farmer—producer—a processor or packer—a food distributor or consumer will help make our food fight by doing their best with what's available.

Helping citizens understand and adopt such a wartime code of food conduct is one job on which we are asking the assistance of business, through its advertising. This is one of the vital problems I hope you will think about, as you proceed with the work of putting "A War Message in Every Ad." If you will roll up your sleeves and become partners with us in this task, it is not too much to say you will be helping to shorten the war. For there is not just food at stake; there are the lives of tens of thousands of American fighting men.

DAVIS: We have heard Judge Marvin Jones, War Food Administrator. And before he leaves this microphone, I'd like him to answer one question for me. Judge, am I correct in summing up the points you have just made by saying that as the war progresses and we come closer to final victory, the more all of us may have to tighten our belts?

JONES: That is right, Mr. Davis, but if we can make the best possible use of our food at home and accept calmly and cheerfully the changes and inconveniences in our eating habits, we'll be helping food help win the war.

DAVIS: Our final speaker on this program comes not from government, but from business. He heads a voluntary non-profit organization that enjoys a semi-official status in Washington—the War Advertising Council. This group of earnest, public-spirited business men is one of which American business may well be proud. They have been serving the interest of the war unselfishly, almost before the echo of Pearl Harbor died away. I, for one, think the work of the War Advertising Council typifies in the best sense the teamwork between government and business with the common aim of winning the war. Here is Mr. Chester J. LaRoche, Chairman of the War Advertising Council.

CHESTER J. LAROCHE: As Mr. Davis and the previous speakers have recognized, we have, in this nation, channels of communication unmatched anywhere in the world. Through the combination of news and advertising—news to report, advertising to inform and persuade—we can reach the eyes, ears, and hearts of 130 million Americans. We can secure a degree of unity, understanding and fervor which can help us end more quickly the waste and slaughter of war.

The organization formed by business to harness the great power of advertising to the war is the War Advertising Council. The War Advertising Council is a peculiarly American organization. I know of no other country where such a group could be brought together, or so much combined power could be geared to an entirely unselfish purpose. The Council is composed of owners and principals of magazines, newspapers, radio, outdoor, printing and direct mail, the country's advertising agencies, and the great industrialists who use advertising.

I want to emphasize here that the War Advertising Council has no selfish axe to grind. It is a business group representing no political party, and no pressure groups. Anyone who thinks it seeks to make money for the advertising business is wrong—*millions of dollars* wrong—as the following facts will show:

The advertising agencies of the country—the people who have written the Washington-released advertising on war bonds, scrap, black markets, etc.—have contributed more than four million dollars worth of the only thing they have to sell—their time and skill. Radio advertisers and the radio industry have contributed $100,000,000 worth of time and talent during the past year to promote war messages. 440 magazines have been contributing at least one page of space a month for a campaign on total war. The newspapers of the country during the Second War Loan drive organized the contribution of 36,000 full pages of advertising, 25% of which they contributed themselves. 63 per cent of all outdoor posters are devoted to war messages. The car-card industry contributed 100,000 units of space monthly for war messages. In addition to their contribution on radio, national and local advertisers have contributed more than $100,000,000 worth of space in magazines and newspapers. The drug industry alone is devoting $2,000,000 for a special war bond drive.

The total contribution of the entire advertising field in the past 12 months was at least $250,000,000.

And now *twice* that amount, or $500,000,000 worth of space and time—is needed. Twice as much because the job ahead is twice as big. $500,000,000 is roughly one-third the total annual amount of all advertising expenditures.

Our goal for the coming year is therefore two-fold:

First, one-third of all advertising space devoted exclusively to war messages.

Second, a war message in *every* ad.

As an advertiser this means that *some* of your space should be devoted entirely to war messages, and *all* of your space should *contain* a war message.

In other words, because your ad devotes most of its space to a product is no reason why a war message cannot also be included. A lot of information can be packed into a few paragraphs.

Let me say right here that this proposal does not in any way conflict with the radio network allocation plan or the various other radio allocation plans of the Office of War Information. These need supplementing, not disrupting.

One-third of all space devoted *exclusively* to war advertising. And a war message in *every* ad. If these two goals are realized, the cumulative power behind war messages will penetrate into every community and every home in the land. Understanding will replace uncertainty. There will be no room for indifference and life-as-usual. No longer will one-half the population say about the other half, "They don't know there's a war on."

Nor is this a program for national advertisers alone. The biggest percentage of advertising is local advertising. Dislocations in life and living strike into every community. Our great national problems are merely the sum of hundreds of thousands of local problems.

This is why local advertising media and local business men should arrange pools of space or money large enough to cover the local war advertising needs for the next six months. Such cities as Houston, Cleveland, Louisville, Portland, Hartford have already done this. No community in this country can fairly say that it is doing its war job until its is similarly organized.

During these talks, you have heard many references to "war advertising." When we speak of war advertising, exactly what do we mean?

We do not mean advertising that simply shows pictures of planes or tanks or guns. Everybody knows we're at war—it is eighteen months since Pearl Harbor. Is war advertising that which tells how a company's products are helping win the war? Generally no. It certainly is not if it doesn't help get action by the people. In the midst of a struggle for survival, while American boys are dying by the thousands, blatant brag advertising is in questionable taste.

By war advertising we mean advertising which induces people, through information, understanding or persuasion, to take certain actions necessary to the speedy winning of the war.

War advertising follows agreed-upon themes. As every advertising man knows, best results are achieved when all advertising on a given subject adopts the same approach, tells more or less the same story, makes more or less the same appeals.

These official campaigns are all things that virtually anyone would agree need doing. They have nothing to do with *politics;* they have a lot to do with winning the war.

What are some of these official campaigns? In the months ahead we will be called upon to help recruit housewives by the millions to leave their kitchens for the jobs men left behind, we will have to persuade millions to help harvest the food, can and process it, see that it is shared; we will have to persuade Americans to eat nutritious foods, to shun black markets, to understand the overall food picture; we will have to recruit part-time volunteers by the hundreds of thousands for rationing boards, Civilian Defense Councils, Army ground observers or spotters; we will have to help get our people to buy more and more war bonds, to spend less; they will have to learn to conserve—to eat it up, wear it out, make it do. We will be called upon to quicken public responsibility to stay on jobs every working minute, to work harder, without grumbling. We will need to make the meaning of the war clearer, to curb disunity, to halt loose talk, to de-bunk rumors. These are the action messages which badly need consistent mass circulation.

The War Advertising Council and the Office of War Information are ready and eager to assist advertisers in the development of war theme advertising. Many of you will receive shortly a booklet entitled "A War Message in Every Ad" which will, we hope, enable you to make an immediate start on advertising that is really "converted for war." If you wish further information on any war campaign, get in touch either with OWI in Washington or the War Advertising Council, 60 East 42nd Street, New York City.

On the other side of the world, our invasions have now begun. During the hard months to come, American boys from your home town and mine will fight and die on foreign soil. As they endure suffering and hardships that put our petty inconveniences to shame, we who stay at home—if we have a spark of conscience—must form a solid front line behind them.

There must be an end to bickering, petty jealousies, suspicion of one group of Americans for another. At this time, of all times, we must have unity. That is why this group of war leaders have taken time from their busy lives to speak to you today. We can achieve that unity, provided only that our people understand clearly what must be done, and why.

What will an invading soldier see as he looks to his homeland? Will he see a nation aroused—effective in action? Upon what he sees depends in no small part his morale. And upon his morale, his fighting spirit, depends our way of life.

DAVIS: Thank you, Mr. LaRoche.

ANNOUNCER: (WASHINGTON—WRC) The National Broadcasting Company in association with the War Advertising Council has presented a special program broadcast as a meeting between American business and the United States Government. The speakers included Judge Fred M. Vinson, Director of the Office of Economic Stabilization; Donald Nelson, Chairman of the War Production Board; Marvin Jones, War Food Administrator; Elmer Davis, Director of the Office of War Information, and Chester J. LaRoche, Chairman of the War Advertising Council. This program came to you from Washington. This is the National Broadcasting Company.

OREGON-WASHINGTON ASK REMEDIAL LEGISLATION

(Continued from page 311)

enterprise and free speech and to propose and enact remedial legislation.

RADIO-TRANSCRIPTION BILL INTRODUCED

78TH CONGRESS, 1ST SESSION

S. 1332

IN THE SENATE OF THE UNITED STATES

JULY 8 (legislative day, MAY 24), 1943

Mr. TUNNELL introduced the following bill; which was read twice and referred to the Committee on the Judiciary

A BILL

To make unlawful certain practices relating to the making of records for radio transcription, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the date of enactment of this Act, it shall be unlawful for any person, for the purpose of preventing the manufacture or production of records for radio transcription, whether made of wood, wax, metal, or any other material, to counsel, persuade, direct, induce, threaten, or compel either singly or through conspiracies any employee or employees or prospective employee or employees from working to produce or manufacture such records for transcription. Further, it shall be unlawful for any person to threaten or compel radiobroadcasting stations or other broadcasters to refrain from the use of radio-transcription records because of objection to the manner in which such records were manufactured or produced, or because the same were not produced by particular persons or organizations. Any person convicted of a violation of any of the provisions of this Act shall be deemed guilty of a felony, and shall be punishable by fine of not more than $5,000 or imprisonment for not more than five years, or both fine and imprisonment in the discretion of the court.

Broadcast Advertising

SALES MANAGERS EXECUTIVE COMMITTEE MEETS IN NEW YORK

"The Community War Advertising Plan is one which every radio station should embrace and promote to the fullest extent," declared Dietrich Dirks of KTRI-Sioux City, Iowa, Chairman of the Sales Managers Committee, following a luncheon at the Hotel Roosevelt in New York on Thursday, July 14, 1943, at which the group and several invited guests listened to the forty-five minute broadcast by the War Advertising Council, Inc., over the National Broadcasting Company.

"This nationwide, localized campaign offers radio stations both an obligation and an opportunity," he added, pointing out that the program would provide vastly increased promotion of the government programs of war information as well as opening new sources of revenue to many radio stations.

Following the luncheon the committee passed a resolution unanimously commending and endorsing the Community War Advertising Plan and urging radio stations to co-operate with all other media in their communities in order to develop the project to the fullest possible extent.

The two-day meeting of the committee was called to order at 10:30 a. m. by Chairman Dirks with the following members present: C. K. Beaver, KARK, Little Rock, Ark.; Sam H. Bennett, KMBC, Kansas City, Mo.; Arthur Hull Hayes, CBS, New York; James V. McConnell, NBC, New York; John M. Outler, Jr.; WSB, Atlanta, Ga.; and John E. Surrick, WFIL, Philadelphia, Pa.

Because of the pressure of business, W. B. Stuht, KOMO-KJR, Seattle, Wash., was unable to come east for the meeting. Lewis H. Avery of NAB served as secretary of the committee.

At the outset of the meeting, the committee reviewed the recent releases of the department of broadcast advertising, expressed approval of the form and material and voiced the hope that circumstances will permit the issuance of frequent stories and case histories of the type recently sent to NAB member stations.

After a lengthy review of the proposed Sales Manual on Local Accounts (authorized at the committee meeting in New York on March 9, 1943), the committee instructed Avery to proceed with its preparation even though most small stations have shown a lack of interest in the publication.

Preceding a discussion of the proposed revision of the NAB-AAAA Recommended Standard Contract form to incorporate a continuing discount clause, William A. Fricke, Assistant Secretary of the AAAA, was invited to present the views of the agencies on the proposal. Fricke reported that the Time Buyers' Committee is unanimously in favor of such a provision and distributed copies of the text proposed by that group. He pointed out that advertising agencies believe the clause will help to keep advertisers on the air who are not in a position to sign a 52-week renewal upon the expiration of an initial 52-week contract.

Following a detailed discussion of the problem, the committee went on record as unanimously favoring the principle of the continuing discount, but rejecting all of the proposed texts. It instructed Avery to prepare a new version of the clause and to submit it to the committee as soon as possible.

In addition to Fricke, Miss Linnea Nelson of J. Walter Thompson Company and Charles Ayres of Ruthrauff & Ryan, Inc., were guests of the committee at luncheon and listened with the committee to the War Advertising Council broadcast.

Following luncheon, the committee reviewed the proposed releases of the department of broadcast advertising and endorsed the material to be covered in these releases as well as their method of presentation. It also urged Avery to study industries, which are not now prospects for broadcast advertising, but which may develop into important consumer advertisers after the war. He is to submit recommendations at the next meeting of the committee with a view toward the preparation of presentations to such industries on the advantages and uses of broadcast advertising.

In a discussion of five-minute commercial programs, stations were urged to remember the provisions of the NAB Code of Ethics relating to such programs and to abide by its self-imposed restrictions. Stations were also urged to restrict the number of announcements in participating programs to improve the showmanship and listenership of such broadcasts.

Recognizing the confusion that exists where an advertiser pays the one-minues rate but uses live copy, the committee urged NAB to make a study of the problem with the ultimate aim of preparing recommended industry standards.

The increasingly irritating problem of "cow-catcher" and "hitch-hike" announcements was discussed in some detail. Outler finally introduced a motion condemning the practice on both network and spot programs and announcements, and urging the NAB Board of Directors to investigate remedial action. The motion was seconded by Beaver and passed unanimously.

The meeting recessed at 5:00 p. m. to reassemble at 11:00 a. m. on Friday to see a preview of the Retail Promotion Plan. Full details of the Friday meeting will appear in the next issue of the NAB Reports.

DISTRICT PUBLIC RELATIONS CHAIRMAN APPOINTED

The following Public Relations Chairmen have been appointed by their District Directors, to work with the Public Relations Committee and Willard D. Egolf, Assistant to the President of NAB, in formulating and executing a plan for industry activity.

This is in line with the decision of the Public Relations Committee, meeting in Chicago, June 23-24, that responsibility for public relations rests primarily with local station management, coordinated through national headquarters and a Public Relations Chairman for each NAB District. Other appointments are expected in due course from District Directors.

District 1—Edward E. Hill, WTAG, Worcester, Mass.
District 7—Vernon H. Pribble, WTAM, Cleveland, Ohio.
District 8—Clarence Leich, WGBF-WEOA, Evansville, Ind.
District 13—Karl O. Wyler, KTSM, El Paso, Texas.
District 17—Harry Buckendahl, KALE, Portland, Ore.
District 2—Michael Hanna, WHCU, Ithaca, N. Y.

WHITE HOUSE PRESS MEETINGS NOW "PRESS AND RADIO"

The following exchange of correspondence occurred between Walt Dennis, NAB news bureau chief, and Stephen T. Early, secretary to President Roosevelt. The correspondence is self-explanatory. Station managers are asked to act on paragraph 5 of Dennis' letter by advising their news editors. Similar letters have been sent to James F. Byrnes, Edward R. Stettinius, Harold Ickes, Mrs. Roosevelt, Secretaries Hull, Stimson and Knox, Donald Nelson and Elmer Davis.

June 29, 1943.

Dear Mr. Early:

This is a small request in a time of big things, but having dealt with you as a newsman in several sections of the country on various occasions I know you will give it your usual generous consideration.

The conferences President Roosevelt holds with newspaper and radio reporters are generally referred to as "press" conferences. This does an injustice to what is now the greatest news medium in the world—radio.

I realize that the word "press" may be considered now to have a general meaning and not apply specifically to newspapers in connection with "press" conferences, but we offer an easy way out—

Substitute the word "news" and you have "news" conference.

The radio industry through our association is being urged to effect this changeover and to edit all copy for broadcasting to read "news" conference or "news" source, or "news" association, etc.

We ask your consideration on this matter and hope to have the favor of your approval so far as the White House official naming of "news" conferences is concerned.

July 1, 1943.

Dear Mr. Dennis:

This is in acknowledgment of your letter of June twenty-ninth. The suggestion that you make is entirely consistent and in principle I am quite willing to go along with you. Accordingly, we will hereafter at the White House designate the President's stated meetings with the news gatherers as "press and radio conferences."

A CASE STORY ON THE VALUE OF CHECKING FREE-TIME REQUESTS

To give you a suggestion on the advisability of trying to sell a person or organization commercial time when the request for free-time is based on appeal which, if granted, would result either directly or indirectly in financial profit for the person or organization, the NAB department of broadcast advertising offers the following case history:

The S. B. Penick company of New York City requested free time on a station to promote stimulation of production among farmers who produce the raw material from which the Penick company processes its products.

Basis of the appeal was to request farmers and their families to gather (which provide essential oils) and to advise the farmers of the market conditions.

As such stimulated production would indirectly result in more income for the Penick company, it was advised to buy a regular series of spot commercials through an advertising agency.

The company at once complied and is now testing with a campaign over a southern station.

Special Mailings Notice

This week you should have received the following special mailings: "The Beam," second issue; transcripts of the Cox Committee Hearings, session No. 2, and the Petrillo hearings. If you wish extra copies, please advise C. E. Arney, Jr., at NAB Washington headquarters.

KERN TIPS IS NAMED HOME COUNTY OCD DIRECTOR

Kern Tips, manager of KPRC, has been appointed civilian defense director of Harris county, Texas.

A veteran of OCD work in the county, Mr. Tips is an air raid warden. He was cited for the position of director in a statement issued by the mayors of the 12 cities and towns in the county and a county judge.

Mr. Tips will immediately bend his efforts to enlarging and expanding the staff and work of the county defense units, he advised the county leaders.

WAR TALKS AVAILABLE TO LOCAL RADIO STATIONS

American radio stations are now being offered free use of a large group of brief talks on various phases of the war effort. Through the facilities of the Writers' War Board, New York City, speeches have been written by some of America's foremost writers. These speeches which must be presented without any reference to the individuals who wrote them, run from 8 to 13 minutes in length and deal with such diverse war topics as: the nature of the enemy; the need for post-war planning; the civilian's place in the war effort; the origins of the war, etc.

ACCOUNTING COMMITTEE

The NAB accounting committee is in session at the Statler Hotel in Washington as this issue of the "Reports" goes to press. A full report of the meeting will be issued with next week's "Reports."

Any or all of them are available to radio stations for use on either sustaining or sponsored programs. No charge is made for their use and, although it is preferred that credit for their preparation by the Writers' War Board be given, it is not obligatory.

A full list of these speeches with a brief description of each can be obtained by addressing the committee on speeches and speakers, Writers' War Board, 122 East 42nd Street, New York 17, N. Y.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 19th They are subject to change.

Thursday, July 22

Further Hearing

WOKO—WOKO, Incorporated—Albany, N. Y.—Renewal of License (main and auxiliary), **1460 kc.**, Main: 500 W night, 1 KW day; Auxil.: 500 W, unlimited.

Friday, July 23

KSJB—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Modification of license, **600 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

—Baylor University and Carr P. Collins, Corpus Christi, Texas.—Granted construction permit (B3-P-3524) for a new station to operate on **1010 kc.** 50 KW directional antenna, from daytime to sunset at Little Rock, Ark.

KFMB—Worcester Broadcasting Corp., San Diego, Cal.—Approved amended application for consent to transfer control of the Worcester Broadcasting Corp. from the Estate of Warren B. Worcester, deceased, to the First National Trust and Savings Bank of San Diego, (B5-TC-315), and renewal of license application for a period of one year.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending August 1, 1945.

KFVS, Cape Girardeau, Mo.—KGFL, Roswell, New Mex.; KIUP, Durango, Colo.; KRLC, Lewiston, Idaho; KVRS, Rock Springs, Ky.; WBTH, Williamson, W. Va.; WDAS and auxiliary, Philadelphia; WHBQ, Memphis, Tenn.; WJLD, Bessemer, Ala.; WMIN, St. Paul, Minn.; WRRN, Warren, Ohio.

The following stations were granted renewals for the period ending June 1, 1945:

WDAK, West Point, Ga.; WGAA, Cedartown, Ga.; WGH, Newport News, Va.; WKEY, Covington, Va.

KICA—Hugh DeWitt Landis, Clovis, New Mexico.—Granted renewal of license for the period ending April 1, 1945.

MISCELLANEOUS

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebr.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1527).

WMT—Iowa Broadcasting Co., Inc., Cedar Rapids, Iowa—Adopted an Order granting petition of Iowa Broadcasting Co., Inc., for a continuance of the hearing in re application of Jamestown Broadcasting Co., Inc., KSJB, Jamestown, N. D., for modification of license; hearing continued until July 23, 1943 (Docket No. 6519).

APPLICATIONS FILED AT FCC

1230 Kilocycles

KRLH—Millard Eidson, Independent Executor of the Estate of Clarence Scharbauer, Deceased, Midland, Texas.—Involuntary Assignment of License from Clarence Scharbauer to Millard Eidson, Independent Executor of the Estate of Clarence Scharbauer, Deceased.

1240 Kilocycles

WFVA—Fredericksburg Broadcasting Corp., Fredericksburg, Va.—Modification of license to change frequency from **1290 kc.** to **1240 kc.** change hours of operation from Daytime to Sharing Time with WBBL. Amended to change hours of operation to unlimited, except on Sunday when WBBL operates.

1280 Kilocycles

WDSU—WDSU, Inc., New Orleans, La.—Transfer of control of corporation from J. H. Uhalt to E. A. Stephens, H. G. Wall and Fred Weber (150 shares).

830 Kilocycles

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Special service authorization to operate from 6 a. m. to 10 p. m. with power of 1 KW. Amended re directional antenna.

MISCELLANEOUS APPLICATIONS

NEW—National Broadcasting Co., Inc., Bound Brook, N. J.—Construction permit for a new International Broadcast Station to be operated on **6100, 9670, 11890, 15150, 15190, 17780,** and **21630 kc.,** 50 KW power, A3 emission.

NEW—National Broadcasting Co., Inc., Bound Brook, N. J.—Construction permit for a new International broadcast station with power of 50 KW, A3 emission.

NEW—National Broadcasting Co., Inc., Bound Brook, N. J.—Construction permit for a new International broadcast station with power of 50 KW, A3 emission.

NEW—National Broadcasting Co., Inc., Bound Brook, N. J.—Construction permit for a new International broadcast station with power of 50 KW, A3 emission.

WAHL—Paducah Broadcasting Co., Inc., Area of Paducah, Ky.—Modification of license of relay broadcast station to add to the service area Henderson, Ky., to be used with Standard Station WSON in addition to WPAD.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bemis Bro. Bag Company et al.—Four corporations and a copartnership engaged in the manufacture and sale of tarpaulins are charged in separate complaints with mislabeling their products with respect to their dimensions. Respondents in the five complaints are:

Bemis Bro. Bag Co., 601 South Fourth St., St. Louis (4994); Canvas Products Co., 1240 South Seventh St., St. Louis (4995); The Hettrick Manufacturing Co., Summit and Magnolia Sts., Toledo, Ohio (4996); Frank M., David W., and Thomas C. Powers, copartners trading as Powers & Co., 18 South Throop St., Chicago (4997); and H. Wenzel Tent & Duck Co., 1035 Paul St., St. Louis (4998). (4994-4998, inc.)

Bishop & Babbin, Inc., Atlanta, Ga., engaged in the sale and distribution of potatoes, is charged in a complaint with falsely representing potatoes grown in New York State as having come from Maine. (5000)

W. W. Gambill, Jr., et al.—Misrepresentation of the properties and effectiveness of so-called anti-freeze solutions, advertised for use in automobile cooling systems, is alleged in a complaint issued against Wheless W. Gambill, Jr., Russell M. Campbell and M. Yuhas, who manufacture the products at their place of business at 117 Ninth Ave. North, Nashville, Tenn. (4999)

General Dairies, Inc.—A complaint has been issued charging General Dairies, Inc., 145 West 41st St., New York, and its officers, Albert A. Friedman and Mrs. Elizabeth Friedman, with misrepresentation in the sale of a book designated "Dial," used by professional people for recording appointments. (5002)

Miller Manufacturing Co., 1100 32nd St., Camden, N. J. is charged in a complaint with misrepresentation in the sale of a compound designated "Wonderweld," which he recommends for use in repairing water jackets, cylinders or other metal parts of machinery. (5001)

Miles Laboratories, Inc., Elkhart, Ind., is charged in a complaint with disseminating advertisements which fail to reveal the harmful potentialities that may result from excessive use of Dr. Miles Liquid Nervine, Dr. Miles Nervine Tablets and Dr. Miles Anti-Pain Pills. The complaint also charges that the respondent corporation's advertisements misrepresent the therapeutic value of Liquid Nervine and Nervine Tablets. (4993)

E. E. Paddock—A complaint has been issued alleging misrepresentation of the therapeutic properties of medicinal preparations designated "Dr. Paddock's Palliative and Symptomatic Treatment for Gallbladder Irritations, Gallstones and Associated Conditions" against E. E. Paddock, trading as Doctor E. E. Paddock and E. E. Paddock, M.D., 103 Glen Ridge Building, Kansas City, Mo. The treatment sold by the respondent consists of three tablets known as No. 1 (Blue Tablet), No. 2 (Yellow Tablet) and No. 3 (White Tablet). (4992)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

American Button Mould Manufacturers Association, Inc., 274 Madison Ave., New York; its officers, Isidore A. Weidhorn, Sidney Baritz, Harry Chalfin, and Samuel Luloff; and its members, Liberty Die & Button Mould Company, Inc.; C & C Button & Trimming Company, Inc.; Jacob Rabinowitz, Inc.; Handy Button Machine Company of New York, Inc., Defiance Button Machine Company, and Elias Jaffe and Solomon Jaffe, copartners trading as Jaffe & Jaffe, all of New York City, and their agents, representatives and employees have been ordered to cease and desist from entering into or cooperating in any planned common course of action to restrain and suppress competition in the sale and distribution of button and buckle moulds. (4726)

Central Sales Co., 108 West 19th St., Kansas City, Mo., engaged in the sale of smokers' supplies, sporting goods and novelties, have been ordered to cease and desist from selling or distributing any merchandise so packed and assembled that sales are to be made, or may be made, by means of a game of chance, gift enterprise or lottery scheme. (4948)

Fisher Nut & Chocolate Co., 2327 Wycliff St., St. Paul, has been ordered to cease and desist from selling or distributing candy and nut products so packed or assembled that sales of such merchandise are to be made, or may be made, by means of a game of chance, gift enterprise or lottery scheme. (4594)

General Dairies, Inc.—Samuel Perloff, Harry Perloff, Earl Perloff and Morris Perloff, 919 No. Front St., Philadelphia, engaged in the wholesale distribution of food products, have been ordered to discontinue using the trade name Atlantic Packing Co., or any trade name containing the word "Packing," in connection with the sale or distribution of any product which is not packed by them. They are also ordered to cease and desist from representing that any product is packed by them when such is not a fact. (4882)

International Trustees—An order to cease and desist from misrepresentation in the sale of form letters and questionnaires used to facilitate the collection of delinquent accounts has been issued against Guy C. Beals, trading as International Trustees, 217 East Third St., Des Moines, and Spiegel, Inc., 1061 West 35th St., Chicago. (4863)

Maurice J. Kellner, Eighth and Madison Sts., Springfield, Ill., broker and jobber of general food products, has been ordered to cease and desist from violation of the brokerage section of the Robinson-Patman Act. The respondent trades as M. J. Kellner Brokerage Co., M. J. Kellner, broker, Illinois Brokerage Co., and O-K Sales Co. (4796)

Lekas & Drivas, Inc., 19-21 Roosevelt St., New York, importer and distributor of olive oil, has been ordered to cease and desist from disseminating any advertisement which represents that its products designated "Aristocratic Imported Virgin Olive Oil" and "L. & D. Olive Oil" have any specific therapeutic value in the treatment or prevention of any disease or condition. (4815)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Brown & Williamson Tobacco Corp., Louisville, Ky., stipulated that in advertising its Avalon Cigarettes it will discontinue representing that the report of laboratory tests appearing in the July, 1942, issue of The Reader's Digest proves that Avalons are the finest quality. The stipulation also was entered into by Russel M. Seeds Co., Inc., Chicago advertising agency, which prepared and disseminated advertisements for Avalon Cigarettes. (03121)

Cabinet Manufacturing Co., Quincy, Ill., and Mace Advertising Agency, Inc., Peoria, Ill., have stipulated that they will cease representing that the device designated "Superior Bath Cabinet" is safe, economical or effective in reducing weight and that it will help to build or maintain resistance against disease. Advertisements for the bath cabinet, which is sold by Cabinet Manufacturing Co., are prepared and disseminated by Mace Advertising Co. (03118)

Craftsman Sales Co. and trading as Sterling Sales Co., 775 West Jackson Blvd., Chicago, stipulated with the Federal Trade Commission that he will cease and desist from representing in his advertising matter that cameras he sells under the designation "Cinex-V" will take pictures in color without the use of special films. (3680)

Great Western Paint Mfg. Corp.—A stipulation to discontinue certain misrepresentations in the sale of paint products has been entered into by Great Western Paint Manufacturing Corp., 1207 West 11th St., Kansas City, Mo., and Rolla E. Showalter, who at one time was a distributor of certain paints manufactured by the Great Western corporation in accordance with formulas worked out by him in cooperation with an official of the company. (36791)

Monarck Camera Co., 2222 Diversey St., Chicago, has entered into a stipulation to cease and desist from representing, through use of the word "color" in brand names, that the cameras it sells under the designations "Monarck Color Camera" and "Regal Color Camera" are in fact color cameras. (03117)

R. Q. Laboratories, 1117 South Ninth St., Alhambra, Calif., has entered into a stipulation to discontinue certain misrepresentations in connection with the advertising and sale of a medicinal preparation designated "R-Q," recommended for the treatment of various diseases and conditions of the skin. (03120)

Benjamin Zwanger, 793 Wyckoff Ave., Brooklyn, stipulated in connection with the sale of his "Laxo Method" of dieting, which includes the use of a laxative designated "Laxo," he will cease and desist from the dissemination of any advertisements which fail to reveal that the preparation should not be used when abdominal pain, nausea or other symptoms of appendicitis are present and that its frequent or continued use may result in dependence on laxatives. The stipulation provides that such advertisements need only contain the statement, "CAUTION: Use Only as Directed," if the directions for use, wherever they appear on the label or in the labeling, contain a warning to the same effect. (03119)

FTC DISMISSES PART OF CASE

In its case against The Best Foods, Inc., New York, the Federal Trade Commission has dismissed those portions of the complaint which charged the respondent corporation with misrepresentation of the color of Nucoa Oleomargarine and with misrepresenting that the product is churned in milk. The dismissal was ordered because the respondent had abandoned the practices in question.

Under an order previously entered in the same case, the Commission had closed without prejudice the other portions of the complaint in which it had alleged as misleading and deceptive the respondent's representations that Oleomargarine "is a fit food for children" and that "wholesome margarine and butter are equally delicious and nutritious."

FLY DEMANDS HEARING

FCC Chairman James Lawrence Fly Thursday released the following letter to the Select Committee to Investigate the Federal Communications Commission:

"In the record of hearings on yesterday, Congressman Cox made the following statement:

" 'Mr. Fly, the Chairman of the Federal Communications Commission has, according to press reports, been insisting that the Commission be given opportunity to put its position on record as regards complaints made against it. You will recall we had Mr. Fly up here about ten days ago and he refused to talk. So the Committee has called you (Commissioner Craven).'

"I am not conscious of ever having had an opportunity to testify before your Committee on any of the various matters coming within the scope of the resolution adopted by the Congress to investigate the Commission. On my one brief appearance before the Committee I was called upon to produce one file of the Board of War Communications.

"I cannot but reiterate the importance of the full Committee giving to me and the Commission a prompt hearing on the charges which the Committee has made public. I stand ready at any time to appear before the Committee, and I again want to urge that I be given this full and complete opportunity to be heard at an early date. I shall await your advises."

Sincerely yours,

James Lawrence Fly.

Petrillo

The War Labor Board, it is reported, has accepted jurisdiction in the Petrillo transcription ban case. A tri-partite panel is to be appointed to investigate the entire situation after which the WLB will decide whether to order the musicians to make recordings or not.

LEGISLATIVE COMMITTEE

The NAB legislative committee met in Washington on Wednesday (July 21), to review developments which have taken place since its last meeting. A thorough discussion of the White-Wheeler bill and the prospective hearings on that measure, which Senator Wheeler has announced will be held shortly after the reconvening of Congress, was had. The Holmes bill was also reviewed and discussions were held regarding the possibility of hearings before the House Interstate and Foreign Commerce Committee on that measure. A report was made on the developments which have occurred in the hearings before the House Select Committee investigating the Federal Communications Commission. It was the concensus of the Committee that district meetings be held in as many districts as possible in the very near future in order that broadcasters may develop satisfactory plans for contacting members of Congress to inform them regarding radio matters and the need for an examination of the present radio law. Following luncheon, a brief discussion of future plans took place.

The following were present: Don S. Elias, Nathan Lord, Clair McCollough, Joseph Ream, Frank M. Russell, G. Richard Shafto, James D. Shouse, James W. Woodruff, Jr., Ed Yocum, Neville Miller, Chairman, C. E. Arney, Jr., Secretary.

NATIONAL ENTERTAINMENT GROUP ORGANIZED; SWINGS INTO ACTION

Dennis Named to Key Committees

The National Entertainment Industry Council in a two-day meeting in the Waldorf-Astoria hotel in New York City this month completed formal welding of 45 organizations into NEIC and named a coordinating committee of 25 persons to carry on all routine and administrative work between meetings of the council.

C. E. Arney, Jr., and Walt Dennis represented NAB at the sessions. Dennis, who was named on the nominating committee, also is the representative for the Advertising Federation of America.

The NEIC adopted a three-point national program:

1. Immediate establishment of a national pool of entertainers to be used in filling requests for any and all entertainment to be used in war or other activities locally, regionally, nationally or internationally.
2. Education of the nation to the fact that the entertainment industry is an industry and should be recognized as such and not as a collection of people who commit crimes against morals and who earn fabulous salaries.
3. Set up a list of 15 major projects to be undertaken in the interest of the war work and morale building.

At the first meeting of the coordinating committee Tuesday, July 20, Dennis was named to the NEIC permanent finance committee and an administrative budget of $12,500 was approved. Funds will be raised by contributions from the supporting organizations.

Broadcast Advertising

MEET THE NEW SALES MANAGERS EXECUTIVE CHAIRMAN

Dietrich Dirks, of KTRI, newly appointed chairman of the sales managers executive committee, is a real pioneer in the field of broadcasting, having spent 17 years in station operation and sales direction.

Born on a farm in Auburn, Nebr., Dee was educated in

BROADCAST ADVERTISING

(Continued from page 325)

the public schools of Hildreth, later attending the college of business administration of the University of Nebraska. Following his graduation, he returned for one year of postgraduate work in business administration. During his undergraduate days at Nebraska, he spent considerable time with the Lyceum and Chautauqua circuits, getting his first experience with "showmanship."

Appointed program director of KFAB in 1926, he was jumped to vice president and general manager of the Central States Broadcasting Co., operators of KFAB, KFOR and KOIL, in 1928. He continued in that capacity until 1936, when, in association with the Sioux City Tribune Co., he became half-owner and manager of the Sioux City Broadcasting Co., operator of KTRI.

During his service in various fields of broadcasting, he has been active in association affairs, having served in several capacities and for the last two years as a member of the sales managers executive committee.

He is married and has a two-year old son.

FOR DISTINGUISHED SERVICE

Few chairmen of the sales managers executive committee, in the seven-year history of that group, have served with the distinction or attained the objectives which have marked the tenure of John M. Outler, Jr., of WSB., retiring chairman.

Famed throughout the industry as a raconteur of distinguished ability, Johnny combined a rare sense of humor with unusual executive direction to carry the work of the sales managers group to new heights of accomplishment and to open new roads for exploration by this group.

As a member of the committee that recomended to the NAB board of directors the creation of a Retail Promotion Plan and the appointment of a special committee to carry this project forward, he has given unlimited time and exceptional abilities to the prosecution of this effort.

During the district meeting tour in the fall of 1942, Johnny talked at the meetings in Pinehurst, Atlanta, Nashville, Des Moines, Chicago, Indianapolis and Columbus in support of the plan and in solicitation of pledges. Except for the late arrival of a train, he would also have appeared at the meeting in Minneapolis.

At his suggestion, the retiring sales managers committee recommended to the incoming group a study and presentation, comparable to the one now nearing completion for the retail field, to be directed to the automotive industry. This project has been enthusiastically endorsed by the press of the broadcasting industry and viewed with special alarm by the trade papers of other media.

Symbolic of the appreciation of the industry for his services was the rousing cheer that greeted the motion of Arthur Hull Hayes of WABC, at the conclusion of the sales managers meeting in Chicago on April 26, 1943, that Johnny be given a rising vote of thanks for his leadership and inspiration. Fortunately, he will continue to serve on the committee during the 1943-44 term.

Special thanks, too, are due J. Leonard Reinsch, general manager of WSB, for assuming Johnny's duties as commercial manager from time to time in order to permit his participation in industry activities. This generous attitude on the part of Mr. Reinsch has been in no small measure responsible for the achievements of the sales managers group during the past year.

ANOTHER DEPARTMENT STORE MAKES RADIO ADVERTISING PAY

"Stores Can Make Radio Advertising Pay" is the intriguing title of an article that appeared in the May issue of *Department Store Economist.* Through the courtesy of that publication, a reprint of the article is enclosed with this issue of the "NAB Reports."

As you read the article, you will find it analyzes in unusual detail the problems a department store faces in the use of broadcast advertising. You will find some real "meat and potatoes" in this searching description of the experiences of J. N. Adams & Company—the largest department store in Buffalo, N. Y.

There are several references to Herbert C. Rice of the Buffalo Broadcasting Corporation, who is a member of the NAB program managers executive committee and, obviously, as the article indicates, very commercially minded. Undoubtedly the program manager at your station will also be interested in this article.

Like all recent releases of the department of broadcast advertising, this reprint has been prepared on 8½ x 11 inch paper, with three-hole punching, so that it can be included in your copy of "A Manual of Radio Advertising." And, again, plenty of additional copies are available for your use. A note will bring as many as you want.

RETAIL PLAN PREVIEW ENTHUSIASTICALLY RECEIVED

"It far exceeded my expectations," declared Gene L. Cagle of KFJZ, following a preview of the Retail Promotion Plan at a joint meeting of the retail promotion and the sales managers executive committees in New York on Thursday, July 15, 1943.

John E. Surrick of WFIL, a guest at the preview as a member of the sales managers executive committee, summed up the consensus when he said: "I knew it was going to be good because of the amount of thought and work that has been devoted to it—but I didn't know it was going to be *that good.*" Without exception, those who witnessed the preview unanimously agreed that the Retail Promotion Plan tells the most complete and convincing story of broadcasting as an advertising medium that has ever been told.

Following the preview, the committee discussed the proposed itinerary of the master showings of the plan, reviewed the budget for the project and authorized the final production of the presentation using sound motion pictures, animated slide film and charts. During the discussion of the itinerary, a tentative world premiere was set for Washington, D. C., early in October.

Production of the five "How to Do It" booklets will begin immediately. These supplement and implement the sales story of the presentation, bringing it down to numerous outstanding case histories and pointing the specific application of broadcast advertising to individual retailers' problems.

At the conclusion of the luncheon on the second day of the meeting, the committee voted unanimous appreciation of the superb direction and organization of the study and presentation by Sheldon R. Coons, counsel to the committee. It also moved a rising vote of thanks to Paul W. Morency, chairman, Walter Johnson and Lewis H. Avery for their untiring work on the project.

With one exception, all members of the retail promotion committee were present at the preview. In addition to Chairman Morency, these included: Robert E. Bausman, WISH; Gene L. Cagle, KFJZ; Dietrich Dirks, KTRI; Kenneth K. Hackathorn, WHK-WCLE; Arthur Hull Hayes, CBS; Walter Johnson, WTIC; C. L. McCarthy, KQW; James V. McConnell, NBC; John M. Outler, Jr., WSB; Oliver Runchey, KOL.

The meeting was also attended by C. K. Beaver of KARK; Sam H. Bennett of KMBC and John E. Surrick of WFIL, members of the sales managers executive committee who are not also members of the retail promotion committee.

Three members of the advisory committee of promotion executives, appointed by Chairman Morency to assist in the production and presentation of the plan, were also present: M. F. Allison of WLW-WSAI; Charles B. Brown of NBC and John J. Hade of WJZ.

Several guests of the committee were also present at the preview, including: Neville Miller, president, NAB; C. E. Arney, Jr., secretary-treasurer, NAB; Robert H. Leding of the Sheldon R. Coons organization; R. S. Evans and Gordon Miller of the Jam Handy Organization; Dr. Paul S. Lazarsfeld, director of the office of radio research, Columbia University; Charles F. Phillips of WFBL and C. Robert Thompson of WBEN.

REPORT ON NAB ACCOUNTING COMMITTEE MEETING

The NAB accounting committee held its first meeting since its membership was appointed following the NAB War Conference. The meeting was held in Washington with Chairman H. K. Carpenter of WHK, Cleveland, presiding. Members present were: Messrs. John B. Conley, WOWO, Fort Wayne; Charles C. Leonard, WAVE, Louisville; Harry F. McKeon, NBC, New York; Jess Swicegood, WKPT, Kingsport; Lloyd C. Thomas, KGFW, Kearney. Samuel R. Dean of CBS, New York was unable to attend. Paul F. Peter, the committee secretary and Mrs. Helen H. Schaefer, his assistant, represented NAB. J. Harold Ryan, Chairman of the broadcast sub-committee of the advisory committee on government questionnaires attended as a guest.

Mr. Ryan told of the functions of his committee and its decision to confer with the FCC on certain questionnaires and forms sent to stations prior to their formal submission to the Bureau of the Budget for approval. The purpose of such conference is to establish a better understanding between the industry and the FCC concerning the Commission's gathering of information. Mr. Ryan called upon the accounting committee to review the FCC annual financial and employee data form used for reporting the year 1942. He also asked that the committee review any other Commission forms which it felt should be included in such discussions with the Commission.

The committee reviewed the FCC financial and employee data form and is submitting its recommendations for revision to Mr. Ryan's committee. The accounting committee also discussed the program and transmitter log requirements of the Commission and the forms employed for reporting changes in stock ownership of stations. The committee reviewed the NAB program log recommendation which was prepared by the accounting committee in 1940. It was decided to make minor revisions necessitated by certain changes in FCC rules and regulations and submit the revised recommendation to Mr. Ryan's committee for inclusion in discussions with the FCC.

The committee decided to review the NAB accounting manual to ascertain whether revision is necessary to increase its usefulness; first, as to its contribution to station accounting as a management tool; second, its contribution to stations in producing information required by the FCC; and third, its assistance to stations in tax matters. To accomplish this work, a sub-committee was appointed consisting of Mr. Leonard, Mr. McKeon, Mr. Conley and Mr. Dean, who are to review the accounting manual in detail and recommend revisions.

The committee received a complete file of the work done by previous committees in an effort to evolve a recommended invoice form as requested by the American Association of Advertising Agencies. A complete review of the file resulted in the instruction of the secretary to prepare a revised report which can be used for consultation with the 4A's.

No date was set for the next meeting. However, there will undoubtedly be a meeting called early in the fall.

RED CROSS NEEDS HELP! YOU CAN FURNISH IT

Fighting on the battle fronts around the globe has already placed new burdens on the American Red Cross and the Red Cross must have help.

This was made known at a conference recently held at

We Need Your Help

Much of the down-to-earth selling power of the Retail Promotion Plan depends upon an analysis of the present use of broadcast advertising by department stores and leading retail establishments. To help the Committee and Sheldon R. Coons to include the most complete analysis possible, won't you please do *two* things today:

1. Fill out and return the Statistical Questionnaire on page two of the folder mailed you on May 27, 1943.
2. Write a letter immediately, telling in your own words and in your own way, some of your recent experiences with retail advertising.

Your co-operation will be of genuine benefit in the preparation of the presentation.

NAB between Neville Miller and Messrs. Brown, Bowen and Ruthrauff of the Red Cross headquarters staff.

Broadly speaking the Red Cross has a three-way health plan as follows:

1. Recruitment of registered nurses for duty with the armed forces.
2. Recruitment of 200,000 volunteer nurse's aides to work in over 2,000 civilian and military hospitals in the United States. These nurse's aides help bridge the gap left by registered nurses going overseas.
3. Recruitment of 500,000 people to take simple Red Cross home nursing instruction so that they may be prepared to give simple medical care at home until the services of a doctor may be secured.

F. Bourne Ruthrauff, chief, radio section, explained that the Red Cross had been given a quota of 2,500 registered nurses monthly, 2,000 for the Army and 500 for the Navy. This is a total of 30,000 registered nurses for the next twelve months.

Already 30,000 registered nurses are serving in the Army Nurse Corps. They are on duty in 537 stations in the United States and in 35 countries outside the U. S.

More than 4,000 nurses are serving in the Navy Nurse Corps, on duty in 212 U. S. stations and in 27 foreign countries.

Promotion in each of the three categories listed above is in order. Before long the Red Cross hopes to provide chapters with a variety of material for offering to stations. To make certain that the situation is understood, here are the facts:

Army and Navy quotas were reached in March. But in April there was a slight drop; and a drop was 50 per cent in May. June figures are showing a similar decrease.

The Army Nurse Corps reports that is is now 1,400 short of estimated needs while the Navy Nurse Corps reports that its constantly maintained reserve has been exhausted and that all nurses who have taken their oaths of office have been assigned.

OREGON STATE BROADCASTERS MEET; HEAR SPENCE, PENGRA

Oregon State Broadcasters Association met this month in a joint session with the Washington Broadcasters Association in Portland with Henry Spence, KXRO, and Marshall Pengra, KRNR, as principal speakers.

Spence told the broadcasters the history of the recent Supreme Court decision and the White-Wheeler legislation as well as analyzed the present need for legislation, the difference between the network rules and the unrestricted powers now established.

The broadcasters agreed to contact their congressmen while they are on recess.

Pengra reported on the work of the small market stations committee and the meeting resolved against the discriminating aspects of the Bankhead bill ($30,000,000 for newspaper ads—none for radio), against OWI for allowing newspapers to sell space for War Bond advertising while radio is prohibited from doing this, and to have NAB hire a staff director representing small stations.

The following persons attended:

James Murphy, KIT; Carl Haymond, KMO; Dick Dunning, KFPY; Charles Chatterton, KWLK; Bob Chandler, United Press; Art Morey, KWJJ; Lee Bishop, KMED; Chester Duncan, KOIN-KALE; Chet Wheeler, KWIL; Joe Chytil, KELA, and Bob Brister, KELA.

Frank Loggan, KBND; Kessler Cannon, KBND; O. A. Runchey, KOL; Hal Wilson, KXL; Allen Miller, KOAC; Harry Buckendahl, KOIN-KALE; Mark Knight, Associated Press; Luke L. Roberts, KOIN-KALE; H. M. Swartwood, Jr., KOIN-KALE; Ted Kooreman, KALE; Harry Spence, KXRO; Marshal Pengra, KRNR; "Q" Cox, KGW-KEX; Homer Welch, KGW-KEX; Arden X. Pangborn, KGW-KEX; H. B. Read, KSLM; Tom Olsen, KGY, and C. W. Myers, KOIN-KALE.

Mrs. M. E. Gilmore, KBPS; Ben E. Stone, KOOS; Dave Foster, KGW-KEX; Barney Kenworthy, KODL; J. Kendall, KODL; Grant Feikert, KOAC; Johnny Carpenter, KOIN-KALE; Lester Spillane, FCC; Kenneth Clark, FCC; Ted W. Cooke, KOIN-KALE, and James McLoughlin, Keating Studios.

NO DISCRIMINATION SAYS MARITIME COMMISSION

An NAB member station advises that a local U. S. employment office and a government contractor have stated that the Maritime Commission has advised that while it is allowing reimbursement for newspaper ads, it will not reimburse advertisers for radio expenditures.

The matter has been taken up with the public relations division of the Maritime Commission and the NAB has been assured there is no such rule. Any advertising expenditure of a legitimate character, whether made with radio or newspaper, will receive the same consideration at the hands of the Maritime Commission.

LISTENER GROUPS WIN PRIZE IN MINNESOTA

A study of day time programs has been made recently by members of the Minnesota Radio Council, under the direction of Mrs. George B. Palmer, regional director of listener activities for the area. The listeners were organized into teams with specific periods each day assigned for listening. Each member was required to listen five days a week. Written daily reports with personal data as well were made. The promotion was developed by Mrs. Palmer to raise money for the Minnesota Federation's Nursing Scholarship Fund. Knox Reeves Advertising Agency worked out the details and checked the findings.

At the close of the test, the sum of $250.00 was given to Mrs. Palmer for the scholarship fund. This meant that the listeners did a research job without remuneration except to the club war project. The agency was well pleased with the results. As Mrs. Palmer stated in the letter giving general instructions:

> ". . . it is not our job to tell professionals how to write and produce shows, but we can contribute very materially as a group in giving agencies and sponsors some idea as to what we like best and so help them to give us what we want."

BATTERY PRODUCTION UP; SEARS WILL NOT LIST

Production of farm radio batteries at present is about equal or a little better than in the second quarter when, according to WPB, 1,350,000 packs were produced.

One of the "big three" battery manufacturers said Thursday that corn starch was giving them more trouble than any other material entering into battery construction.

The mail order house of Sears, Roebuck and Co. has decided not to list farm radio batteries in forthcoming fall catalogs not yet printed. The company will, however, accept delivery of their regular quota of batteries from suppliers. Because catalog readers assume that all articles listed therein are instantly available for purchase, the company will be able to eliminate considerable letter writing. Manufacturers actually are doing a good job of dividing their output on the basis of past purchases. No outlet for batteries receives more batteries than have been handled in the past.

Reproduced below is a letter to the Hon. James F. Byrnes, director, Office of. War Mobilization, from the former director of WPB's consumers durable goods division which handles radio batteries. The director, Edwin P. Felt, is no longer in this post. His letter, dated July 8, was mailed to Neville Miller, NAB president, with an attachment from Mr. Byrnes.

"We have received a letter from the National Association of Broadcasters addressed to you under date of June 17, 1943. This letter which we are returning to you, refers to the shortage of farm radio batteries.

"In order to conserve zinc in accordance with the provisions of M-11-b, Order L-71, as issued October 2, 1942, entirely eliminated the production of portable radio batteries and restricted the production of farm radio batteries to approximately 60% of pre-war production. During the winter months, the production of military batteries was such that some manufacturers could not even make this quota and we suffered a very serious shortage of batteries for farmers who have no other source of power.

"The situation became so serious that in March of this year steps were taken to determine if additional zinc was available for use in radio batteries. Although the Zinc division had been under pressure to conserve even more of that metal, they could see the unfortunate results of our severe limitation on farm radio batteries and allowed sufficient additional zinc for the period from March 20th to June 30th, 1943, to enable manufacturers to operate at capacity. At the present time adidtional zinc has not yet been provided for third quarter capacity operations but we are working on this and hope that nothing will interfere with our program. Capacity operation will provide approximately twice as many batteries as the previous program.

"Mr Miller mentions that 'farm battery production continues insufficient to balance consumption, let alone overtake the accumulated deficit.' Unless military requirements are larger than anticipated, or unless the labor situation becomes more critical, we have every hope of producing enough batteries to keep up the consumption and provide a small surplus to overtake the deficit. However it is obvious that we are unable to get more batteries than the capacity of the industry will allow. Most of the factories are working at least two shifts; we are doing everything we can to induce other battery manufacturers, who previously had a very small radio battery production, to re-arrange their facilities for increased production of this item.

"We believe that the demand for farm radio batteries is greater today than at any time since the advent of the electric-powered radio. Due to increased rural purchasing power many battery radios were sold during 1941 and 1942 and, in addition, farmers are in a better position to buy replacement batteries. Also, listener interest in newscasts, war programs, etc., has increased and no doubt the curtailment of gasoline has contributed generally to the increased use of radio.

"There are no less than 3,200,000 farmers who depend on dry batteries for their radios and we believe it of prime importance to provide them with between 1½ and 2 sets of batteries a year. At the present capacity of the industry, we can provide about 1¾ batteries a year, if materials are made available for this production."

SHEPHERD NOW HEADS WAYS

G. O. Shepherd, former manager of WORD, has been appointed general manager of WAYS, according to the Inter-City Advertising Company and Harold H. Thoms.

Mr. Shepherd has also been manager of WWNC. He is well known in national radio circles and among Southern broadcasters.

WKBN WAR PROMOTION

Station WKBN has sent its promotion booklet "Radio at War" to NAB and it is an outstanding job in the opinion of headquarters. Done in color with tasteful halftones and make-up, the booklet contains the full story of the station's war work.

Considerable space, in fact the entire first half of the booklet, is devoted to the overall picture of radio in the war nationally and internationally. A catalogue of complete military insignia and rank also is included.

KVOO SOLVES PROBLEM OF AD LIB DANGERS ON SHOWS

Station KVOO has posted the following circular in prominent places in its studios and waiting room to help in eliminating dangers of improper release of information over the air during guest, quiz or audience participation appearances:

Caution

In the interest of national security, the more than 900 radio stations making up the American System of Broadcasting are operating in these war times under a code of voluntary self-censorship. We wish to call to your attention the following phases of information which might give aid and comfort to the enemy, and request that you keep them in mind and refrain from mentioning any of them while you are on the air:

Weather conditions, past, present, or future.
Information regarding the type, strength, or movement of units of our armed forces,
Information regarding types or movements of ships, convoys, or planes,
Information regarding the location or description of fortifications of air installations,
Any information on production plants, secret designs, statistics, or transportation of war materials,
Any information about the movements of the President of the United States.

We also request that you refrain from acknowledging any requests or making any dedications of musical numbers or other broadcast material.

Please do not repeat on the air any unconfirmed reports or rumors.

We will appreciate your co-operation in helping us maintain the excellent record the broadcasters have attained in their part in the war effort. Thank you.

RADIO STATION
KVOO
(Signed) WM. B. WAY,
General Manager.

Any station which has issued a circular upon this subject is invited to send it to NAB.

JOHN COWLES RESIGNS

John Cowles, special assistant to E. R. Stettinius, Jr., Lend-Lease administrator, has resigned his post to return to private life as president of the Minneapolis Star-Journal and Tribune. Mr. Cowles had been connected with the government department since January, 1943. He is also co-owner of stations KSO and KRNT.

NEW GUIDE FOR USE OF RECORDINGS ISSUED

New Tools For Learning, an association which functions in cooperation with the American Council on Education, has issued a new booklet titled "Recordings—for Classrooms and Discussion Groups."

This is a guide for teachers, students and group leaders prepared by the Recordings Division, of the New York

University Film Library, for use with recordings of the University of Chicago Round Table broadcasts of last August (1942) on the Post-war World.

Copies are 15¢ each and they may be obtained from the New York University Film Library, New York City.

CANADIAN SETS NEAR 2,000,000

The radio division of the Canadian Government sold 1,728,000 private radio receiving licenses during the year ended last March, an increase of six per cent, according to the Department of Commerce.

Sales in Toronto of 604,981 licenses topped all other Provinces. Licenses sold in Quebec totalled 400,902; British Columbia, 138,191; Alberta, 122,498; Saskatchewan, 122,304; and Manitoba 104,304.

Note to Radio Jobbers

Attention of radio jobbers was called today to the fact that they may apply for relief to the War Production Board on form PD-470 (WPB-1161) listing frozen stocks of copper wire mill products by amounts, sizes and types which cannot be sold in accordance with CMP regulation 4. It should be pointed out that in the event an application should be approved by WPB, copper wire sold under such authorization cannot be replaced in stock.

FEDERAL COMMUNICATIONS COMMISSION

FTC MAKES SECRET ANALYSIS

In connection with its regular routine survey of radio and periodical advertising, the Federal Trade Commission recently made special analyses of advertisements dealing with war related subjects and reported to the Office of Censorship, the WPB and OPA. The analyses were not made public, but were for the respective federal agencies alone.

'FALSE!' SAYS FLY

In response to public charges made yesterday by Counsel for the Cox Committee, Chairman James Lawrence Fly of the Federal Communications Commission today made the following statement:

The Cox Committee publicly asserted on yesterday that the Commission's Foreign Broadcast Monitoring System had sent 31 employees to the North Africa Area; and that except for a few of these, these employees had been transferred to North Africa by Chairman Fly without clearance with the Commission. The statements are false.

In the first place, the Commission has never had more than a total of fifteen persons connected with its work there. All of them were assigned to the Psychological Warfare Branch of the Army in North Africa. For that matter, the Commission has had no other employees there in any capacity.

Of the 15, only five are regular employees of the Commission and their transfer to North Africa was authorized by the full Commission in meeting assembled. The remaining ten were people who were living in the area and who were recruited locally to assist temporarily in the clerical and other detailed work connected with the monitoring unit. They were paid at rates ranging from $10 to $100 per month. These local people were hired by the Commission's staff in North Africa and the Psychological Warfare Branch of the Army through the good offices of the Department of State.

'NOT TRUE!' JETT SAYS

In response to public charges made this morning by Counsel for the Cox Committee, E. K. Jett, chief engineer of the Federal Communications Commission, made the following statement:

"The Cox Committee stated that most of the work performed by the Radio Intelligence Division had been published, thereby leaving the inference that the activities of the Radio Intelligence Division are not secure. This is not true. During the past three years this Division has received nearly 10,000 complaints regarding unlicensed amateurs, unlicensed broadcasts, subversive operations, and miscellaneous matters. More than 3,000 such complaints have been received from the FBI, and approximately 850 from the Army, and 800 from the Navy and Coast Guard. The local police have filed more than 1,000 complaints, and more than 2,000 have been received from the general public. All of these cases have been investigated, with the result that the Radio Intelligence Division of the Commission located 345 unlicensed stations. Except in a very few instances when matter was no longer confidential, no publicity whatsoever has been given to this work.

"The Radio Intelligence Division has always enjoyed the cooperation of the Army, Navy, FBI, and other agencies which it serves. While the work of this Division is devoted primarily to policing the ether to guard against possible Fifth Column radio activities and to assist in reducing interference to radio communications, it has, nevertheless, been possible with the facilities at hand to perform work for all agencies of the government which required monitoring service. It should be observed that only a small percentage of the work of the Radio Intelligence Division has been done for the armed forces and that such work is done only when the Commission is specifically requested to undertake particular projects."

FLY CITES PRAISE FOR FBIS

In connection with proceedings before the Cox Committee, Chairman James Lawrence Fly today stated:

"Today it was charged before the Cox Committee that the Commission's Foreign Broadcast Intelligence Service (FBIS) is not performing a valuable function. To meet this charge the Commission tendered the Cox Committee 20 letters received from War Agencies using FBIS material, giving an appraisal of its value. The Committee refused to accept the letters for the record.

"They bear the signatures of such persons as General Strong and General Lee of the Military Intelligence Division, Rear Admiral Turner of the Office of Naval Operations; Elmer Davis, Nelson Rockefeller, Coordinator of Inter-American Affairs, Breckinridge Long, Assistant Secretary of State, and John Winant, American Ambassador to England.

"These letters show the great value and importance of FBIS work.

"Thus the War Department finds FBIS reports contain 'very valuable information' and are 'of substantial value from a military standpoint' and 'strongly recommends that the Service's coverage be extended.'"

"The Navy Department considers that the service rendered is 'well adapted to its needs' and 'extremely useful and important'; and that the material received has 'considerable value in sometimes giving inadvertent notice of operations.'

"The Director of the Office of War Information says 'Your service (FBIS) constitutes a major source of information on what is happening in Germany, Italy and occupied countries' and 'without the service supplied by the FBIS, the OWI could not function.'

"The Department of State reports that the FBIS is 'a most valuable addition to our foreign intelligence' and our Ambassador to England asks that the Service be furnished to the 'Embassy, American armed services and missions attached to the Embassy' so that the Embassy 'could swiftly and adequately inform Army, air and Navy services here (in England) in any period of active operations when enemy radio reports might prove vitally important.'

"The Coordinator of Inter-American Affairs reports that 'every phase' of the Service's work 'has been of great assistance to us.'

"Of particular importance, in view of the almost complete drying up of ordinary sources of news from Japan and Japanese occupied territories, is the information obtained from radio broadcasts. The Office of Strategic Services says that 'without the monitoring service of the F.C.C. our knowledge of current events in Japan would be meager' and that the various reports of FBIS are found 'indispensable' to the work of its Far Eastern Section. Similarly the Far Eastern Division of the Board of Economic Warfare makes 'very extensive use of the economic information' provided by FBIS.

"Both OSS and BEW urge 'it is vital to the war effort' that FBIS expand operations to ensure greater coverage of Japanese broadcasts.

"It will be noted that in one particular, the information obtained by FBIS is of direct importance to every soldier's family. Broadcasts by Axis stations frequently mention American prisoners of war. The War Department has asked that any such information be promptly forwarded to it as it 'is necessary in order that the American public, particularly the next of kin of American nationals in the hands of the enemy, may be properly advised.'"

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, July 26th. It is subject to change.

Wednesday, July 28

KMTR—KMTR Radio Corporation, Los Angeles, Calif.—Renewal of license, **570 kc.**, 1 KW, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WGST—Georgia School of Technology, Atlanta, Ga.—Granted extension of temporary license for a period of 30 days.

WTAW—Agricultural and Mechanical College of Texas, College Station, Tex.—Granted modification of license (B3-ML-1166) to increase hours of operation from specified hours dividing use of frequency **1150 kc.** with Station KTBC, to full daytime operation on same frequency.

KTBC—State Capital Broadcasting Assn., Inc., Austin, Tex.—Granted modification of license (B3-ML-1168) to change frequency assignment from **1150 kc.** to **590 kc.**, increase hours of operation from specified to full time, operation to be with 1 KW power daytime, 250 watts nighttime; granted subject to future requirements.

KHUB—Luther E. Gibson, Watsonville, Calif.—Granted renewal of license (B5-R-916) subject to the express condition "that this action is without prejudice to the application to the licensee of any report, rule or regulation which may result from the proceedings under Order No. 79."

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Granted modification of license (B4-ML-1158) to move main studio to transmitter location, approximately .8 mile outside city limits of Spencer, Iowa.

WBBZ—Adelaide Lillian Carrell, Executrix of Estate of Charles Lewis Carrell, deceased, Ponca City, Okla.; WBBZ—Adelaide Lillian Carrell, Ponca City, Okla.—Granted consent to assignment of the license for Station WBBZ from Adelaide Lillian Carrell, executrix of the estate of her husband, Charles Lewis Carrell, deceased, to herself in her individual capacity (B3-AL-371). Granted renewal of license upon a regular basis (B3-R-572).

DESIGNATED FOR HEARING

WJBW—Charles C. Carlson, New Orleans, La.—Designated for hearing application for renewal of license of Station WJBW.

LICENSE RENEWALS

Granted renewal of following licenses for the period beginning August 1, 1943, and ending not later than August 1, 1945:

KOBH, Rapid City, S. D.; KONO, San Antonio, Tex.; KWYO, Sheridan, Wyo.; WAGF, Dothan, Ala.; WSLB, Ogdensburg, N. Y.; KENO, Las Vegas, Nevada.

KGFW—Central Nebraska Broadcasting Corp., Kearney, Nebr.—Granted renewal of license for the period ending no later than June 1, 1945 (B4-R-703).

MISCELLANEOUS

KTKN—Edwin A. Kraft, Ketchikan, Alaska.—Granted authority to install new automatic frequency control equipment (B-F-253).

KEHJ—WDAY, Inc., Fargo, N. D.—Cancelled relay broadcast license authorization, in accordance with written request of licensee (B4-BRE-202).

KMTR—KMTR Radio Corp., Los Angeles, Calif.—Adopted order granted petition for reconsideration and grant of its application for renewal of license, heretofore designated for hearing; application for renewal of license (B5-R-17) granted. (Docket No. 6437)

W83C—WHFC, Inc., Chicago, Ill.—Placed in pending file application for modification of construction permit (B4-MPH-116) for move of transmitter and studio location, changes in antenna system, change in type of transmitter and extension of commencement and completion dates.

W731—Associated Broadcasters, Inc., Indianapolis, Ind.—Denied petition for authority to install available equipment for operation on a temporary basis until materials required to complete construction, as originally contemplated, become available; placed in pending file application for modification of permit for new high frequency station (B4-PH-122).

APPLICATIONS FILED AT FCC

1380 Kilocycles

WSYB—Philip Weiss, trading as Philip Weiss Music Co., Rutland, Vt.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

WBBL—Grace Covenant Presbyterian Church, M. A. Sitton, Agent, Richmond, Va.—Authority to determine operating power by direct measurement of antenna power.

930 Kilocycles

WKY—WKY Radiophone Company, Oklahoma City, Okla.—Modification of construction permit (B3-P-3114 as modified, which authorized installation of directional antenna for night use, move of transmitter and increase in power) for extension of completion date from 7-20-43 to 1-20-44.

710 Kilocycles

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Authority to determine operating power by direct measurement of antenna power.

MISCELLANEOUS APPLICATIONS

NEW—Columbia Broadcasting System, Inc., Brentwood, L. I., N. Y.—Construction permit for a new International Broadcast Station to be operated on **6060, 6120, 6170, 9650, 11830, 15270, 17830, 21520** and **21570 kc.**, 50 KW power and unlimited hours of operation except share time on all frequencies with WCRC, WCBX and WCDA; also share time on **6060 kc.** with KWID and KWIX; use **6120 kc.** by special authorization.

NEW—KTRH Broadcasting Co., Portable-Mobile, area of Houston, Texas.—Construction permit for a new relay broadcast station to be operated on **1606, 2074, 2102, 2758 kc.**, power of 50 watts, A3 emission, to be used with Station KTRH.

NEW—Pensacola Broadcasting Co., Portable-Mobile, area of Pensacola, Fla.—Construction permit for a new relay broadcast station to be operated on **31220, 35620, 37020** and **39260 kc.**, power of 15 watts, A3 emission, to be operated with Standard Station WCOA.

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Extension of authority to transmit programs to CFRB and CKAC and other stations under the control of the Canadian Broadcasting Corp. for the period 9-15-43 to 9-15-44.

W9XMB—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PST-4 as modified, which authorized construction of a new ST broadcast station) for extension of completion date from 8-16-43 to 11-16-43.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Ex-Lax, Inc., 423 Atlantic Ave., Brooklyn, the The Joseph Katz Co., Baltimore advertising agency, are charged in a complaint with disseminating advertisements which misrepresent the therapeutic properties of a medicinal preparation designated "Ex-Lax" and which fail to reveal the harmful consequences that may result from use of the preparation. The Joseph Katz Co. prepares advertising material for Ex-Lax. (5007)

Kay-Sherman Luggage Company, et al.—A complaint issued charges Max L. Kizelstein and Leon Sherman, trading as Kay-Sherman Luggage Co., 3 West 46th St., New York, retailers of luggage, with misrepresenting to the purchasing public that they are wholesalers and sell their merchandise at wholesale prices. (5008)

Los Angeles Pharmacal Co., et al.—Dissemination of false advertisements in connection with the sale of medicinal preparations is alleged in a complaint against Robert Salazar, trading as Los Angeles Pharmacal Co. and Hidalgo Pharmacy, 204 North Main St., Los Angeles. The respondent sells the preparations under the names "Pulmotol," "Femovita," "Renatone Pills," sometimes known as "Runaton," and "Stomavita," and advertises them in the Spanish language in newspapers and periodicals and by radio continuities. (5006)

National Secretaries' Association, 1005 Grand Ave., Kansas City, Mo., and its officers and executives, are charged in a complaint with misrepresentation in the sale of books entitled "Better Letters-Lessons in English" and "Better Letters-Quiz Book," designed for use by secretaries, and "Webster's Encyclopedic Dictionary." The officers and executives of the Association are H. Robinson Shepherd, president, who resides in Leavenworth, Kans.; and Ruth Hostetler, secretary; Hilary A. Bufton, manager and treasurer, and George Turner, sales manager, who have their place of business at the Kansas City address. (5003)

Tru-Health Garments Corp., 25 West 26th St., New York. is charged in a complaint with misrepresentation in the sale of shoulder braces and body belts designated "Tru-Health," advertised as being capable of preventing and correcting malformations and malpositions of the body. (5004)

Watts-Wagner Co., Inc.—A complaint has been issued charging Watts-Wagner Co., Inc., 109 West 64th St., New York, and its officers, Allen P. Wagner and William W. Wagner, with misrepresentation in the sale of a compound designated "Prema-Weld," recommended by the respondents for use in repairing water jackets, cylinders, or other metal parts of machinery. (5005)

STIPULATIONS

No stipulations were issued by the Commission during the past week.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

American Rug and Carpet Co., Inc., 105 Madison Ave., New York, has been ordered to discontinue representing that certain of the domestic rugs it sells are Oriental rugs. (4499)

Cement Institute and 75 member corporations who produce and distribute more than three-fourths of the portland cement manufactured in this country, and their officials and agents, have been ordered to cease and desist from engaging in or continuing any combination or conspiracy to sell cement at prices arrived at by use of their multiple basing-point delivered-price system. The Commission finds that the respondents' practices constitute unfair methods of competition in violation of the Federal Trade Commission Act and their delivered-price system results in discrimination in price among their respective customers, in violation of the Robinson-Patman Act. (3167)

Dearborn Supply Co., 2350 Clybourn Ave., Chicago, engaged in the manufacture and sale of a cosmetic designated "Mercolized Wax Cream," is ordered to cease and desist from the dissemination of advertisements that fail to reveal the harmful consequences that may result from the indiscriminate use of the preparation. (3593)

Progress Tailoring Co., trading as J. C. Field & Son, and four of its subsidiaries, all of Chicago, and their officers and agents have been ordered to cease and desist from certain representations in connection with the sale of men's clothing. The respondent subsidiaries are Stone-Field Corp., W. Z. Gibson, Inc., Pioneer Tailoring Co., and Certified Tailoring Co. (3747)

Rhode Island Plush Mills, Inc., 1112 River St., Woonsocket, R. I., has been ordered to cease and desist from misbranding textile fabrics in violation of the Federal Trade Commission Act and the Wool Products Labeling Act. (4881)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 31, July 30, 1943

PETRILLO OFFERS FREE CONCERTS; 'HYPOCRISY' IS NAB ANSWER

An idea which President Roosevelt has had for several years—sending large orchestras throughout the nation to give the people the "best possible music" flowered into full growth this week under the careful cultivating of James Caesar Petrillo, AFM president, who announced some 570 concerts by leading symphony orchestras of the nation would be given starting within a few days in smaller American cities. AFM has allotted $500,000 for this. Final plans are maturing, Mr. Petrillo allowed today.

Neville Miller Terms Plan "Hypocritical"

Following is the text of Mr. Miller's official statement on Mr. Petrillo's plan:

"James Caesar Petrillo's announcement that his union intends to give 570 symphonic concerts in small towns is unequalled for hypocrisy. Mr. Petrillo has done more to prevent symphonic music in the United States than any other man in the history of our country.

"Before Mr. Petrillo prevented the making of all recordings of symphonic music last August, the great orchestras could reach all of our people in all parts of the country through the phonograph record. The recordings so made were available for the home, schools, broadcasting stations and for all of our citizens wherever situated and whenever they wanted to hear symphonic music, not merely once each in 570 communities hand-picked by the union. The very orchestras which Mr. Petrillo now wants to bring to the people, are those which, for one full year, have been prevented from making phonograph records. If Mr. Petrillo were sincerely interested in the welfare of symphonic music, he could, by lifting his ban, permit the equivalent, not of 570, but of hundreds of thousands of times 570 concerts.

"All of the symphony organizations are non-profit institutions. A substantial part of their revenue, in some cases as much as one-third, was derived from royalties on phonograph records, 98 per cent of which, according to Mr. Petrillo's own testimony before the United States Senate, went into the American home and formed a permanent contribution to musical education. Moreover, the musician in the symphony orchestras has been deprived by Mr. Petrillo of the substantial revenue which he previously received from his recording activity. The musicians in symphony orchestras received, in addition to the royalty obtained by the orchestra itself, a minimum fee of $28 per man for no more than 80 minutes playing time.

"Mr. Petrillo has, therefore, stifled the major source of income for the symphonic orchestras, deprived the symphonic musicians of normal compensation and withdrawn from the American people the benefits of recorded symphonic music.

"It should be noted that in making this transparent gesture, Mr. Petrillo drops the last vestige of justification for his ban on recordings. He has contended that records commercially used in the smaller cities deprived local musicians of employment opportunities. Yet, when the union sets aside $500,000 to bring some music to the American people it does not employ local musicians, but instead spends it on bringing into the communities the performances of the fully employed musicians who had always made recordings.

"The good faith of Mr. Petrillo's proposal may be attacked not only on these grounds, but on the basis of his own figures. His announcement says that the men in the orchestras will be paid for their services, and he sets the normal personnel of a symphony orchestra at 90 men, although in travelling, the services of baggage men, librarians, etc., are also required. At his own figures, Mr. Petrillo is allotting less than $10 a man per concert to cover salary, railroad fares, hotels, meals, baggage car for instruments, cartage of instruments and music stands to place of performance, and incidental expenses. When a non-profit symphony society wishes to give a concert out of town today, it must pay, in addition to the high union scale, $7.50 a man per day for mere maintenance, and the lowest union scale of symphony concert tours is $100 a week a man, exclusive of the obligation of the orchestra to furnish first-class transportation, including sleepers. It is obvious, therefore, that Mr. Petrillo proposes to pay the men no compensation or only nominal compensation.

"The essence of Mr. Petrillo's gesture, therefore, is that he is going to compel some of his members to render free services and the orchestral societies to lend their names and reputations to his enterprise so that he may take unto himself the credit for their services."

Cox Hearings

Special Legislative Bulletin No. 11 is enclosed with this issue of the "Reports" to bring the Cox Select Committee hearings up to date.

WLB TO ACT SOON ON PETRILLO CASE

Within a few days the War Labor Board will issue an order stating how it will deal with the Petrillo case.

The board decided last week to appoint a panel to determine the facts in the case and to report to the board. Announcement of this decision has been held up pending its incorporation in a formal order and appointment of the panel.

STRIKE TO COMPEL EMPLOYMENT OF UNNECESSARY MUSICIANS IS RULED UNLAWFUL IN MICHIGAN

The Supreme Court of Michigan has held that a strike to compel the employment of unnecessary musicians was unlawful.

In the case of *Lafayette Dramatic Productions Inc. v.*

STRIKE TO COMPEL EMPLOYMENT OF UNNECESSARY MUSICIANS IS RULED UNLAWFUL IN MICHIGAN

(Continued from page 333)

Jack Ferentz, et al., decided April 8, 1943, Judge Starr held that:

(1) Where a labor union of stage hands, acting in combination with a musicians' union, threatened to call a sympathetic strike of the stage hands, shortly before the opening of a performance as a means of coercing a theatre owner to sign a contract for the employment of musicians which were not needed, the objective sought to be obtained invaded the theatre owner's right to conduct its business without unjust interference and its right to a free flow of labor, and did not involve a labor dispute since the object sought to be obtained was unlawful. The right to strike and carry on peaceful picketing is subject to the limitation that it shall not be employed to obtain an unlawful labor objective.

(2) Where a theatre manager, who, two hours before the opening of a theatre is confronted with the alternative of executing a contract employing unnecessary musicians or submitting to a sympathetic strike by stage hands, which would make it impossible to operate the theatre and result in the sacrifice of a financial investment, signs the contract, such a contract is induced by duress and coercion and is null and void.

REPORT ON 7TH DISTRICT MEETING AT CINCINNATI

A very enthusiastic meeting of the broadcasters of the 7th district, NAB, was held at the Netherland-Plaza, Cincinnati, Friday, July 23. The meeting was opened by director Nate Lord, WAVE, who presided and called for discussion of the May 10th Supreme Court decision as the first order of business. There was general discussion participated in by James Shouse, WLW, Leonard Reinsch, WHIO, Neville Miller, NAB, Nate Lord, WAVE, and others.

The broadcasters were the guests at luncheon of WAVE and the principal speaker was Congressman Clarence J. Brown of Blanchester, Ohio, a member of the Interstate and Foreign Commerce Committee, who made an excellent speech on the subject of "Freedom of Radio," which is printed elsewhere in this week's "Reports."

Guests at the luncheon included Congressmen Brent Spence, of Fort Thomas, Kentucky, and Edward O. McCowen, of Wheelersburg, Ohio, and representatives of Cincinnati newspapers. A telegram of greeting was read from Senator Alben W. Barkley, of Kentucky, expressing his regret at not being able to attend.

In the afternoon Robert T. Mason, of WMRN, made a report for the NAB committee on small market stations, and discussed the work and plans of that committee. "Chick" Allison, of WLW, reported for the retail promotion plan committee giving a vivid account of the recent preliminary showing held in New York. Neville Miller reported on the Petrillo ban, stating that the ban had proved a serious detriment to the war effort.

In connection with advertising plans, Vernon Pribble, WTAM, reported on the Cleveland plan which is now being considered by many other cities. A legislative committee was appointed consisting of J. Lindsay Nunn, WLAP-WCMI, Leonard Reinsch, WHIO-WSB-WIOD, Frazier Reams, WTOL, and W. Lee Coulson, WHAS, and this committee proposed the following resolution which was unanimously adopted:

(Partial Text)

> "Resolved that this group petition the Congress of the United States to review sympathetically the present law and revise and enact remedial legislation to the end that radio may continue to serve the American people to its fullest possibilities."

The meeting also adopted a resolution thanking Mr. Lord and WAVE for being hosts at luncheon, and Mr. Shouse and WLW for being hosts at a cocktail party which immediately followed the meeting.

The following broadcasters were present:

Nathan Lord, WAVE, Louisville, Ky.; J. Lindsay Nunn, WLAP, Lexington-WCMI, Ashland, Ky.; Paul Wagner, WPAY, Portsmouth, Ohio; Kenneth B. Johnston, WCOL, Columbus, Ohio; Neal Smith, WCOL, Columbus, Ohio; Carl M. Everson, WHKC, Columbus, Ohio; R. D. Borland, WHK-WCLE, Cleveland, Ohio; Vernon H. Pribble, WTAM, Cleveland, Ohio; S. Bernard Berk, WAKR, Akron, Ohio; Ronald B. Woodyard, WING-WIZE, Dayton, Ohio; R. T. Mason, WMRN, Marion, Ohio; Carl George, WGAR, Cleveland, Ohio; Harry McTigue, WINN, Louisville, Ky.; Arch Shawd, WTOL, Toledo, Ohio; Frazier Reams, WTOL, Toledo, Ohio; W. Lee Coulson, WHAS, Louisville, Ky.; Henry McClaskey, WHAS, Louisville, Ky.; J. Leonard Reinsch, WHIO, Dayton, WSB, Atlanta, WIOD, Miami; R. H. Moody, WHIO, Dayton, Ohio; W. P. Williamson, Jr., WKBN, Youngstown, Ohio; Len Nasman, WFMJ, Youngstown, Ohio; James M. Patt, WKRC, Cincinnati, Ohio; James Shouse, E. K. Bauer, Walter Callahan, J. Leonard, M. F. Allison, W. Chamberlain, George C. Biggar, WLW, Cincinnati, Ohio; Carl Kindt, WMAN, Mansfield, Ohio; Sky Fields, WMAN, Mansfield, Ohio; Fred Palmer and Bob Fleming, WCKY, Cincinnati, Ohio; and Neville Miller, NAB.

REPORT OF SPEECH MADE BY CONGRESSMAN CLARENCE BROWN BEFORE 7TH DISTRICT GROUP

Congressman Brown said he believed Congress had delegated too much power to bureaus and commissions and that the bureaus had misinterpreted the will of Congress and had assumed power which had not been delegated. He believes that Congress is now in a mood to take back some of that power because of the faulty thinking of many of those in the various commissions. For example, the FCC today is raising the question as to whether a newspaper can be trusted with a radio station. Congressman Brown cited this as just another indication of the thinking of bureaucracy.

He praised the opinion written by Justice Murphy in the network case, stating that he thought Justice Murphy was right and that he could not agree with Justice Frankfurter, when he said that Congress had not limited the authority of the Commission. Congressman Brown's thoughts regarding delegated power are that Congress does not have to set limits, but the only power a commission receives is the power which is delegated. That's the fault with the decision he said. It extends the power originally granted to the Commission. However, since the Supreme Court has spoken the FCC has the power and the answer is for Congress to so write a new act that the court can understand it.

The decision was a strong blow against freedom of the press, freedom of speech and freedom of radio he continued because it is impossible to separate freedom of radio from freedom of speech. There is no reason for government to control program content of radio stations, so long as there is no question of morals, obscene language or libel. Congressman Brown stated that he had read the Act of 1934 and was sure that Congress did not intend for the government to be other than a referee, but he noticed that there had been a tendency on the part of the FCC to reach out for more and more power which was not good for the press, was not good for radio and was not good for the country. He believes so long as broadcasts do not violate the public interest it is no business of government. Stations which do not serve the public right will become a dead spot on the dial.

The Congressman expressed his views further by saying:

"I believe Congress was as much shocked as you were with the opinion of May 10th, and I believe you can well do something about it. Congress has been busy on many other things, on the aviation code, but it is about time for Congress to say that the FCC acts merely as a referee or a policeman and that, if a policeman, it does not go about butting into other people's business. One of the troubles is that too many businessmen are afraid of government, too many want to compromise; too few want to fight for their rights. Congress is interested in the views of businessmen. It hopes that they will speak out and that they will stand up and fight for their rights."

He hopes that the radio industry will tell Congress what kind of a law they want and then Congress will write a law which will protect radio and the public.

STATION AEF, BRITAIN

The following article is reprinted by permission from the July 19, 1943, issue of *Newsweek Magazine*. We thought it a good job of telling the British radio story and its effect on the AEF (American Expeditionary Forces).

Radio has something for the boys in Britain, at last. Al Newman, one of Newsweek's *correspondents abroad, tell what it means:*

It is no military secret that BBC programs leave the average American G. I. colder than a top sergeant's glare. This is no particular reflection on anybody with the possible exception of the top sergeant. The BBC seems to suit the Britisher on the street or in the camp. He would rise in righteous wrath and start assaulting cops if anybody dared sully his precious wireless with advertisements for mouthwash.

But to the Yank accustomed to elaborate displays of talent in lavish, advertising-supported shows over four major networks and countless independent stations, British broadcast is incredibly small time. Listening as I write this, I have, for instance, learned from the BBC two valuable facts which undoubtedly will make later life happier; starfish can be stranded by the receding tide and survive till the next flood tide reaches them, and eels breed in the Sargasso Sea, preferably at a depth of 1,500 feet.

In Britain you PAYS your ten shillings a year license fee for your set (which completely finances the BBC), and you TAKES your choice of two networks, the Home or the Forces. If you don't like either you can turn your set to hell off. (I once made the mistake of bragging to a Britisher that in New York you had your choice of some fifteen different programs, and he pointed out that awfter all, old boy, you can only listen to one at a time.) Or you can listen to Germany, which is impossible on most sets here because lack of servicing has made them insensitive. Indeed, many of them have to be thumped from time to time like recalcitrant mules to keep them going at all.

Nevertheless some sets can still get Das Reich. I have witnessed the strange spectacle of American fliers listening with pleasure to a program of Nazi jazz immediately before taking off to beat the living daylights out of a target in the immediate vicinity of the transmitter.

In fairness it must be said that the United States forces have gotten more than their share of time in BBC programs. Command Performance and Mail Call are prominent features, but the whole United States Army here waits for 12:40 p. m. Sunday, when a transcribed Fred Allen program, carefully denuded of advertising, takes the air. Unfortunately these canned shows are usually pretty old, and many of Allen's jokes are topical. Last Sunday's was recorded from the week of Washington's birthday.

There is no more disappointing experience than introducing an Englishman to an Allen or Bob Hope show. He sits there, deadpan, as quip succeeds quip, and you think each succeeding joke will fetch him sure. But it never does. The only way to get revenge is to wait until an English comedian comes on and then sit there deadpan yourself—no great effort on the average—while he curls up and dies over moldy wheezes which used to do no more than irritate you when you were a boy.

Thus, radiowise, east is east and west is west. And last week, to the relief of practically everybody, they got a quiet divorce with the hush-hush opening of the American Forces network, first venture of its kind in history, which took the air on the afternoon of July 4. Here again the BBC showed its good will to the Yanks in providing transmitters and studios for the use of the Special Services section of the United States Army, which stocks the new chain from 5:45 to 10:30 each evening with home news, sports reporters, and transcriptions of such favorites as Bob Hope, Bing Crosby, Edgar Bergen, Kate Smith, and top-flight American dance bands—any of which, as far as United States doughboys are concerned, makes the best British dance band sound like Ima Hick and his Six Original Hoptoads from Corn Center, Iowa.

At this date nearly everything about the American Forces network is a military secret. Nobody will admit where the studios are, and the locations of the low-power transmitters, which are designed merely to cover the small areas thickest with troop concentrations, naturally are unmentionable. Thus most newspaper correspondents treated the debut as a small and routine story. But shrewder observers who know the importance of radio in American life pronounced its creation the most important morale move in this theater since the inception of the Stars and Stripes and Yank.

DISTRICT MEETINGS AGENDA

The following NAB district meetings have been listed by C. E. Arney, Jr., NAB secretary-treasurer:

District 11—Hotel Nicollett, Minneapolis, August 4-5.

District 15—San Francisco, August 6 (informal, coinciding with visit of Mr. Arney at that time).

District 14—Hotel Utah, Salt Lake City, August 30-31 (Mr. Arney also will attend this meeting which will elect a district director).

District 4—Asheville, North Carolina, September 3 (election of district director).

Broadcast Advertising

OUR SINCERE APOLOGIES

The July 23, 1943, issue of the NAB REPORTS assured its readers that a reprint of the article entitled: "Stores Can Make Radio Advertising Pay," from the May issue of *Department Store Economist* was enclosed. But it wasn't!

Nothing the department of broadcast advertising has ever tried to do has been as ill-fated as the comparatively simple process of reprinting this article.

We hope you will find the article was worth waiting for. And we do guarantee that it is enclosed with this issue.

EAST AND WEST ASS'N REPORTS ON ASIA RECORDS

(The following report was received from Hugh D. Beach, of the East and West Association radio department. Pearl S. Buck, the novelist, is head of this group, which is devoted to mutual knowledge and understanding of the life of the Oriental and the American peoples.)

Recently, the East and West Association, through the NBC transcription division, offered to the first one hundred stations requesting it, a free set of thirteen recordings under the general heading, "China and India Speak to America". In a surprisingly short time the quota was filled with forty-one states heard from, including six 50,000 watt stations. The records contained talks by experts in the Oriental field. (A complete list of subjects and speakers is listed below.) To supplement coverage given by local outlets, the association also offered sets gratis to school boards in ten metropolitan districts around the nation. Requests were received from boards in Chicago, Cleveland, Detroit, St. Louis and Los Angeles. Various uses have been made of the records in these cities. Wherever the school system owned its own radio station the records formed a regular educational series. In other cases, the records are handled by the visual and audial department which sent them to schools, supplying turntable equipment whenever necessary.

Such was the interest in the series that the association notified one hundred and fifty teachers colleges that the records could be obtained at cost price ($10.00 plus postage). Again, the results were most encouraging. Requests have been received from colleges in Ohio, New Mexico and Indiana, among others. Recently the Library of Congress requested a set for its files.

So encouraging has been the reaction to this project that the East and West Association is planning a similar series on Russia. The same plans will be followed in producing the new programs. Experts in their field will be chosen to record. All political and controversial material will be avoided. An earnest effort to present the people of Russia, their past and present and their future, in a simple, dignified and interesting manner, will be made. Only in that manner can the East and West Association fulfill the aims with which it was established by Pearl S. Buck in 1942.

NAB GETS PRAISED IN A.T.A.E. BULLETIN

(The following paragraphs appeared in a recent bulletin of the American Trade Association Executives Association)

During the first weeks of war, advertisers and agencies were being approached by numbers of Government departments and bureaus, seeking advertising aid in disseminating the essential facts about the cooperation needed from the public in order to make our war effort more effective. Due to the number and lack of central control of these requests, a chaotic situation resulted.

Early in 1942, "allocation plans" for network and radio spot broadcasting were put into effect by OWI at the suggestion of WAC. Acceptance of these plans by advertisers and their advertising agencies brought order out of chaos and has resulted in the contribution of $100,000,000 worth of well-spaced radio time and top-flight radio talent by advertisers, their agencies, networks and stations.

Under the network allocation plan, one of the three plans in effect, 202 coast-to-coast programs, sponsored and paid for by 120 advertisers, broadcast 150 messages a week every week since April 27, 1942, covering 56 important war subjects ranging from fats salvage to Bonds, and reaching an average of 300,000,000 listeners a week.

Under the national radio spot allocation plan (for individual stations) there are approximately 9,000,000 listeners per week to war messages.

Under the station announcement plan, an additional 8,000 messages a day are broadcast to an uncounted number of listeners.

The National Association of Broadcasters has been instrumental in setting up and operating these important allocation plans.

CAB SENDS OUT NAB TALKS

Three of the outstanding addresses made at the Chicago NAB War Conference and the Columbus Ohio Radio Institute have been distributed to members of the Canadian Association of Broadcasters by its president, Glen Bannerman.

The addresses are: "What Is Public Interest, Convenience and Necessity as Applied to Radio?" by Earl J. Glade and these delivered by Dr. James R. Angell of NBC and William S. Paley, president, CBS, before the War Conference.

ABELOFF NAMED P. R. HEAD

Irving G. Abeloff, program director of WRVA, has been appointed public relations chairman of the 4th district, NAB, by G. Richard Shafto, district director.

LOTS OF "F" IN THIS SIG

Many radio stations are doing grand jobs of getting out publications of staff news and notes to be sent their per-

sonnel in the Armed Forces, but the gang at WBTM really has a clever signature to their bulletin. It is:

"Your Loving Friends, The Fathers, The Females and the 4-Fs."

FEDERAL COMMUNICATIONS COMMISSION

FLY SAYS SMALL STATIONS "PROTECTED" BY FCC

FCC Chairman James Lawrence Fly said at a news conference Monday that the Commission has had quite a bit of reaction from the broadcast industry as the result of the Cox hearings, particularly from small stations throughout the country and "I must say that I have been quite pleased with the reactions that have come to us. I think most of the stations realize that the Commission has perhaps done more to protect them than anything else."

Mr. Fly told newsmen the comment has been mostly favorable and encouraging. "There has been some backfire from the stations" he said, "that have been pressed by the staff of the committee to give evidence or make statements against the Commission when those stations were unwilling to do so. There has been a pretty broad circularization of the various stations by the committee's counsel in an effort to get them to make statements against the Commission and in certain cases where they have declined to make such statements they receive sharp reprimands from the counsel of the committee."

The Chairman said that the FBIS monitors placed the Mussolini ouster in the hands of the various government agencies ahead of any other government or news service.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 2nd. They are subject to change.

Tuesday, August 3

J. C. & E. W. Lee (Lee Brothers Broadcasting Company), San Bernardino, Calif.—C. P., **1240 kc.**, 250 watts, unlimited.

Further Hearing

WOKO—WOKO, Inc., Albany, N. Y.—Renewal of license (main and auxiliary), **1460 kc.**; main: 500 watts night, 1 KW day; auxiliary: 500 watts; unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WTAL—Florida Broadcasters, Inc., Tallahassee, Fla.—Granted consent to assignment of license of station WTAL, from Florida Capital Broadcasters, Inc., to Capital City Broadcasting Corp., for a total consideration of $22,500 (B3-AL-370). Also granted renewal of license (B3-R-869).

WAIT—WAIT, Inc., Chicago, Ill.—Granted consent to assignment of license of station WAIT, from WAIT, Inc., to a partnership composed of the 6 corporate stockholders, viz., Gene T. Dyer, Evelyn M. Ringwald, Elizabeth M. Hinzman, Adele Moulds, Vivian Christoph, and Wm. F. Moss, d/b as Radio Station WAIT (B4-AL-369).

WELI—Patrick J. Goode, New Haven, Conn.—Granted consent to transfer of control of station WELI from Patrick J. Goode to Arde Bulova (B1-TC-323).

WNBC—William J. Sanders, Hartford, Conn.—Granted consent to transfer of control of station WNBC, from William J. Sanders to Arde Bulova (B1-TC-322).

First Baptist Church, Pontiac, Mich.—Granted extension of authority to transmit programs from applicant's studio in Pontiac, over the wire line facilities of Mich. Bell Telephone Co., to Windsor, Ontario, Canada, there to be broadcast over Station CKLW (B2-FP-111).

Edwin H. Armstrong, New York City.—Granted license (B1-LH-41) for new station (transmitter at Alpine, N. J.) to operate on **43100 kc.**, 40 KW power, and serve an area not to exceed 15,610 square miles.

W43B—The Yankee Network, Inc., Boston, Mass.—Granted license (B1-LH-44) to cover construction permit, in part, for high frequency broadcast station; **44300 kc.**, unlimited time, 19,000 sq. mi.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—License for high frequency broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—License for high frequency broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1943.

W49BN—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Granted license (B1-LH-18) to cover construction permit (B1-PH-10 as amended) in part, and specifying 134 Chenango Street, Binghamton, N. Y., as the location of its main studio.

W2XWE—WOKO, Inc., Albany, N. Y.—License for facsimile broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1943.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending August 1, 1945:

KFPW, Fort Smith, Ark.; KRKO, Everett, Wash.; KTSW, Emporia, Kans.; KTTS, Springfield, Mo.; KWON, Bartlesville, Okla.; WARM, Scranton, Pa.; WATW, Ashland, Wis.; WBNY, Buffalo, N. Y.; WBTM, Danville, Va.; WCNC, Elizabeth City, N. C.; WFOR, Hattiesburg, Miss.; WGBR, Goldsboro, N. C.; WGRC, New Albany, Ind.; WEST, Easton, Pa.; WKWK, Wheeling, W. Va.; WJAC, Johnstown, Pa.; WJLB, Detroit, Mich.; WRJN, Racine, Wis.; WSAU, Wausau, Wis.; WSRR, Stamford, Conn.; WTCM, Traverse City, Mich.; WJZM, Clarksville, Tenn.; KELD, El Dorado, Ark.; KLUF, Galveston, Texas; KTOK, Oklahoma City; KVFD, Fort Dodge, Iowa; KFRU, Columbia, Mo.; KRE, Berkeley, Calif.; KTEM, Temple, Texas; WABY, Albany, N. Y.; WCOS, Columbia, S. C.; WGIL, Galesburg, Ill.; WHLB, Virginia, Minn.; WHUB, Cookesville, Tenn.; WHYN, Holyoke, Mass.; WKMO, Kokomo, Ind.; WKPT, Kingsport, Tenn.; WMBR, Jacksonville, Fla.; WMGA, Moultrie, Ga.; WORD, Spartanburg, S. C.; KOKO, La Junta, Colo.; WMFD, Wilmington, N. C.; WRAK, Williamsport, Pa.; WLLH and Synchronous Amplifier, Lowell and Lawrence, Mass.; KTNM, Tucumcari, N. Mex.; WCBM, Baltimore; WDWS, Champaign, Ill.; WINC, Winchester, Va.; WDEF, Chattanooga, Tenn.; KTUC, Tucson, Ariz.; WRDO, Augusta, Maine.

The following stations were granted renewals for the period ending June 1, 1945:

KAND, Corsicana, Texas; KPDN, Pampa, Texas; WEXL, Royal Oak, Mich.; WJPR, Greenville, Miss.; WWPG, Palm Beach, Fla.; KROC, Rochester, Minn.; WFIG, Sumter, N. C.; WLAK, Lakeland, Fla.

Licenses for the following stations were further extended upon a temporary basis only, for the period ending October 1, 1943, pending determination upon application for renewal:

KBST, Big Spring, Texas; KCMC, Texarkana, Texas; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Texas; KIUL, Garden City, Kans.; KPLT, Paris, Texas; KRBC, Abilene, Texas; KRLH, Midland, Texas; KSUB, Cedar City, Utah; KVGB, Great Bend, Kans.; KVSF, Santa Fe, N. Mex.; KWFC, Hot Springs, Ark.; WABI, Bangor, Me.; WCBI, Columbus, Miss.; WCBT, Roanoke Rapids, N. C.; WCOV, Montgomery, Ala.; WGGA, Gainesville, Ga.; WHOM, Jersey City, WHOM auxiliary; WLBJ, Bowling Green, Ky.; WNBZ, Saranac Lake, N. Y.; WOCB, Near Hyannis, Mass.; WSAY, Rochester, N. Y.; WSYB, Rutland, Vt.; WTEL, Philadelphia; WJW, Akron, Ohio.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1943:

KORN, Fremont, Nebr.; KSJB, Jamestown, N. Dak.; KWLK, Longview, Wash.; WATL, Atlanta, Ga.; WBLK, Clarksburg, W. Va.; WELL, Battle Creek, Mich.; WEOA, Evansville, Ind.; WHDF, Calumet, Mich.; WJHO, Opelika, Ala.; WMSL, Decatur, Ala.; WSAM, Saginaw, Mich.

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Granted renewal of license for the period ending April 1, 1945.

KXL—KXL Broadcasters, Portland, Ore.—Granted renewal of license for the regular period (B5-R-88).

KIUN—Jack W. Hawkins & Barney H. Hubbs, Pecos, Texas—Granted renewal of license for the regular period (B3-R-863).

KAVE—Barney Hubbs, et al., d/b as Carlsbad Broadcasting Co., Carlsbad, N. Mex.—Granted renewal of license for the regular period (B5-R-906).

MISCELLANEOUS

WKAQ—Radio Corp. of Puerto Rico, San Juan, P. R.—Granted modification of construction permit (B-MP-1716) for extension of completion date from 7-26-43 to 1-26-44, in re permit to move transmitter and studio location. Also granted modification of construction permit (B-P-3501 as modified) which authorized move of auxiliary transmitter, for extension of completion date to 1-26-44 (B-MP-1717).

KMA—May Broadcasting Corp., Shenandoah, Iowa.—Granted license to cover construction permit for installation of directional antenna for night use and increase in power to 5 KW (B4-L-1768); also granted authority to determine operating power by direct measurement (B4-Z-1528).

KYOS—Merced Broadcasting Co., Merced, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1530).

KTSA—Sunshine Broadcasting Co., San Antonio, Texas—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1514).

W2XCB—Columbia Broadcasting System, Inc., Portable-Mobile, Area of New York City—Granted modification of construction permit which authorized new experimental television relay broadcast station, for extension of completion date to 1-7-44.

WRDI—Northwestern Publishing Co., Danville, Ill.—Cancelled relay broadcast license in accordance with written request of licensee dated July 10, 1943.

W3XWT—Allen B. DuMont Labs., Inc., Washington, D. C.—Granted modification of construction permit authorizing new experimental television station, for extension of commencement and completion dates to 6-23-43 and 12-26-43, respectively (B1-MPVB).

Chattahoochee Broadcasting Co., Columbus, Ga.—Denied petition for rehearing directed against Commission's action on June 29, granting application of WDAK, West Point, Ga., for construction permit to move station from West Point to Columbus, Ga.

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Modification of construction permit (B5-P-3150 as modified, which authorized installation of new transmitter, directional antenna for night use, increase in power, and change in frequency) for extension of completion date from 8-25-43 to 12-1-43.

640 Kilocycles

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa—Special service authorization to operate from 6 a. m. to local sunrise, CST, with power of 5 KW, for the period ending 2-1-44.

850 Kilocycles

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Authority to determine operating power by direct measurement of antenna power.

1210 Kilocycles

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power of auxiliary transmitter.

MISCELLANEOUS APPLICATIONS

W71NY—Bamberger Broadcasting Service, Inc., New York, N. Y.—License to use transmitter formerly licensed to High Frequency Experimental Station W2XOR as an auxiliary transmitter with power of 1 KW.

NEW—Columbus Broadcasting System, Inc., New York, N. Y.—Construction permit for a new international broadcast station to be operated on **6060, 6120, 6170, 9650, 11830, 15270, 17830, 21520** and **21570 kc.**, with power of 50 KW, A3 Emission, unlimited time except share time on all frequencies with WCRC, WCBX and WCDA; share time on **6060 kc.** with KWID and KWIX, and use **6120 kc.** by special authority.

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Construction permit for a new international broadcast station to be operated on **6060, 6120, 6170, 9650, 11830, 15270, 17830, 21520** and **21570 kc.**, with power of 50 KW, A3 Emission, unlimited time except share time on all frequencies with WCRC, WCBX and WCDA; share time on **6060 kc.** with KWID and KWIX, and use **6120 kc.** by special authority.

NEW—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit programs originating in NBC's studios at 30 Rockefeller Plaza, New York and/or points in U. S. where network programs may originate, to CMX, Havana, Cuba, for the period beginning 8-20-43.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Gattis Chemical Co., 214 Woodland St., Nashville, Tenn., is charged in a complaint with disseminating false advertisements concerning a medicinal preparation designated "Gattis' K and B. Pills", recommended for use in the treatment of diseases and ailments of the kidneys. (5014)

Globe Insurance Bureau—A complaint has been issued charging Gladys H. Peiser, trading as Globe Inheritance Bureau, 401 Land Title Building, Philadelphia, with using unfair and deceptive practices in the operation of a business which she represents as an agency engaged in locating heirs to estates, but which actually is conducted to assist her customers in obtaining information concerning their debtors. (5012)

Gotham Premium Novelty Co., 303 Fourth Ave., New York, are charged in a complaint with the use of lottery methods in the sale of their merchandise to ultimate purchasers and with placing in the hands of others the means of conducting lotteries. Merchandise sold by the respondents includes wearing apparel, luggage, watches, cameras, novelty jewelry, and cosmetics. (5015)

D. E. Hamiel—Misrepresentation of a solution designated "All-Winter Anti-Freeze" is alleged in a complaint issued against D. E. Hamiel, 329 East Long St., Columbus, Ohio, trading as All-Winter Anti-Freeze Co. (5016)

Huddersfield Worsted Mills Corp., 257 Fourth Ave., New York, is charged in a complaint with misrepresentation in the sale of textile fabrics used in the manufacture of suits, slacks and other wearing apparel for men. (5009)

Isabelle Beautetics Co. and as R. H. Tillson Co., 4058 Wyoming St., St. Louis, engaged in selling a cosmetic designated "Velskin," is charged in a complaint with misrepresenting the properties and effectiveness of the preparation. (5010)

National Biscuit Company, 449 West 14th St., New York, largest producer and distributor of bakery packaged food products in the United States, is charged in a complaint with violation of the Robinson-Patman Act by discrimination in price between different purchasers of its products. (5013)

Ruberoid Company—A complaint has been issued charging The Ruberoid Co., 500 Fifth Ave., New York, with violation of the Robinson-Patman Act by discriminating in price between different purchasers of its products. The respondent corporation is one of the country's largest manufacturers and distributors of asbestos and asphalt roofing, insulating materials and allied products, selling directly to wholesalers, retailers and applicators. The latter class of purchasers consists of contractors who apply the respondent's products to buildings. (5017)

Union Trading Stamp Company and Frank A. Hayes, individually and as an official of the corporation, 549 West Randolph St., Chicago, engaged in the manufacture of sales promotion plans or devices, trading stamps and trading cards, and in their sale and distribution to retail merchants and others, are charged in a complaint with unfair methods of competition and unfair acts and practices within the meaning of the Federal Trade Commission Act. (5011)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Associated Laboratories, Inc., 5112 21st St., Long Island City, New York, has been ordered to cease and desist from misrepresenting the therapeutic properties of Kelp-A-Malt Tablets, which it advertises as a competent treatment for persons who are underweight and in a run-down condition. The respondent trades as Allied Laboratories, Kelp-A-Malt Co. and Seedol Co. (2979)

Cigarette Smoker's Survey and Credit Advisory Service has been ordered to cease and desist from unfair and deceptive practices in connection with the sale of printed matter consisting of circular letters with reply card attached, designed for use by creditors and collection agencies in obtaining information concerning debtors. (4935)

Bertha M. Urban—An order has been issued directing Bertha M. Urban, Ewing, Nebr., to cease and desist from disseminating false advertisements concerning a fruit juice product designated "Lakota," which she sells and recommends as a remedy for migraine headache, constipation, and certain other conditions. (4761)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Federal Victory Garden Research Institute, 16th and West End Ave., Nashville, Tenn., stipulated that they will cease and desist from representing that instructions contained in a pamphlet they publish and sell will enable the inexperienced Victory Gardener to grow, without soil, an ample supply of "vitamin-laden" vegetables in his attic, garage, basement, or in "most any other available space." (3685)

Albert G. Groblewski & Company, Plymouth, Pa., selling and distributing medicinal preparations designated "Groblewski's Headache Powders," "Groblewski's Nasal Jelly," "Groblewski's Jadol," "Nervoteine," "Groblewski's Preparation 'C,'" "Groblewski's Powders for Round Worms," "Oohotin," "Groblewski's Revila Powders" and "Egiuterro," has stipulated to cease and desist from disseminating any advertisement pertaining to the preparations or any other preparations of substantially the same properties, whether sold under such names or any other names, which fail clearly to reveal that use of the Headache Powders may cause collapse or that repeated doses may cause dependence upon the drug, that not to exceed two powders should be taken within 24 hours, and that the preparation should not be given to children; that repeated use of "Groblewski's Nasal Jelly" by aged or debilitated persons or by infants may produce oil injury in the lungs, and that the preparation should not be used by persons afflicted with heart disease or high blood pressure; that "Groblewski's Jadol" is a laxative and should not be taken in the presence of nausea, vomiting, abdominal pains or other symptoms of appendicitis. (3684)

Joyce Art Studio, 7908 Justine St., Chicago, selling and distributing photographs or enlargements of photographs, has stipulated to cease and desist from use of the words "Art Studio" or "Studio" as part of its trade name, and from use of words of like meaning implying that it actually owns, operates or controls a studio or photographic establishment; representing that an offer of photographs or photographic enlargements is an introductory or special offer, when in fact it is a regular offer; and from the use of fictitious price figures on advertising cards or circulars used in connection with the sale of such products, or from otherwise representing as the customary or usual prices thereof prices which, in fact, are fictitious and in excess of the prices that he regularly and customarily charges for his products. (3682)

James Lees & Sons Company, Bridgeport, Pa., selling and distributing knitting yarns, has stipulated, in connection with the sale of its products, to cease using the words "Spanish," "Scotch," "Persian," "Shetland," "Saxony" or other words connoting foreign geographical origin as designations for or as descriptive of products not made of materials grown or produced in the country or locality indicated by such geographical designation or term. (3681)

National Service and National Forwarding, Post Office Box 200, Oklahoma City, engaged in selling club memberships in the National Service and lists of names purporting to be members of such service or club, have stipulated to cease representing that introductions of members are made in a confidential manner; that any of the results claimed in their advertising is guaranteed; that their statements relating to the financial standing, education, character, age, occupation or profession of those whose names appear on membership lists are other than mere statements of the members themselves, in the absence of some responsible investigation into the truth or falsity of such statements; that any specified price is the regular membership fee when such price is in excess of the amount regularly charged; that any offer is limited as to time, when such is not the fact, or that any offer is a "special" offer unless it is less in price than the usual or regular price and limited in time. (03122)

Rossi Cigar Co., Inc., Oakland, Calif., selling and distributing cigars, has stipulated to cease representing that it is the largest manufacturer on the Pacific Coast of "Toscani" cigars or cigars simulating Italian cigars, or of cigars generally, or that the smoking of Rossi Brand cigars or any other cigars is harmless, easy on the throat, or will not cause dryness of the mouth. (3683)

Williamsburg Galleries, High Point, N. C., manufacturing and distributing furniture, has stipulated to cease and desist from use of the trade or corporate name "The Williamsburg Galleries" and the legend or motto "That the Future May Learn from the Past"; from use of the word "Williamsburg" or any other word, term or expression which may convey the belief or impression that Tomlinson of High Point or any subsidiary or agency thereof has a working agreement with, is a subsidiary of or is connected with Colonial Williamsburg, Inc.; and from using, or placing in the hands of others the means to use, any depiction or representation, the effect of which may tend to convey the belief that its furniture or any part thereof is a reproduction, that is, a true counterpart or reconstruction, of the original or reproduced Eighteenth Century furniture with which the reconstructed homes at Williamsburg, Va., are furnished. (3687)

Winslow Engineering Company, Oakland, Calif., engaged in manufacturing filtering elements designed for use as replaceable inserts in various alleged standard makes of oil filters, and H. G. Makelim, trading as Magneto Repair Company, Oakland, Calif., selling filtering elements supplied to him by the other respondents, have stipulated that in connection with the sale or distribution of the "Winslow Oil Conditioning Element," they will cease and desist from representing that it will consistently pass and filter more oil than, or assure superior performance to, any other type of filtering element, when used in connection with any of the alleged standard makes of oil filters; or that it will perform as represented when used in any type of oil filter or is capable of performing in excess of what is actually the fact. (3686)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 32, August 6, 1943

NAB BOARD RESOLUTIONS

Upon adjournment of the special meeting of the NAB Board of Directors in Chicago, July 30, the following resolutions were released:

RESOLUTION NO. 1

WHEREAS the Board of Directors of the National Association of Broadcasters met in Chicago on July 30th to consider proposals of its Legislative Committee and

WHEREAS the purpose of this meeting was misrepresented to some sections of the industry as bearing on the termination of the contract of the incumbent as President, before the termination thereof, therefore

BE IT RESOLVED that the Board of Directors of the National Association of Broadcasters emphatically declares that such was not the purpose of the meeting, nor did it form any part of its deliberations.

RESOLUTION NO. 2

WHEREAS the name of Wilbur B. Lewis was suggested to the Board of Directors of the National Association of Broadcasters as a possible successor to Neville Miller at the expiration in 1944 of the latter's six years incumbency in office, and

WHEREAS the Board of Directors sincerely desires to consider the name of Mr. Lewis for this post, and

WHEREAS Mr. Lewis, for reasons which the Board respects and admires, found it necessary to withdraw his name from such consideration.

BE IT RESOLVED that the Board expresses its regret that extenuating circumstances intervened to preclude Mr. Lewis' availability.

RESOLUTION NO. 3

RESOLVED that a Nominating Committee of six be elected to present to the Board its recommendation for Presidency of the National Association of Broadcasters at the expiration of the incumbent's contract; the Committee to report to the Board at its next regular meeting or a special meeting called for that purpose.

Members elected were: Don S. Elias, WWNC, Asheville, N. C.; G. Richard Shafto, WIS, Columbia, S. C.; John J. Gillin, Jr., WOW, Omaha, Neb.; J. O. Maland, WHO, Des Moines, Iowa; James D. Shouse, WLW, Cincinnati, Ohio; Paul W. Morency, WTIC, Hartford, Connecticut.

Chairman of the Committee to be elected by the Committee.

Cox Hearings

A digest of the current hearings in New York City of the Cox Select Committee will be prepared for issuance to NAB members so soon as the transcripts are forwarded to Washington headquarters of NAB. The hearings are centering around activities of the Federal Communications Commission in the foreign language broadcasting picture in the U. S. A.

TELEVISION REPRINT COMING

NAB headquarters has completed arrangements with *Fortune* magazine to reprint the article "The Promise of Television" in the August issue for distribution to the broadcasting industry. Your copy will be in your hands very soon.

A CHALLENGE

(The following excerpt was taken from an article in *Fortune* magazine for July, 1943, entitled "Ferment in Education." We have given this excerpt the above title, reasons for which are obvious after it is read.)

"There can be no question, of course, whom we shall educate. Education may at one time have seemed a charitable grant to those who received it; today it is a necessity to the community that gives it. We cannot afford an ill-educated electorate, and we can insist that any child who has learned to talk—speech is probably the greatest achievement in every person's life—should have twelve years' schooling.

"These twelve years are necessary not because the schools have so much more information to impart. Too much information and too few standards of judgments are the causes of cultural inflation. They are necessary not because the home and the church and the community have abdicated to the schools; but to the forms of cheap, mechanical, mass entertainment and mass information—to the movies, the radio, the press, and the advertisements. These may seldom have an educational purpose, but they have a pronounced educational effect. *They tend to present as desiderata the trappings of material success, of false comfort, of egotistic adventure; they appeal to personal avarice and personal vanity: they play up and down on the child's nerves, and furnish him mechanical emotional outlets at the same time that they apply to him that most insidious of regimentations, mass anathesia.* (italic type is ours.—Ed.) Against this deadly passivity, our schools are the only bulwark. If they are not strengthened and if they do not teach the student to discriminate and to evaluate, not they but commercial indoctrination or, still worse, political mobstering will form the minds of our children, and in so doing destroy whatever capacity is within them for democratic thinking."

Labor

WLB PANEL WILL HEAR TRANSCRIPTION PRO AND CON

A hearing by a War Labor Board panel on the A. F. of M. transcription ban is tentatively scheduled to start August 16 in New York.

The WLB appointed the panel this week simultaneously

(Continued on page 342)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N St., N.W. WASHINGTON Phone NAtional 2080

Neville Miller, *President* C. E. Arney, Jr., *Secretary-Treasurer*

Lewis H. Avery, *Director of Broadcast Advertising;* Walter L. Dennis, *Chief, News Bureau;* Willard D. Egolf, *Assistant to the President;* Howard S. Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

WLB PANEL WILL HEAR TRANSCRIPTION PRO AND CON

(Continued from page 341)

with the release of its order, taking jurisdiction in the dispute but refusing to terminate the strike "at this time."

Members of the panel:

Public—Arthur Meyer, chairman of the New York State Mediation Board.

Industry—Henry Woodbridge, assistant to the president of the American Optical Company.

Labor—Max Zaritsky, president of the United Hat, Cap and Millinery Workers (A. F. of L.).

This panel is to report its findings of fact and recommendations to the WLB which will make the final decision.

CHECK UNION REPRESENTATION

A recent decision by the National Labor Relations Board shows how a radio station (or any employer) can get into trouble by signing a closed shop contract with a labor union without first making sure that the union represents the employees involved. Copies may be obtained at the NAB or at the NLRB (Case C-2622).

NINE MORE LABOR SHORTAGE AREAS NAMED BY WMC

The War Manpower Commission has added nine labor market areas to its "critical shortage" list. Radio stations in those areas must now justify any work week of less than 48 hours.

The areas added:

Anderson, Ind.; Everett, Wash.; Los Angeles; New Bedford, Mass.; Oklahoma City; Racine, Wis.; Spokane, Wash.; Brownsville, Tex., and Hawaii.

The WMC does not want any station to increase any work schedules that would not result in the release of manpower or would not obviate the necessity for hiring additional manpower. It is up to each station to show that its present (or proposed) schedules of less than 48 hours meet these requirements.

Local WMC officials should be consulted.

WOMEN'S GROUP URGES WLB ACTION ON PETRILLO BAN

The board of directors of the General Federation of Women's Clubs meeting recently in Massachusetts passed the following resolution among numerous others:

Radio Transcription

WHEREAS, James Caeser Petrillo, President of the American Federation of Musicians, since last August 1 (1942), has banned the recording of music for both home and radio; and

WHEREAS, In accordance with our national wartime labor policy, the manufacturers of radio transcriptions referred their dispute with Mr. Petrillo to the United States Conciliation Service, be it therefore

RESOLVED, That the Board of Directors of the General Federation of Women's Clubs, in meeting assembled in Swampscott, Massachusetts, July 1, 1943, hereby urges the Director of the United States Conciliation Service to certify this dispute to the National War Labor Board for appropriate disposition if conciliation fails to bring settlement within a reasonable time; and be it further

RESOLVED, That the Board of Directors of the General Federation of Women's Clubs urges the National War Labor Board to give prompt consideration to this prolonged strike, if and when it is certified to the Board.

Presented by: Mrs. J. Warren Burgess,
Chairman Fine Arts Department.

Broadcast Advertising

PLANNING A RATE INCREASE? PUT CARDS ON TABLE

Recently a few letters from member stations have indicated that rate increases were being contemplated. Discussing that problem with William B. Maillefert of Compton Advertising, Inc., 630 Fifth Avenue, New York, N. Y., brought out some suggestions that may interest you, if you are faced with a similar problem. They are reproduced through his permission.

"It is extremely helpful to both agencies and advertisers if the station is considerate enough to attach a letter to the newly issued rates card, explaining:

1. Why the rate card is being changed (i.e., new transmitter with increased coverage, power increase, frequency improvement, increased operating costs, etc.).
2. Exactly which rates are increased and the approximate percentage.
3. Which rates are decreased and the approximate percentage.

"After receiving such a letter, the picture is immediately clear for agencies and advertisers. They can then say: 'Aha—Station YXXX has a new transmitter and they have increased their power from 1000 to 5000 watts at night, so they have decided they are justified in increasing their nighttime rates 17%.—I guess that isn't too bad.' "

Doesn't that sound like a logical approach to the problem of a rate increase?

VICTORY GARDENERS' MEAT, BUT NOT FOR RADIO STATIONS

That perennial purveyor of per-inquiry propositions—Huber Hoge and Sons—is again offering "The Garden Encyclopedia" on a contingent basis. It seems that this will prove the salvation of many inept Victory gardeners—but we don't think it offers radio stations the same opportunity—unless you have found some way to give time away at a profit.

RECORDED PROGRAM SERVICE 'DISCOVERS' P-I POSSIBILITIES

One of the most naive letters sent to NAB in a long time is one written to some radio stations by Associated Recorded Program Service. It seems that someone has just told that estimable organization about the possibility of selling "Masterpiece Reproductions" on a per-inquiry basis. This proposition gets the scallion of the week.

DON'T BE AN ALICE ABOUT THESE WONDER BOOKS

Several stations have sent in copies of the letter and broadside from Airmart Incorporated, offering the super-duper "Wonder Books" on one of the frankest propositions we have ever seen. The deal is very simple: 50¢ per inquiry for the first free volume; 60¢ per inquiry if you can produce 60 or more leads per week; but only 45¢ per inquiry on a guaranteed basis. In other words, if the advertiser has to do any worrying about the returns, you can't be paid as much. Isn't that proof of the insolent attitude of most advertisers offering per-inquiry business?

TODAY'S GOLD BRICK BLIND MERCHANDISE

The Gibson Company of Harlan, Iowa, has a strictly new angle on the alleged plight of some radio stations. Sell merchandise on a commission basis. What kind of merchandise? Any kind! Fill out and return the card and you will get complete details. Off the record, we used to have more fun for a quarter at the church bazaar grab-bag.

SANDO SANDBAGGING AGAIN

When we first glanced at the letterhead of this company, we thought it read "The Soandso Company." At least, the offer sounded that way. It's another of the "Service Record" offers. If every "Service Record" offer pulls as well as the promoters of such offers insist, then every man, woman and child in America must have a dozen service records for every soldier, sailor and marine. Let's get on with the war and save that paper!

"HOST STATIONS" URGED BY J. LEONARD REINSCH

Following the recommendation of J. Leonard Reinsch, managing director of WIOD, WHIO and WSB, the headquarters staff at NAB has been exploring the possibilities of stations acting as hosts to ex-radio personnel in the armed forces on leave or stationed in their towns.

Mr. Reinsch prefaced his recommendation with the following:

> "I have talked to many service men and know the feeling of aloneness they all get at one time or another. With the increased drafting of higher calibre men, there is more of a tendency to periods of depression.
>
> We have tried, between our three stations, to entertain the men from our organization as they are assigned to Atlanta, Miami or Dayton, and as the opportunity presents to entertain other radio men in the service. We would like to expand that expression of friendliness to other radio station men."

He outlined a plan under which all stations shall provide personnel now in the armed forces, or entering the armed forces, with identification cards. These cards, coupled with a telephone call, would set up the machinery for recognition, entertainment or other forms of hospitality.

It is a known fact that many service men and women, on their own volition, seek out radio stations for the company of "brothers and sisters" in radio when on leave or assigned to new localities.

Very little need be done in the industry to make this an official activity, viz.:

1. Issue identification cards to all former personnel now in the armed forces, and to personnel entering the armed forces, as follows, signed by the manager:

   TO BROADCASTING STATIONS:

   . . . . . formerly held the position of . . . . with this broadcasting station.

   Personal courtesies will be greatly appreciated by the management.

   . . . .
   Station . . . .
   (Address) . . . .

2. Post at U.S.O. headquarters and other centers, in cooperation with other stations in your city, signs with the following heading:

   Attention Former Radio Personnel!

   List call letters, location, telephone number and name of someone to ask for.
   Close with: "We'll be glad to see you."

Use of the line "HOST STATIONS" may not be advisable unless you are prepared to extend courtesies to service men and women of all classes, as this has a general implication in a local community.

Traffic through your station may not be great in this undertaking but provision should be made for a warm welcome and ready assistance, if requested.

Comments on this proposal are requested by NAB headquarters, where a file of "HOST STATIONS" is desired, and further cooperation is offered those who wish to participate in this activity. Please address Willard D. Egolf, assistant to the president.

DAVE BOONE HAS A LAUGH AT PETRILLO'S 'TRAVELLERS'

The following column appeared in the Thursday, July 29, issue of the *New York Sun* and is reprinted by permission:

"DAVE BONE SAYS:

"It's pretty hard to keep a straight face when you read J. Caesar Petrillo's announcement that in response to a personal plea from the President that the people of America be permitted to enjoy good music like the people of other countries, Mr. Petrillo has arranged to put an orchestra on tour.

"In no other country on earth is it easier for the people, rich, poor or medium, city dweller or country hermit, to get good music from the best artists. The radio has made it possible. Yet Mr. Petrillo asks the public to swallow the stuff about needing a traveling orchestra so Americans can have the same opportunity Europeans have. Oh boy.

" 'The President pointed out to me that in many countries concert orchestras are sent from city to city so that the people not in a financial position to travel to the big cities to hear the largest orchestras can hear the finest music free of charge, and I promised I would be happy to take the matter up,' says J. Caesar. I'll bet the President had to laugh at that one.

"Well, it's going to be a great privilege to the great mass of American men, women and children to be able to hear good music and shake off that terrible feeling of being deprived of the great advantages peoples have everywhere except in America. They've heard a lot of rumors about music but they don't know what it is like. And it's just too bad."

RADIO SPACE CUTS LOOM AS NEWSPAPERS ACT ON SHORTAGE

Shortage of newsprint and continued rationing of same among newspapers is likely to force elimination of most radio columns in New York newspapers, *Billboard* magazine reports in its August 7 issue.

The *New York Daily News* column "Listening In" has been axed after 18 years' run with veteran columnist Ben Gross slated for other duties.

Program listings will remain as will paid space (the last to go any time).

NAB headquarters is interested to know if station managers have encountered this situation elsewhere over the country and, if so, what steps, if any, have been taken to counteract it. Please advise Willard Egolf at NAB headquarters of your comments, findings and actions on this matter.

Mr. Egolf also would like reports on:

Any "Program Pre-vues" types of shows now carried by stations (including script if possible) for report to the Program Managers Executive Committee.

NBC has programmed "Your Radio Reporter" as a counteraction to this loss of space. Many NBC affiliates are promoting this show vigorously, we have been informed.

Main problem confronting broadcasters is to program a "listenable" type of program pre-vues shows. This is also a good time to reiterate the fact that radio more and more must stand on its own feet and tell its own stories in its own way.

CENSORSHIP ASKS CAUTION IN ANY MENTION OF RADAR

Bryon Price, director, Office of Censorship, has released the following statement:

"The extent of current public discussion of radar is causing increasing concern to the Government.

"The principle of radar is generally understood here and abroad, and some limited disclosures have been made officially. New methods of applying the principle are being developed, however, and there is much the enemy does not know.

"The fact of prior publication should not be used to cover added description, discussion, and deduction, or to support a theory or draw a conclusion.

"Radar is a secret weapon within the meaning of the Code. Editors and broadcasters are especially requested to be alert to every mention of radar and military electronic devices; to establish beyond all question that there is appropriate authority for every statement made; and to submit all material on the subject—other than that released by appropriate Government authority—to the Office of Censorship for review in advance of publication or broadcast.

"So inclusive a request would not be made if the highest considerations of national security were not directly involved."

U. S. BROADCASTERS DEFEAT AXIS IN BATTLE TO CONTROL AMERICAN RADIO INFORMATION

(The following release is reprinted from a release by the Coordinator of Inter-American Affairs.)

Nazi Propaganda Minister Goebbel's radio rantings to the Americas are falling on deaf or cynical ears these days, because of a successful fight by United States broadcasters to wrest control of the American ether from the Axis. Goebbel's dutiful mouthpieces in Tokyo and Rome are faring no better.
